That we may have appropriate legislation by Congress giving to the farmers short-time credits, so that their produce may be marketed in an orderly manner, thereby stabilizing the prices of farm products.

That the Federal farm loan act may be held constitutional, giving to the farmers an opportunity to finance their long-time demands by first-mortgage loans at a reasonable rate of interest.

This will bring to the farmers, the great producing class of America, prosperity, and, through them, prosperity to the banker, the merchant, the manufacturer, and all other classes.

We believe this will go a long way toward readjusting economic conditions.

EXTENSION OF REMARKS.

Mr. ACKERMAN. Mr. Speaker, I ask unanimous consent to extend my remarks on this bill—my own remarks.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. VAILE. Mr. Speaker, I make the same request.

The SPEAKER. The gentleman from Colorado makes the same request. Is there objection?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS TO-MORROW.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to dispense with Calendar Wednesday business to-morrow.

Mr. GARD. Reserving the right to object, Mr. Speaker, what committee has the call?

Mr. MONDELL. The Committee on Military Affairs. It is entirely agreeable to the committee, both the minority and the majority.

Mr. GARD. Has the gentleman consulted with the minority?

Mr. MONDELL. I have.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

ADJOURNMENT.

Mr. WOOD of Indiana. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 4 minutes p. m.) the House adjourned until to-morrow, Wednesday, January 12, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

323. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of Willamette Slough, Oreg., with a view to removing old dikes and breakwaters now obstructing navigation; to the Committee on Rivers and Harbors.

324. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War, submitting a supplemental estimate of appropriation required by the various branches of the National Home for Disabled Volunteer Soldiers, fiscal year 1921 (H. Doc. No. 973); to the Committee on Appropriations, and ordered to be printed.

325. A letter from the Secretary of the Navy, transmitting a tentative draft of a bill to authorize the President to relieve certain officers and enlisted men from the disabilities which they have heretofore, or would hereafter suffer through the charge of desertion standing against them on their records, and for other purposes; to the Committee on Naval Affairs.

326. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Dauphin Island Bay, Ala., and channel connecting Dauphin Island Bay with the Main Ship Channel across Mobile Bar; to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. JONES of Pennsylvania, from the Committee on Interstate and Foreign Commerce, to which was referred the joint resolution (S. J. Res. 186) to extend the authority of the county of Luzerne, State of Pennsylvania, to construct a bridge across the North Branch of the Susquehanna River from the city of Wilkes-Barre, county of Luzerne, Pa., to the borough of Dorranceton, county of Luzerne, Pa., reported the same with amendments, accompanied by a report (No. 1181), which said bill and report were referred to the House Calendar.

Mr. PARKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 14739) to amend section 6 of an act entitled "An act extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting health, sanitation, quarantine, taxation, public roads, self-propelled vehicles, and police powers on the Canal Zone, and for other purposes, including provision as to certain fees, money orders, and interest deposits," approved August 21, 1916, reported the same without amendment, accompanied by a report (No. 1182), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. FULLER, from the Committee on Invalid Pensions, to which was referred sundry bills of the House, reported in lieu thereof the bill (H. R. 15661) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, accompanied by a report (No. 1183), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15546) to repeal certain portions of an act entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war," approved June 5, 1920, reported the same without amendment, accompanied by a report (No. 1180), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 15381) granting an increase of pension to Maston W. Harris, and the same referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. JOHNSON of Washington: A bill (H. R. 15658) to increase the tariff duties on cherries, to provide additional revenue, and for other purposes; to the Committee on Ways and Means.

By Mr. CLARK of Missouri: A bill (H. R. 15659) to provide additional terminal facilities in square east of 710 and square 712 for freight traffic; to the Committee on the District of Columbia.

By Mr. HAYDEN: A bill (H. R. 15660) to provide for additional hospital and out-patient dispensary facilities for patients of the Bureau of War Risk Insurance, of the Federal Board for Vocational Education, Division of Rehabilitation, and other persons entitled by law to treatment by the Public Health Service; to the Committee on Public Buildings and Grounds.

By Mr. FULLER: A bill (H. R. 15661) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; committed to the Committee of the Whole House and ordered printed.

By Mr. NOLAN: A bill (H. R. 15662) to extend temporarily the time for filing applications for letters patent, for taking actions in the United States Patent Office with respect thereto, for the reviving and reinstatement of applications for letters patent, and for other purposes; to the Committee on Patents.

By Mr. SNYDER: A bill (H. R. 15663) to reorganize the Indian Service, to expedite the settlement of Indian affairs, and for other purposes; to the Committee on Indian Affairs.

By Mr. KAHN: A bill (H. R. 15664) to authorize the Secretary of War to furnish to the National Museum certain articles of the arms, material, equipment, or clothing heretofore issued or produced for the United States Army, and to dispose of colors, standards, and guidons of demobilized organizations of the United States Army, and for other purposes; to the Committee on Military Affairs.

By Mr. WHITE of Maine: A bill (H. R. 15665) to amend section 6 of the act of Congress entitled "An act for the protection and regulation of the fisheries of Alaska," approved June 26, 1906; to the Committee on the Merchant Marine and Fisheries.

By Mr. TAYLOR of Colorado: A bill (H. R. 15666) to add certain lands to the Uncompahgre National Forest, in the State of Colorado; to the Committee on the Public Lands.

By Mr. LANGLEY: Resolution (H. Res. 639) for the immediate consideration of H. R. 14315; to the Committee on Rules.

By Mr. HILL: Resolution (H. Res. 640) providing for inquiry as to means for better safeguarding official records and files of the United States of America within the District of Columbia; to the Committee on Public Buildings and Grounds.

By Mr. WARD: Joint resolution (H. J. Res. 444) authorizing the President to require the United States Sugar Equalization Board to take over and dispose of 13,902 tons of sugar imported from the Argentine Republic; to the Committee on Agriculture.

By Mr. LANGLEY: Joint resolution (H. J. Res. 445) authorizing the Public Buildings Commission created by the act of Congress approved March 1, 1919, to inquire into the feasibility of providing a site and erecting thereon a suitable official apartment house and hotel building for the accommodation of the Vice President and Members of the Senate and House of Representatives and their immediate families, and to submit a report thereon to Congress, with recommendations, at the earliest practicable date; to the Committee on Public Buildings and Grounds.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 15667) granting a pension to Minnie May Andrews; to the Committee on Invalid Pensions.

By Mr. DARROW: A bill (H. R. 15668) for the relief of Cornelius Dugan; to the Committee on Naval Affairs.

By Mr. FOCHT: A bill (H. R. 15669) granting a pension to Loretta Burket; to the Committee on Invalid Pensions.

By Mr. GARD: A bill (H. R. 15670) granting a pension to William M. Golden; to the Committee on Pensions.

By Mr. GOLDFOGLE: A bill (H. R. 15671) for the relief of the heirs of Capt. Jonas P. Levy; to the Committee on Claims.

By Mr. HASTINGS: A bill (H. R. 15672) granting a deed of quitclaim and release to J. L. Holmes of certain land in the town of Whitefield, Okla.; to the Committee on Indian Affairs.

By Mr. JOHNSTON of New York: A bill (H. R. 15673) granting an increase of pension to William Conlon; to the Committee on Invalid Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 15674) granting a pension to John Dale; to the Committee on Pensions.

By Mr. MACGREGOR: A bill (H. R. 15675) granting a pension to Lena A. Belcher; to the Committee on Invalid Pensions.

By Mr. MAGEE: A bill (H. R. 15676) for the relief of the estate of Joseph Matthews; to the Committee on Claims.

By Mr. MERRITT: A bill (H. R. 15677) for the relief of George Rutherford; to the Committee on Military Affairs.

By Mr. ROWE: A bill (H. R. 15678) for the relief of Oliver A. Campbell; to the Committee on Military Affairs.

By Mr. SELLS: A bill (H. R. 15679) granting a pension to Mary E. Constable; to the Committee on Pensions.

By Mr. SLEMP: A bill (H. R. 15680) authorizing the President to appoint George Gibson Harman to the position and rank of first lieutenant, Quartermaster Corps, in the United States Army; to the Committee on Military Affairs.

By Mr. TEMPLE: A bill (H. R. 15681) granting an increase of pension to Ulysses Grant Kirker; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4907. By Mr. DALLINGER: Petition of Boston Lodge No. 264, of the International Association of Machinists, favoring free and unrestricted commercial exchange and traveling conditions and privileges with the Russian soviet government; to the Committee on Foreign Affairs.

4908. By Mr. DARROW: Petition of instructors of the Schaeffer-Wister School, of Germantown, Philadelphia, favoring the Smith-Towner bill; to the Committee on Education.

4909. By Mr. DYER: Petition of the Chamber of Commerce, Kansas City, Mo., protesting against the Kenyon-Anderson bill; to the Committee on Interstate and Foreign Commerce.

4910. Also, petition of the St. Louis Chamber of Commerce, protesting against the passage of the metric-standards bill; to the Committee on Coinage, Weights, and Measures.

4911. Also, petition of J. O. Stephens, John G. Benda, Mrs. J. O. Stephens, V. Budrovick, R. M. Saylor, and J. J. Hogen, all of St. Louis, Mo., favoring the passage of the Smith-Towner educational bill; to the Committee on Education.

4912. Also, petition of Rev. C. Vogelmann, Rev. Fr. Fintan, Rev. A. A. Riss, and Rev. F. Horee, protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

4913. Also, petition of women voters of Washington, Krakaw, and Cuba, Mo., protesting against the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4914. Also, petition of Candy Bros. Manufacturing Co., St. Louis, Mo., protesting against the proposed 10 per cent tax on candy; to the Committee on Ways and Means.

4915. Also, petition of the Chamber of Commerce, Kansas City, Mo., supporting the Nolan Patent Office force and salaries bill; to the Committee on Patents.

4916. Also, petition of the Chamber of Commerce of Kansas City, Mo., favoring the Poindexter antistrike bill (S. 4204) and its counterpart in the House; to the Committee on Interstate and Foreign Commerce.

4917. Also, petition of the Chamber of Commerce of Kansas City, Mo., supporting the French-Capper truth in fabric bill; to the Committee on Interstate and Foreign Commerce.

4918. By Mr. HAYS: Petition of the Chamber of Commerce of Cape Girardeau, Mo., urging Congress at its next session to provide maintenance of the South Pass and the earliest possible completion of the Southwest Pass; to the Committee on Rivers and Harbors.

4919. By Mr. JOHNSTON of New York: Petition of the American Legion of New York County, N. Y., protesting against the Sunday blue laws; to the Committee on Interstate and Foreign Commerce.

4920. By Mr. LEHLBACH: Petition of sundry citizens of Newark, N. J., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

4921. By Mr. MacGREGOR: Petition of sundry citizens of Buffalo, N. Y., protesting against the use of French colonial troops in the occupied territories of Germany; to the Committee on Foreign Affairs.

4922. By Mr. O'CONNELL: Petition of the Gerseta Corporation, 461 Fourth Avenue, New York, urging a revision of the United States income tax laws; to the Committee on Ways and Means.

4923. By Mr. JOHN W. RAINEY: Petition of the Chicago Distrikts-Verband, protesting against the use of barbarous or semibarbarous troops in the occupied territories of Germany; to the Committee on Foreign Affairs.

4924. Also, 700 petitions presented by Gus Scheel, of Chicago, Ill., protesting against the use of the French colonial troops in occupied Germany; to the Committee on Foreign Affairs.

4925. By Mr. TAGUE: Petition of the E. B. Horn Co., Boston, Mass., protesting against an increased tax on jewelry; to the Committee on Ways and Means.

SENATE.

WEDNESDAY, *January 12, 1921.*

(Legislative day of Monday, January 10, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

EDWIN S. JOHNSON, a Senator from the State of South Dakota, appeared in his seat to-day.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Harrison	McNary	Smith, S. C.
Brandegee	Heflin	Moses	Smoot
Calder	Henderson	Nelson	Stanley
Capper	Johnson, Calif.	New	Sterling
Culberson	Johnson, S. Dak.	Nugent	Sutherland
Curtis	Jones, N. Mex.	Overman	Swanson
Dial	Jones, Wash.	Page	Trammell
Dillingham	Kellogg	Phipps	Underwood
Edge	Kenyon	Pittman	Wadsworth
Fernald	Keyes	Poindexter	Walsh, Mass.
France	King	Ransdell	Walsh, Mont.
Gay	Knox	Robinson	Warren
Glass	La Follette	Sheppard	Williams
Gronna	Lenroot	Sherman	Wolcott
Hale	McCumber	Smith, Ariz.	
Harris	McKellar	Smith, Md.	

Mr. HARRISON. I was requested to announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Missouri [Mr. REED] on account of illness.

I was also requested to announce the absence of the Senator from Kentucky [Mr. BECKHAM] and the Senator from California [Mr. PHELAN] on official business.

The VICE PRESIDENT. Sixty-two Senators have answered to the roll call. There is a quorum present.

CREDENTIALS.

The VICE PRESIDENT laid before the Senate a certificate of the governor of Missouri certifying to the election of SELDEN P. SPENCER as a Senator from that State for the term of six years beginning March 4, 1921, which was read and ordered to be filed, as follows:

THE STATE OF MISSOURI,
Executive Department.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 2d day of November, 1920, SELDEN P. SPENCER was duly chosen by the qualified electors of the State of Missouri a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1921.

In testimony whereof I hereunto set my hand and cause to be affixed the great seal of the State of Missouri. Done at the city of Jefferson this 5th day of January, A. D. 1921.

[SEAL.] FREDERICK D. GARDNER,
Governor.

By the governor:

JOHN L. SULLIVAN,
Secretary of State.

RESIGNATION OF CHAPLAIN.

The VICE PRESIDENT laid before the Senate a letter from the Chaplain of the Senate, which was read, as follows:

WASHINGTON, D. C., *January 11, 1921.*

Hon. THOMAS R. MARSHALL,
President of the Senate.

MY DEAR MR. PRESIDENT: As my ministerial duties are taking me out of the city of Washington, I desire to resign the office of Chaplain of the United States Senate, to take effect at the will of the Senate.

May I express through you my appreciation of all the courtesies extended to me by the Senators during the time I have served as Chaplain, and to assure each of them of my sincere desire for his success in the great work committed to the Senate.

Respectfully,

F. J. PRETTYMAN.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the joint resolution (S. J. Res. 244) providing for the payment of expenses of conveying votes of electors for President and Vice President.

ENROLLED JOINT RESOLUTION SIGNED.

The message also announced that the Speaker of the House had signed the enrolled joint resolution (S. J. Res. 237) to enable the Secretary of the Senate and the Clerk of the House of Representatives to pay the necessary expenses of the inaugural ceremonies of the President of the United States on March 4, 1921, and it was thereupon signed by the Vice President.

PETITIONS.

Mr. WARREN presented a resolution adopted by the Rawlins Range Association, of Rawlins, Wyo., favoring the emergency tariff bill, which was referred to the Committee on Finance.

He also presented a telegram in the nature of a petition of the Chamber of Commerce of Cheyenne, Wyo., praying for the enactment of legislation appropriating sufficient funds for the continuance of the coast-to-coast aerial mail service, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution adopted by the Rawlins Range Association, of Rawlins, Wyo., favoring the so-called truth-in-fabric bill, which was referred to the Committee on Interstate Commerce.

AMERICAN NATIONAL RED CROSS.

Mr. NEW, from the Committee on Foreign Relations, to which was referred the bill (S. 4826) to amend section 5 of the act entitled "An act to incorporate the American National Red Cross," approved January 5, 1905, reported it favorably without amendment.

DON MANUEL ESTRADA CABRERA.

Mr. MOSES, from the Committee on Foreign Relations, to which was referred Senate resolution 395, submitted by him December 8, 1920, reported it favorably without amendment, and it was considered by unanimous consent and agreed to, as follows:

Whereas on the 14th day of April, 1920, in the city of Guatemala, there was drawn and signed in the American Legation and in the presence of the American minister certain articles of capitulation, under the terms of which the constitutional President of the Republic of Guatemala, Don Manuel Estrada Cabrera, in order to avoid bloodshed agreed to surrender to the revolution then resisting his authority, in consideration of which the leaders of said revolution and the provisional government established by them, of which Don Carlos Herrera was titular president, agreed to lodge Don Manuel Estrada Cabrera in the military academy, giving the most solemn and ample guaranties for his life and property; and

Whereas upon the surrender of Don Manuel Estrada Cabrera, pursuant to said articles of capitulation, he was, in violation thereof, forthwith removed to the common jail and there confined in a cell used only for the imprisonment of dangerous criminals and deprived of all legal rights and privileges, in order that the said leaders of the revolution might sack his residence and despoil him of his property in its entirety; and

Whereas there is reason to believe that the said Don Manuel Estrada Cabrera continues to be maltreated in every way in violation of the solemn pledges given under the protection of the American Legation: Therefore be it

Resolved, That the Secretary of State be, and he is hereby, requested, if not incompatible with public interests, to transmit to the Senate such information as he may possess bearing upon this subject.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WADSWORTH:

A bill (S. 4827) to authorize the Secretary of War to furnish to the National Museum certain articles of the arms, matériel, equipment, or clothing heretofore issued or produced for the United States Army, and to dispose of colors, standards, and guidons of demobilized organizations of the United States Army, and for other purposes; to the Committee on Military Affairs.

Mr. CALDER. Mr. President, I ask unanimous consent for permission to introduce a bill regulating the coal industry, growing out of the work of the committee on which I have recently been engaged. I ask that it be referred to the Committee on Manufactures.

By Mr. CALDER:

A bill (S. 4828) to promote the general welfare by gathering information respecting the ownership, production, distribution, costs, sales, and profits in the coal industry, and by publication of same, and to recognize and declare coal and its production and distribution charged with public interest and use, and for other purposes; to the Committee on Manufactures.

By Mr. MOSES:

A bill (S. 4829) to amend an act entitled "An act to reclassify postmasters and employees of the Postal Service and readjust their salaries and compensation on an equitable basis." (Public No. 265, 66th Cong.); to the Committee on Post Offices and Post Roads.

By Mr. GRONNA:

A bill (S. 4830) to tax the privilege of dealing on exchanges, boards of trade, and similar places in contracts of sale of grain for future delivery, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. WALSH of Massachusetts:

A joint resolution (S. J. Res. 245) prohibiting the exercise, without the consent of Congress, of the authority conferred upon the Secretary of the Treasury relative to obligations of foreign Governments acquired by the United States; to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

Resolved, etc., That the authority conferred upon the Secretary of the Treasury by section 2 of the first Liberty loan act approved April 24, 1917; section 3 of the second Liberty loan act approved September 24, 1917; section 2 of the third Liberty loan act approved April 4, 1918; section 2 of the fourth Liberty loan act approved July 9, 1918; section 8 of the Victory loan act approved March 3, 1919, to determine the maturity of, and rate, and method and time of payment of interest on, obligations of foreign Governments acquired by the Government of the United States shall not hereafter be exercised without the previous consent of the Congress.

AMENDMENTS TO SUNDRY CIVIL APPROPRIATION BILL.

Mr. ROBINSON submitted an amendment proposing to appropriate $110,000 for the completion of the Government free bath houses at Hot Springs Reservation, Ark., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. SHEPPARD submitted an amendment proposing to appropriate $35,000 for a water storage tank with steel tower, etc., and a small laboratory building, at Galveston, Tex., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. RANSDELL submitted an amendment proposing to increase the appropriation for prosecuting work of flood control on the Mississippi River from $6,670,000 to $10,000,000, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $25,000 for mooring facilities, Algiers, La., immigration station, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

AMENDMENTS TO EMERGENCY TARIFF BILL.

Mr. HARRISON. I propose as an amendment to House bill 15275, the emergency tariff bill, a bill which passed the House some months ago to consolidate, codify, revise, and reenact the general and permanent laws of the United States in force March 4, 1919. I move that the proposed amendment be referred to the Committee on Finance without being printed.

The motion was agreed to.

Mr. RANSDELL submitted an amendment intended to be proposed by him to House bill 15275, the emergency tariff bill, which was referred to the Committee on Finance and ordered to be printed.

AMENDMENT TO ATMOSPHERIC NITROGEN BILL.

Mr. HARRIS submitted an amendment intended to be proposed by him to the bill (S. 3390) to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production; and for other purposes, which was ordered to lie on the table and be printed.

PRODUCTION OF ZINC ORES, ETC.

Mr. SPENCER submitted an amendment intended to be proposed by him to the bill (H. R. 6238) to provide revenue for the Government and to establish and maintain the production of zinc ores and manufactures thereof in the United States, which was ordered to lie on the table and be printed.

LOANS TO FOREIGN GOVERNMENTS.

Mr. WALSH of Massachusetts submitted the following resolution (S. Res. 422), which was referred to the Committee on Foreign Relations:

Resolved, That the Secretary of the Treasury and the Secretary of State be, and they hereby are, directed to transmit, as soon as practicable, to the Senate copies of all official correspondence and other documents relating to the negotiations for the payment of interest on and refunding of the obligations of foreign Governments acquired by the United States under the provisions of section 2 of the first Liberty loan act, approved April 24, 1917; section 3 of the second Liberty loan act, approved September 24, 1917; section 2 of the third Liberty loan act, approved April 4, 1918; section 2 of the fourth Liberty loan act, approved July 9, 1918; and section 8 of the Victory loan act, approved March 3, 1919.

Resolved further, That the Secretary of State and the Secretary of the Treasury be, and they hereby are, directed to advise the Senate whether any negotiations touching the matters referred to have been conducted by oral exchange in whole or in part, and if so, to communicate to the Senate in substance the proposals submitted during the course of such exchanges on behalf of the Government of the United States and such foreign Governments, respectively.

EMERGENCY TARIFF.

Mr. EDGE. Mr. President, while I thoroughly appreciate that the Senate has under consideration to-day the so-called Muscle Shoals nitrate bill, still, at the same time, inasmuch as before a committee of the Senate there is now for consideration the bill known as the emergency tariff bill, and according to public reports the public hearings on that measure have

ceased and the bill is to be acted upon in the committee in a very short period, I feel that it is extremely important, especially for a Senator who is on this side of the Chamber and who has, as I have, some rather clearly defined views on the question of emergency tariff, to express them at this time. I do not wish unnecessarily to delay the final consideration of the Muscle Shoals bill, yet at the same time that bill is designed, as I understand it, to spend a few more million dollars of the taxpayers' money, while, in my judgment, the tariff legislation is designed to increase the income to the country, and it might be just as well to take a quarter of an hour to discuss the other side of the picture.

In considering any tariff legislation, even so-called emergency tariff measures, it is imperative that Congress view the problem from the greatly changed trade conditions brought about by the war.

The high protectionist of a few years ago, if he is fair to his own convictions and the accepted contentions of those days, must recognize that a creditor nation, exporting three times the value of its imports, must consider whether in the end the advantages of possibly increased duty receipts and attendant protection of home industries will actually and profitably balance, with the possibility of the world's markets being eventually closed to us by prohibitive exchange rates, even if not by retaliation.

I agree absolutely that depreciated currency abroad and the corresponding reduction in costs of goods delivered at our ports imperatively demand some immediate advance in duties to cover such depreciation, but I seriously question an otherwise greatly higher range for reasons which seem to me perfectly obvious.

It is not a sectional problem; the manufacturing East has no issue with the West or the South on that score. Tariff, however, must not be used for the maintenance of abnormal war prices anywhere or to prevent a gradual reduction in costs which is essential to national readjustment and deflation. We must recognize that a very large proportion of citizens are intensely interested in obtaining lower living costs. The demand that tariff revision shall be reasonable and not prohibitive under the pretense of being protective deserves our careful consideration.

Up to the 1st of November Europe in 1920 had sent us only $1,078,000,000 in goods, contrasted with $3,721,000,000 in goods which we exported to Europe. The nations of the world, chiefly those of Europe, owe us approximately $15,000,000,000 net, which will call for about $750,000,000 a year in interest charges alone. Reason right here is found for the lopsided exchange rates, which discourage the foreign buyer, while the remarkable convalescence of industry in Europe is making it sufficiently independent to contemplate retaliatory measures if it believes we are exercising undue discrimination in our tariff schedules.

Senators, we can not have the cake and the penny both; the most ardent protectionist, in which class I believe I can claim full membership, must now recognize the unfailing rule of business, that to increase exports and thus encourage and increase production and the employment of labor we must receive payment in either cash or goods in order that the wheels may continue to go around. When the wheels stop turning the bread line forms. And any tariff which in effect acts indirectly, yet effectively, as an embargo against imports through exchange rates or in any other way would, with few exceptions, in my judgment, result only in closing the market for American products; would necessarily reduce prices to the producers, where every effort apparently is now being made by Congress to increase them; would depress the labor market, and certainly would not result in that business development and prosperity which full production and world trade would naturally bring about.

Nor must we for a moment forget the equally imperative necessity for stimulating our own domestic trade. This can not be done by superficial legislation nor by any legislation other than genuine cooperation, for no law on the statute books now or hereafter can supersede the unwritten yet inexorable law of supply and demand. Congress never can help business or industry or agriculture by trying to create false markets or false prices by artificial methods, and it should discourage this chasing of the will-o'-the-wisp. Congress should strive to inspire a renewal of confidence at home, and then there will come coincidently in our own country a greater demand for our own products. While I am a firm believer in a great export business, at the same time I am confident that with a return of confidence we can greatly increase our own domestic purchases and development, and this is bound to come if we stop trying to establish false prices by artificial means. Congress is feeding American business on the shadow when it demands the substance; no pot of gold is to be found at the end of a legislative rainbow.

We must aim first to develop our home markets, to expand, through business activities that will promote prosperity, the purchasing power of our own people and to inspire in them a confidence in soundness and permanency that will induce them to buy, rather than have them live from hand to mouth in the apprehension of uncertainty and instability. Cutting down Government expenditures, getting the Government out of business that is in competition with our citizens, revising of the taxation system, and the installation of a budget are means of reviving domestic confidence. Coincidently we must aim to sell our excess products to other nations, and in that our real profit lies, for in interchanging dollars among ourselves we would make no more profit than a family in which one man was a shoemaker and another a tailor and another a hatter, and each supplied only the others' needs. We must go after the other fellow's money, be it the pound, the franc, the lire, or the yen. So in attaining both these ends we shall automatically encourage American production, which is the foundation of substantial national prosperity.

And right here let me say that we can not possibly get the other fellow's money by financing the other fellow with money advanced by the American Government, as is proposed through the resuscitation of the War Finance Corporation. Such a scheme only will add to the huge indebtedness already owed by foreign nations to the United States. The papers are full and Congress is full of talk that "Europe owes America $15,000,000,000." Instead of arranging for the reduction of that debt, the Government now, through the resurrected War Finance Corporation, is going to increase it. Probably all the money now needed by Europe to purchase American goods can be supplied by American private investment capital, which not only would not increase the European indebtedness to our Government, but actually would tend substantially to decrease it.

It may be argued by advocates of Government financial aid that the financial help to be extended to Europe "will not be in actual cash but through credits, and so no money will go out of this country to foreign lands." Granted; but that is the identical procedure through which the Government loaned the $15,000,000,000 to Europe. Not a dime of that sum went to Europe in cold cash but was kept and expended right here in the United States. Yet it was a loan just the same, and Europe on it owes us $15,000,000,000 to-day. It will be exactly the same thing through Government foreign financing with the War Finance Corporation as the agency. If the Government of the United States is to be made a paternalistic institution for the benefit of foreign nations and of favored classes at home, God help the American taxpayer! And such a policy in the past furnishes the main reason for the high taxes of to-day. Theorists and visionaries who in their hearts should know better persuade the people, "Oh, the Government can stand it; the Government can pay." That is a most wicked deception. The people of the United States are "the Government," and never are they more intimately the Government than in the payment of expenditures of every kind. When the Government was losing hundreds of millions of dollars a month in the operation of the railroads theorists and Government ownership advocates, and even some administration officials, said, "Oh, the Government can pay the deficit." And the Government did pay it and still is paying it; but, so intimately are the people "the Government" that even now pennies are squeezed out of the poor little children's pockets in taxes on their ice cream and toys so that "the Government" can pay for inexcusable extravagance, mismanagement, and waste.

If private capital chooses to lend its resources to foreign purchasers of American goods, that is its business; any individual citizen or group of citizens as such may lend money or credit to whom they will, but for either the legislative or executive branches of the Government to lend the whole people's money, not with profit to the people, but with actual burdens in taxes, is to my mind inexcusable and wrong. Were permanent, concrete advantage to be obtained through this plan one might say that the end justified the means, but in actual practice no one is going to be permanently benefited; very few, if any, will be temporarily benefited, and those whom it is sought by this means to benefit will really suffer in the end.

Furthermore, no matter how much money or credit the United States may lend to Europe either through private or Government channels, we are not going to encourage or stimulate foreign purchasing if we impose an embargo against imports from other lands. If the American producer needs help, don't let us hand him a pair of broken crutches. And it must be remembered that our imports will help pay for the goods we send abroad, will help to restore foreign exchange to a reasonable

basis, and indirectly will help Europe to curtail its enormous indebtedness to the United States. Along wise, conservative banking lines we are justified in furnishing credit abroad to help our market for our goods, and for the specific purpose of furnishing a vehicle through which credit could be granted abroad and actual money be paid to American producers and vendors, the so-called Edge Act was passed by Congress and active movements are under way to utilize its provisions. Recently, for instance, the cotton growers of the South, together with the banking interests of that section, organized a corporation under this act with a capital, I believe, of $6,000,000, and, according to newspaper accounts, the idea has taken hold so firmly that over seven millions was actually subscribed. A corporation under the act, with two millions of capital, already is doing business, with headquarters in New York, and recently steps have been taken, backed by the American Bankers' Association, to organize a corporation with $100,000,000 capital, enabling it to do a business of $1,000,000,000. This will take in various groups in different sections of the country particularly interested in export trade.

These plans are substantial, permanent plans. They will act largely as a curative for prevailing economic ills instead of the quack nostrums which theorists seek to administer to business. They are not efforts artificially to raise prices in the face of the infallible barometer of supply and demand. Ultimately, in my judgment, they will be of more lasting benefit to American farmers and other producers and to American labor than all the efforts under the sun to rehabilitate semiwartime Government agencies or to grant special advantages in our home markets to any particular class of American citizens. However, this particular activity is only one opportunity to help make a market for our products abroad; it can not solve the entire question, far from it; it can only help, and, I believe, help effectually.

It has been said when this general subject has been under discussion on the floor of the Senate that the producers were not taking advantage of the export finance act because only two or three corporations had been organized under it. The answer is that up to a very few months ago producers and business men in general did not feel the actual, pressing necessity of looking out for trade. We still were living in that fools' paradise of large profits made during and immediately following the war, and there was little inspiration or apparent necessity to provide investment capital for such a purpose; the full pains of readjustment and deflation had not yet been felt. But in the past few months, since conditions have materially changed, orders for goods have fallen off and prices to at least the producer, even though not always to the consumer, have shrunk materially. However, as I have frankly stated, this export financing activity will not alone solve the problem. A wise, carefully considered policy on the tariff as it relates to exports and markets may well go side by side with this credit-supplying instrument. The policy, though, must be most carefully considered, and from every possible angle. Hurried legislation will harm more than help, and just to pass a haphazard "tariff bill," especially in such an emergency and crisis, may give a black eye to the genuine Republican—the real American tariff policy, and set it back far more than all the free-trade arguments in the world ever could possibly accomplish.

For one thing, we must carefully consider just what retaliatory measures a high protective tariff at this time may invite from most countries which already are buying our goods or are disposed to buy them. We must consider whether the additional income we might receive from an emergency tariff will compensate the American Government, American business, and the American people at large for an inevitable falling off of imports which ultimately must follow. We must consider whether, through this method, we can artificially raise the prices to the producer and still find him a market abroad or even at home, even if we do manage to keep his competitors out of this country. We can not consume all we produce and the surplus must be sold outside our own country, and it is manifest that we can not sell it at prices established by ourselves if these prices are materially higher than general world prices based on the law of supply and demand. I realize that the producers are suffering great shrinkage in prices, particularly the farmers of the West, Northwest, and South; yet that shrinkage is being very little reflected in the prices the consumer pays for his clothes or his bread or his cotton goods. It is a case of heads, no one wins; tails, everyone loses.

Would not Congress do well—following the very illuminating statement on this line recently by the Senator from Kansas [Mr. CAPPER]—to endeavor to eliminate, or at least curtail, the many profits that seem to be added in the road from the producer to the ultimate consumer? Then, probably, the producer would be in a very much better position to obtain a fair price for his goods and the consumer would not be mulcted by numerous transition profits. Efforts are being made by a committee of the Senate to follow this line of investigation to remedial ends in the coal industry, and, I feel justified in saying, already with considerable practical results.

I am free to admit, Mr. President, that I look with considerable alarm on this undigested and, I am afraid, not carefully considered effort arbitrarily to add to the tariff on certain staples. As stated, some revision is undoubtedly justified because of exchange conditions, but every other angle should likewise be considered before we make the plunge. I would be one of the last men in this Chamber to refuse to vote for a sound protective tariff sufficient to properly protect American industry and agriculture and labor. I believe in this fundamental principle. But, under the changed economic conditions, which can not be ignored, I want most carefully to balance a possible benefit in some cases with the equally possible deterrent in the development of American world trade, as I have generally outlined. The present situation, I fear, is not one that can be safely handled, with proper accruing benefits, as an emergency measure. It is a situation in which each commodity should and must be considered on its own basis, with the utmost care and investigation. As a producing Nation, we must do business with all the world; as a tremendous creditor Nation, we must assure the stability of our world business. As such a Nation as we were before the war, with trade balances fairly even, we were confronted by entirely different conditions and could legislate accordingly. No man can hark back to the days of McKinley and the solely protective tariffs of those times and apply those conditions to these days and present an argument that is really logical or convincing, or will apply in large part to the present situation.

Under every consideration, however, American industry and production must be protected, and I am in no way amending my conviction in that particular, but approach the problem frankly recognizing the changed conditions and their possible effect.

Everyone must thoroughly understand that with the present conditions of foreign exchange it is perfectly ridiculous for us to expect Europe to buy continually from us, when in order to pay they are compelled to add a premium of anywhere from 30 to 900 per cent to their currency to meet their obligations. Certainly, they will buy from any other country in the world than America under such conditions if the goods are to be obtained elsewhere.

Immediately following the war, most naturally, with the devastated condition existing throughout Europe, the United States provided practically the only storehouse from which purchasers could buy, and prices made little difference; they had to purchase from us. Gradually and with increasing momentum they are becoming rehabilitated abroad; their factories are open; their fields in the last year were cultivated in all parts of Europe, and the result from these crops and the activity of these factories will gradually, but permanently, influence trade, and, as has been proved by recent reports of exports and imports, their purchases from us will necessarily decrease in progressive proportion. Therefore, in order to encourage their purchases it is naturally incumbent on us to try to help rectify the present arbitrary exchange conditions, and this can only be done, as every man knows, by restoring a natural and normal balance in trade, and yet we do not want to balance trade at the expense of too greatly lessened exports. We want to do business with all the world and to use our great merchant marine which so far represents an outlay of $4,000,000,000 of the American people's money, and with an interest charge of about $650,000 a day; but without great and ever-growing exports we can not utilize the merchant marine, and to-day, I am informed, hundreds of ships are tied to the docks and will so remain if we do not have the markets, and we can not have the markets if we do not accept trade in exchange. We must export to the maximum of our surplus production, but we also must accept reasonable consignments of imports for our own economic welfare.

Viewed only as a revenue measure, as differentiated from a protective measure, I have serious doubt that an unscientific emergency tariff bill will produce enough additional income to make it worth its salt. By that I mean enough net revenue—enough income to the Government in duties to counterbalance the loss to American business through curtailment of world trade if forced by an American embargo against imports. If schedules are unduly high and unscientific, goods will not come in; and if goods do not come in, it stands to reason there can be no revenue income from that source. Better far, I would say, for instance, to revise the present unscientific, onerous, and unjust tax system, conceived in unbusinesslike theory and born to unproductive oppression. Under this, as millions can testify, dollars are wrung from the people ostensibly for the

Nation's needs, but actually in large part for the enrichment of producers and venders. At every tollgate on the road of any commodity from the producer to the consumer the consumer pays a tax. The producer adds to his price the amount of his excess-profits tax plus a percentage for lagniappe, the middleman adds his excess-profits charge and fails not to tack on just a little for himself, and so it is with each hand through which a commodity passes, until ultimately the consumer has paid from two to six taxes, plus the extra raked off by each hand. In conferences on this question with Government tax experts and others, I am informed, and I am inclined to believe, that one tax at the counter not only would involve far less hardship to the consumer, but actually would provide far more revenue for the Treasury, at a far smaller cost of collection. If this emergency tariff measure is designed to be an income producer, I think we can find far better ways, and ways which will encourage domestic and foreign trade rather than discourage it. And the more trade we have the better will be the prices—the natural, stable prices—for the producer.

We who have stood for protection will stand for protection and always will stand for protection of American industry and agriculture, business, and labor. But we still must recognize the other elements that conditions have introduced into the situation, and I, for one, must repeat that in view of these known facts our consideration of the emergency tariff bill before the Senate should be with an eye to the future, and not alone with the thought that it is going to help, even temporarily, any class of citizens proportionately to the distress it may cost in the long run. We well may encourage imports along certain advantageous lines, and by so doing improve the exchange rates for the countries from which the imports come, thus enabling them to buy more and more from us and encouraging their trade with us. At the same time, as I have iterated and reiterated, we must increase exports in order to keep America at work at the highest pressure of its great potentiality developed under stress of war. We can not impose our own prices, especially if artificially swollen, on possible purchasers if the supply-and-demand prices of the rest of the world are lower than our own. It is a questionable policy, acting alone, to put an embargo on the importation of goods from our rivals with the thought that we are going thus to elevate our own prices; for some day we may awake to find that with the exception of our own domestic market we have little world market for our goods. Then, with growing surpluses of production, prices will shrink to the unfailing level established by supply and demand and the last state of the producer will be worse than the first.

This is not, as I view it, a question of old party tradition or ideals. It is a question for those responsible in Congress to-day to recognize present conditions, and it is my belief that a careful and scientific consideration of this entire subject is vitally essential in order to continue the protective policy to which I believe a majority of this Senate subscribe, and to continue it along lines that will not, in the descriptive vernacular, "kill the goose that lays the golden egg."

ATMOSPHERIC NITROGEN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3390) to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production, and for other purposes.

Mr. WADSWORTH. Mr. President, if there is no more debate upon the pending amendment, it is my intention to suggest the absence of a quorum, and then, if the Senate will consent, I should like to have a vote upon the pending amendment.

Mr. WOLCOTT. Mr. President, a parliamentary inquiry. What is the pending amendment?

The VICE PRESIDENT. It is the amendment of the Senator from New York [Mr. WADSWORTH].

Mr. WADSWORTH. It is the capitalization feature. I will not suggest the absence of a quorum, Mr. President, as we had a call of the roll a short time ago. I call for the yeas and nays on agreeing to the amendment.

The yeas and nays were ordered.

Mr. WALSH of Montana. I ask that the amendment may be stated.

The VICE PRESIDENT. The Secretary will read the amendment.

The Assistant Secretary read the amendment, as follows:

Substitute for lines 4 to 17, inclusive, page 8, the following:

"CAPITAL STOCK AND BONDS.

"The capital stock of the corporation shall consist of 200,000 shares of common stock of the par value of $100. The corporation shall also issue an amount of 20-year bonds bearing interest at the rate of 5 per cent per annum equivalent to one-half of the total expenditure of the Government in constructing and acquiring the properties to be transferred to the corporation under this act, and in addition bonds of like character of a par value equal to the full cost of the completed hydroelectric installation at Muscle Shoals if and when transferred to this corporation. If at the end of any fiscal year the corporation shall not have earned net sums sufficient to meet the interest on said bonds as evidenced by audit of the accounts of said corporation by the Secretary of the Treasury, the corporation shall forthwith cease operations and shall not resume until authorized so to do by the Congress.

"In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President or the Secretary of War, for the proceeds of the sale of nitrate of soda herein made available to the corporation, and for all unexpended balances now under the control of the Secretary of War and applicable to the nitrate plants at Sheffield, Ala., the corporation shall cause to be executed and delivered to the Secretary of the Treasury a certificate for all of the common stock of the corporation and all bonds provided for by this act. The certificate shall be evidence of the ownership of the United States of all stocks of the corporation. The bonds shall be a lien in favor of the United States of all property of the corporation, and the interest on the bonds shall be paid by the corporation into the Treasury of the United States as miscellaneous receipts."

Also substitute for lines 11 to 14, ending with the word "dividends," on page 9:

"The corporation shall have the power to issue and sell common stock in any amount not to exceed $12,500,000 of a par value of $100 per share, representing the moneys appropriated in this act."

Insert on page 10, line 11, after the word "War," the following phrase: "on receipt of an equivalent of common stock."

Substitute for the words "dividends on outstanding preferred stock, such dividends to be paid," beginning on page 10, line 20, the words "interest on the bonds."

Insert after the word "paid," on page 11, line 1, the words "as dividends on the common stock."

Mr. WADSWORTH. Mr. President, there is one little correction which I desire to make to the amendment before it is voted upon, in order to make it consistent throughout. In the very first line of the amendment it should read:

The capital stock of the corporation shall consist of 125,000 shares of common stock of the par value of $100—

Instead of "200,000 shares."

The VICE PRESIDENT. The modification of the amendment will be stated.

The ASSISTANT SECRETARY. So that it will read:

The capital stock of the corporation shall consist of 125,000 shares of common stock—

And so forth.

The VICE PRESIDENT. Is there any further discussion? If not, the Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. FERNALD (when his name was called). I have a general pair with the junior Senator from South Dakota [Mr. JOHNSON] which I transfer to the junior Senator from West Virginia [Mr. ELKINS], and vote "yea."

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. MCCORMICK], and in his absence I withhold my vote.

Mr. JONES of New Mexico (when his name was called). I have a general pair with the junior Senator from Missouri [Mr. SPENCER] which I transfer to the junior Senator from Arkansas [Mr. KIRBY], and vote "nay."

Mr. KELLOGG (when his name was called). I have a pair with the senior Senator from North Carolina [Mr. SIMMONS], and in his absence withhold my vote.

Mr. MCCUMBER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. THOMAS], but I am informed that he would vote upon this amendment the same way that I propose to vote. I therefore record my vote "yea."

Mr. WALSH of Montana (when his name was called). I have a general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] which I transfer to the Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my general pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the senior Senator from Missouri [Mr. REED], and vote "nay."

Mr. WOLCOTT (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I am advised that if present he would vote as I propose to vote, and I shall therefore vote. I vote "yea."

Mr. LENROOT (after having voted in the affirmative). I have a pair for the day with the Senator from Arizona [Mr. ASHURST]. I transfer that pair to the Senator from Indiana [Mr. WATSON] and let my vote stand.

Mr. EDGE. I have a general pair with the Senator from Oklahoma [Mr. OWEN], which I transfer to the Senator from Colorado [Mr. THOMAS], who, I understand, if present, would vote as I will vote. I vote "yea."

Mr. KNOX. I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. In his absence, not being able to secure a transfer, I withhold my vote.

Mr. SMITH of Georgia. I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The senior Senator from Connecticut [Mr. BRANDEGEE] with the senior Senator from Tennessee [Mr. SHIELDS];

The senior Senator from Iowa [Mr. CUMMINS] with the senior Senator from Ohio [Mr. POMERENE]; and

The senior Senator from New Mexico [Mr. FALL] with the junior Senator from Wyoming [Mr. KENDRICK].

The result was announced—yeas 34, nays 32, as follows:

YEAS—34.

Ball	France	McLean	Smoot
Borah	Hale	McNary	Sterling
Calder	Johnson, Calif.	Moses	Sutherland
Capper	Jones, Wash.	Nelson	Townsend
Colt	Kenyon	New	Wadsworth
Curtis	Keyes	Page	Warren
Dillingham	King	Phipps	Wolcott
Edge	Lenroot	Poindexter	
Fernald	McCumber	Sherman	

NAYS—32.

Beckham	Harrison	Phelan	Smith, S. C.
Culberson	Heflin	Pittman	Stanley
Dial	Jones, N. Mex.	Ransdell	Swanson
Fletcher	La Follette	Robinson	Trammell
Gay	McKellar	Sheppard	Underwood
Glass	Myers	Smith, Ariz.	Walsh, Mass.
Gronna	Nugent	Smith, Ga.	Walsh, Mont.
Harris	Overman	Smith, Md.	Williams

NOT VOTING—30.

Ashurst	Gore	Knox	Reed
Brandegee	Harding	Lodge	Shields
Chamberlain	Henderson	McCormick	Simmons
Cummins	Hitchcock	Newberry	Spencer
Elkins	Johnson, S. Dak.	Norris	Thomas
Fall	Kellogg	Owen	Watson
Frelinghuysen	Kendrick	Penrose	
Gerry	Kirby	Pomerene	

So Mr. WADSWORTH's amendment was agreed to.

Mr. LENROOT. I offer the following amendment, which I send to the desk.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On page 2, line 23, after the word "contracts," insert a comma and the following:

And no such contract shall extend beyond the period of the life of the corporation.

Mr. LENROOT. Mr. President, just a word with reference to the amendment. I do not think there can be any objection to it. Under the bill as it now stands they might make contracts extending for a hundred years beyond the life of the corporation. This amendment limits such contracts to the life of the corporation.

The amendment was agreed to.

Mr. LENROOT. I offer another amendment, which I send to the desk.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On page 11, line 8, after the word "liable," strike out the words "beyond its stock subscription," so that the paragraph will read:

The United States shall not be liable for any debts, obligations, or other liabilities of the corporation.

Mr. LENROOT. Mr. President, I do not think there will be any objection to this amendment, or that it needs any discussion.

The amendment was agreed to.

Mr. LENROOT. I offer another amendment, Mr. President.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. It is proposed to amend the amendment reported by the committee, on page 10, line 6, by adding at the end of the proposed amendment the following proviso:

Provided, That not more than 150,000 tons of such nitrate of soda shall be sold, and the subscription by the United States to the capital stock of the corporation created by this act shall not exceed the proceeds of such sale.

Mr. LENROOT. Mr. President, just a word with reference to this amendment. It has been stated by the friends of the measure upon the floor that there is no intention to appropriate any money out of the Treasury to provide the capital stock of this corporation; that it is intended that the capital stock shall be provided by the sale of 150,000 tons of nitrate of soda. The amendment merely provides, in its effect, that the United States shall not be liable for any subscription to capital stock beyond the proceeds of the sale of nitrate of soda; that the capital stock shall be issued only to the extent of the proceeds of such sale, carrying out the statement made by the friends of the bill.

Mr. UNDERWOOD. Mr. President, I do not think the amendment ought to be agreed to; yet I do not consider it as vital to the bill. This corporation, if organized, must have a working capital, and must have some money with which to carry on the development of the nitrate plant to where it can make fertilizers, outside of cyanamid, to sell to farmers.

Last year, when the bill was introduced and the testimony was taken, the experts from the War Department said that they had something like 300,000 tons of nitrate of soda, and that at existing prices then that nitrate of soda could be sold commercially for twelve and a half million dollars, and that that would be sufficient to give them the working capital to make this a completed plant and a going concern.

Since that time the price of nitrate has fallen, so that instead of getting $12,500,000 at present prices, they would get something like $8,000,000. I am not sure about my figures, but it is somewhere in that neighborhood. That would reduce the working capital of the corporation $4,000,000.

Of course, I understand very readily why gentlemen who want to defeat the bill, who do not think the bill ought to pass at all, should favor a proposition that to a limited extent would tie the corporation's hands and impede its operation and its success, assuming that it needed the $12,500,000 as working capital, as was testified. But if we want to make it a thorough success, I think we ought to make available out of this source, if it is practicable to do so, the working capital which the experts decided on.

Let us see a minute whether that will injure the Government. What I am coming to is whether it is going to work an injury in another way. The nitrate of soda that is on hand was stored for war purposes and is now held as a reserve in the event the Nation should become involved in war in the next few years. The war experts of the Government said that if the plant were in operation it would be more available as an arm of defense than the nitrate of soda that we have in storage, and therefore they thought the economical thing to do, from the standpoint of defense, was to sell the nitrate of soda and operate the plant.

Now, from the standpoint of the public generally, we all know that the farmers of America have been hard driven to obtain sufficient nitrate at reasonable prices for the development of their crops. If the nitrate now in storage is sold, it would be beneficial to the people of the United States. If it is sold in sufficient quantities to produce $12,500,000, it makes an available sum without going into the Treasury of the United States. To get that $12,500,000 would probably require, at present prices, the sale of two-thirds of the nitrogen that is on hand, instead of one-half of it. If we do not sell it, what will be the result? The nitrogen is stored now mostly in warehouses at great expense to the Government. More than that, I am told that it deteriorates, and every year that we hold it in the warehouses it becomes less available for the purpose for which it is intended, and less useful. We are losing money every day that we hold it in storage.

Of course, if the Government is going to have no other arm of defense, if we are going to scrap the nitrate plant or let it become obsolescent, and there is no other way in time of war to supply the nitrogen which the Government needs, no matter what it costs to store and no matter what the losses are, I am frank to say that I think we ought to maintain 300,000 tons of nitrate, because war may be more imminent than we expect. On the other hand, we can look back to the past to find out what the Government did. Before we got into the Great War in Europe the Government was carrying about 30,000 tons, instead of 300,000 tons, as an available supply for war protection at that time.

The amendment proposed by the committee authorizes the War Department—and that means the Army, because the bureau is controlled by Army officers—to sell so much of the stock on hand as is necessary to raise $12,500,000. It does not name the sum, but that sum they name as necessary to furnish a working capital for the plant. I think that discretion had better be left where the bill originally placed it—in the War Department and in the discretion of the Army officers, who certainly are not going to do anything to injure the country—rather than to withdraw that discretion arbitrarily now by limiting the sale to half the amount, when in all probability we could sell two-thirds and get the available capital without injury to the Government or drawing on the Treasury.

I do not regard the amendment as vital to the bill, but I do think those who are really in favor of doing something for the plant and making it an operating concern should not try to have an amendment of this kind adopted.

Mr. KING. Mr. President——

Mr. UNDERWOOD. I yield to the Senator from Utah.

Mr. KING. Has it not been generally the policy of the Government, when it had surplus supplies on hand in any of the departments, to order their sale and the money placed in the Treasury of the United States, even though Congress had to make an appropriation to the same agency that held the surplus supplies to enable it to carry on its operations?

Mr. UNDERWOOD. Undoubtedly; but that is not analogous to this case at all.

Mr. KING. Does not the Senator think that is rather an unwise policy to authorize the sale of property by one agency and then the utilization of the proceeds derived from the sale by some body specified by statute?

Mr. UNDERWOOD. I do not think so at all in this case, because the War Department expects to have an available supply of nitrogen in time of war. They have a supply that came from Chile. They are proposing to operate a plant that will give them a supply by drawing it from the air, so that we may not have to depend on Chilean nitrate; and, of course, by the operation of the plant 24 hours in the day instead of 8 hours, instead of 120,000 tons of nitrate a year it would produce twice that much in a war emergency. So if the plant is kept as a going concern I think the Government is perfectly safe to sell the nitrogen now on hand; but it can not become a going concern unless we give it operating capital, and here is the operating capital.

Mr. SMITH of South Carolina. Mr. President, the amount of Chilean nitrate held by the Government is, of course, an expense to the Government. It is absolutely dead capital unless war should break out. There is no way to realize any income from it whatever. It is a liability. As the Senator from Alabama has indicated, it deteriorates, storage has to be paid, the interest on the investment in the nitrate is large, and all the carrying charges are piling up. The nitrate must be kept fresh, and it must be kept available.

If the Government can construct with the same money, or the proceeds from the sale of this nitrate, a plant which is always alive, which can pay its own expenses, and which perhaps can reimburse the Government for any outlay, is it not a good proposition to take the dead capital invested in the nitrate of soda and put it into a plant which each year is making an amount sufficient for the use of the Government and which can be sold on account of the Government to defray all the expenses and perhaps give a revenue rather than load the Government up with the amount involved in the purchase, storage, and insurance of 300,000 tons?

I supposed that the object of all the Senators and the object of the Government in erecting the plant was to erect it with such capacity as to meet all the requirements of the Government in case there should be an embargo on the importation of the foreign product.

Mr. WADSWORTH. The Senator does not think that the plant running at full capacity could come anywhere near meeting the requirement?

Mr. SMITH of South Carolina. I do not think the airplane in its incipiency would have carried the soldiers and the bombs which it did carry, but with its perfection it has done so. We unfortunately left the foreigners to develop it and were at their mercy. It was the same with the U-boat. An American invented the U-boat, but a foreigner was the one who saw the possibilities of it and made it an engine of destruction that came near terminating the war disastrously against us. With those things in view, surely it is time for those charged with governmental affairs here to see that our people are protected and not stand here forever protecting private interests for the purpose of obtaining private profit.

Mr. WADSWORTH. Mr. President, the last observation was unnecessary and uncalled for. I asked the Senator a courteous question. I asked him if he thought the plant could supply the requirements of the Government in case of emergency.

Mr. SMITH of South Carolina. I withdraw that last remark, because I do not feel like having my motive impugned, and I should not, even by a construction, impugn the motive of my colleagues. It still remains a fact that none of us can escape that we were the inventors, the original discoverers, of the possibilities of the airplane, but others developed it to a fighting machine. We were the ones who discovered the possibilities of the U-boat, but others developed it into a fighting machine, Here we are face to face with a condition, not a theory. There was Germany, cut off from the nitrate supply of Chile and would have been whipped to her knees before the war fairly began had she not, by her governmental aid, through her wonderful scientists, produced the necessary ingredient that made her come near being the victor in the great world conflict.

Leaving aside any question as to whether or not it is wise for us to manufacture fertilizer, surely no Senator will gainsay or deny the imperative duty that rests upon us as representatives of the Government to see that we are equipped with the necessary machinery within our own borders to protect ourselves in time of war, and not be required to depend upon the fortuitous conditions that may arise in securing the supply from a foreign country.

The object of having the 300,000 tons of Chilean nitrate is that if war should break out and Chile should be embargoed against us, we would not be dependent upon that source of supply. I take it that the main object, the prime object, of the legislation is to provide the Government with the fundamental principles of defense. If, in providing ourselves with this absolutely indispensable element of warfare, it should so transpire that that very identical ingredient is essential to and needed in the development of agriculture, would we, because it might interfere with what some have said here is a private interest, stop the Government from the manufacture of the article, from keeping the plant going, taking advantage of every improvement that science may suggest, getting the modified Haber process so synchronized, as the Germans do, that we can produce the ingredient with one-tenth the power that the cyanamid people or the Haber people or the air-process people use now? Would we scrap the plant and turn it over to private interests, whose object may not be for the production of the necessary ingredients for war purposes and leave us, if war should break out, at the mercy of those who have munition plants, or plants that would furnish the ingredients of munitions? Is it not our duty to take advantage of every modern improvement in the process, to spend our money freely, lavishly, but properly, for the development of every means possible to put us on an equality with other nations who are taking advantage of this discovery?

The issue before us right now is clearly drawn. It is, Shall we authorize those into whose hands we have placed the development and improvement of this fundamental and necessary element of warfare the means of so doing rather than require them to hoard and to store the importation of a similar article from a foreign country; for the development of the plant has now reached a stage where it can produce and will produce from 150,000 to 260,000 tons of cyanamid, which is about 20 per cent richer in nitrogen than the nitrate of soda; and it would produce immediately, if war should break out, two-thirds of the supply of the nitrogen required by the Government? Why should we impose upon the Government the necessity of carrying 150,000 tons of a foreign importation, paying interest and the expense of storage and all the charges incident to such carriage of dead-weight property, when the money which it would be necessary so to expend could be invested in an American plant and thereby increase its capacity to a point where there would be no necessity at all of carrying any surplus foreign article?

Mr. President, it seems to me that the proposition is so plain, so patent, that if the plant can be made to meet the requirements of this Government, and to meet them more economically, even from the standpoint of dollars and cents, than the foreign importation, we should bend our energy to see that that plant be thus equipped. If it should not, from the munitions standpoint, be as cheap in dollars and cents as is the commercial product from Chile on a fluctuating market, is it not our duty to have equipped, running and ready at a moment's notice, this plant, in order that if, like a clap of thunder out of a clear sky, war should come, as was the case in the last World War, we should be prepared for it?

I shall not forget that in March of 1914 I sat in this Chamber and heard read the congratulations of the Emperor of Germany to a citizen of the United States; that he, the citizen of the United States, was one of the foremost men in the bringing about and establishing what the Emperor of Germany believed was the beginning of a hundred years of profound peace. I repeat, that was in March of 1914. In the same year, to the honor of this country, a certain citizen of this country received the Nobel peace prize; congratulations were rife; and yet then and there the lines were laid for the world explosion. It came and we were unprepared. With that lesson before us, shall we be negligent of our duty; shall we hark back to the conditions which then found us unprepared? It seems to me, Mr. President, that here and now our object should be to vie with each other to see how we may best frame and enact legislation to develop our facilities to the fullest capacity, and equip our scientists with the means of installing to the full a plant that will insure us, no matter what may occur, an adequate supply of this essential ingredient.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Does the Senator from South Carolina yield to the Senator from Oregon?

Mr. SMITH of South Carolina. I do.

Mr. McNARY. Is it not true, I will ask the Senator from South Carolina, that since the hearings which were had on the pending bill the price of nitrate has greatly dropped?

Mr. SMITH of South Carolina. It has.

Mr. McNARY. And if the bill should encounter difficulties in the other House and not become a law until along in the next summer or fall or during the next session, is it not possible that under the provisions of the bill as now framed all the nitrates which are now held by the Government might be sold in order to realize the sum of money which the Senator thinks the corporation should have? If that be so, does the Senator from South Carolina think it wise that the Government should sell all the nitrate that might be in its possession before the plant was properly equipped and the capital provided to enable it to accumulate from the atmosphere more nitrate?

Mr. SMITH of South Carolina. The Senator from Oregon, as well as I, is a member of the Committee on Agriculture and Forestry, which reported this bill, and therefore knows that the amendment leaves the amount of nitrate to be sold in the discretion of the War Department. Surely that department would be in a position to know whether or not it should sell a sufficient amount of the material to provide the capitalization which is authorized in the bill. If the Senator will read the paragraph in reference thereto he will find that it does not say how much nitrate shall be sold, but the sum provided for is $12,500,000. I have been a purchaser of nitrate of soda for about 25 years, and I desire to say that unless there should happen some tremendous and unforeseen commercial disaster in this country and in Chile, I see no reason in the world to suppose that the price of nitrate will not mount, for the reason that the supply of that article is being rapidly exhausted and the per cent of nitrogen contained in the sodium salts is rapidly diminishing. In addition to that, the use of that article for fertilizer has increased in this country; I do not remember the exact percentage, but I think in the last decade the increased use of nitrate of soda has been something like between 250 and 300 per cent.

Mr. WADSWORTH. Will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from New York?

Mr. SMITH of South Carolina. I do.

Mr. WADSWORTH. I do not mean to interrupt the Senator from South Carolina if he desires to finish his discussion on that particular topic, but I wish to go back to a statement which he made a moment ago.

Mr. SMITH of South Carolina. I shall be glad to have the Senator from New York do that now.

Mr. WADSWORTH. The Senator from South Carolina said a moment ago that it was in the discretion of the War Department as to how much nitrate should be sold. I call attention to the language of the committee amendment. After proposing to strike out the appropriation of $12,500,000 the amendment proceeds:

In order to pay such subscription—

That is, the subscription of $12,500,000 of stock—

as and when called, the Secretary of War is hereby authorized to sell so much as may be necessary of the supply of nitrate of soda owned by the United States—

Mr. SMITH of South Carolina. That is exactly what I said.

Mr. WADSWORTH. The amendment provides that the Secretary of War must sell enough nitrate to raise $12,500,000.

Mr. SMITH of South Carolina. No.

Mr. WADSWORTH. Yes.

Mr. SMITH of South Carolina. Will the Senator read the language again?

Mr. WADSWORTH. I will.

Mr. SMITH of South Carolina. The provision is that the Secretary of War shall sell the nitrate when it is necessary, when it is called for.

Mr. WADSWORTH. Preferred stock to the amount of $12,500,000 is to be issued by the corporation under the terms of the bill as introduced.

Mr. SMITH of South Carolina. Yes; at such times as the Secretary of War may see fit.

Mr. WADSWORTH. Yes; but the Secretary of War is authorized to sell enough of the reserve supply of nitrate to raise $12,500,000. Otherwise the $12,500,000 could not be obtained, because the appropriation is stricken out. So it is not within the discretion of the Secretary of War as to how much nitrate shall be sold. The discretion exists only as to when it shall be sold, but in any event the amount sold must in the end bring $12,500,000, and on to-day's price it will take 240,000 tons to bring that sum.

Mr. SMITH of South Carolina. That is a mere matter of figures. I have seen nitrate of soda sold at $58 at the beginning of a season and for $90 at the end of a season. Of course, the Government would contract for its sale at the best price possible; but, be that as it may, the argument which I was making remains true, that the War Department having charge of the plant, having charge of the supply of nitrate from a foreign country, would, as a matter of course, see to it that the Government was protected, and in the event that, in their judgment, they thought the exhaustion of the supply on hand might not be to the best interests of the Government, they could report to Congress to that effect. It is our habit to stay here all the time practically and to take care of situations of that kind as they arise.

The aim and object of this proposed legislation is to take advantage of modern discoveries and to equip our Government with the up-to-date facilities to meet a condition which may confront it at any time. Are we going to take such action or are we not? Is the Government itself going to provide itself with the means of protecting itself so that it will not have to rely, first, on a foreign country for its supply of raw material, and, in the second place, on certain corporations in this country for the manufacture of the raw material into a product necessary to protect the life of the Government? We are face to face with that proposition.

The plant has been built and completed and is ready to manufacture by one process. There is another plant, plant No. 1, which has been built in the expectation that our scientists may be so trained that the modified Haber process may be utilized and developed in this country.

Witnesses came before our committee and testified that Germany offered to allow us to use the patents and to give us the plans and specifications if we could work them out. I am not attempting to use scientific technical phrases, but the process is such that if every part of it does not synchronize the work can not be done, but if those manipulating it become sufficiently expert to cause it, as it is called, to synchronize, it can produce for one-tenth the horsepower the same amount of product that is now produced by the full power. Something like 300,000 tons—and, mark you, that means 300,000 tons of the pure ingredient—are now produced by this modified process in Germany.

Is it not the duty of our Government, if such a patent is in existence, processes under which are capable of doing such wonderful work, at a minimum cost, to spare no effort and no means to equip itself with such a plant as will bring about the result desired?

The other plant, plant No. 2, has passed the empirical, the experimental, stage, and is now a fixed fact in the scientific world. For a number of years the product from a like plant at Niagara Falls has been shipped, and the world is familiar with the product. It is a commercial product, and the plant at Niagara Falls is a commercial success. Plant No. 2 is equipped and ready, and it is a comparatively simply and easy process to secure from the initial product of plant No. 2 the ingredients used in explosives.

The question is, Are we going to develop that plant? Are we going to keep it in use or are we not? The question is—and it is not an incidental or subsidiary but a vital and permanent question—shall we continue to use it and to develop it by steam power or shall we utilize the water power which can be developed there and which has been referred to by all the engineers as being the greatest water power to be found in the country outside of Niagara, so that the Government may avail itself of a perpetual force, and, freed from the necessity of purchasing coal and from any commercial incident, may for all time to come have a resource of its own controlled by it?

Much has been said here on this floor about this being a water-power project. We are to be congratulated if at the site of this plant the Government is in control alone of sufficient water power to carry on this necessary work without the additional expense of purchasing coal and the deterioration incident to steam production.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Oregon?

Mr. SMITH of South Carolina. I yield.

Mr. McNARY. Will not the Senator from South Carolina admit that, under the provisions of this act, the Secretary of War could, if he wanted to, sell all the nitrates if it became necessary in order to realize a sum of money equal to the subscription, namely, $12,500,000?

Mr. SMITH of South Carolina. He might.

Mr. McNARY. Does the Senator think that is a wise provision to have in the bill, leaving such a matter, involving the safety of the country, to the judgment of the Secretary of War?

Mr. SMITH of South Carolina. May I ask the Senator a question? Does he think the Secretary of War would jeopardize the interests of this country when it was left discretionary on his part, as it is in this bill?

Mr. McNARY. That is a question of discretion and judgment, and things practically as shameful have happened during this war.

Mr. SMITH of South Carolina. Oh, yes; but let me ask the Senator this question: Does he not think that if the Secretary of War, in carrying out the literal provisions of this bill, were to find that raising the $12,500,000 in this way would jeopardize the safety of this country, before he did that he would acquaint us with that fact? Does the Senator not think he would?

Mr. McNARY. Mr. President, that really does not reach the vital point, in my opinion.

Mr. SMITH of South Carolina. Yes; if the Senator will allow me, it reaches the vital point, for this reason: If the Secretary of War believed, as he must have believed, that the storing of 300,000 tons of nitrate of soda was not necessary if we had this plant equipped and running, and he might then be allowed to sell this duplication of what we have—it is a duplication if we have the equivalent of a 300,000-ton plant at Muscle Shoals—what is the use of duplicating it in carrying a dead weight of 300,000 tons?

Mr. McNARY. Does not the Senator from South Carolina recall most graphically that during the time the Secretary of War was giving his testimony he thought that at the current prices it would be necessary to sell only 150,000 tons, and that as a matter of safety the balance should be carried as a reserve? That being so, if the price of nitrates should fall, as it has fallen and perhaps will continue to fall, and the subscription to the stock is called for by the corporation, a different entity from the Secretary of War, it may become necessary under this provision in the proposed legislation for him to sell all the nitrates, and therefore leave our stock completely exhausted. Now, that position, if I may add this, was different, as I recall, from that taken by the Secretary of War, and does not conform to his state of mind.

Mr. SMITH of South Carolina. Mr. President, I should much prefer to have the amendment in a shape like this—not to fix it arbitrarily, but to provide that so much of this stored nitrate might be disposed of by the Secretary of War as in his judgment would not jeopardize the amount necessary for military purposes. That would be, in my opinion, much better than to fix arbitrarily the amount that would be necessary, because surely the Secretary of War would have a more accurate knowledge of what was needed to be carried in stock, in view of what was done there, than the Senator or I could have. I should not object to an amendment of that kind.

Mr. McNARY. Mr. President, I will say to the Senator from South Carolina that I think the suggestion he has offered is very much better than the bill as written; but I can not see any objection——

Mr. SMITH of South Carolina. Does not the Senator think it is much better than fixing an arbitrary amount?

Mr. McNARY. I do not think so. I should like to carry through this bill the estimate made by the Secretary of War when the hearing was held, and leave the amount in reserve which he thought should have been left; and if that condition obtains then, it certainly does now.

Mr. SMITH of South Carolina. I frankly admit to the Senator that I do not recall, although it may have been there, that the Secretary of War named what, in his opinion, would be an absolutely necessary reserve.

Mr. LENROOT. Oh, yes, Mr. President; that is where I got the 150,000 tons from.

Mr. SMITH of South Carolina. That escaped me. I thought the contention the Secretary of War made was that at the present price the amount proposed to be sold would not exceed in the aggregate 160,000 tons.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from North Dakota?

Mr. SMITH of South Carolina. I yield.

Mr. GRONNA. I am sure the Senator knows that the amendment of the Senator from Wisconsin affects not only the amount of Chilean nitrate to be sold but the capital stock of this corporation. The Senate has just adopted the amendment proposed by the Senator from New York. With the permission of the Senator from South Carolina, I want to ask the Senator from Wisconsin if his amendment does not conflict with the amendment just adopted by the Senate?

Mr. LENROOT. No; I think not. I do not think it does. I may be mistaken.

Mr. GRONNA. I will read the first part of the amendment we adopted a moment ago:

> The capital stock of the corporation shall consist of 125,000 shares of common stock of the par value of $100.

Mr. LENROOT. Yes.

Mr. GRONNA. That would be $12,500,000, would it not? Now, the amendment of the Senator from Wisconsin provides:

> *Provided*, That not more than 150,000 tons of such nitrate of soda shall be sold, and the subscription by the United States to the capital stock of the corporation created by this act shall not exceed the proceeds of such sale.

Mr. LENROOT. Yes. That simply means that the difference between the proceeds of this sale and the authorized capital stock would remain in the Treasury until Congress had authorized a further subscription.

Mr. SMITH of South Carolina. In other words, Mr. President, it means that the capital stock of this corporation shall not exceed the proceeds from the sale of 150,000 tons of nitrate of soda.

Mr. LENROOT. The capital stock subscribed by the United States under this bill.

Mr. SMITH of South Carolina. Yes; that is what it means. Therefore if that was not sufficient they would have to come back to Congress to get the authorization of any more, which means the defeat of the bill. I understand that very thoroughly.

Mr. GRONNA. Yes; but, Mr. President, the Government is required to pay a profit of 5 per cent net upon the $12,500,000.

Mr. SMITH of South Carolina. Yes, Mr. President; I understand that.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Oregon?

Mr. SMITH of South Carolina. I yield.

Mr. McNARY. In order that the record of the proceedings of the day may be complete with regard to the position taken by the Secretary of War, I desire to present his testimony, found at page 17 of the Senate hearings:

> We have figured in the War Department that the necessary safety reserve of Chilean nitrate for us to keep on hand against an emergency is 300,000 tons, and we have sold the Government's surplus stocks of nitrate down to 300,000 tons, or we are in process of doing it. We have now figured in the War Department that if this plant is kept going—
>
> The Muscle Shoals plant—
>
> and in addition to that we can rely upon it in an emergency to produce half of what would otherwise be required to keep as a safety reserve, in other words, if this plant is continued according to the plan proposed here we will be required to keep on hand only 150,000 tons rather than 300,000 tons.

If that situation was apparent at that time, it is equally so to-day. He thought, as his testimony indicated, as I very well recall, that 300,000 tons of nitrate was necessary for the safety of the country; but if this plant, under the provisions of this law and the capital made available, were in operation, they could sell the nitrates down to the safety point of 150,000 tons. So the amendment as offered by the Senator from Wisconsin is one of safety and prudence, and comes within the view expressed by the Secretary of War.

Mr. SMITH of South Carolina. If the Senator will reread the remarks of the Secretary of War he will find that he said that if the capacity of this plant were half, then half would be necessary to be retained. Suppose the capacity of this plant were such as to produce more than half—and I think the calculations are that running it at capacity it would produce something more than half, and that it would perhaps produce enough for all the requirements—then the Senator would not insist that we should carry a duplication of our load in the deadweight of imported nitrates, would he?

Mr. McNARY. I beg the Senator's pardon; I did not hear that inquiry.

Mr. SMITH of South Carolina. I say, the Secretary of War said in the very language the Senator read that if the plant should produce only half of what was necessary, then it would be necessary for us to carry half. Now, suppose the plant were sufficiently developed that upon running it to full capacity it were found that it would produce practically sufficient for the use of the Army.

Mr. McNARY. The Senator must admit that there is no testimony of that character, as I recall the hearings. For instance, at page 18, continuing, the Secretary said:

> Of course, the committee will understand that the War Department does not feel that it would be safe in reducing its stock of 300,000 tons of nitrate to 150,000 tons upon any other condition than that the possibilities of this plant for emergency reliance is kept contantly available.

Mr. SMITH of South Carolina. Yes.

Mr. McNARY. Now, he never at any time said that we could sell all the nitrates, and deplete the amount on hand, and rely upon this plant giving us a safety quantity.

Mr. SMITH of South Carolina. No; neither do I; but I think it would be good business, I think it would be a wise provision, if we were so to amend the amendment proposed by the Senator that the Secretary of War would be authorized to use so much of this stored nitrate as in his judgment was necessary, and not jeopardize our necessary reserve store, because if we are going to defeat the legislation, let us defeat it and not make it impossible by amendments.

Mr. McNARY. I do not think it is the purpose of those who are befriending the bill, and have supported it, to defeat the measure.

Mr. SMITH of South Carolina. No; I do not think so.

Mr. McNARY. The $8,000,000 which this nitrate could be sold for now would do the same work that $12,000,000 would have done last year, when the hearings were had, on account of depreciation and loss.

Mr. SMITH of South Carolina. I am hoping that that may be true.

Mr. McNARY. In other words, is it not true, if the nitrates have fallen, that all other articles and elements which enter into the availability in the operation of this plant have also fallen, and that your liquid capital to-day of $8,000,000 would do as much as $12,000,000 a year ago, when nitrates were just as high, relatively, as every other element?

Mr. SMITH of South Carolina. If the Senator will observe, the proposed capitalization is $12,500,000, and it is provided that 5 per cent shall be earned on it. It seems as if the amendments up to the present have been such as to make it obligatory upon this corporation to issue $12,500,000 worth of capital stock, and that they shall earn 5 per cent on it. Then the Senator offers this amendment, which would make it impossible to capitalize at $12,500,000, and therefore make it impossible for the corporation to carry out the previous mandates which lay upon this corporation.

If it were possible to so amend the bill that the $12,500,000 capital stock should be paid upon the condition that so much was necessary to put into operation the intent and the purpose of this bill, the contention the Senator has made would be a proper one, because, as he said, if nitrate goes down, maybe the cost incidental to putting this corporation into proper shape might go down, the two going together. But if you make it obligatory upon them to raise $12,500,000, and then make it impossible for them to raise it, except by coming back to Congress for an additional appropriation whether it was needed or not, you have blocked the whole thing.

Mr. LENROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Wisconsin?

Mr. SMITH of South Carolina. I do.

Mr. LENROOT. It is not obligatory upon the corporation to issue $12,500,000 worth of stock. The Senator must know that. That is merely a maximum. By the amendment I have offered they will not be permitted to issue more than the proceeds of the sale of this nitrate, and it is only on that that they would be called to pay a dividend of 5 per cent.

Mr. SMITH of South Carolina. Does the Senator make that statement in the light of the amendment introduced by the Senator from New York [Mr. WADSWORTH]?

Mr. LENROOT. No; that is the bonds the Senator is thinking of. This is the capitalization of the plant itself.

Mr. SMITH of South Carolina. I was not paying very strict attention to that portion of it. But I think, Mr. President, if it is not necessary to raise $12,500,000, and if it should so transpire that the depreciation in the nitrate of soda would not cause a like diminution in the necessary capital stock, I would have no objection at all to the amendment of the Senator from Wisconsin. But if we are going to require them to have a capital stock of $12,500,000, and then make it impossible for them to realize that, and they will have to have subsequent legislation to realize it, what is the use of passing legislation at all? The whole thing resolves itself into that, and I do not see why we might not amend the proposition of the Senator from Wisconsin and leave it at the discretion of the Secretary of War as to how much of this nitrate he shall dispose of, provided, however, that the amount retained shall be adequate for the necessary reserve. For that I would vote, and it seems to me that that would be a proper amendment to his amendment.

Mr. LENROOT. Mr. President, up to the time of the offering of this amendment it had been represented before the committee, and it had been represented upon the floor of the Senate, that the capitalization of this corporation would not require any appropriation from the Treasury of the United States. It had been represented that really it would cost the United States nothing, because the operation of the plant would permit a decrease in the reserve supply of nitrate of soda of 150,000 tons, and the proceeds of the sale of that 150,000 tons would furnish the necessary capital for the corporation, and there would be no call of any kind upon the Treasury of the United States for capital.

Now, Mr. President, the moment I embody that representation in an amendment, for the first time the proponents of the bill run away from their own proposition, and for the first time admit that it is their intention to call for appropriations, either directly or indirectly, out of the Treasury of the United States to capitalize the corporation.

Mr. UNDERWOOD. Will the Senator yield for a minute?

Mr. LENROOT. Certainly.

Mr. UNDERWOOD. I made a speech a while ago against the Senator's amendment. Has the Senator ever heard me make any such statement as he has just attributed to this side? Can the Senator point anywhere to the record where I have ever made the statement that this was not necessary?

Mr. LENROOT. I may be mistaken as to the Senator from Alabama, but, as I recollect it, it has been stated, I had supposed by everyone who has spoken upon the subject, that the capital of the corporation was to be provided out of the proceeds of the sale of this nitrate of soda.

Mr. SMITH of South Carolina. That is a different proposition.

Mr. UNDERWOOD. It is a different proposition. Of course, it will be so provided if that amendment is adopted.

Mr. LENROOT. Very well; the Senator admits that. Then I go another step. All the testimony of the experts in support of the bill was to the effect that a reserve supply of nitrate of soda of 300,000 tons would be necessary if we did not have this plant in operation; and that if we did have the plant in operation a reserve supply of only 150,000 tons would be necessary. All the testimony of all of the officers of the War Department was to the effect that with this plant running in full operation it would be necessary to have a reserve supply of 150,000 tons.

What is the position of the Senator from Alabama? As I gather from his speech, it is that the Secretary of War shall reduce that reserve supply to whatever amount may be necessary to raise $12,500,000; is it not?

Mr. UNDERWOOD. Either I make myself very badly understood or the Senator does not listen to me when I speak; and I do not blame him for not listening.

Mr. LENROOT. I have listened.

Mr. UNDERWOOD. What I said was that under the amendment reported by the committee it would take about two-thirds of this nitrogen supply, sold at to-day's prices, to make available the $12,500,000 they want as working capital, instead of taking half of it, as they did last year; that the amendment, as it stands, leaves that discretion in the officers of the War Department; and I felt that there was no danger that they would exercise the discretion so that they would in any way endanger the defense of the Government. Therefore, I think it advisable to leave the bill alone, and not put this limitation in it. That is what I said.

Mr. LENROOT. Mr. President, I am surprised that the Senator's construction of this amendment is that there is any discretion in the War Department. It seems very clear that the bill provides for a subscription to the capital stock of this corporation. The Senator takes the position that it is the intention of this proposed law to get the money to pay for it into the hands of the corporation. The only means provided is through the sale of this nitrate of soda, and when one remembers that under the Army reorganization act, where the strength of the Army, it was provided, should not exceed 280,000 men, and the War Department was authorized to enlist that number, the Secretary of War regards that to-day as a direction. It is doubly true that when it is provided that the United States shall be liable, and the means are provided to meet the liability, the Secretary has no discretion other than to sell such amount of nitrate of soda as may be necessary to raise $12,500,000, and it just comes to this, he would do it, and then he would immediately ask for appropriations from Congress to buy nitrogen, in order to increase the supply of nitrogen to 150,000 tons.

Mr. UNDERWOOD. Will the Senator yield for a moment?

Mr. LENROOT. Yes.

Mr. UNDERWOOD. The Senator interests me very much. I have not discovered the name of the new Secretary, who is going to do these things this way. Of course, it would not be done that way under the Democratic Secretary who is now in power.

Mr. LENROOT. It would not?

Mr. UNDERWOOD. But we know it will not be effective until the new administration comes in, and I would like to have the Senator tell us who this man is. It would be interesting to

the country to know who he is. I suppose the Senator has advance information on the subject.

Mr. LENROOT. No; I said any Secretary of War, because, Mr. President, when our present Secretary of War reads "authorized" as "directed" in a case of clear discretion, no Secretary of War will read "authorized" as conveying discretion in a case where it is plain upon the context that no discretion is intended.

Mr. UNDERWOOD. I will ask the Senator a question if he will allow me. I do not want to interrupt him if I annoy him.

Mr. LENROOT. I yield.

Mr. UNDERWOOD. If the Senator were Secretary of War, would he himself, sitting in that exalted position, exercise this discretion if he thought it endangered the safety of the Government?

Mr. LENROOT. I will answer the Senator very frankly. The responsibility would not be upon me to determine whether it endangered the safety of the Government, because Congress would have determined that question in the direction it gave to me as Secretary of War.

Mr. UNDERWOOD. The amendment says nothing at all about the amount he shall sell. The amendment does contemplate that he shall not sell it if it endangers the Government. Do I understand the Senator to say, notwithstanding that fact, if he were Secretary of War he would go on and sell it up to the danger point?

Mr. LENROOT. Let us see. The Senator is one of the best lawyers in the Senate. Here is an authorized capital of twelve and a half million dollars. Here is a compulsory subscription upon the part of the United States to subscribe for that twelve and a half million dollars. There is no appropriation made out of the Treasury to pay that subscription; but there is a provision that to pay for it the Secretary of War is authorized to sell nitrate of soda. The Senator says it is the intention of this bill to provide the money. What he complains about in my amendment is that he says it does not provide the money. He says that twelve and a half million dollars will be provided under the amendment of the committee, and there is no way by which it can be provided except to sell so much nitrate of soda as will raise twelve and one half million dollars. Will the Senator tell me how this twelve and a half million dollars is to be raised under the bill, except by selling such an amount of nitrate of soda as may be necessary to raise it?

Mr. UNDERWOOD. Certainly. I just said in my opening remarks that it could not be gotten any other way. But I also contended that it was in the discretion of the Secretary of War to sell it—as it is—and that he is not going to sell sufficient of it to bring the Government in danger, because it is in his discretion.

I do not agree with the Senator. If I were Secretary of War, and it came down to the question of either supplying this corporation with its working capital and thereby endangering the safety of the Government, or not doing so, I would not sell it under those circumstances. That would be my position in the matter, and I think that would be the position of almost any Secretary. I do not agree with the Senator at all about it. Really, as a matter of fact, if the Senator himself were acting as Secretary of War, and this bill came before him, I do not believe the Senator would endanger the Government by selling its nitrate supply to a point where we did not have sufficient available to take care of us.

Mr. LENROOT. But the Senator knows very well that under these provisions he could sell it down to nothing, and then immediately demand an appropriation of Congress to buy nitrate back from this very factory.

Mr. UNDERWOOD. I admit he could sell it to the extent of $12,500,000. He would be limited to that, and that would take about two-thirds of it. He could do that. But that is not the question. It is the difference between "could" and "would," and I say he would not.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Oregon?

Mr. LENROOT. I yield.

Mr. McNARY. I think we will all agree that the Secretary, in making his estimates before the committee, was very conservative, and when he stated that the amount should not be reduced under 300,000 tons, and that 150,000 tons of Chilean nitrate should be retained, and added to that 150,000 manufactured by this plant, then we must say that the amendment of the Senator from Wisconsin conforms to the judgment of the Secretary of War. If he is going to use his discretion to preserve the safety of the public, unquestionably the adoption of the amendment of the Senator from Wisconsin would be harmless and it would be conformable to the judgment of the Secretary of War.

Mr. UNDERWOOD. I do not see where the amendment proposed by the committee does any harm, and I do see where the amendment of the Senator from Wisconsin may seriously hamper the amount of working capital for the corporation. Of course, it may or it may not.

Mr. LENROOT. May I ask the Senator a question? If the Secretary of War concludes, in accordance with the Senator's idea of discretion, that he should not sell more than 150,000 tons, the same amount that is provided in my amendment, where is the corporation to get the full amount of the capital which the Senator says is absolutely necessary?

Mr. UNDERWOOD. Of course, if the Senator is offering the amendment to kill the bill, that is a different proposition. It may have that effect. Possibly the Senator's amendment might carry out his suggestion, and if we adopt it, it will so impair the capital that the corporation could not operate. Of course, if we make this a going concern and it is now prepared to make cyanamid, the base for powder, the working capital will not be necessary immediately, and if we make it a going concern, it may accumulate sufficient cyanamid to replace Chilean nitrate.

Mr. LENROOT. Yes; but it will require appropriations out of the Treasury to buy it, will it not?

Mr. UNDERWOOD. No; not necessarily, if the corporation has the money on hand, because we will not appropriate to buy until after it is transferred from the corporation to the Government.

Mr. LENROOT. When it does, we buy it.

Mr. UNDERWOOD. Yes; but that is not necessary now.

Mr. LENROOT. So in some form or other it is the Senator's idea now that it will require further appropriation, directly or indirectly, out of the Treasury of the United States to furnish the capital for the corporation.

Mr. UNDERWOOD. Not at all. Assuming that the plant is running, that we go to war, that we need more than the product of the plant and as much as the 300,000 tons of Chilean nitrate that we are proposing to sell, or the 150,000 tons, which is what the Senator by his amendment proposes to sell——

Mr. LENROOT. Which is what the Secretary of War proposes to sell.

Mr. UNDERWOOD. If that happens and we need that, of course some day we would have to buy it because we would not have enough on hand. That was contemplated in the beginning. But if we make the plant available, we put a nonperishable product in the shape of the factory and its product in the place of a very perishable one in the shape of Chilean saltpeter.

Mr. LENROOT. That is exactly what the Secretary of War said would permit them to reduce by one-half their reserve, because of the fact that the Senator now states, but that they could not safely go below 150,000 tons.

Mr. UNDERWOOD. The Senator in my judgment is confusing his ideas. It has been asserted here, and it was asserted in the hearings, that if they were allowed to sell the Chilean nitrate, at that time of course, they would get twelve and one-half million dollars and no money would be needed out of the Treasury; but that did not say we would not have to appropriate money out of the Treasury if at some time in the future we need 300,000 tons of Chilean nitrate.

Mr. LENROOT. But we would not have to appropriate any money out of the Treasury for the reserve necessary for the United States in time of peace.

Mr. UNDERWOOD. I have never seen that stated anywhere.

Mr. LENROOT. That is stated by Secretary of War Baker in the same language.

Mr. UNDERWOOD. I know what he said about the nitrate factory. Of course, he said that was the reserve in place of the Chilean nitrate.

Mr. LENROOT. Certainly.

Mr. UNDERWOOD. I am going on the assumption the Senator stated awhile ago, that some day we would need more than the reserve of the nitrate factory and would need Chilean saltpeter, and of course we would have to pay for it in that event.

Mr. LENROOT. That has nothing to do with the capital of the corporation, as the Senator knows.

Mr. UNDERWOOD. Certainly not.

Mr. LENROOT. We are talking about the capital of the corporation, which the proponents of the bill and the War Department say can be furnished without cost to the Treasury of the United States. Now, the Senator admits that the capital can not be furnished without cost to the United States.

Mr. UNDERWOOD. Oh, no. The Senator has a method in debating with me that really causes many interruptions between us. The Senator and I have been friends for a great many years in both Houses of Congress and have indulged in many debates, but in debating the Senator glories in putting admissions into the mouth of his opponent. I wish to say that I do not admit at all what the Senator says I admit. If the Senator wishes to say that he reaches that conclusion from my argument, of course, that is proper, but I insist that I do not admit any such thing.

Mr. LENROOT. Then I desire to get the Senator's position. Assuming that the War Department shall maintain that 150,000 tons of nitrate of soda are necessary as a reserve, assuming that they have the discretion that the Secretary of War thinks they have, and he refuses to sell more than 150,000 tons of nitrate of soda, what is the corporation going to do for the balance of its capital?

Mr. UNDERWOOD. I do not think there is any doubt about it. If they were correct in saying that the corporation would need a working capital of $12,000,000 and the Senator by his amendment cuts off the available source to get the $12,000,000——

Mr. LENROOT. Will the Senator please answer my question? If the discretion is exercised that 150,000 tons of reserve is necessary, then where is the corporation to get its reserve capital?

Mr. UNDERWOOD. If the Senator will allow me, of course, I can not answer in the Senator's way; I have to answer in my own way.

Mr. LENROOT. But the Senator was stating a different premise. That is my objection.

Mr. UNDERWOOD. If the Senator assumes that they can not get it out of this supply of nitrogen, of course it is apparent that they would have to come to the Treasury of the United States to operate. But I say they can get it out of the nitrate, and they will get it without danger to the country, if the Senator will leave them alone and give them an opportunity to get it. That is why I am opposed to the Senator's amendment, because he proposes to take away the opportunity for them to get their working capital without going into the Treasury of the United States.

Mr. LENROOT. In making that statement the Senator from Alabama opposes the opinion of every representative of the War Department, while I am taking their opinion.

Mr. UNDERWOOD. I do not think so, but that is merely a difference of opinion between the Senator and myself.

Mr. LENROOT. Well, Mr. President, it comes down to this, that we either have to reduce the reserve below the point of safety, as testified to by all the representatives of the War Department, including the Secretary of War himself, or else the difference has to be paid out of the Treasury of the United States. That has not been the basis upon which support has been asked for the bill. While the Senator from Alabama may not have said so, it has been constantly repeated that the passage of the bill would not entail any burden upon the Treasury for the furnishing of the capital stock. It is apparent that it will, and if it does not and the Senators favoring the bill are willing that the Treasury of the United States shall not bear the burden, they ought not to object to the amendment which I have proposed.

On the amendment which I have proposed I ask for the yeas and nays.

Mr. GRONNA. Mr. President, I shall not delay the Senate very long. I did not hear the full argument of the Senator from Wisconsin [Mr. LENROOT], because I happened to be out of the Chamber temporarily, but I asked the question before I stepped out if this amendment was not in conflict with the amendment just adopted by the Senate. I understood the Senator to answer in the negative. If I understand the English language, it certainly changes the capital that may be invested by the Government.

The amendment of the Senator from New York [Mr. WADSWORTH] provides, and I read from the amendment just agreed to:

> The capital stock of the corporation shall consist of 125,000 shares of common stock, at the par value of $100.

If my calculation is correct, that would be $12,500,000, would it not, may I ask the Senator from New York?

Mr. WADSWORTH. Certainly.

Mr. GRONNA. The Senator from Wisconsin then offers this amendment to another paragraph of the bill:

> *Provided*, That not more than 150,000 tons of such nitrate of soda shall be sold, and the subscription by the United States to the capital stock of the corporation created by this act shall not exceed the proceeds of such sale.

That simply means that the capital shall not exceed the amount of the proceeds of the product of 150,000 tons of Chilean nitrate. If the product is worth only, say, $60 a ton, that would be $9,000,000. That is the maximum which can be contributed by the Government of the United States if the amendment of the Senator from Wisconsin is agreed to.

I am not taking the position now that we should sell all the supply of Chilean nitrate on hand, but I do say that we ought not to hamstring the officers of the Government in permitting the business to function if we are to set it up at all. If the plant is worth saving and is worth operating at any time, it seems to me we ought to give full authority to the officers of the corporation, who would be the officers of the War Department. It would be an agency of the United States, and if we can not trust such an agency with a sufficient amount of capital to carry on the business, then I say, do not let us continue the plant at all.

It has been stated and restated that plant No. 2, built by the Air Nitrates Corporation or Mr. Washburn at Muscle Shoals, is a completed plant. I do not think that anyone will deny that it has been shown beyond a question of doubt that the plant is as good a plant as can be found anywhere on the face of the earth. Has there been extravagance? Yes. I should like to have some Senator point out to me any large business that has been carried on during any war where extravagance and waste have been eliminated. Senators know as well as I do that we can not eliminate waste during war. Senators know as well as I do that when we were at war everything was turned over to certain agencies of the Government, and I do not say that they are to blame because there has been waste. They were anxious to complete any project or anything they undertook to do in a hurry. That is true of the Muscle Shoals plant. I do not know anything about what the plant could have been built for in normal times, but I think it is fair to assume that the plant could have been built perhaps for one-half or possibly one-third of what it cost us to build it during the time of war.

But, Mr. President, that is not the question involved in this particular bill. Senators have been holding up a phantom to the Senate and to the country, just as if the Committee on Agriculture, having had this bill in charge, are responsible for what has been wasted and what has been spent during the time of the war.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. GRONNA. Yes.

Mr. SMOOT. Does the Senator from North Dakota have reference to the steam plant?

Mr. GRONNA. There is only one plant at Muscle Shoals that is completed, and that is No. 2, I will say to the Senator from Utah.

Mr. SMOOT. That is a steam plant?

Mr. GRONNA. Yes. The Senator has cited that as much as any other Senator and has tried to link up the expenditure on Muscle Shoals with the expenditure on plant No. 2; but the Senator heard this morning the statement of one of the most noted men in the country, a man whose authority is not ordinarily obtained on questions of this kind; he heard the statement of Col. Cooper, who said that the expenditure of $43,000,000 on the dam of which I am now speaking at Muscle Shoals was a good investment.

Mr. SMOOT. Yes; for water power.

Mr. GRONNA. If the Senator will wait until I complete my statement, I will yield to him. Col. Cooper said that all that was required was $43,000,000 for the completion of the dam for the primary power of 100,000 horsepower, and which could be sold at the dam at $15 per horsepower, which is cheaper than any power that the Senator from Utah or any other Senator can name. By adding $7,000,000 more to the $43,000,000, making the amount $50,000,000, the dam can be completed for the production of primary and secondary power to the extent of 550,000 horsepower.

What else did Col. Cooper say in the presence of the Senator from Utah? He said that the minimum the Government would receive would be 5 per cent on the investment of $50,000,000; that the plant was as good as gold; that the investment could be realized on; that the $50,000,000 could be obtained and paid back into the Treasury at any time. Does the Senator from Utah deny that statement?

Mr. SMOOT. Col. Cooper did not say that the amount could be put back in the Treasury at any time.

Mr. GRONNA. He did not use the language "could be put back," but he did use the language—perhaps the Senator has the statement—that it could be sold for and was worth $50,000,000 at any time.

Mr. SMOOT. He said that within a given length of time the Government could realize 5 per cent on its investment.

Mr. GRONNA. That was the minimum.

Mr. UNDERWOOD. If the Senator will allow me, Col. Cooper also said that the Government could amortize the loan and get all its money back.

Mr. SMOOT. This is what he said later, not as to the first lease that was being offered, but if there were a re-lease, then, he thought, if he had anything to say about it, it could be amortized and the money paid back.

Mr. UNDERWOOD. He said very distinctly that it could not function fully for 10 years.

Mr. SMOOT. Yes; and that the power itself could not be sold before the expiration of that length of time.

Mr. UNDERWOOD. He also said there was no doubt, in his judgment, that the Government could realize 5 per cent on a valuation of $50,000,000, and a sufficient additional amount could be raised to amortize the Government investment and return it all to the Government in a period of years.

Mr. SMOOT. Will the Senator from North Dakota yield further?

Mr. GRONNA. I yield.

Mr. SMOOT. What I said yesterday was that this was a water-power proposition pure and simple, and in my own time I will read the testimony of Col. Cooper. The Senator from North Dakota heard him testify this morning that the water power was the only thing worth considering. He also stated that, so far as he was concerned, he would not think of advocating the manufacture of fertilizer on the part of the Government.

Mr. GRONNA. I had not reached that point yet, I will say to the Senator from Utah, but I was calling attention to the fact that the Senator from Utah and other Senators have been holding up the Muscle Shoals project as a tremendous steal and contending that this was a bill which indirectly was to carry out that project and make it possible to let that stealing continue and be consummated.

Mr. SMOOT. No, Mr. President——

Mr. LENROOT. Will the Senator yield to me for a question at that point?

The PRESIDING OFFICER (Mr. HARRIS in the chair). To whom does the Senator from North Dakota yield—to the Senator from Utah or to the Senator from Wisconsin?

Mr. GRONNA. I will yield in just a moment. I have stated, and I repeat, that I do not think anyone who wishes to be fair can charge that this measure has anything to do with the water-power project. The Government of the United States has expended upward of $80,000,000 for the plants at Muscle Shoals, and it happens that plant No. 2 has been completed. That plant is complete for the manufacture of cyanamid, and with small additional expense can be expanded to accomplish the result desired. No one knows exactly what that expense will be; there is not a Senator on the floor who knows, for I have not heard two men who agree exactly what is necessary to be expended to change the character of the plant so that it may be fitted to manufacture sulphate of ammonia. Dr. Ernest Kilburn Scott, who is one of the great authorities on these matters, an Englishman, a man who is recognized as being among the six greatest engineers in the world, made a statement which I heard, urging that the Government should go on with this plant. He stated that it was possible to add to it the art process for manufacturing nitrate of soda. Dr. Scott stated, referring to this particular plant under discussion and to the particular water power proposed to be developed, "We do not know what the possibilities are." Then he called attention to what the older Governments are doing—to the Governments of Germany, Great Britain, and Australia, the last of which has set up a plant of its own. The Senator from Wisconsin yesterday charged that no Government had erected such a plant. If the Senator will examine the testimony he will find that Australia has set up a plant for the manufacture of this product.

Mr. LENROOT. Mr. President——

Mr. GRONNA. I yield to the Senator.

Mr. LENROOT. The Senator must not misquote me. I never made any such statement. The Senator from Kentucky [Mr. STANLEY] said that every other government had undertaken such enterprises and I quoted from the hearings before the Senator's committee to show that Germany had not done so.

Mr. GRONNA. If I am not mistaken, the Senator made the statement that no government had done so.

Mr. LENROOT. No; the Senator from North Dakota is mistaken.

Mr. GRONNA. Then, it was the Senator from New York who made the statement; it was one of the two Senators.

Mr. WADSWORTH. May I straighten out my own record on that matter?

Mr. GRONNA. No; the Senator can do so in his own time.

Mr. SMOOT. Then I also will take my own time.

Mr. GRONNA. I wish to conclude. I shall occupy the floor but a few minutes. I believe, however, I am correct in stating that either the Senator from New York or the Senator from Wisconsin stated, in substance, that no other government had undertaken to set up a government plant for the manufacture of nitrates or the manufacture of fertilizer.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Kentucky?

Mr. GRONNA. I will yield.

Mr. STANLEY. I understood the Senator from Wisconsin to state that the German Government was not making cyanamid and had no control of any cyanamid plants. I call his attention to an article in the Washington Post of September 2, reading as follows:

GERMANY OFFERS UNITED STATES NITROGEN—HOPES SALE OF 50,000 TONS HERE WILL RAISE EXCHANGE RATE.

The German Government has released 50,000 tons of nitrogen made from the air for exportation at once, export duty free, to America. This information was received yesterday by the Bureau of Foreign and Domestic Commerce.

The German Government hopes, it was stated, that sale of this nitrogen will help raise the rate of German exchange. In spite of high prices and heavy taxes deposits in German savings banks are increasing.

It should be noted that the commercial fertilizer form in which this nitrogen is proposed to be shipped free of duty is ammonium sulphate, and 50,000 tons of nitrogen will equal 250,000 tons ammonium sulphate, and ammonium sulphate competes with Chilean nitrate. So Germany proposes to send us 250,000 tons of ammonium sulphate produced at her war-built air-nitrogen plants and free of export duty.

Mr. WADSWORTH. I am sure the Senator from North Dakota will permit me to state——

Mr. GRONNA. I yield to the Senator from New York, for I do not want to be guilty of discrimination.

Mr. WADSWORTH. I simply wish to say that the German Government has control over the exportation of any and all commodities produced inside of Germany. They have permitted the commercial interests of Germany to export the stuff which those interests have made, but the Government did not make the stuff.

Mr. STANLEY. Does the Senator mean to state that the German Government is not in practical operation and control of the plants producing this material?

Mr. WADSWORTH. I do.

Mr. STANLEY. Are they controlled by a cartel?

Mr. WADSWORTH. They are controlled by committees of people engaged in the business.

Mr. STANLEY. And those committees are composed of representatives of the German Government, representatives of the various States of Germany, and the only individuals outside of the Government who are not on those committees are three representatives or five—I forget which—out of 23 or 24 who are sent to represent the producer.

Mr. SMOOT. Mr. President, will the Senator from North Dakota yield to me?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. GRONNA. I yield.

Mr. SMOOT. The Senator does not mean to say that the German cartel manufactures goods in Germany. The cartel controls the exportation of all goods from Germany, whether steel or nitrates or any other products. The cartel consists of representatives from the different States in Germany, but Germany does not manufacture the goods controlled by the cartel. As the Senator from New York has well said, Germany does not manufacture the nitrates referred to in the article quoted by the Senator from Kentucky, but they were manufactured by private concerns in Germany. So far, however, as the exportation of goods out of Germany is concerned, the cartel has some power over such matters to decide where the goods shall be shipped and for what they shall be sold.

Mr. STANLEY. I simply asked the Senator if the product was controlled by a cartel, and in that event, whether the title of the property may be in the cartel or not, I maintain it is practical Government control, whether the commodity be steel, nitrates, or anything else. I think I know something about the cartel.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. GRONNA. I yield.

Mr. KING. I should like to say, by way of modification or qualification of the statement made by the Senator from New York and by my colleague, that the reparations commission

really controls the exports and imports of Germany; that is to say, that Germany is bound by the Versailles treaty, and, under the terms of that treaty, the reparations commission and other commissions determine largely the question of exports and make allocation of the same. I may say further, in reply to the Senator from Kentucky, that we have not been in the habit recently of looking to Germany as a very safe guide to determine the conduct of this Republic.

Mr. GRONNA. Mr. President, I attempted in my feeble way to call attention to the testimony of Col. Cooper. I do not believe that any man who knows Col. Cooper or knows anything about his great work will contend that he does not know what he is talking about. It is true, as the Senator from Utah has intimated, that Col. Cooper is not in favor of the Government manufacturing fertilizer. I do not know that he is in favor of the Government manufacturing anything, but he is in favor of the Government building and completing the dam at Muscle Shoals and owning and operating it.

Mr. SMOOT. Mr. President, will the Senator tell the Senate why he is in favor of it and for what purpose he is in favor of it? What does Col. Cooper testify to as to the real reason why he favors this dam being built?

Mr. GRONNA. I will say to the Senator from Utah that the statement Col. Cooper made was substantially this: I asked Col. Cooper if I understood him to say that it would be safe for the Federal Government to invest $50,000,000 and that the Government would get not less than 5 per cent interest on that investment, and he stated and restated that it would, and he further stated that 5 per cent was the minimum; and he said more than that, that it would be worth $10,000,000 to the people of the South or to the people in those localities.

Mr. SMOOT. The public utilities of the seven States; it would be worth that much to them.

Mr. GRONNA. But the Senator will please not say that I said "public utilities." I will come to that; he said it was worth $10,000,000 to the people of the country, and then it would pay a dividend of not less than 5 per cent upon the investment of $50,000,000. The Senator from Utah and the Senator from Alabama asked where this power would be sold. He said that so far as he was concerned he was in favor of leasing it to public-utility companies; but, Mr. President, the Government of the United States, if it owns the Muscle Shoals Dam when it is completed, will not have to sell or lease that power to the public-utility concerns of the South. It would have the privilege—and no one knows it better than the Senator from Utah—of selling it in any way and to the best advantage that it saw fit; but Col. Cooper did state that it was worth $10,000,000 annually to the people living all the way from 100 miles to, I think he said, 400 miles away from the power plant.

Mr. President, in the last few days Senators opposed to this bill—and I know they are honest about it—have held out this awful picture to the Members of this body, showing what a tremendous steal there was at Muscle Shoals, and that we must abandon it. The Senator from Utah will not deny that Col. Cooper stated that the Government would lose $4,000,000 if we abandoned the work now, because of the machinery and the derricks and everything that have been installed in their proper places. That, I say, would reduce the profit which ultimately can be made on this investment, and it would make it cost $4,000,000 more if the Government is ever to undertake to complete the project.

Col. Cooper also called attention to the fact—and he showed a most wonderful chart of the dam—that there would be a bridge across that dam worth a million dollars. We are building bridges in the North. We are building bridges in the West. Does any Senator have any objection to building bridges in the South? That million-dollar bridge is included in the $50,000,000, and that is the maximum amount estimated for in connection with the completion of this dam, both for the primary power and for the secondary power; and just imagine the profit that may be made at $15 per horsepower, when at certain times of the year there is a possibility of selling 550,000 horsepower. I should think any business man would be safe in making the statement that it would be absolutely certain that the Government of the United States would receive a dividend of 5 per cent upon the investment of $50,000,000 with those possibilities—and they are not merely possibilities, but certainties.

Col. Cooper stated several times that there was an enormous demand for that power, and he said that unless you should come into competition with coal at less than $5 or $6 per ton you could transmit that power from 100 to 400 miles.

Mr. UNDERWOOD. Mr. President, if the Senator will yield to me, I will state that my recollection of Col. Cooper's testimony is that he said this power was available for sale up to the extent of 400 miles with coal selling at $5 or $6 per ton, but that when it came into competition with coal that was selling at $2.50 a ton its power of distribution would be limited to 150 miles.

Mr. GRONNA. Yes; that is as I understood it.

Mr. UNDERWOOD. But based on anything like the present price of coal, he said, the power of distribution would extend 400 miles. I think that is an accurate statement.

Mr. SMOOT. He said that 400 miles was as far as they could carry it?

Mr. UNDERWOOD. Yes; of course, it would be contemplated that the power really would be sold within a much smaller area, but it could go that far.

Mr. GRONNA. That is exactly as I understood Col. Cooper's testimony.

Mr. President, it seems to me that here is a great conservation measure. While, as I stated a day or two ago, I would not want the Government of the United States or even a State government to go into ordinary business, here is a business of such magnitude and of such vital importance to all the people throughout the country that I believe it is not only right but it is good business for the Government to control this tremendously valuable water power. If the Government of the United States can, and it will, receive a dividend of not less than 5 per cent upon $50,000,000—and we have expended about $11,000,000 now, and allocated about $10,000,000 more, I believe—are we going to throw that away, and scrap the plant, as we are trying to scrap this plant No. 2, and for whose benefit? Do you not suppose that private capital will immediately pick up that project and build a dam at Muscle Shoals if the Government of the United States abandons that dam and decides not to have anything more to do with it? Oh, yes; it will not be very long; and you who are so anxious to safeguard the Treasury of the United States and the people's interests, would be willing to turn over to private interests this tremendously valuable water power, which now belongs to the Government—and I say every inch of it belongs to the Government, statements to the contrary notwithstanding. If any Senator wants to dispute that, let him do so now, because it has been whispered in the corridors and throughout this Chamber that this water power was being built on privately owned land. I say it is not true; it is false. I pause for a reply to that.

Mr. SMOOT. I have not heard it.

Mr. GRONNA. Well, there are those who have heard it. I say there has been a picture painted to Senators who have not had sufficient time to study this matter that there were some sinister influences back of and supporting this bill.

I have avoided calling attention to any of the lobbies here. No one treated Mr. Washburn with more courtesy than I did when he was before our committee. I have in my hand documents sent out by him through what is called the Press Service Co.; and it is unfair for Mr. Washburn at this time to make us believe that there is a sinister influence backing this bill, providing that the Government of the United States shall be permitted to go on and manufacture these explosives, so indispensable in times of war and so necessary in times of peace. He knows that those interested in the manufacture of fertilizer and steel, in the by-products of coke, in explosives, in powder, are opposed to this bill.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. GRONNA. Yes.

Mr. McKELLAR. The Senator speaks of those articles that have been sent out from time to time for the last week or two as being articles sent out by Mr. Washburn.

Mr. GRONNA. They are paid for by the American Cyanamid Co. It is admitted. I have it here.

Mr. McKELLAR. Those articles are not signed, and I was just wondering if Mr. Washburn is the real author of them. I think that if such is the case it ought to be known to all the Senators before they vote on this bill, because the mails have been literally flooded with these unsigned documents that have come in practically every morning for the last week.

Mr. GRONNA. I have one here, since the Senator brought up the matter, that is signed. It is not very long, and I shall read it.

[Press Service Co., 25 West Forty-third Street, New York City, N. Y.]

SUMMARY OF FIRST FOUR NITRATE BULLETINS.

In our series of bulletins on the proposed Government operation scheme of the Muscle Shoals nitrate plant (S. 3390; H. R. 10329) we have endeavored to show:

1. That the plant is not going to make fertilizer, but a fertilizer material (nitrate bulletin No. 1, entitled "Muscle Shoals Facts").

2. That it will not relieve the farmers from a Chilean nitrate "monopoly," because the sulphate of ammonia, which it is proposed to make at Muscle Shoals, can not be substituted, in a complete fertilizer,

for Chilean nitrate. (Nitrate bulletin No. 2, entitled "Chilean Nitrate 'Monopoly'.")

3. That there is nothing to be gained by rushing precipitately into this highly financed Government operation scheme, because even if Congress maintains for it a continuous flow of appropriations, the necessary cheap water power from the Wilson Dam will not be available for at least three years; that even the War Department experts consider this water power absolutely essential to low production costs of fertilizer materials at Muscle Shoals. (Nitrate bulletin No. 3, entitled "Wilson Dam and Cheap Nitrates.")

4. That actually the War Department's plan does not contemplate selling anything at all to the farmer, but merely to fertilizer manufacturers and distributors already in the fertilizer business, and, furthermore, only at the market price "as determined by the law of supply and demand." (Nitrate bulletin No. 4, entitled "Facts and Not Fancy About Muscle Shoals.")

The above bulletins have been prepared by the Press Service Co. at the expense of the American Cyanamid Co., and distributed to newspapers and individuals, including Senators and Members of the House of Representatives. Should complete sets or additional copies be desired, they may be obtained by addressing the Press Service Co., 25 West Forty-third Street, New York City.

E. A. MOREE, *Manager.*

Mr. McKELLAR. What is the date of that?

Mr. GRONNA. I will say to the Senator that, like the rest of them, it has no date.

Mr. McKELLAR. What I referred to was a bulletin such as I have in my hand, marked "Nitrate Bulletin No. 4" and headed "The Press Service Co., 25 West Forty-third Street, New York City, N. Y. Facts and Not Fancy About Muscle Shoals."

Mr. GRONNA. Yes; that is included in this.

Mr. McKELLAR. This does not have any name signed to it. These bulletins have been coming for the past week, without any name signed to them.

Mr. GRONNA. But it is admitted by Mr. Moree that the very document which the Senator holds has been printed at the expense of the American Cyanamid Co.

Mr. McKELLAR. In other words, it is propaganda sent out by this great fertilizer trust to defeat this bill.

Mr. GRONNA. It is admitted that it was sent out at the expense of the American Cyanamid Co., as stated by Mr. Moree.

Mr. President, I come from the far West, representing an agricultural constituency, none of whom have or ever will have any private interest in the dam or in the plants, but a tremendous interest in the proposition of obtaining more and cheaper fertilizer and in the plans and policies which this Government shall pursue in the future with reference to agriculture.

The Senator from New Jersey [Mr. EDGE] spoke very eloquently this morning in opposition to the tariff bill. He comes from a locality where the high protectionists generally rule. But some of us were in the West before there was civilization, before the lands were surveyed, and we had no special privilege. We were given an opportunity to enter 160 acres of land as a homestead, and we advertised to the world for people to come to that territory and be our competitors. It was said by the Senator from New Jersey and some of my fellow protectionists that we do not need, in fact, should not have, the same protection as that given to the New England States, and I can well understand the argument, Mr. President, when I read from an official report from the Department of Agriculture, and when I find that in those States the number of farms have been reduced in some instances to almost nothing. It simply goes to show that they know that there is no profit in agriculture. The Yankee is too shrewd to engage in the business of producing from the soil when the possibilities are so great for him to invest his money and use his genius in something which will pay him better.

I find no fault with that, but I do find fault, and I think I have a right to find fault, with the proposition of Senators that we who labor on the farm shall be treated unfairly, that our products are designated as a raw product, when as a matter of fact it is our highly finished product. It takes more brains to farm and be successful than it does to run the factories of New England; and, Mr. President, this will not be the last day that that matter will be discussed. We hear from the same men that the farmer needs no protection, and that you must have free raw material.

We had before us this morning some manufacturers complaining because the noted chemist, Dr. Alsberg, is advocating a bill which will do away with deceptive packages and containers, and we were told that in some of the cereals like corn flakes, for instance, if you buy a package of corn flakes you will find it contains 8 ounces stamped in very small print, on a tremendously large package, and if you buy half a dozen packages it looks like a load of hay, but you have 3 pounds, and it costs you at the rate of $56 a bushel, when corn is selling on the farm for less than 50 cents per bushel. I want to know how you people in the East are going to meet that? You are asking for a higher tariff on your own products and denying the man who is to-day selling his product at less than 50 cents on the dollar. I can prove that such is the condition.

What has this to do with this proposition? Let us see whether it has anything to do with it or not. The Government of the United States owns this valuable water power, where it is possible to create 550,000 horsepower, power which can be sold as low as $15 per horsepower per year, and then pay the Government of the United States a dividend of 5 per cent on an investment of $50,000,000, and you are quibbling now about whether we shall permit this great Government to go on with this plant No. 2, which is complete in every respect for the Government of the United States to manufacture its own explosives, both in time of war and in time of peace, and incidentally manufacture fertilizer which can be sold to the farmer at a lower price than he is paying for the fertilizer now. Do you suppose that has anything to do with the interest of the farmer? There is not a Senator here who has spoken against this bill who does not know that the farmer would be benefited by this legislation if it is administered in obedience to law.

I have stood on this floor and called attention to the fact that Congress may enact legislation beneficial to the people and the power may be usurped by some governmental officials so that in the administration of affairs it will not be for the benefit of the people but only of a few of those who are so afraid that the Government of the United States will lose some money.

We have had experience with regard to that recently. You permit me, sir, to get fertilizer at a price cheap enough to enable me to buy it and you put it on my land and I can reduce my acreage 50 per cent and produce more food for the people on half the acreage than I can on double the amount. You say would that be a benefit to the farmer? It would reduce his acreage cost just that much, because it costs as much to cultivate an acre of land with a small yield as it does with a large yield.

I did not want to take the time of the Senate to say what I knew about the possibilities in the West, but do Senators know that we have in my State alone more than seven thousand billions of tons of lignite coal, coal underlying more than 15,000,000 of acres? We strip the soil, and we use the ordinary steam shovel and scoop up with one shovel 6 tons to the minute. We can put that coal on the docks at from 50 to 75 cents a ton. Do Senators wonder why I am anxious to see this research made and this splendid idea developed, making it possible not only for Muscle Shoals to manufacture—no, that is not the only place where fertilizer will be manufactured. It will be manufactured right on the prairies of North Dakota, and you can not compete with us with your water power, because we have no investment cost.

I say to you, and there is not a Senator here who can successfully contradict it, that it will be of immense benefit to the people of the State which I have the honor in part to represent to have this bill passed.

I will not take the time to mention the names of the experts, all high-class men, who have stated over and over again that there is a necessity for research laboratories, and that instead of having half a dozen or two dozen men working in these laboratories we ought to have, as some countries have, 15,000 of them, all paid by the Government, who are actually getting the formulas necessary to manufacture not only cyanamid and fertilizer but dyes as well.

Do you mean to say that the American people do not possess the genius that other people do? That is what you indicate when you are opposing this sort of legislation. By indirection you are saying that those people over there, because they speak a foreign language, or perhaps for some other reason, are to furnish us with these processes. The American engineers and scientists have never been given an opportunity to make the research and to make it possible for the United States to be independent of every other nation on the earth just because Congress has not seen fit in its wisdom to appropriate the money. I do not think that anybody will deny that.

Those few of us who have supported this legislation have been put in the class of these sinister influences who want to expend these tremendous sums of money at Muscle Shoals and on these nitrate plants. We know that there was extravagance during the war in the erection of these plants; and who could help that? Whom are you going to blame for it?

I think it will be admitted that hundreds and perhaps thousands of men gathered at these camps in answer to advertisements sent out by the Government; necessarily so, because everybody was anxious to see that we should provide the soldier boys with explosives necessary to fight a great war. So no one should be blamed. You and I are as much to blame as

the men who directly had charge of the affairs of the Government at that place. And I say do not class those of us who have had the courage—and I weigh my words when I say "courage"—to stand up and vote for a proposition which we know is just and right and which ultimately will benefit all the people of this great country, and link us together with men who are parading the corridors, as you say. I never call attention to that, because I am immune from lobbyists. There is not a man in the United States I would not be willing to talk to if I had the time. I am not afraid of lobbyists. They can not have any influence upon me, because I try to study conditions and use my own brain, small as it may be, and I follow my own judgment. Perhaps very often I am mistaken, but it is not because some phantom has been held up in front of me to scare me.

Mr. President, we know that in the West we shall have to continue to produce bread for the American people. We must do it, even if we do it at a sacrifice, and every year our mortgages are growing a little larger. Just now you eastern people who hold the purse strings are not even willing to buy our mortgages; they are a drug on the market. We increased the rate of interest on our mortgages from 5½ to 10 per cent, and yet you are unwilling to buy them. We are willing to pay that rate just now. We have ruinous conditions staring us in the face; but as the Senator from Iowa said yesterday, are we to be pikers, or shall we manifest a splendid American spirit and say that we will go on and produce bread for the American people regardless of whether it is at a loss or a profit?

Yet Senators are not willing to have us take a step that will make it possible to have a yield of products which will lower the cost. If Senators understand anything, they must admit that that is exactly what they are doing when they are making it impossible for the American people to get this product so indispensable in the production of their crops. The question is a larger one than simply the completing of a plant or the finishing of a plant or the operating of a plant at Muscle Shoals.

Mr. McKELLAR. Mr. President, may I interrupt the Senator?

Mr. GRONNA. Certainly. I have already taken too much time.

Mr. McKELLAR. They are not only doing all that the Senator says, but in addition to that they are willing, in order to carry out their designs, to scrap a plant that has cost the Government already $85,000,000.

Mr. GRONNA. Yes. In that connection I wish to refer to a man for whom I have only the friendliest feeling, a man whom we all treated most courteously and whom we gave, with his entire staff, all the time he wanted. He is a man of genius and great ability. I doubt if any other man could have done as well as he did. With all his patriotism and his genius he helped the Government to set up the plant. I am not criticizing the expenditure of money now at all, because it was inevitable, I believe, though, perhaps, some of it could have been avoided. But who had the time then to check up with all those people? It was a condition and not a theory. This very man, after the Government of the United States paid all expenses, paid for everything, and said, "we do not want your services for nothing," but he profited during the war to the extent of nearly a million dollars, and in addition he was to have a quarter of 1 cent per pound, or $5 per ton, as royalty upon every ton manufactured—I think the Government of the United States did not take advantage of him—this same man has admitted and stated before our committee that the plant is complete and it is the best plant in the country; and yet he, as the Senator from Tennessee [Mr. McKELLAR] has stated, is among those who seem to be willing that the plant should be scrapped. He has also stated that the plant could not be sold at this particular time at any figure.

What are we going to do with the plant? It is admitted by the Senator from Wisconsin [Mr. LENROOT], and of course he got the information from the record, that it will cost all the way from $400,000 to $500,000 for the simple upkeep of the plant. That has nothing to do with the deterioration of some of the material and the machinery in the plant. It has been stated by some of the experts of the War Department that whether we operate the plant or not, after a certain number of years the most expensive part of the machinery will deteriorate and become worthless. So it is not merely a matter of $400,000 or $500,000 of cost of leaving the plant in a stand-by condition, but it may run into millions, and nobody will deny that.

With all these facts—and they are facts, and no honest man will dispute them—is it not better for us to appropriate a small amount to let an agency of this great Government continue to operate and experiment with the plant which is now in a going condition? The amendment of the Senator from Wisconsin nullifies, to a certain extent, the amendment which the Senate has just agreed to, because that provides for 125,000 shares of stock at $100 each, or $12,500,000, and the amendment of the Senator from Wisconsin provides specifically that the capital stock shall only be the amount which may be secured from the sale of 150,000 tons of Chilean nitrate. Is that a fair proposition? Why hamstring these men, the Secretary of War, or the President of the United States, or any of these patriotic men, who have been operating in the interest of the Government, sitting up late at night, until after the midnight hour, for no extra pay, but simply because they were interested in the project; interested in preserving to this great Government this valuable water power at Muscle Shoals, and interested in having the plant owned by the Government at all times so that we would not be dependent upon this trust—and I do not like to use that term, but it is the only word I can think of—this Chilean nitrate trust which holds in the hollow of its hand the destiny of this country in case of another great war.

Now, let us be fair; do not let us say in one section of the bill that we want 150,000 tons of nitrate sold, which, taking the Senator's own admission that it is worth $60 a ton, would make only $9,000,000 applicable for capital stock, when the Senator from New York has offered an amendment, which the Senate has adopted, fixing the capital stock at $12,500,000. Now we are about to vote on a proposed amendment to make the capital stock only whatever sum as may be secured from the sale of 150,000 tons of nitrate. I think my position in that particular is correct and that no man will deny it.

There are two propositions in the amendment offered by the Senator from Wisconsin. I think the reason why he answered me as he did was because I did not put my question to him in the way that I should. I asked if it would not reduce the capital stock. Of course, I should not have asked the question in that way. I know that it would not, but it would reduce the amount that the Government of the United States could pay into the corporation. If the stock of nitrate should be sold at $60 a ton the amount paid by the Government could not be more than $9,000,000, and the corporation could not come to Congress for the deficiency. If the nitrate should sell for only $50 a ton it would bring $7,500,000, and that is all the Government could pay toward the capital stock. Is that fair after we have just adopted an amendment saying that the capital stock shall be $12,500,000 and that the Government shall pay a net dividend of 5 per cent upon half the cost value?

Mr. HEFLIN. Mr. President, I am sorry that all the Members of the Senate are not present. I am sorry that they did not hear the speech of the Senator from North Dakota [Mr. GRONNA], who is the chairman of the Committee on Agriculture and Forestry. The agricultural West and the agricultural South will certainly avail themselves of the opportunity of passing the measure and of seeing to it that the amendments placed upon it shall not destroy the good that is in the bill.

The Senator from Utah [Mr. SMOOT] is very bitter in his criticism of the measure. He made a speech some time back in which he favored appropriating the money necessary to complete the project. He was right then. He is wrong now.

I wish to ask the Senators from the West, who represent the great agricultural section, the grain-producing section of our great country, if they are going to support the Senator from New York [Mr. WADSWORTH] or whether they will support the leadership of the Senator from the great West, who is the chairman of the Committee on Agriculture and Forestry [Mr. GRONNA]? Both Senators are clever Republican gentlemen, but I submit to the Senate that one of them hails from the great grain-growing West and certainly knows what the farmer wants and needs. He himself is a great farmer and has been made chairman of the Committee on Agriculture and Forestry by the Republican Party in the Senate. Here is a measure that pertains to the great agricultural industry and looks to the interests of the farmers all over the country, and here is the chairman of the great Committee on Agriculture and Forestry pointing out the good in the bill and urging his colleagues upon his side of the chamber to support the measure.

But I find some of them, I am sorry to say, following the Senator from New York, who some time back was criticizing the administration for not being prepared when the war came on. No one was looking for war at that time. Now, when the world is in an unsettled state and the war clouds are not all gone from the sky, the Senator himself, chairman of the Committee on Military Affairs, is blocking a movement that seeks to put the country in a state of preparedness for any emergency that might arise.

Will the Senator from New York criticize those in authority for failing to put the country in a state of preparedness back yonder and now, when those in authority are seeking to prevent

a recurrence of such a situation, block them and criticize them for the thing that they are trying to do, to avoid just such a situation as he has criticized heretofore?

Mr. McNARY. Mr. President——

Mr. HEFLIN. I am glad to yield to the Senator from Oregon.

Mr. McNARY. I think the Senator knows from my action in the committee that I am friendly to the general purpose of the bill, but I am impelled at this time to favor the amendment offered by the Senator from Wisconsin [Mr. LENROOT] from the fact that I think it does protect the country in case of a war emergency. I am not following the Senator from New York or the Senator from Wisconsin or a Senator from elsewhere, but I think when the Secretary of War has stated that it would be unsafe and unwise to dispose of this nitrate beyond a certain limited amount, which is provided and recommended by the proposed amendment, to go beyond that is proposing a principle which the Senate should not now attempt to support.

Mr. HEFLIN. I am not criticizing the distinguished Senator for his position. I appreciate the fact that he has shown friendship for the measure. I am not speaking particularly against the amendment; I am speaking about the bill generally in reply to some things which have been said here to-day.

Mr. President, the mails every morning, as has been pointed out, pour in anonymous literature from New York and other points opposing the measure. Why is this propaganda going on? Who are the mysterious men—from somewhere in Wall Street, I presume—who are firing from that great distance upon this meritorious measure, which so vitally affects the farming interests of the country? It seems to me, if I were championing the other side of the cause, I would undertake to stop this thing, or I would, at least, be able to tell this body who these people are and that I was not in any way connected with the situation thus presented.

The Fertilizer Trust is opposing the measure; the cyanamid company, I understand, is opposing it; Du Pont, the powder king, is opposed to it. It seems to me it would not be very hard for Senators who really have friendship for the farmer to know on which side of the measure they should stand.

I submit to Senators from the West that with their support and that of Senators from the South we can pass the bill and insure to the farmers of the country the information they are entitled to have, and that is what it costs to produce fertilizer. The trust holds them up to-day and sells them fertilizer at any price it desires to fix; and when the farmer asks how much does it cost to produce it, they can tell him anything they please, and he does not know any better, but when the Government, through its own plant, goes to the trust magnate, it can tell him "We know what it costs to produce this or that character of fertilizer; the price you are charging the American farmer is exorbitant, and we are not going to permit you to do it." That is why the Fertilizer Trust is fighting the bill. It is fighting it also because it thinks the Muscle Shoals plant will operate to some extent in competition with its product. I submit there ought to be competition with any trust product.

We are told by Senators in one breath that this project can not be made a success, and the sound of those words hardly dies down in the Chamber until another Senator arises and says it can be made a great fertilizer monopoly, and the Government will be in business against private enterprise. One Senator says it will not work; another Senator says it will outwork anything that can be put up against it. Which one of these contentions is right?

I wish again to say to Senators what I have said before, that this great Government, which we all love, and whose highest and best interests we should safeguard always, has expended already on the Muscle Shoals project eighty-odd million dollars. Will Senators throw that eighty-odd million dollars away, or will they go on, as the Senator from Utah [Mr. SMOOT] said in a former speech, and complete the project? He said then, Mr. President, "I am in favor of appropriating whatever is necessary to complete the project." I repeat, he was right then. Now, he wants to wave it aside and say that we are seeking to get something for nothing. Who? This is an American project. It is located on a great stream in Alabama, in the most desirable site on the continent. It is close to the phosphate fields of Tennessee. It is shown that it can manufacture fertilizer, ready to be put into the soil; it is shown that it can manufacture nitrates that would free us from the Chilean monopoly. True, I repeat, such activity would be in conflict with the interests of Du Pont, the powder king, and other great importers of Chilean nitrates. Those people would like to see the eighty-odd million dollars sunk and this whole enterprise junked. However, this Government owns the land around the project; it owns the power site, and no better power site have I ever seen anywhere. Some of the finest and most costly machinery in the world is there; the great work is going on; it is equipped with barges plying on the river, with mighty cranes, and with every other appliance needed to complete the work. Under all the circumstances, I can not understand the efforts that are being made to kill the pending measure. I do not believe there is a State in the Union that would vote to stop this project if it knew the truth regarding it.

Mr. President, I have been in the Congress for nearly 17 years, and it has been my experience that whenever there is submitted a measure designed to benefit the common mass of the people or looking to the interest of agriculture somebody rises to tell us that we are drifting off into paternalism, that we are about to enact a piece of class legislation, and finally we are told that the bill is unconstitutional. We never hear such arguments made when great special interests, with their shrewd and cunning arguments prepared by the highest and best-paid lawyers in the land, come to railroad through measures in which they are interested. When, however, there are involved the interests of those who have no money with which to pay lobbyists to come and stay here and who can not subsidize any newspapers some one is ready to tell us that the measure is unconstitutional and that we are indulging in paternalism.

This bill provides for the operation of a great American nitrate plant. Let me say to Senators what has occurred in my experience. I led the fight in the other Chamber to secure the passage of a bill granting a permit to the American Cyanamid Co. to build a power dam on the Coosa River in my district. That bill passed this body by almost a unanimous vote and it passed through the House, but President Taft vetoed it. I shall not criticize him in any hostile spirit; I merely express regret at his course, for by that one act he drove out of America a great nitrate plant that would have been in operation when the war came upon us. Where did that plant go? Did it locate in some other section of our country? No, Mr. President, it went beyond our borders and established itself in Canada, on the Niagara River. So we lost a great industry by the folly shown on that occasion.

During the stress and strain of war the Government, under the direction of the President, Commander in Chief of the Army and Navy, said we must have a nitrate plant of our own—where is the best place to build it? It was decided that Muscle Shoals, on the Tennessee River, was the best place, and so the Government went down there and constructed such a plant at great cost and expense. Dams are being built there; they have completed plant No. 2, and that plant is functioning, as evidenced by the fact that we had exhibited in this Chamber some days ago material manufactured at that plant. Yet we are now met with suggestions from Senators on the other side that the project must be stopped.

I wish to ask Senators whence the opposition comes that would seek to prevent America having a nitrate plant of her own? Opposition was strong enough to cause the proposed plant on the Coosa River to be driven into Canada, and opposition in this instance seems strong enough now to cause the chairman of the Military Affairs Committee,who ought to lead in the effort to place this country in an up-to-date condition of preparedness for any emergency, to fight this project in a manner that would indicate his desire to kill it.

I again ask whence the opposition comes? We were about to establish such a plant on the Coosa River, but it was killed and Canada has that plant to-day. That is one great industry that we lost. We have another great enterprise on which eighty-odd million dollars have been expended, in connection with which we own the land and the power site and which is located at an ideally desirable place and as a part of which one plant has already been completed. We are merely asking permission to go on with the work, but strenuous efforts are being made to kill it outright.

Mr. President, I can not see the wisdom of Senators undertaking to do something that means a loss to this Government of eighty-odd million dollars outright, and that is what it does mean.

This plant at Muscle Shoals was built under great difficulties. The influenza came just at the time these thousands of men were there at work. Many of them were stricken down and many of them died. In the hurry and the stress and strain money was wasted, doubtless; money was extravagantly spent, doubtless; but there is no getting away from the fact that that plant is located at a fine place, a very desirable place; that it is close to the phosphate beds; that it is on a fine stream of water; that it is located at one of the finest water-power sites in

the wide world; and that the Government has spent eighty-odd million dollars on it; and I submit that there is no justifiable excuse for the fight that is being made to destroy this bill.

On yesterday, Mr. President, we spent most of the day fighting over a proposition to recommit the bill after it had been in the hands of the Agricultural Committee for six or seven months, had been thrashed out and gone over, and had been reported favorably to this body. Notwithstanding all that, in the effort to get rid of it in the easiest way possible the enemies of the bill moved to recommit it, which meant that upon reaching the close of this session the bill was to die.

Oh, Mr. President, here is an opportunity, I want to say, and then I am through, to give to this Government a great nitrate plant that will serve its needs in time of war. Here is an opportunity to give to the Government a great fertilizer plant that will aid the American farmer in time of peace. Here is an opportunity to establish a great dam for water power to run both these plants, when the other one is completed, and save to the Government and the people of the United States of their coal supply 6,500,000 tons a year. Here is an opportunity to free the United States Government from its dependence upon Chile, a foreign country, for nitrate in time of war, the most important power in modern war, its explosive power.

I submit that all of these things are very much desired by the Government and by the people of the United States, and I regret to see the Senator from New York [Mr. WADSWORTH], the chairman of the Committee on Military Affairs, who heretofore has been so severe in his criticism of the administration for permitting a state of unpreparedness to exist, blocking the very work that leads to perfect and ample preparedness.

Mr. WOLCOTT. Mr. President, the junior Senator from Alabama [Mr. HEFLIN] in his very interesting remarks dropped one statement that aroused my interest. In speaking of the lobbyists who are fighting this bill—"these people," as the junior Senator called them—he mentioned the "Chilean Nitrate Trust," whoever that may be—I confess I do not know—the American Cyanamid Co., and "Du Pont, the powder king."

Now, I can understand why a fertilizer company would oppose this bill, but I should like to ask the Senator if this "Du Pont powder king," as he is called, has shown his hand anywhere in opposition to this bill? Can the Senator advise me of any activity that the Du Pont concern has shown against this bill?

Mr. HEFLIN. I will say to the Senator that the Du Pont Powder Trust, the Fertilizer Trust, and all the other trusts, are very careful not to show their hands in measures of this and other kinds that come before the Congress.

Mr. WOLCOTT. That introduces a very interesting line of thought, the line of reasoning which was indulged in somewhat the other day by the junior Senator from Wisconsin [Mr. LENROOT]. He charged, as I gathered from his remarks, that the Alabama Power Co. was lobbying for this bill, and when challenged by the senior Senator from Alabama [Mr. UNDERWOOD] to produce his proof the junior Senator from Wisconsin introduced what, to me, was a very novel line of thought—that because the Alabama Power Co. was not here expressing itself, therefore it was fighting for the bill. The Senator from Alabama seemed to adopt that rather novel and, I may say, curious line of reasoning, that the trusts do not appear, and therefore they are opposed to the measure.

Now, I did understand the Senator from Alabama to say in the course of his remarks that the erection of this plant would destroy the "Chilean Nitrate Trust," as he calls it, and that, of course, the powder people, who import Chilean nitrate, did not want to see that trust destroyed. I should like to suggest this thought to the Senator:

The powder people do not manufacture nitrates; they purchase nitrates; and if this bill will result in giving cheap nitrates to the people of the United States, is it not manifest that the powder people, being just as much consumers of nitrate as the farmers, would be delighted to see the bill passed and the cost of nitrates come down, and their great raw material therefore reduced to them?

This is a matter of no great consequence, I know, upon this bill; but the line of thought that was running in the Senator's mind excited my curiosity, and I should like to have it discovered here, just to see how he reasons it out.

Mr. HEFLIN. I have reasoned it out to my entire satisfaction. I may not be able to satisfy the Senator from Delaware.

Mr. WOLCOTT. I have not discovered the Senator's reasoning yet, except as he disclosed it in a brief sentence, and I am asking for it.

Mr. HEFLIN. It seems to me very plain that the chief importer of nitrates from Chile, and who controls that material in the United States, would not like to throw that away and permit a competitive concern to come across its pathway.

Mr. WOLCOTT. Who is this importer that controls it? Certainly not the powder people.

Mr. HEFLIN. The Du Pont powder concern is one of the largest importers, if not the largest importer, of Chilean nitrates in the United States.

Mr. WOLCOTT. The Du Pont Powder Co. is a purchaser. It does not buy nitrates and sell them to other people to use. If, by reason of the erection of this plant, they can get cheaper nitrates, is it not reasonable to expect that they would like to see the plant operated?

Mr. HEFLIN. If the Senator will permit me, what I was trying to say was that they control this vast amount of nitrates that come into the United States. They are probably the largest importers of nitrates; and having all this material in their hands, what they use and what they sell to others——

Mr. WOLCOTT. Do they sell to others?

Mr. HEFLIN. I do not know.

Mr. WOLCOTT. I can tell the Senator that they do not.

Mr. HEFLIN. They do not?

Mr. WOLCOTT. No.

Mr. HEFLIN. But whether they sell to others or not, if they have a deal on, a contract with the Chilean people to furnish them with these nitrates, they do not want that contract disturbed. They do not know what they would have to pay for the nitrates over here.

Mr. WOLCOTT. If I understand this bill, there is no contemplation at all that the plant, if authorized to be finished and the dam completed, can be producing nitrates short of about two years. Now, if it be true that this powder company is fighting this bill for fear that a contract which it may now have may be injured by the passage of the bill, is it not apparent that it has ample time to take care of its difficulty? Because, under the most optimistic forecast that I have been able to find you will not get a pound of nitrate out of this plant short of two years.

Mr. President, I have heard a great deal of talk about lobbying in connection with this bill.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER (Mr. GAY in the chair). Does the Senator from Delaware yield to the Senator from Kentucky?

Mr. WOLCOTT. Yes; certainly.

Mr. STANLEY. I do not mean to state anything about the attitude of the powder people, because I do not know; but it is a fact that in case of war this company would cease to manufacture fertilizer and would manufacture explosives, in which case it would be a competitor, of course, with other manufacturers of explosives.

Mr. WOLCOTT. That is very true, Mr. President, if the Government can manufacture powder as efficiently or as economically as the great powder makers; but does not the Senator know that this so-called "Powder Trust" during the war was not afraid of Government competition and thought nothing of it; in fact, it was so regardless of its own business as to build for the United States Government a more modern plant than it itself had, duplicating the Du Pont Powder Co.'s capacity, without one single cent of charge to the United States Government. And yet, in the face of that record, does the Senator think that any man can with any show of reason assert that the Du Pont Powder Co. is coming in here and trying to throttle the proposition of building a nitrate plant for fear that in time of war this powder company, which showed the utmost self-sacrifice and self-denial, would suffer as a competitor?

Mr. STANLEY. Mr. President, I am not charging and did not state that the Du Pont Powder Co. was opposing this measure. I was simply calling the attention of the Senator from Delaware to the statement I understood him to make, that under no circumstances could the Du Pont powder people have any conflicting interest. Now, it is true that as long as they manufacture fertilizer they are manufacturing an unfinished product for the powder company.

Mr. WOLCOTT. Which the Du Ponts would like to buy.

Mr. STANLEY. In time of peace their operations would be beneficial to the powder manufacturer. In time of war this would become an explosives manufacturing concern, and they would be competitors. It does not follow from that, nor do I mean to imply, that the conduct of this or that or the other powder company would be affected thereby, but that is the fact.

Mr. WOLCOTT. The plant would manufacture nitrates in time of war as in time of peace, and it would manufacture a thing that all powder makers want to buy; and if the Government through this plant could make this commodity cheaper, as

it is claimed it can, than it can be obtained from the present sources of supply, it stands to reason that any powder maker would want to see the Government embark in the business, because it could then buy its raw commodity, nitrates, at a lower price.

I started to say——

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Delaware yield to the Senator from Utah?

Mr. WOLCOTT. I yield to the Senator.

Mr. KING. Before the Senator proceeds, if he will permit an interruption, the Senator from Alabama conveyed the idea, as I understood his remarks, that the construction of this plant would destroy the Chilean Nitrate Trust or the Chilean nitrate business. He intimated, if I apprehended him correctly, that the Du Ponts, the powder people, who are large consumers of Chilean nitrates, control the domestic market for the Chilean nitrates. Obviously that is wrong. If the Senator reads the testimony he will discover that there are large deposits of Chilean nitrate in South America, that the Government of Chile is anxious to sell that product, that the owners of it are anxious to sell it, and anybody can buy who desires. The United States Government can buy if it wishes, private individuals can buy if they desire, and in view of the fact that we have so many idle ships I suggest to the Senator from Alabama that it might be a good idea for the Shipping Board to use some of those ships and import the nitrates for the benefit of the farmers.

Mr. WOLCOTT. Oh, yes; one ship arrived in a southern port just the other day carrying 7,000 tons.

Mr. KING. I think the argument adduced by the Senator from Alabama is not founded upon the facts disclosed by the record. It is a fallacious argument, and the nitrates of Chile are available for any person who desires to purchase them.

Mr. WOLCOTT. That is very true, Mr. President, and when the Senator from Alabama, in the course of his remarks, ventured to make his charge that the so-called Powder Trust, as he denominates it, opposed this bill he had no facts on which to base it. He has a theory that if they had a powder contract they probably would oppose it, and, as I said, it is a rather curious line of thought that, in view of the fact that they could buy their nitrates cheaper, therefore they would oppose it.

Mr. President, I started to say a moment ago that I have heard a great deal of talk about lobbying against this bill. The Senator says his mail is flooded with anonymous communications from some source. I want to say my own experience is that I have not received a single communication at any time from anybody about this bill, for or against it.

I have seen one gentleman who has been rather persistent in seeking interviews against the bill, and I have talked with him somewhat. He comes from I do not know where. I never knew him until the other day, when I saw him in these corridors. That is the extent of the lobbying that has come under my notice, and if the evidence of lobbying is no more substantial than that submitted here the other day by the junior Senator from Wisconsin [Mr. LENROOT], who talked with respect to the Alabama Power Co., and that submitted to-day by the Senator from Alabama, I want to say that in my humble judgment, which may not be worth much, the evidence is flimsy, utterly untenable, and if I am right, not sufficiently respectable to be entertained for a moment.

Mr. HEFLIN. Mr. President, the Senator has heard Senators say here in the course of this debate that they received these anonymous circulars, has he not?

Mr. WOLCOTT. I heard the Senator say it to-day. I have not heard any other Senator say it.

Mr. HEFLIN. Did not the Senator hear the Senator from North Dakota [Mr. GRONNA] and the Senator from Tennessee [Mr. MCKELLAR] and others during the debate say they had received them?

Mr. WOLCOTT. They may have said it; but I did not happen to be in the Chamber at the time.

Mr. HEFLIN. The fact is that we have received them; I have received them, and others have received them. The Senator from Delaware is the only Senator, so far as I know, who has not received them.

Mr. WOLCOTT. It may be a very curious fact, but it is a fact.

Mr. HEFLIN. I wonder if that can be attributed to the fact that the Senator does live in Delaware, and that they thought there was no use sending him any literature upon the subject?

Mr. WOLCOTT. The Senator may so wonder, if he choose; and I suggest to the Senator from Alabama that it might also be wondered if the Senator's keen interest in this bill is not so much to save the Government in time of war, is not so much to supply cheap nitrates, below cost, to the farmer, as it is to supply water power in the State of Alabama to supply current to public utilities of the Senator's State?

Mr. HEFLIN. Mr. President——

Mr. WOLCOTT. I do not know why it is that I have not received these communications, but I have not received them.

As to the intimation coming from the Senator from Alabama that there is a telepathic communication between the Du Pont powder people and myself, I want to say to the Senator that I resent it, because the fact of the matter is that I have nothing to expect from those powder people. If I manifested ordinary human feelings, I would oppose them, because they have in politics opposed me. But I shall not sit here and have a great business concern, which made a contribution to this world struggle unequaled by any other private concern on the face of the earth, unjustly assailed as coming here and fighting a measure when there is no shadow of evidence to sustain it. That comes from a Senator from Delaware who is of a political affiliation directly opposed to them, and they have always opposed him.

Mr. HEFLIN. Mr. President, I want to say to the Senator that the reference I made was made in the utmost good humor, and not intended to reflect at all upon the Senator. It was just in reply to the Senator's statement that I had said I had received these circulars, and that others had received them, but that he had not received one that I suggested in a facetious way that the Senator probably did not need them, because he lives in Delaware. But the fact that we can get nitrates now from Chile and that we have some of our own that we want to sell does not take away the force of the point I made, that the manufacture of nitrates by this Government will do away with the necessity for the Government to buy nitrates from Chile, and will enable the Government to manufacture powder for itself, when it would put itself in competition with the Du Pont Powder Co., and my point was that the Du Pont Powder Co., this great cyanamid company, and the Fertilizer Trust are all interested in seeing this measure defeated.

Mr. WOLCOTT. Mr. President, this little controversy going on here is nothing that strikes at the merits of the bill. I perhaps should not have put my question to the Senator, because it amounts to nothing. The bill must stand or fall on its own merits. I do wish to call to the Senator's attention, however, before I take my seat, the fact that the Government is in the powder business already. It makes powder.

Mr. HEFLIN. It produces it on a very small scale now.

Mr. WOLCOTT. It can produce on a pretty large scale, as it did in one of the plants during the war. I think the Senator could get the figures in a confidential way as to what one of these Government powder plants did during the war. Furthermore, the Government had a powder plant with a million-pound-a-day capacity, which was a powder plant erected for it by the Du Pont Co., down in Tennessee. Certainly the motive of protection against Government competition can not be attributed to this powder company which built that plant for the Government, a plant with a capacity to take away from the powder company every dollar's worth of its explosives business if the Government chose to continue in it. They were not afraid of that, nor are they afraid of the competition of the Government plants, or they would not be giving the Government the secret processes they find, as fast as they find them. There can not be anything in the talk that this particular company is opposed to this bill, and I am very much led to the thought that there can not be much in the talk about lobbying generally, because the little evidence I see produced in support of specific charges of lobbying turns out to be so flimsy as not to sustain the charges at all.

Mr. HEFLIN. Mr. President, the Senator said he does not believe all this talk about lobbying. It has been asserted here a number of times that there are lobbyists about the Capitol——

Mr. WOLCOTT. Will the Senator permit me just a moment? I do not want to be misunderstood. I specifically said there was one man who I thought was a lobbyist, because he had sought interviews with me, somewhat to my annoyance, and I have no doubt that there are fertilizer people here who are lobbying, as it is said.

Mr. HEFLIN. Fighting this bill?

Mr. WOLCOTT. Yes; I have no doubt about that. But I am questioning the extent of this powerful influence, all these people who are lurking around here in these corridors. I am questioning the extent of it; that is all.

Mr. HEFLIN. The chairman of the Committee on Agriculture has called the attention of the Senate to the fact that the president of the Fertilizer Association of America has appeared in opposition to this very measure. I called the attention of the Senate to the fact a few days ago that in the Washington Post, in the column called "Chats with Visitors," there was

an interview purporting to be given by one Hampden Norman, registered, they said, at the Willard Hotel, who lived in Memphis, Tenn., who condemned the Muscle Shoals project and denounced it as a failure, stating that money had been wasted on a project which never would be of any value. I charged that he was a fictitious person, and that the interview was a fake, and that he did not live in Memphis, Tenn. We wired to Memphis, and they replied that no such man lives there, and I challenge the opposition to this bill to produce Hampden Norman. Who is that mysterious lobbyist who is filling up the columns of the newspapers with stuff against this bill, and then when you call on those who oppose the measure to produce him they fail? There are lobbyists here, and they are fighting this bill every day.

No man can read some of the reports that go out in the newspapers without seeing that the story is somewhat colored on the side of the opposition to this measure. I do not mean to reflect upon press reporters generally but if Senators will read a few of them they will find that the argument is warped and twisted so as to make a bad impression against this measure. This morning in the Washington Post there was a little report about it, and it told about the Senator from Ohio [Mr. POMERENE] wanting to know whether the farmers were getting a gold brick or fertilizer, and the Senator from Iowa [Mr. KENYON] saying he would be for the bill if it would benefit the farmer, but he was afraid it would not; and the Senator from Utah [Mr. SMOOT] saying that it would not benefit the farmers at all; and just quoting the Senator from North Dakota [Mr. GRONNA] as saying that more fertilizers were needed by the farmers. That is a mild-mannered write-up for the proponents of the measure.

I submit that these lobbyists are encamped about this Capitol, and that money is back of them to defeat this bill. Let the farmers of the country, whose organizations have sent petitions asking Congress to pass this measure, take note of the record vote upon this question and see whether the men who come here from the agricultural South and the agricultural West will forget them when the hour comes to vote, will turn a deaf ear to their appeal, and turn their backs upon their best interests.

Mr. GRONNA. Mr. President, I realize that there is force in the argument made by Senators, and particularly the Senator from Oregon [Mr. MCNARY], and I believe that the Secretary of War did say that we ought to have on hand at all times 150,000 tons of nitrate. As I understood him, that would be the minimum amount. In view of that, Mr. President, I desire to amend the amendment of the Senator from Wisconsin, which reads as follows:

Provided, That not more than 150,000 tons of such nitrate of soda shall be sold, and the subscription by the United States to the capital stock of the corporation created by this act shall not exceed the proceeds as such sale.

I move to strike out the language after the word "sold," on line 12, and to insert certain language, so as to read:

Provided, That not more than 150,000 tons of the present supply of nitrate of soda shall be sold—

and to strike out the remainder of the amendment of the Senator from Wisconsin.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from North Dakota to the amendment of the Senator from Wisconsin.

Mr. GRONNA. Mr. President, I trust there will be no opposition to the amendment which I have proposed, because it safeguards the interests of the United States by permitting only the sale of 150,000 tons at this time. The Government will then retain 150,000 tons, which it was stated by the Secretary of War, as the Senator from Oregon [Mr. MCNARY] has said, was necessary to keep on hand. But it is unfair to say that the 150,000 tons, regardless of the amount of money it shall bring when sold, shall represent the capital of the corporation and then compel it to pay 5 per cent dividends on half of the cost of the plant, as the language of the bill now provides.

Mr. KING. Mr. President, will the Senator yield?

Mr. GRONNA. Certainly.

Mr. KING. Perhaps I did not quite understand the Senator. My understanding is that the corporation will have all the property involved in the two plants, the steam plant and the other property, which has cost the Government $80,000,000. Instead of the company having a capital of only $12,500,000—and I understood the Senator to use the word "capital" as the equivalent of property—it will have property which will have cost $80,000,000 plus the cash which will be derived from the sale of the nitrates, which will be, as I understand the Senator's position, $12,500,000, so that the corporation is asked to pay a dividend upon only one-half of the value of the property which it has.

Mr. GRONNA. That is true, but the Senate has to-day adopted an amendment, proposed by the Senator from New York [Mr. WADSWORTH], providing that the capital shall be $12,500,000. The amendment offered by the Senator from Wisconsin [Mr. LENROOT] is in absolute conflict with the amendment just agreed to by the Senate. I am not proposing to increase or decrease the capital stock of the corporation. In the interest of fairness I am only saying that if 150,000 tons of nitrate when sold does not bring $12,500,000, we do not prohibit the Government from using $12,500,000 as its capital.

Mr. KING. Do I understand the Senator to mean that the corporation is expected to pay dividends only on $12,500,000, regardless of the value of the property which the Government turns over to it?

Mr. GRONNA. I wish the Senator from New York would answer the inquiry of the Senator from Utah. It is his amendment, and I may not understand it as fully as he does.

Mr. WADSWORTH. Under the amendment which the Senate has already adopted the corporation would be required to pay interest at the rate of 5 per cent on bonds to be issued to cover the property turned over to it to the extent of 50 per cent of its value; that is, the property already completed. If there is any more property turned over to it, it must issue bonds on the basis of 100 per cent of the value of such property, and then it must pay 5 per cent on that.

The Senator from North Dakota has offered an amendment to the amendment of the Senator from Wisconsin, who has gone away for a week. I do not know that anyone is authorized to express the opinion of the Senator from Wisconsin on the amendment offered by the Senator from North Dakota, and I can not do so; but I can take occasion to point out, not only to the members of the Senate who are in doubt about the wisdom of the legislation but also to those who are supporting it, what a difficult position we are in when we come to rewriting the bill upon the floor of the Senate.

Let us see what effect the bill would have if the amendment proposed by the Senator from North Dakota is agreed to. The bill reads now, commencing at line 11, on page 9, as follows:

The corporation shall have the power to issue and sell preferred stock in any amount not to exceed $12,500,000, of a par value of $100 per share, such stock to be entitled to 5 per cent dividends. All such stock shall be subscribed by the United States of America, and such subscription shall be subject to call upon the vote of the board of directors of the corporation, with the approval of the Secretary of War, at such time or times as may be deemed advisable. In order to pay such subscription as and when called, the Secretary of War is hereby authorized to sell so much as may be necessary of the supply of nitrate of soda owned by the United States and held as a reserve by the War Department at such prices and under such regulations as may be prescribed by the Secretary of War. All sums realized from such sale are hereby appropriated to the use of the Secretary of War for the purchase of the preferred stock of the corporation.

It will be seen that we have not yet rewritten this section. As it is now it makes no sense. The amendment which the Senate has already adopted is basic in its character and the amendment of the Senator from Wisconsin is, in part at least, absolutely essential to make the thing read sensibly.

Now, the amendment suggested by the Senator from North Dakota would not cure the situation in so far as having language used in the amended section which would have consecutive and logical meaning. I warned the Senate two days ago how difficult it was going to be to rewrite the bill on the floor of the Senate. We are very apt to make a mess of it.

I wish now to take the amendment offered by the Senator from Wisconsin and read it into the section as amended to suit the views of the Senator from North Dakota and let us see if we then have any sense. It is a pretty difficult undertaking and I beg the patience of the Senate while I try to put two or three documents together at once.

The bill would read, with the amendments already adopted in it commencing in line 11, page 9, as follows:

The corporation shall have the power to issue and sell preferred stock in any amount not to exceed $12,500,000, of a par value of $100 per share, such stock to be entitled to 5 per cent dividends. All such stock shall be subscribed by the United States of America, and such subscription shall be subject to call upon the vote of the board of directors of the corporation, with the approval of the Secretary of War, at such time or times as may be deemed advisable. In order to pay such subscription as and when called, the Secretary of War is hereby authorized to sell so much as may be necessary of the supply of nitrate of soda owned by the United States and held as a reserve by the War Department at such prices and under such regulations as may be prescribed by the Secretary of War. All sums realized from such sale are hereby appropriated to the use of the Secretary of War for the purchase of the preferred stock of the corporation: *Provided*, That not more than 150,000 tons of such nitrate shall be sold.

Mr. GRONNA. Of the present supply.

Mr. WADSWORTH. Of the present supply. It leaves it all tied up from the Senator's own standpoint.

Mr. GRONNA. It would not prohibit the Government from investing $12,500,000 in the corporation.

Mr. WADSWORTH. Yes, it would; because there is no appropriation for the balance.

Mr. GRONNA. We would be permitted to make an appropriation, but the adoption of the amendment proposed by the Senator from Wisconsin prohibits us from making an appropriation.

Mr. WADSWORTH. No more so than under the amendment proposed by the Senator from North Dakota.

Mr. GRONNA. I leave that to the lawyers of the Senate. I think we would be prohibited under the amendment of the Senator from Wisconsin.

Mr. WADSWORTH. The proposed amendment of the Senator from North Dakota does not appropriate anything out of the Treasury.

Mr. GRONNA. No; but the Secretary of War would still be empowered to sell more nitrate of soda if he had a new supply, which he will have when the company has for a time manufactured cyanamid and the other explosives which they intend to manufacture at Muscle Shoals.

Mr. WADSWORTH. Then I understand the amendment of the Senator from North Dakota is based upon the theory that the Secretary of War can sell 150,000 tons of nitrate of soda now on hand.

Mr. GRONNA. Of the present supply.

Mr. WADSWORTH. And if that does not produce $12,500,000, he will go to Chile and get some more nitrate and sell it.

Mr. GRONNA. Oh, no; he will not.

Mr. WADSWORTH. How will he buy any more without an appropriation from Congress?

Mr. GRONNA. He can sell Chilean nitrate if he has more than 150,000 tons, or he can sell nitrate manufactured at Muscle Shoals if he has more than 150,000 tons. Upon the statement of the Secretary of War, brought out by the Senator from Oregon [Mr. McNARY], I felt, if we want to follow his suggestions, that at no time should we have less than 150,000 tons of Chilean nitrate on hand which contains 15 per cent of nitrogen. I think that is very plain and very easily understood.

Mr. WADSWORTH. I wish I could say it was plain. I can not at all. The Senator's amendment provides that the Secretary of War shall not sell more than 150,000 tons from the present supply.

Mr. GRONNA. Yes.

Mr. WADSWORTH. What other supply is there except the present supply?

Mr. GRONNA. But he can sell when the Government has more than 150,000 tons, whether it comes from Chile or from the product manufactured at Muscle Shoals.

The VICE PRESIDENT. The Government can buy some more and then sell it. Is that the idea?

Mr. WADSWORTH. That is the only way. The Government would have to buy more and then sell it.

Mr. GRONNA. That is all right.

Mr. WADSWORTH. If the friends of the measure want to put that in, I have no objection, though it does not make any sense.

Mr. President, I desire to ask the Senator from North Dakota [Mr. GRONNA] if the amendment of the Senator from Wisconsin [Mr. LENROOT] is modified in the way he has suggested, will he then accept the Lenroot amendment?

Mr. GRONNA. I do not know whether it would be satisfactory to the Senator from Alabama [Mr. UNDERWOOD] or not, but, so far as I am personally concerned, I shall be very glad to accept it if it is in the following language:

Provided, That not more than 150,000 tons of the present supply of such nitrate of soda shall be sold.

Mr. UNDERWOOD. I think that would be satisfactory.

Mr. KING. May I inquire for information whether that supersedes the amendment offered by the Senator from North Dakota?

Mr. GRONNA. I would be willing to accept the amendment of the Senator from Wisconsin with that proviso.

Mr. UNDERWOOD. Does the Senator intend to offer that as a substitute for the amendment of the Senator from Wisconsin?

Mr. GRONNA. Yes; as a substitute.

Mr. KING. That is all I was inquiring.

Mr. UNDERWOOD. I think that is satisfactory.

The VICE PRESIDENT. It has been offered as an amendment to the amendment, not as a substitute.

Mr. UNDERWOOD. The result would be the same, I think.

The VICE PRESIDENT. No; the result would not be the same. It was offered as an amendment to the amendment offered by the Senator from Wisconsin.

Mr. GRONNA. Would it be in order for me to withdraw it as an amendment and offer it as a substitute?

The VICE PRESIDENT. Certainly.

Mr. GRONNA. Then I offer, as a substitute for the amendment offered by the Senator from Wisconsin, the following:

Provided, That not more than 150,000 tons of the present supply of such nitrate of soda shall be sold.

The substitute was agreed to.

The amendment as amended was agreed to.

Mr. GRONNA. I offer the following amendment——

Mr. CURTIS. If the Senator from North Dakota will yield, I desire to offer several amendments on behalf of the Senator from Wisconsin [Mr. LENROOT], which it will not take very much time to consider.

Mr. GRONNA. I have had no opportunity to offer any amendments except one.

Mr. CURTIS. Very well.

Mr. KING. May I be permitted to suggest that the Senator from Kansas offer the amendments and let them be printed, so that we can scrutinize them?

Mr. CURTIS. I will withhold them for the present.

Mr. GRONNA. I offer the following amendment. On page 12, line 10, after the word "prescribe," I move to change the period to a semicolon and to add:

Provided, That no officer so appointed shall receive two salaries.

Mr. WADSWORTH. That, I think, affects the same section of the bill to which I have already offered an amendment. While not offered in a parliamentary sense, it is an amendment which has been printed and lies on the table. This brings up the question as to what sort of a structure we are going to have in this corporation. It is another one of the difficulties of rewriting the bill on the floor of the Senate.

Mr. GRONNA. I think it is only fair to say to the Senator that I do not think any man ought to receive more than one salary, and this amendment is in a very brief form, and I think comes in at the proper place.

Mr. WADSWORTH. I was going to move to strike out all the language which would permit two salaries, and also participation by War Department officers in the management of this industrial concern. The Senator proposes to put a proviso on the language that is in the bill. I propose to strike the language from the bill and do a lot more.

Mr. KING. If I may have the attention of the Senator from North Dakota, I will state that in my opinion officers of the Army ought not to be permitted to receive any other salary than their salary as Army officers. I think it would be a bad precedent to permit officers to have a choice, whether to have their salaries as officers or the much larger salary which some corporation may tender them.

Mr. WADSWORTH. I may remind the Senator from North Dakota that this thing is already fixed up. The nitrogen administrator is to get a salary of $12,000 a year, and the assistant or deputy nitrogen administrator is to get $8,000 a year, and certain proposals have been made in the scheme which was put up. The only people who testified before the committee were the men who were going to get these salaries. I think the Senator's amendment, while having a most excellent object, would leave it to an Army officer to decide whether he would take his Army pay or the higher civilian salary. I would like to strike out the whole thing.

Mr. GRONNA. If an Army officer has the ability to do the work and it requires the particular skill which he possesses, why should not an Army officer as well as anyone else have an opportunity to fill the position? Under my amendment he can, of course, receive only one salary. There has been complaint, and justly, as to any man receiving more than one salary. My amendment is very plain and can not be misunderstood. It has reference not only to this particular paragraph but to the entire bill.

Mr. KING. Will the Senator allow me to make a suggestion? If we are to permit Army officers to receive the higher salary which the bill proposes to pay because of their supposed particular fitness for the jobs hereby created, what is there to prevent Army officers who are employed in the river and harbor service and in other work for the Government, not fighting, from demanding that they shall be paid similar salaries? For instance, out in my State they are constructing now a large plant. There are a number of officers there superintending its construction. Why should they not receive additional compensation? You would demoralize the service. Every time a man steps out of what might be denominated the fighting line he will claim that he is doing civilian work and should receive civilian compensation.

We have educated these men at West Point and given them advantages under the military law. They have a right to retire. They have other advantages. It seems to me that we are estab-

lishing a very dangerous precedent if we permit military officers or naval officers to go out and get compensation at civilian prices for work in which the Government is engaged.

Mr. GRONNA. My proposed amendment does not permit conditions such as have been referred to by the Senator from Utah. I accept the statement of the Senator from New York, because he knows more about the pay of these men than I do, as the subject comes before the Committee on Military Affairs, of which he is chairman, and he gives to it the very closest attention. Complaint has been made that some of these people have been receiving two salaries. What I want to do is to stop that. Congress can still legislate as to the salaries these men are to receive. If it is the purpose to limit the salaries, that is another proposition.

Mr. KING. My suggestion to the Senator is that this amendment is quite important and will lead to some little discussion. May we not let it go over until to-morrow, and if there are one or two amendments which the Senator from Kansas [Mr. CURTIS] desires to offer that will consume but little time, let us dispose of them and then adjourn or take a recess.

Mr. GRONNA. I withdrew my amendment on yesterday. I would like to have the amendment disposed of. In fact, I believe that we can dispose of the bill this evening.

Mr. WADSWORTH. I warn the Senator that we can not do that unless we sit all night. I have a large number of amendments to offer.

Mr. UNDERWOOD. The amendment offered by the Senator from North Dakota substantially carries out the view—not entirely, but as far as it goes—expressed by the Senator from Utah and the Senator from New York. With this language written in the bill, providing that these men shall not draw two salaries, I can not see any objection to it in the world.

Mr. WADSWORTH. Mr. President, a parliamentary inquiry.

Mr. KING. Will the Senator permit me? My objection goes further than that. I do not think they should be permitted to have any salary other than that which their position in the Army gives them.

Mr. UNDERWOOD. That does not affect the amendment here. I do not understand that the Senator is opposed to the proposition which the Senator from North Dakota offers. If he desires to propose another amendment, that is a different thing.

Mr. KING. I do not wish to be foreclosed from offering any other amendment, because this may be perfecting some amendment, and if it is agreed to as perfected it would deny the opportunity later on to offer another amendment to carry out the purpose which I have suggested.

Mr. WADSWORTH. Mr. President, a parliamentary inquiry. If the amendment of the Senator from North Dakota is agreed to as a proviso following the end of the paragraph, line 10, page 12, will it be in order later on to move to strike out the entire paragraph and the proviso?

The VICE PRESIDENT. On what page?

Mr. WADSWORTH. On page 12, between lines 3 to 10, inclusive.

The VICE PRESIDENT. With the amendment?

Mr. WADSWORTH. As it will be amended eventually?

The VICE PRESIDENT. It will undoubtedly be in order.

Mr. WADSWORTH. Then I have no objection to the amendment of the Senator from North Dakota, but I give notice now that I shall move to strike out the whole thing.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from North Dakota [Mr. GRONNA].

The amendment was agreed to.

Mr. GRONNA. Mr. President, in view of the statement made by the Senator from New York, it is evident that the bill can not be disposed of to-day. I therefore ask unanimous consent that there may be a reprint made of the bill with the amendments.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. CURTIS. Mr. President, I offer the following amendment in behalf of the junior Senator from Wisconsin [Mr. LENROOT].

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 4, at the end of line 4, amend by adding the words "not more than two of such directors shall be appointed from officers in the War Department."

Mr. WADSWORTH. I propose later on to move to exclude officers of the War Department entirely.

Mr. CURTIS. I understand if the Senator's amendment carries it will do away with this amendment.

Mr. UNDERWOOD. I do not think it is objectionable, but we can join the Senator from New York in voting it down if he so desires.

Mr. WADSWORTH. I have no objection to it.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Kansas on behalf of the Senator from Wisconsin.

The amendment was agreed to.

Mr. CURTIS. I offer the following amendment for the junior Senator from Wisconsin [Mr. LENROOT], which I ask may be read.

The VICE PRESIDENT. It will be read.

The ASSISTANT SECRETARY. On page 6, beginning in line 12, strike out subdivision (f), as follows:

(f) To enter into such agreements and reciprocal relations with others as may be deemed necessary or desirable to facilitate the production and sale of nitrogen products on the most scientific and economical basis.

On a division the amendment was agreed to.

Mr. CURTIS. I offer the following amendment in behalf of the junior Senator from Wisconsin [Mr. LENROOT].

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On pages 7 and 8, strike out subdivision (m), as follows:

(m) To lease or purchase such buildings or properties as may be deemed necessary or advisable for the administration of the affairs of the corporation or for carrying out the purposes of this act; and with the approval of the Secretary of War to lease to other persons, firms, or corporations any of its properties not used or needed by the corporation, or to enter into agreements with others for the operation of such properties. In the operation, maintenance, and development of the plants purchased or acquired under this act the corporation shall be free from the limitations or restrictions imposed by the act of June 3, 1916, and shall be subject only to the limitations and restrictions of this act.

Mr. GRONNA. Mr. President, I can not agree to strike out the entire paragraph. I said on yesterday that I propose to offer an amendment to the paragraph, first, to strike out the words "Secretary of War," in lines 19 and 20, on page 7, and insert the word "President," and then on line 23, after the word "properties," to add the words "not used or needed for the purposes named herein."

Mr. CURTIS. If the Senator wishes I will withdraw the amendment temporarily and offer it to-morrow when there will be more Senators present.

Mr. GRONNA. I merely wish to complete my statement. I also had prepared an amendment with reference to the terms of the lease, but since the Senate adopted the amendment of the Senator from Wisconsin, making the term of the lease the life of the corporation, that of course will not be necessary. However, I do wish to strike out the remainder of that paragraph after the word "properties," in line 23.

Mr. CURTIS. I will withdraw the amendment until to-morrow.

Mr. GRONNA. I will offer my amendment now, so that it may be printed and be on the desks of Senators in the morning. On page 7, line 23, after the word "properties," I move to insert the words "not used or needed for the purposes named herein."

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 7, in subdivision "m," after the word "properties," in line 23, insert the words "not used or needed for the purposes named herein," and strike out the remainder of the subdivision, so that subdivision "m," as amended, will read:

(m) To lease or purchase such buildings or properties as may be deemed necessary or advisable for the administration of the affairs of the corporation or for carrying out the purposes of this act; and, with the approval of the Secretary of War, to lease to other persons, firms, or corporations any of its properties not used or needed by the corporation, or to enter into agreements with others for the operation of such poperties not used or needed for the purposes named herein.

The amendment was agreed to.

Mr. HARRIS. Mr. President, on yesterday I withdrew my proposed substitute amendment, because I thought the amendment offered by the Senator from South Carolina [Mr. SMITH] and the amendment of the Senator from Minnesota [Mr. KELLOGG] covered it; but, with the permission of the Senator from South Carolina, I would like to reconsider the action by which his amendment was agreed to and then to add certain words, which I am sure will be satisfactory to him, as I notice in reading that they do not appear in his amendment. After the words "engaged in agriculture," on page 5, line 19, in the amendment of the Senator from South Carolina, I wish to add the words "and it shall be sold to them at reasonable prices." I am sure the Senator from South Carolina will agree to that.

Mr. SMOOT. Then let the Senator offer the amendment to the amendment and have it pending, to be taken up to-morrow morning. However, the vote agreeing to the amendment to which the Senator's amendment is offered will have first to be reconsidered before his amendment can be considered.

Mr. HARRIS. I do not think there will be any objection to the amendment which I desire to offer to the amendment, as it simply proposes to add the words which I have indicated, and I feel sure the Senator from South Carolina and the Senator from Utah will not object.

Mr. SMOOT. I do not know; it is a pretty broad statement which is made, and I do not know what effect it will have upon the bill itself.

Mr. HARRIS. I will offer the amendment to the amendment to be considered in the morning.

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Thursday, January 13, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *January 12, 1921.*

The House met at 12 o'clock noon.

The Clerk, Mr. William Tyler Page, offered the following prayer:

O Lord, we beseech Thee mercifully to receive the prayers of Thy people who call upon Thee; and grant that they may both perceive and know what things they ought to do, and also may have grace and power faithfully to fulfill the same. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

INDIAN APPROPRIATIONS.

Mr. ELSTON, from the Committee on Appropriations, reported the bill (H. R. 15682) making appropriations for current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed.

Mr. BYRNS of Tennessee. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Tennessee reserves all points of order on the bill.

MESSENGERS CONVEYING THE ELECTORAL VOTES.

Mr. GOOD. Mr. Speaker, I ask unanimous consent for the present consideration of Senate joint resolution 244, providing for the payment of expenses of conveying votes of electors for President and Vice President.

The SPEAKER. The gentleman from Iowa asks unanimous consent for the present consideration of a joint resolution, which the Clerk will report.

The Clerk read as follows:

Resolved, etc., That for the payment of the messengers of the respective States for conveying to the seat of government the votes of the electors of said States for President and Vice President of the United States, at the rate of 25 cents per every mile of the estimated distance by the most usual roads traveled from the place of meeting of the electors to the seat of government of the United States computed for one distance only, there is appropriated out of any money in the Treasury not otherwise appropriated the sum of $14,000, or so much thereof as may be necessary.

The SPEAKER. Is there objection?

Mr. CLARK of Missouri. Mr. Speaker, reserving the right to object—and I am not going to object—I want to ask the gentlemen a question. Is this going to pay for the whole bunch of presidential electors that they have been talking about bringing here?

Mr. GOOD. This is to pay the messengers required by law who bring the votes from the several States. Under the law, as I recall, one return is sent by mail, and then each State is directed to send a messenger with the vote, and there is a fine of $1,000 if any messenger refuses to deliver the vote so that it can be canvassed by Congress. This is to pay the traveling expenses of the messengers.

Mr. CLARK of Missouri. They make the return in triplicate. One comes by mail, one by messenger, and the other is filed in the United States court.

Mr. GOOD. Yes.

Mr. CLARK of Missouri. What I want to know is, is this to pay the expenses of this gang of electors that they are talking about having come here for no purpose under heaven?

Mr. GOOD. No; this only pays the fees provided by law for the messengers.

The SPEAKER. Is there objection to the present consideration of the joint resolution?

Mr. GARD. Reserving the right to object, is there any difference between the mileage compensation provided in this joint resolution and former resolutions?

Mr. GOOD. No; this resolution does not attempt to fix the amount. That is fixed by general law, 25 cents a mile one way.

Mr. GALLIVAN. Mr. Speaker, reserving the right to object—I am not going to object, and as a matter of fact I do not believe that this amount is enough—I wish to say that this is the first opportunity I have had to ask the chairman of the Committee on Appropriations a question. The statement has gone forth to the country that the House of Representatives in the sundry civil bill recently passed has made no provision for tuberculous soldiers of the recent war, or for psychiatric patients, men with mental disorders, and so forth. While the chairman of the Committee on Appropriations has the floor I should like to ask him just what our committee did toward taking care of consumptive soldiers and soldiers with mental troubles, and so forth, and what the House of Representatives did?

Mr. GOOD. The sundry civil bill that recently passed the House carries all of the appropriation that was requested for taking care of 1,000 tuberculous patients at the tubercular hospital at Johnson City, Tenn., where there are only 350 patients now, and 650 vacant beds.

It also carried all the appropriation asked for for taking care of 1,000 mental cases at the Marion hospital. These two hospitals are said by leading scientists and medical men who are informed along those lines to be the best of their kind in the world. The department has sent to neither of these hospitals anything like one-half the total bed capacity. It is true, however, that these hospitals have just been put in commission recently, having been rebuilt. The statement that Congress had not appropriated anything for those soldiers is absolutely and deliberately false.

Mr. RAYBURN. Further reserving the right to object, on the point that the gentleman from Massachusetts [Mr. GALLIVAN] has spoken about, I might further say that as a result of the newspaper talk some people have visited the President elect, and statements are going out through the papers of the country that the soldiers disabled in the recent war are being neglected. I would say further for the RECORD that in their appearance here before the Committee on Interstate and Foreign Commerce the other day on a measure members of the legion stated that they had no objection to the laws this Congress had passed for taking care of soldiers disabled or sick from causes arising out of the war, but their objection went to the administration of the law. I quite agree with the gentleman from Iowa [Mr. GOOD] that the talk going over the country in many newspapers, creating the impression among the people in general that the Congress of the United States not only by appropriations but by law has neglected the soldiers, has no foundation in fact.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

Mr. GOOD. Mr. Speaker, I ask unanimous consent to consider the resolution in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Iowa asks unanimous consent to consider the resolution in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk again reported the resolution.

Mr. GOOD. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, when as soon as the House met on January 10, 1921, the gentleman from Illinois [Mr. CANNON] called up for passage the resolution already passed by the Senate to appropriate $50,000 to build in front of the Capitol the proposed 10,000 seats for the inaugural, because I criticized this extravagance, calling attention to other expenses proposed covering $60,000 for policing, $37,000 for bringing cadets here, and at least $100,000 additional incidentals, besides the $200,000 proposed to be spent by citizens for a big inaugural ball, I was severely criticized by several Members who were trying to get this money out of the Treasury. And when I proposed an amendment limiting all expenses of every kind to $10,000 I was ridiculed and jibed and asked if I wanted the President sworn in by a notary. I proposed then that the inaugural ceremonies be held in the House of Representatives, than which there could be no more appropriate place and where the expense would be nominal. Only four Members besides myself, all Democrats, would vote for my amendment limiting expenses.

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Not now. Yet, Mr. Speaker, before 9 o'clock that night President-elect HARDING wired from Marion practically indorsing every position taken by me in my speech, upon which telegram the inaugural committee was forced to act, wiring Mr. HARDING as follows:

TELEGRAM TO HARDING.

The Joint Committee on Inauguration has received your telegram, transmitted through me as chairman, dated January 10, 1921, indicating your desire for extreme simplicity in the inaugural ceremonies on March 4, and that the same shall be conducted practically without expense. The committee has considered your suggestion in the spirit in which it was made and has decided, subject to your approval, that the inaugural ceremonies shall take place in the Senate Chamber, which involves no disturbance of the arrangement incident to the inauguration of the Vice President and involves no expense except such as incidental expenses for police as circumstances shall require.

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. No. To-day's Post asserts the arrangements have been canceled for the proposed construction in front of the Capitol and that the Government will have to pay about $3,000 covering the expense of moving huge piles of lumber prematurely ordered there, but after paying this and a few other nominal amounts the balance of the $50,000 appropriated would be turned back into the Treasury. And the other enormous amounts have been saved for the people. I heartily congratulate Mr. HARDING. He is starting his administration right, even though to do it he had to override a unanimous vote by every Republican in the House to start him in with an extravagant, wasteful orgy. The Post further states that because there is more room in the House Chamber than in the Senate plans will likely be changed to use the House Chamber, which was my plan from the beginning. So, Mr. Speaker, Mr. HARDING has demonstrated that a small minority of 5 can sometimes accomplish much by opposing an unreasoning majority of 285.

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Oh, just a moment. I know the gentleman is squirming, and in that connection I want to say that there is on the floor of the House of Representatives a floor space of 7,820 square feet, and in the Senate Chamber a floor space of only 4,200 feet. Therefore, Mr. Speaker, when the matter is simmered down, I think the good judgment of the inaugural committee will bring these ceremonies into the Chamber of the House of Representatives, where they belong. I yield back the remainder of my time.

Mr. KING. Mr. Speaker, will the gentleman yield? The gentleman is leaving the floor. Is he afraid to yield?

Mr. BLANTON. Oh, I can not yield. The gentleman can get his own time.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to proceed for five minutes.

The SPEAKER. The House is proceeding under the five-minute rule. The gentleman has the right to proceed.

Mr. KNUTSON. Mr. Speaker, we have been hearing a great deal about economy lately, but it does not seem to go beyond the talk stage with some people. I find in this morning's CONGRESSIONAL RECORD that the gentleman from Texas has used 10 pages of the CONGRESSIONAL RECORD to tell the people of this country what a great and honest statesman he is, and what scalawags have been opposing him in the past.

Mr. GALLIVAN. Which gentleman from Texas?

Mr. KNUTSON. Mr. BLANTON. The gentleman from Illinois [Mr. MASON] once during the war referred to some of the loyalty talk that was constantly being made as lip service, and stated, further, that with many people loyalty talk was a sort of mouth wash. If the gentleman from Texas [Mr. BLANTON] does not observe a little more consistency in his pleas for economy than he has in the past, we shall have to conclude that it is all mouth wash with him. The RECORD costs money to print; paper is scarce. I forget how many times the gentleman from Texas rose to his feet and took the time of the House in the first and second sessions of the Sixty-sixth Congress, but it ran into the hundreds. He spoke on almost every conceivable subject, took exception to almost every proposition to appropriate money—always for the purpose of glorifying himself and proclaiming to the world the fact that he among all the 435 Members was the only honest man on the floor of the House.

In his remarks printed in this morning's RECORD, to which I have referred, he proclaims that in his late campaign he was opposed by organized labor; in fact, the effort reached all over the country. One would conclude from reading the gentleman's remarks that these people were more concerned about defeating the gentleman from Texas [Mr. BLANTON] for reelection than they were about winning the late war in which we were engaged. I am in favor of economy, but I am in favor of practicing it rather than talking about it. I think this is a mighty good time to start in. I do not know when the gentleman got permission to extend his remarks. It must have been in some blanket form.

Mr. BLANTON. Mr. Speaker, I am glad the gentleman has called attention to this so that people will read the RECORD, but if the gentleman had been here on the 30th day of December he would have heard my remarks on the floor, when a part of this matter was spoken, and I could have put this in headed as a speech, as many Members do, but I then obtained the right to revise and extend my remarks, and they appear in the manner stated. I excuse the gentleman for not being here, because he is the Republican whip, and much of his time is taken around the House Office Building.

Mr. KNUTSON. Mr. Speaker, I find in the Appendix to the CONGRESSIONAL RECORD this very interesting letter to the President of the United States:

WASHINGTON, D. C., *May 22, 1917.*

To the PRESIDENT OF THE UNITED STATES.

MY DEAR MR. PRESIDENT: If I can be used at the front, I stand ready to serve my country. When the question was before the House I voted to increase the maximum age limit to 45, so that I would be included. I likewise voted to subject Members of Congress to the selective draft, in order that I would not be excluded. I am willing to waive my age and position.

My father enlisted as a Confederate soldier at the age of 16. My great-grandfather, William Walker, of Cumberland County, Va., had the privilege of fighting for his country in the Revolution. My mother's uncle, James Monroe Hill, was a veteran of San Jacinto. My oldest son is not 17, but will be ready to respond when the call of his country makes it necessary.

I stand ready to obey your orders should my services be needed and you should see fit to call on me.

With much respect, I remain,

Very sincerely, yours, THOMAS L. BLANTON.

The SPEAKER. The time of the gentleman from Minnesota has expired.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to proceed for five minutes more.

The SPEAKER. Is there objection?

There was no objection.

Mr. KNUTSON. To which remarkable letter the President replied as follows:

THE WHITE HOUSE, *Washington, May 23, 1917.*

Hon. THOMAS L. BLANTON,
House of Representatives.

MY DEAR MR. BLANTON: Your letter of May 22 does you great honor. I do not wonder that you feel as you do, and yet I want very earnestly to remind you that we are now engaged not merely in creating an army but also in mobilizing a nation to perform all its functions at the highest pitch of efficiency. Surely in such circumstances it is just as much a man's duty to stay at a post such as you have been assigned to by your constituents as it is for a man to volunteer for an army. I take that view of it with the greatest confidence.

Cordially and sincerely, yours,

WOODROW WILSON.

Mr. UPSHAW. A great name.

Mr. KNUTSON. A great name. A name to conjure with. Mr. Speaker, I do not know why the people of this country should be called upon to pay for publicity work on the part of the gentleman from Texas. I do not know that the past military history of his family is of any particular interest to the people of this country. We are living in to-day and not in the time of the Revolution or of the Civil War, and I want to protest as a Member of this House against cluttering up the RECORD with all this damned foolishness. I think this a mighty good time to stop. [Applause.]

Mr. CAMPBELL of Kansas. Mr. Speaker, I ask unanimous consent that the last phrase of the gentleman from Minnesota [Mr. KNUTSON] be stricken from the RECORD.

Mr. BLANTON. Mr. Speaker, I object.

Mr. KNUTSON. I will withdraw it.

Mr. BLANTON. I think it ought to go in. It is consistent with the balance of his speech. [Laughter.]

The SPEAKER. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. GOOD, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. WOOD of Indiana. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543, the legislative, executive, and judicial appropriation bill, with Mr. LONGWORTH in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15543) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1922, and for other purposes.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Bureau of War Risk Insurance: For expenses of the Bureau of War Risk Insurance, as authorized by law: For salaries of the director, and of such assistants, accountants, experts, clerks, and other employees in the District of Columbia as the Secretary of the Treasury may deem necessary, $6,000,000; stationery and minor office supplies, $250,000; miscellaneous expenses, including telephones, telegrams, freight, express, foreign postage, not exceeding $300 for street car fares in the District of Columbia, and not exceeding $500 for law books, books of reference, and periodicals, $30,000; printing and binding, $250,000; furniture, equipment, and supplies, $100,000; traveling expenses, exclusive of field investigations, $15,000; salaries and expenses of employees engaged in field investigations and expenses of not more than eight temporary branch offices, $500,000; maintenance, repair, and operation of a motor-propelled passenger vehicle, $400; in all, $7,145,400: *Provided*, That all employees appropriated for by this paragraph shall be engaged exclusively on the work of the Bureau of War Risk Insurance during the fiscal year 1922: *Provided further*, That no person shall be employed hereunder at a rate of compensation exceeding $1,800 per annum except the following: Three at not exceeding $7,500 each, 5 at not exceeding $5,000 each, 16 at not exceeding $4,500 each, 20 at not exceeding $4,000 each, 16 at not exceeding $3,500 each, 26 at not exceeding $3,000 each, 30 at not exceeding $2,500 each, and 150 at not exceeding $2,000 each: *Provided further*, That no part of this sum shall be expended for salaries or expenses in soliciting the reinstatement of lapsed insurance.

Mr. DOWELL. Mr. Chairman, I reserve a point of order on the proviso at the bottom of page 44. What is the reason, Mr. Chairman, for this provision?

Mr. WOOD of Indiana. I will state that the reason for putting this provision in was because information has reached the subcommittee that a large proportion of the amount allowed for the field service, which was appropriated for the purpose of making investigation for the benefit not only of the ex-service men but for the benefit of the Government was being expended in the solicitation of those whose insurance had lapsed and was not being expended for the purpose of investigating into the frauds or investigating what the rights of the ex-service men were, but was being expended, as I have stated, for the purpose of soliciting the reinstatement of lapsed insurance. We felt it was being diverted from the purpose for which it was appropriated, and in order that it might not be thus diverted we put this provision on.

Mr. DOWELL. Does not the gentleman believe there should be something to call attention of ex-service men to the fact of their opportunity to be reinstated?

Mr. WOOD of Indiana. It was not the purpose, and I do not think that if the proviso was permitted to stand it will deter the War Risk Insurance Department from notifying these boys of the fact that their insurance has lapsed or when it may lapse if advantage is not taken of it, but it will prevent the habit that has been going on of sending men out all over the country into the different States and Territories for the purpose of soliciting the reinstatement of their lapsed insurance. It is clearly a violation of the purpose for which the appropriation was made and ought to be stopped. I do not think anybody wants that done.

Mr. DOWELL. But, Mr. Chairman, the record we have is that a very large proportion of the ex-service men have dropped this insurance, and if the opportunity for reinstatement is of any value is it not well for the department to suggest to them that they should reinstate their insurance for the benefit of themselves and their beneficiaries?

Mr. WOOD of Indiana. There is not any objection to that, and I do not think this would interfere with it. I will state this provision is put on for the purpose I have named. I do not think the gentleman from Iowa would want this money to be expended in sending agents at high salaries around the country interviewing these men personally, and many times in their enthusiasm stating to them things which were absolutely unwarranted in reference to some possibility of reinsurance.

Mr. DOWELL. I am not discussing that, but the question I am raising is should it be prohibited by law?

Mr. WOOD of Indiana. If it is not prohibited by law, the abuse would still go on. There is not any objection, and there will not be any objection to it if the department within reason suggests to these boys that their insurance has lapsed and send out circulars—they are circularizing the country constantly with pamphlets telling the privileges they have and telling what they are entitled to in the way of compensation, in the way of insurance, and in the way of vocational training, and all the privileges that are granted under the law, and the very thing the gentleman has in mind is included and should be properly included within such circularization. The point we are objecting to is the expenditure of this money that was appropriated for the investigation with reference to fraudulent claims, with reference to lawful claims, with reference to examinations, and so forth, that that money should be diverted in sending these men out over the country soliciting insurance just like insurance agents soliciting for an old-line company.

Mr. DOWELL. But if the gentleman will bear with me for just a moment, as I read this language, not a cent of this appropriation can be expended for the soliciting or reinstatement of lapsed members. Now, that is just as true of sending circulars as it is of sending agents.

Mr. WOOD of Indiana. I will state to the gentleman so that there might not be any possible abuse or misuse of the purposes of this appropriation this proviso could be modified so as to include the purpose desired, and that is that the moneys appropriated for field investigation should be used for field investigation; that is, to say, "*Provided further*, That no part of this sum appropriated for field investigation shall be used," and so forth.

Mr. DOWELL. Then would that mean that if a field man went out in a territory and would solicit some one to reinstate his insurance he would be violating the law?

Mr. WOOD of Indiana. It would mean that a man who was sent out for the purpose of making the investigation contemplated by the act used his time for the purpose of going out and soliciting insurance—yes; and it ought to—but I apprehend if an ex-service man would approach this field investigator and ask what his rights were and he would tell him that it would not be any infraction of the law.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAYBURN. I ask that the gentleman's time be extended five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas? [After a pause.] The Chair hears none.

Mr. RAYBURN. Is it not true the department has been spending money on the authorization of Congress to put the insurance matter before the ex-service men?

Mr. WOOD of Indiana. It is true; yes, it is true.

Mr. RAYBURN. The gentleman thinks there is nothing in this language—I am asking the question because I want to get it in the RECORD—there is nothing in this language here, is there, that would prevent the department from letting any ex-service man know the benefits of insurance, how he may be able to reinstate himself when his policy will lapse, and so forth?

Mr. WOOD of Indiana. This prohibition will not prevent that. As I stated, there is no intention to prevent them from doing that. It is for the very purpose of preventing this investigation.

Mr. PARRISH. Will the gentleman from Indiana yield?

Mr. WOOD of Indiana. I yield.

Mr. PARRISH. Does the chairman believe that with this proviso remaining on the appropriation the department would be forced to send out over the country a circular giving the ex-service men a knowledge of their rights or defining their rights, both as to compensation or insurance under the Bureau of War Risk Insurance, or any other right, and include it in that paragraph which refers to the matter of reviving their lapsed insurance?

Mr. WOOD of Indiana. I do not think there is anything in the world to prevent it. If there is any doubt in the mind of any gentleman here it could be put in so as to make it perfectly clear that this fund appropriated for field investigation should not be used for the purpose of soliciting insurance.

Mr. PARRISH. I am in hearty accord with that, but at the same time I would not want this to stop the department from sending out a general circular which would carry in it not only this provision, but other provisions that might be of service to the men.

Mr. MANN of Illinois. If the gentleman will yield, I will say that there is quite a difference between giving information and soliciting business. The department will still have power to give information concerning the reinstatement of lapsed insurance. It is quite a different matter from soliciting.

Mr. RAYBURN. And that is what I wanted to make certain by my question of the gentleman from Indiana, that they would be allowed to give the information to the soldier that is necessary, and that it would not be necessary to go out and solicit insurance among men who do not want it at all.

Mr. WOOD of Indiana. That is the idea exactly.

Mr. OSBORNE. Would not this provision here against salaries and expenses cut out any such circular as suggested?

Mr. WOOD of Indiana. It is not a solicitation. The expense that is involved in the notification or in the circulariza-

tion, informing the ex-service men of what their rights are, is included and for informing those who have lapsed insurance of the right to take out insurance.

Mr. OSBORNE. It might be interpreted as soliciting to even give them the information as to what their rights are.

Mr. RAYBURN. That is just the question. The gentleman from Indiana informed me that this applies only to solicitation of insurance. It is no limitation whatever upon the information the Bureau of War Risk Insurance, or any employee thereof, may give.

Mr. GARD. Would it not clarify the situation to insert before the word "expenses" the word "field"?

Mr. WOOD of Indiana. I do not think that would be enough, because of the fact that they can legitimately travel for the purpose for which they want to make an investigation.

Mr. RAYBURN. I might suggest that the whole thing is covered by the word "soliciting."

Mr. WOOD of Indiana. The word "soliciting" is a limitation.

Mr. BEGG. Mr. Chairman——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BEGG. Mr. Chairman, I move to strike out the last two words. I do that for the purpose of getting a little information and making an observation. Did the gentleman find out how many policies are being carried now by the Bureau of War Risk?

Mr. WOOD of Indiana. I did not.

Mr. BEGG. I will say to the gentleman that probably six months ago they had around 600,000 policies. Is it the policy of the Bureau of War Risk Insurance to expand until they have a field force in the United States actually soliciting insurance?

Mr. WOOD of Indiana. I do not know. They asked for $1,500,000 for that purpose, but we did not see fit to give it to them. There is a disposition, perhaps more pronounced some time ago than it is now, for them to expand the insurance part of their activities.

Mr. BEGG. Well, if the gentleman will permit, I will say that the director himself testified before the committee investigating the war-risk insurance that it was his ambition to so expand the force that they would have at least a man in every territory, or, I will say, for enough men to make it available to reach every soldier in the United States in order to persuade him to retake his insurance.

Mr. WOOD of Indiana. There is evidence of that character.

Mr. BEGG. Is it not a fact that they now have 14 or more branch offices, or branch war-risk bureaus, in the United States?

Mr. WOOD of Indiana. They asked to have six more, and they were not granted.

Mr. BEGG. There is no money in this bill for that purpose?

Mr. WOOD of Indiana. No. But for the eight offices there is.

Mr. BEGG. Was there any testimony or any effort made to find out whether or not by the establishment of these branch offices cases for soldiers were expedited or whether the reverse was true and that they were delayed?

Mr. WOOD of Indiana. We were of the opinion that they had plenty of branch offices, and that the activities should not be expended in that direction, and we thought more money would go for the purpose for which Congress was appropriating it if there was not so much of field activity and so much money expended in salaries to these agents.

Mr. BEGG. Did the gentleman find out how many employees there are in the Bureau of War Risk at this time?

Mr. WOOD of Indiana. We got all of that information.

Mr. BEGG. How many are there, may I ask?

Mr. WOOD of Indiana. On November 1 there were 6,833.

Mr. BEGG. Is that throughout the United States or only in the city of Washington?

Mr. WOOD of Indiana. In the city of Washington.

Mr. BEGG. How many are there altogether? Can the gentleman give us that?

Mr. WOOD of Indiana. The 6,833 include the field force. Two hundred of those are in the field.

Mr. BEGG. Mr. Chairman and gentlemen of the committee, I have no desire to criticize in any way the Bureau of War Risk, nor do I have any criticism to offer of the work they have performed or are performing. I do believe that it was a fine thing to do. I do believe that it was an extravagance or an expensive proposition that probably could not be helped. But I want to call the attention of this House to this fact, that to carry the overhead charge for insurance by the Government when we are not paying one dollar into the overhead for rental of buildings is many times more than it costs to take insurance in a private company. I did not state that exactly correctly. I said "to take insurance." I mean many times more than it costs to carry insurance by any of the great companies writing insurance in the United States. And I, for one, believe that in justice to the very people we are trying to serve, the soldier boys, we ought to furnish them ample opportunity to know that they may be reinstated in that insurance. Then, after that has been done for them for a year's time we have discharged our obligations to those boys in the way of making insurance available from a governmental standpoint, and from that time on it seems to me we ought to do something to cut down the overhead charge for operating and simply carry along the policies.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BEGG. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. SISSON. Mr. Chairman, will the gentleman yield?

Mr. BEGG. One more word, and then I shall be glad to yield to the gentleman.

After that thing has been done, it seems to me that the Government insurance ought to be operated and carried for an overhead charge at least 40 per cent under that of any commercial insurance organization in the United States, instead of at from 200 per cent to 400 per cent more.

Now, I will be glad to yield to the gentleman.

Mr. SISSON. That is the very question I wanted to ask the gentleman. Has he made a careful investigation as to the amount of insurance in force and the overhead charge per dollar of insurance carried, and compared that with the overhead charge of life insurance companies?

Mr. BEGG. I will say to the gentleman that I have made such an investigation. I want to say, however, that my investigation——

Mr. SISSON. I question somewhat the gentleman's statement. Does he take into consideration the commission given to the insurance agents in the first instance?

Mr. BEGG. Absolutely.

Mr. SISSON. When the gentleman makes that statement it is a very startling thing to me that this overhead charge, including commissions given to the local agents, is greater than the overhead charge of the insurance companies.

Mr. BEGG. The only assurance I can give the gentleman is a statement of the figures that have been furnished me by several of the big insurance companies. I merely asked for the cost of carrying their insurance already written and as to the cost of rewriting insurance.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. RAYBURN. Mr. Chairman, I ask that the gentleman may have three minutes additional. I wish to ask him a question.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. RAYBURN. Is not the gentleman from Ohio charging against this overhead of the war-risk insurance the whole expense of the Bureau of War Risk Insurance?

Mr. BEGG. No; I am not. I am not doing that.

Mr. RAYBURN. How does the gentleman separate those items?

Mr. BEGG. I suppose the gentleman refers to allotments, and so forth. I am not speaking of those. I am speaking solely about the insurance division of it. I am not criticizing the Bureau of War Risk. I simply say it seems to me that there is ample room for improvement in the cost of the overhead. I do not believe that this Congress wants to go on record as favoring the sending out of solicitors to sell insurance, because that is what it amounts to in the last analysis. We have furnished, as I understand, ample information to every soldier in the service, and if we have not, we should furnish ample information, advising him that until a certain period of time he can be reinstated. I think we ought to go that far. Then, after we have done that, it seems the time has passed when we owe him an obligation.

Mr. RAYBURN. I will say to the gentleman that has been done with respect to every soldier, and the time has been set within which he can be allowed reinsurance.

Mr. BEGG. That is true.

The CHAIRMAN. The time of the gentleman from Ohio has again expired. There is a reservation of a point of order pending technically.

Mr. MANN of Illinois. I ask that the point of order be disposed of.

The CHAIRMAN. Does the gentleman from Iowa [Mr. DOWELL] withdraw his point of order?

Mr. DOWELL. In view of the fact that the language in the paragraph objected to would prevent the expenditure of any money whatever to call the attention of the ex-service men to

the fact that they are in arrears and that their policies are suspended, I will make the point of order.

Mr. MANN of Illinois. It is not subject to a point of order. It is a pure limitation.

Mr. DOWELL. It is legislation.

The CHAIRMAN. Does the gentleman make the point of order against the whole paragraph?

Mr. DOWELL. No; against the proviso in lines 24 and 25.

Mr. SISSON. That is not subject to a point of order at all. That is simply a limitation on the bill.

Mr. DOWELL. It is not a limitation, but it is legislation.

Mr. SISSON. It is not legislation. It is a limitation upon the bill, on this sum of money.

Mr. DOWELL. No; it is not a limitation upon the money. It provides for no expenditure whatever, but it provides how it may be expended, and it is legislation.

The CHAIRMAN. The Chair is prepared to rule. The Chair is of opinion that it is a distinct limitation upon the appropriation, and therefore the Chair overrules the point of order.

Mr. SISSON. Mr. Chairman, I rise in opposition to the amendment. The statement of my friend from Ohio [Mr. BEGG] in reference to the overhead charge of this war-risk insurance is rather remarkable, because the principal expense to life insurance companies in the operations of their companies is not the overhead charge at the home office, but the expenses of the various general agencies and local agencies throughout the country. Some insurance companies give 80 per cent of the first premium to the agent, and 30 per cent and 10 per cent for three years. Some of them do not give so much, but usually they give of the first premium about 60 per cent, and then the general agent gets about 20 per cent of the next and 10 per cent of the next premium. If you include that in the overhead charge, my information is that the overhead charge of the war-risk insurance is very much less than that of the life insurance companies. But the expense to the war-risk insurance will be greater than to the ordinary life insurance company, because when a company gets a policy the only subsequent expense then is the bookkeeping end of it, because the agent gets out of the premium the expense of securing the insurance; but the duties that devolved in the past upon this war-risk insurance have been largely in the matter of education and giving the boys information as to what they were entitled to, but that has been cut down and continually cut down. Now, I agree with the chairman of our subcommittee that while this looks as if it was a considerable overhead charge and we felt very desirous of cutting it down more than that, I would dislike very much to take the responsibility of in any way hampering the efficiency of this service at this time, because, as the committee knew, there has been a great complaint in the past that you could never get these matters straightened out. There is this expense that these people are put to that requires a great many clerks, where there is some doubt about a man's being entitled to insurance. They have got to investigate the entire record, which is an expensive proposition and requires quite a good deal of clerk hire; but it seems to me the time ought to be almost here when this will assume the fixed condition where the probability will be that the only expense that the Federal Government will be put to will be the sending out of the checks to the boys to pay this insurance.

Mr. BEGG. I quite agree with the gentleman, in the main. I do not agree with his supposition, because I have the figures and will be glad to show them to him.

Mr. SISSON. I am from Missouri. I will have to be shown on that proposition.

Mr. BEGG. I simply ask the gentleman if he thinks the overhead is not great, to look at this fact——

Mr. SISSON. Does the gentleman know what insurance is now in force?

Mr. BEGG. Within five months. I do not know since then.

Mr. SISSON. Approximately.

Mr. BEGG. Six hundred and fifty thousand policies five months ago. I also know that that makes each employee in the department handle two policies a day. That is all they have to do to take care of a year's work. Now, after a policy has once been examined and O. K'd, any clerk that can not take more than two a day ought to be discharged; I simply point that out to show the chance for improvement.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. I ask for one minute more.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that his time be extended one minute. Is there objection?

There was no objection.

Mr. SISSON. Now, gentlemen of the committee, I am glad the gentleman has raised the question, because I think after the question has been once raised we ought to look into it, and I am from Missouri on that. I have got to be shown on that proposition. I think the gentleman is mistaken as to the amount of insurance actually in force. There are more names on the insurance rolls of this bureau than on the rolls of any other insurance company in the world.

Mr. OSBORNE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

Mr. OSBORNE. In lines 24 and 25 I move to strike out the words "or expenses."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. OSBORNE: Page 44, lines 24 and 25, strike out "or expenses."

Mr. OSBORNE. I offer this amendment for the reason that it appears to me that an administrative officer following the law closely might construe this provision to prevent him from sending out such a circular as has been mentioned. I want to give these soldier boys every chance in the world to renew their insurance, those who are entitled to it. While I have no doubt as to what is the intent of the House in this matter, I think that an administrative officer, drawing the lines very closely, might refuse to send out the circulars if the words which I would erase were in the law.

Mr. DOWELL. I move as an amendment to the amendment, after the word "each," in line 23, to strike out all of the remainder of the paragraph.

The CHAIRMAN. The amendment of the gentleman from California being to perfect the text, the Chair thinks the question is first on that amendment.

Mr. WOOD of Indiana. I desire to say a word in opposition to that amendment. It would tend to confuse rather than to clarify. If what the gentleman states is true we might as well strike out the word "salaries."

Mr. RAYBURN. I did not catch the amendment.

Mr. WOOD of Indiana. The gentleman from California moves to strike out the words "or expenses." It does not help the thing at all, and I ask that the amendment be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. OSBORNE].

The question being taken, the amendment was rejected.

Mr. DOWELL. Mr. Chairman, I now renew my amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. DOWELL: Page 44, line 23, after the word "each," strike out the remainder of the paragraph.

Mr. DOWELL. Mr. Chairman, from the reports I get a very large number of the ex-service men have dropped this insurance. I take it that all of us know they have been unable in days past to secure service from the War Risk Insurance Bureau as rapidly as they would desire. I think we ought not, in view of the past history of this department, to act too quickly. It is a new department, was organized with 4,000,000 men, and it was impossible to give the attention to the individual that he should have had. A great many of them became discouraged and dropped the insurance because of that fact. If the Government is to carry this insurance, as I believe it ought to do, it seemed to me that we should advise these ex-service men who have dropped the insurance of the opportunity they have to renew it. We should encourage and not prevent the reinsurance of these men, as I fear the language of this paragraph will do.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. DOWELL. Yes.

Mr. MOORE of Virginia. I would suggest to the gentleman that it was developed last year before the committee which has been referred to that exactly what the gentleman proposes had already been done by the officials of the bureau. That is to say, they had taken pains to bring to the attention of every one of the ex-service men who could be reached the desirability of his insurance being maintained. I think, further than that, that quite recently every ex-service man has probably been communicated with and advised that an extension of time had been given him within which he may renew his insurance. A great many interesting and cognate matters are discussed in the first annual report of this bureau which has been recently printed and issued.

Mr. DOWELL. Is it not also true that by reason of that activity thousands of ex-service men have been brought back and are now in this department?

Mr. MOORE of Virginia. I think that may be very likely, but I am wondering whether Congress would be justified in continuing at very large expense to do over and over again

work which has been done two or three times in different ways already.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. MANN of Illinois. Mr. Chairman, I have no doubt that the Bureau of War Risk Insurance will still have the power to give all necessary information in reference to the reinstatement of insurance. Certainly everyone here must know that the War Risk Insurance Bureau has dragooned the country trying to force men to keep their war-risk insurance alive. Young men without anyone depending upon them have been urged by the Government, as an economic proposition, to take out endowment insurance, which will keep their noses against the grindstone for the next 20 years, in order to get a little sum of money from the Government at the end of that time, when in many cases if they have any sense or judgment they could use that money much more profitably while they go along. They have sought to do this largely because, I suppose, they think it is for the interest of the insured, largely because it is the inevitable tendency of every bureau of the Government to magnify the work of that bureau, and they have sought to force these men. When the Government of the United States goes to a young man and tells him how valuable it is for him to do something he is unduly impressed with the argument, and many of the insurance policies now in force ought never to have been rewritten, in my judgment.

Mr. CLARK of Missouri. Mr. Chairman, will the gentleman yield?

Mr. MANN of Illinois. Yes.

Mr. CLARK of Missouri. If the statement made by the gentleman from Ohio [Mr. BEGG] is correct, that it costs more to carry this insurance than it costs to carry the same amount in any old-line company, what is the sense in dragooning the country to build up this insurance business?

Mr. BEGG. Mr. Chairman, if the gentleman from Illinois will permit, I did not mean to make that statement, if I made it. I meant to say that the overhead cost of the Government is greater than the overhead cost of the company. The insurance is about 20 per cent cheaper.

Mr. MANN of Illinois. I believe in carrying out the contract that was made with these men no matter what the overhead cost may be, although I have no doubt that the overhead cost ought to be reduced to practical economy; but these boys have declined to take this insurance, they do not want it, and there is no reason why the Government should go out continually and try to force them into taking it, mainly because officials here want to keep a large number of employees in office.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. MANN of Illinois. Yes.

Mr. DOWELL. Is it not true that the insurance companies of the country are constantly dragooning these ex-service men trying to make them believe that it is not profitable to carry the insurance if they have been carrying it, and is not that one of the troubles that confront us in getting the number that we ought to have.

Mr. MANN of Illinois. Perhaps, but most men are not unduly impressed by ordinary insurance agents. I suppose we have all reached the stage where we do not pay much attention to an insurance solicitor, but the Government is a different proposition.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. TOWNER. Mr. Chairman, we are always apt, I think, when there has been excessive activity shown to jump to the conclusion that all activity ought to cease. That is a mistake which I think will be made if this provision is allowed to continue as a part of the bill. Let us see what this says. It provides that no part of this sum, which means the salaries provided for practically all of the employees of this department, shall be expended for salaries or expenses in soliciting the reinstatement of lapsed insurance. What would that mean? If at any time any soldier should for any reason make a mistake even in sending his premium to the insurance office, this would mean that the department could not even call his attention to that fact, because it says that no expense shall be incurred to solicit the reinstatement of lapsed insurance. That will be going altogether too far, it seems to me. If there has been excessive activity, if too much money has been expended, let that kind of a provision be inserted here. Certainly no one on the floor of this House would object to it. To say, however, and to direct that the Bureau of War Risk Insurance should not call attention to the fact that the insurance policy of a soldier has lapsed is going altogether too far, in my judgment.

Mr. KNUTSON. Will the gentleman from Iowa yield?

Mr. TOWNER. Certainly.

Mr. KNUTSON. Does not the gentleman think that the last proviso, page 44, means the Bureau of War Risk Insurance shall not conduct a sustained campaign for reinstatement?

Mr. TOWNER. The gentleman is inserting language unfortunately that is not there. I just said that probably a proper system of guarding against excessive expenditure of money, an excessive activity of the employees of the department, anything of that kind, should be done, but this does not do it. This says to the department that they must not expend any money to secure reinstatement of a lapsed policy, no matter whether it is a mistake, a misfortune, or anything else.

Mr. MANN of Illinois. Does the gentleman think that giving information by the bureau to men whose insurance may often lapse is soliciting reinstatement of insurance?

Mr. TOWNER. Well, I should think it might well be considered so. How else would the department notify them?

Mr. MANN of Illinois. The department is not interested from the standpoint of reinstatement; the department, I think, properly furnishes information on the subject. That is not soliciting reinstatement.

Mr. TOWNER. The difficulty is, I think the gentleman will readily see, that the soldier boy may not know; he may have sent a letter misdirected, which may not have been received; his attention may never have been called to it; it is lost.

Mr. MANN of Illinois. But information on the subject is perfectly free to be sent?

Mr. TOWNER. Certainly, if the man makes inquiry; but suppose he does not; he ought to be notified.

Mr. MANN of Illinois. Well, he would be notified, naturally, without making inquiry.

Mr. TOWNER. I do not know about that with this statement in here.

Mr. MANN of Illinois. I do not think there is a particle of doubt about it.

Mr. TOWNER. It is pretty strong language.

Mr. DYER. Will the gentleman state how long a soldier has to seek to be reinstated?

Mr. TOWNER. There are so many circumstances that it depends altogether on those circumstances.

Mr. DYER. I have in mind the case of a young soldier who contracted tuberculosis in the service. There is no question about that, and he went west to New Mexico for his health, got quite ill, was alone, and he neglected to pay one premium; the department refused to reinstate him, although he was there ill, and they knew that he contracted tuberculosis in the service.

Mr. TOWNER. I am afraid injury and injustice will be done if this provision is allowed to remain. Certainly, none of us would object to a proper reservation guarding against undue activity or undue or excessive expenditures.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAYBURN. Mr. Chairman, I make whatever motion is necessary to get the floor.

The CHAIRMAN. The gentleman moves to strike out the last four words.

Mr. RAYBURN. Mr. Chairman, I think in considering the insurance feature of the war risk insurance act a great many of us have a misconception of what was the real intent of the Congress when it passed that part of the war risk insurance act. The compensation and allotment provisions of the war risk insurance act were more liberal than any that had been made in this or any other country. We said in addition to the compensation, which was liberal, that we would allow them to insure their lives with the Government at the same rate that they would have been allowed insurance if they had been in private life and had not assumed a war risk. Now, a great many men, probably 80 or 90 per cent of them, took out this insurance, and the very thing that gentlemen here who favor striking out this language are in favor of is the very thing that hundreds and thousands of the ex-soldiers to-day are complaining of, and that is that when they went into the Army they were practically forced to take out this insurance whether they wanted it or not. I want to say that the Bureau of War Risk Insurance has since the war closed practically pursued every ex-service man of this country, trying to get him to renew his lapsed insurance, and a great many of them have told me that if they had not felt like they had to take out the insurance during the war they never would have taken it out, and they were tired of being pursued by Government agents or letters from the department trying to persuade them again to take out insurance. Why, gentlemen must remember that the average man from 21 to 31, who does not have dependents, does not have any insurance at all, whether he went to the war or whether he did not go to the war, and it appears to me that since every ex-soldier in the land has been circularized, since

he has had the benefit of the converted war-risk insurance held before him, that the department has harassed these men probably enough instead of sending out a special solicitor at great expense to the Government from one end of this land to the other seeking to persuade these men to take out insurance that they do not want.

Mr. DOWELL. There is no provision in this bill for any such activity.

Mr. RAYBURN. I say the activity along that line has been completed by the bureau. It has circularized every ex-soldier in the land since the law was passed allowing them——

Mr. DOWELL. On the theory the fewer the members, the fewer ex-service men who belong to this department, the better. That argument is good, because they certainly will continue to lapse.

Mr. RAYBURN. That does not follow from my argument at all.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended two minutes. I desire to ask him a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. I have not been on the floor and this question has doubtless been answered before, but I would like to ask the gentleman if he could tell us how many of these policies are now in force?

Mr. RAYBURN. The gentleman from Ohio answered a while ago that there were about 650,000.

Mr. BEGG. Six hundred and forty thousand.

Mr. HASTINGS. How many were taken out originally?

Mr. MOORE of Virginia. I can give the figures if the gentleman desires. About 4,600,000 applications for term insurance seem to have been passed on from the beginning to July 1, 1920.

Mr. HASTINGS. About 640,000 are now in force?

Mr. MOORE of Virginia. I understand that on July 1, 1920, the term certificates and converted policies outstanding totaled, as estimated, about 800,000. I further understand that more than 90,000 reinstatements were effected up to July 1, 1920. I may add statistics that have been furnished me that bring the showing to December 31, 1920. Up to that date there were a total of 4,660,157 term applications; the term policies then in force, as estimated, were 615,785 and the converted policies 241,529; and up to that date there had been 186,239 term policies and 19,676 converted policies reinstated.

Mr. HASTINGS. I thank the gentleman for his information.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. TOWNER].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Federal Farm Loan Bureau: Four members of the board, at $10,000 each; assistant secretary, $3,000; 4 private secretaries, at $2,000 each; custodian of securities, $2,500; examiners of securities (not to exceed 6 in number) at not more than $3,000 per annum each, $14,700; 12 registrars, at $4,000 each; chief land bank examiner, $5,000; supervising appraiser, $3,600; 3 land bank examiners, at $3,000 each; accountant, $1,800; clerks—1 of class 4, 1 of class 3, 5 of class 2, 5 of class 1, 4 at $1,000 each; stenographers—3 at $1,400 each; 3 messengers; in all, $162,720.

Mr. SISSON. Mr. Chairman, I move to strike out the last word, not for the purpose of discussing any particular item that is included in this bill but to direct the committee's attention briefly to the condition that the country finds itself in by reason of the fact that at this time no new loans are being made by the Federal Farm Loan Board, for the want of funds, because while the case is pending in the Supreme Court of the United States they are unable to sell bonds for the purpose of securing the necessary funds to continue the operation of this law.

In my judgment a very great mistake was made by the Republican majority in this House at the last session when they declined to include in that bill the $250,000,000 which was requested by the Farm Loan Board. Because on one other occasion a suit of this kind was filed, the Congress, under a Democratic administration, included $200,000,000 of an appropriation to be used by the Federal Farm Loan Board to keep alive this farm loan law. That suit was withdrawn because it did not stop the operation of the Federal Farm Loan Board in performing the functions for which it was intended. None of that money was used, because when that suit was withdrawn the Federal Farm Loan Board had no trouble in selling the bonds.

Now, I do not believe that anything would relieve the situation throughout the country as much as to have this Federal farm loan organization again function. I went into a good many of the States just before the cyclone struck the Democratic Party and I found that in every State throughout the country that I was in the small farmers and the bankers were using the Federal Farm Loan Board. In the South especially, where it is almost impossible to sell cotton at any price, where the difficulty is in getting enough money to pay the taxes, because out of the sale of the cotton all the money comes with which to pay the taxes and other expenses in the South, and in the tobacco sections of Tennessee, Kentucky, Missouri, and the other tobacco sections, the banks say they are having this same trouble.

If this farm-loan proposition was now functioning, the bankers of my State all say that the small farmer, who owes a few hundred dollars on his farm, would have no trouble in negotiating a loan with the Federal Farm Loan Board, which would relieve them of the distressed condition in which they find themselves, and all the banks without exception will carry the small farmer through the next year so that he can make his crop, because there would be left the crop and the personal property unincumbered. And in all cases the bank would be willing also to take a second mortgage upon the small farmer's land. And that alone would do more, in my judgment, to relieve the distressed situation throughout the agricultural sections of the United States than anything else. In the great West, on account of the enormous drop in the price of grain, they have a distressed condition there also. The complaint throughout the land is that the agricultural people are suffering, and if we could get the proper amount of money into some of these appropriation bills, say $200,000,000 or $250,000,000, for the use of the Federal Farm Loan Board, in my judgment, it would be doubtful whether we would have to use much of it or not, but if we had to use it all it would be but a few weeks until the distress that agriculture finds itself in would be completely relieved. [Applause.]

Mr. DUNBAR. Will the gentleman yield?

Mr. SISSON. Yes.

Mr. DUNBAR. Does the gentleman believe if the Government was authorized to furnish $300,000,000 to the farm-loan banks, to be loaned to the farmers, that much greater benefit would come from that act than from the authorization of the reestablishment of the War Finance Corporation?

Mr. SISSON. Yes; I think so. I think the rehabilitation of the Finance Corporation, however, may do some good. In other words, I think the statement made by the gentleman from Illinois [Mr. MANN] about covered the case. He said that he is not absolutely sure that it will do any good, but that it might tend to have a good effect, and he would rather vote for it for that reason, and I voted for it also, with the idea that it might accomplish some good. But this farm loan goes directly to the people who are needing it and the people who are suffering. If this country is to rehabilitate itself and if you want business to again begin to function, we should put agriculture in a condition where it can perform its duty, where the farmers can pay their taxes and get ready for the next crop. Then business will be resumed.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent for two minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. SISSON. I believe that business would get better instantly if you Republicans would appropriate money to allow the farm loan law to become operative.

Mr. DUNBAR. Then the gentleman is of the opinion that instead of rehabilitating the War Finance Corporation it would have been very much better, if the farmers and the agriculturists are to be assisted, to loan $300,000,000 to the Federal Farm Loan Board for the purpose of loaning it to the farmers?

Mr. SISSON. Since the gentleman puts the question in the comparative degree, I will say to him without hesitation, if I could only get one, I would rehabilitate the Federal Farm Loan Board.

Mr. DUNBAR. I think so.

Mr. SISSON. Because the Federal Farm Loan Board would have given immediate relief where it was needed most.

Now I would like to say one word in conclusion, and I must hurry, because I do not wish to take up the time of the House. That word is: If the American Republic continues to be the virile force in the world that it should be, it will be necessary that everything be done to rehabilitate agriculture and to make farm life attractive, because on that foundation hangs all the virility and strength of the Government. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. One minute more, Mr. Chairman.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. SISSON. The men who live in great cities may let their lips curl in scorn and may let a laugh of derision appear on their countenances when we friends of the American farmer plead for relief for him; but I want to say to them that with all your boasted prosperity, with all your towers of brick and mortar which ascend toward the sky and receive the light of the morning sun, with all your busy looms and whirling spindles, that they will no more be heard and the sound of their wheels will no more vibrate in the air, and their palatial buildings which pierce the heavens will all become charnel houses of death and degradation unless you rehabilitate the farms of this country. [Applause.]

Mr. WINGO. Mr. Chairman, I rise to oppose the amendment. I think it might be well for the RECORD to show what the facts are with reference to the situation that now confronts the Federal land banks. I am led to make that observation by reason of the flood of letters that I am continually receiving, asking why Congress does not compel the Supreme Court to render a decision in the pending case.

Of course it is obvious to the lawyers present that Congress can not direct either when they shall render a decision or the character of the decision. But a great many farmers who write about it do not understand the situation. They should be reminded that there are three coordinate branches of the Government, and that the judicial branch, the Supreme Court, is just as independent of Congress in a question of this kind as Congress is independent of the Supreme Court, and that the Congress can not compel the Supreme Court to hasten its decision, nor can it direct the Supreme Court what its decision shall be. I think it unfortunate—of course I assume there is a proper reason—but I think it is unfortunate that the decision of the Supreme Court has been delayed.

Something has been said about the War Finance Corporation, but before I go into the war finance proposition I want to say that a great many people have the idea, encouraged by the assumptions that some of us make in our statements on the floor, that the Federal Farm Loan Board makes loans. The Government, through the Federal Farm Loan Board, does not make any loans. The farm land banks make the loans, and they are organized corporations to which the Government originally contributed the capital stock. The Federal Farm Loan Board in Washington is helpless, and criticism of that board is not justified, because it is only a governmental agency that supervises the work of these land banks. I hope the Supreme Court will render its decision soon. I hope its decision will be favorable. If it is not, I am quite sure Congress will correct whatever defects the decision may point out in the organic law.

Mr. BRAND. Mr. Chairman, will the gentleman yield?

Mr. WINGO. I yield to the gentleman.

Mr. BRAND. I simply want to state, for the information of those who are likely to read the gentleman's statement on the subject, that in this case the constitutionality of the act has been argued the second time. It was reargued in October, at the request of the court, and they have had that case pending before them nearly three months since the date of the argument the second time.

Mr. WINGO. That is true. It has been argued twice; reargued in October, and a decision is expected now at any time.

Now, the land banks were founded to furnish long-term credits on farm land. The War Finance Corporation was created to expedite exports. In spite of the ridicule and criticisms of the proposal to rehabilitate the War Finance Corporation the psychological effect of reviving it has already been of value to every wheat grower and every cotton grower of this country. It has not only added $15 a bale to the market price of cotton in the South, but it has done that which is infinitely more important from the standpoint of the industrial situation in the country—it has tended to produce a market. The same is true with respect to wheat. You wheat growers know that it is true as to wheat.

Now, I think it is unfortunate, as the gentleman from Mississippi [Mr. SISSON] has said, that Congress did not provide funds to meet the needs of the farm land banks. If the last Congress had not voted down the motion of the gentleman from Kentucky [Mr. BARKLEY], or the amendment, and if we had authorized even less money than the War Finance Corporation was given, or if you had temporarily advanced to the land banks one-third as much money as you voted the railroads of the country, and had let these farm land banks go on, you would have found less embarrassment with respect to the country banks in the wheat and cotton belts of the country than you have now. The farmers could have procured loans repayable in amortization payments extending over a long term and liquidated their debts due banks.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. WINGO. Now, another question: I have been one of those who insisted that when we passed the Federal land bank legislation we only halfway met the problem that is involved in rural credits. A banker who knows anything about the philosophy of commercial banking knows that the commercial banker operating with funds derived from demand deposits has to handle short-term paper and that as a rule he is compelled to confine the greater part of his activities to purely commercial credits.

What this Nation needs for the rehabilitation of agriculture more than anything else is a separate and distinct machinery that will meet the current seasonal credit needs of the American farmer. Nothing is gained by abusing the commercial banker and saying that he is not carrying the farmer as much as he should. He can not carry the loans of 12 or 13 months and sometimes up to 3 years that the farmers need, except by way of renewals. Most business commercial paper has of necessity to be from 30 to 90 days, and prosperity will not come to agriculture in this country and the food supply of this Nation can not be built up and protected unless you go to the fundamental proposition of furnishing the agricultural interests of this country with a separate and distinct machinery whereby it can meet its current credit needs with the same facility that the manufacturer, the merchant, and the other business men of the country meet their current financial needs, and it is not class legislation to give them that. As a matter of fact, our national banking law and our Federal reserve bank law are class legislation for the benefit of the commercial and industrial interests of the country, and we all know that the problem we had at that time was met, and it was well understood that agricultural short-term credits as well as agricultural investment credits are a separate problem that must be worked out, and our banking laws and our currency laws would remain class laws unless we go further and take care of the other class, the agricultural, which at this time has not the same facilities and agencies that the commercial interests have with reference to credit to meet its current needs. [Applause.]

Mr. HASTINGS. I move to strike out the last two words. Mr. Chairman, I do not want to detain the membership of the House more than a minute or two, for the purpose of expressing one thought. I was a member of the Banking and Currency Committee when this farm loan act was reported out and when it passed the House. I tried at that time, first in the committee and then upon the floor of the House, to secure the adoption of an amendment. I want to invite the attention of the House to that amendment now. That was to provide for the appointment of agents for the various farm-loan banks, to be stationed at convenient places throughout the country, to receive and forward applications to the farm-loan banks, without requiring the applicant to become a member of a local loan association; in other words, give this local agent of the farm-loan bank about the same authority that the secretary-treasurer has in a local loan association. With that amendment to this act, if held to be constitutional by the Supreme Court, in my judgment it would make it the greatest piece of constructive legislation that I have voted for since I have been in Congress. I think it will help the farmers of the country more. The great objection that the farmers of this country make to this bill now is because of the delay in getting action upon their applications for loans. Perhaps it was not so with those who originally joined or formed local associations, but after some 15 or 20 or more have organized a local loan association, and after they have procured their loans, they are not so much interested in the new member who wants to join. Therefore we have found, in my country at least, that there are a good many delays in securing favorable action upon their applications. I want to submit this observation in the hope that this amendment will be taken up and considered by the Banking and Currency Committee with a view to favorably reporting out an amendment along this line. This act has already reduced the interest rates to farmers and resulted in more favorable terms to farmers. I trust that the act will be held to be constitutional by the Supreme Court. If not, I hope Congress will correct it. The farmers need financial support and an outlet for their markets.

Mr. STRONG of Kansas. Will the gentleman yield?

Mr. HASTINGS. If I have the time.

Mr. WOOD of Indiana. I move that all debate on this amendment be now closed.

The CHAIRMAN (Mr. FESS). The gentleman from Indiana moves that all debate on this amendment be now closed.

The question being taken, the motion was agreed to.

The Clerk read as follows:

For traveling expenses of the members of the board and its officers and employees, per diem in lieu of subsistence, not exceeding $4; and contingent and miscellaneous expenses, including books of reference and maps, and exclusive of stationery and printing and binding, $15,000.

Mr. QUIN. Mr. Chairman, I move to strike out the last word. The enjoining of the Farm Loan Board by the United States district court has worked a great hardship not only on the agricultural class of this country but on all of the country banking institutions, because of the fact that somebody must advance the money to these farmers. I would not criticize the Supreme Court of the United States, but it seems to me that their decision is a long time in coming. After that decision shall have been rendered no doubt the Farm Loan Board will be allowed to renew its activities. Throughout every farming section of the United States there are applications on file now, and many more ready to be filed, to secure loans under that beneficent legislation; but since the constitutionality of that act has been attacked, as I believe by the interests that wanted a monopoly of farm loans and the high rate of interest, it has become a grave question to the farmers of this country. In my judgment the time is now at hand for the Supreme Court of the United States to know that the people of this country are anxiously awaiting a decision, and, of course, everyone who is a friend of the farmer hopes that the view of the court will sustain the people's representatives in both branches of the American Congress that passed that law in good faith in face of the objections of all the great banking interests of this country that were specially interested in holding up the rate of interest on loans granted to farmers. Now, since the American people have learned that through this governmental agency loans for a long period of time at the lowest possible rate of interest have not only been provided for by the enactment of law but have been a sterling reality, they realize what a handicap it is for the operations of this board to be stopped. Everyone knows that throughout this country the farmers have been forced to pay very high rates of interest. This splendid institution, by allowing the bonds granted on these farm loans to be exempted from all forms of taxation, has, of course, enabled the farmers to get the lowest possible rate of interest paid on any security in the United States except Government bonds. Of course, that exemption from taxation is the point upon which the act is attacked. From one end of this country to the other the people who are operating the farms are looking to this Congress. They do not realize that the Supreme Court of the United States has all the power that it has, and we must respect the powers of the court. The people of the United States think that they are handicapped in their activities, especially those who are cultivating the land and producing food and wearing apparel for all the people, not only of the United States but for the rest of the world. These people are looking to us.

These people are looking to us, and in this very bill the item which carries on the Farm Loan Board with all of its agencies and activities is, in my judgment, the most important item. Whether or not the Supreme Court renders a decision that will allow this law to continue functioning, the Congress in all probability, if the decision is against it, will find some way of passing an act that will come within the scope and purview of the decision of the Supreme Court. As it is, all of those banking institutions, the small country banks, that are now forced to carry these loans in order that the farmers may continue their operations, are heavily handicapped. These city banks are needed for commercial activities. The farmers can not pay the loans in three months or six months. They can not pay the loans in 12 months. They require more time. This Farm Loan Board must continue. [Applause.]

The Clerk read as follows:

In all, $245,220.

Mr. DUNBAR. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. This $245,220 is paid out of the Treasury of the United States, of course, but is it reimbursed by the farm-loan bank?

Mr. WOOD of Indiana. Mr. Chairman, I will state that it is not reimbursed to that amount. We had some legislation in this bill last year providing that it should be. That legislation went out on a point of order. The same thing was put in in the Senate, and it went out on a point of order. There is a bill now pending to make it reimbursable.

Mr. STRONG of Kansas. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Indiana [Mr. DUNBAR], for the purpose of saying to my colleague from Oklahoma [Mr. HASTINGS] that at the last session of Congress I introduced a bill for the appointment of agents to be used in the operation of the Federal farm loan law, but that bill is awaiting decision of the Supreme Court on the matter.

The Clerk read as follows:

Office of Supervising Architect: Supervising Architect, $5,000; executive officer, $3,250; technical officer, $3,000; drafting division—superintendent $3,000, assistant superintendent $2,750; mechanical engineering division—superintendent $2,750, assistant superintendent $2,400; structural division—superintendent $2,750, assistant superintendent $2,400; superintendents—computing division $2,750, repairs division $2,400, accounts division $2,500, maintenance division $2,500; files and records division—chief $2,500, assistant chief $2,250; head draftsman, $2,500; 8 administrative clerks, at $2,000 each; 4 technical clerks, at $1,800 each; clerks—9 of class 4, additional to 1 of class 4 as bookkeeper $100, 4 at $1,700 each, 14 of class 3, 6 at $1,500 each, 13 of class 2, 8 at $1,300 each, 21 of class 1, 4 at $1,100 each, 7 at $1,000 each, 3 at $900 each, 2 at $840 each; photographer, $2,000; foreman, duplicating gallery, $1,800; 2 duplicating paper chemists, at $1,200 each; foreman, vault, safe, and lock shop, $1,200; 5 messengers; messenger boys—1 $600, 2 at 480 each, 2 at $360 each; skilled laborers—4 at $1,000 each, 7 at $960 each, 1 $900, 1 $840; laborers—1 $660, 1 $600; in all, $219,580.

Mr. WOOD of Indiana. Mr. Chairman, I move to amend, in line 15, page 46, by striking out the word "galley" and inserting the word "gallery."

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WOOD of Indiana: Page 46, line 15, strike out the word "galley" and insert in lieu thereof the word "gallery."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Office of Comptroller of the Treasury: Comptroller, $6,000; assistant comptroller, $4,500; attorneys—3 at $4,000 each, 3 at $3,000 each; chief clerk, $2,500; chief law clerk, $2,500; law clerks—4 at $2,400 each, 3 at $2,200 each, 13 at $2,000 each; 5 expert accountants, at $2,100 each; private secretary, $1,800; clerks—15 of class 4, 10 of class 3, 7 of class 2, 6 of class 1, 1 $1,000; 3 messengers; 3 assistant messengers; laborer; in all, $157,340.

Mr. DAVIS of Tennessee. Mr. Chairman, I move to strike out the last word for the purpose of reading this telegram:

FAYETTEVILLE, TENN., *January 8, 1921.*

EWIN L. DAVIS,
Washington, D. C.:

We notice editorial in New York World to effect, "Federal Reserve System may be changed." We believe dealing with Federal Reserve System at this time looking to radical change would work great hardships on Tennessee banks.

H. E. DRYDEN,
President Elk National Bank.
J. M. HUDSON,
President Farmers' National Bank.
F. M. BLEDSOE,
President First National Bank.

Mr. Chairman, while a movement is undoubtedly on foot to repeal or very materially impair the Federal reserve act, yet it is really difficult to believe that Congress will give serious consideration to any such proposition. The gentlemen signing this telegram are undoubtedly correct in making the statement that such a course would work great hardships on Tennessee banks. It is equally true that it would work a great hardship upon all the banks in this country doing a legitimate banking business and would equally work a great hardship upon all the citizens generally.

For more than 40 years before Woodrow Wilson was elected President the very great need of a reform of our banking and currency system had been almost universally recognized and demanded. During this entire period there was an average of one bank failure every 21 days. Panics occurred with almost periodic regularity. The Republican Party was either unable or unwilling to diagnose the disease or prescribe a remedy. Because of a persistent public demand for relief, they did from time to time pretend to administer a palliative—to treat the symptoms—but they never struck at or reached the source of the disease. When a Democratic President and a Democratic Congress went into office in 1913 they at once went to work to solve this problem. They correctly diagnosed the disease and promptly prescribed and administered a proper remedy. A Democratic President and a Democratic Congress originated, framed, and enacted the Federal reserve act. This act decentralized the money and money power of the country. It took it away from one small street in one city on the eastern seaboard and distributed it among the people generally in 12 different districts comprising the entire United States. This act supplied

the Nation with an elastic currency controlled by the American people. It produced a much wider diffusion of the country's wealth and credit. Prior to the operation of this act approximately 60 per cent of the total banking resources of the United States were centered in certain Eastern States, comprising only 6 per cent of the territory of the continental United States. Since the passage of this act there has been a phenomenal growth in the banking resources of other sections of the country, particularly in the West and South.

In spite of the 18 months of peril during the World War and 18 months of the strain of reconstruction, our national banks have grown more during the past seven years under the Federal Reserve System than they did during the entire 50 years from the inauguration of the national banking system in 1863 up to 1913. During the seven years since the enactment of this law there has been a greater percentage of increase in national-bank resources and earnings than during the 50-year period preceding. During this period the depositors in national banks have increased until they now number over 18,000,000.

As compared with the record of national-bank failures under the old Republican system, a most marvelous record has been made under the Federal Reserve System. Instead of such a failure every 21 days, after the passage of the Federal reserve act there were in 1914 four bank failures; in 1916 and 1917, three bank failures; in 1918, one bank failure; and in 1919 there was no failure of any national bank in the entire United States involving one dollar's loss to any depositor. [Applause.] Even during the past year of swift declines and falling prices, according to a recent report of the Comptroller of the Treasury, there were only five small banks in the United States that went into the hands of receivers, and their combined capital stock amounted to only $205,000. This is less than one-eighth of the yearly average of the capital of national banks which have failed in the 56 years since the original establishment of the national banking system.

This great Federal Reserve System enabled America to successfully withstand the strain of war without shock or panic and almost without any failures. Under its beneficent provisions this Nation was converted almost overnight from a peace basis to a war basis; our citizenship and industries were mobilized for war; we marshaled, trained, and equipped the largest Army ever raised in a similar period of time; in order to do this and at the same time aid our allies, we raised and expended the greatest sum of money ever raised and expended during a similar period by any nation in all the tide of time. During the time that we were performing these stupendous tasks this country enjoyed the most unparalleled prosperity in its history; we were converted from a debtor Nation to the greatest creditor Nation on earth. No informed, fair-minded man will deny that such achievements would have been absolutely impossible except under and by reason of the wise provisions of the Federal Reserve System. The Federal reserve act is almost universally conceded to be the greatest piece of constructive monetary legislation ever enacted in any country at any time.

In view of the marvelously beneficent results flowing from the enactment and operation of the Federal Reserve System, to which I have made but brief reference, it is almost inconceivable that any great party would seek its repeal or its virtual destruction by amendment. However, we must not lose sight of the fact that this great act was passed over the bitter opposition and protests of the Republicans in the House and the Senate. Not a single Democrat voted against it, either in the House or the Senate; on the other hand, but three Senators and but a small sprinkle of Representatives voted for it. For a considerable time there have been indications here and there that Republican leaders, particularly those of the stand-pat element, are lending an attentive ear to the demands of Wall Street and certain other big interests, which so strenuously opposed the passage of the bill and who have never ceased to chafe by reason of the fact that they were shorn of so much of their power.

In his speech accepting the Democratic nomination for President, Gov. Cox employed the following language:

> The Federal reserve act is admitted to be the most constructive monetary legislation in history. At a stroke it transferred the power over money and credit and all they represent from one financial district out into the keeping of the people themselves and, instead of one center to which all paid tribute, there are 12 citadels of financial freedom where every citizen has an equal right and where the principle that the credit of American business shall be free is the basis of administration. Every citizen should be alert to guard this great institution, which is his guaranty of credit independence. It should be kept from the hands of those who have never been its friends, and who by changes in a few obscure phrases could translate it into a greater power for evil than it ever has been for good. It is almost unnecessary to speak of the Federal Reserve System in connection with the winning of the war, as, next to the consecration of our manhood and womanhood itself, the greatest factor was the marshaling into one unit through the Federal reserve banks of the stupendous wealth of America.

In my speeches during the recent campaign I warned the people that if the Republicans should come into complete control there would be grave danger of them either repealing the Federal reserve act or destroying its usefulness by amendment. Numerous other Democratic speakers sounded similar warnings. Knowing the value and popularity of the Federal Reserve System, the Republicans did not dare to openly indicate a desire to effect its destruction prior to the election. However, they are now growing bolder. At this point I insert in the RECORD an illuminative article on this subject which appeared in the Nashville Tennesseean, January 8, 1921, as follows:

HANDS OFF RESERVE BANK.

Senator CHARLES CURTIS, of Kansas, Republican whip in the United States Senate, has the following to say on emerging from a conference with Senator WARREN G. HARDING at Marion:

"At a proper time I intend to suggest an amendment to the Federal reserve plan that will look to establishing the original Republican program of a central bank with branches. This would make it possible for the system to accomplish the results for which it was intended—the provision of proper financial facilities without intention of earning profits.

"The present difficulty is that the regional banks are in competition with each other to earn as much money as possible."

Gov. James M. Cox made the charge repeatedly during the presidential campaign that the Republican Party was making a drive for control of the finances of the Nation. CURTIS now admits it.

The Federal Reserve System is the product of Democratic brains. It was written into the laws by a Democratic Congress over the opposition of the Republicans of the United States Senate.

The Federal Reserve System is the greatest single piece of constructive fiscal legislation ever placed upon the statute books of this or any other country. It has withstood every attack and weathered the storm of reconstruction. For the first time in history the United States of America has been free from a financial panic after a great war.

Through the operation of the Federal Reserve System the small banks of this country ever have had a ready supply of funds. Under the old system the gold of the Nation was hoarded by a few banks in New York and panics made easy—despoiling the great bulk of our population and enriching the few bankers of Wall Street who were on the inside.

It is not too long ago to remember the panic of 1907—the so-called "rich-man's" panic. At that time banks in the interior could not obtain funds from the New York banks which were indebted to them. The safety clauses in savings bank accounts were invoked. Depositors were forced to wait 30, 60, or 90 days, as the law provided. Workingmen were paid off in scrip by large corporations because there was no money to be had. Merchants were forced to accept this scrip for necessaries.

That was the so-called "rich-man's" panic of 1907 which brought the late Theodore Roosevelt to beg a truce of the late J. P. Morgan in the White House.

The Curtis plan is to revert to the early days of the Republic and the establishment of a central bank.

The old Republican doctrine was to allow a few chosen financiers to dictate the fiscal policies of the Nation, and place them in a position to make even Presidents bend to their will.

The new doctrine is to place the control of the Nation's money in the control of politicians.

As suggested last August by Gov. Cox, it behooves every citizen to "be alert to guard this great institution." My constituents, who sent the telegram which I read, are alert to the danger. I sincerely trust that all the friends of the Federal Reserve System will become alert ere it is too late.

As previously suggested, it is difficult to believe that there will be a serious effort to change such a beneficent system, although we may well be upon our guard, because there is undoubtedly an effort on foot to bring about a change by those interests who will be benefited by such a change, and who were deprived of the enormous power which they possessed previous to the enactment of this law. [Applause.]

The Clerk read as follows:

For temporary employees in the office of the Comptroller of the Treasury, $20,000: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding $4,000 per annum.

Mr. SNELL. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. SNELL: Page 47, strike out lines 5, 6, 7, and 8.

Mr. SNELL. Mr. Chairman, I am very much disturbed at the great number of lump-sum appropriations for temporary employees carried in this bill. I think it is time that the House met this question fairly face to face, and went on record as to whether we are in favor of continuing all these extra employees in the District of Columbia. Probably every man in the House who made a speech last fall before election said that he was in favor of decreasing the Government expenses, and especially beginning this retrenchment right here in Washington and cutting out the extra number of civil employees at the present time. According to the statement made by the chairman of the committee on the floor the other day, there are still about 90,000 civil employees in this city, and there were only about 110,000 to 117,000 at the height during the war activities. I believe the country at large has a right to make caustic comment on the business operations of this Government if we still continue to keep 90,000 civil employees here nearly three years

after the war has closed. If there was opportunity to have a roll call on the proposition, I would demand it. I want every man down in black and white, showing just where he stands on this question of the temporary Government employees. I want to know whether they are in favor of going back to pre-war conditions or not. The distinguished ex-Speaker of this House [Mr. CLARK of Missouri] said that the only possible way to get rid of them was to stop the appropriations. I for one am willing to assume my share of the responsibility of stopping the appropriations. If we go too far in some individual case and the chief of the department finds that he can not do the work, then I would like to try a new chief for a little while and see what he could do.

I have looked over the hearings. The members of the committee honestly tried to get some information but were not successful, and I maintain there is not a particle of definite information in these hearings in regard to these temporary employees. Take the hearings on the item in hand at the present time. Let me read from those hearings at page 433:

Mr. WOOD. How many people did you have before the war?
Mr. HERNDON. I do not think there has been any material increase. Mr. Cutts could probably tell you.
Mr. CUTTS. We had about the same number.
Mr. HERNDON. We had about the same number; but you gave us one additional clerk last year and one multigraph operator.
Mr. CUTTS. And may I answer further, Mr. Chairman? Prior to that time the only substantial increase in the force of the comptroller's office was for the fiscal year 1916. For years subsequent to 1916 we were granted no increase in the force of the office; the work of the office has increased, yet the personnel has remained practically the same.

Mr. WOOD of Indiana. The gentleman is not reading the testimony if he is reading it in reference to this activity.

Mr. SNELL. This is for additional employees for this department.

Mr. WOOD of Indiana. It is not in reference to this item.

Mr. SNELL. It is in connection with this request for additional employees in these departments; and in general it shows the character of testimony on this subject; there is nothing definite in it. They do not give you any definite information in any of these hearings whereby these additional employees should be continued. I claim that the time has come for Congress to stand up and do what it should and cut out these extra employees brought here on account of the war. To stand up here and say whether we want these additional temporary employees kept in Washington or not and I would like to get a fair and square vote on the matter. I think if it is proper at the end of this bill I shall offer a motion to recommit and get Members on record as to whether they want to keep these additional employees continuously in Washington or stop this unnecessary expense as the people want them to do.

Mr. WOOD of Indiana. Mr. Chairman, I admire and wish to commend the zeal of the gentleman from New York to reduce the number of employees in the city of Washington, but we must do it with some judgment. The amendment proposes to take away from the control of the Treasury some $20,000 for temporary employees. I will state to the gentleman that we reduced the amount requested one-half, and the reason why we permitted this sum of $20,000 to remain, there are a very great many claims against the Government, all of which possibly have to come to the comptroller to be passed upon. These claims are, I am happy to say, diminishing to some extent, but there are hundreds and thousands of them yet, and until they have been reduced to the least possible minimum there will be of necessity some occasion for temporary employees in this department. The comptroller asked that all these be made permanent, but in order that we might have a chance to get rid of them, because it is mighty hard to get rid of them after they are on the statutory roll, we continued this temporary appropriation.

Mr. SNELL. It can not be done unless we cut off the appropriations.

Mr. WOOD of Indiana. We saw fit, and we think we were justified, to continue the small lump-sum appropriations. I will state to the gentleman also that we cut out of the request for statutory positions some half a dozen asked for by the comptroller. I believe we have cut the comptroller's department as much as we should.

Mr. SNELL. Is it not a fact that these heads of departments always ask two or three times as much as they get?

Mr. WOOD of Indiana. Some of them do.

Mr. SNELL. The fact that the estimate is cut is not conclusive that you really cut the appropriations which are made by Congress.

Mr. WOOD of Indiana. That is one of the unfortunate things the committee has to contend with. Some gentlemen proceed upon the theory that they make enormous estimates in order to get a little appropriation, but that does not obtain in every case; but it does confuse and make hard sometimes the effort to discriminate between those who are making an honest estimate in the presentation of their wants against those who are making fictitious estimates, expecting them to be cut down.

The great trouble is practically the want of information which we can not get from the heads of these bureaus who present their claims?

Mr. SNELL. What would be the harm once in trying to cut out these appropriations and see what happens and take the responsibility of trying some new head of a department if the present one will not accomplish the work necessary to be done?

Mr. WOOD of Indiana. To make the cut the gentleman suggests now I think would be ill-advised for the reason that a great many of these claims have been allowed by the various claims boards and are awaiting final action by the comptroller. That would perhaps make it very unfortunate not only for the comptroller's office, but it would result in great hardship to the people entitled to their money on these claims which were honest.

Mr. MANN of Illinois. Will the gentleman yield?

Mr. WOOD of Indiana. I will.

Mr. MANN of Illinois. I assume, I ask for information, that growing out of the war there are a large number of claims, more than would ordinarily occur?

Mr. WOOD of Indiana. There are.

Mr. MANN of Illinois. And that many of those having been passed upon by the auditors are referred to the Comptroller of the Treasury for final disposition?

Mr. WOOD of Indiana. That is true; that is the reason it is suggested that he be allowed, perhaps, during the next current year, some additional help.

Mr. SNELL. Will the gentleman yield for one more question?

Mr. WOOD of Indiana. Yes.

Mr. SNELL. Every time we bring up this proposition some Member says that it is all right to do this, but this is not the place. As far as I am concerned, I think we ought to make the start here. I believe that is the way to do it and the people want it done.

Mr. WOOD of Indiana. There is no one more anxious to cut this than this committee, and I think we have done a pretty good job of it. We have cut, perhaps, in some places where we had no light, where we should not have cut, but where we have light and where we think it would be bad judgment to cut we think we would be doing an injustice to the Government in making that cut and we did not think that would be justified.

Mr. BLANTON. Mr. Chairman, I move to strike out the last two words. As one Member, I would like to state to the gentleman from New York I believe we could cut every single appropriation in every supply bill which comes up here half in two and the people of the country and the Government would get along just as well and their business would be attended to just the same. I want to ask the gentleman from New York this question: If he really wants to cut down these employees he can start pretty well in one way by going down here to the Bureau of Printing and Engraving and going down into those basement cellars and digging up that splendid, fine labor-saving machinery, which cost this Government thousands of dollars, and putting it back into operation again, as it will take the place of numerous employees just now——

Mr. SNELL. Will the gentleman yield?

Mr. BLANTON. Of Government employees who will not let the Government use that machinery, although it is the Government's machinery.

Mr. SNELL. Perhaps if we cut out some of these employees it will force them to put this machinery to work.

Mr. BLANTON. You should put that machinery into use, which is the right of this Government to put its own machinery into use, and just as soon as you put it into use it will do the work which numerous men and women are now doing, and they can be taken off of the pay roll and sent home.

Mr. SNELL. If we cut off the appropriation, would that not send some of them home?

Mr. BLANTON. Yes.

Mr. SNELL. Let us vote to do it.

Mr. BLANTON. And at the same time use our own machinery, that we bought and paid for.

The CHAIRMAN. The question is on the amendment of the gentleman from New York [Mr. SNELL].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Office of Auditor for Navy Department: Auditor, $4,000; chief clerk and chief of division, $2,250; law clerk, $2,000; 2 chiefs of division, at $2,000 each; 2 assistant chiefs of division, at $2,000 each; clerks—

27 of class 4, 45 of class 3, 45 of class 2, 65 of class 1, 35 at $1,000 each, 7 at $900 each; helper, $900; messenger; 2 assistant messengers; 3 laborers; messenger boy, $480; in all, $324,790.

Mr. MANSFIELD. Mr. Chairman, I move to strike out the last word.

While on the subject of the expenditures in the Navy Department and the War Department, I want to call the committee's attention to the remarkable condition of affairs now existing in this country. I clipped from the Washington Times of yesterday afternoon a press report, showing from the statement of Dr. E. B. Rosa, of the Bureau of Standards, that 93 per cent of the expenditures of this Government to-day are due to war and preparedness purposes. The statement says:

Obligations arising from the war or preparedness for the future form the biggest part of the expenses of the Government of the United States, according to Dr. E. B. Rosa, chief physicist of the Bureau of Standards, who has made a scientific study of the expenditures of the Government. The result of his research shows that 93 per cent of the money spent in running the Government was for the Army and Navy, railroad deficit, Shipping Board, pensions, war-risk insurance, and interest on the public debt.

The other 7 per cent was spent as follows: Three per cent for administrative purposes, 3 per cent for public works, and 1 per cent for research, education, and development.

Dr. Rosa used the expenditures of the fiscal year 1920 in making his research.

Mr. Chairman, in the face of all this we have coming to us from a Democratic Secretary of War and from a Democratic Secretary of the Navy recommendations for the expenditure for the coming year of $1,414,000,000 for the Army and Navy. Such increase as that, sir, coming from men purporting to be Democrats, a few years ago would have been considered appalling. Men who would make application to the Democratic Party for admission, with such recommendations as that, would have been met with so many blackballs that they would have been barred from membership for at least a decade.

Mr. Chairman, I did not want to let this opportunity pass without calling the attention of this committee and calling the attention of the taxpayers of this country to the fact that now 93 per cent of the money taken from the taxpayers for the purposes of running this Government is devoted to purposes of war and warlike preparation in this vaunted age of civilization. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Office of Auditor for the State and Other Departments: Auditor, $4,000; chief clerk and chief of division, $2,250; law clerk, $2,000; 2 chiefs of divisions, at $2,000 each; clerks—23 of class 4, 1 of class 4 (special examiner), 26 of class 3, 22 of class 2, 28 of class 1, 10 at $1,000 each, 3 at $900 each; messenger; 3 assistant messengers; 2 laborers; in all, $178,470.

Mr. MANN of Illinois. Mr. Chairman, I move to strike out the last word.

We just passed the office of the Auditor for the Navy Department and the office of Auditor for the War Department. I just wondered if I could get a little information. I do not know that these auditors have anything to do with the subject about which I wish to inquire. The Army and Navy seized various tracts of land during the war and took possession of them and ousted the owners. Whether the title has passed to the Government or not, I do not know. But they never paid for the land. There ought to be some adjustment of those matters in some way.

At the Lake Bluffs Naval Training Station, if I am correctly informed, they seized a man's farm and have enlarged the training station. I do not know whether they want the land or not, but they never made any compensation for the land or for taking the land. I just wondered if anything relating to that had ever come out before the committee.

Mr. WOOD of Indiana. The Judge Advocate of the Navy informed the committee that that is one of the things they are trying to settle now, so far as the activities of the Navy are concerned in taking these lands. There is a board in the War Department that is trying to adjust those matters in that department, and that is one of the excuses for one of their claims boards. I understand, but I may be mistaken as to that, that the money was appropriated for the Navy condemnation.

Mr. MANN of Illinois. I think not, although I would not say.

Mr. WOOD of Indiana. I may be mistaken about that, but I thought it was.

Mr. MANN of Illinois. I think not, because I was told that the matter was under consideration by the Committee on Naval Affairs as to the naval expropriation of property and was under consideration by the Committee on Military Affairs as to the property seized by the Government under the Army.

Mr. WOOD of Indiana. I know this, that in both the Army and Navy there are a number of these claims pending before the different legal departments.

Mr. SNELL. Will the gentleman yield for another question?

Mr. WOOD of Indiana. I yield.

Mr. SNELL. What is the difference in the grade of the auditors employed in the Treasury Department and in the War Department? Both, according to the language of the bill, are to audit accounts and vouchers of the bureaus and officers of the departments, and one receives $1,200, in the Treasury Department, and the one in the War Department receives $1,800.

Mr. WOOD of Indiana. All of these officers are officials of one department. They are all in the Treasury Department. The difference in the salaries they receive is one of those unexplainable and impossible conditions that we find ourselves in with reference to the variation of salaries that have been granted from time to time by various committees.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. MANN] has expired. The Clerk will read.

The Clerk read as follows:

Postal Savings System: Clerks—11 at $1,000 each; 7 skilled laborers at $900 each; in all, $17,300.

Mr. ANDREWS of Nebraska. Mr. Chairman, I move to strike out the last word.

A question has been raised with reference to the discrepancy in salaries of the auditors in the Treasury Department. For an extended period of years their salaries were uniform. Soon after the work began on the construction of the Panama Canal the Auditor for the War Department accompanied a congressional delegation to the canal. Former Senator Beveridge was a member of the delegation, and the Auditor for the War Department was a gentleman from Indiana. The next appropriation bill allowed him $1,000 additional for auditing the accounts of the Panama Canal. He is allowed $4,000 in the legislative bill regularly, making $5,000 in all. The Auditor for the Post Office Department, receiving $5,000, got that increase under Mr. Charles D. Norton, former Assistant Secretary of the Treasury, for certain special favors. That former Auditor for the Post Office Department is now the postmaster in this city.

The Clerk read as follows:

For the force employed in redeeming the Federal reserve and national currency (to be reimbursed by the Federal reserve and national banks): Superintendent, $8,500; teller, $2,500; bookkeeper, $2,400; assistant tellers—1 $2,250, 1 $2,000; assistant bookkeeper, $2,000; clerks—5 of class 4, 7 of class 3, 9 of class 2; expert counters—35 at $1,200 each, 50 at $1,000 each, 52 at $900 each, 35 at $800 each; 2 messengers; 4 assistant messengers; 4 charwomen; in all, $225,770.

Mr. HUDSPETH. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. HUDSPETH. I want to ask the chairman of the committee a question. Are these salaries here of the employees of the Treasury Department fixed by statute?

Mr. WOOD of Indiana. Yes, sir; that is, the statutory places.

Mr. HUDSPETH. Is the salary of the Chief of the Division of Appointment fixed by statute?

Mr. WOOD of Indiana. I think it is. The act of 1914 established the rate of pay.

Mr. HUDSPETH. I wanted to move an amendment to raise his salary, but if it is fixed by statute I can not do it.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Office of Register of the Treasury: Register, $4,000; assistant register, $2,500; 4 chiefs of division at $2,000 each; clerks—2 of class 4, 2 of class 3, 10 of class 2, 13 of class 1, 110 at $1,000 each, 1 $900; messengers—2 at $840 each, 1 $720; 5 laborers; in all $167,500.

Mr. JONES of Texas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. JONES of Texas. I wanted to ask a question for information. I understand that there are a great many employees in the register's office who are doing nothing except taking the coupons from the bonds after they have been canceled and paid, and the records made in the regular way, and assorting them and filing them away. I wondered what was the necessity of keeping and preserving those canceled coupons and going through the process of doing it.

Mr. WOOD of Indiana. Some time or other these bonds to which coupons are attached will have to be redeemed, and there will have to be a final adjudication then. It is one of the safeguards against forgery, of course, which makes it essential that they shall be preserved. They tell me that now, occasionally, they have reason to hunt up these old coupons with reference to disputed claims as to bonds issued during the Civil War and lost.

Mr. JONES of Texas. In that connection, these bonds are clipped and cashed by people, and there is no record as to who cashed them. You can clip off the coupons from the bonds and take them to the bank and cash them, and there is no record made of who did it.

Mr. WOOD of Indiana. But you have the canceled coupons. Ten years from now and always the Government will cash its coupons, no matter when presented. I should say there are thousands and thousands of coupons of the first bonds that have never been presented yet. Suppose these coupons are lost, and then recovered 10 or 15 years from now, and then presented. One of the first things necessary is to see whether that bond has ever been redeemed. This is what happens: The bookkeeping department keeps accounts of the bonds that are received within each redemption period. There are a great many that are not redeemed. They keep coming in, scattered along and scattered along, and they keep on doing that for years. If they do not have the canceled coupons it would be impossible to tell, as against a good forgery, whether they had ever been redeemed.

Mr. JONES of Texas. If the first was a forgery, that would not prevent them from determining as to the last one; and if the first ones were genuine, true originals, and the last one a forgery, that would not prevent them from determining that.

Mr. WOOD of Indiana. Suppose they find they have already redeemed a coupon, and another coupon bearing the same number on the same bond turns up: It would be up to the department to determine whether they had paid somebody on a forged coupon or were paying somebody on an original coupon. They might never be able to catch the thief, but they might do a great injustice to the original owner of the genuine bond.

Mr. JONES of Texas. I want to state this in connection with that: It does not seem to me that the explanation justifies the great expenditure. I understand that after these coupons are canceled and paid and a record is made of them, so that they have a record of all that have been paid, they keep a great many clerks down here in the Southern Building who file these coupons away carefully. I understand when money is canceled it is destroyed. I do not see why the same process could not be used with these canceled coupons. As a matter of fact, after these hundreds of people have filed away these coupons, ultimately they will be destroyed, and that will take another bunch to check them up and see that they are all there, and then destroyed. Their records can show whether they have paid these coupons. There is nothing on the coupon itself to indicate to whom it is paid, and the record would have no value except to show that it is paid. They have the record showing that the money was paid, and the complete records kept in the Treasury Department show absolutely that these coupons have been redeemed; so that I can see absolutely no purpose in this.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KING. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. KING. I do this for the purpose of asking for some information from the chairman of the committee. I see, at the bottom of page 51, an appropriation is made for certain clerks in redeeming Federal reserve and national currency. What is the character of the work that these clerks do in redeeming Federal reserve notes?

Mr. WOOD of Indiana. I understand that the life of the Federal reserve note, depending somewhat upon its denomination, is about 12 months. Some of them do not last that long. They are in a constant state of change. They are redeeming the old ones, and new ones are being issued, and that is the purpose of these clerks.

Mr. KING. Do they have to do with the keeping of a record of the notes received from the Federal reserve banks that have been discounted?

Mr. WOOD of Indiana. Oh, no. This is the paper, the circulating medium.

Mr. KING. Simply the circulating medium?

Mr. WOOD of Indiana. Yes.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

For contingent expenses of the Bureau of the Mint, to be expended under the direction of the director: For assay laboratory chemicals, fuel, materials, balances, weights, and other necessaries, including books, periodicals, specimens of coins, ores, and incidentals, $1,000.

Mr. GARD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Ohio moves to strike out the last word.

Mr. GARD. I do so for the purpose of asking the chairman what has become of the appropriation for the assay offices?

Mr. WOOD of Indiana. They come later on in the bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For purchase, exchange, maintenance, and repair of motor trucks; purchase, exchange, and maintenance of horses, including shoeing; purchase and repair of wagons, horse-drawn passenger-carrying vehicles, and harness, all to be used for official purposes only, $5,000: *Provided*, That within 30 days after the approval of this act the Secretary of War shall transfer without payment therefor to the Secretary of the Treasury for use of the Treasury Department three light motor trucks.

Mr. GARD. Mr. Chairman, I make a point of order against the proviso beginning with the word "*Provided*," in line 2, page 59, and ending with the word "trucks," in line 6, on the same page.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

For expenses of assessing and collecting the internal-revenue taxes, as provided by the revenue act of 1918, including the employment of the necessary officers, attorneys, experts, agents, accountants, inspectors, deputy collectors, clerks, janitors, and messengers in the District of Columbia and the several collection districts, to be appointed as provided by law, telegraph and telephone service, rental of quarters outside the District of Columbia, postage, freight, express, and other necessary miscellaneous expenses, and the purchase of such supplies, equipment, furniture, mechanical devices, printing, stationery, law books and books of reference, and such other articles as may be necessary for use in the District of Columbia and the several collection districts, $30,000,000: *Provided*, That not more than $500,000 of the total amount appropriated herein may be expended by the Commissioner of Internal Revenue for detecting and bringing to trial persons guilty of violating the internal-revenue laws or conniving at the same, including payments for information and detection of such violation.

Mr. GARD. Mr. Chairman, I reserve a point of order against the paragraph beginning in line 14 and ending in line 19, on page 63, for the purpose of asking what is the intent of this proviso. It seeks to segregate $500,000 out of the $30,000,000 for the purpose of detecting and bringing to trial persons guilty of violating the internal-revenue laws, or conniving at the same, including payments for information and detection of such violation. Is that supposed to be in addition to the amount set apart for the enforcement of the national prohibition act, or in connection with the narcotic act?

Mr. WOOD of Indiana. This is what is known as the fraud fund, for the purpose of detecting frauds practiced upon the internal revenue. It has nothing to do with the Volstead prohibition enforcement act or the narcotic act.

Mr. GARD. Neither the narcotic act nor the prohibition act.

Mr. WOOD of Indiana. No.

Mr. GARD. What is meant by the expression "conniving"—persons guilty of violating the internal-revenue laws or conniving at the same?

Mr. WOOD of Indiana. That means aiding or conspiring.

Mr. GARD. I do not know whether "conniving" is a very accurate legal expression.

Mr. WOOD of Indiana. It may not be. This is the language that they have carried in this item for some time, and the one that they submitted to us, and we did not change it. I do not know how much "conniving" may mean, or what latitude they take under that expression. I will state that only $31,000 was used out of this fund last year.

Mr. GARD. Was it used last year for the purposes of detecting, or was it used for the purpose of examining returns filed with the Commissioner of Internal Revenue, as to which there was suspicion that there might be some fraud?

Mr. WOOD of Indiana. It is a part of the detective service. Sometimes it is used for getting information, and sometimes for laying traps for those fellows who are conniving and violating the internal-revenue laws. It is a part of the secret service fund, used largely by the secret service of the internal revenue.

Mr. KNUTSON. Mr. Chairman, will the gentleman from Indiana yield for a question?

Mr. WOOD of Indiana. Yes.

Mr. KNUTSON. On page 63, lines 18 and 19, appear the words—

Including payments for information.

Is there any fixed amount that those who give information receive, or is that left to the discretion of the chief enforcement officer?

Mr. WOOD of Indiana. I have not seen any schedule which states any particular amount for any special service.

Mr. KNUTSON. There are no market quotations published.

Mr. WOOD of Indiana. No; they are not published.

Mr. MANSFIELD. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. KNUTSON. Reserving the right to object, Mr. Chairman, how many pages does the gentleman intend to use?

Mr. MANSFIELD. I do not know; perhaps half a page, possibly more.

Mr. KNUTSON. I have no objection.

Mr. GALLIVAN. I should like to ask the gentleman from Indiana a question. I want to find out whether there is a legal definition of the word "conniving."

Mr. WOOD of Indiana. Yes; there is a legal definition.

Mr. GALLIVAN. May I ask the gentleman what the legal definition is?

Mr. WOOD of Indiana. In order that the gentleman may be thoroughly advised, I would suggest that he get the latest unabridged dictionary. That will give the legal and also the ordinary definition.

Mr. GALLIVAN. I have not heard the gentleman's definition of the word "conniving," if that is what he is trying to convey.

Mr. MANN of Illinois. This is the definition: That you gentlemen are conniving now to amuse the House. [Laughter.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For refunding taxes illegally collected under the provisions of sections 3220 and 3689, Revised Statutes, as amended by the act of February 24, 1919, $12,000,000, of which not to exceed $8,000,000 may be used for the payment of such claims accruing prior to July 1, 1920, without special authorization and appropriation by Congress in each individual case: *Provided*, That a report shall be made to Congress of the disbursements hereunder as required by the act of February 24, 1919.

Mr. ANDREWS of Nebraska. Mr. Chairman, I move to strike out the last word. I should like to ask the chairman of the committee whether the purpose of this paragraph is to prevent the requirement for forwarding to the Committee on Appropriations of statements from the Division of Bookkeeping and Warrants as to the certificates issued by the Auditor for the Treasury Department upon which payments are made, and if this appropriation is to be drawn upon without any report to Congress upon that subject?

Mr. WOOD of Indiana. No. Out of this $8,000,000 are paid the claims against the Internal Revenue Bureau for amounts that have been overpaid and which have been adjudicated in favor of the taxpayer, without having to get an individual authorization of Congress in each case. Of course, they will have to make a report to Congress. We give them this latitude to pay adjusted claims out of this $8,000,000.

Mr. ANDREWS of Nebraska. That is, we let them steal the horse and then close the door afterwards.

Mr. WOOD of Indiana. The door has not been opened, unless the courts of justice are conniving at fraud, for payment can not be made except after the matter has been adjudicated.

Mr. ANDREWS of Nebraska. Not in court.

Mr. WOOD of Indiana. Adjudicated and finally passed upon by the comptroller.

Mr. ANDREWS of Nebraska. No; not by the comptroller. That is an error. These claims are passed upon by the Commissioner of Internal Revenue, and he certifies the amount to the Auditor for the Treasury Department, and the auditor issues a certificate directing the issuance of a settlement warrant. It is upon that basis that these matters would come here, provided the fund out of which they could be legally paid under the permanent statute had not lapsed to the surplus fund. This puts it in shape so that they can proceed with these payments without reporting here as to the certificates that have been issued and a statement from the Division of Bookkeeping and Warrants to that effect.

Mr. MANN of Illinois. Mr. Chairman, I rise to oppose the pro forma amendment, to get a little information in reference to this item, which I supposed was for the purpose of authorizing the Treasury Department to pay back income taxes that are illegally collected without coming to Congress and asking for a special appropriation.

Mr. WOOD of Indiana. Illegally or erroneously?

Mr. MANN of Illinois. I suppose erroneously would be the proper term.

Mr. ANDREWS of Nebraska. The gentleman has the right phrase.

Mr. MANN of Illinois. I did not catch the idea of the gentleman from Nebraska [Mr. ANDREWS] about what ought to be done about reporting this to Congress. Do I understand the gentleman that this money, although in very small amounts, should be reported to Congress and acted upon by Congress specifically?

Mr. ANDREWS of Nebraska. I do not, except in certain cases. The law provides that within two years after the close of the year in which the cause of action accrued there is an available appropriation out of which the payment can be made. If the Internal Revenue Commissioner delays the settlement until it goes beyond the two years, then these items would come in under that heading, and this is in Congress simply because of delay on the part of the Commissioner of Internal Revenue in settling these accounts. Take a concrete example, if I may explain. A case recently came to my desk showing that the claim was filed for the refund of the taxes illegally paid in 1917. The commissioner did not state the account allowing that refund until July 31, 1920, when the fund out of which the payment could have been legally made had lapsed to the surplus fund.

When the auditor stated the account on the 27th of August following, the amount made available under the last legislative bill of $1,000,000 for a purpose like this had also vanished. This whole matter comes up because of the delay in the office of the Commissioner of Internal Revenue for two years beyond the date when payment should be made.

Mr. MANN of Illinois. That does not give me the information that I want. I understood the gentleman was criticizing the item in the bill, although I may be mistaken about that. The delay is the delay of the Government and not the delay of the man to whom the money is due. What I want to get at is whether the gentleman thinks it desirable for the Government not to pay these claims when they are adjudicated and until Congress has acted upon the claims specifically.

Mr. ANDREWS of Nebraska. Mr. Chairman, if I may respond to that, I would say that this amount of $8,000,000 foreshadows a policy of paying these claims before a report is made.

Mr. MANN of Illinois. Before a report is made to whom?

Mr. ANDREWS of Nebraska. Before the report is made to Congress for the payment of these claims as they used to be paid.

Mr. MANN of Illinois. Then, do I understand the gentleman to say that where the Government has erroneously and illegally collected income tax or otherwise, it must not have a fund out of which it can refund that tax until it is reported to Congress and Congress has provided for it?

Mr. ANDREWS of Nebraska. No; I do not mean that. The Treasury has adequate funds to pay and will pay whenever the commissioner makes allowances within the statutory time.

The Clerk read as follows:

For expenses to enforce the provisions of the "national prohibition act" and the act entitled "An act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon, all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or cocoa leaves, their salts, derivatives, or preparations, and for other purposes," approved December 17, 1914, as amended by the "revenue act of 1918," including the employment of executive officers, agents, inspectors, chemists, assistant chemists, supervisors, clerks, and messengers in the field and in the Bureau of Internal Revenue in the District of Columbia, to be appointed as authorized by law; the securing of evidence of violations of the acts, and for the purchase of such supplies, equipment, mechanical devices, laboratory supplies, books, necessary printing and binding, and such other expenditures as may be necessary in the District of Columbia and several field offices, and for rental of necessary quarters, $6,500,000: *Provided*, That not to exceed $49,500 of the foregoing sum shall be expended for rental of quarters in the District of Columbia: *Provided further*, That not to exceed $750,000 of the foregoing sum shall be expended for enforcement of the provisions of the said act of December 17, 1914: *Provided further*, That not to exceed $25,000 of the total amount appropriated shall be available for advances to be made by special disbursing agents when authorized by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury, the provisions of section 3648 of the Revised Statutes to the contrary notwithstanding.

Mr. VOLSTEAD. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. VOLSTEAD: Page 64, line 23, strike out "$6,500,000" and insert in lieu thereof "$7,100,000."

Mr. WOOD of Indiana. Mr. Chairman, I apprehend that there may be some little discussion on this proposition and I want to see if we can not agree on time. I suggest that all debate on this item and all amendments thereto close in 30 minutes, the time to be equally divided between those in favor of and those opposed to the proposition.

Mr. GALLIVAN. I would like to have 10 minutes.

Mr. WOOD of Indiana. Then say 40 minutes.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that the debate upon this paragraph and all amendments thereto close in 40 minutes, the time to be equally divided between those in favor of and those opposed to the proposition. Is there objection?

Mr. SABATH. Mr. Chairman, reserving the right to object, I understand that that is on this amendment?

Mr. WOOD of Indiana. On this amendment and all other amendments in this paragraph.

The CHAIRMAN. Is there objection?

Mr. GARD. Reserving the right to object, I think we would save time if we proceeded for a time.

The CHAIRMAN. Objection is heard.

Mr. VOLSTEAD. Mr. Chairman, I have examined the hearings very carefully on this bill, and I have been unable to find any reason why this sum of $6,500,000 should be fixed. Last year the appropriation for these two services, the enforcement of the national prohibition act and the narcotic act, was $5,500,000. There is a deficiency of $1,600,000, which would make $7,100,000, the amount expended for such enforcement. The Attorney General asks that the sum of $7,500,000 be allowed. Personally I think that much ought to be allowed. Last year this service was not completely organized. The present force, if continued, will expend not only the $7,100,000 that I am asking but very close to $7,500,000. That this sum is necessary is evident when we come to consider the situation which has been complained of on this floor during the last day or two, namely, that the act is not effectually enforced. We ought to grant the money necessary for enforcement.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. VOLSTEAD. No; pardon. I only want to devote a few minutes to this subject.

The CHAIRMAN. The gentleman declines to yield.

Mr. VOLSTEAD. Mr. Chairman, I want to say this, that every dollar that we appropriate for this purpose will come back to the Government, in fact more than we appropriate. If we could get for enforcement the amount of money that is going to be collected either in taxes or fines—we have already assessed $20,000,000 in taxes, and we have collected I do not know how much, but a very large amount in fines—we would easily be able to enforce this act. If the policy is going to be adopted of preventing appropriation of sufficient amounts of money to enforce prohibition, we want to know it. The country will not be fooled; the law-abiding people will want a fair trial of prohibition. The plea that the law is not as effective as some people think they can make it is not a matter for this committee to consider. The change that is suggested would, in my judgment, paralyze all enforcement, and I can not persuade myself that anyone who has given any serious consideration to the subject can differ with me or the Judiciary Committee on that subject.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

Mr. GALLIVAN. Mr. Chairman, I move to amend the amendment of the gentleman from Minnesota by striking out "$7,100,000" and substituting in place thereof "$100,000,000."

Mr. BLANTON. I ask that the gentleman get his dictionary——

Mr. GALLIVAN. I think it is time the gentleman from Texas has learned the rules of the House enough to know that he is out of order; I have the floor.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Massachusetts.

The Clerk read as follows:

Amendment offered by Mr. GALLIVAN to the amendment offered by Mr. VOLSTEAD. Strike out "$7,100,000" and insert in lieu thereof "$100,000,000."

Mr. GALLIVAN. Mr. Chairman, I was very much impressed by the closing words of the statement made by the distinguished chairman of the Committee on the Judiciary, in which he said that every dollar appropriated for the enforcement of the national prohibition act would be returned to the Treasury, so I want to see more money come back into the Treasury. [Applause.] Therefore, why give them this small mite of $7,100,000? Let us go the whole distance, let us help the incoming administration out, let us get $100,000,000 back by the enforcement of the national prohibition act. The gentleman's legislative advisor told me the other day that before he got through he would have Massachusetts spitting cotton. [Laughter.] I had the great pleasure of saying to Mr. Wayne B. Wheeler that so far as I was able to observe the only Commonwealth in this land that was spitting cotton was Massachusetts. That is the only State in this land where the national prohibition act is being enforced. Now, Mr. Chairman, on the 4th of May, 1920, I addressed this House for one hour on this subject, and I then predicted that it would cost this Government $88,000,000 annually to enforce this act. I had an attentive audience. Mr. Wayne B. Wheeler subsequently challenged my figures, and I showed first of all that we had lost $44,000,000 in taxes which had been willingly paid by honest dealers in the liquor traffic and in other things; that when we considered appropriations for the enforcement act made by the Federal Government, by the State government, by the city government, by the town government, there would be $44,000,000 added to the expense. My figures were challenged, and yet I was modest when I said that it would cost the people of America $88,000,000 to enforce the prohibition act. I believe that $100,000,000 is a little modest, I might say, and I repeat that so far as I have been able to learn by observation and inquiry the only State in the Union where this act is being enforced is the State of Massachusetts. I want to see the act in which my friend from Minnesota believes spread throughout all of this country, and its benign influence felt in every far-reaching part of our Republic. Without $100,000,000, it is impossible to enforce this act, and I hope every sincere friend of that act will vote for my amendment. Do not play the hypocrite any longer; either stop this fool enforcement altogether or pass my amendment.

Mr. TOWNER. Mr. Chairman, it might be observed that if prohibition is enforced in the State of Massachusetts, where the gentleman resides, under existing appropriations, that it hardly is necessary for $100,000,000 to be appropriated for the rest of the United States.

Mr. GALLIVAN. But I want to help the gentleman from Iowa; I want Iowa to get the benefit of this act. Surely he does not object to that.

Mr. TOWNER. I will suggest further that the gentleman's idea of replenishing the Treasury by paying out $100,000,000 for the sake of receiving again $100,000,000 is hardly a very good financial proposition.

Mr. GALLIVAN. I was quoting the gentleman's distinguished colleague, Mr. VOLSTEAD, who sits in front of him. He is my sole authority for that statement.

Mr. TOWNER. I refuse to yield to the gentleman from Massachusetts unless he asks me to yield. Seriously speaking, Mr. Chairman, one certainly expects that a question of this kind should have grave and careful consideration. We have a tremendous problem on hand and are trying to meet it to-day as reasonable men. Everyone knows that the problem of bringing this country from a liquor producing, liquor drinking, and liquor dealing down to a prohibition status is no mean task. I think gentlemen who will honestly investigate the situation will find we have made not only great progress but astounding progress in that direction. [Applause.] I think if we take into consideration the immense territory, the millions of people, and the territory to be covered there is at least a satisfactory condition of carrying out the methods and purposes of that law, and that we can look upon those isolated places and portions of the country with a great deal of complacency where they are yet endeavoring to make the law nugatory. I believe that it is our serious duty as legislators, and that having the mandate of the country to enforce this law we can certainly take no backward step in this second year of progress in that direction. If $7,100,000 was needed last year, certainly it is needed this year. If we reduce the amount of the appropriations that are to be made this year from that year, it will be an invitation to every man who desires to have this law repealed, to everyone who desires to discredit it, to everyone who hopes that it can not be made effective—it will encourage them to resist still further the enforcement of this law. For that reason it seems to me that the amendment offered by the gentleman from Minnesota is reasonable and fair and ought to receive the approval of the committee. [Applause.]

Mr. WOOD of Indiana. Mr. Chairman, I move that all debate on this paragraph and amendments thereto be closed in 30 minutes.

The CHAIRMAN. The gentleman from Indiana moves that all debate on this paragraph and amendments thereto close in 30 minutes. Is there objection?

Mr. DYER. Mr. Chairman, I offer an amendment that it close in 15 minutes.

The CHAIRMAN. To which the gentleman from Missouri offers an amendment providing that it shall close in 15 minutes. The question is on the amendment of the gentleman from Missouri.

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from Indiana [Mr. WOOD] as amended.

The motion as amended was agreed to.

Mr. WOOD of Indiana. Mr. Chairman, I wish to speak in opposition to the amendment, and I wish to speak in opposition to the amendment as a friend of the enforcement of the Volstead law. We appropriated last year $5,500,000 for the enforcement of this act. We are proposing to appropriate in this bill this year $6,500,000. There are now employed—and it may be in-

teresting for the committee to know it—497 clerks in the city of Washington for the purpose of this enforcement, and 2,250 field clerks. It has already been announced to you that there is a deficiency of $1,600,000. The people who have had in charge the enforcement of this law have paid no attention whatever to the action of this Congress in appropriating money for this act, but in violation, if you please, of the mandate of Congress, have exceeded their authority by $1,600,000. By a like token, if we were to appropriate this year $6,500,000 they would take it as a license or liberty, if you please, to exceed the amount by $2,000,000 next year.

Mr. CARAWAY. Will the gentleman yield?

Mr. WOOD of Indiana. I will not yield. I have not the time.

Mr. CARAWAY. You have more time than you need.

Mr. WOOD of Indiana. I want to call attention of the committee to this fact, that there is not a law-enforcement officer who has at heart the support of this bill but what knows that under the present arrangement it is a farce. I have it from those who are friends of this bill, in my State, telling me that under the present arrangement it is absolutely impossible to have any efficiency toward the proper enforcement of the law because of the fact of the divided responsibility. Upon the one hand, the internal-revenue agents say that they can not get the proper support from the Department of Justice, and, upon the other hand, the Department of Justice says that these people are so inexperienced that they do not bring the evidence properly before them and in consequence they can not secure conviction. And so it is a case of shuttlecock, each trying to cast responsibility upon the other.

This law should be transferred to the Department of Justice, and we have the evidence that if it were there now a great deal more enforcement could be had than is now being had at one-third less than we are now expending. So, knowing, as they must, that this law is not being enforced, because it is placed where it can not be enforced and where it should not have been placed, because it is not in the hands of the law-enforcing function of the Government, why do they ask us to appropriate $2,000,000 more, in order that it may be frittered away without any adequate results? Let this law be enforced by the department where it belongs, and let Congress appropriate sufficient money to keep it going until it is transferred where it belongs and where it may receive support from the department that was established for the purpose of enforcing the criminal law. The part the Internal Revenue Bureau has of right in this measure is a mere bagatelle; it is a mere incident, and it should not be charged with this enforcement, because it knows it is not capable of its enforcement.

Mr. VOLSTEAD. May I ask a question?

Mr. WOOD of Indiana. No.

Gentlemen appearing before our committee from the Internal Revenue Bureau realized and confessed their inability to enforce it, because they found they have not the law-enforcing machinery, and, upon the other hand, the Department of Justice say they can not enforce it, because they do not receive the adequate support from the Internal Revenue Bureau. And not one cent more than is suggested and recommended by this committee should be appropriated until the so-called friends of this bill see to it that it is placed in the hands of those whose business it is to enforce the law. [Applause.]

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. UPSHAW and Mr. CRAMTON rose.

The CHAIRMAN. The gentleman from Michigan [Mr. CRAMTON], a member of the committee, is recognized.

Mr. CRAMTON. Mr. Chairman, my friend from Indiana [Mr. WOOD], for whom I have the greatest respect, gives as his chief argument for the cut in the expenditure permitted for this department for the coming year the belief on his part that the present enforcement of the prohibition amendment in this country is a farce, and that it must continue to be a farce so long as it is retained under the present department instead of being transferred to the Department of Justice. If his position as to that is correct, then I am surprised that his committee, having done so well for economy on every other proposition, instead of cutting the $600,000, did not cut off $6,000,000. Furthermore, it is entirely beside the question to argue here whether or not enforcement would better be secured under the Department of Justice. The gentleman's committee did not have jurisdiction of the question of transferring the enforcement to the Department of Justice, and such an amendment to this bill would not be in order. That question is not before the House now, as to whether enforcement can better be secured in one department or the other. The law now permits its enforcement under this bureau under the Commissioner of Internal Revenue. And if we are to secure enforcement of the law it can only now be secured under the Internal Revenue Bureau. Now, the people of this country are interested in the enforcement of the amendment for prohibition. I believe there is a keener interest in that than in any other proposition in this bill, and I do not believe that they will relish any action of Congress that will handicap the only existing agency for the enforcement of that law.

Now, that law took effect, so far as its practical operation is concerned, during the last year. The bureau built up its organization and began its real work, so that now they are engaged on the work on a larger scale than they were at the beginning of the year, and hence, keeping up the work on the same scale as at present, it would cost them more than for the current year, and for the current year it is costing them $7,100,000. The committee proposes to cut it $600,000.

We Members who believe that we must make the best use possible of the only existing agency for the enforcement of the law fear that if there is a cut of $600,000 on this appropriation it will have a bad effect in two directions; first, that it will cripple the real work of this agency, and it will not be enough for them to give even the sort of service they are now giving; and, further, that it will be held by the people of this country as an indication that the time has come when the Congress of the United States is not standing back of the enforcement of this constitutional amendment. We can not afford to have that impression go out. We must give the sanction of Congress to the enforcement of the law of the Nation. [Applause.] If we now, in the second year of our efforts, cut down the money for the enforcement of that amendment, we serve notice to the country—mistakenly, but nevertheless it will be so accepted—that the reaction has commenced; that the era of open lawbreaking is beginning. I say we can not afford it. I hope the amendment will be adopted. [Applause.]

Mr. UPSHAW. Mr. Chairman, the heart of the argument I expected to make for the amendment of the gentleman from Minnesota [Mr. VOLSTEAD] is found in the following telegram, which I received to-day from Bishop Cannon, formerly a great prohibition leader of Virginia, now of Birmingham, Ala. It reads as follows:

BIRMINGHAM, ALA., *January 12, 1921.*

Hon. WILLIAM D. UPSHAW, M. C.,
Washington, D. C.:

The people in the South have shown that they are strongly back of national prohibition and its enforcement. We believe that the amount expended by the law enforcement department is reasonable, and it should be granted. As long as the law enforcement unit returns to the Government more than the expense for running the department, it is false economy to deny this department the necessary appropriation for its work. The law should be enforced, even if it cost the amount asked for with practically no returns to the Government in fines and forfeited bonds and prohibitive taxes, but as long as these items cover that expense, there can be no excuse for cutting $1,000,000 from the needed appropriation. As chairman of the board of temperance and social service of the Methodist Episcopal Church South, I appeal to you on behalf of our constituency to vote to reinstate the million dollars cut from the appropriation bill for the enforcement of national prohibition.

JAMES CANNON, Jr.,
Chairman Commission on Temperance and Social Service, Methodist Episcopal Church South; Chairman Business Committee of the Federal Council of the Churches of Christ in America.

Mr. DYER. Mr. Chairman, will the gentleman yield for a question?

Mr. UPSHAW. Yes.

Mr. DYER. Does not the gentleman think that the advice and judgment of the Committee on Appropriations, which is charged with the responsibility of reporting this bill to the House, after hearings and investigations, should be accepted in preference to that of some one who has not investigated the matter?

Mr. UPSHAW. I honor the Committee on Appropriations, but on a question of this kind I would far rather trust the judgment of the leaders who put this wholesome law on the statute books. [Applause.] And the fact, Mr. Chairman and gentlemen, that the recognized leaders of the movement that resulted in the enactment of the national prohibition law are in favor of this amendment is a good reason for our taking them at full faith.

May I add this other word? In my frequent conferences with leaders and with the Federal prohibition commissioners, charged with the enforcement of this law, I find everywhere the feeling that they have not enough men for the work; and the other fact—remember this; we emphasize it—that if this enforcement department were allowed to use the money that comes to it from all its sources of income it would "wear diamonds," so to speak, and it would be in clover. Therefore, we simply come to you and emphasize what has been said by the gentleman preceding [Mr. CRAMTON], and declare that with the eyes of the

world upon America as the first great nation that, by due governmental process, has outlawed this unspeakable evil, for our own sakes, for the sake of national self-respect, for the sake of the majesty of this law and all law, for the safety of our young manhood, the "to-morrow of this Republic," and for the sake of its influence on the onlooking world, let us stand by the forces that are now giving their all to the enforcement of this law, which is the crystallization of the dreams, the prayers, and the efforts of the best people of America. [Applause.]

The CHAIRMAN. The time of the gentleman from Georgia has expired. The question is on agreeing to the amendment offered by the gentleman from Minnesota [Mr. VOLSTEAD].

Mr. STEPHENS of Ohio. Mr. Chairman, is a substitute in order for this amendment?

The CHAIRMAN. It is.

Mr. STEPHENS of Ohio. I would like to suggest as a substitute, on line 25 on page 64, "For rental of necessary quarters, $1,000,000," by way of substitute for the amendment as presented.

Mr. BLACK. Mr. Chairman, I make the point of order that that is not a substitute.

The CHAIRMAN. The Chair thinks that it is not a substitute.

Mr. STEPHENS of Ohio. It is not? I thought it was.

Mr. MANN of Illinois. Why is it not a substitute? He offers it as a substitute.

Mr. STEPHENS of Ohio. I offered it as a substitute for the amendment.

Mr. GALLIVAN. Mr. Chairman, I ask unanimous consent to withdraw my amendment in favor of the amendment of the gentleman from Ohio. [Laughter.]

The CHAIRMAN. The gentleman from Massachusetts [Mr. GALLIVAN] asks unanimous consent to withdraw his amendment. Is there objection?

Mr. MANN of Illinois. I object.

The CHAIRMAN. Objection is made. The Clerk will report the amendment offered by the gentleman from Ohio [Mr. STEPHENS] in the nature of a substitute for the amendment of the gentleman from Massachusetts [Mr. GALLIVAN].

The Clerk read as follows:

Substitute offered by Mr. STEPHENS of Ohio: Strike out, line 25, page 64, "$6,500,000" and insert in lieu thereof "$1,000,000."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Massachusetts [Mr. GALLIVIN] to the amendment offered by the gentleman from Minnesota [Mr. VOLSTEAD].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. MANN of Illinois. Let us have a rising vote.

The CHAIRMAN. A division is asked for. The question is on agreeing to the amendment to the amendment.

The committee divided; and there were—ayes 12, noes 15.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question now recurs on the substitute offered by the gentleman from Ohio [Mr. STEPHENS].

The question being taken, the substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Minnesota [Mr. VOLSTEAD].

The question being taken, on a division, there were—ayes 86, noes 48.

Accordingly the amendment was agreed to.

Mr. CHINDBLOM. Mr. Chairman, there is opportunity for offering another amendment without debate, is there not, on another portion of the same section?

The CHAIRMAN. Yes.

Mr. CHINDBLOM. In line 1, page 65, I move to strike out the word "shall" and substitute the word "may."

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. CHINDBLOM: Page 65, line 1, strike out the word "shall" and insert in lieu thereof the word "may."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question being taken, the amendment was rejected.

Mr. SNYDER. Mr. Chairman, I move to strike out the last word. On yesterday in a discussion with reference to the number of typewriters purchased by the War Department during the period of the war this language was used by the chairman of the subcommittee, the gentleman from Indiana, as appears in the RECORD, on page 1361:

Mr. Chairman, there has been more graft and fraud committed against this Government with respect to typewriters than any other commodity.

And, further on, he stated that there were 2,000,000 typewriters purchased by the War Department during the war. Now, I am not rising to defend the War Department in the purchase of typewriters, but the charge there is clearly against the typewriter manufacturers of this country, and I rise in defense of at least one concern which is building typewriters in my district, the largest concern of the kind in the world, which has been in successful operation for nearly 50 years. I make this statement, after careful investigation this morning, which shows that during all the period of the war all the departments of the Government did not buy in excess of 250,000 typewriters, and that the War Department, for use in this country, did not buy to exceed 75,000, and for use of the American Expeditionary Forces outside of the country they did not buy in excess of 100,000, all of which were sold in France and are still on the other side of the ocean.

I do not believe that the chairman of this subcommittee wants any such statement as he made yesterday to become of general circulation throughout the land. In response to a question put to him by the gentleman from Illinois [Mr. MANN], who asked if the parties purchasing those typewriters were either fools or knaves, or words to that effect, he said that was exactly what they did, that they purchased 2,000,000 typewriters. I again make the assertion that after careful consideration the statement which I have just made will be found to be the fact.

Mr. WOOD of Indiana. I desire to state that so far as what I said concerning there being more fraud and graft with reference to typewriters than in any other—or almost any other—commodity I have nothing to retract, and I mean exactly what I said then and still say now.

So far as the number of typewriters purchased is concerned I did make a mistake, and am glad to have this opportunity of correcting it. I find that the number of machines purchased by the War Department, according to the hearings of last year, was 200,000, and that of this number they have never been able to account for more than 23 in this city, yet we found 5,000 of them in one building.

Mr. SNYDER. Since the gentleman made such a glaring mistake in the number, he may have made a mistake in the charge as to graft, and so forth, with regard to the typewriter manufacturers.

Mr. WOOD of Indiana. I made no such charge against the manufacturers. But if that is any consolation to the gentleman, all right.

Mr. MANN of Illinois. There certainly is a wide latitude between 75,000, or even 200,000, and 2,000,000. I make mistakes myself. I am not criticizing anybody who makes them, but people ought to be pretty careful about expanding their figures tenfold.

Mr. WOOD of Indiana. That was a common practice during the war. We got so in the habit of talking millions and billions during the war that it is not strange that we make an occasional lapse now. [Laughter.]

Mr. GARD. I think what has just occurred is a splendid illustration of how we sometimes legislate or attempt to legislate under the spell of enthusiasm and with not much information. Yesterday it was said here by the high authority of the chairman of the committee that 2,000,000 typewriters had been purchased by the War Department, and charges were made that if the Secretary of War purchased that many he was either a fool or a knave, and that if anybody purchased them they were either fools or knaves. Now, the statement has shrunken from 2,000,000 typewriters to 200,000 typewriters, one-tenth of the number alleged, this time after an investigation, and now the admission of this great error is made by the chairman, who should make correction of these unfounded and unjustified charges. A point of order was made yesterday, and the statement was made by the gentleman from New York [Mr. SNYDER], on page 1361, CONGRESSIONAL RECORD of January 11, 1921—

Being interested to some extent in some of the typewriter manufactories, I feel that that statement can not be justified.

The point of order was made by the gentleman from New York [Mr. SNYDER] after he had made this very frank statement of his interest, and now I am glad to have the matter thus doubly cleared, in the interest of the gentleman from New York and in the correction made by the gentleman from Indiana [Mr. WOOD], the chairman of the subcommittee.

Mr. SNYDER. Mr. Chairman, I move to strike out the last word. Reference has just been made to a statement that I made yesterday and to-day with regard to having an interest in typewriter plants in my district.

Mr. WOOD of Indiana. I make the point of order that the gentleman is not in order.

Mr. SNYDER. I want to correct a statement putting me in a light in which I do not desire to appear. I think the gentleman ought to be courteous enough for that. I move to strike out

the last word, for the purpose of clearing up a statement which has just been made with regard to a statement that I made here a moment ago. I want to say that I have no interest, financial or otherwise, except that the typewriter concerns in my district are constituents of mine.

Mr. GARD. I made no statement. I merely read what was in the RECORD, from the gentleman's own statement.

Mr. SNYDER. I want to clear that up, so there can be no ambiguity whatever about it.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For incidental and contingent expenses, $1,300.

Mr. GANDY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. GANDY: Page 68, after line 6, insert the following as a new paragraph:

"Deadwood, S. Dak., assay office: Assayer in charge, who shall also perform the duties of melter, $1,800; assistant assayer, $1,200; clerk, $1,000; in all, $4,000. For wages of workmen and other employees, $2,000, and for incidental and contingent expenses, $1,200."

Mr. BLANTON. Mr. Chairman, I make the point of order that this is legislation on an appropriation bill and that it is not germane to the preceding paragraph and not authorized by law.

The CHAIRMAN. The Chair will ask the gentleman from South Dakota whether this provision is authorized by law?

Mr. GANDY. I want to say to the Chair that this was authorized by paragraph 10 of the legislative, executive, and judicial appropriation bill approved February 18, 1897.

Mr. BLANTON. Mr. Chairman, I make the point of order that that is an appropriation bill and that it is not law.

Mr. GANDY. Mr. Chairman, we have gone into that phase of this before. There is a specific authorization for this in the appropriation bill over and above the appropriation.

The CHAIRMAN. The Chair thinks that if the gentleman can not point to some substantive law authorizing the creation of that assay office and fixing the salaries, that the mere fact that it appears in an appropriation bill would not make it in order.

Mr. BLANTON. If the gentleman wants to discuss the matter, I shall reserve the point of order.

Mr. GANDY. I do not want to discuss that feature of it. I have gone into that phase of it before. There is specific authorization for this office over and above the appropriation, and I have cited the chairman to the specific authorization.

Mr. BLANTON. I submit that that is in an appropriation bill.

The CHAIRMAN. The Chair suggests to the gentleman from Texas that he reserve his point of order for a few minutes until the matter can be looked into.

Mr. BLANTON. I will do that. I make this suggestion, that even though an appropriation is carried year after year in an appropriation bill, if there is no substantive law authorizing it, it is subject to the point of order.

The CHAIRMAN. That is true; but the Chair thinks possibly there may be substantive law for this.

Mr. CARTER. An authorization can be placed in an appropriation bill just the same as in any other bill.

The CHAIRMAN. Perhaps the gentleman from Indiana, the chairman of the subcommittee, could cite the Chair to the law.

Mr. WOOD of Indiana. Mr. Chairman, my opinion is that its original authorization was in an appropriation bill. I call the attention of the Chair to the United States Compiled Statutes, 1918, section 6427, which reads:

Assay office at Deadwood, S. Dak.: For establishing an assay office at Deadwood, in the State of South Dakota.

Then, section 6428 reads as follows:

Assay office at Deadwood, S. Dak.: * * * and said assay office shall be conducted under the provisions of the act entitled "An act revising and amending the laws relative to the mints, assay offices, and coinage of the United States," approved February 12, 1873.

Mr. Chairman, I am inclined to think that this is statutory.

The CHAIRMAN. In view of the citation of the gentleman from Indiana, the Chair is inclined to think that this is authorized by law.

Mr. BLANTON. Did the Chair catch my further point of order, that it is not germane to the preceding paragraph?

The CHAIRMAN. That provides for an assay office. The Chair thinks the amendment is in order and overrules the point of order.

Mr. GANDY. Mr. Chairman and gentlemen of the House, this item has been discussed many times in the past 10 years before this House. I can conceive of nothing except a misunderstanding of the facts, both in the field and in Washington, that would lead the committee at this time to eliminate this item from the bill. I concede that this country would run right along, perhaps, if we were to eliminate a great many of the governmental activities, but the fact is that this office for more than 20 years has served a definite purpose in the life of the mining community in which it is located, and no man lives who can gainsay that. The elimination of this office is not recommended by the Treasury Department of the United States, or by any official connected with it, and I make that statement without fear of successful contradiction. Many years ago a Director of the Mint did recommend that some of the minor assay offices be eliminated, but not since that statement has any assertion been made to the Committee on Appropriations, either in writing or verbally, as shown by the record, asking for the elimination of this item, and I have looked back over the hearings for 20 years. This item was regularly estimated for by the Secretary of the Treasury.

The amendment that I have introduced places the appropriation as it is in the current law, taking no cognizance of the recommendation of the Director of the Mint for an increase for this office. The Deadwood assay office was self-sustaining for many years, as will be shown by the records of the Treasury Department, and it remained self-sustaining until the Congress reduced the appropriations in 1914 and forced the Director of the Mint to notify the largest of the gold-producing companies of the Black Hills that he could no longer at that particular office accept their bullion.

From that time to this the bullion of the largest producing gold mine in the United States has been transported to the Philadelphia Mint and is not credited to this assay office, which is within a stone's throw of the mine that produces it. Even then this office is serving a great purpose. I notice from the report as filed with the Committee on Appropriations that this office had more assays of ore for gold or silver than any other assay office conducted by the United States Government.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. GANDY. Yes.

Mr. CANNON. If I recollect rightly, the gold that is produced in this, the richest mine, I believe, in the United States, in the gentleman's State, is carried to the Philadelphia Mint at the expense of the Government. The Government pays the freight, whereas the farmer has to pay his own freight on his wheat and corn.

Mr. GANDY. Mr. Chairman, I am sure that the gentleman did not hear the statement I just concluded. I just finished saying that in 1914 the appropriation was reduced, and that since that time the bullion of the largest gold mine under the American flag, which is located within a stone's throw of this assay office, has not passed through this office, and it will not pass through it under the appropriation if made pursuant to this amendment.

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

Mr. GANDY. Mr. Chairman, I ask unanimous consent to continue for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CANNON. If it is assayed there, would it not pass through there?

Mr. GANDY. The appropriation asked for in the amendment is the same as the present appropriation and is still not sufficient to take on that quantity of business. It would not permit of the handling of the bullion from this mine if the amendment were agreed to.

Mr. CANNON. They can assay it themselves, or if the Government assays it, the Government pays the freight to the Philadelphia Mint, if I am correct. I looked the matter up some years ago, when I had charge of this bill.

Mr. GANDY. In 1914 the appropriation for this office was reduced to the extent that they were no longer able to handle the bullion for that mine, and it has not since handled it and will not handle it if this item be agreed to.

Mr. CANNON. If the Government assays——

Mr. GANDY. It does not assay bullion from that mine at this office.

Mr. CANNON. Would the Government pay transportation?

Mr. GANDY. I want to be fair with the gentleman and with the committee, and I say I do not know. There is a little charge known as a freight charge, but whether that is sufficient to pay the entire cost of transportation I do not know, but those are regulations made by the Treasury Department.

Mr. CANNON. Why should the farmers' wheat raised in Dakota and marketed in Philadelphia or the seacoast—why should that be taxed the cost of transportation——

Mr. GANDY. I know the gentleman does not want unnecessarily to take up my time.

Mr. CANNON. I do not.

Mr. GANDY. And the question of freight on bullion is not germane to this discussion at all.

Mr. CANNON. Will the gentleman accept an amendment cutting out free transportation?

Mr. GANDY. Why, so far as I am concerned, yes. Now, I just stated before being interrupted by the gentleman from Illinois that the report as made to the Appropriations Committee—and I hold it here in my hand—shows that this office made more assays of ore for gold and silver than any assay office under the American flag—bar none—for the fiscal year ending June 30, 1920. There were 446 for gold or silver as against 166 at New Orleans, 186 at Carson, 184 at Boise, 229 at Seattle, and 436 at Salt Lake. I said in my talk to this House a year ago on this same item that these assays of gold or silver for the prospector who brings his piece of rock to the Government assay office, that he may have an assay of unquestioned integrity, is the greatest benefit. This office serves all of the people of the country; for, if you please, if a gentleman from Illinois, perchance, should come into the Black Hills of South Dakota thinking of investing in a mine he takes ore from that mine—where? Not to a private assay office, in whose integrity he does not have confidence, but to the United States Government assay office. Thus it is for the protection of the investor, the Government, and of the people generally.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent that the gentleman have five additional minutes in which to complete his statement.

Mr. GANDY. I would like to have that much time, as I have been interrupted.

The CHAIRMAN. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears none.

Mr. ANDREWS of Nebraska. Will the gentleman yield for a brief suggestion?

Mr. GANDY. Yes.

Mr. ANDREWS of Nebraska. On that matter of freight the custom used to be that if the United States Government accepted the bullion and shipped on its own account it paid the freight. If the individual, as owner, shipped it on his own account, he paid the freight.

Mr. GANDY. I am glad to have that explanation, but it is a matter that does not concern this amendment, because the matter of freight is a subject that concerns all assay offices, and this assay office should not be singled out for something that concerns them all. If the appropriations were made for this office on the basis they were in 1914, this office would again be self-sustaining, as it was then. An effort has been made to drive out the smaller offices for the benefit of the larger ones. Even though the bullion from the Homestake mine is not handled at this office, yet it had 79 deposits of bullion last year, which is remarkable when we consider the situation that confronted the gold-mining industry. I said on the floor a year ago that a great number of smaller gold-mining companies were either at a standstill or would be driven out of business if conditions did not change in the gold-mining industry or relief come through some measure here.

Mr. HUDSPETH. Will the gentleman yield? I am in sympathy with him, and I want to ask why the appropriation was cut off in 1914?

Mr. GANDY. It was reduced in 1914. That is before my time of service in this House, and the only thing I can say about it was that it was in line with a policy of carrying the bullion to the larger offices to the detriment of the smaller offices. Now to go back. There were 79 deposits of bullion in the fiscal year ending June 30, 1920, notwithstanding the unfavorable conditions in the gold-mining industry in the United States.

Without the bullion from the famous Homestake mine going through this assay office the smaller producers brought in $482,907.03 of absolutely new gold that never was spent before in the world, tendered over the counter of this office, and which cost the Government of the United States the great sum of $7,200 of appropriations to maintain. In addition to the $482,000 of gold that came from the small producers we produced in the little Black Hills of South Dakota several millions of new gold. In the Black Hills since gold was discovered in 1876 something near $300,000,000 of gold has been produced. We hope if conditions change in the gold-mining industry that production may come back to what it was before the war, not only in this but in other gold camps of the West.

Realizing the critical times the gold industry has passed through, and the hope that we have of its now looking up, knowing the great good that institution is to that community and to the investing public of the Middle West, I beg of this House again, as I have begged three or four times in my six years of service here, that it not now cripple the gold industry there; that it not strike down the Deadwood assay office that provides the only office in 500 miles where you can get a Government assay of ore—gold or silver or any other precious metal. I implore the House for this small item, and I feel like begging the pardon of Members for taking up the time at such length on an item of $7,200 all told, to maintain an office for another year, which for 20 years has served its purpose in one of the greatest gold camps under the American flag. [Applause.]

Mr. MANN of Illinois. Will the gentleman yield?

Mr. GANDY. I will.

Mr. MANN of Illinois. If only $400,000 worth of gold is presented to this assay office in a year, why do we need the assayer and assistant assayer?

Mr. GANDY. Of course, the gentleman wants to be fair. It is nearer $500,000 than $400,000. In addition thereto, the office made, as the gentleman will see if he will turn to the hearings, 446 individual assays for gold and silver and 45 assays for base metal, or almost 500 separate assays, besides those made on bullion brought into the assay office.

Mr. WOOD of Indiana. Mr. Chairman, I desire to say in opposition to this amendment that it is no argument that the Treasury has not asked for the abolishment of this office. The Treasury Department never asked for the abolishment of the Subtreasury, and year after year and session of Congress after session of Congress the attempt was made to abolish those useless things. We finally abolished them, and the Treasury finally consented. No one ever asked, so far as the Government was concerned, for the abolishment of the old pension agents.

Mr. GANDY. Will the gentleman yield for a question?

Mr. WOOD of Indiana. I yield.

Mr. GANDY. In explanation of my statement, I made it for the reason that it has been stated on this floor and by the gentleman himself that this recommendation was made by the Treasury at various times.

Mr. WOOD of Indiana. The Treasury now, while it is not recommending this thing, realizes the fact that it is absolutely useless. Now, there is a great deal more gold assayed, I expect, in a single month in Alaska than there is in a single year in South Dakota, and yet they have no assay office in Alaska. They have plenty of gold and silver and other minerals down in Arizona, and yet they have no assay office there. The same thing is true of New Mexico. Now, this assay office at Deadwood has been going down grade ever since 1911, until it has gone down from 473 deposits to seventy and odd redeposits. I wish to impress upon the committee that it is simply a matter of whether we are going to spend money to keep somebody in employment up there, in a place which is absolutely as useless as the subtreasuries were or the pension agents were, which they clung to and tried to keep as long as possible, but which after repeated efforts were abolished.

Now, the amount of deposits in this office last year were 79. The amount of income from this office was $700.85. The expense of keeping the office was $8,162.91, against the credit of $198.14, making a clear loss, so far as the Government was concerned, of over $7,000. It is simply a question of whether, for the purpose of satisfying the personal desires of Members of this Congress, we are going to continue the sinecure, or whether, under obligations to the country and the Treasury of the United States, we are going to save this money which is being absolutely frittered away. There can be nothing said in defense of keeping this office, except that it was once established there.

Mr. MAYS. Did not the Director of the Mint say that it was of great service to prospectors in their endeavor to discover minerals around the country?

Mr. WOOD of Indiana. I will say as to the Director of the Mint, that he did not advocate retention or the abolishment of this office. But we can not afford to make this Government entirely an eleemosynary institution. There are plenty of other ways to get assays. You do not have to have an assay office to have the assay.

Mr. MAYS. Do you expect the Bureau of Soils and the Bureau of Plant Industry to pay a dividend?

Mr. WOOD of Indiana. They are paying very large dividends.

Mr. MAYS. In what way?

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. RAKER. Mr. Chairman, I would like to speak on the amendment.

It is unfortunate that this subject has to be brought up every year. It has been brought up every year for the last 10 years. It is a wave of attempted economy, and I say it frankly, by those who do not take the time to go into the subject and who are not familiar with it first hand. Eight years ago an effort was made to abolish all these except four. An argument was made then that they were absolutely unnecessary. But it was demonstrated then and it has been demonstrated ever since that they were absolutely necessary, and during the war three of the offices that were attempted to be abolished were made important agencies in furnishing those things which the Government needed. The same argument was made in relation to the Seattle office eight years ago that is made in regard to the office that the gentleman tries to exclude. The same argument was then made in regard to the Helena, Mont., office; the same argument was made in regard to Boise, Idaho; the same argument was made in regard to the San Francisco office as is made in regard to the amendment that the gentleman seeks to place upon this bill; and the one relating to Carson, and the one relating to Salt Lake. But I understand that Salt Lake is left out, although it ought to be in.

It is a humiliating situation, and I am not criticizing the splendid chairman because of that, but he is not familiar with the work that has been done by these offices.

The same argument that is advanced for the abolition of this office could be advanced for the abolition of the office at New York and the transfer of that office to Boise, Idaho, or Salt Lake, Utah. Simply because these two offices are without the prescribed territorial limits designated by the gentleman from Illinois [Mr. MADDEN] the Government ought not to be deprived of its proper functioning in doing important public work that ought to be done. I trust that the members of the committee will not permit this office to be abandoned. They ought to adopt the amendment offered by the gentleman from South Dakota and place the item for this office upon this bill because of the good work that it has done and the benefit it has conferred upon the general public. There can be no reason for its exclusion. There can be no reason for keeping it out. It ought to remain just the same as the one at New York and as the one at Philadelphia. Simply because it does not do the amount of work in volume, although of the same class and character as far as it goes, is no reason for excluding it. It supplies the people of the immediate neighborhood and community in that mining district, as the other offices supply the needs of the people in Idaho and Washington and California and Colorado and the surrounding territory. For the very reason that those offices are maintained and kept there and run as public functionaries for the Government as well as of its people, this office should be placed upon the same footing, and I trust that the amendment of the gentleman from South Dakota will be adopted.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from South Dakota [Mr. GANDY].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. GANDY. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 28, noes 35.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For incidental and contingent expenses, including new machinery and repairs, wastage in the melting and refining department, and loss on sale of sweeps arising from the treatment of bullion, $115,500.

Mr. MAYS. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Utah offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MAYS: Page 68, line 25, after the figures "$115,500" add a new paragraph, as follows:

"Salt Lake City, Utah, assay office: Assayer in charge, who shall also perform the duties of melter, chief clerk, and cashier, $1,800; for services of workmen and other employees, $1,500; other incidental and contingent expenses, $600; in all, $3,900."

Mr. MAYS. Mr. Chairman, I would like to have the Republicans acquainted with that portion of the United States west of the Mississippi River, and for that purpose I exhibit this map.

I asked the gentleman from Indiana [Mr. WOOD] the question in the debate over the Deadwood office, as to whether or not the authorities in charge of this department did not state that these assay offices were of great interest and of great benefit to the prospectors and the developers of mines. He thought that they had asked that they be abandoned; in effect, that they were useless. I notice in the hearing that Mr. WOOD asked that question of the Director of the Mint, and the Director of the Mint said:

Now, I want to be, as I said before, perfectly honest and frank about these offices. They do perform a great service to the prospectors and men interested in mining throughout the States.

And, then, further along he makes an additional statement about the industry of mining at this time. Mr. WOOD asked if the industry had not been decreasing in output, and the director said:

It is dormant at the present time, owing to the lack of prospectors going out and bringing in new mining country. There must be an incentive to the prospector for him to go out and prospect for the purpose of locating new territory.

Now, I do not present this as a money-making proposition, but as a help to the prospecting industry of this country. Salt Lake City is located in the center of the mining industry of the United States. I have just taken the figures of the present year's output of the States adjoining Utah. Utah produced in the year past approximately $75,000,000 worth of these metals. Montana, to the north of us, produced $65,000,000; Idaho, $40,000,000; Colorado, $37,000,000; Arizona, to the south, $70,000,000; Nevada, $32,000,000; Salt Lake City being the geographical center of this industry.

In Salt Lake County there is more ore smelted than in any other county in the world, and in Salt Lake County I think there is more ore produced, measured in value, than is produced in any other county in the world. These miners and prospectors there ask that this office be continued.

We appropriate money in the bills here for various bureaus, such as the Bureau of Soils and the Bureau of Plant Industry, and others of that nature, without considering that we are wasting money.

In Utah during the war we paid $100,000,000 into the Treasury, mostly coming from these mines. We did not ask for much. We got nothing. We had no "war babies" out there. I could mention at this time but little that Utah got out of this war in profits. It did not profiteer except in the legitimate sale of its products. There are certain little towns here in the East that received more money from the Government in the way of war institutions than all of this intermountain region put together.

Mr. MACGREGOR. Mr. Chairman, will the gentleman yield?

Mr. MAYS. Yes.

Mr. MACGREGOR. I would like to ask the gentleman from Utah what the State of Utah is doing to prevent the slaughter of almost the sole remaining herd of wild buffalo left in the United States?

Mr. MAYS. The Government has not appropriated money to protect them. The gentleman is invited out there to hunt. They are also permitting the slaughter of moose and elk in the State of Maine, for instance. But I do not think that is pertinent to this debate.

I submit that with the output of $319,000,000 in the year past, with the payment by the State of Utah alone of $100,000,000, it is not unreasonable to ask for the accommodation of this industry that $3,900 be appropriated.

The CHAIRMAN. The time of the gentleman from Utah has expired.

Mr. MAYS. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MAYS. We have made this fight before. My predecessor, Mr. Howell, who represented the State of Utah in this Congress for 14 years, secured the establishment of this office some 14 years ago. Since the establishment of the office it has done very valuable work, and the output of minerals in the State has increased four or five fold.

We have had to fight this battle on the floor every year that this bill has come up since I have been here. Unfortunately there have been men in charge of this bill who have no particular acquaintance with the interests of the West and with the benefits that this western industry has conferred upon the whole country. It is an attempt to discourage the mining industry. You have had a discussion here, and you have heard what has been said as to the critical situation with reference to our gold standard. Salt Lake City next to Deadwood assayed more samples of rock last year for gold than any other office in the country. Those that are kept in the bill have fewer assays. I did not ask for any letters on this subject, but the Commercial Club of Salt Lake City state in a letter from their president, which I received to-day, the following:

EXECUTIVE OFFICES THE COMMERCIAL CLUB,
SALT LAKE CITY, *January 8, 1921.*

Hon. JAMES H. MAYS,
United States Congressman from Utah,
Washington, D. C.

MY DEAR CONGRESSMAN: In a column in our morning newspaper is a dispatch from Washington to the effect that the local assay office is about to be discontinued. The dispatch contains something to the effect that it has done no business during the past year to speak of.

Activities in mining, with which I know you to be as familiar, if not more so, than anyone here, has been at a low ebb for various reasons. However, we can not conceive of anything of greater value to mining development in our State than the local assay office. It has served manfully, and were one to develop a history of its influence upon mining development we feel that the attending arguments for its maintenance would so preponderate that its discontinuance would be unspeakable.

The value of the Salt Lake assay office during the coming spring and summer will be so great and its absence such a grievous loss to the prospectors and small miners, who have been the pioneers in the past for all big things in mining, that we find it necessary to make the strongest appeal possible to you in behalf of continued maintenance of the United States assay office in Salt Lake City.

Anticipating the pleasure of your most earnest cooperation in this matter, we ask to remain,

Yours, very truly,

C. B. HAWLEY,
President.
J. H. RAYBURN,
General Secretary.

The prospector goes out into the hills and gathers a bagful or valiseful of samples that he thinks may look good. He brings them to the Government assay office to have them tested. He would not, perhaps, pay expressage to send them to San Francisco, 900 miles away, or Denver, 700 miles away, but if he can take them into his home town and have them assayed he does it, and then he acts upon that assay, or anybody else may act upon it. It has the Government stamp upon it, and he can go out into the money market and use that in helping to finance his project. I have in mind now one ex-service man who came into my office with a piece of rock that I could not tell had any value. I advised him to go down to the Government assayer and have it assayed. As a result of that assay the mine which was developed paid into the Treasury last year $250,000 in income tax. The office for a year cost $3,900. Of course, you have the power to take this office out of this bill if you desire, but I want our folks to know who does it and why it is done.

I want to read just one statement from the American Mining Congress:

SALT LAKE CITY, UTAH, *February 20, 1920.*

Hon. JAMES H. MAYS,
House of Representatives, Washington:

Salt Lake City assay office has no particular value to the large mining organizations, but is of great service to prospectors and small operators, as it takes bullion in any amount above $10, while no lots less than $50 can be sent to Denver or San Francisco Mints. There are no refineries here and no place except the assay office where small lots can be disposed of. Salt Lake City office serves portions of Nevada, Idaho, and all of Utah, and makes mineral tests for other Government branches here, such as assays of counterfeit coin for the Secret Service, tests for the Land Office, Geological Survey, and Forest Service, as well as for private individuals. Its cost is small, and we sincerely hope it can be continued, as its presence here gives stimulus to much-needed prospecting, especially gold. We think Government can afford to take a slight loss when the benefits are considered. This is a unit of a Government organization that, as a whole, earns a substantial profit for the Government.

UTAH CHAPTER, AMERICAN MINING CONGRESS.

I want to say that 19,000,000 acres of our land are yet unsurveyed and unclassified as to the mineral content, and the Geological Survey is going to this office continually to have samples assayed to determine the character of the land in the State that is being surveyed. No charge is made for that, and, of course, no credit is given the assay office for that work. It does work for the Government as well as for private individuals. Its cost is small and we sincerely hope it can be continued.

Mr. WOOD of Indiana. I want to call the attention of the committee to the fact that this office is more of a liability than the other one, while they had a difference of between 79 and 100 deposits in favor of the Salt Lake City office. The gentleman speaks about the $60,000,000 that they mined out in that country. Evidently they did not pay much attention to this office, because the report shows that there was only $20,219 in value of gold received at the institution, and the total income was $743.79, while the total outlay was $4,171.83. The importance of this office has been declining a little faster than that at Deadwood. If the gentleman's argument was to be relied upon for the purpose of retaining this activity in Salt Lake City, there would be infinitely more reason why we should establish one of these assay offices in Alaska, in New Mexico, and in Arizona. This office is not far away from Denver and I believe that they can get along very well without it.

Mr. MAYS. Does the gentleman believe we ought to have an assay office in Alaska?

Mr. WOOD of Indiana. They never had one in Alaska during all the time of the gold fever up there, when they were turning out millions and millions of gold.

Mr. MAYS. The output of Alaska is decreasing very rapidly.

Mr. WOOD of Indiana. It is a demonstration of the fact that these things were created years ago without any justification, and have been maintained ever since without any justification, just as the old pension agent was maintained without any justification and as the subtreasuries were maintained without any justification.

Mr. GANDY. I will say to the gentleman from Indiana that practically all of the Alaskan gold is placer gold, which does not need to go through an assay office. I merely state that to the gentleman for his information.

Mr. WOOD of Indiana. How about the gold in Arizona?

Mr. GANDY. There is no great quantity of gold in Arizona.

Mr. WOOD of Indiana. There is plenty of silver there.

Mr. GANDY. Silver is a by-product of copper.

The CHAIRMAN. The question is on the amendment of the gentleman from Utah [Mr. MAYS].

The question was taken; and on a division (demanded by Mr. MAYS) there were—ayes 33, noes 34.

Mr. MAYS. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. WOOD of Indiana and Mr. MAYS to act as tellers.

The committee again divided; and the tellers reported—ayes 42, noes 42.

Mr. MAYS. Mr. Chairman, I think it proper to have a recount. I ask for a recount because of the fact that I know of one gentleman who voted in the affirmative who was actually counted in the negative.

The CHAIRMAN. The Chair presumes that the question of a recount would be within the discretion of the Chair. The vote is so close that the Chair thinks there might well be a recount.

Mr. SNELL. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The Chair will count. [After counting.] Eighty-five Members present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Almon	Emerson	Lampert	Rowan
Babka	Evans, Nev.	Langley	Rowe
Baer	Ferris	Lesher	Rucker
Bankhead	Frear	Linthicum	Sanders, Ind.
Bell	Gallagher	Lonergan	Sanders, La.
Benson	Godwin, N. C.	McArthur	Sanford
Blackmon	Goldfogle	McCulloch	Schall
Bland, Ind.	Goodall	McGlennon	Scully
Bland, Mo.	Goodwin, Ark.	McKenzie	Sells
Booher	Gould	McKeown	Sims
Britten	Graham, Pa.	McKinley	Sinclair
Brumbaugh	Greene, Vt.	McKinley	Small
Burke	Griffin	McLane	Smith, Ill.
Butler	Hamill	McLaughlin, Mich.	Smith, Mich.
Caldwell	Hamilton	McPherson	Smith, N. Y.
Candler	Hardy, Tex.	Maher	Snyder
Cantrill	Harreld	Major	Steele
Carss	Haugen	Mann, S. C.	Stiness
Casey	Hersey	Martin	Strong, Pa.
Copley	Holland	Mason	Sullivan
Costello	Hulings	Monahan, Wis.	Sweet
Crago	Hull, Tenn.	Mooney	Swope
Crisp	Husted	Morin	Treadway
Dale	Hutchinson	Mott	Vaile
Davey	Igoe	Nelson, Wis.	Vare
Davis, Minn.	James, Mich.	Newton, Minn.	Venable
Dempsey	James, Va.	Nicholls	Vinson
Denison	Jefferis	O'Connell	Voigt
Dewalt	Johnson, Ky.	Olney	Volk
Dickinson, Iowa	Johnson, S. Dak.	Overstreet	Whaley
Dominick	Johnston, N. Y.	Padgett	Wheeler
Donovan	Juul	Porter	Williams
Dooling	Kahn	Pou	Wilson, Ill.
Doremus	Kelley, Mich.	Rainey, Ala.	Wilson, Pa.
Doughton	Kennedy, Iowa	Rainey, J. W.	Wingo
Dunn	Kettner	Randall, Calif.	Wise
Eagan	Kincheloe	Reed, W. Va.	Woods, Va.
Edmonds	Kitchin	Robsion, Ky.	Wright
Ellsworth	Kleczka	Rodenberg	Yates
Elston	Kreider	Rose	

The CHAIRMAN. The committee rose; and the Speaker having resumed the chair, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee having under consideration the bill H. R. 15543, finding itself without a quorum, he had caused the roll to be called, whereupon 271 Members answered to their names, a quorum, and he handed in the list of the absentees to be printed in the Journal and in the RECORD.

The committee resumed its session.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah.

Mr. BEGG. Mr. Chairman, may we have the amendment again reported?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection, and the Clerk again reported the amendment.

The CHAIRMAN. The vote will be taken by tellers; and the gentleman from Indiana [Mr. WOOD] and the gentleman from Utah [Mr. MAYS] will take their places as tellers.

The committee again divided; and the tellers reported—ayes 96, noes 92.

So the amendment was agreed to.

Mr. MOORE of Virginia. Mr. Chairman, I ask unanimous consent for permission to add to the figures which I gave this morning relative to the insurance policies which are outstanding in the Bureau of War Risk Insurance, which figures will bring the statistics up to the first of the year.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to revise and extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The Clerk read as follows:

For additional employees in the Office of the Secretary of War, $75,000: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding $1,800 per annum, except the following: Two at $2,500 each, 2 at $2,200 each, and 1 at $2,000.

Mr. SNELL. Mr. Chairman, I move to strike out the figures "$75,000," in line 4, page 70, and to insert in lieu thereof the figures "$50,000."

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. SNELL: Page 70, line 4, strike out "$75,000" and insert in lieu thereof "$50,000."

Mr. SNELL. Mr. Chairman, I do not intend to take up the time of the House to discuss this much further, only I want to call the attention of Members to the fact that in the War Department there are nine special lump sums for additional appropriations for special employees. Those sums altogether amount to nearly a million and three-quarter dollars. I do not understand how we will ever decrease the civil force here in Washington as long as we continue to appropriate such large sums of money. I would like to have a vote on the amendment.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. SNELL. Yes.

Mr. BLANTON. And the gentleman is not taking into consideration the deficiencies which are now being prepared and that are to come later?

Mr. SNELL. No; this has nothing to do with that.

Mr. WOOD of Indiana. Mr. Chairman, in opposition to the amendment, I would say that if the gentleman will examine the hearings he will find that we have cut the War Department very severely in this bill. They asked for an appropriation of $7,259,520 and we reduced that to $4,331,650, a total cut of $2,927,870.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. SNELL. It should also be understood that the war has been over for nearly three years and it is time to stop the war expense.

Mr. WOOD of Indiana. There is no one in more hearty accord with the gentleman in that sentiment than I am. In the item that the gentleman is moving to reduce a request was made for $125,000. We cut that to $75,000 and we thought we cut it as low as it should be cut.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. CAMPBELL of Kansas. Is it not known to the gentleman from Indiana that the chiefs of these bureaus in all of the departments of the Government have long since learned to ask largely that their joy may be full when the bill is finally agreed upon? They, no doubt, in some instances ask for far more than they need. It does seem that the criticisms which were made here last summer of the administration of the War Department were unwarranted, if we are going to keep on making lump-sum appropriations to continue the vast army of civil employees who still go into these offices in the morning and come out in the evening, doing practically nothing during the day.

Mr. WOOD of Indiana. If the gentleman will examine the hearings in this case, he will find that by this bill we have cut the War Department out of 2,500 clerks, and we are getting the War Department more nearly down to a prewar basis by the terms in this bill than almost any other department connected with the Government. As I stated the other day in my remarks in general debate, we have never yet after a war gotten back to a prewar basis, and we never will. That seems to be one of the penalties of war.

Mr. CAMPBELL of Kansas. We will not if we do not. The way to resume normal conditions is to resume normal conditions.

Mr. WOOD of Indiana. It is mighty easy for the gentleman to make an assertion of that kind, but it is more difficult to make a reduction without material injury, and I do not think the gentleman cares to injure the Government.

Mr. CAMPBELL of Kansas. I do not; on the contrary, I want to benefit the Government. I think it would materially benefit the Government to make proper and even radical reductions in all of these appropriations. [Applause.]

Mr. WOOD of Indiana. I will state to the gentleman that one of the very reasons why as large a force of clerks is maintained in the War Department as there is now is by reason of the act of the gentleman himself, together with the other gentlemen here, in throwing into the War Department the necessity of getting out these war records. It is not done yet, but it is expected it will be done within the present fiscal year.

Mr. CAMPBELL of Kansas. But an activity of that kind should be specifically appropriated for. It can not have escaped the attention of the gentleman——

Mr. WOOD of Indiana. It has been specifically appropriated for and it has been continued here——

Mr. SISSON. Mr. Chairman, what the gentleman says may be true, but if we did what the gentleman asks us to do, as chairman of the Committee on Rules he knows instantly it will be subject to the point of order, but I want to say in justification of the position taken by the chairman of your committee, the gentleman from Indiana, that at the very moment that you depart from the lump sum in order to give these people the necessary clerks to do the work devolving upon them and put them on the statutory roll, mix them up with the statutory roll, you will have a great deal of difficulty in getting them off.

Mr. CARTER. You make them permanent.

Mr. SISSON. You make them permanent. Now, by granting a temporary appropriation these small sums have been granted in a lump sum and are a notice to the War Department that we simply provide for them temporarily. The committee has tried to safeguard the lump-sum appropriations by providing that salaries above a certain amount shall not be paid out of the lump sum but they shall be employed out of the lump sum under civil service pay.

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. SISSON. Now, in cutting these down we, perhaps, if they have done anything like the amount of work these gentlemen tell us, have cut too much. I voted with the chairman of the committee on these reductions, and I want to say in justification of this side of the House that I have not made an effort to try to reduce these amounts below what is essential, because after the 4th of March the burden of responsibility is going to be with you to conduct the War Department, and when the records of these soldiers referred to by the chairman of this committee are not in shape where they can be used by the war risk and by all the other various demands made upon the War Department of soldiers' records, the burden will be with you and with your Secretary of War and not with us. Therefore I did not want to reduce these appropriations down to where you will be continually coming into this House and getting a deficiency. I want to go with you down to the place——

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. SISSON. Where you get the right sort of economy in the service, the most penurious economy in the world is a mere record for the time being and then coming back to the House——

Mr. CAMPBELL of Kansas. I want to ask the gentleman not for a run of words but why it is not——

Mr. SISSON. If the gentleman wants me to yield he must treat me with courtesy and respect.

Mr. CAMPBELL of Kansas. I have asked repeatedly——

Mr. SISSON. I never have declined to yield to a gentleman, but the gentleman is pursuing a most peculiar policy in getting me to yield——

Mr. CAMPBELL of Kansas. I beg the gentleman's pardon. I asked the gentleman several times if he would yield, but he did not listen.

Mr. SISSON. I was trying to finish the statement I had in my mind and then I expected to yield to the gentleman. Now, I will yield.

Mr. CAMPBELL of Kansas. What I wanted to ask was this: What is the necessity of the committee appropriating over

$1,600,000 in lump-sum appropriations for the War Department for these activities at this time?

Mr. SISSON. Well, the gentleman has asked a question that would perhaps require more time than the committee would give me and would consume the balance of the day, as in making that request it covers the entire activities of the War and Navy Departments.

Mr. CAMPBELL of Kansas. May I say to the gentleman this: That undoubtedly the War Department specified that it wanted so much money in order to make up these rolls. Why did not the Committee on Appropriations designate just what was necessary in the making up of the rolls and appropriate for that purpose?

Mr. SISSON. Now, the gentleman is asking another question. But if he himself knew the law and knew how these bills were made up he would not ask such foolish questions, because this committee has got to appropriate money in accordance with the statute. Now, I do not have the time, but when the Committee on Military Affairs bill comes up I expect to get a little time, and I am going to try to help this Congress reconstruct the War and Navy bills so that the very thing the gentleman desires be done can be done.

Under the construction of these bills under the present law, this committee's hands are successfully tied, because, if these activities of the War Department are increased in the field of necessity this bill must be increased. You can not prevent carrying what is in this bill——

Mr. CAMPBELL of Kansas. Now, why must it be increased?

Mr. SISSON. We are not increasing it; we are reducing much below the former bill. But the committee would not be justified in reducing this item to a prewar amount. We must dispose of the matter of war materials, and this requires clerks and bookkeepers.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. I ask that I may have three additional minutes.

SEVERAL MEMBERS. Make it five minutes.

Mr. SISSON. I will try to finish in that time.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SISSON. I did not intend to go into this, but when the activities of the War Department are so great in the field—for example, the disposition of all of this war property after it has been declared surplus and this war property is inventoried, the sales are made—the records must be kept here in Washington, so that the bookkeeping will be such that when the property is sold we will be able to know that a proper record is kept, as far as the sales of the property are concerned, and if you do not keep the bookkeeping end of it in the War Department, then you have done a very foolish thing, because you must rely then solely on the man in the field.

Now, those activities of the War Department in the field must be reflected here, and your committee, yea, even the gentleman from Kansas himself, would be absolutely helpless to stop this appropriation unless he would cripple the War Department and thus waste millions unless these activities continue in the field. But in view of the fact that these appropriations are being handled in one committee, if it were not for the fact that the 4th of March is right here and time will not permit, then recommendations could be made so that the whole matter could be synchronized and these appropriations made scientifically.

Mr. CAMPBELL of Kansas. Now, we placed all of these appropriations in the hands of one committee, so that they could be taken care of in such a way that we would not have a situation like this.

Mr. SISSON. If you want to create a riot in this House, you let this committee put some legislation on, irrespective——

Mr. CAMPBELL of Kansas. We do not have to have legislation to cut down appropriations.

Mr. SISSON. Oh, yes, you do, unless you just arbitrarily say that you will not appropriate and thus let millions of property go to waste.

Mr. CAMPBELL of Kansas. Arbitrarily, then.

Mr. SISSON. If the gentleman from Kansas wants to cripple the incoming administration, and wants to do it blindly, and wants to adopt the meat-ax idea and leave the incoming administration to be in the position where in order to function you have got to bring in deficiency bills at the special session of Congress, it is up to you. I am not going to try to treat you with such gross injustice, and I do not believe there is a man in this House who would accuse me of extravagance. I have been accused of penuriousness always. On the contrary, I want these departments of the Government to function when you come into power, and there should be no politics played in the appropriation for one minute.

Mr. CAMPBELL of Kansas. Mr. Chairman, I rise in opposition.

When the question of the consolidation of the appropriating committees was under consideration I advocated the consolidation, so that when appropriations were asked for by the several departments of the Government it would be known to that one committee just how many activities were engaged in by the departments that called for appropriations. We desired to avoid duplication and overlapping. We desired to avoid unnecessary appropriations for the activities of any of the departments of the Government.

Now, the gentleman from Mississippi [Mr. SISSON] comes and says that this appropriation bill can not be reduced, because the War Department is going to continue activities in the field that will make it necessary to have civil employees in Washington, it is said. As a matter of fact, two years and a half after the war, the horses that are maintained by the War Department now equal in number the horses that were maintained during 1917 and 1918. Nobody here or elsewhere can give a justification of that expense on the part of the War Department.

Mr. CARTER. Are there as many horses now as there were then?

Mr. CAMPBELL of Kansas. I understand so; and the War Department says they are necessary.

Mr. CARTER. We heard yesterday that there were 2,000,000 typewriters maintained by the War Department, and to-day that was reduced to 200,000.

Mr. CAMPBELL of Kansas. And for maintaining horses in the War Department it is necessary to have civil employees in the department here in Washington. The one activity calls for the other.

Now, the only way that this Congress and that this side of the House can meet the demands that the country expects from them is simply to take the ax, in the first instance, and go at these appropriations and cut them down to the very quick. [Applause.]

I was hoping that the Committee on Appropriations would give less heed to the insistence of bureau chiefs and of bureau specialists in securing appropriations. There are men who pride themselves on being able to pry from committees of Congress the money they want out of the Treasury. There are men in the departments who are expert in appearing before the committees and expert in explaining the departments of the Government and in securing the money they want. I am hoping that the trained Committee on Appropriations will get back of the question, behind the insistence of these men, and find out whether or not it is necessary to continue the activities at all for which the country is urged to appropriate money.

Mr. FESS. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. FESS. I have a good deal of sympathy with what the gentleman is saying. In looking through the bill I find temporary employees occurring in many places. We have to take, it seems, the statement of the bureau chiefs as to the necessity for them. There seems to be no other way. I understand the ease with which they make their claims appear large. Now, what can we do? It seems to me Congress ought to be able to do something to rectify that.

Mr. CAMPBELL of Kansas. Just use common, human sense and cut the appropriations, disregard the statements of these men who come before the committees and insist that an activity is necessary to be continued two years after the war is over, when everybody knows, in Congress and out of it, that the activity is not necessary in time of peace.

Mr. WOOD of Indiana. I desire to say in answer to the reflection of the gentlemen on the committee that the committee has done the best it could. We have not increased the statutory places in the War Department. They are practically what they were before the war. That there is still much for the clerical force of the War Department to do anybody who is informed will admit. The committee felt that in making another recommendation here, of $6,500,000 for the enforcement of the Volstead Act, that they were acting within the facts and that they were using the best judgment they could possibly use. Yet gentlemen come in here without any information, among whom is the gentleman from Kansas [Mr. CAMPBELL], and vote a million dollars, without rhyme or reason or any justification whatever. So much for the consistency of the gentleman from Kansas. It is the easiest thing in the world to criticize, and sometimes the hardest to justify that criticism.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes; I yield.

Mr. FESS. What concerns me are statements like what we had a moment ago, that we have as many horses as we had at

a certain time when the war was on. Now, what conceivable reason can be offered for holding those horses in the possession of the Government?

Mr. WOOD of Indiana. There is absolutely no reason at all. This committee has to do with almost everything else, but we have not anything to do with horses. I hope the subcommittee of the Committee on Appropriations in charge of the Army bill, or else the Committee on Military Affairs, in charge of legislation relating to the Army, will get the necessary information.

Mr. BLANTON. I suggest they expect to get a revenue from our colt crop. [Laughter.]

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from New York [Mr. SNELL].

The question was taken, and the Chairman announced that the ayes appeared to have it.

Mr. WOOD of Indiana. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 41, noes 43.

Mr. DOWELL. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The gentleman from Iowa asks for tellers. Those in favor of taking the vote by tellers will rise and stand until they are counted. [After counting.] Nineteen gentlemen have risen—not a sufficient number.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Office of Inspector General: Chief clerk, $2,000; clerks—2 of class 4, 2 of class 3, 3 of class 2, 5 of class 1, one $1,000; messenger; assistant messenger; in all, $21,560.

Mr. BLANTON. Mr. Chairman, I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from Texas makes the point that there is no quorum present.

Mr. WOOD of Indiana. If the gentleman will withdraw his point we can run along five minutes until half past 5.

Mr. BLANTON. No; I insist upon the point of order. I think we ought to have a new shift and get somebody else.

Mr. KNUTSON. Mr. Chairman, I ask unanimous consent that the gentleman from Texas be excused. [Laughter.]

The CHAIRMAN. The Chair will count. [After counting.] One hundred and three gentlemen are present—a quorum. The Clerk will read.

The Clerk read as follows:

The services of aeronautical engineers, skilled draftsmen, and such other technical services as the Secretary of War may deem necessary may be employed only in the Office of the Chief of Air Service to carry into effect the various appropriations for aeronautical purposes, to be paid from such appropriations, in addition to the foregoing employees appropriated for in the Office of the Chief of Air Service: *Provided*, That the entire expenditure for this purpose for the fiscal year 1922 shall not exceed $65,000, and the Secretary of War shall each year in the annual estimates report to Congress the number of persons so employed, their duties, and the amount paid to each.

Mr. DOWELL. Mr. Chairman, I move to strike out the last word.

Mr. BLANTON. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The Chair will count.

Mr. WOOD of Indiana. Mr. Chairman, I announced a moment ago that I would move that the committee rise at half past 5. It is now half past 5, and I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15543) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1922, and for other purposes, had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. JOHN W. RAINEY, indefinitely, on account of illness;

To Mr. TAYLOR of Tennessee, for 10 days, to attend the inauguration of the governor of Tennessee;

To Mr. ALMON (at the request of Mr. MCDUFFIE), on account of illness; and

To Mr. YATES (at the request of Mr. ACKERMAN), for to-day, on account of illness.

ADJOURNMENT.

Mr. WOOD of Indiana. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 30 minutes p. m.) the House adjourned until to-morrow, Thursday, January 13, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

327. A letter from the chairman of the Federal Trade Commission, transmitting report of Federal Trade Commission on the grain trade, volume 2, terminal grain markets and exchanges; to the Committee on Agriculture.

328. A letter from the Secretary of War, transmitting itemized report of audits of accounts of the American Red Cross for the fiscal year ending June 30, 1919; to the Committee on Foreign Affairs.

329. A letter from the Secretary of the Navy, transmitting draft of legislation relative to obtaining of fuel by the Navy Department; to the Committee on Naval Affairs.

330. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers on preliminary examination of Luce Creek, Wis., with a view to establishing a harbor of refuge; to the Committee on Rivers and Harbors.

331. A letter from the Secretary of the Treasury, transmitting an estimate of appropriation providing for the relief of the United States Treasury on account of loss of certain loan 4 per cent coupon bonds lost by the First National Bank of Fairmont, N. Dak.; to the Committee on Claims.

332. A letter from the Secretary of the Treasury, transmitting a letter relating to certain items of public moneys that have been lost without any fault on the part of the Treasury; to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. ELSTON, from the Committee on Appropriations, to which was referred the bill (H. R. 15682) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922, reported the same without amendment, accompanied by a report (No. 1184), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of Washington, from the Committee on Immigration and Naturalization, to which was referred the bill (H. R. 15603) to amend the act entitled "An act to establish a Bureau of Immigration and Naturalization, and to provide for a uniform rule for the naturalization of aliens throughout the United States," approved June 29, 1906, as amended, and the act entitled "An act in reference to the expatriation of citizens and their protection abroad," approved March 2, 1907, and for other purposes, reported the same without amendment, accompanied by a report (No. 1185), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 14805) granting a pension to Loisa Lee, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ELSTON: A bill (H. R. 15682) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with the various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922; committed to the Committee of the Whole House on the state of the Union and ordered to be printed.

By Mr. REED of New York: A bill (H. R. 15683) providing for a survey of Dunkirk Harbor, Dunkirk, N. Y.; to the Committee on Rivers and Harbors.

By Mr. GANDY: A bill (H. R. 15684) to amend section 1 of an act entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," approved March 4, 1917; to the Committee on Pensions.

By Mr. EDMONDS: A bill (H. R. 15685) to permit the correction of the general account of the Treasurer of the United States; to the Committee on Claims.

By Mr. HAYDEN: A bill (H. R. 15686) changing the period for doing annual assessment work on unpatented mineral claims

from the calendar year to the fiscal year ending June 30 each year; to the Committee on Mines and Mining.

Also, a bill (H. R. 15687) granting certain public lands to the city of Phoenix, Ariz., for municipal purposes; to the Committee on the Public Lands.

By Mr. HAUGEN: A bill (H. R. 15688) to tax the privilege of dealing on exchanges, boards of trade, and similar places in contracts of sale of grain for future delivery, and for other purposes; to the Committee on Agriculture.

By Mr. PORTER: Concurrent resolution (H. Con. Res. 71) to designate a day on which our people may be urged to contribute to the need of the suffering populations of the world stricken by war, famine, and pestilence; to the Committee on Foreign Affairs.

By Mr. SIEGEL: Joint resolution (H. J. Res. 446) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. ASWELL: Resolution (H. Res. 641) to print 2,500 copies of the Soil Survey of Winn Parish, La.; to the Committee on Printing.

By Mr. CAMPBELL of Kansas: Resolution (H. Res. 642) providing for the immediate consideration of H. R. 14315; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CANTRILL: A bill (H. R. 15689) granting a pension to Mabel Nolan, daughter of John Nolan; to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 15690) for the relief of Eva Brannock Groomes; to the Committee on Claims.

By Mr. DAVEY: A bill (H. R. 15691) granting a pension to Leonora E. Wright; to the Committee on Pensions.

By Mr. DENISON: A bill (H. R. 15692) for the relief of Thomas L. Harris; to the Committee on Military Affairs.

Also, a bill (H. R. 15693) granting a pension to Martha Tucker; to the Committee on Invalid Pensions.

By Mr. DICKINSON of Missouri: A bill (H. R. 15694) for the relief of the heirs of William J. Crabtree, deceased; to the Committee on War Claims.

By Mr. EDMONDS: A bill (H. R. 15695) for the relief of the Treasurer of the United States for lost bonds without fault or negligence on the part of said Treasurer; to the Committee on Claims.

By Mr. ELLIOTT: A bill (H. R. 15696) granting a pension to Tabitha Lewis; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 15697) granting a pension to Fannie Hart Baber; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15698) granting a pension to Julia Little; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 15699) granting an increase of pension to Smith Richards; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 15700) granting an increase of pension to Annie T. Barclay; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 15701) granting an increase of pension to John F. Prater; to the Committee on Pensions.

By Mr. MERRITT: A bill (H. R. 15702) for the relief of Charles A. Frid; to the Committee on Military Affairs.

By Mr. MOORES of Indiana: A bill (H. R. 15703) granting an increase of pension to Sarah C. Rawlins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15704) granting a pension to Margaret Sweet; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 15705) granting a pension to Clara R. Pearson; to the Committee on Invalid Pensions.

By Mr. RICKETTS: A bill (H. R. 15706) granting a pension to George E. Wycuff; to the Committee on Invalid Pensions.

By Mr. ROBSION of Kentucky: A bill (H. R. 15707) granting an increase of pension to Abbey Smith; to the Committee on Pensions.

Also, a bill (H. R. 15708) granting an increase of pension to Susan Hall; to the Committee on Invalid Pensions.

By Mr. SABATH: A bill (H. R. 15709) granting a pension to Hyman Mendelson; to the Committee on Pensions.

By Mr. STEPHENS of Ohio: A bill (H. R. 15710) granting an increase of pension to Ellen S. Mussey; to the Committee on Invalid Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 15711) granting a pension to Robert B. Wilson; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4926. By the SPEAKER (by request): Petition of the American Association for Recognition of the Republic of Ireland, Milesian Council, Staten Island, N. Y., protesting against the outrages being perpetrated by British troops in Ireland; to the Committee on Foreign Affairs.

4927. Also, petition of Julius A. Coleman, favoring the anti-strike law; to the Committee on the Judiciary.

4928. By Mr. CULLEN: Petition of the American Association of Highway Officials, Washington, D. C., favoring the McArthur bill, known as H. R. 14905; to the Committee on Roads.

4929. Also, petition of New York County Organization of the American Legion, protesting against the Sunday blue laws; to the Committee on Interstate and Foreign Commerce.

4930. By Mr. CURRY of California: Petition of sundry citizens of the third district of California, protesting against the Fess-Capper bill, H. R. 12652 and S. 3905; to the Committee on Education.

4931. By Mr. GALLIVAN: Petition of Sturtevant Co., of Hyde Park, Mass., urging appropriation of $96,000,000 to the Shipping Board for the completion of nearly finished passenger and cargo vessels now being built; to the Committee on Appropriations.

4932. By Mr. GRIEST: Petition of sundry citizens of Lancaster, Pa., favoring the Sunday blue laws for the District of Columbia; to the Committee on Interstate and Foreign Commerce.

4933. Also, petition of sundry citizens of Lancaster, Pa., urging enactment of a uniform law relating to marriage and divorce; to the Committee on Interstate and Foreign Commerce.

4934. By Mr. KELLEY of Michigan: Resolution of representatives of 18,000 wool growers in the State of Michigan, in favor of French-Capper truth in fabric bill; to the Committee on Interstate and Foreign Commerce.

4935. By Mr. O'CONNELL: Petition of the Ace Social Club, of Brooklyn, N. Y., favoring a $240 bonus for the Government employees for the incoming fiscal year; to the Committee on Appropriations.

4936. By Mr. SINCLAIR: Petition of the Study Club of Fargo, N. Dak., protesting against House bill 12466, permitting the use of the waters of our national parks by private interests; to the Committee on the Public Lands.

4937. Also, petition of the North Dakota Chapter, American Association of Engineers, in favor of continued Federal aid for State highway work; to the Committee on Roads.

4938. Also, petition of the Study Club of Fargo, N. Dak., favoring passage of Sheppard-Towner maternity bill; to the Committee on Interstate and Foreign Commerce.

4939. By Mr. TINKHAM: Petition of the Colored Republican Club, of Springfield, Mass., favoring resolution 591; to the Committee on the Census.

4940. Also, petition of Hyde Park Lodge, No. 345, International Association of Machinists, Massachusetts, favoring a resumption of trade and travel privileges with soviet Russia; to the Committee on Foreign Affairs.

4941. Also, petition of New England Association of School Superintendents, Boston, Mass., favoring the Smith-Towner bill; to the Committee on Education.

4942. Also, petition of the International Association of Machinists, Boston Lodge, No. 264, favoring a resumption of trade and traveling privileges with soviet Russia; to the Committee on Foreign Affairs.

SENATE.

THURSDAY, *January 13, 1921.*

Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, we thank Thee that Thou hast made us for Thyself, and that we can not rest except we rest in Thee. Grant to us, therefore, the peace of God that passeth all understanding in our hearts and minds, so that through the turmoil and needs and agitation of these days we may seek poise in Thyself. Through Christ, our Lord. Amen.

The reading clerk proceeded to read the Journal of the proceedings of the legislative day of Monday, January 10, 1921, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

SENATOR FROM IDAHO.

The VICE PRESIDENT. The Chair lays before the Senate the certificate of the appointment by Gov. D. W. Davis, of Idaho, of FRANK R. GOODING as a Senator from that State to fill the vacancy caused by the resignation of JOHN F. NUGENT. The certificate will be read.

The certificate was read and ordered to lie on the table, as follows:

STATE OF IDAHO,
OFFICE OF THE GOVERNOR,
Boise, January 8, 1921.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Idaho, I, D. W. Davis, the governor of said State, do hereby appoint FRANK R. GOODING a Senator from said State, to represent said State in the Senate of the United States until the vacancy therein caused by the resignation of JOHN F. NUGENT is filled by election, as provided by law.

Witness his excellency our governor and our seal hereto affixed at Boise this 8th day of January, in the year of our Lord 1921.

[SEAL.] D. W. DAVIS.

By the governor:

Attest:

ROBERT O. JONES,
Secretary of State.

SENATOR FROM CALIFORNIA.

The VICE PRESIDENT laid before the Senate a certificate of the governor of California certifying to the election of SAMUEL M. SHORTRIDGE as a Senator from that State for the term of six years, beginning March 4, 1921, which was read and ordered to be filed, as follows:

STATE OF CALIFORNIA,
Executive Department.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 2d day of November, 1920, SAMUEL M. SHORTRIDGE was duly chosen by the qualified electors of the State of California a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1921.

In witness whereof I have hereunto set my hand and caused the great seal of the State of California to be hereto affixed at the State capitol in the city of Sacramento this 6th day of December, the year of our Lord 1920.

[SEAL.] WM. D. STEPHENS,
Governor of the State of California.

By the governor:

FRANK C. JORDAN,
Secretary of State.

FINAL ASCERTAINMENT OF ELECTORS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of State, transmitting, pursuant to law, certificates of the governors of Alabama, Arizona, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, New Jersey, New Mexico, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming, of the final ascertainment of electors for President and Vice President in their respective States at the election November 2, 1920, which were ordered to lie on the table.

GRAIN TRADE.

The VICE PRESIDENT laid before the Senate two communications from the chairman of the Federal Trade Commission, transmitting, pursuant to law, reports on "Terminal grain markets and exchanges" and "Future trading operations in grain," being volumes 2 and 5, respectively, of its report on the grain trade, which were referred to the Committee on Agriculture and Forestry.

HORSES FOR MILITARY SERVICE.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, pursuant to law, a report of the expenditures under the appropriation for the encouragement of breeding riding horses suitable for military service, which was referred to the Committee on Military Affairs.

PETITIONS AND MEMORIALS.

Mr. CAPPER presented a resolution adopted by the Chamber of Commerce of Kansas City, Mo., favoring the passage of the truth-in-fabric bill, which was referred to the Committee on Interstate Commerce.

Mr. WARREN presented a telegram in the nature of a petition from Donald Garbutt Post, No. 7, of Sheridan, Wyo., praying for the enactment of legislation to establish a bureau of veteran reestablishment in the Interior Department, which was referred to the Committee on Finance.

He also presented a telegram in the nature of a petition from the Wyoming Wool Growers' Association, embodying resolutions passed by the Wyoming Legislature favoring the emergency tariff bill, which was referred to the Committee on Finance, as follows:

CHEYENNE, WYO., *January 12, 1921.*

F. E. WARREN,
United States Senate, Washington, D. C.

The following joint memorial was passed unanimously to-day by both houses of the Wyoming Legislature:

Be it resolved by the House of Representatives of the State of Wyoming (the Senate concurring), That the Congress of the United States be memorialized as follows:

Whereas the producers of live stock, wool, and farm products are to-day facing almost certain financial ruin owing to the demoralization of the markets for their products coupled with the unprecedented high cost of production of these products; and

Whereas this condition has been brought about largely by the dumping upon our markets of cheaply produced foreign products; and

Whereas this influx of foreign products has been greatly accentuated by the rates of foreign exchange which in effect have placed a bonus upon such importations; and

Whereas the continued production of live stock, wool, and farm products is seriously threatened by these conditions that an emergency exists that is without parallel in the history of this country: Therefore, be it

Resolved, That the Congress of the United States be most earnestly urged to enact without delay the so-called Fordney emergency tariff bill now pending; be it further

Resolved, That the Congress of the United States be urged to provide that in the collection of customs duties the Customs Service shall be directed to compute such duties upon the basis of the normal rates of exchange; be it further

Resolved, That a certified copy of this joint memorial be sent to each of the Members of the congressional delegation of this State in Congress, to the chairman of the committees in Congress to which these measures have been referred, and the President of the United States, with the urgent request that they employ their best efforts to secure the immediate enactment of these measures into law.

WYOMING WOOL GROWERS' ASSOCIATION.

Mr. HARRIS presented petitions of the Georgia State Automobile Association, of Atlanta; the Laurens County (Georgia) commissioners; the Burke County Chamber of Commerce, of Waynesboro; and the Savannah Board of Trade, of Savannah, all in the State of Georgia, praying for the enactment of legislation to continue distribution of Federal aid to rural post roads in the respective States through the Bureau of Public Roads, which were referred to the Committee on Post Offices and Post Roads.

FIRE IN COMMERCE DEPARTMENT BUILDING.

Mr. JONES of Washington. Mr. President, I have a letter in the nature of a petition from which I wish to read a paragraph. It relates to the matter called up the other day with reference to a fire in one of the Government buildings, destroying some Government records. It is from a Government employee whom I know. He says:

You doubtless saw in the morning papers of the fire in the Census Bureau. I am informed by a party employed there that it was fired by a party going through the carpenter shop, where there were some shavings, and threw down a stub of a cigarette, and that the estimated damage is $50,000; but it will cost three times that to replace the damage done.

Yesterday in the Land Office as I was going to take the elevator to descend a young man in passing flipped a cigarette stub into a truck basket that had a few scraps of paper and set them on fire. I, seeing it, put it out.

Since I last saw you I have made further inquiry as to the damage done within the last 15 months. It will require more than $600,000 to replace the damages the Government has sustained by smoking in the several departments in the District of Columbia. It has cost not less than $250,000 in loss of time taken by the employees alone, not saying anything of the very great discomfort it has been to the other employees who do not smoke.

I understand that an investigation is being made, and I wish to call the letter to the attention of the Senators who are making the investigation.

Mr. SMOOT. I will say to the Senator from Washington that I have an investigation on foot at the present time with a view of trying to learn just what caused the fire in the Commerce Department Building. I hope to have the report in a very few days.

I will also state that I expect by to-morrow, if possible, if I can get the time this evening to prepare it, to introduce a bill to prohibit smoking in any of the departments of the Government during working hours. I am quite sure from the investigation which has been made casually, as I said the other day, that the last four fires in the departments of our Government have been caused by the dropping of lighted stubs of cigarettes.

REPORTS OF COMMITTEE.

Mr. CURTIS, from the Committee on Indian Affairs, to which was referred the bill (H. R. 517) amending an act to provide for drainage of Indian allotments of the Five Civilized Tribes, approved March 27, 1914 (38 Stats., 310, Public No. 77), reported it favorably without amendment, and submitted a report (No. 682) thereon.

He also, from the same committee, to which was referred the bill (S. 808) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in the Osage civilization-fund claim of the Osage Nation of Indians against the United States, submitted an adverse report thereon, which was agreed to, and the bill was postponed indefinitely.

UMI

FOREST EXPERIMENT STATION IN COLORADO.

Mr. PHIPPS. I introduced on December 16 the bill (S. 4676) to maintain the forest experiment station in the State of Colorado, and it was referred to the Committee on Appropriations. I ask that that committee may be discharged from the further consideration of the bill and that it be referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. Without objection, it is so ordered.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 4831) validating certain applications for and entries of public lands, and for other purposes;

A bill (S. 4832) to amend an act authorizing the purchase of certain public lands of the United States; and

A bill (S. 4833) providing for the reservation of certain lands in Utah for two bands of Paiute Indians; to the Committee on Public Lands.

By Mr. WALSH of Montana:

A bill (S. 4834) for the consolidation of forest lands within the Gallatin National Forest, and for other purposes (with accompanying papers); to the Committee on Public Lands.

By Mr. BRANDEGEE:

A bill (S. 4835) granting a pension to Jennie C. Gorton (with accompanying papers); to the Committee on Pensions.

By Mr. SPENCER:

A bill (S. 4836) for the relief of C. W. Struckmeyer; to the Committee on Claims.

A bill (S. 4837) granting a pension to Andrew Kurtz; and

A bill (S. 4838) granting an increase of pension to George Nash (with accompanying papers); to the Committee on Pensions.

By Mr. CALDER:

A bill (S. 4839) to amend sections 4402, 4404, and 4414 of the Revised Statutes of the United States, to classify and provide salaries for officers and clerks of the Steamboat-Inspection Service; to the Committee on Commerce.

By Mr. BECKHAM:

A bill (S. 4840) to amend section 1274, Revised Statutes of the United States, relating to the retirement of officers of the Army, and to promotion before retirement of officers whose promotions were withheld solely on account of physical disability; to the Committee on Military Affairs.

By Mr. TOWNSEND:

A bill (S. 4841) to amend paragraph (g) of section 204 and paragraph (g) of section 209 of the transportation act, 1920; to the Committee on Interstate Commerce.

By Mr. UNDERWOOD:

A bill (S. 4842) for the relief of John M. Green; to the Committee on Military Affairs; and

A bill (S. 4843) to amend section 300 of an act entitled "An act to authorize the establishment of a Bureau of War Risk Insurance in the Treasury Department," approved September 2, 1914, as amended; to the Committee on Finance.

By Mr. LA FOLLETTE:

A joint resolution (S. J. Res. 246) relative to deferring sanction of the United States Government to any binding agreement concerning foreign loans to Great Britain; to the Committee on Finance and ordered to be printed in the RECORD, as follows:

Whereas the British Government has designated Sir MacKenzie Dalzell Chalmers as special commissioner to meet with officials of the Government of the United States and discuss the question of the deferred interest payments on the loan which the United States made to Great Britain; and

Whereas the interest on this loan amounts to $470,000,000 per year; and

Whereas no payments of interest have been made by the British Government since April 19, 1919; and

Whereas administrative officers have assumed authority to grant an extension of time for all interest payments until 1922; and

Whereas it is currently reported that the present administration will prior to March 4, 1921, assume authority to further defer the liquidation of this accumulating obligation and extend the interest payments over a long period of years; and

Whereas the estimated gross deficiency in the general fund on June 30, 1921, will be $2,005,037,119.67, which does not include the amount of $650,000,000 to be paid to the railways: Now, therefore, be it

Resolved, etc., That the Secretary of the Treasury and the Secretary of State be, and they are hereby, requested to take no action which shall bind the Government of the United States to any agreement concerning said indebtedness and the interest payments thereon until the same shall have been submitted to the Congress of the United States for its approval.

AMENDMENTS TO SUNDRY CIVIL APPROPRIATION BILL.

Mr. ROBINSON submitted an amendment proposing to increase the limit of cost for the completion of the Government free bathhouses at Hot Springs Reservation, Ark., to $275,000; to appropriate $60,000 for labor, material, supervision, etc., for said bathhouses, and in addition thereto to authorize the expenditure of $25,000 from the revenues of Hot Springs Reservation for the same purpose, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CULBERSON submitted an amendment proposing to appropriate $35,000 for a water-storage tank with steel tower, etc., and small laboratory building, etc., at Galveston (Tex.) quarantine station, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. HARRIS submitted an amendment proposing to appropriate $500,000 for cooperative work with the States for the use of their respective boards or departments of health in the prevention, control, and treatment of venereal diseases, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had this day approved and signed the joint resolution (S. J. Res. 237) to enable the Secretary of the Senate and the Clerk of the House of Representatives to pay the necessary expenses of the inaugural ceremonies of the President of the United States on March 4, 1921.

RELIEF OF DISTRESS ABROAD.

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, ordered to lie on the table and to be printed in the RECORD, as follows:

To the Senate:

I transmit herewith a preliminary report by the Acting Secretary of State, in response to the Senate's resolution of January 3, 1921, requesting the Secretary of State to obtain "accurate information as to the actual conditions and the needs and necessities of the women and children of the various distressed nations, countries, and dependencies," and to ascertain, if possible, what the various Governments in which such suffering exists are doing looking toward its alleviation.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, January 13, 1921.

The PRESIDENT:

The undersigned, the Acting Secretary of State, to whom was communicated the resolution adopted by the Senate on January 3, 1921, requesting the Secretary of State "to obtain at once through the consular or other official representatives of the United States in foreign lands accurate information as to the actual conditions and the needs and necessities of the women and children of various distressed nations, countries, or foreign dependencies, and transmit the same to the Senate at the earliest possible moment," and, further, "to ascertain, if possible, and report to the Senate what the various Governments in which such suffering exists are doing looking toward the alleviation of such distressful conditions," has the honor to report that immediately upon the receipt of the resolution instructions were sent by cable to the appropriate officers of the United States in Europe calling upon them to furnish by mail, promptly and as fully and accurately as possible, the information sought by the resolution, and to send short telegraphic summaries. These reports and summaries will be furnished to the President for transmission to the Senate as they arrive.

In the meantime, the undersigned has the honor to lay before the President, with the view to their transmission to the Senate if his judgment approve thereof, paraphrases of telegrams containing information pertinent to the resolution which certain of the missions forwarded on reading of the Senate resolution in the foreign press.

Respectfully submitted. NORMAN H. DAVIS.

Inclosures: From the American minister at Warsaw, telegram, January 7, 1921. From the American commissioner at Berlin, telegram, January 7, 1921. From American commissioner at Vienna, telegram, January 8, 1921. From the American representative at Riga, telegram, undated.

DEPARTMENT OF STATE,
Washington, January 11, 1921.

[Telegram from American commissioner, Berlin, dated Jan. 7, 1921, received Jan. 8, 12.40 p. m.]

JANUARY 7, 3 P. M.

SECRETARY OF STATE,
Washington:

I understand that the Senate has adopted a resolution requesting the State Department to furnish it a statement as to

the truth of representations being made by the American relief administration regarding the needs of the children of Europe. By personal observation and by thoroughly reliable reports I am convinced that a large proportion of the children in all the large cities in Germany are seriously underfed and that a continuation of this relief work is essential to save the life and preserve the health of an entire generation. This applies not only to the children of the very poor and of the working classes but also the children of employees and officials on fixed salaries, and I know of one cabinet minister who is constantly worried over his inability to obtain a sufficient supply of milk for his own children. From motives of common decency I am constrained to give presents of flour and milk to the children of employees of the commission even though they are receiving more than normal wages. No other charity is so well known in Germany nor has such a deep feeling of gratitude to America. To discontinue this relief would undoubtedly cause widespread discouragement and greatly increase social unrest. To see his children underfed and suffering would turn the most self-respecting and patient workman to communism.

DRESEL.

—

[Telegram from American minister, Warsaw, dated Jan. 7, 1921, received Jan. 9, noon.]

I am informed that the Senate has adopted a resolution asking the department for information as to the need for relief work among the children of eastern Europe. In the ordinary course I should await an inquiry from the department before offering my opinion on this subject, but the matter is of such vital importance that I venture to submit my impression without delay. I have carefully followed the relief work in Poland for the past two years and wish to assure the department that the continuation of the relief work for children on the present scale is absolutely necessary to avoid widespread starvation. I am the first to believe that not one dollar of American money should be expended for relief in countries able to take care of their own and that every appeal should be closely scrutinized from this point of view. Proof should not only be given of the necessity of relief work but there should also be conclusive evidence to show that the Government and the people are doing their utmost to remedy the situation. So far as Poland is concerned the Government and the people are straining every resource to meet this responsibility in spite of the difficulties of exchange which is now at the rate of over 700 marks to the dollar, thus making purchases abroad almost impossible. They are unable to provide even the minimum for the maintenance of the children. American aid has been generous, but it is to be noted that we do not maintain the Polish children but merely seek to supply the necessary supplement between what the Polish themselves can provide and the minimum necessary for the preservation of life and health. Aside from the humanitarian question which is involved, it is plain that the work contributes greatly to the maintenance of public order and toward the reestablishment of normal life among the people who have withstood the insidious appeal of subversive doctrines through more than six years of suffering and privation. It must also be remembered that the maintenance of peace, orderly government, and commerce in the future is greatly dependent upon the mental and physical soundness of the coming generation.

GIBSON.

—

[Telegram from American commissioner, Vienna. Vienna via Paris, dated Jan. 8, 1921. Received 9th, 3.13 p. m.]

SECRETARY OF STATE,

Washington, D. C., January 8, 6 p. m.:

Upon the request of the Vienna representative of the American Relief Administration, I am giving the department my views on the value of the work which is being done by his organization. It is feeding daily in Austria approximately 300,000 children. If on account of lack of funds this work should cease in midwinter, the result would be great suffering and its stabilizing influence, which is greatly needed at this time, would disappear. There is danger that the people may lose their incentive to labor if the work of this organization is carried on too long, but until the State can obtain raw material and coal which will enable it to start its factories it is well that this organization can provide food for the children of the working class. The crown is at present worth about one-seventh of a cent as against a prewar value of 20 cents, and this condition makes it impossible for Austria to purchase from abroad anything more than the barest necessities. Under these circumstances I feel very strongly that for the present this humanitarian work should be continued, but that it should be clearly impressed upon the beneficiaries that such help is merely a temporary expedient, and it is expected that the need for relief will diminish as the industries revive.

FRAZIER.

—

[Telegram from American representative at Riga.]

The American Relief Administration is planning to reestablish its child-feeding work in Finland, Lithuania, Esthonia, and Latvia. The need for this work is very great and it should assist materially in stabilizing internal conditions.

YOUNG.

ADDRESS BY SENATOR PHIPPS.

Mr. TOWNSEND. I ask unanimous consent to have printed in the RECORD an address by the Senator from Colorado [Mr. PHIPPS] before the Keystone Automobile Club, of Philadelphia, on the 7th instant, with reference to good roads.

The VICE PRESIDENT. Without objection, it is so ordered. The address is as follows:

GOOD ROADS.

Address delivered before the Keystone Automobile Club at the Academy of Music, Philadelphia, on the evening of January 7, 1921, by Hon. LAWRENCE C. PHIPPS, United States Senator from the State of Colorado.

"Mr. Chairman, ladies, and gentlemen, having been born and raised in Pennsylvania, making my home here for many years, I shall always have the highest regard for the old Keystone State. Although during my residence I was a citizen of Pittsburgh, I have the most kindly feeling for the good people of the City of Brotherly Love, among whom I still retain many personal friends. Therefore in addressing you this evening I come not as an entire stranger but rather as an acquaintance returning after a long absence.

"Your committee has accorded me the privilege of expressing some of my views on the important topic of good roads, and I deeply appreciate this honor.

"The subject of road building is one which has been given serious study by every progressive people on earth since the earliest days of history. Perhaps the most outstanding example of nations which built permanent roadways is that of Rome, and it is possible to-day, or at least was possible as late as the year 1912, to drive an automobile over the original roadbed of the old Appian Way constructed by those wonderful people during the early years of the Christian era.

* * * * * * *

"While it has not been my privilege to travel in India, I have been informed that the principal roadways of that country are of a permanent type and well adapted to modern traffic.

"For several years, beginning in 1902, I made annual visits to France for the principal purpose of motoring through that attractive country, and the superior manner in which the French highways were maintained never ceased to be a wonder of exceeding interest to me.

"As I recall the French system, their roads are divided into three classes: First, the national routes, built and maintained by the general Government; second, the departmental roads, constructed and kept up by the various departments, which are in a political sense comparable to our States; third, the communal or district roads, which belong to and are kept in order by political divisions of country like our counties. This French system has always appealed to me as the model which should be followed by the United States and particularly with regard to the matter of maintenance, which is cared for through the labor of organized road gangs that are employed every day of the year, just in the same manner that our great railways care for their roadbeds by section gangs. When not employed in the direct work of paving or repairing the macadamized highways the men are kept busy preparing broken stone to be used for the next resurfacing. No doubt the splendid road system of France served a good purpose during the Great War, although it may have been shown that much of the roadway was not substantial enough to withstand the unexpected heavy travel of war munitions and supplies.

"The English roads are also of substantial type, but England has comparably less mileage of national routes, and their roadways, while of good surface, are generally narrow and winding.

"Much improvement has no doubt been made during the recent years in both of these countries. I noticed on my latest trip in 1912 that France, like England, was commencing to protect the macadam foundations with asphalt or heavy oils.

"In our country we have been so desirous of building new roads and extending mileage that not enough attention has been given to maintenance. There are probably sections or even States where this criticism would not apply, but from personal observation I feel justified in saying that, as a rule, we have invested too little money in upkeep or repairs as com-

pared to the annual expenditure for new construction. We have been prone to open up new roads at heavy expense, then leave them to the traffic and the elements until they have gotten into that state of broken surface which involves unusual cost for resurfacing. I believe that our people are beginning to realize the necessity for keeping regularly organized road gangs at work on our highways at all seasons of the year.

"At this point I want to mention the very excellent system of road marking generally used in France and which is now being used very extensively in this country. To the average automobilist the sign 'danger' means nothing and is disregarded because it conveys no definite information, whereas a well-known mark indicating a curve, a railway or road crossing, a hill or bridge, and in rare cases a drain or gutter serves as adequate warning.

* * * * * * *

"The problems of efficient road construction are not all of the past, nor have they yet been solved, because new conditions are momentarily calling for more suitable construction. Roadways which were adequate for the traffic of 10 years ago are to-day breaking down under the heavy traffic which passes over them. Formerly an ordinary type of macadam road was ideal for general country use, whereas to-day we must resort to more expensive type of construction, including heavy wear and weather-resisting surface. Even the type of subsoil upon which the foundation is laid must be studied to determine if special treatment is necessary. The natural tendency is to adopt a more and more expensive type of construction for our roads, and like every other movement danger lies in the probability of its being carried to an unnecessary degree.

"Instead of building all of our roads so that they will withstand the heaviest possible traffic that can be put upon them, is it not possible to place a limit on the weight of loaded trucks, to limit the speed at which they may travel, and to prescribe the width and type of tires according to the weight of the load which they are designed to carry?

"It is also possible to expend too much money in endeavoring to shorten the mileage or reduce grades to a minimum, and there is also a tendency to make the highway wider than is justified by the traffic it must carry.

* * * * * * *

"The movement for Federal activity in the matter of good road building was crystallized in the Shackleford Act, which became a law on July 11, 1916, carrying total appropriations of $85,000,000, of which amount $10,000,000 was assigned for use in constructing roadways in the forest reserves and the remaining $75,000,000 to be expended dollar for dollar of State funds available for use in the construction of highways. The allotment for the fiscal year ending June 30, 1917, was $5,000,000, the annual appropriation to be increased by an additional amount of $5,000,000 each year until 1921, inclusive, when it aggregates the sum of $25,000,000.

"The money has been allotted to the various States based one-third upon area, one-third upon State population, and one-third upon mileage of rural delivery routes and star routes. The appropriations are safeguarded by customary provisions, including the approval of the Secretary of Agriculture on all projects submitted by the States for Government aid.

"The Post Office appropriation bill of 1919 carried, under similar conditions, additional appropriations of $50,000,000 for the year ending June 30, 1919; $75,000,000 for the year 1920; and $75,000,000 for the year ending June 30, 1921, for expenditure in matching State appropriations dollar for dollar; also an additional amount of $9,000,000 for the construction of roads in forest reserves; and in this bill the limit on Federal contribution was raised from $10,000 to $20,000 per mile of road.

"The general plan upon which the Shackleford bill and the act of 1919 is based has not worked out as satisfactorily in practice as had been anticipated by the proponents of these measures. The requirements of an equal proportion of State funds to match the Federal aid results in leaving little, if any, money in the road funds of the State available for needed upkeep and the development of secondary or tributary roads. This is particularly true in the Western States.

"Construction of the roads, after approval of the projects by the Federal authorities, is under the direct supervision of the State highway board, and the tendency has been to devote attention almost exclusively to local interests without any reference to the highways of other States which should afford connections as parts of national routes.

"There is unavoidably a strong influence always at work in every community which might possibly be reached by a main thoroughfare to have that roadway built right through the center of the particular town or village, whereas in the majority of cases it would be much better for the community itself if it would construct a short connecting road, thus avoiding the annoyance and ever present danger of through traffic, while at the same time obtaining the advantages of shorter length and better grade for the main route.

"The Federal aid plan does not restrict the application of the funds to the construction of main or through routes. Many expenditures for new roads are made without any reference whatever to national thoroughfares. Much of the construction is of inadequate type and not substantial enough to stand up under the ordinary traffic. When the choice and determination of routes is left to local highway officials they are apt to be too strongly influenced by local needs. The shortest and most economical routes for new roads will be departed from in order that they may pass through every small settlement, village, or town to meet the requests of their inhabitants. Direct routes with minimum grades should be developed and the necessary connecting short stretches constructed by the town or village requiring the connection.

"It has been estimated that the expenditures for highway construction for the year 1920 in the United States amounted to about $600,000,000, and the indications are that at least this rate of expenditure will be continued.

"It seems to me that we should adopt a system of national routes or highways which would be designed to carry the principal traffic between the largest centers of population in the various States and that these roads should be constructed and maintained by the Federal Government; that they be supplemented by State roads built and maintained by the States themselves, which roads would in turn be fed by the county or township roads built and maintained by the various towns and communities within the States.

"The provisions of the Townsend bill seem to me to meet most of the objections which have been raised to existing Federal laws, yet it is frankly admitted by the author of this bill that it has not yet been perfected, that it must include proper provision for the construction of highways in the forest reserves and possibly other amendments.

"The principal provisions of this bill include the establishing of a Federal highway commission composed of five commissioners, appointed by the President at annual salaries of $10,000, which commission shall have authority to establish, construct, maintain, improve, and regulate a national system of highways composed of connecting interstate roads, which shall, by the most practicable routes and with due consideration for the principal centers of agricultural and industrial production, afford ingress to and egress from each State and the District of Columbia. The system may include highways to and from important water ports and those connecting at the border with main highways in countries adjoining the United States.

"The commission shall determine and select the highways which are to become a part of the national system and the order in which they shall be constructed. Within two years the commission shall publish maps showing the highways it has selected and follow same with annual publications.

"National highway mileage in each State shall equal 1 per cent of the total highway mileage actually used as such in the State, and where such 1 per cent will not suffice to afford at least two national highways connecting with national highways in adjoining States the mileage shall be sufficiently increased to provide two such highways.

"The rule for rights of way provides a width of not less than 66 feet and a wearing surface of not less than 20 feet.

"Upon installation of the commission it would have transferred to it all of the powers and duties now exercised by the Secretary of Agriculture under the Federal aid act, which would involve the transfer of personnel, equipment, etc., now engaged in highway work.

"The proposed bill carries appropriations amounting to $425,000,000, of which $50,000,000 would become immediately available, $75,000,000 for the following fiscal year, and $100,000,000 for each of the three succeeding fiscal years. Five per cent is the limit which may be expended for administration, and the commission is authorized to set aside a sufficient amount for maintenance, after which the remainder of the appropriation for each fiscal year is apportioned among the different States in the same ratio that the mileage selected in each State bears to the total mileage selected in all States, the appropriations to remain available for five years.

"Hearings on the general subject of good roads were conducted by the Senate Committee on Post Offices and Post Roads, of which Senator TOWNSEND is chairman, during the first half of last year, and at these hearings very valuable information was obtained from witnesses who had been interested in road building in many different States of the Union. The consensus of opinion undoubtedly was that the method of Federal aid which

we have been following is inefficient and should be abandoned, and that the only possible way by which we may solve the road problem in a practical businesslike way is to provide for a system of national highways under the control and supervision of national authority, such national system to be supplemented by separate State systems under the entire control of the State authorities, leaving it to the counties to construct their own systems of connecting roads. The testimony indicated the general feeling that the piecemeal system of construction now in use never would give us proper through routes or even interstate routes, and that attempts to develop roads by first building local roads would end in ultimate failure.

"Upon being asked why he preferred the Townsend bill to the present Federal plan, one witness testified as follows: 'Because I believe it would be the beginning of the construction of roads beginning somewhere and going somewhere; that it would mean the construction of continuous roads instead of undertaking to build them by piecemeal or patchwork.'

"One correspondent of mine expressed his opinion that 'it would be absolutely necessary to have a national commission, whose duties should be the laying out of an interstate system of highways, the prime object of which should be the care of interstate traffic without any consideration whatever as to local matters,' and that 'in laying out such a system, I think the controlling factor should be a shorter distance, careful consideration being given to physical conditions. Miles should be saved wherever possible for through traffic, as every added mile to a road means 15 to 20 cents to each vehicle.'

* * * * * * *

"From the last figures available, the appropriations of 1916 and 1919 amounting, aside from appropriations for forest roads, to $275,000,000 less 3 per cent deducted for administration purposes, leaving $266,750,000 for distribution, showed that, as of November 30, 1920, allotments of something over $141,000,000 had been actually made, leaving over $125,000,000 still available in the Public Treasury. As against this, however, some additional projects have been filed for approval, so that the balance above quoted has probably been now reduced to something like $72,500,000, which should much more than meet all requirements for the next fiscal year.

"In the light of this situation it would not appear necessary for the Federal Government to make any further appropriations for the purpose of matching State dollars available during the fiscal year ending June 30, 1922, in case it were finally decided to continue that plan instead of adopting the national policy outlined in the Townsend bill.

"It is my hope and expectation that further hearings will be conducted by Senator TOWNSEND'S committee in the near future, and that they will result in recommendations to the Congress that will insure the construction of a national highway system under appropriations made available commencing July 1, 1922.

"I can not too highly commend the activities of the Keystone Auto Club and kindred organizations which have accomplished so much in the development of public highways.

"May your continued interest and effort yield ever increasing harvest for the lasting benefit of all the citizens of our beloved Republic."

ADDRESS BY SENATOR POMERENE.

Mr. KING. I ask unanimous consent to have printed in the RECORD the address delivered last night by the senior Senator from Ohio [Mr. POMERENE] before the Chamber of Commerce of Cincinnati. It relates to pertinent subjects of the hour, taxation and post-war problems, and is a very able consideration of those subjects.

The VICE PRESIDENT. Without objection, it is so ordered.

The address is as follows:

SOME OBSERVATIONS ON BUSINESS ADJUSTMENT.

"Every great war brings its disasters. The magic wand has never been found which, immediately upon the signing of the armistice, could restore the normal conditions of the prewar period. This is true as to any war. It is especially true of the world cataclysm such as we have passed through.

"Think of it. Nearly all the great civilized countries of the world in actual fighting all or the greater part of the time from August 4, 1914, to November 11, 1918; and our own country from April 7, 1917, to November 11, 1918.

"The world had in arms probably 40,000,000 men; our own country, in the Army and Navy and Marine Corps, more than 4,000,000. During this period every human energy of all these great nations was bent toward the winning of the war. The activities of peace were forgotten. The question uppermost in the minds of men and women everywhere was not 'What is the cost?' It was quantity and quality and quickness of delivery of supplies that we wanted. Cost was a secondary consideration.

"The war activities cost the world between two hundred and fifty and three hundred billions of money, a sum equal to if it does not exceed the total wealth of the United States. All of these supplies were consumed in fighting, or if not consumed, the remnant was of comparatively little value in the processes of peace. Most of this debt is unpaid. The entire world staggers under it.

"During the war Europe came to America for a large part of her supplies. Not firms nor individuals alone, but the Governments of Europe were the buyers. They paid for what they bought—not reasonable prices, but the prices asked. And when the United States entered the war our Government, too, had to pay for its purchases largely the prices asked, and those who had supplies to sell were influenced in making their demands largely by the prices the sellers got or were getting from the Governments of the Old World. It can not be said truthfully that any one man or set of men was to blame. It was the result of an unhealthy psychology that existed everywhere. It was contagious. If I were addressing an audience of producers anywhere—except in Cincinnati—and were to admonish them in advance that I was going to hit the man on the head who got too much for what he sold, two-thirds of the audience would duck their heads. I do not say this in a fault-finding way. I speak of it only as a condition which prevailed and for which no one man but the public generally was responsible. As the result, there were swollen profits accruing to everyone interested directly or indirectly in furnishing war supplies.

"Prices advanced. It required more money to do the same amount of business than before the war. European countries, under the stress of financial conditions, expended their currency beyond the limit of safety.

"In the United States we, too, were compelled to expend the volume of our currency. In 1896 our per capita circulation was $21.44. In 1914 it was $34.35. In 1917 it was $45.74. On January 1, 1921, it was $59.12. The United States had the larger part of the gold—the world's money for ultimate redemption. In Continental Europe their supply was drained almost to the dregs.

"So long as there was an upward trend of prices, and an opportunity to borrow in unlimited amounts, men everywhere—except those of sound discretion—continued their borrowings, forgetful of the fact that there can not always be an upward trend and that pay day must come. And it is here.

SOME OBSERVATIONS ON BUSINESS ADJUSTMENT NO. 3.

"Prudent men took in sail. Reckless and avaricious men, misled by creed or greed, threw prudence to the winds and unfurled more sail. The war which was the cause of high prices ended. Europe and the United States stopped their purchases of military supplies. This meant the cutting off of purchases by foreign Governments, not only of military supplies, properly so called, but of food and clothing for both military and civilian population as well. Every observing man ought to have known that the increase of prices beyond a given point always leads to curtailed consumption, throws men out of employment, and leaves in the lurch those who have supplies on hand that were made out of high-priced material and high-priced labor.

"The law of economics can not be changed permanently by any law enacted by the Congress or a Parliament. It is only when the law of supply and demand ceases to function that legislation can give even temporary relief, and such legislation should be resorted to only in time of war. Little can be done in this behalf in time of peace through the medium of legislation. And, yet, there are men, both in the Congress and out of it, who in their efforts to repeal or modify this natural law, approach our Federal Reserve Bank System as poor, blind Samson of old approached the temple to pull down its pillars. They forget that while Samson succeeded in pulling down the pillars he wrecked the temple and destroyed his own life.

DECLINING PRICES.

"It necessarily follows that when prices have reached their peak and begin to fall, the value of all products—whether of factory or farm—begin likewise to decline, and the law of supply and demand will take no account of the fact that they were made out of high-priced material and high-priced labor. The manufacturer who has his stock bins full of finished products made out of high-priced material, at high wages, is in identically the same position as the farmer with granaries filled with his high-priced products, or the stock raiser with his flocks or herds fatted on high-priced feed. Shrinking values are no respectors of persons, and in spite of anything the Government can do values will shrink when demands fall off.

SOME OBSERVATIONS ON BUSINESS ADJUSTMENT NO. 4.

"The Government can not guarantee prices in time of peace. It can not insure values. It ought not to attempt the impossible for one class unless it does for all classes. Paternalism by

Government in our involved situation seems to some extent to be necessary; but it does not follow that paternalism should monopolize the field of financial or industrial activity.

"If a man produces steel at excessively high prices and the market declines, certainly he has no right to ask the Government to make good his losses. If a man invests his savings in railway or other securities when values are normal, certainly he ought not to ask the Government to guarantee him against declining prices, even though they were caused by the mismanagement of some theorists representing the Government. If this position be sound, can a stock raiser who paid $25 for a ewe when he thought prices were going to advance, and they declined instead, expect the Government to make him whole because he made a wrong guess as to the market? If a man raised wheat at an exceptionally high price for seed and labor, expecting $3 a bushel therefor, can he expect the Government to make good his losses if falling prices should wipe out his margin? If the cotton planter could get 40 cents a pound for his cotton, which was the case some months ago, and he held it expecting 50 cents a pound, ought he to ask the Government to make good his losses if it declined to 14 or 15 cents a pound? Men from the South opposed the fixing of the price of cotton during the war when prices were advancing. They later saw it go up to 40 cents a pound, and when it began to fall they came to Washington and demanded that the Government fix the price at 40 cents a pound. Men from the West who were opposed to the fixing of any prices for wheat during the war, except a minimum guaranty to encourage production, demanded that it be fixed at $3 when it began to decline.

"It is distressing to see men lose money; but the Government can not stand sponsor for men, no matter what their avocation, who have misjudged economic prospects. Men who have eyes must see. Men who have ears must hear. And men who have understanding must understand, or the consequences will recoil on their own heads. Even if the Government could do these things, is it right to make the toiling masses pay these excessive prices for bread and clothing?

"The manufacturer who is forced to sell his output on a declining market is in an unfortunate position. The farmer is in a worse plight because, as a rule, his business is not so liquid, and he can make his turnover only once each year. But worst of all is the laboring man who is out of a job because the wheels of industry have stopped or checked down. He and his family may be brought to the bread line. Let those who are constantly asking for legislation to increase the price of food and clothing take pause and give thought to the men who are out of work and who must pay these higher prices or go hungry and naked.

"I do not mean to be understood as taking the position that nothing can be done to aid in the better financing of agriculture. I think something ought to be done. I believe it can be done by the adoption of some system of rural credits, and I hope to help to devise a scheme so to do. But I am speaking now particularly of the fixing of values or the making of forced loans through the Government or banking institutions during the period of declining values. Sound discretion in making loans must control the banks. Sound discretion in the rediscounting of paper must control the Government and its agencies, the Federal Reserve Board and the directors of the 12 reserve banks, as well as of the member banks.

THE FEDERAL RESERVE BANK.

"The Federal reserve bank is not an investment institution. It is what its name implies—a bank for reserves. Its primary purpose is to render flexible our currency system so as to make it respond to the financial demands of the country. This means its reasonable demands—the demands of prudence, the demands of sound finance, not the demands of the speculative spirit. It means that those in authority must be controlled by the 'rule of reason,' whether it be in a period of expansion or of contraction of the currency. Expansion must not go on unduly nor to an unlimited extent, and contraction must not come too quickly. Expansion must not be controlled by the borrower who knows no limit to his demands, and contraction must not be controlled by those who have money to lend. It must be, as it is, in the control of those who can see the financial problem from both sides of the bank counter at the same time.

"Losses by whomsoever sustained are always regretted. If there was any way known to sound policy whereby losses due to declining prices could be prevented I would be most happy to help to secure the remedy. But I am not deceived by the false nostrums which are brought to the Congress by those who can not see beyond the end of their noses, who always are listening to the clamor of professional lobbyists, most of whom have been failures in their own business, but notwithstanding seek to shape the destinies of their country. Right thinking men will not be deceived.

INFLATION AND DEFLATION.

"Most of the things I have said are admitted to be sound by those who have been seeking increased rediscount by the Federal Reserve System. They admit that ultimate deflation will be necessary, but they say it was begun too suddenly and continued too vigorously. The truth is there has been no deflation. The Federal Reserve Board has only checked further inflation.

"For a period some months ago the inflation continued increasingly at an angle of 45 degrees, as shown by the diagrams made. If the Federal Reserve Board had permitted this inflation to have continued for a few months longer, our Federal Reserve Bank System would have been ruined, and we would have been approaching the conditions which prevail in Germany, France, and other countries in Continental Europe. If inflation had continued as demanded by some, our dollar would not have been a 50-cent dollar; it would have been a 25-cent dollar. What the Federal Reserve Board did was not to deflate, but to reduce the angle of inflation from 45 degrees to 2 degrees. Those who want the Congress to direct the Federal Reserve Board to continue the policy of inflation beyond the bounds of safety fail to distinguish between continued inflation at 2 degrees and actual deflation. It may be the Federal Reserve Board has not always done the right thing in the right way; but assuming there are limitations to its ability, and that it has made mistakes, I would rather trust the Federal Reserve Board with the performance of the highly technical duties of administering our finances than to trust the judgment of this or any other Congress. Let us see whether there has been, in fact, any deflation either of currency or of credit.

"First. The per capita circulation has increased almost constantly since 1896, when it was $21.44, until January 1, 1921, when it was the sum of $59.12.

"Second. I think it can be assumed, speaking generally, that the member banks of the Federal Reserve System, as well as the State banks, have extended credits in their communities as far as they could with safety to themselves and their depositors. Certainly there is no evidence that this has not been done. The business interests of bankers would require them to loan their funds out as closely as they could with safety.

"Third. The Federal reserve notes increased from $3,800,878,000, December 31, 1919, to $3,344,686,000, December 30, 1920, an increase during the year of $335,808,000. Between August 27, 1920, and October 29, 1920, the Federal reserve note circulation increased from $3,203,637,000 to $3,351,303,000, or at the weekly rate of 16 4-10 millions.

"Bills rediscounted and held by the Federal reserve banks on December 31, 1919, amounted to $2,215,305,000, and on December 30, 1920, to $2,719,134,000—an increase of $503,829,000. Between August 27, 1920, and October 29, 1920, the Federal reserve bank holdings of rediscounted paper showed an increase from $2,667,127,000 to $2,801,297,000—or at the rate of about $15,000,000 a week. Gov. Harding, of the Federal reserve bank, is my authority for this statement.

"The rediscounts by the member banks in the Richmond district increased from $115,922,000, December 30, 1919, to $122,886,000, December 30, 1920.

"In the Atlanta district from $87,523,000, December 30, 1919, to $168,808,000, December 30, 1920.

"In Chicago from $260,588,000, December 30, 1919, to $475,869,000, December 30, 1920.

"In St. Louis from $74,912,000, December 30, 1919, to $114,218,000, December 30, 1920.

"In Minneapolis from $70,335,000, December 30, 1919, to $96,470,000, December 30, 1920.

"In Kansas City from $108,068,000, December 30, 1919, to $140,180,000, December 30, 1920.

"In Dallas from $29,247,000, December 30, 1919, to $96,596,000, December 30, 1920.

"In San Francisco from $69,950,000, December 30, 1919, to $164,686,000, December 30, 1920.

"These rediscounts in the eight Federal reserve banks which are more closely identified with the agricultural and live-stock interests increased in this one year from $816,615,000 to $1,378,713,000, or a total increase of $562,098,000.

"Fourth. More than this, the three Federal reserve banks at Boston, Philadelphia, and Cleveland have advanced at times as much as $250,000,000 during the past year to seven other Federal reserve banks whose districts are largely agricultural.

"Fifth. Attention has been called to the fact, as evidence of deflation, that the deposits in the New York City banks decreased from November, 1919, to November, 1920, about $1,400,000,000. But over against this fact is the further fact that during the same period the total deposits of the country increased for the fiscal year ending June 30, 1920, over $4,000,000,000. This is at least some evidence that deposits may have been, and

probably were, withdrawn by interior banks in response to the increased demands of their respective localities.

"I recognize that in a public speech it is always tedious to deal with figures, but there has been so much of misrepresentation throughout the country as to the policy of those who are in control of our Federal Reserve System—for the purpose of discrediting it and, incidentally, to get some little applause at home—that I feel common justice will permit the recital of established facts. This is not the time for those who are long on theory and short on knowledge to misrepresent what is being done by our Federal Reserve Bank System for the relief of the whole country. Stabilization should be the slogan of the hour, and not agitation.

"I am firmly of the opinion that the expansion of our currency and our credit has gone almost, if not quite, to the limit. Any further expansion is liable to take us off a gold basis and give us a paper currency. We might go some further and give temporary relief; but the day of reckoning would come with only greater vengeance. We can continue to expand if we will until the American dollar will be worth no more than the French franc, the German mark, or the Russian ruble. But European schemes of finance, due to war conditions, will not be introduced here without at least a word of warning.

"It perhaps is not inappropriate for me to observe that there are 11 States, including the District of Columbia, in which the contract rate of interest is 10 per cent, and 9 States in which the contract rate of interest is 12 per cent; and that a large part of the dissatisfaction with the administration of the Federal Reserve System comes from these States. If those Senators and Congressmen—and I say this very respectfully—who are seeking to take away the safeguards which protect our financial system will go to their home legislatures and persuade them to reduce the rates of interest to a point which borrowers can afford to pay, they will serve their constituencies better than by the course they are pursuing.

"No farmer, manufacturer, or merchant who does a conservative business can afford to pay these high rates. Only speculators can risk paying them. With reduced rates the same amount of interest will carry the loans for a longer time.

"Speaking generally, the remedy for falling prices is not more money or more credit but more and better markets for surplus products. We need them for farm and factories alike. Our home markets can not consume our products. We must sell them in the foreign markets. Owners and producers are not going to improve conditions by holding for an undue length of time their goods when prices are sharply declining, and in some lines threatening to continue to decline. Men who are out of employment can not satisfy their hunger and clothe their nakedness when others have supplies with which they will not part. Hungry men must have work if they are to sustain themselves and furnish their products to those who need them. The difficulty is, in part, due to the fact that those who now have are holding their products because they hope to realize in full the high prices which they paid in the past for raw material or labor or because they still want a profit when losses are in sight.

"Reduced to its final analysis this is the problem: After supplying home demands, how can we sell and transport the surplus, at high prices, for sound dollars, to the people who want it and who have no money and little credit with which to pay for it.

"Our allies already owe us $10,000,000,000 for borrowed money. In addition to this vast sum the business men of our country have extended to European countries credits to the amount of over $4,000,000,000. They do not have the gold with which to pay their debts to us. We will not take their cheap dollars in return for our good dollars. They can not pay their debts to us in any other way than with their cheap dollars if we do not trade with them. They can not buy and pay for our surplus unless we do trade with them. Europe is our market for our foodstuffs and many lines of manufactured products, and we can not, under present conditions, sell to Europe unless we buy from Europe. Whether we like it or not, we must so deal commercially with these war-stricken countries as to help rehabilitate them both industrially and financially.

"Every thinking man who has studied economic conditions must realize that the period of high prices through which we have been going can not continue forever. Readjustment must come. There must be reductions. Abnormal prices result only from abnormal conditions. War alone made them, and war alone can keep them up. They can not and they ought not to continue during peace times. Applying the situation to ourselves: More than four million men who were in the military service have reentered the activities of peace. Many more millions stopped the production of war supplies, which are useless in time of peace, and directed their attention to the products which are in demand by our consumers in normal peace times. These statements are not new to economic students. And yet many organizations, and some farmers' papers, immediately after prices began to fall advised the farmers to hold onto their products until higher prices would come. No doubt their readers were persuaded by these statements in their farm papers to hold on, with the result prices decreased from day to day instead of advancing.

"The decline is charged by some to be due to speculation in farm products, and I have no doubt this charge is in part true. But it is not the whole truth. The farm papers and organizations that advised their readers and members to hold for higher prices must share their responsibility, in part, for the losses sustained.

"To illustrate: The editor of the Nonpartisan Leader, Minneapolis, September 20, 1920, speaking of declining prices, said:

'Farm organizations of Nebraska, Kansas, Oklahoma, and Missouri also are distributing literature showing that the cost of raising wheat in these States is $2.77 per bushel, and urging farmers not to sell until they get that price and enough additional to give them 23 cents a bushel profit. In other words, they urge holding for $3 wheat. This is splendid advice. But how many farmers have storage facilities?'

"Wallace's Farmer, October 8, 1920, says:

'About the only thing the farmer can do under present conditions is to avoid dumping his crop on the market in the time-honored way. The financial and business interests of the country will do everything they can still further to break prices of farm products during the next six months, and the only way the farmer can meet this is by holding back his crops, most of which are already selling at less than the cost of production.'

"The Courier-News, Fargo, N. Dak., October 12, 1920, quotes from the Fargo Forum the following:

'Since you advised the farmers to hold their wheat when it was selling 60 cents to 70 cents higher than it is now, what advice have you now to give to the farmers who followed your previous advice? Should they continue to hold, or should they take their loss and sell out now?'

"And then the Courier-News answers this question in these words:

'Our advice, in one word, is, "Hold!"'

"An examination of agricultural and other papers will indicate that this advice was pretty generally given by those who were advising the farmers. It would be good advice if it saved the farmer. It will prove bad advice if it results in greater losses to him.

"Wheat is now selling at approximately $1.75 per bushel. In September, 1920, when the farmers of Nebraska, Kansas, Oklahoma, and Missouri could have received $2.50 per bushel, they were urged by their organizations to hold their wheat until they could get $3 per bushel. The men who volunteered this advice, which did not take into account economic laws, took upon their shoulders a very great responsibility when innocent and trusting farmers and producers accepted such advice and held for higher prices only to be compelled to make greater sacrifices.

"There are, however, methods by which our marketing conditions, both at home and abroad, can be substantially improved.

MARKETING AT HOME.

"First. We ought to establish a more complete system of rural credits where advances on personal credit can be made under proper restrictions.

"Second. The marketing of farm products can be very greatly improved by the organization of farm cooperative associations, provided they are so managed and controlled as to be equitable and just to both producer and consumer.

"Third. By building up a more extensive system of warehousing, by private enterprise under State or national regulations, providing for the proper grading and classification of farm products and issuing warehouse receipts therefor.

"Fourth. By the organization of a system of banks or financial corporations or associations, especially organized to make loans on these farmers' warehouse certificates, giving them power to issue bonds within reasonable limitations when additional funds are required.

"Whether these plans, if adopted, shall be under national or State control must depend largely upon the holding of the United States Supreme Court as to the constitutionality of the Federal farm loan act.

FOREIGN TRADE.

"First. Our export trade in farming as well as in mining and manufacturing products can be very greatly promoted by the organization of more export trade associations under the export trade act approved April 10, 1918. Prior to the adoption of this law it was believed by merchants and manufacturers, and by some lawyers, that combinations for the purpose of selling abroad violated the Sherman antitrust law. In Europe, and particularly in Germany, France, and England, the practice has been to organize cartels or combinations for the

purpose of buying and selling in the markets of the world. As a result our merchants, prior to the adoption of the export trade act, were compelled to compete with them single handed. In fact, during the early part of the World War the Governments of the Old World, with their unlimited credit, became the buyers, and we had in each of the nations of the Old World but one buyer, and in the United States we had many sellers bidding against one another. To meet this condition the export trade act was passed.

"As you know, this act authorizes persons, partnerships, or corporations, to organize associations for the sole purpose of engaging in export trade. They can combine and thereby extend the operations of our foreign commerce and meet the cartels and combinations of the Old World more nearly on a footing of equality. No longer is it necessary for the individual American exporter to compete with the great aggregations of capital on the other side of the waters unless he chooses to do so.

"That this act is practical in its operations and has improved selling conditions abroad is evidenced by the fact that already under its provisions 43 associations have been organized, representing 732 concerns whose offices and plants are distributed over 43 States in the Union. They sell all kinds of American products. I quote from the annual report of the Federal Trade Commission for the fiscal year ending June 30, 1920:

'From California go out lumber, hardware, chemicals, fertilizer, general merchandise; from Illinois, condensed milk, grain, meat, office equipment, agricultural implements, machinery, lumber; from Wisconsin, cereals, canned goods, forest products; from Michigan, chemicals, cereals, foundry equipment, paper, furniture, meats; from New York and Pennsylvania, locomotives, cement, steel, copper, wood products, machinery, textiles, paper, alcohol, chemicals, cereals, food products, general merchandise; from Massachusetts, textiles, webbing material, copper, paper, valves, pipe fittings, chemicals, cereals, lumber; from North Carolina and the Southern States, canning materials, lumber, phosphates, pipe fittings, meats, locomotives, clothespins, general merchandise.'

"Those who are interested can and should make more extensive use of these associations in their marketing abroad. By so doing they not only can benefit themselves directly, but indirectly can benefit the commerce of the entire country.

"Second. One of the handicaps our merchants had to meet in seeking foreign trade was our lack of banking facilities abroad with which to finance their operations. The Edge Act, approved December 24, 1919, authorizes corporations to be organized to engage in international or foreign banking or other international or foreign operations.

"One such corporation has been organized in New Orleans with a capital of $7,000,000. Another is being organized in New York with a capital of $100,000,000. Other similar organizations are in contemplation. I have every confidence that if the privileges granted by this act are accepted by the commercial, banking, and industrial interests of the country we can very greatly aid our own foreign business to the advantage not only of our own country but of the nations of the world.

"Third. Like assistance at this crucial time can be given by the War Finance Corporation. I am not enamored of the policy of our Government entering upon what may be regarded as strictly private business. But, my friends, extraordinary conditions require extraordinary methods to meet them. The War Finance Corporation did splendid service as long as it continued its operations. True, it was created during hostilities for war purposes. Its general powers were to expire six months after the termination of the war and its special powers with respect to the financing of exports were to expire one year after the termination of war. But one of the serious problems we have is the financing of our export sales. This is not the result of ordinary business conditions. It is the result of war conditions. It may be that in a short while business men will so avail themselves of the powers and privileges of the export trade act and the Edge Act as not to require the assistance of the War Finance Corporation. It may be that its effect will be largely psychological, as I stated upon the floor of the Senate, but whether it is psychological or direct and actual in aiding our foreign trade, it will be beneficial none the less. Viewing it in this light, I favored the resolution reviving the War Finance Corporation and voted to pass it over the veto of the President. The success of the War Finance Corporation is not a legislative problem. It is one of administration. It is essentially a Government owned and operated bank. The Government, by its policies for war purposes, largely absorbed the finances of the country, and my belief is it is not unsound policy to give, temporarily, this aid to the commerce of the country until business can readjust itself.

IN CONCLUSION.

"My friends, in the present condition of unrest in trade and industry I have felt it not improper to make these observations before the Cincinnati Chamber of Commerce. But I would not for the world have you think that I am pessimistic as to the outlook. I am an optimist, I look upon present conditions as one of the results flowing from the world cataclysm and temporary in character. The same fine, indomitable American spirit which prepared for and largely aided in the winning of the World War for civilization and humanity will conquer in the face of present economic difficulties. A little of the spirit of give and take, by producer and consumer, by employer and employee, and a new era will dawn. The preachers of fads and fancies, of unrest and anarchy, may be heard for a little while, but they will melt away before the sober second thought of the country like mist before the rising sun. This is now and always will be the best land in all the world."

REDUCTION OF THE ARMY.

The VICE PRESIDENT (at 12 o'clock and 10 minutes p. m.). The morning business is closed.

Mr. WADSWORTH and Mr. NEW addressed the Chair.

The VICE PRESIDENT. The Senator from New York.

Mr. WADSWORTH. I have no doubt the Senator from Indiana and I have both risen for the same purpose. I yield to the Senator from Indiana.

Mr. NEW. I move that the Senate proceed to the consideration of Senate joint resolution 236.

Th motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 236) directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 175,000.

The VICE PRESIDENT. The pending amendment will be stated.

The ASSISTANT SECRETARY. The pending amendment is the amendment proposed by the Senator from Wisconsin [Mr. LENROOT] to strike out the figures "175,000" wherever they appear in the joint resolution and insert in lieu thereof the figures "150,000."

Mr. McKELLAR. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Tennessee?

Mr. NEW. I yield.

Mr. McKELLAR. The Senator from Wisconsin [Mr. LENROOT] said he would be unable to be here this morning and that he would like to have a yea-and-nay vote on the amendment. The amendment, as the Senator from Indiana knows, proposes to reduce the number of enlisted men. I presume the Senator has no objection to the request of the Senator from Winconsin for a yea-and-nay vote.

Mr. NEW. No.

Mr. McKELLAR. It is purely a question whether we shall reduce the Army to 150,000 instead of 175,000, as provided in the joint resolution. The entire committee was in favor of reducing the Army, but a portion of the committee, among whom was the Senator from Wisconsin and myself, desired the number reduced to 150,000, while a majority of the committee thought that 175,000 would be the proper limit. It will take, I will say, until next September to reduce the number to 175,000, whereas it will take until next January to reduce it to 150,000; but it ought to be reduced to the smaller number, in my judgment. Whenever the pending amendment comes to a vote I ask that the vote may be taken by yeas and nays.

Mr. JONES of Washington. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Gronna	McNary	Smith, Md.
Beckham	Hale	Moses	Smith, S. C
Borah	Harris	Nelson	Smoot
Brandegee	Harrison	New	Sutherland
Capper	Heflin	Overman	Townsend
Culberson	Henderson	Page	Trammell
Curtis	Johnson, Calif.	Phipps	Underwood
Dial	Jones, Wash.	Poindexter	Wadsworth
Dillingham	Kellogg	Ransdell	Walsh, Mont.
Edge	Keyes	Robinson	Warren
Fernald	La Follette	Sheppard	Wolcott
Gay	McKellar	Smith, Ga.	

The VICE PRESIDENT. Forty-seven Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of the absent Senators.

The reading clerk called the names of the absent Senators, and Mr. STERLING answered to his name when called.

Mr. COLT, Mr. GERRY, Mr. FLETCHER, Mr. SPENCER, Mr. GLASS, Mr. FRANCE, Mr. KNOX, Mr. KING, Mr. ASHURST, Mr. SIMMONS, Mr. STANLEY, Mr. WALSH of Massachusetts, and Mr. WILLIAMS entered the Chamber and answered to their names.

Mr. GERRY. I have been requested to announce that the Senator from Missouri [Mr. REED] and the Senator from Oregon

[Mr. CHAMBERLAIN] are detained from the Senate by reason of illness; and also that the Senator from Nevada [Mr. PITTMAN] and the Senator from New Mexico [Mr. JONES] are absent on official business.

The VICE PRESIDENT. Sixty-one Senators have answered to the roll call. A quorum is present. The question is on the amendment offered by the Senator from Wisconsin [Mr. LENROOT].

Mr. McKELLAR. On that question, I ask for the yeas and nays.

Mr. WADSWORTH. Mr. President, I shall detain the Senate for just a moment. This matter was about to be acted upon the other day when the joint resolution had to go over when supplanted by the unfinished business. I have been heartily in favor for some time past of the proposal to stop recruiting in the Army, and to stop it until the Army has been reduced by natural processes to a total strength of 175,000 men. I think that figure is within the zone of safety, and certainly it will afford a tremendous relief to the Federal Treasury. However, I have very serious doubt as to whether it is safe for us to-day to issue a mandate to the War Department to reduce the strength of the Army to 150,000 men. As has been said upon the floor of the Senate, while, perhaps, the world is not so disturbed as it was back in 1916 and 1917, when Congress decided to fix the strength of the Regular Army at 220,000 men, after five annual increments, notwithstanding there is a good deal of disturbance, and it can not be foretold from day to day just what will be required by the United States for its own defense and for the defense of its citizens and its rights.

I would feel more at ease on the situation had it been possible in the short time which has elapsed since the demobilization of the Great War Army to reorganize and reconstitute the National Guard of the several States up to the strength which existed in that branch of the service at the time we went into the Great War. My recollection is that when the Mexican border service had been terminated the National Guard subject to Federal call at any time amounted to about 130,000 men. Since the Army reorganization act was enacted the reorganization of the National Guard has proceeded with fair rapidity, and, I think, in a very healthy manner. I look to see that body of troops become an even better force than it was before we went into the war; all the signs now point in that direction. To-day we have, I think, but 70,000 of them, and several of those units have been very recently organized and have just been Federalized.

So it is fair to say, without casting any reflection upon the National Guard, that it is not yet in the condition in which it was at the time we went into the war, although it bids fair, after a few months have elapsed, to be an even better force than it was before we went into the war. The fact is, however, that we have a bare 70,000 men in that force available for Federal call. I think, therefore, it would be wise for us, under all the circumstances, and in view of some of the situations which Senators can well recall, not to direct the War Department to reduce the only other force which the Government has at its disposal to so low a figure as 150,000 men.

When I urge the Senate to adhere to the number of 175,000 men, let me remind Senators that it will take until September next, in any event, to reduce it to that strength. Congress will be in session, I imagine, nearly all of the time between now and that date; undoubtedly we shall have an extra session this summer, and we shall spend most of the summer in Washington. If, as that date approaches, it seems perfectly safe, in view of all the conditions which may exist at that time, to reduce the strength of the Army still further, Congress may do so. There will be no delay involved in the ultimate reduction to 150,000 men in such a state of affairs. In other words, we can order a reduction to 175,000 men to-day and at any time next summer we can order a further reduction to 150,000 if we find the circumstances warrant it. I think it would be very unsafe, however, to reduce that force at this moment.

Mr. BORAH. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Idaho.

Mr. BORAH. I wish to ask the Senator from New York a question. How did the committee arrive at the conclusion that a reduction to 175,000 men was a safe reduction, but that a reduction to 150,000 men was not? Upon what principle was that decided?

Mr. WADSWORTH. The question of the tactical organization of the Army comes in there and has a very distinct bearing upon the reduction. Under the tables of organization, which have been drawn up pursuant to the Army reorganization act, nine combat divisions are provided for.

Seven of them have been organized in the United States. They do not include the troops that are in the Panama Canal Zone, Hawaii, and the Philippine Islands, as I recall. They are to-day skeleton divisions. Most of the regiments of Infantry have no more than 600 or 700 men in them, although the tables of organization call for over 2,000. The same thing is true of the Field Artillery regiments. Now, if we order a reduction to 175,000 men from the present strength of approximately 224,000 men, I think we will compel the War Department thereby further to skeletonize and probably put upon a purely paper basis two of the seven divisions, leaving five divisions actually ready for use with their combat units. If we should reduce the Army to 150,000 men, I think we would compel the skeletonization and transfer to a mere paper basis two more divisions; and when we do that we reduce the available total in this country to three divisions, and that would be below what is ordinarily considered the strength which is reasonably efficient for active service if they were called upon at a moment's notice to perform active service.

The trouble is, Mr. President, may I say, that the Regular Army to-day is being called upon for service which I think it should not be called upon to perform. Perhaps I ought not to inject this element into the discussion, but the habit has grown in the last two or three years of the governors of States calling on the Regulars to come in and do police duty within the States. As a matter of fact, it is the duty of the States to do their own police duty. To-day I believe there is a considerable body of Regulars in one of the States doing police duty, and apparently they are being called upon more and more to do that, the States rather putting that job over onto the Federal Government and the Regular service.

The question of the tactical organization or the efficiency of the tactical organization has a very close connection with the matter of mandatory reduction and that was one of the considerations which confronted the committee.

Mr. BORAH. Mr. President, the argument which the Senator suggests would be as applicable next September as it is now, would it not?

Mr. WADSWORTH. It would be applicable if the conditions next September were exactly as they are to-day.

Mr. BORAH. The conditions, so far as the Army is concerned, would be the same.

Mr. WADSWORTH. They might not be the same so far as other circumstances are concerned.

Mr. BORAH. That is the point I was trying to get at—whether the question of danger from outside had anything to do with the matter at the present time.

Mr. WADSWORTH. It is difficult for a Senator on the floor and in open session to discuss all the possibilities that may confront the United States; but I think, generally speaking, this Republic at this time would better keep 175,000 men under arms.

Mr. BORAH. The query which occurred to me was, if we should have trouble with any foreign power how much safer would we be with 175,000 men in the Army than we would be with 150,000 men? An army of either figure would amount to very little at all.

Mr. WADSWORTH. On that theory we might reduce the Army to 10,000 men.

Mr. BORAH. The Senator concedes, does he not, that if we should have trouble with a foreign power 150,000 men would be just about as effective as 175,000 men?

Mr. WADSWORTH. I am not anticipating trouble with any foreign power. I have in mind the demands which may come upon the Regular Army to perform what is equivalent to police duty. It has been called upon several times heretofore to perform such duty, and there is a great possibility that it may be called upon in the future to perform similar duty. Of course, the more the Army is reduced the less power it will have.

Mr. FLETCHER. Mr. President, with the Senator's permission, I should like to make a suggestion to him. I believe that there are certain demands now because of which we need enlisted men, particularly with reference to the care of stores. Large quantities of stores have been accumulated, which may eventually be disposed of; but at the present time there are numerous materials of considerable value stored in various parts of the country requiring surveillance and care on the part of the military. Is not that the case, I will ask the Senator?

Mr. WADSWORTH. Unfortunately that is the case. I wish we could get rid of a good deal of it, but apparently the administration has not been able to do so as yet.

Mr. NEW. Mr. President, I am not at all prepared to make the concession conveyed in the question asked by the Senator from Idaho. I do not think that an Army of 150,000 men would be as efficient as a skeletonized organization if called upon in an emergency as would a skeletonized Army of 175,000 men. After very careful consideration of this whole question it is my deliberate opinion that to reduce the Army to 150,000 men would be to cut a little too close to the bone.

I am in entire sympathy with the idea of reducing the size of the Army. The very fact that the joint resolution is here is evidence of that; but, as I tried to point out the other day—and this is what the Senator from Florida had in mind, no doubt, in asking his question—half of the men in each of the corps areas right now are engaged in the care of public property. It is fair to say that in a sense they are not available for emergency duty. The War Department feels that it has not yet had time to dispose of some of the cantonments, the terminals, and warehouses, and all that kind of thing, which calls for the service of a great many of these men—in fact, about 5,000 of them to each corps area. Without undertaking to argue as to whether the War Department has been as expeditious as it might have been in consolidating those depots, the fact remains that that is the condition to-day, and that these men are required to look out for public property and are hardly available for emergency duty should the emergency arise.

For those reasons I felt that 175,000 was the least figure to which we could reduce the Army without impairing its efficiency.

Mr. WARREN. Mr. President, I stand pledged to myself, at least, in the interest of economy, to the cutting down of every expense in which we can safely and reasonably make a cut. I very cheerfully indorse the idea of stopping the recruiting of men until we may reduce the Army to 175,000, but I do not believe that we ought to cut further than that at this time. Therefore I can not support the proposition to cut down the number to 150,000.

The cut made would be a gradual reduction. It is not a discharge of men whose terms have not expired, except in individual cases by request and proper showing; and, as has been so well said by the chairman—and that argument is even stronger than upon first thought; I want to give it further emphasis—in that way we have better control of the situation. We can cut down now to 175,000 and make a second cut in nine months or so from now, if it should then be thought best, with greater safety and reasonableness than at present. This proposed cut to 150,000 men can not be effected until along late in the autumn, and by that time we shall have met in regular session again, and we will doubtless be, as my colleague has said, in session during the summer.

Whatever size Army we have, we want to be proud of that Army, and we want to support the Army in a way that will at least retain the morale, and not attack it in a matter where the rank and file of the Army may feel too much disheartened. It is often said by soldiers and citizens that we love the Army in time of war and we hate the Army in time of peace. I can not indorse that sentiment, nor can I indorse the allegation that any great majority of the people feel that way about it; but I do know that neglect and distrust and too great an economy rebound sometimes follow war to an unreasonable extent.

For instance, within the past five years, when the clouds were rising and it looked as if we might at any time be drawn into war, we were not prepared, and we did not move in the way of preparation until we had, if not earned, at least seemingly received the contempt of foreign nations to the extent that they were willing to sink our ships, notwithstanding we were a neutral nation. They were willing to take the chances of war with us on the ground that the American Army amounted to little or nothing and the Navy not much more. I do not believe and never have believed that if we had had an Army of 150,000 or 175,000 well trained and equipped men and the armament and supplies ready for action, with the known fact of our laws and the natural disposition to increase that Army in time of stress, we would have had no war. But foreign nations would have respected our strength and courage.

Of course, we have established the fact all the more by the draft act that we can readily assemble an army and that we will assemble an army in times of war. We have demonstrated to the world that we can be forced into war and, for that matter, can win. Now, we hope—at least I do—that the time may come when we will have a smaller Army and the nations of the world may agree to that, but it seems to me it will be time then to make deeper cuts than the one proposed to 175,000 or even 150,000 men.

When we consider that to make a cut now to 175,000 will cause some reorganization or skeletonization of the Army, and that it will take some 9 or 10 months, I think we are going far enough to reduce it to 175,000 enlisted men; and if later matters look as if we were to be without wars in the future, retaining, of course, our armament and equipment, we may then well reduce the number further; but I do consider it, if not unsafe, certainly unreasonable to now go to lower numbers than what was proposed, and what was so cheerfully agreed to by the majority of the Military Affairs Committee having the matter under consideration.

I hope the amendment to cut the Army to 150,000 enlisted men will fail, and I likewise hope the joint resolution itself providing for a cut to 175,000 men may pass.

Mr. WILLIAMS. Mr. President, to my mind it seems obvious that there are two theories with regard to a military establishment, upon either one of which the American people might logically act. One would be to establish an Army to whip anybody and everybody that might by remote possibility make any attack upon us. In order to do that we would need about 2,000,000 men on a peace establishment, or a million, at any rate. Then everybody of a timid character and temperament who is always scared to death about somebody whipping us would feel safe. The other is to pursue our traditionary policy of conserving the financial resources of the people during times of peace and, when war comes, submit ourselves to the immense strain necessary, with the extravagance of expenditure of blood and capital both necessary, but having accomplished the purpose of keeping the people free during peace times from the burdens of war.

In that event, Mr. President, we do not need this great military establishment. I shall therefore vote for the proposition to reduce the Army to 150,000, and if somebody is bold enough or reckless enough in the present state of intimidation about militaristic affairs, the watchword of preparedness hovering in the air, to move to reduce the Army to 100,000, I shall vote for that.

Mr. President, it is not at all necessary that the American people under their circumstances, geographical and financial, should have the biggest Army in the world, or anything more than a peace establishment nucleus around which can be gathered in times of war a defensive force. The Navy is our first arm of defense, situated as we are, and must always remain so; but that is true whether we act purely upon the defensive or upon the offensive-defensive, which is the best form of the defensive.

All that is true at any time, Mr. President, but it is especially true right now, when the people from the richest to the poorest are burdened with taxes, and with an inflated credit system just about beginning to go through the first processes of deflation, with all the trouble that always accompanies that process, chargeable not to it, but chargeable to the original inflation which was necessary and unavoidable.

When I think of what can be done with money that, in my opinion, is wasted upon 25,000 or 50,000 unnecessary men in the Military Establishment, I wonder why the common people of the country, who are interested in the things which might be done with the money, do not arise and make themselves heard. If you will take the number of acres of land which could be irrigated, the number of acres of land which could be drained, the amount of help which might be extended to the wounded and crippled soldiers from the last war, and if you will devote to those purposes only the amount you can save by this, it will be an immense thing. Then, if you consider it independently of all that, as a process of natural deflation from the present highly inflated prices, expenditures, credits, and circulating medium, you will see that its indirect benefits are simply immense.

More than that, Mr. President; the whole world is in our fix, except that it is more so, if I may use that sort of a bull. It needs an example; it needs an example of courage, of self-confidence, of lack of distrust, and of lack of suspicion, and that we can furnish by saying to all the world that we are brave enough to set the example of disarmament in America. It is true that we are the last Nation which ought to be called upon to set it, because we have sinned less in armament. But it is also true that we are best fitted and best able to set it. We can say to the whole world, "I am willing to trust the peace-loving instincts of the world. I believe that I am able to do it financially, physically, industrially, and otherwise, and I am going to do it."

I picked up this morning's paper and saw where a distinguished military officer said that until we could get some international agreement of some sort to decrease expenditures for Army and Navy, he was not willing to do without a man we now have or a ship we now have appropriated for. What does that mean? It means merely that he has been misled by the idols of his temple, or by the order of which he is a member, the general military spirit all over the world, which says that, "I will take this gun off of my shoulder, or partially down, provided you first take yours partially down," and the minute you say that the other man says "No, I will not move mine until you have moved yours"; and it all winds up, as everything of that sort has wound up during the last half of a century, in more and more and more preparation for cutting one another's throats, and in less and less preparation for peace.

I do not care who first said it—it was not the Father of his Country, as somebody has said—"In time of peace prepare for war," he was a false prophet, a false philosopher, a shortsighted man. In times of peace prepare for greater and better peace. The whole dominance of the English-speaking race in literature, in commerce, on the seas, and industrially, has been owing to the fact that the two great branches of that race constitute the population under the only two Governments that have ever had sense enough to see that the main thing is to conserve the resources of your people during peace times, and take your chances in the sudden emergency of war. You must be able to appeal to the reserve power, and come forth with a nervous energy unexampled anywhere in the world, to meet an emergency; and nothing but a nervous energy can meet it.

I am informed that it costs now $1,400 per annum, on the average, to keep a soldier in the field, though about that I may be mistaken; but if that be true, you can easily calculate with a pencil and a piece of paper just what you can save for other purposes by cutting off 25,000 men.

Moreover, Mr. President, as the Senator from Idaho has intimated, if you are going to reduce your Army to 175,000, what advantage has that over 150,000, what over 125,000, because here are the two theories, either one of which is logical, and nothing between them is? The one is that you must be on a war footing to whip the world, or anyone in the world that you think by a remote possibility might attack you; the other is to run your chances. You either have to take the part of the bully who goes armed for fear somebody is going to attack him all the time, or of the gentleman who trusts to God to be able to arm himself in time when he meets people.

I do not mean by that the folly that somebody uttered—I shall not name him—about putting a million men in the field between daybreak and sundown, and all that sort of stuff. But I do mean this, and this war has shown it, that with a great, strong, rich people like ourselves or like Great Britain, or like Great Britain and ourselves in alliance with France, you can meet the most efficient and well-prepared military force that the world ever dreamed of, and you can hold it long enough to get your reserves of liberty and democracy and energy into the field and whip it to its knees, but if in the meantime you had kept your people burdened all those 50 years, they could not have done it, they would have had neither the spirit nor the financial ability nor the morale to do it.

It is not at all necessary that these United States should have the biggest Army in the world or the biggest Navy in the world, the biggest fighting force of any nation in the world. It is not at all necessary that we should go around the world with a chip on our shoulders saying, "Strike us, if you dare." They know that they dare not if they can reasonably well help it. The last lunatic who thought of us as not worthy of counting in case of war is now in Holland, and he ought not to be punished, because he was a lunatic. He ought to be put in a lunatic asylum now, not on that account alone but for several other reasons besides. It is a demonstrated fact that he is a man of unsound mind. You and I will not live to see the day when any people will offer an unprovoked insult, much less make an unprovoked attack, upon this great American people, with its great reserve of energy, of wealth, of manhood and of womanhood unparalleled in the history of this world.

Let us have that money for the agricultural classes, for the industrial purposes of the country, for the purposes of deflation, to the extent that its nonexpenditure will deflate, and let us cease to be war mad, because the war is over and peace is the natural condition of mankind, not war. Even amongst the most warlike people there are often 6 to 10 years of peace to 1 of war.

The English-speaking race did not go to the front in the world by force of its language, or by accident, or by physical, mental, or moral superiority. It went to the front because of its superior political sense, its superior capacity for self-government, and in that nothing was more emphasized than the idea of keeping the people unburdened and untaxed in peace times, and trusting to courage and energy and God when war would be provoked, knowing that it would seldom be provoked.

Amongst the wars we have indulged in we have had only one—probably two—that I remember, that were brought on by ourselves—the Spanish-American War and the Mexican War, neither one of them much more than a skirmish. Amongst the real wars, they were wars to which we were provoked by unheard of insult and by a great deal of injury, and what we want to keep in our minds, if we can, is the idea that we are going like gentlemen, not like gunmen in New York, armed all the time, expecting somebody to attack us, and it is up to us of all people in the world to set the world an example of trust and confidence and peace loving.

Mr. McKELLAR. Mr. President, I think the remarks of the Senator from Mississippi [Mr. WILLIAMS] are very timely, and should be carefully considered not only by the Senate and the House but by the people of the United States at this time.

I want to point out the fact, Mr. President, that 175,000 men, while nominally provided in the joint resolution, does not fairly indicate the real number of men we will have during the next year. The average number of men, if the joint resolution for 175,000 be adopted, will be somewhere in the neighborhood of 200,000 or a little more than 200,000 men in the Army for the year. There are now perhaps two hundred and thirty-odd thousand men in the Army, and that number would be reduced month by month or day by day until we would have 175,000. But that number will not be reached until next September, and in the meantime the average number will be over 200,000 for the year, instead of the 175,000 provided for in the appropriation bill.

If the amendment providing for 150,000 men be adopted, it will about average the 175,000. That will be in entire accord and keeping with the views of the Military Affairs Committee and of the Congress when they fixed the number of men at 175,000 in the appropriation bill. The last appropriation bill provided for that.

So that it seems to me that if we really want to fix the number at 175,000, we will have that average number if we adopt the amendment; and I hope the amendment will be agreed to.

Mr. MYERS. Mr. President, as a member of the Senate Committee on Military Affairs, I voted to report this joint resolution, as it now is, favorably to the Senate, and I shall vote for it, as it now is, and thereby vote to reduce the enlistments in the United States Army to 175,000, but no lower.

While I shall vote in the Senate for the passage of this joint resolution, as it now is, I take this occasion to say that I am not at all in sympathy with any of the strictures which have been made in this connection upon the action and judgment of the Secretary of War, made in the course of debate in this body during the last few days, on this joint resolution and other matters as well, before the Senate. I do not believe that the judgment and discretion exercised by the Secretary of War in the premises, under the authority heretofore given him, merit any of the strictures or censure which have been placed upon him in the course of debate.

Congress, when it enacted the existing law for the reorganization of the Army, authorized the Secretary of War in his discretion to procure enlistments in the Army not in excess of 280,000 enlisted men. He was given that discretion, and when he exercised it according to his judgment I do not think he should be the subject of criticism for it. I know that when the Army reorganization bill was reported out of the Senate Committee on Military Affairs and was enacted by Congress there was a general feeling in Congress and throughout the country that the country should have and should maintain in future a considerably larger Army than it had ever had before in time of peace. There was a strong sentiment in favor of a considerably larger Army. There was a strong sentiment in Congress and throughout the country in favor of universal compulsory military training. It was manifested in the Senate by the reporting by the Senate Committee on Military Affairs of a bill which provided for universal compulsory military training, and while that provision was greatly modified before the bill passed the Senate there was something of it left as the bill passed the Senate.

It did not meet with success in the House, but there was a general expectation in Congress in those days that the size of the Army would be maintained at a much higher figure than it had ever been in time of peace. Congress authorized an Army of 280,000 enlisted men. It was known then that the Secretary of War and the President of the United States shared that feeling of Congress, as well as favoring universal compulsory military training, and the plan of reorganization fixed the maximum number of enlisted men at 280,000, I think, in accordance with that sentiment.

Of course, we were engaged in war when the reorganization bill was conceived and was started upon its parliamentary course; since then we have ceased hostilities and a different spirit has come over Congress and, I think, largely over the American people. However, I do not think the Secretary of War should be blamed for exercising his honest judgment, when Congress knew very well what was his honest judgment at the time it gave him the power which that bill conferred upon him. I dare say, too, the judgment of Congress at that time agreed with the judgment of the Secretary of War. Congress gave him discretion and he exercised it in accordance with his well-known

attitude upon such matters. I do not think he is now to be blamed for it.

Although I shall vote for the measure, as it is reported, as an expression of the latest sentiment of Congress on what should be in these times the size of the United States Army, I do not share in any of the criticisms that have been made upon this floor in the last few days upon the judgment of the Secretary of War in this connection. I did not share, either, in any of the criticisms that were sometimes made in Congress upon the official acts of the Secretary of War while we were actively engaged in hostilities with the Central Powers of Europe. I believe the present Secretary of War has made a splendid record in that highly responsible position. When he, in the short space of about 12 months, just one short year or less, had transported to foreign shores in Europe 2,000,000 American soldiers, after having had them drafted, enlisted, drilled, equipped, qualified, and armed, and then put them in action in France, I think he accomplished one of the most wonderful feats that has ever been known in American history or in the history of warfare anywhere in the world. That feat was the surprise and amazement of the world. It astonished our friends and enemies alike, as well as all others. The powers of Germany thought it could not be done. The Entente Powers doubted our ability to do it. When the Secretary of War in one year assembled from raw material 4,000,000 men, gathered from the walks of peace, put them in camps, trained and equipped them for war, made soldiers of them, and sent 2,000,000 of them across the Atlantic Ocean, without the loss of a man, he did a wonderful thing.

I think the action of the Secretary of War in assembling that Army and in getting half of it across the water in one year, together with supplies and munitions and equipment of every character for service in war and food for the men, and getting the men into action, was a brilliant accomplishment that will redound not only to his everlasting credit but to the undying credit, glory, and prestige of the United States. I think the Government is greatly indebted to him for the services he rendered in accomplishing that great feat during the war. It very materially helped to win the war. I believe the record of Newton D. Baker during our war with the Central Powers of Europe is one of the brightest pages in the history of the United States and is one of the most shining examples of efficiency, executive ability, and fidelity to duty that was displayed during our participation in the European war. It stamps him as a great executive and administrative officer. His record is his monument, and it will be a lasting one.

My vote now to express a somewhat changed sentiment of Congress as to the proper size of the Army in time of peace and to limit it now to an enlisted personnel of 175,000 men is not to be taken in any way whatever as an expression of any reflection upon the judgment of the Secretary of War, which I think has been honestly and judiciously exercised and exercised in accordance with the attitude and state of feeling which Congress knew him to possess when it conferred upon him the power to exercise it and shared then, I think, in large measure by Congress. I shall vote for the joint resolution, as reported to the Senate, but I do not favor reducing the size of the Army to anything less than 175,000 enlisted men, the number fixed by the joint resolution as it was reported by the committee.

It has been the general feeling in the Senate, participated in, I am sure, by a majority of the Members of the Senate, that if the United States Government should not upon some terms and conditions go into the world's League of Nations we would have to maintain much larger army and naval forces than we have ever heretofore maintained in times of peace. That has been one of the main arguments in favor of the United States entering the League of Nations. I think it has been accepted as an acknowledged fact, by a large majority of the Members of the Senate, that we should either go into the League of Nations or maintain a much larger Army and Navy than the country has ever before maintained in time of peace. One of the chief arguments in favor of our entering the League of Nations has been that it would enable us to reduce armament and armed forces on land and water. The inference has always been that staying out of the League of Nations would require larger armed forces on our part on land and water.

I have been steadfastly in favor of the United States going into the League of Nations, and I still favor it. I have voted in favor of it every time it has been before the Senate for action. I voted to ratify the peace treaty and League of Nations as sent to the Senate by the President, without any reservations or amendments. In my desire to have it ratified, I voted also to enter with reservations, and finally I voted to accept all of the so-called Lodge reservations and to enter the League of Nations with all of them adopted, rather than to stay out. One of my principal motives in doing so was my firm belief, which I still hold, that it is necessary to go into the League of Nations in order for us justifiably to reduce our armed forces on land and sea.

I still believe that unless we go into the League of Nations it is incumbent upon us to be better prepared for any eventuality that may occur among the nations of the world than we have ever been; that it is incumbent upon us to maintain a larger Navy and a larger Army than we ever have before in time of peace. We have not entered the League of Nations—and I must say that at present I can see no prospect of this country entering it or entering any association of nations analogous to the existing League of Nations. I hope we may. I would be pleased if we yet should do so, but I do not see any encouragement to believe that we will; and, therefore, until we do get upon a better peace footing with the world, I believe we should be cautious and should proceed gradually in reducing our Army and Navy forces. As things stand at present, I agree with the committee that we should not reduce the enlisted personnel of the United States Army below 175,000, although I am ready to vote to reduce it to that number.

Mr. WALSH of Montana. Mr. President, I congratulate the Senator from Indiana [Mr. NEW] upon the initiation of the attempt to reduce the size of our Army, for the support of which the department is asking appropriations amounting to the enormous aggregate of $700,000,000. I desire also to congratulate the Senator from Wisconsin [Mr. LENROOT] upon his effort to accomplish a further reduction to 150,000 men.

It is said that 42,000 of our available forces are abroad, 15,000 of them in Germany. If they were to remain there permanently the total available force within continental United States would then be about 108,000 men. Our entire Army prior to 1916 was approximately 100,000 men, of which, as my recollection now is, 25,000 were beyond seas or otherwise unavailable for service within the United States proper. Prior to that time, therefore, there were not to exceed 75,000 to 85,000 men constituting the Army within continental United States.

Assuming even that we continue to maintain 15,000 men in Germany, we should have an Army, under the reduction which it is proposed to accomplish by the amendment of the Senator from Wisconsin, of from 25,000 to 30,000 men greater than we had prior to 1916.

I know of no condition whatever, either internal or external, that calls for the maintenance of more than 25,000 men in excess of the number we found adequate for all purposes prior to 1916.

Mr. NEW. Will the Senator permit an interruption?

Mr. WALSH of Montana. Certainly.

Mr. NEW. I would merely call attention to the fact that prior to 1916 we had a National Guard of 130,000 men. To-day the National Guard is but 70,000. There is a difference of 60,000 men accounted for in that class.

Mr. WALSH of Montana. I appreciate that. We have just been informed by the chairman of the committee that, as is generally known, the National Guard is being recruited and in a few short months will be quite equal in numbers and infinitely stronger in every other way than it was in 1916.

Mr. NEW. I do not desire to trespass too much upon the time of the Senator from Montana, but it is apparent that as the National Guard comes up the Army goes down to meet it, under the joint resolution. As the National Guard is recruited and grows in size, the Army is reduced in size and in about an equal ratio.

Mr. WALSH of Montana. I do not understand that there is any reciprocal arrangement contemplated either by the joint resolution or by the existing law, but if there is we insist that reciprocation shall continue until the reduction to 150,000 is accomplished.

I wish to invite attention for a few moments to exactly what the reduction signifies. It is a little difficult to ascertain with any degree of accuracy what it costs per man of the United States Army, because of course there is a large amount of overhead expense, and there are expenses for fortifications and other things that can not be taken into consideration in that reckoning of the diminution in expenses. But it will be conceded that the items of pay, clothing, and subsistence will be reduced substantially in proportion to the reduction in number of men which is accomplished. I find that for these three items the estimates call for $126,000,000, $30,000,000, and $64,000,000, respectively, $221,773,310 in the aggregate, for pay, clothing, and subsistence. If, then, the size of the Army is reduced in the proportion of 280,000 to 150,000, or 28 to 15, a saving will be accomplished approximately of $100,000,000. So the joint resolution before us is practically a proposition to save to the taxpayers of the United States the sum—relatively small, I admit, but substantially considerable—of $100,000,000.

Mr. WARREN. Mr. President——

Mr. WALSH of Montana. I yield to the Senator from Wyoming.

Mr. WARREN. I think the Senator from Montana is mistaken in the estimate which he gives. If he will be good enough to give the estimates for pay, clothing, and subsistence separately, so that they may be added together, perhaps the result may be different. I ask what is his valuation of the cost per man?

Mr. WALSH of Montana. I have not undertaken to compute it, but the aggregate is $221,000,000 for an army of 280,000 men, so that it is a little less than $1,000 per man.

Mr. WARREN. Those estimates may include other items. The cost of maintaining an enlisted man until the World War was a little less than $1,000 per man; but even at $1,000 per man, the aggregate amount saved would be less than half what the Senator has stated.

Mr. WALSH of Montana. Why would it be?

Mr. WARREN. I am figuring on a reduction of 25,000 men.

Mr. WALSH of Montana. I am not speaking about a reduction of 25,000 men; I am speaking of a reduction of the present Army from 280,000 men to 150,000 men.

Mr. WARREN. I understood the Senator to refer to the reduction proposed by the amendment as compared to the original proposition.

Mr. WALSH of Montana. Oh, no; the resolution contemplates a reduction of 100,000 men in round numbers, and the amendment contemplates a reduction of 125,000 men.

Mr. WARREN. I am glad to have my understanding corrected as to that, although I think the Senator from Montana is still considerably above the mark.

Mr. WALSH of Montana. I think not, but I should be very glad to be corrected by the Senator from Wyoming if I am in error. I have taken the figures from the official estimates and I now give the Senator the exact figures. The estimate for pay is $126,780,619; for clothing, $30,573,796; and for subsistence, $64,490,895, for the entire Army on a basis of 280,000 men.

Mr. WARREN. Who is able to state that the estimate referred to was made on the exact basis of an army of 280,000 men?

Mr. WALSH of Montana. If it is not based on an army of 280,000 men, it is certainly based on an army of 237,000 men, and the saving would be all the greater. Then the saving would be in the proportion of 150,000 to 237,000, instead of to 280,000.

Mr. WARREN. The Senator will find that the most correct way is to get at the expense per man per year and multiply that by the number of men.

Mr. WALSH of Montana. That is what I have endeavored to do, except that I have endeavored to exclude the expense of fortifications and other items of that kind that would scarcely affect the question of the expense per man.

Mr. JONES of New Mexico. Mr. President——

Mr. WALSH of Montana. I yield to the Senator from New Mexico.

Mr. JONES of New Mexico. I merely wish to make the observation that in reading the report of the committee on the joint resolution I find it is stated, if I recall correctly, that the average saving would be a thousand dollars per man. That is stated in the report which accompanies the joint resolution.

Mr. WADSWORTH. I think no one denies that; but let me remind the Senator from Montana, if he will permit me, that in the items of pay, clothing, and subsistence there are considerable overhead charges which will not be entirely gotten rid of by the reduction of the number of enlisted men.

Mr. WALSH of Montana. The figures are sufficiently accurate for my purpose, and the other figures are also sufficiently accurate, namely, that we shall effect a saving of practically a thousand dollars a man.

Mr. WADSWORTH. That is also based upon the assumption that Congress, following the enactment of the joint resolution, will appropriate $700,000,000, which it will never do.

Mr. WALSH of Montana. That is the basis upon which the computation is made, nevertheless.

Mr. WADSWORTH. The basis is of no value, because Congress is not going to make the appropriation.

Mr. WALSH of Montana. I desire to say in this connection also that it is of no consequence to me, it is of no persuasive force whatever, that in the year 1916 the Congress deemed it wise to fix the strength of the Army at 220,000 men. At that time we were apprehensive that almost any day we should be drawn into the vortex of war, which day after day and month after month was drawing in various nations of the earth. None of us picked up the newspaper in the morning without trepidation lest something had transpired which brought us nearer to the catastrophe in which we were eventually involved. Under those circumstances, Mr. President, it was deemed that it would be wise to establish the number of 220,000 men as the strength of our Army. However, who is there to assert that any such condition, or anything approximating it, for that matter, now exists?

I was speaking about the saving that would be accomplished by the reduction which is contemplated in the joint resolution and the amendment. The Senator from Idaho [Mr. BORAH] some time ago introduced a resolution looking to an international agreement between this country, Great Britain, and Japan, the purpose of which was an agreement for the reduction of the naval building programs of each of those three nations by 50 per cent. That resolution, with the spirit of which I am in entire accord, although differing as to exactly the method by which the result is to be attained, met with a very approving response, as I gathered, from the country; and yet that plan, if it were successfully carried out—in other words, if we were able to negotiate the international agreement which the resolution contemplates and if we were able successfully to carry out that agreement—would accomplish a reduction of only $92,000,000 in our budget for naval expenses. Of the six hundred and odd million dollars estimated for the Navy for the current year, only $184,000,000 goes to the building program. The successful carrying out of the plan proposed by the Senator from Idaho would therefore result in the saving of practically $90,000,000; and yet the joint resolution before us would achieve a saving in our expenses in the aggregate of at least $100,000,000.

Mr. President, I think it can not be asserted that there are any such conditions either internal or external at the present time as would call for the maintenance of an Army greater than 150,000 men or greater than 25,000 men more than we found adequate for all purposes prior to 1916.

I am not alarmed at all at the rumors which occasionally reach our ears of the imminence of a conflict between this country and Japan. I was a delegate to the Democratic national convention which sat in Denver in the year 1908, twelve and one-half years ago. The committee on resolutions of that convention listened for more than two hours to a distinguished gentleman who demanded a great Army and a great Navy, because we were in imminent danger of war with Japan. He exhibited a map of the Pacific showing the dangers as he saw them, and predicted at the close of his address that within two years we would be at war with that Empire. That was more than 12 years ago; but we have gotten along on reasonably peaceful terms with Japan since, and I trust, and have no doubt, that we shall continue to do so for 12 years more. I am not disturbed particularly about any danger to this country from that source, and my conviction about the matter has been confirmed by the very positive opinions given to me by officers of our Army and Navy.

Mr. President, I trust that the joint resolution will be passed and that the amendment offered by the Senator from Wisconsin [Mr. LENROOT] will be agreed to. The adoption of such a course by the Congress of the United States would set a very salutory example to the impoverished nations of Europe which seem to persist in going armed to the teeth, while we are importuned almost daily for aid for the citizens and subjects of those countries rendered destitute and helpless by the war. Such a course would be an added and emphatic assurance of good faith to the nations of the earth in connection with any proposition that we might make or accept looking to an international agreement for the reduction of armaments which bear so heavily upon the labor of the world.

Mr. WADSWORTH. Mr. President, there is one matter to which I desire to refer to in connection with the remarks made by the Senator from Montana. He gave the strength of the Army as of 1916; but I desire to call his attention to the fact that at that time the Philippine Scouts were not included in the strength of the Regular Army, whereas to-day they are. That makes a difference of 8,000 men in that instance. Furthermore, at that time we had no Air Service whatever, while to-day—and I think no one will charge that we have an excessive program for the Air Service, for we are the most backward nation in that respect of any of the great nations——

Mr. JONES of New Mexico. Mr. President, as a matter of information upon the point which the Senator has just raised—and I confess my total ignorance of the subject—I should like to inquire if the Philippine Scouts, which, as the Senator has said, are estimated now as a part of the United States Army, are supported at the expense of the United States as distinguished from the Philippine Islands?

Mr. WADSWORTH. Indeed they are; under the recent act reorganizing the Army they are now a part of the Regular Army and are considered to be such. They were not included as a

part of the Regular Army in the strength as of 1916 given by the Senator from Montana a moment ago; they were carried separately at that time.

Mr. WALSH of Montana. Mr. President——

Mr. WADSWORTH. I yield.

Mr. WALSH of Montana. I wish to give the Senator the exact figures, with his kind permission.

Mr. WADSWORTH. Certainly.

Mr. WALSH of Montana. In 1915 the Army, exclusive of the Philippine Scouts, numbered 95,765 men. There were then of the Philippine Scouts 5,430, making practically 100,000 men. In 1916 the Army, without the Philippine Scouts, numbered 97,013 men; there were of the Philippine Scouts 5,603, making an aggregate of about 102,000.

Mr. WADSWORTH. I understood the Senator to say that the Regular Army was in the neighborhood of 100,000 in 1916, whereas it turns out that we had 97,000 men in the Regular Army in that year, exclusive of the Philippine Scouts. To-day the figures of the strength of the Army include the Philippine Scouts. So when we shall reduce the Army to 175,000 men it means that that number shall include the Philippine Scouts; so that if we were operating upon the basis of the computation for 1916, instead of 175,000 men the total would be 167,000 men. That makes a difference of 8,000 men in our computation.

Since 1916 it has seemed necessary for the United States to have an Air Service. We had none in 1916. Our performance in the early part of the World War in respect to the Air Service was disgraceful and cost this country a billion dollars——

Mr. LA FOLLETTE. And is still disgraceful.

Mr. WADSWORTH. And then we had nothing of which we could be very proud except the personnel of the Air Service. The Army reorganization act laid down an exceedingly modest program for the Air Service, the most modest of any country in the world. To-day there are 9,600 men in the Air Service. That was an element not included in the computations of 1916 at all. Add 9,600 to the 8,000 and we have 17,600 men, which were not computed for in the figures of 1916.

In 1916 we had no Chemical Warfare Service. The Army reorganization act certainly laid down a most modest program for the Chemical Warfare Service, especially when we remember that 30 per cent of all the casualties in the American Expeditionary Forces were gas casualties. The Army reorganization provides 1,200 men for the Chemical Warfare Service of the entire United States Army. If the amendment to the resolution should be adopted reducing the Army to 150,000 men, we would have less than 700 soldiers in the United States trained in the use of chemical warfare gas. It is getting pretty serious, Senators, when we cut things down in that way. To-day there are 1,100 men actually in the Chemical Warfare Service, which is very close to the authorized strength of 1,200 men, and, adding 1,200 to the 17,600 already referred to, we have 18,800 additional.

Mr. JONES of New Mexico. Mr. President, may I inquire of the Senator if there is anything in the pending joint resolution which specifies the proportion in which the men in the different services shall be reduced?

Mr. WADSWORTH. Only indirectly.

Mr. JONES of New Mexico. Do I understand that if this joint resolution is passed reducing the Army from the estimated basis of 280,000 to 175,000, the eleven hundred men now in the Chemical Warfare Service will be reduced proportionately?

Mr. WADSWORTH. That is the estimate of the War Department, because they have to estimate with the men actually in the Chemical Warfare Service now and note the coming expiration of their enlistments; and the War Department's estimate on chemical warfare is—I have them all here—that there are 1,100 men in the service to-day; the estimated losses from all causes between now and July 31 will be 928 in that one service; they estimate that there will be 189 reenlistments, so that the strength will be 361 if this resolution goes through unamended.

Mr. JONES of New Mexico. Upon what theory, then, is the Senator willing to favor this joint resolution at all?

Mr. WADSWORTH. I have an amendment which I am going to propose when this one is disposed of, but I can not very well propose it until this one is disposed of.

Mr. JONES of New Mexico. Then, may it not be suggested that the amendment will apply also to the reduction from 175,000 to 150,000?

Mr. WADSWORTH. It would not apply. I would have to change the figures. I would have to change the percentages. You know, Mr. President, it is awfully easy to stand here and say, "Let us cut off 25,000 men"; but where are you going to cut them off with the least harm?

Mr. JONES of New Mexico. Of course, it is impossible to discuss what the Senator has in mind until his amendment is presented to the Senate; but I take it, when his amendment is presented, that those of us who favor a reduction from 175,000 to 150,000 may be able to suggest an amendment to the amendment which will not reduce these special forces beyond the point of efficiency.

Mr. WADSWORTH. That is the trouble. The amendment which I propose to introduce can not be introduced and considered by the Senate until we know what percentage of reduction the entire Army is to be subjected to. There is one fault with this joint resolution as it now stands and as it came from the committee, and that is that being applied to the Army as a whole it does not take into account the fact that there are certain branches of the service, notably the combat branches, which are to-day far below strength, while some of the noncombatant branches are practically full; and you can not very well transfer men from the noncombatant branches to the combat branches without breaking faith with them, because when they enlisted they chose the branch of the service that they wanted, and they have started their vocational training in that branch. I am going to offer an amendment to provide that during the period in which the Army is being reduced to such enlisted strength sufficient enlistments may be made in any branch of the Army to bring such branch to not more than a certain percentage of the number prescribed therefor in the Army reorganization act.

If the number is 175,000 for the whole Army, then my percentage would be 62 per cent. If you cut it down to 150,000, my percentage would have to be less. Taking the Chemical Warfare Service, from the best estimate that I could make from these figures from the War Department, if we cut down the Army to 150,000 and adopted my amendment, with a percentage allowed of the kind I have described, the Chemical Warfare Service would end up with about 650 men. That would be the entire strength of the United States in that most important branch of warfare.

Mr. JONES of New Mexico. Mr. President, I should like to inquire of the Senator if the committee has considered the advisability of suggesting some other plan than a percentage plan? Is it not feasible to specify the number to which the Chemical Warfare Service may be reduced, and the number of these other services? I am not a member of the committee, and, of course, I am not acquainted with the details.

Mr. WADSWORTH. That would involve a reexamination and rewriting of the Army reorganization act. We have not attempted in this joint resolution to revamp the whole Army in its internal organization. If we should attempt that we would never get it through at this session, because it brings up the tremendous question of the tactical organization of the whole force.

Mr. JONES of New Mexico. If the chairman of the committee has some idea as to the extent to which a reduction might be made in the Chemical Service, and, I take it, other services, might not the Senate be permitted to have the benefit of the judgment of the Senator and others who have made a special study of those subjects, so that we may specify the reduction which shall be made in the Chemical Service and special services in numbers rather than by percentages?

Mr. WADSWORTH. The percentage basis is the only method by which you can secure a properly balanced force throughout all the services. It does not do to leave the Quartermaster Corps filled to the maximum authorized strength and then say that the Chemical Warfare Service shall not be at the maximum authorized strength, but shall be reduced to a certain percentage. It so happens that the Quartermaster Corps is at maximum strength now. My proposal is that as enlistments expire no more men shall be enlisted in the Quartermaster Corps until it has been reduced to 62 per cent of its authorized strength; that the Chemical Warfare Service shall not be reduced to less than 62 per cent of its authorized strength; that the Infantry, which to-day is far below strength, shall be permitted to increase until it reaches 62 per cent of its authorized strength. Now, 62 per cent of the authorized strength in each branch, it so happens, makes just 175,000 men for the whole Army.

Mr. JONES of New Mexico. And does the Senator believe that if we called that 60 per cent instead of 62 per cent it would make any material difference?

Mr. WADSWORTH. It would make just the difference of 2 per cent. I intended to offer the proposal with the 62 per cent in order to make it conform with the joint resolution asking for a reduction to 175,000. If, however, the Senate votes to reduce it to 150,000, then it will be a percentage considerably less than 62 per cent.

As to the Air Service, there are several things to consider. I do not know that we would have any Air Service worthy of the name.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from New York yield to the Senator from Montana?

Mr. WADSWORTH. I yield.

Mr. WALSH of Montana. As the result of some figures hastily made and which are not entirely accurate, but are substantially so, I find that if the Chemical Warfare Service consists of 1,200 men and the Army is reduced to 175,000 instead of 280,000, with a proportional reduction in the Chemical Warfare Service we will then have 750 men in that service.

Mr. WADSWORTH. That is correct.

Mr. WALSH of Montana. If the Army is reduced to 150,000 men we will have 677 men in the Chemical Warfare Service. So that the matter in controversy between us resolves itself into a question of whether we shall have 750 men in the Chemical Warfare Service or 677 men in the Chemical Warfare Service.

Mr. WADSWORTH. There is a great deal more than that little bit of difference in the men. If we really want to go into the discussion of what this country needs, I should take the stand that 750 men are not enough in the Chemical Warfare Service. I am willing to go down to 175,000 men for the entire Army; but if I were given my choice and were put in a position where in this short session of Congress I could write a temporary statute saying in which branch the reduction should be made, I would not reduce the Chemical Warfare branch by one man below 1,200 men. Now, 750 is just a little bit better than 677; therefore I prefer it.

Now we will take the Air Service. That is a branch that we did not possess in 1916. It may be that some people think we should not have one. What we have is little enough right now. There are 9,600 enlisted men in the Air Service to-day. The authorized strength of the Air Service is 16,000. The chief of the Air Service reports that the strength which he has now, and which is composed largely of mechanics, mechanicians, electricians, and other technical men charged with the maintenance, upkeep, and repair of property, is not sufficient to take care of the property he has on hand, let alone training. The property which the Air Service has under its charge is worth $450,000,000. The joint resolution which we propose would leave the Air Service about where it is. It would leave it approximately where it is for a time, but then they would commence to lose men out of it, and they would lose 2,000 men out of the 9,600 by July 31. That begins to be a pretty serious loss. They would lose more than 2,000 eventually if the joint resolution went through reducing the whole Army to 150,000. If my amendment is adopted, and the Senate retains 175,000 men, the Air Service would eventually have 10,000 men, 62 per cent of its maximum authorized strength. That is all the men we would have, and I do not dare go any lower.

There may be Senators who would say: "Scrap it; we do not care whether we have an Air Service worthy of the name or not." As a citizen of this country, I can not agree to that contention. I have seen enough money, hundreds of millions of dollars, thrown away by reason of our utter unpreparedness in this matter of the Air Service; and when some one says to me that they could go below 10,000 men, I say it is not fair to the interests of the United States to let the Army Air Service be reduced below that figure. That and the Navy Air Service are about the only air activities we have; and we are infinitely behind every other nation, even in the commercial field.

I may remark that in 1916 we had no Finance Service. Of course, that is a very small item. We only allowed 240 enlisted men in the Finance Service in the Army reorganization act, but still that is a little bit that counts.

Then, Mr. President, since 1916 the Congress itself has enacted statutes to the effect that to every university or college or high school which offers a unit composed of at least 100 students who have volunteered to take a course of military training during a certain period set forth under regulations it is the duty of the War Department to send officers and noncommissioned officers to those universities and colleges and high schools to take charge of those units. There are some thousand officers and men in that work now, and there are not enough to-day to meet the demand which the universities, colleges, and high schools are making. Of course, if we go on reducing below the 175,000 we shall have to withdraw those men; that is sure. Instead of being able to fill the new demands which the Congress has said shall be filled we will not only fail to fill them but we shall in most cases withdraw the ones we already have in that service.

Mr. President, another thing that Congress by statute has provided for is vocational training in the Army. Of course, that takes personnel. You can not do it without employing personnel, and even with 175,000 we shall have to stop the vocational training in many branches of the trades. If we go to 150,000, we shall have to stop nearly all of them or else strip our overseas garrisons. That is the only alternative. If the Congress will repeal the vocational training legislation and repeal the Reserve Officers' Training Corps provision, the Reserve Officers' Training Corps, which has been established in accordance with the laws of Congress in the schools and colleges, then we shall save that much personnel. But we have undertaken these obligations and we must fulfill them or we break faith with the people who have relied upon us. Then if the Congress does not want the new Air Service, we can save 10,000 there. If it does not want the Philippine Scouts to be counted in among the Regulars, as we do to-day, we will save 8,000 men in the computation of 1916. I merely bring these questions to the attention of the Senate to show that the Army to-day is not the Army of 1916.

Mr. PHELAN. Mr. President, I am very much interested in this subject, and I only desire to ask the Senator in charge of the joint resolution some questions for information. He has partly answered what I had in mind, and that is the degree of preparedness which we have by statute established.

As I understand it, any school or college or university can apply for instructors from the Regular Army, and that to a considerable extent that privilege is being enjoyed. I am in favor of a larger rather than a smaller Army, because I appreciate more than my colleagues appear to do the danger that still exists in the world and the far-flung line of the United States. But I wanted to know what preparation we were making. There was much talk, not so very long ago, in favor of universal training. Has it simmered down merely to the training of our young men voluntarily in the schools and universities and to vocational training?

Mr. WADSWORTH. I beg the Senator's pardon. I did not hear the question.

Mr. PHELAN. For information, I am trying to ascertain to what extent we, as provided by Congress, are preparing the youth of the land for the contingency of war.

Mr. WADSWORTH. That is quite a question, Mr. President.

Mr. PHELAN. I suggested, following the Senator's remarks, that the universities and schools may now call upon the department for instructors, and then there is vocational training. Is that all?

Mr. WADSWORTH. The vocational training is carried on inside the Army itself. The instruction in the schools and universities, of course, is done under the provision which authorized the organization of the Reserve Officers' Training Corps, commonly known as the R. O. T. C. When our bill was under consideration last spring, if I recollect the figures correctly, 300 universities, colleges, and high schools were then applicants for R. O. T. C. benefits. In order to secure the assistance of the Regular Army and the equipment which may be issued to these boys and young men, they must present a unit of at least 100 boys who undertake to take the training as a part of their college or school course, and the officer is sent there. Very often in the large cities and in the large universities sergeants and corporals, enlisted men, in other words, of the Regular Army, are sent along to help in the training. It takes a lot of personnel, and it is only beginning. My information is that the number has grown away beyond 300, and if it continues at the present rate it will not be long before a thousand high schools, colleges, universities, and technical schools all over the country will be asking this assistance. That is merely an estimate.

Mr. WALSH of Montana. With the consent of the Senator from California, I should like to inquire of the Senator from New York if it is not a fact that retired officers are usually detailed for service of that character?

Mr. WADSWORTH. They are eligible for it; but only with their consent.

Mr. WALSH of Montana. They can be detailed?

Mr. WADSWORTH. With their consent. Some of them are detailed.

Mr. WALSH of Montana. Let me inquire, also, whether they are very eager to accept assignments of that kind?

Mr. WADSWORTH. Some are and some are not. I have heard of some who are very eager to. I have heard of others who do not want to at all. In any event, that does not affect the number of enlisted men.

Mr. PHELAN. I was going to ask, if assigned for that purpose they are not enumerated in the 175,000?

Mr. WADSWORTH. No; they are not in the 175,000 men.

Mr. PHELAN. What provision is made for their compensation? Do they receive regular officers' pay when they are detailed?

Mr. WADSWORTH. They receive active pay when they are on active duty.

Mr. PHELAN. Is there a special appropriation for that purpose?

Mr. WADSWORTH. There is.

Mr. NEW. Noncommissioned officers, I am informed, are included in the 175,000.

Mr. WADSWORTH. Reserve Officers' Training Corps work is exceedingly interesting, and I wish I had with me the figures showing the number of young men and boys who are taking it during this scholastic year. I think the Senator would be surprised at the number.

Mr. NEW. That answers my question. That is the extent of preparedness which we are making for eventual war?

Mr. WADSWORTH. No; there are two others. The National Guard is being built up in a much more healthy relation to the general military policy of the country than ever before, and on a much more secure basis, so far as the guardsmen themselves are concerned, and in a much more intimate relation with the Regulars.

Mr. PHELAN. There is no provision for training outside of these?

Mr. WADSWORTH. There is. There is a provision in the Army reorganization act which authorizes the Secretary of War, during any time in the year, to conduct training camps, which civilians may attend, in accordance with regulations promulgated by the Secretary of War. But, of course, that is limited strictly and controlled strictly by a specific appropriation made by Congress for that purpose. But the skeleton is in the act, and the act also provides, as a concomitant for that, for the organization of a force known as the organized reserves, which is to be the last line in the military program.

Mr. SMOOT. I will say to the Senator from California that perhaps the amount of appropriation will give him some idea of the work that has been done along educational lines in the War Department.

The appropriations which were actually made for the fiscal year ending June 30, 1920, for the War Department for educational purposes are as follows:

Vocational training of soldiers under the act of July 11, 1919, $2,000,000.

United States Military Academy, act of March 4, 1919, $2,277,932.20.

United States service schools, act of July 11, 1919, $75,000.

Or a total for the War Department alone of $4,352,932.20.

Then the Navy has an appropriation for similar educational purposes under the Navy Department of $2,632,646.60.

I might add that the appropriations made for that same year for educational purposes in all of the departments of the Government amounted to $65,796,410.63. Yet you hear it stated from one end of the country to the other that the Government of the United States is doing nothing toward educational work.

I thought this would be a good time to put this matter into the RECORD. I had it tabulated to be used at another time, when the Army appropriation bill comes before the Senate.

Mr. PHELAN. Mr. President, continuing, I think it is an additional argument in favor of a larger number rather than the smaller number that in the discussion before the Military Affairs Committee on the subject of establishing arsenals it was developed that there was much prudence in establishing arsenals in different parts of the country, in order to meet in the event of war the necessities of the service. The same argument would apply to having large garrisons in different parts of the country, because our communications could be very easily interrupted in case of war. We could solve the transportation question by having large bodies, say, on the two seaboards, the Atlantic and the Pacific. With a larger Army we could well afford, as with a larger fleet, to have a large force upon the Pacific, which is a danger point, as well as on the Atlantic. Without such provision we expose ourselves to a very grave danger, because the enemy is not accustomed to give notice when he strikes.

During the war we had to take the garrison away from "the key of the Pacific," the Hawaiian Islands, and the ridiculous situation occurred of taking in the National Guard, which was largely recruited by Japanese, who owe, as you know, dual allegiance, one to the Emperor and one to our Uncle Sam. They can elect, I believe, up to the time they are 16 years of age; otherwise they are Japanese nationals in the eyes of Japan. But it is a perfectly absurd proposition to have "the key of the Pacific," the great strategic naval base, garrisoned by men of questionable loyalty or otherwise in insufficient number. There should be great garrisons in Hawaii and upon the Pacific coast, and any diminution of the number of our already skeleton Army, in my judgment, would be a great mistake of policy.

Notwithstanding what some gentlemen have said, I believe that there are warlike nations upon the Pacific who have dreamed of empire, very much like the German high command. In fact, they have had their schooling from Germany. Their methods, as well as their ideals, are the same, and there is no use blinding ourselves to that fact.

Therefore we must have a very strong Navy until that danger is passed, and we must have a strong Army to garrison our outlying possessions and to defend the coasts, because military strategists have shown that there could be landings made upon our exposed coasts without great difficulty. The need of coast-defense guns is well known, and they have to be adequately manned.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Florida?

Mr. PHELAN. I yield.

Mr. FLETCHER. May I interrupt the Senator just to suggest at that point that one reason why the department wanted 280,000 men was to strengthen the garrison of Hawaii and put a larger force in Panama and to protect the coast? If you reduce this to 175,000, you destroy all possibility of strengthening, and you weaken the position. I think the Senator is right about it.

Mr. PHELAN. Then it resolves itself into a question of whether we shall have simple faith in people who are supposedly hostile, or whether we shall arm ourselves against the danger of aggression. In the interest of peace, I say we should strengthen ourselves, because it is the only assurance we will have that we may not be attacked. Provocation may be caused inadvertently at any time which would give justification, in the eyes of the enemy, to strike, and it would take us years to recover our position. The only assurance of peace, I believe, so long as war is still discussed in the world and as long as human nature endures, is to be strong enough to assert your rights and to maintain your position.

If disarmament comes, it will be a millennial condition, and we should join in it eagerly. Although we can best afford to support an army and a navy, we are the least disposed to fight, and the world ought to be informed on that point. But I doubt very much, in view of all of the discussions in this Chamber, whether there is any disposition upon the part of the country to resort wholly to peaceful methods, by leagues of nations or otherwise, to settle the disputes which naturally must arise between nations. I would like to see it, but I have not the faith. "Lord, I believe; help Thou my unbelief."

The PRESIDING OFFICER. The question is on the amendment of the Senator from Wisconsin [Mr. LENROOT].

Mr. BORAH. We do not want to vote on it without a quorum.

Mr. NEW. The yeas and nays will develop the presence of a quorum.

Mr. McKELLAR. I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair is obliged to lay before the Senate the unfinished business. It will be stated.

The READING CLERK. A bill (S. 3390) to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production, and for other purposes.

Mr. NEW. Mr. President, I very earnestly hope that the Senator in charge of the bill which is the unfinished business will consent to its being temporarily laid aside while the Senate concludes consideration of this very important subject. I think it is certainly apparent that we have about exhausted discussion of the joint resolution and that we can reach a conclusion of it within a very few minutes.

The PRESIDING OFFICER. Is there objection to laying aside the unfinished business?

Mr. GRONNA. Mr. President——

Mr. NEW. In furtherance of what I have requested, I merely wish to call attention to the fact that on January 10 the Army enlisted 2,420 men. At the rate of $1,000 per year per man, which has been developed here as the average cost, it has cost

the Government $2,420,000 by not having had the consideration of the joint resolution completed before the 10th day of January. Every day that goes by, with the War Department enlisting men at that rate, costs the Government just that much money. It is, I think, most important that we should conclude the consideration of the joint resolution.

Mr. GRONNA. Mr. President, when I rose I did not happen to see in the Chamber the Senator from South Carolina [Mr. SMITH], who is in charge of the bill, but I see that he is now here.

I was about to observe that if the joint resolution could be disposed of in a short time, I, personally, would have no objection to the request of the Senator from Indiana; but I am quite sure that there will be further extended debate on the joint resolution, and for that reason I prefer to go on with the unfinished business, because I hope that we can dispose of it to-day.

Mr. WADSWORTH. Mr. President, in view of the objection and in view of the constant drain that is coming upon the United States Treasury in this matter, I move that the Senate proceed to the consideration of Senate joint resolution 236, introduced by the Senator from Indiana [Mr. NEW] and reported by him from the Committee on Military Affairs.

Mr. UNDERWOOD. Mr. President, I suppose we may as well recognize the parliamentary situation as it exists and vote on the motion which has just been made with a thorough understanding of it. There are some of us who have been very anxious for many days to get a vote on the nitrate bill. At one time a motion was made to recommit it. Now, the joint resolution reducing the number of enlisted men of the Army has been brought before the Senate during the morning hour up to the point of 2 o'clock, and the motion now made to substitute the joint resolution for the nitrate bill, of course, is in order.

Although I do not question that Senators who advocate the joint resolution are perfectly sincere in their advocacy of it, I also clearly recognize the fact that they are adopting one of the modes of setting aside and disposing of the nitrate bill, a bill that the great farming interests of the country desire to have at least carefully considered and that a fair vote shall be had upon it at the end of the debate. I hope that we may reach that vote to-day. If we do, there will be no trouble in taking up the joint resolution which has occupied the morning hour. But, as we have to decide the question, I suppose we might as well vote on it now. However, I wish to say this much for the RECORD, that we are not misled by the motion into not recognizing that it is an effort to destroy the pending nitrate bill.

On the motion of the Senator from New York, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. WADSWORTH. The nitrate bill is a proposal to spend money. That is the condition that confronts us. Some of us think it wise and some do not. The joint resolution is an effort to save money to the taxpayers of the country. Men are coming into the Army at the rate of approximately 2,000 a day, and that means $2,000,000 a day which can be saved every day we stop that enlistment. I appeal to the Senate to do something to show its regard for the Treasury of the United States and to have this recruiting stopped. We will save approximately $2,000,000 a day by so doing.

Mr. GRONNA. I realize the force of the argument of the Senator from New York, but is it not fair to assume that the joint resolution was pending before the Committee on Military Affairs for quite a number of days?

Mr. WADSWORTH. It was introduced about 10 days ago and reported out by the first committee meeting after its introduction. The Senator from Indiana [Mr. NEW] then moved to take it up in the first morning hour that occurred thereafter, and we have pressed it only on two occasions in two morning hours. We were just at the point of having a roll call upon the amendment proposed by the Senator from Wisconsin [Mr. LENROOT] on the matter of reduction to 150,000 enlisted men when the hour of 2 o'clock arrived, and the Senator in charge of the nitrate bill refused to let us vote.

Mr. UNDERWOOD. Certainly; why should we not do so? I did not make the objection myself, but I see nothing remarkable about it. The unfinished business is supposed to take its place at 2 o'clock.

Mr. WADSWORTH. We asked unanimous consent to lay it temporarily aside until we could dispose of the pending amendment, and that consent was refused.

Mr. UNDERWOOD. The Senator who interposed the objection stated that he would have no objection if he thought it meant an immediate vote, but realizing that after the amendment was disposed of there would be more debate occupying the time of the bill which, according to the order of the Senate, had the right to consideration after 2 o'clock, he objected. If Senators wish to use this method, which is parliamentarily entirely proper, of disposing of the pending bill, to which my friend from New York is opposed, it is perfectly all right. If they have a majority to accomplish that result, we will accept it, but I desire the RECORD to show that this is an effort to displace the nitrate bill.

Mr. JONES of New Mexico. Mr. President, I hope that some arrangement may be made whereby a vote may be had on the joint resolution. I do not believe Senators desire to consume any time in further debating the joint resolution, and I hope it is not the intention to displace the bill which has been pending for some days as the unfinished business.

I should like to suggest that, if it is possible to do so, there be a unanimous-consent agreement that the so-called nitrate bill may be temporarily laid aside, say until a given hour, so that a vote may be had upon the joint resolution which was pending before the hour of 2 o'clock.

For one, I feel that the joint resolution should pass; I feel that it should pass promptly, and I should regret to be called upon to vote in this way to prevent the passage of it. I hope that some understanding may be arrived at whereby the joint resolution may be speedily disposed of and yet not displace the so-called nitrate bill, which is the unfinished business. It appears from the statement of the Senator from New York [Mr. WADSWORTH] that he asked unanimous consent that we might proceed a little further with the joint resolution. It seems to me that was a reasonable request under all the circumstances, and I hope the request may be renewed and that it may be granted.

The PRESIDING OFFICER. Does the Senator from New York insist upon his motion?

Mr. GRONNA. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gronna	McNary	Smith, S. C.
Ball	Hale	Moses	Smoot
Beckham	Harris	Myers	Spencer
Borah	Harrison	Nelson	Stanley
Calder	Heflin	New	Sutherland
Capper	Johnson, Calif.	Nugent	Swanson
Culberson	Johnson, S. Dak.	Overman	Townsend
Curtis	Jones, N. Mex.	Page	Trammell
Dial	Jones, Wash.	Phelan	Underwood
Dillingham	Kellogg	Phipps	Wadsworth
Edge	Kenyon	Poindexter	Walsh, Mass.
Fernald	Keyes	Ransdell	Walsh, Mont.
Fletcher	Knox	Robinson	Warren
France	La Follette	Sheppard	Wolcott
Gerry	McCumber	Simmons	
Glass	McKellar	Smith, Ga.	

The PRESIDING OFFICER. Sixty-two Senators have answered to their names. There is a quorum of the Senate present.

Mr. GRONNA. Mr. President, I am as anxious as any Senator can be to dispose of the joint resolution of the Senator from Indiana [Mr. NEW] and also the pending unfinished business. If we can have an understanding to get a vote on the unfinished business at any time this afternoon, I certainly have no objection to temporarily laying it aside. It is possible it may not take as much time as I had anticipated, but Senators have stated to me that considerable debate will be had on the resolution.

Mr. McKELLAR. Will the Senator from North Dakota yield to me?

Mr. GRONNA. I yield.

Mr. McKELLAR. In the suggestion of the Senator from New York a while ago that we are losing money by not passing the joint resolution I very heartily concur, but I will say to him that I am absolutely sure that if he would accept the amendment which has been offered by the Senator from Wisconsin [Mr. LENROOT] to the joint resolution, to reduce the size of the Army to 150,000 men, we should not only save more money but we could pass the joint resolution instantly. I do not believe it would take two minutes to pass the joint resolution if the Senator from New York would accept the amendment which has been offered by the Senator from Wisconsin.

Mr. WADSWORTH. The Senator from Tennessee could not very well expect me to do a thing of that kind. He has heard me here on the floor express my strenuous opposition to the amendment of the Senator from Wisconsin. I can not surrender my convictions on it. I think it is dangerous to reduce the strength of the Army down to 150,000 men. I can not consent to do any such thing as that.

Mr. UNDERWOOD. Let me ask the Senator from New York a question. Of course, the Senator naturally wants a vote on the joint resolution to reduce the size of the Army. Is the Senator willing that we shall proceed at once to vote on that joint resolution and all amendments thereto without further debate?

Mr. WADSWORTH. Mr. President, in perfect good faith I have to answer that question in the negative. I have already said something to the Senate about an amendment which I am going to offer when the amendment of the Senator from Wisconsin shall have been disposed of. I should have to explain the amendment in part at least, and I can not guarantee that Senators will not wish to ask questions or to discuss the amendment. I have nothing more to say on the amendment of the Senator from Wisconsin proposing to reduce the strength of the Army to 150,000 men. I have taken my seat; the yeas and nays have been ordered upon the amendment, and could have been had if unanimous consent had been given by the Senator in charge of the nitrate bill that it be temporarily laid aside. That is all I have in mind.

Mr. UNDERWOOD. I should like to ask the Senator from New York if the Senate is willing to vote on the pending bill, is the Senator from New York willing to delay the further consideration of the military joint resolution until to-morrow?

Mr. WADSWORTH. No; I want to get the joint resolution through and save money.

Mr. UNDERWOOD. Then it is apparent, as I said in the beginning, that the purpose is to delay the nitrate bill or to ultimately displace it with the joint resolution. I think the nitrate bill has been very thoroughly discussed; I should like to see it passed, but I know that I can not always have my way about matters and it does not disturb me when I do not, although I regret the situation. If a majority of the Senate have made up their minds that by an indirect vote they are going to put the nitrate bill to sleep, why, let us find it out. I think, therefore, we had better have a vote on the motion of the Senator from New York to substitute the joint resolution for the nitrate bill.

The PRESIDING OFFICER. The Senator from New York [Mr. WADSWORTH] has moved that the Senate proceed to the consideration of Senate joint resolution 236. The Senator from Tennessee [Mr. MCKELLAR] has demanded the yeas and nays and they have been ordered. If there be no further debate, the Secretary will call the roll.

Mr. UNDERWOOD. The question is on the motion to substitute the joint resolution for the nitrate bill?

The PRESIDING OFFICER. It is on that motion. Is there any further debate?

Mr. WADSWORTH. Will the Chair again state the question?

The PRESIDING OFFICER. If the Chair is correct, the question is on the motion of the Senator from New York [Mr. WADSWORTH] that the Senate proceed to the consideration of Senate joint resolution 236.

Mr. UNDERWOOD. Which, if agreed to, will displace the nitrate bill?

The PRESIDING OFFICER. Which, of course, if the motion were agreed to, would have the effect of displacing the nitrate bill.

The reading clerk proceeded to call the roll.

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. SHERMAN] which I transfer to the Senator from Arkansas [Mr. KIRBY], and will vote. I vote "nay."

Mr. KNOX (when his name was called). I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. I am unable to secure a transfer of that pair, and, therefore, withhold my vote.

Mr. CURTIS (when Mr. LENROOT's name was called). I am requested to announce the absence of the Senator from Wisconsin [Mr. LENROOT]. He is paired with the Senator from Tennessee [Mr. SHIELDS].

Mr. MOSES (when his name was called). I have a general pair with the Senator from Louisiana [Mr. GAY]. In his absence I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. GERRY (when the name of Mr. SMITH of Georgia was called). I desire to announce the absence of the Senator from Georgia [Mr. SMITH]. He is paired with the Senator from Massachusetts [Mr. LODGE].

Mr. WALSH of Montana (when his name was called). I am paired with the Senator from New Jersey [Mr. FRELINGHUYSEN]. Being unable to secure a transfer of that pair, I withhold my vote.

Mr. NEW (when Mr. WATSON's name was called). I announce the absence of my colleague [Mr. WATSON] on account of illness. He is paired with the Senator from Delaware [Mr. WOLCOTT]. If present and permitted to vote, my colleague would vote "yea."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Missouri [Mr. REED] and vote "nay."

Mr. WOLCOTT (when his name was called). I have a general pair with the senior Senator from Indiana [Mr. WATSON]. If he were present, I understand from the announcement which has been made that he would vote differently from the way I intend to vote. I therefore transfer my pair with him to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

The roll call was concluded.

Mr. EDGE (after having voted in the affirmative). I have a general pair with the Senator from Oklahoma [Mr. OWEN]. I transfer that pair to the Senator from Utah [Mr. KING] and permit my vote to stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Connecticut [Mr. BRANDEGEE] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from Iowa [Mr. CUMMINS] with the Senator from Ohio [Mr. POMERENE];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Arizona [Mr. SMITH];

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK]; and

The Senator from Illinois [Mr. MCCORMICK] with the Senator from Nevada [Mr. HENDERSON].

The result was announced—yeas 29, nays 34, as follows:

YEAS—29.

Ball	France	McLean	Sterling
Borah	Gore	Nelson	Sutherland
Calder	Hale	New	Townsend
Colt	Johnson, Calif.	Page	Wadsworth
Curtis	Jones, Wash.	Phipps	Warren
Dillingham	Kellogg	Poindexter	
Edge	Kenyon	Smoot	
Fernald	Keyes	Spencer	

NAYS—34

Ashurst	Harris	Nugent	Stanley
Beckham	Harrison	Overman	Swanson
Capper	Heflin	Phelan	Trammell
Culberson	Johnson, S. Dak.	Ransdell	Underwood
Dial	Jones, N. Mex.	Robinson	Walsh, Mass.
Fletcher	La Follette	Sheppard	Williams
Gerry	McKellar	Simmons	Wolcott
Glass	McNary	Smith, Md.	
Gronna	Myers	Smith, S. C.	

NOT VOTING—33.

Brandegee	Hitchcock	Moses	Shields
Chamberlain	Kendrick	Newberry	Smith, Ariz.
Cummins	King	Norris	Smith, Ga.
Elkins	Kirby	Owen	Thomas
Fall	Knox	Penrose	Walsh, Mont.
Frelinghuysen	Lenroot	Pittman	Watson
Gay	Lodge	Pomerene	
Harding	McCormick	Reed	
Henderson	McCumber	Sherman	

So Mr. WADSWORTH's motion to proceed to the consideration of Senate joint resolution 236 was rejected.

Mr. WADSWORTH. Mr. President, I am in very great earnest about this matter. The Senator from Indiana [Mr. NEW] asked unanimous consent that the unfinished business be temporarily laid aside in order that this joint resolution stopping recruiting in the Army might be passed. That consent was refused, and I then felt it my duty to make the proposal in the form of a motion, which I did. The Senate has now decided not to make the Army resolution the unfinished business. I hope some agreement may be had here by which this Army resolution can at least have a chance to go through to-day.

The situation is a serious one. There is no great emergency waiting upon the nitrate bill or its passage. To my mind there is a Treasury emergency waiting upon the passage of the Army resolution.

I therefore renew my request that unanimous consent be given for the temporary laying aside of the nitrate bill; and I am willing to show my sincerity in wanting to get this joint resolution through, not merely for the purpose of delaying the nitrate bill, to negotiate with the Senators on the other side of the Chamber as to the length of time which they will give the Army resolution for further consideration this afternoon.

Mr. UNDERWOOD. Mr. President, I am not in charge of the bill which is the unfinished business. I want to say that if the Senator really is not proposing this for delay of the nitrate bill——

Mr. WADSWORTH. I have not been from the beginning.

Mr. UNDERWOOD. If the Senator will agree that the nitrate bill and all amendments thereto shall be voted on at 5 o'clock this afternoon——

Mr. WADSWORTH. No, Mr. President; I did not say the nitrate bill. I said I would reach an agreement as to how long the Army resolution should remain before the Senate.

Mr. UNDERWOOD. I think we can very quickly dispose of the nitrate bill if the debate will cease. There are not many votes to be had, and if we can reach an agreement to dispose of the nitrate bill at 4 o'clock I am willing to help the Senator take up his other measure and I am willing that it shall be the unfinished business; or I am willing that we shall vote on the military measure first if the Senator will give us a vote on the nitrate bill this afternoon.

Mr. WADSWORTH. Mr. President, the Senator asks me to do a thing which I have not the power to do. There are a large number of amendments yet to be offered to the nitrate bill, and the Senator knows it, because he has been informed from several sources that that is the case. Some of them are of great importance. I could not myself give consent, and I have not the power to do so, that there shall be no more debate upon the nitrate bill with all these amendments that are going to be offered. All I am asking of the Senator from Alabama now is, Will he give one hour to the Army resolution and let us have a chance to pass it?

Mr. UNDERWOOD. Mr. President, I am perfectly willing to give two hours for the consideration of the Army bill to-morrow morning by having an adjournment taken, instead of a recess, at the close of to-day's session.

Mr. WADSWORTH. In other words, the Senator from Alabama is willing to spend $2,000,000 more. These men are coming in at the rate of 2,000 a day. Every 2,000 that come in put an obligation upon the Treasury of the United States of $2,000,000. I want to save it, and I ask the Senator from Alabama to give the Senators behind this Army resolution one hour in an effort to save that money, without disturbing the nitrate bill.

Mr. UNDERWOOD. Mr. President, the Senator has made an urgent appeal, and one that appeals to me, of course, to save $2,000,000; but a few minutes ago I heard Senators on this side appeal to the Senator from New York to accept an amendment making the Army 150,000 instead of 175,000, which would probably save many times $2,000,000.

Mr. WADSWORTH. Oh, Mr. President, certainly the Senator does not mean that. This joint resolution stops recruiting. Recruiting will cease when it is passed, no matter whether the size of the Army is to be ultimately 175,000 or 150,000.

Mr. UNDERWOOD. Oh, to be sure; I understand that perfectly well, but I am talking about economy. If we are passing this joint resolution purely on the ground of economy and not on the ground of efficiency or Army necessity or on the ground that the conditions of the country do or do not require an Army, if it is purely a question of economy—and that is the position of the Senator from New York in the appeal that he makes to me—why not pursue the economy and reduce the Army to 150,000 instead of 175,000, and have a very great reduction?

Mr. McKELLAR. Mr. President——

Mr. UNDERWOOD. To be perfectly candid about it, I think the Senate has decided the question. There has been no desire for any unusual delay on this side of the Chamber for the consideration of this measure. I think we can say that the minority, on this side of the Chamber, has not in any way impeded the action of the majority in considering its legislation, although I can not say that entirely about the pending bill as to the majority. The minority, or most of us, are heartily in favor of it.

Mr. McKELLAR. Mr. President——

Mr. UNDERWOOD. If the Senator wants to expedite the business of the Senate—and he ought to, because the responsibility rests on his side of the Chamber—let us consider the nitrate bill with as little debate as possible, and then we will proceed to the consideration of the Army resolution.

Mr. WADSWORTH and Mr. NEW addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator yield at this point, if to anyone?

Mr. UNDERWOOD. I will not yield the floor, unless the Senator is addressing a question to me, in which event I will answer it.

Mr. WADSWORTH. Mr. President, the Senator from Alabama [Mr. UNDERWOOD] is rather skillful in attempting to put the responsibility for the long debate upon those who have questioned the wisdom of the nitrate bill. If he will examine the RECORD, he will find that three-fourths of the time has been taken up by the proponents of the bill.

Mr. UNDERWOOD. I can not weigh the time, but——

Mr. WADSWORTH. All we are asking now is that you give us, we will say, until 3.30 to attempt to pass the Army joint resolution, without disturbing the nitrate bill.

Mr. UNDERWOOD. Mr. President, it is apparent that if we do that there will be practically no consideration of the nitrate bill this afternoon. The Senate has decided the question. The Senator has appealed to the Senate, and the question has been decided.

Mr. WADSWORTH. Will the Senator give us half an hour?

Mr. GRONNA and Mr. NEW addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Dakota.

Mr. GRONNA. Mr. President, speaking only for myself, of course, I would suggest that unanimous consent be given to take up the Senator's joint resolution, and that we agree to vote on it not later than 4 o'clock; and, coupled with that, that we agree to vote on the nitrate bill to-morrow not later than 5 o'clock. That seems to me to be a fair proposition.

Mr. WADSWORTH. I shall object to that.

Mr. NEW. Mr. President, I utterly deny that there was any purpose on the part of anybody concerned in the advocacy of this Army resolution to displace permanently the nitrate bill. Unanimous consent was asked that the nitrate bill be laid aside in order that consideration of Senate joint resolution 236 might be continued. When the request was made I was under the impression, and I am still under the impression, that this whole matter of Senate joint resolution 236 can be disposed of within less than one hour.

I therefore move, Mr. President, that the nitrate bill—I have not the number in my mind—be temporarily laid aside until the hour of 3.30 this afternoon in order that the Senate may proceed until that hour with the consideration of Senate joint resolution 236.

Mr. UNDERWOOD. I make the point of order that that motion is not in order.

The PRESIDING OFFICER. What is the point of order that the Senator makes?

Mr. UNDERWOOD. That the motion to postpone indefinitely for one hour is not in order. The Senator can substitute, but he can not——

Mr. NEW. It is not a motion to postpone indefinitely.

Mr. UNDERWOOD. Well, to postpone until a fixed hour.

Mr. NEW. To postpone to a definite hour.

Mr. ROBINSON. Mr. President, I make the further point of order that the Senate has just voted upon the motion which is the proper motion, to proceed to the consideration of another measure, the Army resolution, and that it is not now in order to move to proceed to the consideration of the Army resolution for one hour.

Mr. UNDERWOOD. Mr. President, I want to say a word on this subject, if the Chair will allow me. I will let the Chair rule first on the point of order, however, because I am sure the point of order is well taken.

The PRESIDING OFFICER. The present temporary occupant of the chair has never had occasion to rule on this precise question, and no precedent has been cited; but the impression of the Chair is that the motion is out of order under the peculiar rules of the Senate. That is, the motion is that the Senate proceed for an hour and a half to consider the Army bill. That would tend to make it the unfinished business for an hour and a half, at which time another matter of unfinished business would come before the Senate.

Mr. UNDERWOOD. It would be invoking the cloture rule on the Army bill, of course.

The PRESIDING OFFICER. The Chair is inclined on first impression to say that the point of order is good, and it is therefore sustained.

Mr. UNDERWOOD. Mr. President, there are a great many Senators on this side of the Chamber who are desirous of voting on the Army resolution. I understand that the Senator from North Dakota desires to make a proposal at this time.

Mr. GRONNA. Mr. President, with the aid of the Assistant Secretary I have presented a request for unanimous consent, which I ask to have stated.

The PRESIDING OFFICER. The Secretary will state the proposed unanimous-consent agreement.

The Assistant Secretary read as follows:

It is agreed by unanimous consent that at not later than 4 o'clock p. m. on this calendar day the Senate will proceed to vote without further debate upon any amendment that may be pending, any amendment that may be offered, and upon the joint resolution, S. J. Res. 236, through the regular parliamentary stages to its final disposition; and it is further agreed that at not later than 5 o'clock p. m. on the calendar day of Friday, January 14, 1921, the Senate will proceed to vote without further debate upon any amendment that may be pending, any amendment that may be offered, and upon the bill, S. 3390, through the regular parliamentary stages to its final disposition.

The PRESIDING OFFICER. Is there objection to the request?

Mr. WADSWORTH. I have already stated my objection to that.

The PRESIDING OFFICER. Objection is made.

ATMOSPHERIC NITROGEN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3390) to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production, and for other purposes.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole and open to amendment.

Mr. CURTIS. Mr. President, on behalf of the junior Senator from Wisconsin [Mr. LENROOT] I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The Senator from Kansas, on behalf of the junior Senator from Wisconsin [Mr. LENROOT], presents an amendment, which will be stated.

The ASSISTANT SECRETARY. On pages 7 and 8 it is proposed to strike out all of subdivision (m). Subdivision (m), as amended, reads as follows:

(m) To lease or purchase such buildings or properties as may be deemed necessary or advisable for the administration of the affairs of the corporation or for carrying out the purposes of this act; and with the approval of the Secretary of War to lease to other persons, firms, or corporations any of its properties not used or needed by the corporation, or to enter into agreements with others for the operation of such properties not used or needed for the purposes named herein.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kansas on behalf of the Senator from Wisconsin.

The amendment was agreed to.

Mr. HARRIS. Mr. President, on day before yesterday I withdrew my substitute for two amendments, one offered by the Senator from South Carolina [Mr. SMITH] and the other by the Senator from Wisconsin [Mr. LENROOT], with the understanding that those two amendments covered all of my substitute. Part of my substitute, however, is not covered in either one of those amendments, and I therefore offer this amendment, to be inserted after the amendment of the Senator from South Carolina:

After the word "agriculture," at the end of the first proviso, insert the words "and shall be sold to farmers at reasonable prices."

The PRESIDING OFFICER. The Senator from Georgia asks unanimous consent to reconsider the vote by which the amendment proposed by the Senator from South Carolina was agreed to.

Mr. SMITH of South Carolina. Mr. President, I should like to have the amendment proposed by the Senator from Georgia read.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. The Senator from Georgia desires to add, in the amendment already agreed to, after the word "agriculture," the words "and shall be sold to farmers at reasonable prices."

The PRESIDING OFFICER. Without objection, the vote whereby the amendment was agreed to will be reconsidered. The question is on agreeing to the amendment of the Senator from Georgia to the amendment of the Senator from South Carolina.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. GRONNA. Mr. President, there has been considerable complaint about the fact that under the bill this corporation would be under the control of the Secretary of War, and it is my purpose to move to strike out of the bill the words "Secretary of War" and to substitute the word "President" wherever that language may be found, with the exception of the place on the last page where the Secretary of War is made ex-officio chairman of the board. I move that, on page 1, line 3, the words "Secretary of War" be stricken out and the word "President" be substituted.

The amendment was agreed to.

Mr. GRONNA. Then I move a similar amendment on page 3, line 23.

The PRESIDING OFFICER. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 3, line 23, strike out the words "Secretary of War" and insert the word "President."

Mr. WADSWORTH. I move as an amendment to that amendment to add the words "by and with the advice and consent of the Senate."

Mr. ROBINSON. Let the amendment be stated in the connection in which it is offered.

The PRESIDING OFFICER. The Secretary will state the amendment as proposed to be amended.

The ASSISTANT SECRETARY. On page 3, line 23, strike out the words "Secretary of War" and insert the words "President, by and with the advice and consent of the Senate."

Mr. GRONNA. Mr. President, as far as I am concerned, I have no objection to the amendment to the amendment.

The PRESIDING OFFICER. The Secretary will read the language as it will read if amended.

The ASSISTANT SECRETARY. The sentence will read:

The corporation shall be conducted under the supervision and control of a board of directors, consisting of not less than 3 nor more than 11 members, to be appointed by the President, by and with the advice and consent of the Senate.

Mr. GRONNA. As far as I am personally concerned, I accept the amendment offered by the Senator from New York.

The PRESIDING OFFICER. The proposer of the amendment has accepted the amendment to his amendment. Therefore the question is on the amendment as modified.

The amendment as modified was agreed to.

Mr. GRONNA. On the same page, line 24, I move to strike out the words "Secretary of War" and insert the word "President."

The PRESIDING OFFICER. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On line 24 and the beginning of line 25, strike out the words "Secretary of War" and insert the word "President."

Mr. WADSWORTH. I think that would be a very grave mistake.

Mr. GRONNA. Mr. President, I withdraw that amendment.

The PRESIDING OFFICER. The Senator from North Dakota withdraws the amendment.

Mr. GRONNA. I propose the same amendment on page 12, line 3.

The PRESIDING OFFICER. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 12, line 3, strike out the words "Secretary of War" and insert the word "President."

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, the Senator from North Dakota has brought up the question, by these amendments, of the connection of the Secretary of War with this corporation and the connection of the President with it. His amendments leave the bill in such shape that we can not tell who is going to run the corporation, really, and it will require several more amendments, I think.

For example, on page 2 we find this language:

The said organization certificate shall be acknowledged before a judge of some court of record or notary public, and shall be, together with acknowledgment thereof, authenticated by the seal of such notary or court, transmitted to the Secretary of War, who shall file, record, and carefully preserve the same in his office.

Do I understand that under the Senator's theory the President, who appoints all these directors and who appoints, in the first instance, the five persons who are to act as the organization committee, is to be the responsible head of this concern?

Mr. GRONNA. Mr. President, if the Senator directs the question to me, I will say that whether it is inserted in the bill or not, the President really would be the responsible head, because it is a governmental agency. There has been considerable complaint, as the Senator knows, because we are undertaking to provide that the Secretary of War shall be the head of this Government corporation, and for that reason I conferred with some of the Members of the Senate who are interested in the bill and who believe that the business should be conducted in such manner that there could be no possible reason for criticism. Making the Chief Executive the responsible head would obviate such criticism, and for that reason I offered the amendments which have been adopted. Of course, the reports would have to be made to the Secretary of War, just as reports are made now to the different departments of the Government affecting the business of the particular departments, and this, Mr. President, is the business of the War Department.

Mr. WADSWORTH. Then, Mr. President, in view of that suggestion, let us turn to page 5, and if the Senator from North Dakota will look at paragraph 2 I think he will find an interesting situation, which I would like to have him solve. It reads:

Any other plants or parts of plant, equipment, accessories, or other properties belonging to the United States which are under the direct control of the President or of the War Department, and which the President or the Secretary of War may deem it advisable to transfer, convey, or deliver to said corporation.

There is a dual authority. Which, in the judgment of the Senator, should have the discretion in the matter of turning over Government property to this corporation? Surely the Senator would not urge that both be given that authority.

Mr. GRONNA. Mr. President, it is very seldom that I differ with the Senator from New York with respect to purely business matters, because he has such a keen intellect that I certainly do not want to oppose anything he proposes. But the Senator is too good a business man seriously to contend that it would be impossible for the President of the United States and a subordinate officer, the Secretary of War, to collaborate and do this work, just like the president of a bank and the vice president of a bank. There is no conflict whatever in the transaction of the business.

Mr. WADSWORTH. But the Senator forgets that we are writing a statute conferring authority upon certain officers, and in that we confer authority upon the President to transfer properties of the Government to the corporation, and we also confer like independent authority upon the Secretary of War. I believe one or the other should come out, that is all; and I was asking the Senator from North Dakota which of the two he thinks should bear the responsibility, because I want to help make the bill conform with his original theory as to who shall head the corporation and be responsible for it. It is an evident error and I do not think anyone can defend it.

Mr. GRONNA. I appreciate the force of the Senator's argument, but I do not think it is an error. We have just adopted an amendment proposed by the Senator from New York, and I believe it is a good amendment, to the effect that the men appointed by the President of the United States shall be confirmed by the Senate.

Mr. WADSWORTH. Those are the directors.

Mr. GRONNA. Who will make the report to the Secretary of War or to the President of the United States? It will be those directors, appointed by the President of the United States, confirmed by the Senate of the United States. I can imagine no different way to do this business than for these directors to make their complete report to the Secretary of War, and the Secretary of War to make his report to the Chief Executive of the Nation. I do not believe the Senator could improve upon the machinery set up, as the bill now provides. As one who favors the bill, I am under obligations to the Senator from New York for proposing the amendment which he did a few minutes ago.

Mr. WADSWORTH. Mr. President, what I have reference to has nothing to do with the directors, and nothing to do with the making of reports. It has to do with the turning over of Government property to this corporation, and who shall authorize the turning over of the property. It reads:

Any other plants or parts of plant, equipment, accessories, or other properties belonging to the United States which are under the direct control of the President or of the War Department, and which the President or the Secretary of War may deem it advisable to transfer, convey, or deliver to said corporation for use in connection with any of the purposes of this act, or for any purpose incidental thereto.

I object to having dual authority. Either the Secretary of War should have complete authority to turn over War Department property to this corporation or the President should have it alone; or the President should have all the authority to turn over all property which is under his control and the control of the War Department. I am asking the Senator from North Dakota which of the two officers, with respect to War Department property, he would have eliminated?

Mr. GRONNA. I think both the Secretary of War and the President should have something to say about the transfer of the property of the Government of the United States. We are doubly insured, but I have no objection to striking out the language with reference to the Secretary of War leaving the power in the hands of the President.

Mr. ROBINSON. Will the Senator yield to me a moment?

Mr. GRONNA. Certainly.

Mr. WADSWORTH. Then we must change the word to "and."

Mr. ROBINSON. The point the Senator from New York makes is that the Secretary of War, without the approval of the President, may transfer property belonging to the War Department, even against the will of the President, under the language as it is used here.

Mr. WADSWORTH. This statute would authorize the Secretary of War to turn over to this corporation anything in the War Department he wants to. He could turn over the Nashville powder plant, the Nitro (W. Va.) plant—if there is anything left of it, and I think there is not—and several other enormous installations, without asking the permission of the President or anyone else, and I want to know who is going to be responsible. There are hundreds of millions of dollars worth of property involved here. I think it should be the President alone.

Mr. GRONNA. I am sure the Senator can suggest a remedy.

Mr. WADSWORTH. I have done so already, but the Senator has insisted that the whole thing is protected.

Mr. GRONNA. I believe it is; but I have no objection to having it changed that way.

Mr. ROBINSON. I offer the following amendment, which I think will accomplish the purpose, and I do not think the Senator from North Dakota will object to it.

In line 4, page 5, I move to strike out the words "or the Secretary of War," so that it will read "and which the President may deem it advisable to transfer."

Mr. WADSWORTH. Is that acceptable to the Senator from North Dakota?

Mr. GRONNA. It is acceptable to me.

Mr. WADSWORTH. That was my suggestion, that the President be made responsible.

The VICE PRESIDENT. The proposed amendment will be stated.

The ASSISTANT SECRETARY. On page 5, in line 4, after the words "which the President," strike out the words "or the Secretary of War," so that the paragraph will read:

Any other plants or parts of plant, equipment, accessories, or other properties belonging to the United States which are under the direct control of the President or of the War Department, and which the President may deem it advisable to transfer, convey, or deliver to said corporation for use in connection with any of the purposes of this act, or for any purpose incidental thereto.

The amendment was agreed to.

Mr. WADSWORTH. I understand subdivision (m), on page 7, has been stricken out.

The VICE PRESIDENT. That subdivision has been stricken out.

Mr. WADSWORTH. On page 8 we find this language under the heading "Capital stock":

In exchange for the properties purchased or acquired from the United States, and from time to time transferred——

The VICE PRESIDENT. That language has been stricken out.

Mr. WADSWORTH. How does the bill read now as amended?

The VICE PRESIDENT. It will be stated.

The Assistant Secretary read as follows:

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President or the Secretary of War—

Mr. WADSWORTH. There it is again.

Mr. ROBINSON. I move, in line 12, page 8, of the print which I have, to strike out the words "or by the Secretary of War."

The ASSISTANT SECRETARY. In the amendment offered by the Senator from New York and agreed to, the paragraph reads:

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President or the Secretary of War, etc.

Mr. ROBINSON. My motion was correctly stated, then. That would leave it reading as follows:

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President, for the proceeds of the sale of nitrate of soda herein made available to the corporation, and for all unexpended balances now under the control of the Secretary of War and applicable to the nitrate plants at Sheffield, Ala., the corporation shall cause to be executed and delivered to the Secretary of the Treasury a certificate for all the common stock of the corporation and all bonds provided for by this act.

I move to strike out the words "or the Secretary of War" in the fourth line of that paragraph.

The VICE PRESIDENT. The proposed amendment will be stated.

The ASSISTANT SECRETARY. The Senator from Arkansas moves to strike out, in line 12 of the reprint of the bill, after the word "President," the words "or the Secretary of War," so that as amended the sentence will read:

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President, for the proceeds of the sale of nitrate of soda herein made available to the corporation, and for all unexpended balances now under the control of the Secretary of War and applicable to the nitrate plants at Sheffield, Ala., the corporation shall cause to be executed and delivered to the Secretary of the Treasury a certificate for all of the common stock of the corporation and all bonds provided for by this act.

The amendment was agreed to.

Mr. WADSWORTH. Now, on page 9——

Mr. ROBINSON. The same amendment should be made there, if the Senator will pardon me for interrupting him. In line 5 the words "or the Secretary of War" should be stricken out.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 9, line 5, after the word "President," the Senator from Arkansas moves to strike out the words "or the Secretary of War," so that the paragraph will read:

The President, as a condition of the transfer, conveyance, or delivery to the corporation of any property herein referred to, may require the corporation to assume any and all agreements and obligations entered into by the United States in connection with the construction, maintenance, or operation of such plants or other property.

The amendment was agreed to.

Mr. KENYON. Mr. President, I do not desire to disturb the order of proceeding, but I wish to ask about page 14 of the reprint, where I observe this language:

The directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States, and the property and moneys belonging to said corporation, acquired from the United States, or from others, shall not be deemed to be the property and moneys of the United States within the meaning of any statutes of the United States.

Mr. WADSWORTH. That is a very remarkable provision.

Mr. KENYON. It is most remarkable. What does it mean? We have certain statutes of the United States punishing officials of the United States for embezzlement or misappropriations of funds. Now, it seems that these gentlemen are to be taken entirely out of the Federal statutes.

Mr. WADSWORTH. Perhaps the Senator can see why I could not give consent to a final vote on the bill.

Mr. KENYON. I think the Senator perhaps has such interest in and knowledge of the bill that he might define this proposition.

Mr. WADSWORTH. The bill is a mess. It has been from the day it was presented to the Senate, and we will have to do a lot of work on it yet in order to make it readable.

Mr. ROBINSON. That statement is gratuitous. If the Senator will yield——

Mr. KENYON. Can the Senator from New York give any explanation of that language?

Mr. WADSWORTH. I can not. We shall have to change it, I think. It is a remarkable provision. I have several amendments pending that relate to it.

Mr. ROBINSON. Will the Senator yield for a statement?

Mr. WADSWORTH. I yield.

Mr. ROBINSON. The Senator from New York has stated that the bill is a mess and requires amendment. As a matter of fact, one of the advantages of considering a bill in the Senate is to make necessary amendments. Practically every important bill that comes to the Senate is amended, as the Senator well knows.

So far as the language to which he has referred is concerned, on page—I do not know what page to give, because there are so many prints of the bill that it is difficult to locate—it is as follows:

The directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States, and the property and moneys belonging to said corporation, acquired from the United States, or from others, shall not be deemed to be the property and moneys of the United States within the meaning of any statutes of the United States.

The manifest purpose of the language is in connection with accounting. If the officers of the corporation are officers of the United States and the moneys and properties belong to the United States, the moneys will have to be regularly turned into the Treasury and the sums necessary for the operation of the plant will have to be regularly appropriated. It is the evident purpose of the language to avoid that inconvenience.

I respectfully submit to the Senator from New York that if the United States sees fit to create a corporation and to designate officers to operate it, it is a very good plan to declare that they shall not be officers of the United States and to let the corporation run its business separate and distinct from the Treasury of the United States. That is the clear purpose of it. I am not a member of the committee that prepared the bill.

Mr. WADSWORTH. The committee did not prepare it; Mr. Glasgow prepared it.

Mr. ROBINSON. The committee reported it, and the committee, of course, is responsible for it. I think that language in the bill has a very important purpose and a very useful purpose.

Mr. WADSWORTH. One of its uses will be to take them all out from under the civil service.

Mr. ROBINSON. Does the Senator think that employees of this character, in the beginning of an organization of this kind, ought to be under the civil service? Does not the Senator think that it might be well not to have them in the beginning under the civil service? Does he not think that we would get better and more efficient employees outside of the civil service?

Mr. WADSWORTH. In other words, when we get the men we want we will cover them all in later.

Mr. ROBINSON. Yes; when we get efficient men, when we test out our men and find that they can do the work which the bill contemplates they shall do, then they ought to be covered into the civil service. I respectfully suggest to the Senator from New York that until that is done there is neither occasion nor justification for putting them under the civil service. A more important purpose of the language is manifestly to enable the corporation to do its own accounting without putting its moneys regularly into the Treasury of the United States; and also there may be other purposes.

Mr. GRONNA. Mr. President, I do not know whether the Senator from New York was present when Mr. Roberts and, I think, others explained this provision of the bill before the committee. The Senator from Arkansas has well interpreted the meaning of the language. Its purpose and its use in the bill is that they shall be permitted to deposit money in Federal reserve banks. That would not be permitted if they were officers of the United States. In that event the money would have to be deposited, as the Senator from Arkansas stated, in the Treasury of the United States.

Mr. ROBINSON. It is very difficult to conduct a governmental concern within these limitations, as the Senator from New York well knows.

Mr. WADSWORTH. I did not bring up the matter. The Senator from Iowa [Mr. KENYON] brought it up. Of course, there are two objects. One is to avoid the civil-service regulations for the hundreds and hundreds of people who are to be employed under the corporation and the other may be, as the Senator from Arkansas says, to take care of the accounts. As a matter of fact the language following takes care of the auditing of accounts and is meant to do so.

Mr. KENYON. It also removes the officers of the corporation from any prosecution for offenses under any Federal statute as Federal officers.

Mr. WADSWORTH. It does.

Mr. KENYON. That might be very helpful, of course.

Mr. WADSWORTH. It is a new proposition.

Mr. ROBINSON. Will the Senator yield again?

Mr. WADSWORTH. I do not know how the Senator feels about a question of this sort. I yield.

Mr. ROBINSON. The Senator has stated that the purpose of the first paragraph would be subserved by the language in the second paragraph. That language is:

The accounts of the corporation shall be audited under the regulations to be prescribed by the Secretary of War, who shall include in his annual report to Congress a detailed statement of the fiscal operations of said corporation.

It is perfectly clear, if that is the only language regarding the subject incorporated in the bill, that the proceeds of the corporation would still be subject to the control of the Treasury of the United States. All sums received by it would have to be paid into the Treasury and all sums paid out by it would have to be audited and paid out as are other expenses of the Government, and it would impair and hinder the corporation in the prosecution of its business. No going business concern can very readily and conveniently be operated within those limitations. The mere auditing provided for in the lines to which I have called attention would not relieve the difficulties that I have in mind.

Mr. WADSWORTH. I think the Senator overlooks the chapter or subdivision of the bill entitled "Distribution of earnings," when he says that if this language is not incorporated in the bill all proceeds will have to be turned into the Treasury. It reads as follows:

All net earnings of the corporation not required for its organization, operation, and development shall be used—

(a) To pay dividends on outstanding preferred stock.

We shall have to change that. There is no outstanding preferred stock. I am told that it has been amended to read "interest on bonds" instead of "dividends on outstanding preferred stock."

(b) To develop and improve its plants and equipment.

They do not have to go into the Treasury.

Mr. ROBINSON. I will say to the Senator, as we used to say in my school days, that it does not read that way in my book.

Mr. WADSWORTH. The Senator has not the right book, then.

Mr. ROBINSON. I have just been handed another print of the bill.

Mr. WADSWORTH. In the official print of the bill the Senator will find the language on page 10. We find this language:

All net earnings of the corporation not required for its organization, operation, and development shall be used—

(a) To pay interest on bonds—

As it will read, because that amendment has been adopted.

Such interest to be paid into the Treasury of the United States as miscellaneous receipts.

That is all that goes into the Treasury.

(b) To develop and improve its plants and equipment.

It can use its receipts and earnings for that purpose. They do not have to go into the Treasury at all.

(c) To create a reserve or surplus fund until such fund amounts to $2,500,000.

Of course, Methusaleh will be a babe to them before they ever get any such surplus.

(d) The remainder to be paid into the Treasury of the United States as miscellaneous receipts.

Mr. ROBINSON. Will the Senator yield a moment?

Mr. WADSWORTH. Certainly.

Mr. ROBINSON. The Senator will note this is in relation to net earnings. Even these provisions would not operate to prevent the requirement without the one first read, to which the Senator has objected, that the moneys shall be paid into the Treasury of the United States.

This merely provides for the use of the net earnings of the corporation and it does not expressly prevent the payment into the Treasury of the funds of the corporation or the handling through the Treasury of the funds of the corporation.

Mr. WADSWORTH. The bill authorizes the corporation to deposit its funds in any Federal reserve bank or any member bank of the Federal reserve system. As fast as it sells anything the gross receipts may be deposited in the bank, not in the Treasury of the United States.

Mr. ROBINSON. That is one of the objects in saying that the moneys shall not be considered moneys of the United States. If they were moneys of the United States, they ought to be paid into the Treasury in all probability. What harm can arise, however, to the public or to the Government by reason of the provision to which the Senator has objected?

Mr. WADSWORTH. It relieves the directors and officers of the corporation of any of the obligations which are imposed upon public officers. No Federal law can reach them in many ways in which an ordinary public officer may be reached under Federal statutes.

Mr. ROBINSON. As a matter of fact, they are mere officers of a corporation which is engaged in private business.

Mr. WADSWORTH. Which is engaged in a private business which is entirely owned by the United States.

Mr. ROBINSON. Yes; which is owned by the Government, if the Government sees fit to run the private business.

Mr. WADSWORTH. It is a grave question whether we want to put up $140,000,000 to be used in that way.

Mr. ROBINSON. The same laws would apply to them that apply to other corporations which the Government creates.

Mr. WADSWORTH. Yes; but the property that is going into their hands is not private property; it is the property of the people. It is quite a different situation, of course. This is our first experiment in State socialism of the purest kind, and it is wise for us to make up our minds to what degree of responsibility we are going to hold our agents and under what statutes.

Mr. ROBINSON. The Senator's reference to State socialism has not the slightest force to my mind. The Government has been making guns; the Government has been in the construction business.

Mr. WADSWORTH. But not in the gun business.

Mr. ROBINSON. The Government has made a good many guns at the navy yard here in Washington.

Mr. WADSWORTH. Has the Government bought and sold guns on the market?

Mr. ROBINSON. No; but we make guns. The Government is in the business of making things.

Mr. WADSWORTH. Yes; but not selling them.

Mr. ROBINSON. But the Government is making them.

Mr. WADSWORTH. The Government does not do it commercially.

Mr. ROBINSON. Oh, well——

Mr. WADSWORTH. This is a commercial corporation.

Mr. ROBINSON. Certainly.

Mr. WADSWORTH. It involves the Government going into commercial business, which is ordinarily denominated one of the principles of State socialism. I think my definition is correct. My concern now is that the taxpayers of the country shall have reasonable assurance that this corporation shall be properly organized, properly capitalized, and properly conducted, with a due sense of responsibility on the part of the men who are to have the disposal of $140,000,000 worth of property. So when I see a provision that none of "the directors, officers, attorneys, experts, assistants, agents, and other employees of the corporation" shall be considered "employees of the United States within the meaning of any statutes of the United States," I pause and consider; that is all. It has a sweeping sound.

I am not familiar with all the statutes of the United States having to do with the responsibility of public officers, but this language relieves the officials of the corporation of all such responsibility, as the Senator from Iowa has pointed out. The provision is not necessary for the purpose of giving the corporation control of its funds because other provisions in the bill give them such control. It is a matter which is worthy of consideration. I frankly say to the Senator from Arkansas that I hesitate to express my real opinion of what the effect of that language would be, but I think it ought to be carefully examined. No one has paid any attention to it.

Mr. ROBINSON. If the Senator will pardon me, I think the purpose of the language is manifest. As he himself has suggested it involves purely a question of policy.

I do not think that the language which the Senator has quoted in another part of the bill, prescribing how the net earnings of the corporation shall be used, would relieve the officials of the corporation from the statutes of the United States requiring the accounting of moneys which belong to the United States; and, so far as I am concerned, I have no objection if the Senator from New York thinks it is necessary that those men shall be declared officers of the United States to so declare them. I think it is important, however, for reasons which I have already stated, that the moneys and properties of the corporation shall not be considered to be moneys and properties of the United States.

Mr. WADSWORTH. That provision is found in the next sentence.

Mr. ROBINSON. I have no disposition, so far as I am concerned, to relieve any of the officers or employees of the corporation from liability under any statute that the Senator from New York, after consideration of the subject, thinks ought to apply to them; but I think that the language in the paragraph which declares that the moneys and properties held by the corporation shall not be moneys and properties of the United States is an important and necessary declaration if the corporation is to function successfully as a commercial organization. I think it would be a physical impossibility for it to operate successfully unless some such language as that is in the statute.

Mr. WADSWORTH. That is taken care of in the language which concludes the sentence about which we have been speaking.

Mr. ROBINSON. I do not think that it is.

Mr. WADSWORTH. The language reads:

And the property and moneys belonging to said corporation, acquired from the United States, or from others, shall not be deemed to be the property and moneys of the United States within the meaning of any statutes of the United States.

Mr. ROBINSON. That is the language which I had in mind as being necessary to retain. That is in the section.

Mr. WADSWORTH. Yes.

Mr. ROBINSON. So far as I am concerned, if the Senator from New York desires, I should, perhaps, have no objection to striking out the following language:

The directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States.

By striking out that language these officers would be placed under the civil service. I do not know that I would make any objection to eliminating that provision, but I think that we would hamper the organization of the corporation very materially in the beginning of its work if it were required that every person employed at the plant should be within the civil service. I think the Senate had better consider that matter very carefully.

Mr. WADSWORTH. I am myself puzzled, I will say very frankly to the Senator from Arkansas, as to which is the worser evil, the civil service or the political atmosphere which will very shortly inject itself into the management of this corporation, so far as appointments to places are concerned.

Mr. ROBINSON. The Senator will certainly not object to the political atmosphere that is very shortly to inject itself. If he does, I will say to the Senator that I will take great pleasure in assising him to remove himself from it to a purer atmosphere.

Mr. STANLEY. Mr. President, would the Senator from New York object after the words "statutes of the United States," to having added the words "but nothing herein contained shall exempt any officer or employee of such corporation from responsibility for embezzlement or other wrongful act under the statutes of the United States in such case made and provided"?

That would cover the Senator's objection, and would not interfere with the operation of the corporation.

Mr. ROBINSON. Mr. President, after studying the provision as carefully as I can here on the floor of the Senate I believe the language now found in the bill is about as good as can be framed, unless we shall change the policy of the paragraph. There is nothing in the present language that relieves any of the officers or employees of the corporation from prosecution for embezzlement.

Mr. WADSWORTH. Oh, no.

Mr. ROBINSON. Because an officer or employee of the corporation can be guilty of embezzling the corporation's money under the same rules and regulations and principles that he would be guilty of embezzling the Government's money. So, in my judgment, we had better leave the language as it is. We will not accomplish anything by striking it out.

Mr. WADSWORTH. I do not mean for a moment that an officer could steal moneys of the corporation and there would be no machinery to prosecute him. As I said a while ago, I am not familiar with the statutes which govern the responsibility of Government officers, but I am wondering whether that language would not repeal some portion of the statutes which we might like to retain.

Those who drew this bill all expected to be public officers under the bill, and so recommended themselves to the Secretary of War. He adopted their entire recommendations and sent them to the Senate. They are all honest men; I happen to know at least three of them, and I, of course, would never charge them with using this language in an effort to get for themselves a preferred place in that regard; but their miscalculations have been so numerous all through the consideration of this subject that I have lost confidence in a good many features of the bill as they drew it. I do not think it is inaccurate to say that the Committee on Agriculture and Forestry did not spend one minute on this particular phase of the question. I regret to bring it up on the floor of the Senate, because I am not competent myself to discuss it. However, Mr. President, I move to strike out the language between lines 14 and 18, ending with the word "and."

Mr. ROBINSON. On what page?

Mr. WADSWORTH. On page 11.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 11, line 14, after the word "The," beginning the sentence, at the end of the line, it is proposed to strike out the words:

> Directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States, and the.

Mr. ROBINSON. I do not believe the amendment should be agreed to.

Mr. McKELLAR. Question!

The VICE PRESIDENT. The question is on the amendment offered by the Senator from New York.

The amendment was rejected.

Mr. WADSWORTH. Mr. President, the question arose early in the discussion of the bill as to whether the Muscle Shoals project should be under the Secretary of War. Upon this question I have very earnest opinions. I do not think that the Secretary of War should be burdened with any more civil jurisdiction. We have piled it on him in recent years until he spends at least as much time if not more time looking after the civil jurisdiction of the War Department than he does its military affairs. Of course, we all know that the War Department, through the Corps of Engineers, has charge of river and harbor works; it also has jurisdiction over harbor lines in the ports of the country. The Secretary of War is constantly being asked to make decisions on such matters, and they take a large part of his time. Furthermore, the legislation of last winter made the Secretary of War chairman, I believe, of the Federal Power Commission, which is to have general jurisdiction over the development of water power all over the United States. The chairmanship of that board is enough to occupy one man if he did nothing else. As a matter of fact, that is not a proper function for the Secretary of War to perform. I do not think the officers of the War Department should be concerned in strictly civil occupations.

Now it is proposed to make the Secretary of War the ex officio chairman of this board and really to make him the responsible head for the carrying on of a great commercial business, to wit, the manufacture and sale of fertilizer. I think it is a grave error. The bill authorizes him to employ officers of the War Department as officers of this commercial corporation. The officers of the War Department, Mr. President, let me say with all respect to them, are not trained business men. They do not know enough about business procedure to equip them to do this work efficiently. Soldiers ought not to be assigned to work of this character. The function of a soldier when he is supported by the people of the United States is to defend the country in time of war, and in time of peace to train himself and help train others to defend the country when the country needs defense. We are getting away from that idea, and are commencing to use the Army in connection with projects that have nothing to do, directly or indirectly, with the profession of the soldier. For instance, we have the Army running canal boats in a commercial way on the barge canal in the State of New York.

There is a bureau in the War Department down here, under the Chief of Transportation, which has commenced to grow—of course, it grows—studying the rail and water rates of Europe and America, to decide whether a canal boat can go between Buffalo and New York on the New York Barge Canal under the jurisdiction of the War Department profitably at one rate or more profitably at another, and what kind of traffic it shall engage in. That is all outside of the field of soldiering. It simply puts on the Army another burden that it ought not to have. You have the Army running barges on the Warrior River in Alabama. You have them running barges and broken-down tugs on the Mississippi. All three of the operations have resulted in a large loss. This last year they lost $100,000 operating canal boats on the New York Barge Canal. The Senate passed a resolution to put them out of there. We do not want them there. The people of the State of New York own that canal. They built it. They maintain it toll free. They do not want the Government running its boats on the canal, because nobody else will run a boat there when they do it; but, of course, the Chief of the Transportation Division of the Quartermaster Department—a brigadier general who commanded 500,000 men in France at one time, now assigned to this work in the War Department—comes up here to the Capitol and appears before committees and spends a whole lot of time estimating how many more canal boats he needs, and where he is going to get captains of canal boats and deckhands. I do not know whether some of these boats are to be drawn by mule power, but probably they will not be; they will be driven by engine power. He came to see me the other day, and I gathered from him that most of his work now, or a good part of it, is running canal boats.

Now, we are going to authorize in this bill a lot more officers, as Mr. Glasgow and his friends have suggested, in the Ordnance Department, to go down there to Muscle Shoals and run a fertilizer factory, sell fertilizers, help get up the literature which will advertise the fertilizers, hire and discharge men, and run the plant, generally speaking, the way an ordinary civilian would run a commercial plant. Now, that is not the business of the Army. They are not fitted to perform it. They are not trained for it. They are removed from civilian pursuits. Their very life removes them from it. I have heard it suggested that it is a good thing to put Army officers into this kind of work, because it will teach them something about business; but, Mr. President, it is an expensive thing for the public, and I still have some regard for the public in this matter; and, in addition to that, I do not think we can spare much more of our commissioned personnel to take part in all these activities of a strictly civil character.

So, Mr. President, I move to strike out, on page 3, line 25, the words "Secretary of War" and to insert "Secretary of the Treasury."

Mr. ROBINSON. How does it read in that connection?

Mr. WADSWORTH. It reads here:

> The Secretary of War shall be ex officio chairman of the board.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from New York.

Mr. WADSWORTH. I ask for the yeas and nays on that amendment.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. GRONNA. Mr. President, I do not believe there is any opposition to this amendment.

The VICE PRESIDENT. The roll call has begun.

Mr. ROBINSON. I ask unanimous consent that the order for the call of the roll be vacated for the purpose of accepting the amendment.

The VICE PRESIDENT. There is an unqualified rule of the Senate to the effect that a roll call shall not be interfered with for any purpose.

Mr. ROBINSON. The order can be vacated by unanimous consent.

The VICE PRESIDENT. The Senator has not any right even to ask it.

Mr. ROBINSON. I have asked it.

The VICE PRESIDENT. The Secretary will proceed with the roll call.

The calling of the roll was resumed.

Mr. FERNALD (when his name was called). I have a general pair with the junior Senator from South Dakota [Mr. JOHNSON]. In his absence I withhold my vote.

Mr. CURTIS (when Mr. LENROOT's name was called). I make the same announcement that I made on the previous roll call with regard to the Senator from Wisconsin [Mr. LENROOT].

Mr. MOSES (when his name was called). I have a general pair with the junior Senator from Louisiana [Mr. GAY]. In his absence I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. WALSH of Montana (when his name was called). I have a general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN], which I transfer to the Senator from Texas [Mr. CULBERSON] and will vote. I vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Missouri [Mr. REED] and vote "nay."

Mr. WOLCOTT (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. In his absence I am not able to vote and therefore withhold my vote.

The roll call was concluded.

Mr. SMITH of Georgia. I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from New Jersey [Mr. FRELINGHUYSEN] and vote "nay."

Mr. GLASS. I transfer my pair with the senior Senator from Illinois [Mr. SHERMAN] to the junior Senator from Arkansas [Mr. KIRBY] and vote "nay."

Mr. EDGE. I transfer my general pair with the junior Senator from Oklahoma [Mr. OWEN] to the senior Senator from Idaho [Mr. BORAH] and vote "yea."

Mr. FERNALD. I transfer my pair with the junior Senator from South Dakota [Mr. JOHNSON] to the junior Senator from New York [Mr. CALDER] and vote "yea."

Mr. KNOX. Repeating my announcement on the last roll call, I withhold my vote.

Mr. MYERS. Has the Senator from Connecticut [Mr. MCLEAN] voted?

The VICE PRESIDENT. He has not.

Mr. KNOX. I have a pair with the Senator from Connecticut, and, as I am not able to obtain a transfer, I withhold my vote.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Connecticut [Mr. BRANDEGEE] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from Iowa [Mr. CUMMINS] with the Senator from Ohio [Mr. POMERENE];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Arizona [Mr. SMITH];

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK];

The Senator from Wisconsin [Mr. LENROOT] with the Senator from Tennessee [Mr. SHIELDS];

The Senator from Illinois [Mr. MCCORMICK] with the Senator from Nevada [Mr. HENDERSON]; and

The Senator from North Dakota [Mr. MCCUMBER] with the Senator from Colorado [Mr. THOMAS].

The result was announced—yeas 26, nays 29, as follows:

YEAS—26.

Ball	France	Nelson	Sterling
Capper	Hale	New	Sutherland
Colt	Jones, Wash.	Page	Townsend
Curtis	Kellogg	Phipps	Wadsworth
Dillingham	Keyes	Poindexter	Warren
Edge	King	Smoot	
Fernald	McNary	Spencer	

NAYS—29.

Ashurst	Harrison	Robinson	Trammell
Beckham	Heflin	Sheppard	Underwood
Dial	Jones, N. Mex.	Simmons	Walsh, Mass.
Fletcher	La Follette	Smith, Ga.	Walsh, Mont.
Gerry	McKellar	Smith, Md.	Williams
Glass	Nugent	Smith, S. C.	
Gronna	Overman	Stanley	
Harris	Ransdell	Swanson	

NOT VOTING—41.

Borah	Harding	McCormick	Pomerene
Brandegee	Henderson	McCumber	Reed
Calder	Hitchcock,	McLean	Sherman
Chamberlain	Johnson, Calif.	Moses	Shields
Culberson	Johnson, S. Dak.	Myers	Smith, Ariz.
Cummins	Kendrick	Newberry	Thomas
Elkins	Kenyon	Norris	Watson
Fall	Kirby	Owen	Wolcott
Frelinghuysen	Knox	Penrose	
Gay	Lenroot	Phelan	
Gore	Lodge	Pittman	

So Mr. WADSWORTH's amendment was rejected.

Mr. WADSWORTH. Mr. President, I have been having a little conference with some of the supporters of the measure, and it seems that the amendment I offered a moment ago is completely misunderstood, as I expected it was at the time. It has been suggested to me that I outline some of the amendments to the bill I would like to have adopted for the good of the Army, and incidentally, I believe, for the good of the corporation.

All I am asking now is that instead of this thing being put under the jurisdiction of the War Department and soldiers, it shall be put under the Treasury Department and business men, and I purpose to offer some amendments, very simple in character, through the bill—I do not suppose over half a dozen—which will eliminate War Department jurisdiction and establish Treasury Department jurisdiction. The Treasury Department is the business end of the Government. The Treasury Department is the auditing machinery of the Government. The War Department is incompetent to carry on a commercial business.

I know there were very few Senators here at the time I offered the amendment striking out the Secretary of War as ex officio chairman and providing that the Secretary of the Treasury shall be ex officio chairman. An amendment already adopted by the Senate provides that the accounts of this corporation shall be audited by the Treasury Department. I think the Secretary of the Treasury should be the ex officio chairman, and that that officer should be what may be termed the "liaison officer" between the President of the United States and the corporation itself.

I beg of the Senate not to employ soldiers in the selling of fertilizer, but to employ business men, if we can find them. You can not get them in the Army, and the Army is not made for that purpose. My concern has been for the good of the Army. I do not want any more brigadier generals, colonels, lieutenant colonels, majors, and captains going around engaged in commercial business. The bill specifically authorizes it.

Mr. MCKELLAR. Will the Senator yield?

Mr. WADSWORTH. I yield to the Senator.

Mr. MCKELLAR. I ask the Senator if the primary purpose of constructing the plant is not to have a supply of nitrates to be available in an emergency?

Mr. WADSWORTH. It can be turned over to the War Department at the drop of a hat when war breaks out. If ever war should break out, the War Department could take it over on the instant. But they would keep the civilian staff to run it if they were sensible. This provision puts the War Department and Army officers in charge of this commercial undertaking, and I make my plea in behalf of the Army. Some Senators have evidently suspected that I was not at all sincere in offering the amendment. I do not think there is a Senator on this floor who will say that Army officers are the best fitted type to run this concern. Without reflecting upon them in the least, I assert that they are the least fitted type to run the concern. Will the Senator from Alabama consent to a reconsideration of the vote which was just had?

Mr. UNDERWOOD. I have no control of that. I indicated to the Senator that if we can agree on a day for passing the bill I think we can come to an agreement about it, but I am not prepared to make any such statement now. Of course, I could not say anything without consulting the gentlemen who are the authors of the bill.

Mr. WADSWORTH. They are not the authors of the bill; that is the trouble.

Mr. UNDERWOOD. I mean those who reported the bill. If we could agree on a time for voting on the bill and all amendments to-morrow, I think we could probably reach an agreement about some of the amendments the Senator is proposing.

Mr. WADSWORTH. Mr. President, there is one other thing, then, I would like to have an understanding about with the Senator from Alabama and all the Senators who are proponents of this measure. There is still left in the bill the power of eminent domain. This corporation can go out and take anything by condemnation proceedings, patents, processes, dam sites, transmission lines, factories, facilities of every kind and description in any way relating to the production of nitrogen. I brought that matter up the first day of the debate. The Senator from North Dakota [Mr. GRONNA] first suggested, as I understand it, that we amend this act to prevent the corporation from having the power of condemnation. I pointed out that that would not cure the situation, because under the national defense act the President has the power of condemnation, and he could condemn anything in the country and turn it over to this corporation. Then the Senator from Connecticut

[Mr. BRANDEGEE], who is just now absent, I think verbally suggested an amendment to read something like this:

That no property shall be taken by eminent domain for the purposes of this corporation.

Mr. UNDERWOOD. I will say to the Senator from New York that several days ago the Senator from North Dakota [Mr. GRONNA], who is chairman of the committee from which the bill came, stated that he did not desire to have the power of condemnation stay in the bill. I am sure I have not, and I have talked with some Senators on this side, and they are not in favor of it. Of course, I do not admit that it is in the bill.

Mr. WADSWORTH. It says so.

Mr. UNDERWOOD. That is one construction of the language. But I do not care to discuss that. The corporation ought not to have the power to exercise the right of condemnation. There can not be any dispute between the Senator from New York and myself on that score. I stated the other day that if he would offer an amendment which would make it sure that the power of condemnation did not exist in this corporation there would be no resistance to it. Of course, the Senator replied that he wanted to strike out the whole paragraph, which did some other things.

Mr. WADSWORTH. No, Mr. President; I did not say that.

Mr. UNDERWOOD. Then I misunderstood the Senator. If the Senator has an amendment which merely prevents this corporation from exercising the right of eminent domain, I do not think there will be any resistance to that amendment. As a matter of fact, the Senator from North Dakota [Mr. GRONNA] proposed an amendment the other day looking to that change, and it was not satisfactory to the Senator from New York, and the question was dropped. So, if the Senator has an amendment, I do not see why it can not be adopted.

Mr. WADSWORTH. My delay in proposing it myself was due to the fact that I got an understanding that the Senator from Wisconsin [Mr. LENROOT] was going to offer an amendment having to do with the national defense act of 1916, which contains the power of condemnation, but I think he did not offer that amendment before he left.

Mr. UNDERWOOD. If that is all the Senator wants, I think we are fighting at shadows, because in times of peace there is no reason why this corporation should have the power of condemnation and in time of war the Congress would pass laws to give it such power, if it was necessary. Therefore if the Senator has an amendment going to that point, I do not think it is necessary to discuss it; I think it will be adopted.

Mr. WADSWORTH. Do I understand that it is the suggestion of the Senator from Alabama that we shall vote on the bill and the pending amendment to-morrow and that the amendments which I have suggested concerning the Secretary of War and the Secretary of the Treasury will be perfected and accepted in the meantime?

Mr. UNDERWOOD. Will the Senator from New York again state the amendments to which he wants to direct our attention, and I will give him an answer if I can.

Mr. WADSWORTH. Those I had in mind were to make such amendments to the bill as would take this corporation out of the jurisdiction of the War Department, breaking all connection with the War Department in time of peace.

Mr. UNDERWOOD. So that we may have no difficulty in mind about the matter, does the Senator mean that where it puts the power in the Secretary of War it shall be put in the Treasury Department?

Mr. WADSWORTH. I should infinitely prefer that.

Mr. UNDERWOOD. Is that the extent to which it goes, and no further?

Mr. WADSWORTH. That is the extent to which it goes.

Mr. UNDERWOOD. And what is the other proposition the Senator wants?

Mr. WADSWORTH. And also, may I say, to strike out the language on the last page which would authorize the appointment of an officer of the War Department as a director of the corporation, with the provision there for the compensation for his services, even though the Senator from North Dakota has put in a provision that he shall not have two salaries. I do not want to have that situation created in the Army, where an Army officer would be given the choice of which of two salaries he would take. I do not want him eligible for it at all.

Mr. UNDERWOOD. I do not think that provision, of course, is material to the bill. I mean, it is useful, but I do not pretend to say that the bill would not survive without it.

Mr. GRONNA. Mr. President, the Senate adopted an amendment proposed by myself yesterday providing that no officer shall receive more than one salary. Of course, if the Senator from New York can agree with the Senator from Alabama that no Army officer shall be an officer or director in this corporation, it is for them and for the Senate to decide. I said on yesterday that when an Army officer possessed the knowledge and skill, I saw no reason why this corporation should not be given the privilege of having his services. But I do not seriously object to the amendment.

Mr. UNDERWOOD. So far as that is concerned, I think if the Senate agrees to the proposition of the transfer of the power of operating this corporation from the War Department to the Treasury Department it will exclude Army officers anyhow, and although I prefer the bill as it was originally drafted in that respect, it has been before the Senate for nearly two weeks and I would like to see it finally disposed of; and I do not think it would be vital to the life of the bill to agree to this amendment; it would be a question of operation. So if it would be agreeable to the Senator from New York to let us dispose of the bill in that way, I think we had better reach an agreement and come to a vote and dispose of the matter.

Then, as I understand the amendment which the Senator from New York is willing to agree to, it is that where the bill refers to the Secretary of War, except where we change it to "President," to which the Senator agreed, we shall insert the words "Secretary of the Treasury" and strike out the clause in the latter part of the bill which refers to Army officers serving, and put in an amendment that eliminates the power of condemnation. Has the Senator his amendment with reference to the elimination of the power of condemnation?

Mr. WADSWORTH. I have not proposed it. I have it here.

Mr. UNDERWOOD. Will the Senator read it?

Mr. WADSWORTH. I have one here, but I would like to study its application. It reads:

That no property shall be taken by eminent domain for the purposes of this corporation.

Mr. UNDERWOOD. I think that would be satisfactory.

Mr. WADSWORTH. That may have to be elaborated a little to be sure that it reaches the result desired.

Mr. UNDERWOOD. We will not find fault with the amendment. Of course, we can not speak for everyone in the Senate, but we will speak for those on our side who are here. We will agree to that amendment if the Senator will consent to a vote to-morrow afternoon at 3 o'clock.

Mr. POINDEXTER. Mr. President, there are a good many features of the bill that have apparently not been discussed. I have not followed the entire debate, but it has been apparently on the basis of the establishment of a nitrate plant at Muscle Shoals as though it were a specific project, and on the basis of an appropriation of some $12,500,000 for that purpose. As a matter of fact, as I read the bill, it goes very much further than that both in respect to the plant and in respect to the amount of money that is involved.

If a plant of this kind is going to be established, it looks as though it ought to be a specific plant, a specifical, well-defined project, an individual undertaking to be authorized by Congress in the bill. But as the bill is drawn there is no limit whatever to the powers of the corporation under the authority of the President of the United States, the expenditure of money, the incurring of obligations, even to the extent of issuing the bonds of the United States.

The bill vests in the President of the United States powers which never before have been vested in any President of the United States in time of peace, if it is passed as it is now worded. It not only authorizes the establishment of a plant at Muscle Shoals but it would authorize the corporation, without any further authority of Congress, to establish plants in any State in the United States and the erection of water-power works on any navigable stream in the United States. In order to pay for them, it authorizes the corporation formed under the bill, whenever they receive the consent of the President, to take and expend whatever balance there may remain of the moneys in the hands of the President that have been appropriated by Congress in the past for the purpose of carrying on the great war in which the country has just been engaged. It revives and gives permanent force to section 12, for instance, of the national defense act, and in that section alone $20,000,000 was placed at the disposal of the President of the United States without limitation or any specific manner of expenditure being named by the act. The pending bill provides that whatever remains of that may be taken.

The purposes of the bill are not simply for the development of a water-power project at Muscle Shoals, along any of the

lines that have been discussed here, but would authorize the acquiring of additional property on any of the great rivers and navigable streams of the West. Many water-power projects are now being contemplated by private enterprise, under the terms of the water-power act which has just been passed and which, when developed, would be subject to the control of the Government of the United States under the terms of that act and which apparently it was the policy of Congress should be developed at private expense under private initiative, with that sort of business efficiency which ordinarily characterizes private enterprise, and is justified in a public facility and public use when it is subject to the control and authority of the Government.

I noticed in the papers last evening a statement from the Attorney General of the United States that any of the funds that have been appropriated for the use of the President for carrying on the war that had been allotted to the various bureaus of the Government and have not been expended were still available. The article contained a statement of the Attorney General that there was a large surplus of these funds still unused, and that they might be transferred by the President from the bureaus which now had them to any other purpose or any other bureau, within his discretion. Those funds would be subject to disposition under the bill as it is now drawn without any limit as to the amount, except the limit of the funds themselves. The same thing is true as to the bonds, if there are any of them, and I understand that there are, in the Treasury of the United States that have heretofore been authorized by Congress and that have not been disposed of.

Personally I am not willing to consent to vote at as early an hour as that mentioned by the Senator from Alabama [Mr. UNDERWOOD] upon a bill which proposes to depart so radically from the ordinary policies of the Government as this bill does in the respects to which I have referred.

Mr. UNDERWOOD. Mr. President, I only wish to say that of course every Senator must come to his own conclusion about what the bill means. I have not the slightest idea that the bill means anything like the picture which the Senator from Washington has drawn. I see no such powers in it as he has indicated, but that is a mere matter of opinion. At this time I do not rise for the purpose of debating the bill, but the Senator indicates that he is not willing to give unanimous consent for a vote, and, of course, if that is the case——

Mr. ROBINSON. Mr. President, may I interrupt the Senator merely to suggest that perhaps if more time be given the Senator from Washington would consent? He said he was not in a position to consent to such an early time, and I suggest that the Senator from Alabama modify his request and name 5 o'clock as the hour.

Mr. POINDEXTER. What I meant by that was that I did not intend and it is not my purpose to delay to what I would regard an unreasonable extent the vote on the bill. I mean simply that I am not quite ready to-day to agree upon any time for the vote.

I believe the Senator from North Dakota has really had charge of the bill, but the Senator from Alabama has been quite active in promoting it——

Mr. GRONNA. To be quite accurate, if the Senator will pardon me, the Senator from South Carolina [Mr. SMITH] has charge of the bill.

Mr. POINDEXTER. The Senator from Alabama has been quite active in his advocacy of the bill. He suggests that he is of the opinion that the bill does not contain any such provisions as those to which I have just referred. This state of information of one of the leading advocates of the bill indicates we are not prepared to vote. Unless the bill has been changed, and I am informed that it has not been changed, I wish to call the attention of the Senator from Alabama to the provisions about which there can not be any doubt at all, in my opinion. If Senators will examine them with candid minds they will see that they have the effect to which I have referred.

In subdivision (e), on page 5 of the bill, it is provided that—

By direction of the President, to act as his agent—

That is, the authority is given to the corporation to act as his agent—

in carrying out and performing any or all of the duties imposed upon him by section 124 of the act of June 3, 1916, known as the national defense act.

There can be no question about the meaning of that language. All one has to do is to read the language and then read section 124 of the national defense act to see what the effect of the bill is.

Mr. UNDERWOOD. I do not desire to debate the question with the Senator, but will he allow me to analyze that statement from my viewpoint?

Mr. POINDEXTER. Certainly.

Mr. UNDERWOOD. The national defense act provides for the construction of a dam and the building of a plant to manufacture powder and fertilizer out of nitrogen. The plant is built, the dam has been located, and the only thing remaining that the President could delegate would be, if possible, the power of condemnation, and the Senator has just heard me state to the Senator from New York that there is no opposition to his amendment to eliminate the power of condemnation.

Mr. POINDEXTER. It is quite evident that the Senator from Alabama has not recently examined the national defense act. It contains a great deal more than what the Senator has just stated.

Mr. UNDERWOOD. My construction is that the clause refers only to section 124 of the national defense act.

Mr. POINDEXTER. Let me read to the Senator section 124, as evidently he has not recently read it. It does not simply provide for the location of a plant, as the Senator says. It is not limited to that in any way at all. On the contrary, it authorizes the President to acquire and develop plants, at his discretion, anywhere in the United States, and contains additional authority as to the expenditure of funds granted him by Congress for purposes of war, which are expressly turned over to him by this act for use under the bill which is now being discussed and which the section to which I have just referred authorize the corporation to use as the agent of the President. Section 124, reading only those portions of it which are pertinent to the discussion, provides, among other things, power in the President as follows:

He is—

also hereby authorized and empowered to designate for the exclusive use of the United States, if in his judgment such means is best and cheapest, such site or sites, upon any navigable or nonnavigable river or rivers or upon the public lands, as in his opinion will be necessary for carrying out the purposes of this act.

That is not a specific site. That is as general as language could be. That is not cured by striking out power of eminent domain, because section 124 provides for acquisition by purchase.

Mr. UNDERWOOD. Of course, the Senator is not taking my viewpoint of it. My statement is that we authorized the President to perform an act there, to select sites and spend the $20,000,000 for a dam or a site. He has made the selection and his power is gone.

Mr. POINDEXTER. Unfortunately for the construction given by the Senator from Alabama, that is not the only language in the national defense act referring to the matter.

Mr. UNDERWOOD. I am referring to that particular part of the language. The President has exhausted his power.

Mr. POINDEXTER. It also authorizes him to construct and develop and conduct the plant, and he is—

further authorized to construct, maintain, and operate, at or on any site or sites—

Quite different from what the Senator from Alabama has said—

so designated, dams, locks, improvements to navigation, power houses, and other plants and equipment or other means than water power, as in his judgment is best and cheapest, necessary or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers and other useful products.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. POINDEXTER. Certainly.

Mr. ROBINSON. The President is empowered to construct plants upon a site or sites designated. He is empowered to designate a site or sites. Having by the selection of one site exhausted his power to designate, he would be unable to construct plants anywhere except upon that site designated, as a matter of law.

Mr. POINDEXTER. That construction is not supported by anything in the language of the act, but I will let the Senator's view be judged without comment by comparison with the very plain language of the national defense act.

Mr. UNDERWOOD. More than that—if the Senator will allow me, and I do not care to discuss the question further—if the Senator will refer to subdivision (e), which he is discussing, he will see that that subdivision necessarily only conveys to the corporation the power of the President of the United States in relation to the plant now at Muscle Shoals.

Mr. POINDEXTER. Oh, no.

Mr. UNDERWOOD. Because it reads:

(c) By direction of the President, to act as his agent in carrying out and performing any or all of the duties imposed upon him by section 124 of the act of June 3, 1916, known as the national defense act, including, after its completion, the operation of the hydroelectric power plant now being constructed at Muscle Shoals, and the use and sale of the hydroelectric power to be developed under authority of the act of June 3, 1916, aforesaid.

In other words, referring to what is in existence at Muscle Shoals. There is not any question about that. That is the limitation in the act.

Mr. POINDEXTER. The Senator should have read the whole section. I suppose he has read it heretofore, but I think it is pertinent.

Mr. UNDERWOOD. I have read it.

Mr. POINDEXTER. It proceeds as follows:

And the President is authorized, in his discretion, to delegate to the corporation any and all powers and duties conferred or imposed upon him by said act, which relate—

Not to the Muscle Shoals project but—

which relate to the production, development, or manufacture of atmospheric nitrogen products, or which are incidental thereto—

There is no limit to the authority which is vested in the President by this provision—

and to pay into the treasury—

That part is also pertinent to be considered, as it confers specific authority—

and to pay into the treasury of said company any unexpended balance out of the appropriation made by section 124 of the act of June 3, 1916, such funds to be used by the corporation for the purpose of said act as amended by this act.

The funds referred to in the national defense act are quite extensive. One item is referred to in section 124, as follows:

The sum of $20,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, to enable the President of the United States to carry out the purposes herein provided for.

And there is this further provision, which is revived by the nitrate bill now under discussion:

In order to raise the money appropriated by this act—

That is, the national defense act—and the authority specified here is expressly revived by the nitrate bill—

and necessary to carry its provisions into effect, the Secretary of the Treasury, upon the request of the President of the United States, may issue and sell, or use for such purpose or construction hereinabove authorized, any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $20,000,000.

There is something still further in section 124 showing the wholly erroneous idea which the Senator from Alabama has expressed as to the contents of the national defense act being limited to a specific site or a certain amount of money.

Mr. SMITH of South Carolina. May I ask the Senator a question as to his construction of the power which he has been discussing?

Mr. POINDEXTER. I should like to refer to another provision for a moment in order that the two may be discussed together. Continuing the reading of section 124 of the national defense act, it provides further:

The President is authorized to lease, purchase, or acquire, by condemnation, gift, grant, or devise, such lands and rights of way as may be necessary for the construction and operation of such plants—

The word "plants" is used—the plural—

and to take from any lands of the United States, or to purchase or acquire by condemnation, materials, minerals, and processes, patented or otherwise, necessary for the construction and operation of such plants and for the manufacture of such products.

The products of such plants shall be used by the President for military and naval purposes to the extent that he may deem necessary, and any surplus which he shall determine is not required shall be sold and disposed of by him under such regulations as he may prescribe.

The President is hereby authorized and empowered to employ such officers, agents, or agencies as may in his discretion be necessary to enable him to carry out the purposes herein specified, and to authorize and require such officers, agents, or agencies to perform any and all of the duties imposed upon him by the provisions hereof.

So I say, Mr. President, if the Senator from South Carolina will pardon me for a moment, that if the bill shall pass, the official machinery which Congress has been contemplating for the purpose of establishing and conducting a nitrate plant is not limited to the specific provisions of the bill now under consideration. There is no limit of power because of the general authority that is vested in the President of the United States to make the corporation his agent because of the express authority of the national defense act which is hereby revived, under which there is vested in the President the power to employ such agents, officials, and employees as, in his judgment, he may see fit for the purpose of establishing, maintaining, and operating any number of plants anywhere in the United States where he may choose to locate them.

Mr. SMITH of South Carolina. At that point, if I may interrupt the Senator, I should like to ask him a question. All that the Senator has read as being set forth in section 124 of the national defense act was covered by the appropriation of $20,000,000 to carry out all the purposes which he has enumerated. To accomplish those purposes there was a limit under the appropriation by Congress of $20,000,000. The committee or the commission, or those to whom the President delegated his powers, selected the site at Muscle Shoals and spent the $20,000,000. Does the Senator from Washington think that because of the language in the pending bill, referring to section 124, the corporation could go beyond the amount of money which has been appropriated and which has already been spent at this particular site?

Mr. POINDEXTER. I did not catch the question of the Senator.

Mr. SMITH of South Carolina. The question is this: All the purposes set forth by the Senator in what he has read were predicated upon the appropriation of, or made possible by the use of, $20,000,000. The $20,000,000 has been appropriated and has been spent at this particular site. Therefore the power vested in the President has been exhausted by virtue of the use of the appropriation, and he can do none of these things referred to by the Senator unless an additional appropriation shall be made. In addition to that, the President has exhausted, as has been suggested to me, his power under the authorization in the national defense act to designate a site or sites by reason of having selected a site.

Mr. POINDEXTER. Then let us strike out the provision. If it does not mean anything, we can dispose of the whole question by striking it out. If the President has exhausted his powers under it, there is no use of reviving them here; and why not let the provision be eliminated from the bill?

Mr. SMITH of South Carolina. The only objection is that there is a corollary which the Senator is getting confused with the mere power to designate sites. I claim that the President has exhausted his power to designate any further sites——

Mr. POINDEXTER. How about the power to maintain and operate sites? The other day we had here an experience——

Mr. SMITH of South Carolina. Let me ask the Senator a question.

Mr. POINDEXTER. I will yield in a moment. The question arose as to what extent the Government should be obligated by administrative officers incurring debts under an authorization for which no appropriation had been made, a certain enlisted strength for the Army having been authorized, but no appropriation having been made for it. It was construed by the Secretary of War, who will probably construe the bill now under consideration, if it shall become a law, to mean that he was directed to recruit the Army to that strength, notwithstanding there had been no appropriation for it. So certainly it will be construed by him that when he was authorized to establish plants and to purchase and acquire land that he did not have to wait for an appropriation to be made but could proceed under the act, and Congress undoubtedly, as has been its invariable practice, would appropriate the money to redeem the obligations which had been incurred by its executive officials under express legislative authority granted to them.

Mr. SMITH of South Carolina. Mr. President, so far as I am individually concerned, I think the power of the President under section 124, so far as selecting a site is concerned, has been exhausted because of the selection of one particular site; but there does grow out of the authority vested in him by section 124 the power to determine what use he shall make of the proceeds of the plant; and, of course, the revival of the provision—not its revival exactly, but its continuance, for it is a law that is in effect until the purpose shall have been accomplished——

Mr. POINDEXTER. No——

Mr. SMITH of South Carolina. If the plant is completed at Muscle Shoals, section 124 is still operative as to what the President shall do with the product of that plant.

Mr. POINDEXTER. Section 124, Mr. President, is not the only section of the national defense act that is applicable to this bill.

Mr. SMITH of South Carolina. That is the only section to which this bill refers at all.

Mr. POINDEXTER. Well, let us read the language of it now and see if the Senator does not agree with me that it goes further than that. It says, at the botom of page 5:

including, after its completion, the operation of the hydroelectric power plant now being constructed at Muscle Shoals, and the use and sale of the hydroelectric power to be developed under authority of the act of June 3, 1916, aforesaid—

I leave that to the fairness of the Senator from South Carolina himself to determine whether it is confined to Muscle Shoals—

the operation of the hydroelectric power plant now being constructed at Muscle Shoals, and the use and sale of the hydroelectric power to be developed under authority of the act of June 3, 1916, aforesaid—

That does not say merely section 124 of the act of June 3, 1916; the whole act is referred to—

and the President is authorized, in his discretion, to delegate to the corporation any and all powers and duties conferred or imposed upon him by said act—

Not by section 124 of said act—

which relate to the production, development, or manufacture of atmospheric nitrogen products.

Mr. SMITH of South Carolina. Section 124 is the only portion of the national defense act which refers to atmospheric nitrogen.

Mr. POINDEXTER. I fear the Senator has not recently examined that act, for section 120 of the national defense act contains a great deal of language which relates to the production of nitrogen or any other elements of ammunition, and certainly the products at the plants authorized by this bill come under the head of ammunition or material for ammunition. This is the language of section 120:

And any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any plant equipped for the manufacture of arms or ammunition, or parts of ammunition.

Perhaps I had better read the beginning of the section—

The President * * * is empowered, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement——

Mr. SMITH of South Carolina. Did not the Senator leave out some words there that are very pertinent? It reads:

The President, in time of war or when war is imminent, is empowered—

And so forth.

Mr. POINDEXTER. Yes; I left out a great deal which is not necessary to establish the point I am making.

Mr. SMITH of South Carolina. Is not that provision as to when war is imminent a vital qualification?

Mr. POINDEXTER. It is in the discretion of the President to determine when war is imminent. Who knows whether war is imminent or not? Who is to determine whether it is or not?

Mr. SMITH of South Carolina. Does the Senator think that the President would, in order to carry his point, say that war is imminent now?

Mr. POINDEXTER. I do not know whether he would or not. I thought that war was imminent for some time prior to the date of our entry into the German war, when the President apparently did not think it was; and I think that the Senator from South Carolina, judging from his remarks the other day, was of the opinion that war might be imminent now.

Mr. SMITH of South Carolina. War may be imminent, but it is a question of our knowledge of it. There is a difference between war and the imminence of war.

Mr. STANLEY. Mr. President——

Mr. POINDEXTER. Let me read this, and then I will yield to the Senator from Kentucky. I was only reading the beginning of the section in order to get the construction of the sentence that followed.

As to the power that is vested in the President, he is empowered—

through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement, to place an order with any individual, firm, association, company, corporation, or organized manufacturing industry for such product or material as may be required, and which is of the nature and kind usually produced or capable of being produced by such individual, firm, company, association, corporation, or organized manufacturing industry. Compliance with all such orders for products or material shall be obligatory—

And so forth. This language confers the power upon the President, as at present when we are in a legal status of war, or at any time when in his judgment war is imminent, to impress into the service of the Government—

any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof—

And these orders—

shall take precedence over all other orders and contracts theretofore placed with such individual, firm, company, association, corporation, or organized manufacturing industry, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any plant equipped for the manufacture of arms or ammunition, or parts of ammunition, or any necessary supplies or equipment for the Army, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any manufacturing plant which, in the opinion of the Secretary of War, shall be capable of being readily transformed into a plant for the manufacture of arms or ammunition, or parts thereof, or other necessary supplies or equipment, who shall refuse to give to the United States such preference in the matter of the execution of orders, or who shall refuse to manufacture the kind, quantity, or quality of arms or ammunition, or the parts thereof, or any necessary supplies or equipment, as ordered by the Secretary of War, or who shall refuse to furnish such arms, ammunition, or parts of ammunition, or other supplies or equipment, at a reasonable price as determined by the Secretary of War, then, and in either such case, the President, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement herein provided for, is hereby authorized to take immediate possession of any such plant or plants, and through the Ordnance Department of the United States Army, to manufacture therein in time of war, or when war shall be imminent, such product or material as may be required.

Mr. STANLEY. Mr. President, the Senator from Washington admits that the imminence of war is a condition precedent to the exercise of the powers named in article 124, does he not?

Mr. POINDEXTER. Not at all.

Mr. STANLEY. Does not the act so state?

Mr. POINDEXTER. Not at all; it does not. Section 120, which I have just read, so states; not section 124.

Mr. STANLEY. Well, section 120. Now, does the Senator believe that the President of the United States will invoke the powers of that section, predicated upon the imminence of war, to operate a plant for making fertilizer?

Mr. POINDEXTER. He would not be able to invoke the powers under section 120, whether war was imminent or not imminent, or regardless of any limitations, for the purpose of making fertilizer, because that section relates only to the making of ammunition, and that is what I am talking about. But what I want to point out is this: I would undertake to demonstrate the proposition before a tribunal that had no legislative or other interest in the question, and regarded it merely as an abstract legal proposition, that by the revival of section 120 of the national defense act, which would be done under the nitrate bill now under discussion, Congress would have delegated the power of putting the Nation into a state of war, and would have given to the executive head of the Government the authority in his discretion to exercise war powers in the seizure of private plants which he, in his judgment, might deem to be useful for the puprpose of procuring ammunition, if they did not comply with such orders as to price or as to manufacture and other conditions as he chose to impose upon them.

If Congress is ready so to depart from the fundamental principles of the American Government, which heretofore have kept the issues of peace and war in the control of the representatives of the people as constituted in the Legislature of the Nation, of course it may do so. I do not regard it as unconstitutional, but it is a departure from anything that has ever been undertaken before. My purpose is simply to call attention to it, and I am surprised that there is any difference of opinion about the effect of the bill in that regard. It may be due to the manner in which the bill originated. I was very much surprised to hear in the debate that the Senator who introduced this bill really did so on request. It was not prepared in Congress, and it is perfectly evident from the debate that its effect and even its specific provisions have not been carefully examined by those who are chiefly advocating its passage.

Something was said a moment ago by the Senator from Arkansas [Mr. ROBINSON] and the Senator from Alabama [Mr. UNDERWOOD] about section 124 having become functus officio; that the President had exhausted his powers under that section; that he had exhausted the appropriation under it; that that appropriation was limited to $20,000,000; and that nothing more could be done. As a matter of fact, the appropriation was not limited to $20,000,000 under section 124. There was not only an appropriation of $20,000,000 in section 124 but there was the authorization for the sale, in addition to that, of $20,000,000 of Panama Canal bonds, to be used for the purpose of developing nitrate plants, and the section of the bill to which I have referred revives that authorization. It not only authorizes the President to do it but it vests this corporation with the function of becoming the agent of the President in the expenditure of this money.

Mr. KELLOGG. Mr. President, if the Senator will yield, I should like to ask, if the power was exhausted in spending the $20,000,000, how did they happen to spend over $100,000,000 in the construction of this plant?

UMI

Mr. POINDEXTER. Yes; that is a very pertinent question. Furthermore, he is not limited to the expenditure of $20,000,000, or even of $40,000,000, by section 124 of the national defense act. He is not limited at all. He could have expended a billion dollars, and the people with whom he contracted for the delivery of material or for construction under the authority of that act would have had at least an equitable claim against the Government of the United States for reimbursement, because he was authorized without any specific limitation being placed upon the extent to which he could incur governmental obligations. You can not say, when he is given an unlimited blanket authority of this kind, that because in another part of the section only $20,000,000 is appropriated for the purpose, that limits the extent of his power. We know from constant experience that it does not.

My purpose in rising, however, was simply to say that on account of these matters, about which there is evidently a difference of opinion, it is necessary for me, at least to-day, to object to fixing a specific date to vote on the bill.

Mr. STANLEY. Mr. President, I call the attention of the Senator to the fact, in connection with the appropriation of money provided for in section 128, that there is this language in the last two lines of the paragraph, lines 10 and 11, on page 6:

Such funds to be used by the corporation for the purpose of said act as amended by this act.

Those words apply to the use of any moneys authorized under the national defense act. You are abundantly safeguarded by that language from any abuse of the broad powers contained in the national defense act.

Mr. POINDEXTER. Mr. President, I only want to say, in reply to the Senator from Kentucky and his claim that the expenditure of the funds under section 124 is limited by the language of subdivision (e) to which he has referred, that that limitation does not apply to the vast authority vested in the President under section 120 of the national defense act which I have read; furthermore, that the powers vested in this corporation under the bill which we are now discussing are enormous and extensive, and that even if the Senator's viewpoint were correct it is still true that the moneys appropriated in section 124 would still be available, any of them that are left, and including the proceeds of the bonds that are referred to there, for such purposes as are specified in this act.

The VICE PRESIDENT. The bill is still before the Senate as in Committee of the Whole, and open to amendment.

Mr. WADSWORTH. Does the Senator from Alabama care to continue further this evening?

Mr. UNDERWOOD. I think if we can not reach an agreement about disposing of the amendments and coming to a vote, we ought to go on and vote on as many of them as possible to-day.

Mr. POINDEXTER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Capper	Jones, N. Mex.	Page	Smoot
Curtis	Jones, Wash.	Phipps	Stanley
Dial	Kellogg	Poindexter	Sutherland
Glass	La Follette	Ransdell	Swanson
Gronna	McNary	Robinson	Trammell
Hale	Moses	Sheppard	Underwood
Harris	Myers	Simmons	Wadsworth
Harrison	New	Smith, Md.	Wolcott
Heflin	Overman	Smith, S. C.	

The VICE PRESIDENT. Thirty-five Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of the absent Senators.

The reading clerk called the names of the absent Senators, and Mr. McKELLAR, Mr. NUGENT, Mr. STERLING, and Mr. WILLIAMS answered to their names when called.

Mr. GERRY, Mr. FERNALD, Mr. JOHNSON of California, Mr. KEYES, Mr. WALSH of Massachusetts, Mr. CALDER, Mr. SPENCER, and Mr. DILLINGHAM entered the Chamber and answered to their names.

The VICE PRESIDENT. Forty-seven Senators have answered to the roll call. There is not a quorum present.

Mr. FLETCHER and Mr. WALSH of Montana entered the Chamber and answered to their names.

The VICE PRESIDENT. Forty-nine Senators have answered to the roll call. There is a quorum present.

RECESS.

Mr. GRONNA. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 4 o'clock and 55 minutes p. m.) the Senate took a recess until to-morrow, Friday, January 14, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *January 13, 1921.*

The House met at 12 o'clock noon.

Rev. Preston A. Cave, pastor H Street Christian Church, Washington, D. C., offered the following prayer:

Our Father who art in heaven, we hallow Thy name in our hearts. We pause here in the middle of the day for a moment to think of Thee and to acknowledge our dependence upon Thee, for we need Thee at every turn of the way. We need Thee for the discharge of every holy purpose of our lives. We need Thee in the time of our strength, lest we forget the source of our strength. We need Thee in the time of our weakness, lest we forget the source of our health and healing. And we thank Thee that Thou art the Lord of all times; that Thou art ever present round about us; that Thou hast promised to be with us all the day. Grant that we may be conscious of Thy imminence all the while.

We thank Thee for the preservation of our lives throughout the night that has gone, for the light of this new day, bringing its responsibilities and privileges. Grant us the wisdom and strength that we need to-day for the discharge of the duties devolving upon us, and may we so perform those duties that when the evening shadows shall have fallen and we return again to our homes we may lie down in the consciousness that we have well performed the duties of the day.

May Thy blessing be upon the families of all the Representatives in this House. Keep them in health and strength.

Bless our country, we pray Thee. Grant to guide us through these days of reconstruction, and out of all may there come glory to Thee, blessing to the people, success to our Nation, and peace for all the world. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE TO EXTEND REMARKS.

Mr. FESS. I ask unanimous consent to extend my remarks in the RECORD by printing some observations upon the industrial outlook.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. PARRISH. I ask unanimous consent to extend my remarks, to include a statement of the expense of the upkeep of rural carriers' advances during one year—a very short matter.

The SPEAKER. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

CHANGE OF REFERENCE.

The SPEAKER. The Chair referred H. R. 15665, relative to the fisheries of Alaska, introduced by the gentleman from Maine [Mr. WHITE], to the Committee on the Territories. The Chair thinks that was a mistake and that the bill should have been referred to the Committee on the Merchant Marine and Fisheries, and with the consent of the House will rerefer the bill to the Committee on the Merchant Marine and Fisheries. Is there objection?

There was no objection.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. WOOD of Indiana. I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the legislative appropriation bill, H. R. 15543.

The SPEAKER. The gentleman from Indiana moves that the House resolve itself into the Committee of the Whole House on the state of the Union for further consideration of the legislative, executive, and judicial appropriation bill.

The question being taken, the Speaker announced that the ayes appeared to have it.

Mr. SHERWOOD. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Ohio makes the point of order that there is no quorum present. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 296, not voting 134, as follows:

YEAS—296.

So the motion was agreed to.

The result of the vote was announced as above recorded.

The Clerk announced the following pairs:

Until further notice:

Mr. RODENBERG with Mr. SANDERS of Louisiana.

Mr. JUUL with Mr. CRISP.

Mr. BLAND of Indiana with Mr. MCKEOWN.

Mr. HARRELD with Mr. WRIGHT.

Mr. SANDERS of Indiana with Mr. RANDALL of California.

Mr. HUTCHINSON with Mr. JACOWAY.

Mr. MONAHAN of Wisconsin with Mr. BRUMBAUGH.

Mr. NELSON of Wisconsin with Mr. MAJOR.

Mr. YOUNG of North Dakota with Mr. SEARS.

Mr. SINCLAIR with Mr. GRIFFIN.

Mr. EDMONDS with Mr. CLEARY.

Mr. GRAHAM of Pennsylvania with Mr. DEWALT.

Mr. SCHALL with Mr. MEAD.

Mr. MCPHERSON with Mr. KINCHELOE.

Mr. JOHNSON of South Dakota with Mr. FERRIS.

Mr. BRITTEN with Mr. RIORDAN.

Mr. VOLK with Mr. WISE.

Mr. YATES with Mr. MCLANE.

Mr. MACGREGOR with Mr. LINTHICUM.

Mr. LEHLBACH with Mr. JOHNSTON of New York.

Mr. WILLIAMS with Mr. O'CONNELL.

Mr. SELLS with Mr. MOONEY.

Mr. DENISON with Mr. BLAND of Missouri.

Mr. VARE with Mr. CASEY.

Mr. HULL of Iowa with Mr. GANDY.

Mr. CURRY of California with Mr. GALLIVAN.

Mr. BURKE with Mr. MCKINIRY.

Mr. WHEELER with Mr. RAINEY of Alabama.

Mr. SNYDER with Mr. DOMINICK.

Mr. DEMPSEY with Mr. SULLIVAN.

Mr. VESTAL with Mr. OVERSTREET.

Mr. PERLMAN with Mr. CANDLER.

Mr. GREENE of Vermont with Mr. WOODS of Virginia.

Mr. VOLSTEAD with Mr. EAGLE.

Mr. MCFADDEN with Mr. LONERGAN.

Mr. REED of West Virginia with Mr. DOOLING.

Mr. CLASSON with Mr. SCULLY.

Mr. TAYLOR of Tennessee with Mr. NICHOLLS.

Mr. HUSTED with Mr. WEAVER.

Mr. GOULD with Mr. DAVEY.

Mr. COPLEY with Mr. MANN of South Carolina.

Mr. STRONG of Pennsylvania with Mr. ROWAN.

Mr. MCKINLEY with Mr. CANTRILL.

Mr. ELLSWORTH with Mr. DONOVAN.

Mr. SMITH of Michigan with Mr. MAHER.

Mr. MORIN with Mr. BLACKMON.

Mr. CROWTHER with Mr. BABKA.

Mr. HULINGS with Mr. KITCHIN.

Mr. SMITH of Illinois with Mr. HAMILL.

Mr. MCCULLOCH with Mr. KETTNER.

Mr. STINESS with Mr. OLNEY.

Mr. MCLEOD with Mr. PELL.

Mr. FAIRFIELD with Mr. EAGAN.

Mr. ROWE with Mr. CARSS.

Mr. DALE with Mr. CALDWELL.

Mr. HILL with Mr. EVANS of Nevada.

Mr. JEFFERIS with Mr. BELL.

Mr. ELSTON with Mr. JAMES of Virginia.

Mr. MCKENZIE with Mr. BOOHER.

Mr. HICKS with Mr. BRINSON.

Mr. FREAR with Mr. GANLY.

Mr. JAMES of Michigan with Mr. GALLAGHER.

Mr. KENNEDY of Rhode Island with Mr. JOHN W. RAINEY.

Mr. KREIDER with Mr. MCGLENNON.

The doors were opened.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543, the legislative, executive, and judicial appropriation bill.

The Clerk reported the title of the bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For additional employees in the office of the Quartermaster General, $250,000: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding $1,800 per annum except one at $2,400.

Mr. GRAHAM of Illinois. Mr. Chairman, I move to strike out the last word, in order to inquire of the chairman how this item compares with the item in the current law?

Mr. WOOD of Indiana. Mr. Chairman, does the gentleman mean additional compensation?

Mr. GRAHAM of Illinois. Yes.

Mr. WOOD of Indiana. I would state to the gentleman that the last appropriation act carried for this item $370,000. as against $250,000 in this bill.

Mr. GRAHAM of Illinois. Mr. Chairman, I do not find myself in harmony with these items as contained in this bill carrying lump-sum appropriations for additional employees in the various offices of the War Department without specifying for what pur-

pose the moneys are to be used. I have taken the legislative bill of a year ago and find that at that time there was appropriated $3,000,000, in round numbers, for additional employees in the War Department. This year, according to my computation, approximately $2,336,210 for that purpose is appropriated, if I have figured it correctly. The reports of what these additional employees are have come to the committee of which I am the chairman, and I have given them such examination as I could, hastily. I am surprised at the number of employees that are massed in these various departments, especially in the office of the Secretary of War, and that will be largely continued if these lump-sum appropriations are continued as we are continuing them in this bill. We have not cut it down very much since a year ago, and about the same number of employees will be used. For instance, I find in reading the hearings of this committee that during the last year, as I understand it, there have been about 14 persons employed in the War Department as welfare workers, at an average salary of about $1,500 or $1,600 a year. There are chauffeurs, messengers, assistant messengers, secretaries to secretaries, and so on—a long list of employees that I think could be well dispensed with.

It has been said that this appropriation will be expended by the next administration, and perhaps I am standing in my own light in mentioning anything of that kind, but nevertheless, whether the administration be by our side of the House or the other side of the House, we ought to come to a time when the Members of Congress may definitely and correctly know for what purpose we are appropriating money. I think we have too many clerks in these departments. I think the number ought to be cut down and could be cut down. Whether the committee acted with wisdom or discretion I can not tell, because they have the information, but I do know that a great mass of useless employees are now employed in these departments, and I do know that we are continuing the practice of making lump-sum appropriations by which succeeding officers may continue this practice.

Mr. WOOD of Indiana. Mr. Chairman, I am sorry that the gentleman from Illinois [Mr. GRAHAM] was not here yesterday.

Mr. GRAHAM of Illinois. Mr. Chairman, I want to correct the gentleman. I was here.

Mr. WOOD of Indiana. This matter was thoroughly discussed.

Mr. GRAHAM of Illinois. And I heard the discussion.

Mr. WOOD of Indiana. Then I am surprised at the gentleman giving expression to some of the thoughts that he has, because the general topic was discussed at least half a dozen times and reasons given for these lump-sum appropriations. I call attention at this particular time to this item as being illustrative of the purpose of the committee in still continuing some of the lump-sum appropriations. The amount asked by the Quartermaster General was reduced $120,000; that is, the appropriation recommended in this bill is $120,000 less than he had for the same purpose under the same item last year. We have cut out of this department 100 employees. The gentleman says that there seems to be no reduction in the clerical force of the War Department. If he will examine the report from first to last as the committee has recommended—perhaps it may not go through in that way—he will find that the total reduction in the clerical force in the War Department amounts to more than 2,500, a considerable reduction it seems to me. We have this condition confronting us at this moment. This very morning the Quartermaster General is appearing before another subcommittee complaining because of the fact that we have cut him too deeply and that his activity will not function as it should, because we have deprived him of these 100 clerks. He no doubt will ask from the deficiency subcommittee an appropriation that he may do the thing that we have denied him the right to do in this bill.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. FESS. The remark of the gentleman that the Quartermaster General is appearing before another subcommittee of the Committee on Appropriations is a suggestion that the old practice is going to be continued, even when we have but one Appropriation Committee.

Mr. WOOD of Indiana. I do not think that it will be continued, but it is evidence of this fact, that the combining of these committees is well warranted by this very illustration, that it brings to the attention of the whole committee what they are trying to do. Heretofore they would go to other committees and we would never know anything about it.

Mr. FESS. Is there any likelihood of another branch of this committee repudiating what the gentleman's subcommittee has done?

Mr. WOOD of Indiana. I would state that no estimate has been submitted by the Quartermaster General, but in his testimony with reference to other items he took occasion to refer to the fact that we have cut him as we have in this bill, and he stated that he would have to incur a deficiency or else he would not be able to function as he should.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. BLANTON. In reply yesterday to the gentleman from New York [Mr. SNELL], who was making a fight to cut down similar lump-sum appropriations, the gentleman from Indiana [Mr. WOOD] stated to him that the reason he put in that lump-sum appropriation was to prevent placing these clerks on the statutory rolls. By that statement the chairman admitted that he was still giving the War Department for the fiscal year ending June 30, 1922, all of the clerks provided for in this large lump-sum appropriation. Why not cut them down for that year? If the gentleman does not want to put them on the permanent roll, why not begin by taking them off the lump-sum appropriation roll?

Mr. WOOD of Indiana. We have begun, and as illustrative of that we have taken out of this bureau alone 100 of these clerks and have reduced this very item $120,000 as compared with last year.

I wish to impress this upon the committee. There is no one more anxious than I am to reduce this army of clerks. I expect I have inveighed as heartily against this and its continuation as anybody upon this floor, and I believe I was honest in my inveighing. I wish now and shall continue to try to cut them down as fast as we can possibly without material injury in those departments of the Government. It can not all be done at one moment. It is true that this avalanche of clerks came upon us by reason of the emergency of the war. It is not possible for us to get rid of them as rapidly as they were gathered together. It must be perfectly patent to every man of judgment here that there is still much to do connected with the winding up of this Great War and the affairs that are incident to it. It applies to the War Department perhaps with more force than any other department and in the Treasury Department, and those are the two great problems with which we have to contend.

The CHAIRMAN. The time of the gentleman has expired.

Mr. KNUTSON. Mr. Chairman, I ask that the time of the gentleman be extended five additional minutes, as I wish to ask him a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. WOOD of Indiana. In a moment. This is the policy of your committee and will continue to be its policy as long as it is formed, as it is that these reductions will be made with each appropriation bill until we have reduced this force to the smallest possible minimum consistent with good government. Certainly this Congress wants nothing else, certainly the public is asking for nothing more. I know that there is a demand all over this country that governmental expenses be reduced wherever it could be reduced, and that there be a reduction of the horde of clerks in this District and throughout the country.

Mr. BYRNS of Tennessee. If the gentleman will permit, is it not true the committee has safeguarded this appropriation by limiting the salaries paid these clerks, so that no one will have an opportunity to pay them any large salary?

Mr. WOOD of Indiana. It is absolutely true.

Mr. KNUTSON. Will the gentleman now yield?

Mr. WOOD of Indiana. I will yield to the gentleman from Minnesota.

Mr. KNUTSON. I want to ask the chairman of the committee having this bill in charge whether the department and bureau heads who appeared before his committee showed any disposition to help this committee in reducing the clerical force of the Government?

Mr. WOOD of Indiana. Not in a single instance. That is the reason why it is all the more difficult for this committee and the reason of the insistence of the gentlemen here that the committee has not been active enough in making these reductions; but, gentlemen, we appeal to your reason. You certainly want your committee to be guided by reason; you certainly want your committee to bring you the best it is possible to ascertain of the facts, that you may be guided by knowledge and judgment and not through passion or caprice.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. WOOD of Indiana. I will.

Mr. CHINDBLOM. Can the chairman of the committee advise us whether these additional employees are engaged in the ordinary routine of the Quartermaster General's office or

whether they are performing extra work growing out of the war?

Mr. WOOD of Indiana. The appropriation that is made for these additional employees is largely service that is necessary to wind up the odds and ends incident to the war. These will decrease when this work is finished. It is decreasing now—not to the extent we would like to have it decrease. Your committee can not control the activity of these departments, and until this work has been reduced to a final minimum it will of necessity require more work than was required before the war. Now, the statutory force provided for the Quartermaster Department is practically what it was before the war, and we are only allowing them additional compensation for additional service commensurate with their necessity.

Mr. CHINDBLOM. One further question. Are these employees scattered throughout the various branches of the Quartermaster's office and not assigned to any particular one service or two services?

Mr. WOOD of Indiana. They are scattered all over the country. We have quartermaster depots scattered all over the country, and here is another thing which gentlemen must take into consideration. We had an Army of about 75,000 before we got into this war. We now have an Army—no one knows exactly what it is—but 250,000 or 260,000, so that naturally the work of this department would increase by reason of the more than four times increase in the size of the Army.

Mr. BLANTON. Will the gentleman yield?

Mr. WOOD of Indiana. I will yield.

Mr. BLANTON. The distinguished Republican whip asked the chairman whether the heads of the department sought to aid him in cutting down the force. I want to reply that no Member of Congress posted or familiar with the various departments would ever have asked that question.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. KNUTSON. Of course, no one can hope to equal the gentleman from Texas in loquaciousness or wisdom. [Laughter.]

Mr. BLANTON. Good.

Mr. SISSON. Mr. Chairman, in addition to what the chairman of the committee has said, I want to call attention to this department of the Government especially. The gentleman who has charge of this department now, I believe, is a very efficient officer. Not only that, but I believe he is one of the officers of the Army who is most solicitous to reduce his expenses down to a minimum; but I hope that gentlemen of the committee will keep in mind this fact, that the Quartermaster General has hundreds of millions of dollars worth of property and when the General Staff declares that property surplus it becomes the duty of the Quartermaster General to dispose of that property. My recollection is that alone of wheel and motor vehicles, including bicycles, there are some 68,000 automobiles, trucks, motor cycles, and bicycles.

All of this has to be looked after, and the general tells us it is his purpose, just as soon as he can possibly do it, to dispose of all this property.

Mr. MANN of Illinois. Will the gentleman yield?

Mr. SISSON. Yes.

Mr. MANN of Illinois. The number of employees here could be very considerably reduced if this surplus property should be disposed of?

Mr. SISSON. Yes.

Mr. MANN of Illinois. Why on earth do they not dispose of it?

Mr. SISSON. I will say to the gentleman from Illinois that the committee has been trying to do that for a long time.

Mr. MANN of Illinois. I am not talking about the Committee on Appropriations. That committee continues to give the War Department a very great number of employees because the War Department continues to keep on hand large quantities of surplus material that is depreciating in value, but which the War Department refuses to dispose of.

Mr. SISSON. I fully agree with what the gentleman from Illinois says. I do not believe there can be any sort of defense in keeping this surplus property. On the contrary, this property not only is being depreciated in value by virtue of some of it being exposed to the weather, but in addition there has been a most radical decrease in the price of it in the markets.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. SISSON. Yes.

Mr. CHINDBLOM. Is the gentleman or any other member of the committee familiar with this question: I am informed that a large amount of material in the Quartermaster General's Department is now being transferred from Chicago to some point in Indiana, where a new building has been acquired or purchased or in some way obtained; that the material is simply being shifted from one depot to another.

Mr. SISSON. I will state to my friend that the committee went into a great many of these questions, but the time would not allow us to go into detail as to how they handled this property. But in the case the gentleman refers to, if they have no storage at one place they have transferred it to the place where they have storage or because they need the space at the former place for other things. I am not endeavoring to justify that action. But this bill, as to the Army, is marvelously and wonderfully made. It is the most marvelously constructed piece of legislation I have ever seen in the history of the world. It is the only piece of legislation I ever heard of where Congress can only do one thing, and that is to limit the amount of appropriations as a whole, and then the Army officers and the General Staff under that bill can transfer large amounts of money to the items where they can not under the law create a deficiency in other items where we are compelled to furnish the money. In other words, the pay of the Army——

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SISSON. Then in addition to that, in the pay of the Army and in the clothing and food for the Army, they can create deficiencies, and Congress has to feed and clothe and pay the Army. Something ought to be done. Every man that has had experience knows that you can not control it. There is no such thing as an item meant to be paid under this Army bill for any one department, and if the Committee on Appropriations should seek to change this they would call down on their heads the wrath of the entire House. Congress is responsible for this condition. The buck passing that has been going on in reference to this practice almost smells, in my judgment, to high heaven. We have tried to fix the responsibility for the fact that the Army continues to hold onto millions of dollars' worth of property which we think ought to be declared surplus. In this case we have not cut anything like the amount we want. The reason we carry this in a lump sum is that we desire to fix on Gen. Rogers the entire responsibility, and we feel that this $200,000 ought to enable him to completely function and do all that is needed to be done in reference to this property and get rid of it.

Suppose we withhold this appropriation? The result will be that they will come and tell us that millions of dollars' worth of property is absolutely destroyed because Congress declined to provide the money with which to care for it.

That is the attitude that this committee finds itself in. And if these men who are criticizing the chairman of the subcommittee had half as much economy as he is trying to bring about every day that he is on that committee, you would see wonderful results flowing from Congress' action. And I hear men who do less in real economy than he criticizing the one man that I have served with and who I know is a real economist. He is not a wrecker of government. Although the defense comes from this side of the House—and I think he is entitled to it—when men on that side of the House criticize the chairman and criticize his colleagues on this subcommittee, I wish to say that his efforts have had my entire approval in the reductions that have been made, and they have had almost my entire approval on every item in this bill. And those men that are criticizing him, those men that are hurling criticism at this committee, are men who have done less toward economizing than any set of men on that side of the House.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. SISSON. Yes.

Mr. GRAHAM of Illinois. How would the gentleman suggest this surplus property division in the War Department could be compelled to function if they would not do so?

Mr. SISSON. I think that matter could be handled by a little legislation requiring that all of this surplus property be disposed of within a certain time.

That little could have been written into this bill. We could write into this bill a very short legislative provision which would have resulted in my judgment in disposing of this property within a few months. If it could be made immediately available and the legislation become operative immediately, before the beginning of the next fiscal year, on the 1st of July, this property could be sold.

There is one other thing not covered by the gentleman's question, and I agree that that is an evil which is more difficult to reach, and that is to get the Army to declare as much surplus as possible. I fear the officers of the Army are trying to keep entirely too much of this property. I fear that now they have got it, they do not want to turn it loose, and therefore it gives us an enormous expenditure to pay for storage and for men to

care for the property. Therefore, unless Congress could get an inventory of what the Army has and should itself determine how much they wanted the Army to keep of this property, you would have difficulty. But the property which the Army might declare surplus you could dispose of in a short time if you had the proper legislation.

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Certainly.

Mr. GRAHAM of Illinois. Gen. Bullard has, I am advised from the testimony, estimated that the surplus property in the hands of the Army or the War Department at this time is approximately $6,000,000,000.

Mr. SISSON. That, of course, is a mere estimate. I would not be at all surprised if his figures are perhaps a little high.

Mr. GRAHAM of Illinois. They may be.

Mr. SISSON. But I want to say this: It has not been so declared. We have asked every officer, nearly, that came before the committee who had to deal with this why they did not declare more of surplus. It all drifts back into an indefensible, unascertainable problem, and geographically you can not discover it. I want somebody to discover now just exactly what and where and when the General Staff is. The General Staff is the place where you trace these things, and there you lose them.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. MONDELL. Mr. Chairman, I agree with practically all that the gentleman from Mississippi [Mr. SISSON] has said, except one suggestion made by him, and that is, that Congress is to some extent responsible for the extravagant expenditures of the War Department.

Mr. SISSON. Mr. Chairman, I know that the gentleman does not want to do me an injustice.

Mr. MONDELL. I certainly do not.

Mr. SISSON. I was dealing only with the surplus property and the manner in which the Army was dealing with it.

Mr. MONDELL. Yes; but the gentleman referred to expenditures generally. We all know that the military service is of such a character that it is impossible for Congress to apply to that service all of the prohibitions against the creation of deficiencies that are applied to other services. In the nature of things we must give the Secretaries having to do with the defense arms of the Nation more leeway in the matter of expenditures than we give other officials of the Government. In the case of an emergency it would not only be wise but it would be essential, and it would be the duty of officials to incur indebtedness beyond the ordinary that would not be justified in any civil branch of the Government, and therefore while we separate the appropriations we must of necessity afford the department the opportunity in time of emergency to use a certain portion of those appropriations for other purposes than those for which they were primarily appropriated. We can not apply in full force and with full effect the law against the creation of deficiencies to the matter of the pay and the feeding and the equipment of the Army. That is a situation that can not be avoided. But the fact that the Secretary of War and the Secretary of the Navy must, in view of the character of the service over which they have jurisdiction, be given wider authority than other officials, does not justify them in using their authority in unnecessary expenditures or in creating deficiencies, or in making expenditures which the Congress did not contemplate and which are in no wise essential. It is true that some criticism has been directed against Secretaries of War prior to this administration for failure to economize as Congress intended they should, but it never has been made to anything like the extent or with anything like the justification now presented. All other instances of expenditures in excess of the real needs of the services are as a drop in a bucket, a mountain to a molehill, compared with the waste and extravagance we have witnessed.

Now, Mr. Chairman, coming to the matter under consideration, that of appropriations for temporary employees in the War Department, I had hoped that this committee, as the result of its labors, might have brought in a bill with a somewhat smaller total than the bill before us, and yet, after having given the bill some consideration—such consideration as it has been possible for me to give it in the brief time I have had the opportunity to examine it—I have come to the conclusion that in the main the committee has gone as far in reductions as perhaps it was justified in going under the circumstances.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MONDELL. And that is true, I think, particularly in view of the attitude of the departmental officials. They could easily aid and assist the committees in the reduction of expenditures, but for reasons which seem good and sufficient to them they have seen fit to insist upon the full amount of their estimates in the majority of cases, so that the committee has been compelled to make these reductions very largely not on the basis of definite, unquestioned testimony before it but on the best judgment of the committee as to the extent to which items can be reduced without doing violence to essential public activities in the face of official demands for an increase.

I find that last year we appropriated $3,000,000 in a lump sum for special and temporary services in the War Department; that in the bill now before us these appropriations for additional employees have been segregated into some nine items, totaling $1,619,250, or a reduction below the current appropriation of $1,280,750, a reduction of the amount in the current law by nearly one-half.

Now, it may be that the committee could have gone a little further. I, for one, think I should have been a little happier had the committee felt justified in cutting a little closer. But the reduction is very considerable. We all know that the War Department has a hang over of activities from the war, and that by reason of legislation of Congress and of the larger force now under the colors it has a very much larger volume of business to handle than it had before the war. We hope this volume of business may be reduced steadily until we shall reach as near as we may prewar expenditures. But I doubt if the committee should have gone further than it has gone in these items and be justified in defending them before the House. I commend the committee for the reductions which it has made, and I think, as regards the items now before it, they perhaps reduced them as far as they were justified in doing.

I desire further to express the hope that whatever the disposition may be in another body to increase these items, the committee will stand steadfast for the sums the House has agreed upon, and will decline to increase them. These items were increased considerably in conference last year. I hope they may not be increased in conference this year.

Mr. SNELL. Will the gentleman yield for a question?

Mr. MONDELL. Yes.

Mr. SNELL. The statement has been made by the chairman of the committee [Mr. WOOD of Indiana] that we have an Army of about 250,000 at the present time.

Mr. WOOD of Indiana. About 230,000.

Mr. MONDELL. About 230,000, I am sorry to have to say. It ought not to be that large. It is of that size contrary to law and contrary to the will of Congress.

Mr. SNELL. When we were discussing the Quartermaster's Department I understood the gentleman to say that it was necessary to have this large number of employees to take care of the surplus property of the Army at the present time. Why could not this large Army that we have look after this property, without having all these employees to do it? I should like to have some one give me that information.

Mr. MONDELL. I suppose to some extent they are being utilized, so far as guarding the property is concerned.

Mr. SNELL. What else is there to do with it?

Mr. MONDELL. I do not pretend to know.

Mr. GARRETT. Does the gentleman refer to the surplus property?

Mr. SNELL. The surplus property.

Mr. GARRETT. That which has been declared surplus is to be marketed and sold.

Mr. BRAND. Mr. Chairman and gentlemen of the committee, I want to address the committee for a few minutes out of order.

Under section 1 of Article II of the Constitution, it is provided that the salary of the President shall not be increased or diminished during his term of office. Under section 1 of Article III of the Constitution, it is provided that the salaries of the judges of the Supreme Court and inferior courts shall not be diminished during their continuance in office. The distinction between the two sections is that in the first one it is provided that the salary shall not be increased or diminished during tenure, and in the second one it is provided that the salary shall not be diminished.

In construing these two sections of the Constitution as to the applicability of the income tax law to the salaries of the President of the United States and the judges of the Supreme Court and inferior courts a discrimination has developed which I think is unjust.

By virtue of the decision of the Supreme Court in the case of Evans against Gore, collector for the western district of Kentucky, and under the interpretation of it by the Department of Justice, the judges of the Supreme Court of the United States, and inferior courts, and the President in office when the tax act was passed are not subject to the payment of this tax, but the judges who were not then in commission but appointed since, and the President elected since the passage of the act, are subject to the payment thereof. This is more or less insignificant, and yet I think it is a discrimination which ought not to exist.

In the Evans case referred to, Mr. Justice Van Devanter delivering the opinion, the court held that the tax on incomes of the President and judges of the United States courts, which was levied under the act of February 4, 1919, was imposed contrary to the constitutional prohibition, and was therefore invalid. The decision was based upon the broad proposition that the tax was a diminution of the compensation to the extent taxed of the President and judges of the Supreme and inferior courts of the United States, and therefore would fall within the prohibition of the Constitution.

In construing this decision the Department of Justice held that the status of judges appointed since the passage of the tax act was not before the Supreme Court and is not concluded by its decision. The point that I wish to suggest to the House, and particularly to the committee having jurisdiction of this question, was not passed upon by the Attorney General, to wit, that the Congress had dealt in the tax act with the Federal judges as a whole and with the evident purpose of putting them all on an equality. There is nothing to indicate a purpose to single out the new appointees and reduce their salaries and make an inequality.

The general rule of law is that when a statute is found to be partly unconstitutional the whole falls, unless it is clearly apparent that the legislative scheme has not been interfered with or thwarted by eliminating the unconstitutional part. In my opinion the main purpose of Congress was to tax all the judges equally and not to reduce by discrimination the salaries of new appointees. Under this decision of the Supreme Court and its interpretation by the Department of Justice, the judges who were in office at the time the tax act was passed are exempt from the imposition of an income tax, while the judges who have been appointed since the decision was rendered are subject to the income tax. I do not believe it was the intention of the Congress when the tax act was passed, or that it is the sense of the Congress now, to subject part of the judges to this tax and relieve others from the payment of the tax.

The ruling of the Department of Justice is supported by an opinion rendered by former Attorney General E. R. Hoar, on October 20, 1869, passing upon a similar question, which opinion was submitted by Attorney General Hoar to Hon. George S. Boutwell, Secretary of the Treasury, wherein it is stated:

> I am therefore of the opinion that no income tax could be lawfully assessed and collected upon the salaries of the President or any of the judges who were in office at the time the statute imposing the tax was passed. In regard to the salary of a subsequent President, or judges subsequently appointed, the constitutional objection would not arise, if it were clearly the intention of the legislature that the tax should be imposed upon these officers whenever, by new appointments or a new election, there would be no constitutional difficulty in the application of a previously existing law. But I am of the opinion that this would not be the safe and just rule of construction.

Further on in this opinion this statement is made:

> As the language of the statute could have no application to the President and judges holding their offices at the time it was passed, there would seem to be sufficient reason for holding that there was no intention that it should apply to those officers. If it were supposed applicable to the salary of the President, the singular result would follow in his case, that, as the Constitution prohibits the increase as well as the diminution of his salary during his term of office, if at the time when his official term commenced, his salary was subject to a deduction in the nature of a tax, it would not be competent for Congress during his term of office, by any repeal or diminution of the tax, to increase the amount paid to him. So that if the law imposing an income tax were repealed, the President alone, of all the citizens of the country, would continue liable for its payment during the term of which it had been originally imposed, if his official term so long continued. And, in the case of the judges, as the amount of income tax laid upon salary should be varied from time to time, one judge might be liable only to the amount of part of the income tax which the law imposed on salaries generally, and different members of the same court would be receiving different rates of compensation.

Mr. CARAWAY. If the gentleman will permit, if it were not a species of treason to say it, everybody who knows enough to go in out of the rain knows that a tax is not a diminution of a salary, does he not?

Mr. BRAND. I regret the Supreme Court of the United States differ with the gentleman about that.

Mr. CARAWAY. I know half of them did, but we all know that that was not the law.

Mr. BRAND. It is true the decision was not unanimous.

Mr. CARAWAY. You might just as well have exempted his property from local taxes on the theory that you could not take anything from him, and that to tax him reduced his wealth.

Mr. BRAND. The gentleman's opinion, for which I have great respect, is in accord with that of many other leading lawyers of this House and the country, and yet we must deal with it as it is.

Mr. CARAWAY. I am not allowed to say exactly what I do think of that decision, but I know what it is.

Mr. BRAND. In view of the decision of the Supreme Court and this opinion of Attorney General's office and in order that there should be no discrimination between the President and judges elected or appointed prior to the passage of the act and those elected or appointed subsequent to the passage of the act, it is my personal judgment that Congress should take the position that the President and all judges should all be taxed equally or that none should be taxed. I may add, from my point of view, I see no reason why their salaries should not be taxed, as the income of other people is subject to the tax.

I bring this matter to the attention of the House in order that this discrimination may be provided against by appropriate legislation if the Members of the Congress take the same view of this matter which I entertain. [Applause.]

Mr. BYRNS of Tennessee. Mr. Chairman, I move to strike out the last two words. The gentleman from Wyoming [Mr. MONDELL] referred to a matter which constitutes one of the real and chief difficulties confronting an appropriating committee. That is the fact that the committee receives little or no aid in its effort to reduce the estimates submitted by the departments from those submitting the estimates. The gentleman's criticism, if it can be called a criticism, was directed chiefly against those in the present administration, and I agree that that criticism can be made against those who have appeared in support of these estimates under the present administration, but I wish to emphasize the fact that it is a criticism which can be leveled not only against those who have appeared under the present administration, but also against those who have appeared under all previous administrations, and one which I dare say can be justly leveled against those who will appear under the next administration, unless some legislation is enacted by Congress which will revise the present method of submitting estimates. If the majority party in this Congress desire to perform a real service of economy to the people of this country, they will pass a budget bill which will enable Congress to keep its hand on appropriations and to know just how the money is being expended in these various departments.

It is perfectly natural for those within the departments who submit these estimates to appear before the committee and insist that they shall be allowed to the last dollar. It is assumed, of course, that those estimates would not have been submitted had not those responsible for them been of the opinion that they should be allowed and that they were actually necessary for the next fiscal year. But the difficulty is that these estimates are prepared by bureau chiefs in the various departments, who, as I have had occasion to say heretofore, believe that the work being performed by them is the most important of all the work being performed by the Government. They have, you might say, an exaggerated idea of the value of their work and of the necessity of increased appropriations. And I do not say this as a criticism. They are to be highly commended for their enthusiasm and interest. Now, what we need and what I hope we will have in the very near future is legislation which will require some one in the executive departments to impartially revise these estimates before they come to Congress, so that your committee and your Congress will not have to look to the head of a bureau or to the head of some division for a justification for the estimate submitted by him and in which he is directly interested; some one who is made responsible in the executive departments to revise and reduce these estimates, and who, if they are too large, can be held responsible by the people for submitting them. I hope that before the next estimates are submitted and considered we shall have some legislation along that line. [Applause.]

Mr. BLANTON. Mr. Chairman, I move to strike out the last four words. During the height of the protest conflagration that was going on in the House against the continuance of these unnecessary employees in the Government and in the War Department especially, the gentleman from Wyoming [Mr. MONDELL] saw fit to temporarily leave his sanctum sanctorum long enough to come in here and throw up a few fire guards to ward off from his party the clamor of an outraged public. I want to take up just a moment to enter this game of battledore and shuttlecock which has been going on here all of the morning, every day, every week, and every month, on the question of economy. Both

the chairman of this committee, the gentleman from Indiana [Mr. WOOD], and our distinguished Member who has charge of the bill on this side of the House, the gentleman from Mississippi [Mr. SISSON], have admitted that there are too many clerks down there, that they ought to be taken out, but as an excuse they have said that this is an appropriation bill; that you could not put legislation on this appropriation bill to stop it, because somebody would get up and make a point of order, and so the buck is passed again. I call the attention of the chairman of this committee and of my good friend from Mississippi to the fact that under the Holman rule they could put limitations on this bill that would stop this matter, that would be a deterrent to the War Department, and same would be good against any point of order. It is just as the distinguished Secretary of War said to me in August last, when I was down there trying to check up the number of surplus clerks in his department. He said that Congress must accept what the Secretary of War said about these matters. The gentleman from Mississippi and the chairman of this committee say that the War Department, regardless of limitations placed on this bill at this time, can create deficiencies with respect to clothing and feeding the Army, and can use and transfer various funds to keep up their full clerical force, and that the Secretary of War could continue to do just as he told me. He said to me, "I am an executive officer and Congress must take my word for it."

Still we let him go on, still we pass the buck, still the gentleman from Wyoming comes in here long enough to try and stop public clamor against his party, and still the camouflage goes on. How long is it going to continue? Why do we not put limitations on this bill as suggested by the distinguished gentleman from New York [Mr. SNELL], and I am with him in this fight every time he wants to make it. Why do we not fix it so that the Secretary of War must obey the will of the Congress? We could do it, and no one knows it better than the gentleman from Wyoming and the chairman of this committee. Under the Holman rule they could put the necessary limitations on this bill.

Mr. MOORE of Virginia. Mr. Chairman, I move to strike out the paragraph. Ever since I have been in the House reference has been made from time to time, just as this morning, to the surplus property that remains undisposed of. One premise has been that there is a very large quantity of property that ought to be disposed of. Another premise is that action is not being taken in that direction. That matter has been the subject of frequent comment for nearly two years. It seems to me that our friends who constitute the majority are responsible for not taking definite action that would have led to the disposition of that property. They have been perfectly aware that action was not being taken. They must have realized that more positive and mandatory legislation was necessary, and yet they have manifested indifference and inaction. The chairman of the committee which is investigating the affairs of the War Department [Mr. GRAHAM of Illinois] is perhaps more cognizant of the situation than anyone else. He, at least, might have suggested such definite legislation as that to which I refer. The Committee on Military Affairs might have proposed legislation. On the contrary, the truth is that last year when an effort was made to turn over a very large amount of property to the Highways Bureau there was great delay and difficulty in securing action, and when the legislation was enacted it was, in the estimation of a great many Members, entirely inadequate. Furthermore, speaking generally, it is not necessary to wait for the enactment of a budget law, however desirable that may be, to closely examine or curtail estimates, nor is it necessary to confess our inability to cut down estimates because we are not allowed to put legislation on appropriation bills. We have the power to act regardless of those considerations, but we do not act. We criticize every department freely. That is the habit of Congress. And we sometimes engage in criticizing outside agencies and individuals.

Now, I respectfully submit, without meaning to take the rôle of critic myself, that we often unduly refrain from criticizing ourselves. The outside public criticizes us and it often has good ground for its criticism. It strikes me that instead of confining ourselves to severe anathema of departments—and they may deserve a great deal of the blame that is heaped upon them—we ought to consider whether we are doing everything we can, and doing it in a steady and comprehensive way, to right the wrongs and irregularities that are supposed to exist, and which I have no doubt to a large extent do exist.

I have heard the leader of the majority, the gentleman from Wyoming [Mr. MONDELL], say over and over again that the departments flagrantly overestimate their needs. Does that get us anywhere? He may fairly make that charge with respect to the estimates presented to this Congress and in respect to the estimates presented to every Congress during generations. That is an easy accusation to make, and although true it accomplishes nothing. I respectfully submit to the House that it is up to us to take into account conditions as they exist and deal with them in the performance of our duty, with a view to rectifying irregularities and wrongs wherever irregularities and wrongs are found. [Applause.]

Mr. Chairman, I ask unanimous consent to withdraw the amendment which I offered.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WOOD of Indiana. Mr. Chairman, I move that all debate upon this paragraph and all amendments thereto do now close.

The motion was agreed to.

The Clerk read as follows:

For additional employees in the office of the Surgeon General, $60,000: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding $1,800 per annum.

Mr. GRAHAM of Illinois. Mr. Chairman, I move to strike out the last word. A moment ago in the controversy which arose on a similar item to this the gentleman from Virginia [Mr. MOORE] called attention to what he considered a failure of duty on this side of the House and especially referred to the committee of which I have the honor to be chairman and inquired why this committee had not asked the House to pass some sort of legislation. If the gentleman had known the rules of the House he would have known and he would have stated that the committee of which I am chairman has no legislative function, that its duties are simply to inquire into things and report the result of its inquiries to the House.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. GRAHAM of Illinois. Yes.

Mr. MOORE of Virginia. I know the rules sufficiently to understand the point the gentleman is making. I merely said this, that the gentleman might have suggested definite legislation; not proposed legislation, but suggested it. The gentleman brought in reports here suggesting various steps that might be taken. He was not barred from suggesting legislation that in his opinion it might be desirable to enact.

Mr. GRAHAM of Illinois. I think the gentleman is correct. He will find in the various reports of this committee repeated recommendations along those lines. I call the attention of the gentleman incidentally to the fact that this same committee did bring at one time a recommendation that a resolution should be adopted by the House asking the Secretary of War to cause the surplus Army food to be sold. There was at that time approximately $100,000,000 worth of this food on hand. There was only sold as the result of this resolution approximately $54,000,000 worth. The rest of it—what became of it I am unable to state.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. GRAHAM of Illinois. Let me finish this, and I will yield. Then, on another occasion this committee brought into the House a resolution asking the House to adopt a resolution providing for the sale and distribution of Army automobiles. I am advised that only a very small number of those automobiles and trucks were distributed or were sold by the War Department, but a vast number of them are on hand. Again, on another occasion this committee helped to prepare a resolution for the distribution of sodium nitrate or Chilean nitrate which the War Department had on hand. We had 600,000 tons of it.

The resolution was brought in here; it was a joint resolution, gentlemen, passed by both Houses of Congress and which originally called for the sale of 50,000 tons. In the House it was amended and raised to 100,000 tons. Do you know how much the War Department sold or distributed to the farmers of this country who were needing it? Sixty-four tons, 64 tons! Every effort of this committee or of any other committee to obtain the disposition of surplus goods of the War Department has met with a like failure. I am simply stating this only for the purpose of trying to show you that some efforts have been made to produce some action by the War Department, and that action up to this time has not been taken. Now I will yield to the gentleman.

Mr. MOORE of Virginia. Mr. Chairman, I know the ability of the gentleman and the industry with which he carried on his work. There were, as he says, recommendations made by his committee along the lines he indicates and that some action was taken, but it was the mildest possible action. The first resolution to which the gentleman referred was, as I recall, simply a request. But, after all, what the gentleman has said emphasizes the point that I have made, that, though the attention of the House was directed repeatedly to this matter, the House failed to legislate in such way as to bring about results, as it might have done.

Mr. MONDELL. Will the gentleman yield?

Mr. GRAHAM of Illinois. Let me make one reply and I will yield. I want to say further, before I yield to the gentleman from Wyoming [Mr. MONDELL], that in what I have said heretofore relative to the recommendations of the committee on these lump sums being brought in I recognize the hardships which this committee has had to encounter. I have had the same thing to encounter in the year and a half past in my investigation. It is almost impossible to get the facts from the bureau chiefs—I have read the hearings of this committee on this subject—and I do not wonder that they are asking for some lump-sum appropriations here, and what I said was, and what I mean now, is that the representations made to this committee and other committees in my judgment ought to show the true facts and give sufficient information upon which we can act. The only thing we can do, unless they adopt a different method, is to trim this thing with an ax.

The CHAIRMAN. The time of the gentleman has expired.

The Clerk read as follows:

State, War, and Navy Department Building: Assistant superintendent, $2,000; clerks—2 of class 1, 1 $1,000; chief engineer, $1,800; 5 assistant engineers, at $1,200 each; electrical machinist, $1,200; captain of the watch, $1,200; 2 lieutenants of the watch, at $840 each; 38 watchmen; carpenter, $1,000; chief electrician, $1,400; electrician, $1,200; machinist, $1,000; painter, $1,000; plumber, $1,000; 3 dynamo tenders, at $900 each; 7 skilled laborers or general mechanics, at $840 each; bricklayer, $1,200; messenger; foreman of laborers, $840; chauffeur, $1,000; 16 firemen; 16 elevator conductors, at $720 each; 2 foremen or forewomen, at $780 each; 50 laborers; gardener, $720; 3 attendants, at $480 each; in all, $123,460.

Mr. MOORE of Virginia. Mr. Chairman, I move to strike out the last word for the purpose of calling the attention of the chairman of the committee to the item of salary of "the foreman of laborers," in line 4 on page 80. It is $850. Now, I find that the same position in the Treasury Department carries a salary of $1,200 and the same position in the Interior Department carries a salary of $1,000. They are both in this bill. Is there any reason for the discrimination?

Mr. WOOD of Indiana. The only reason I know for it is that they have different kinds of foreman's salaries and different kinds of laborers under foremen. I do not know the cause of th's, as to the quality of work required.

Mr. MOORE of Virginia. I have reason to believe it is just one of the numberless discriminations which we find in the Government service that tend to destroy the morale of the service. The foreman of laborers in the State, War, and Navy Building, who is allowed $850, is doing exactly the sort of work that is being done by the similar employees in the Treasury Department and in the Interior Department, and I wished to draw attention to the item to illustrate the need for equalization. I do not know whether any serious effort is being made toward eliminating such discriminations, but that is a matter of some importance.

Mr. WOOD of Indiana. Yes; it is.

Mr. MOORE of Virginia. Mr. Chairman, I move, in line 3, page 80, to strike out the figures "$840" and insert in lieu thereof "$1,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Virginia: Page 80, line 3, strike out the figures "$840" and insert in lieu thereof the figures "$1,000."

Mr. WOOD of Indiana. Mr. Chairman, I make the point of order.

Mr. MOORE of Virginia. Mr. Chairman, I realize the amendment is subject to the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Potomac Park office buildings: For the following employees for the maintenance and protection of the buildings: Assistant superintendent, $2,000; clerks—1 of class 4, 2 of class 3, 2 of class 2, 2 of class 1, 2 at $1,000 each; 3 messengers, at $720 each; chief engineer, $1,800; assistant engineers—1 $1,600, 4 at $1,400 each; storekeeper, $1,200; chief electrician, $1,600; electricians—2 at $1,400 each, 2 at $1,200 each; foreman carpenter, $1,600; carpenters—3 at $1,400 each, 5 at $1,200 each; foreman painter, $1,400; painters—2 at $1,200 each, 2 at $1,000 each; plumbers—1 $1,400, 3 at $1,200 each; steam fitters—2 at $1,400 each, 2 at $1,200 each; machinist, $1,400; 4 switchboard operators, at $1,200 each; 4 general mechanics, at $1,000 each; guards—captain, $1,600, 3 lieutenants at $1,080 each; 3 sergeants at $930 each, 23 at $780 each, 23 at $720 each; fire marshal, $1,080; foreman of laborers, $1,400; 2 assistant foremen of laborers, at $960 each; 6 foremen or forewomen, at $780 each; 140 laborers; laborers and charwomen, $120,000; 22 female laborers, at $480 each; in all, $345,530.

Mr. CLARK of Florida. Mr. Chairman, I desire to offer an amendment, or one or two amendments to this section. On page 81, line 12, strike out the word "twenty-three" and insert in lieu thereof the word "thirty." In line 13, strike out the word "twenty-three" and insert in lieu thereof the word "thirty." In line 18, strike out the figures "$345,530" and insert in lieu thereof the figures "$357,030."

Mr. BLANTON. Mr. Chairman, I reserve the point of order on the amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 81, line 12, strike out the word "twenty-three" and insert in lieu thereof the word "thirty." In line 13, strike out the word "twenty-three" and insert in lieu thereof the word "thirty." In line 18, strike out the figures "$345,530" and insert in lieu thereof the figures "$357,030."

Mr. BLANTON. Mr. Chairman, I reserve the point of order.

Mr. CLARK of Florida. Mr. Chairman, it is not subject to a point of order. There is no question about that. So I shall address myself to the merits of the amendment.

The effect of this amendment is to increase the force of guards in the Potomac Park buildings from 46, the number carried in the bill, to the number asked in the estimate, of 60. The full 60 are needed, or otherwise the patrols will be cut to two men per relief for each building. There are miles of corridors and inflammable materials in these buildings, and many entrances which must be guarded against theft of public property.

Now, only a few days ago, Mr. Chairman, there was a fire in the Department of Commerce Building, a fireproof building, but it obtained such headway that very important and very valuable documents and papers were destroyed. Now, these buildings here are fire traps. We all know that. The only protection the Government has for its property in those buildings is the guards, those who patrol them and watch for fires and extinguish them before they get such headway as to be uncontrollable.

Now, the amendment carries only about $12,000 more than is carried in the bill, and I may say that 60 guards for these buildings was the estimate. And, Mr. Chairman, I am a member of the Public Buildings Commission, and I may state that these figures come to me from Col. Ridley, who is also a member of that commission. The commission has made a number of trips through these building, and I think we have demonstrated by our conduct that we are in favor of economy. We have saved this Government now over $400,000 a year in rents in the District, and we are cutting down expenses wherever possible. But these guards are absolutely necessary if the Government's property is to be taken care of. And I do trust that the gentleman in charge of the bill will accept these amendments and thus insure safe protection for this property.

Mr. BLANTON. Mr. Chairman, I make the point of order, which is against the amendment as offered, for the reason that it is legislation upon an appropriation bill. And in that connection I want to call the attention of the gentleman from Florida [Mr. CLARK] and the gentleman from Indiana [Mr. WOOD] and the gentleman from Illinois [Mr. MANN], who will finally pass upon the question, that this particular matter has been carried in appropriation bills year after year without any authority of law. There is no authority of law for this section. And this bill authorizes 46 guards for the Potomac buildings, which are certainly sufficient.

Mr. CLARK of Florida. If the gentleman wants to make the point of order against the section, I will admit he is right, and if he wants to take the responsibility of subjecting those hundreds of thousands of dollars of Government property to the risk of the flames, he can do it.

Mr. BLANTON. If the Chairman caught my point of order, it is only against the amendment of the gentleman from Florida, because I think the 46 guards are probably necessary. At least some guards are necessary.

Mr. CLARK of Florida. But they are not authorized by law.

Mr. BLANTON. The whole section would go out if anybody made the point of order.

Mr. CLARK of Florida. You make it.

Mr. BLANTON. I do not make it.

Mr. CLARK of Florida. You ought to make it.

Mr. BLANTON. I make the point of order merely against the amendment of the gentleman from Florida, which seeks to increase them to 60. Forty-six guards certainly are enough, and I do protest against increasing them at this time to 60, and therefore I make the point of order.

Mr. MANN of Illinois. Will the gentleman yield?

Mr. BLANTON. I will yield.

Mr. MANN of Illinois. Would the gentleman hold that if there were 23 guards, and there was no point of order made against increasing the number it would be subject to a point of order?

Mr. BLANTON. I did not make the point of order against the paragraph.

Mr. MANN of Illinois. If the item was subject to a point of order and the point of order not being made, is it not quite

within the rules of the House to amend by increasing the number?

Mr. BLANTON. I think not, because the paragraph is still under consideration. If there had been argument on it without any reservation, the gentleman's contention would be good. But there has been no argument on this paragraph. It has just been read and the amendment offered to it, and I immediately reserved the point of order.

Mr. MANN of Illinois. There was an amendment offered to it, and the time for making the point of order on the amendment was past.

Mr. BLANTON. The reservation——

Mr. MANN of Illinois. There was no reservation.

Mr. BLANTON. I submit to the distinguished parliamentarian from Illinois that the reservation was made immediately upon reading this paragraph, when the amendment was first offered.

Mr. MANN of Illinois. The reservation was made when the amendment was offered. It was then too late to reserve a point of order on the paragraph.

Mr. BLANTON. The reservation, so far as that is concerned, if the Chair sustained my point of order, the whole paragraph would go out if the one making the point of order insisted upon it, or any other Member insisted upon it.

Mr. MANN of Illinois. The time for making the point of order is before amendment or discussion. And after an amendment is offered to the paragraph it is too late to make the point of order on the paragraph.

Mr. BLANTON. The gentleman from Illinois understands that if a Democrat were to rise to make a point of order against the paragraph and a Republican were to rise to offer an amendment, the Democrat would never get recognition until the amendment was offered.

Mr. MANN of Illinois. Oh, no. I do not understand anything of the kind. Any Member can make a point of order against the paragraph ahead of any amendment that is offered, and is entitled to the floor as a matter of privilege.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] has stated the rule as it is. The Chair overrules the point of order.

Mr. WOOD of Indiana. Mr. Chairman, in opposition to this proposed amendment I wish to say this proposal is to increase the watchmen in those two concrete buildings in Potomac Park that are supposed to be fireproof. If it is made, and successfully made, it will also be made with reference to others that will follow, because we have tried to decrease this army of watchmen in all of these buildings. If there is anything with which these buildings have been infested during the war and are still infested with to a large degree it is watchmen and messengers. They clutter up the buildings until you can hardly get through. Messengers are found sleeping before their doors, almost, until you can scarcely get in. We reduced this watchmen's force under the last bill, and we had the same contention from Col. Ridley that he is making now, to the effect that we were taking a great hazard. They have an army of watchmen down there in all these buildings taken together, absolutely unnecessary in the opinion of your committee. We have reduced the number from 60 to 46; in other words, we have reduced it by 14. They have provided 23 for one of these buildings and 23 for the other, and we have so reduced the force that the watchmen there will have something to do besides watching each other. They can watch the buildings a little if it is necessary. They are absolutely a useless appendage, in my opinion. If that was a private business down there they would not have half of that number, in my opinion.

Mr. CLARK of Florida. Mr. Chairman, I have served on this Public Building Commission ever since its organization. Col. Ridley might be termed the executive officer of the commission. I take it that the committee is familiar with its personnel. Senator SMOOT is chairman of the commission and Senator SWANSON is the other Member from the Senate, and the gentleman from Kentucky [Mr. LANGLEY] and myself represent the House. The Acting Supervising Architect of the Treasury and Mr. Elliott Woods, the Superintendent of the Capitol Building and Grounds, and Col. Ridley constitute the commission.

I want to say that I believe that Col. Ridley and Mr. Elliott Woods and these practical gentlemen know more about what is needed down there than my friend from Texas does, with all his varied knowledge. I admit that the gentleman from Texas knows it all, in his opinion. He knows a great many things that I do not know. "He knows a great many things," as an old fellow down in my country says, "that aint." [Laughter.] Col. Ridley is one of the most painstaking, economical officers in the Government service to-day. His every act has been along the line of economy, and he knows, and this commission knows, that these 60 watchmen are necessary in those buildings.

Now, if the committee wants to take the responsibility of leaving those buildings there without ample protection—and 46 guards will not be ample—it can do so. Those buildings can not be properly watched with 46 guards. Those of you who have been down in those buildings and gone through the miles and miles of corridors know that it can not be done; and I insist, Mr. Chairman, that the committee should adopt the amendment, and thus protect this Government property as long as we hold it.

Mr. MANN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. CLARK of Florida. Yes.

Mr. MANN of Illinois. Does the gentleman suppose that in any private building in the United States of similar size the owners provide as many as 46 watchmen?

Mr. CLARK of Florida. I do not know what they provide in private buildings, but I do know that the Government never has conducted any sort of activity as economically as private people do.

Mr. MANN of Illinois. Very likely; but the number of watchmen required or needed would be the same in one case as in the other, probably.

Mr. CLARK of Florida. Yes; if they attended to their duties, and I think these people do attend to their duties.

Mr. MANN of Illinois. Let us assume that they do attend to their duties.

Mr. CLARK of Florida. In the old departments I admit that the gentleman from Indiana [Mr. WOOD] is right. There are probably too many messengers and too many watchmen and too many employees of another character. But in these buildings the only protection they have is these guards. There is no fire protection. There is nothing except the watchfulness of these employees.

The CHAIRMAN. The time of the gentleman from Florida has expired. The question is on agreeing to the amendment offered by the gentleman from Florida.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For fuel, lights, repairs, miscellaneous items, printing, and city directory, including maintenance, repair, exchange, and operation of one motor-propelled passenger-carrying vehicle to be used for official purposes only, $220,000: *Provided*, That the Secretary of War is authorized and directed to transfer without cost to the Superintendent of the State, War, and Navy Department Buildings one passenger-carrying automobile.

Mr. PARRISH. Mr. Chairman, I rise to reserve a point of order against the proviso of the paragraph just read; and in this connection I wish to say that the gentleman from Ohio [Mr. GARD] has been making some studies of provisions such as are contained in this proviso, and he is detained on official business in the departments, and he requested that I make a point of order against the paragraph. Therefore at his request I make the point of order against the proviso.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Temporary office building (1800 Virginia Avenue NW.): For the following employees for the maintenance and protection of the building: Clerk of class one; chief engineer, $1,400; assistant engineer, $1,000; 6 firemen, at $840 each; 4 coal passers, at $720 each; electrician, $1,200; carpenter, $1,200; general mechanic, $1,000; guards—3 sergeants, at $930 each, 12 privates, at $780 each; foreman of laborers, $840; foreman or forewoman, $780; 10 laborers; laborers and charwomen, $6,000; 3 female laborers, at $480 each; in all, $42,730.

Mr. CLARK of Florida. Mr. Chairman, I desire to offer an amendment, on page 83, line 17: Strike out the word "twelve" and insert in lieu thereof the word "eighteen." In line 20 strike out the figures "$42,730" and insert in lieu thereof the figures "$47,411."

The CHAIRMAN. The gentleman from Florida offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CLARK of Florida: Page 83, line 17, strike out the word "twelve" and insert in lieu thereof the word "eighteen." In line 20 strike out the figures "$42,730" and insert in lieu thereof the figures "$47,411."

Mr. CLARK of Florida. Mr. Chairman, that is a temporary office building on Virginia Avenue, and this is an increase of six watchmen in that building. That is purely a temporary building. As I said a while ago, that is the only fire protection the building has, with all the property there, and it is thought, from the best information we can get, that this number of guards are necessary.

And I want to say this, Mr. Chairman: In offering this amendment I am offering it after I have given careful consideration to the matter. I want to call the attention of this commitee to the fact that this is the only commission within my knowledge since my service here that has not come to

Congress and asked for an additional appropriation. Ten thousand dollars was appropriated when this commission began business, and we have got at least half of that yet; and we have saved at least $400,000 in rents per annum in the District of Columbia. If that is not an economical record, I do not know what it is. We are asking for these additional guards because we know they are necessary.

Mr. BLANTON. Mr. Chairman, I rise to oppose the amendment.

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. BLANTON. Mr. Chairman, I was, like the distinguished gentleman from Florida [Mr. CLARK], until last summer, of the belief that Col. Ridley was economical and efficient, and I yet believe he is to a certain extent efficient and tries to be economical. But he does not know how. I did not reach this conclusion until I saw these hordes of employees down there in the various parks during the months of August, September, and October supposed to be working, but wasting time, doing absolutely nothing, not a thing; hordes of them; and until I went to Col. Ridley this summer, and while we were discussing some of those buildings down there he said, "Why, Mr. BLANTON, those two buildings, A and B, at Seventh and B Streets, must be torn down and taken out of there as soon as Congress meets," and then told me his idea of salvaging them.

I had been through those buildings. I had inspected them. I had noticed that the doors and windows, and door and window frames, the fixtures, and the flooring to some extent were good and valuable stuff. Just to get his idea, I said, "Col. Ridley, how much do you suppose our Government could salvage out of those two buildings, A and B?" Both of them are great big buildings covering over a block of ground each. He said, just off-handed and indifferently and as a matter of fact, "Why, Mr. BLANTON, I honestly believe I can get a contractor here to agree to tear those buildings down and move them away and not charge the Government anything for them"; when, as a matter of fact, anywhere in the United States other than in Washington the Government could salvage several thousand of dollars out of those buildings by competitive bids from contractors. That was his idea of economy. He has been here so long in this class of service and has seen the public money frittered away helter-skelter to such an extent that his idea of economy is different from that of people in other parts of the country who by taxes pay for it all.

Mr. BRITTEN. I should like to say to the gentleman that where the Government has attempted to salvage these temporary buildings under competitive bids in advantageous locations it has not usually got more than 5 per cent of the cost of the buildings.

Mr. BLANTON. That may be so in Washington, but not in Chicago.

Mr. BRITTEN. I am talking about the entire United States.

Mr. BLANTON. In Chicago?

Mr. BRITTEN. Yes.

Mr. BLANTON. An immense building that has been put up within the last two years and a half?

Mr. BRITTEN. Yes; all over the United States, from New York to San Francisco.

Mr. BLANTON. It is not that way down in the State from which I come. You can get more salvage out of buildings of that character that have new lumber in them. Of course, there is a lot of beaver board in these buildings, but there is a great deal of fine lumber; and the fixtures and the facings and the doors and plumbing and windows are good, and could be used in other buildings to advantage. There ought to be lots of salvage from such buildings, and I have just simply taken up this time for the purpose of entering my protest against this particular item of waste in the District of Columbia with respect to Government policy.

Mr. WOOD of Indiana. Mr. Chairman, I desire to call attention to a little comparison. Under the amendment which is offered it is proposed to increase the number of guards, or privates who act as guards, from 12 to 18. The building that they guard has 113,000 square feet of floor space. The concrete building for which we have allowed 46 guards has 1,400,000 square feet of floor space, or very nearly fourteen times as much floor space as the building for which they are now asking 18 guards. According to the proportionate amount of floor space, it ought to require fourteen times as many guards in the other building as in this one. The only difference between the two is that one is built of wood and the other of concrete.

Mr. CLARK of Florida. Mr. Chairman, it seems to me there is all the difference in the world when one building is concrete and the other is built of wood; but I do not agree with the gentleman that the 46 guards are enough for the other two buildings.

Mr. Chairman, I have learned a good deal along the lines of buildings in this District since I have been on this commission. I want to say, as a mere matter of simple justice, that there is not a man in either House of Congress or on either side of either House who is more devotedly wedded to the idea of saving money for the Government than is Senator SMOOT, the chairman of this commission. I want to say, further, that Col. Ridley, acting in accord with the ideas of Senator SMOOT, has made a complete survey of these buildings, and, with all due respect to these gentlemen, he knows better than either of them what is needed in the way of guards to protect that property from destruction by fire.

Now, Mr. Chairman, it is not material to us. Here is a mere matter of a little over $2,000 involved, which may be the means of saving hundreds of thousands of dollars of Government property from destruction by fire. Of course, if the gentlemen do not want to take that precaution, all right.

Mr. McKENZIE. Will the gentleman yield?

Mr. CLARK of Florida. I will.

Mr. McKENZIE. Does the gentleman from Florida agree with the gentleman from Texas [Mr. BLANTON] in regard to the statement made by Col. Ridley that these buildings could probably be salvaged by just simply giving them to some one to take them away?

Mr. CLARK of Florida. I doubt very much whether the Government will ever get a cent out of them.

Mr. McKENZIE. Then, why spend thousands of dollars for guards to protect them?

Mr. CLARK of Florida. Because we have got to use them, and because they contain valuable papers and records that are worth more than the buildings, and they also contain the furniture, which is valuable.

Mr. McKENZIE. I notice in looking at this bill that it recommends the destruction and salvaging of some of these buildings.

Mr. CLARK of Florida. Yes.

Mr. McKENZIE. Now, it does seem to me that we ought to get rid of all of them. That is the way I feel about it.

Mr. CLARK of Florida. Yes; I agree with the gentleman fully on that, and the Public Building Commission is taking every possible step to do it now. There were two of those buildings that we intended to have destroyed or moved right away, but at that time it was thought that the inauguration of the new President was going to be conducted along the lines of former inaugurations, with marching clubs, State troops, and others coming here, who would have to be housed, and the commission decided that we would not have those buildings destroyed until after the 4th of March, because they might be needed to entertain the visitors who would come here. Now, since the inauguration is to be conducted with democratic simplicity and the usual republican extravagance and waste will be eliminated, I have no doubt that the commission will take immediate steps for the dismantling of those buildings and their removal from the Mall, those that are not needed; but we take this position, Mr. Chairman, that it is our duty to use every one of these temporary buildings as long as the Government has to pay rent for office space in this District. And, however unsightly they may look, we are going to use them under the power given us by Congress to house the departments until we can do better, and save these rents.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Florida.

The amendment was rejected.

The Clerk read as follows:

Temporary office buildings: For employees for the maintenance and protection of the temporary office buildings known as follows: War Trade Building, between B and C Streets and Twentieth and Twenty-first Streets NW.; Food Administration Building No. 1, between Eighteenth and Nineteenth Streets and C and D Streets NW.; Food Administration Building No. 2, between New York Avenue and D Street and Nineteenth and Twentieth Streets NW.; Fuel Administration Buildings Nos. 1 and 2, bounded by Virginia Avenue, Eighteenth and C Streets NW.; Fuel Administration Building No. 3, on D Street, between Twentieth and Twenty-first Streets NW.; H. L. Pettus Building, on Nineteenth Street, between Virginia Avenue and D Street NW.; and Archie Butt Building, 1725 New York Avenue NW.: Assistant superintendent, $2,000; principal clerk, $2,000; clerks—1 of class 3, 1 of class 2, 3 of class 1; 2 messengers, at $840 each; chief electrician, $1,600; electricians—1 $1,400, 3 at $1,200 each; foreman carpenter, $1,600; carpenters—1 $1,400, 4 at $1,200 each; plumbers—1 $1,400, 2 at $1,200 each; steam fitter, $1,400; painters—3 at $1,200 each; 6 general mechanics at $1,000 each; assistant engineers—1 $1,400, 3 at $1,200 each; 13 firemen at $840 each; 11 coal passers at $720 each; guards—captain $1,600, 3 lieutenants at $1,080 each, 8 sergeants at $900 each, 80 privates at $780 each; fire marshal, $1,200; foreman of laborers, $1,000; two assistant foremen of laborers at $840 each; 6 foremen or forewomen, at $720 each; 26 laborers; 5 female laborers at $480 each; laborers and charwomen, $50,000; in all, $217,520.

Mr. CLARK of Florida. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. CLARK of Florida: Page 84, line 25, strike out the word "eighty" and insert in lieu thereof the words "one hundred and four"; page 85, line 5, strike out the figures "$217,520" and insert in lieu thereof the figures "$236,240."

Mr. CLARK of Florida. Mr. Chairman, fire protection is mainly dependent on patrolling in these buildings. In this temporary group north of B Street and west of Seventeenth Street there are seven wooden buildings. The estimate for guards included 104 privates, while the bill carries only 80. At least 3 guards will be absent at all times, either sick or on leave. This will leave 77 privates, or 11 to a building. Eleven men divided into three reliefs will leave only 3⅔ men each on each relief. There should be 104 privates for this group of buildings, or 5 to each relief.

This is the last amendment that I shall offer. I have offered these amendments in the utmost good faith, because I feel and I am assured that they are absolutely necessary to protect the Government's property. If the committee sees fit to go along with this cheese-paring policy, I have no complaint to make, but just a few nights ago we lost Government property in the Commerce Building that can not be replaced.

There are documents and records in these buildings relating to the great World War, records that are invaluable to this Government, and the mere matter of a few dollars extra to hire a few more men to take care of and preserve the Government's property ought not to stand in the way. This property ought not to be subjected to hazards that no private person would subject his own property to.

Mr. HICKS. Mr. Chairman, will the gentleman yield?

Mr. CLARK of Florida. Yes.

Mr. HICKS. These buildings, of course, were used during the war?

Mr. CLARK of Florida. Yes.

Mr. HICKS. And they are now filled with all sorts of records and documents which should be kept?

Mr. CLARK of Florida. Yes.

Mr. HICKS. Eventually those records and documents will be placed in some permanent structure, I assume?

Mr. CLARK of Florida. Yes.

Mr. HICKS. Why can not they be moved now and allow these buildings to become empty and salvaged or given away, rather than to pay all this amount of money for keeping up something which is valueless?

Mr. CLARK of Florida. Because the gentleman's party will not allow us to bring in a public building bill and take care of the District of Columbia. In accordance with the gentleman's party's theory of economy—and it is nothing but a theory—you will not allow us to put up buildings in the District of Columbia to take care of these records. Therefore they are in wooden buildings, subject to the hazard of fire, and I am asking simply that enough guards be employed to see that they are not destroyed. If you will give us the money, if you will permit the Committee on Public Buildings and Grounds to bring in a bill, they will bring it in to-morrow providing for the housing of every Federal activity in the District of Columbia in fireproof buildings.

Mr. HICKS. How much space does the gentleman think it will require to store these records temporarily?

Mr. CLARK of Florida. I do not know what the gentleman means by temporarily. You can not get the space, to start with.

Mr. HICKS. Until the time comes when the Republicans, after the Democratic waste, will have placed, by economy, enough money in the Treasury to put up these buildings. It is going to take some time for the country to get on its feet again after what has happened in the last eight years.

Mr. CLARK of Florida. Yes; with the gentleman's cheese-paring policy it is going to take a lot of time.

Mr. HICKS. Oh, we will accomplish it.

Mr. CLARK of Florida. It will take $25,000,000 or $30,000,000, probably $50,000,000, to take care of every Federal activity in the District of Columbia. It is an outrage and a disgrace to the Nation that we are paying rent in the District of Columbia.

Mr. HICKS. Mr. Chairman, will the gentleman permit this suggestion? In the great buildings down on the Mall used by the Army and the Navy, there are undoubtedly many square feet of space which could be utilized for records of this kind. Those are fireproof buildings.

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. CLARK of Florida. Mr. Chairman, I ask for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CLARK of Florida. Mr. Chairman, I want to say to my friend in all good faith and earnestness—and we are all driving at the same object—if the gentleman had gone through all of the buildings in this city as I have, following the lead of Senator SMOOT, who I believe is as sincere an economist as there is here, he would not make the statement that he has just made. We have taken advantage of every inch of space, and we have saved the Government $400,000 a year in rent.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

Mr. HICKS. Mr. Chairman, I ask unanimous consent that his time be extended for one minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HICKS. Mr. Chairman, I want to say to my friend from Florida that the Secretary of the Navy, and a member of his own party——

Mr. CLARK of Florida. And a good man.

Mr. HICKS. Is advocating now before our Naval Affairs Committee that the Naval War College at Newport be brought to the city of Washington and that it be temporarily housed in the Navy Building. Mr. Daniels claims there is enough space there in that building for all of the facilities now used by the War College at Newport. It is doubtful if the college will be moved, but in the meantime the room is there and I think there is enough space to take care of these records, despite what Senator SMOOT may say about it.

Mr. CLARK of Florida. But we have turned that building over to the Navy Department.

Mr. HICKS. There is space there that can be used for those records, no matter what department occupies the building.

Mr. CLARK of Florida. Not these; oh, no.

Mr. WOOD of Indiana. Mr. Chairman, there are 120 guards guarding these buildings now. Col. Ridley recommended a reduction of 16, because of the fact that two of these buildings are to be torn down, and requested 104 for the next year. We reduced that number by 24. The gentleman from Florida refers to the fact that there was a fire in the Commerce Building the other night. That fire happened in spite of the army of guards they have there at the present time. Perhaps if there had not been so many guards there would not have been a fire.

Mr. MANN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. MANN of Illinois. Did it not happen because a guard threw a lighted cigar or cigarette into a waste basket?

Mr. WOOD of Indiana. The supposition is that the fire came from a cigarette having been thrown in some waste paper at a time when there is supposed to be nobody there but guards.

Mr. FESS. Mr. Chairman, if the gentleman will yield, it has been reported to me that there were shavings and débris unnecessarily scattered about the floor where the fire started.

Mr. WOOD of Indiana. I wish to emphasize this further fact. Last year we reduced the army of guards for these same buildings when the whole number was there, including those proposed to be torn down, by 53. They then contended that there was just as much necessity for those additional 53 as they contend there is now for these additional 24.

So if there was need for 53 more last year there is now need for 79 more. This simply shows you how little we can depend upon the estimates and recommendations by the men who are at the head of these things, and Col. Ridley is at the head of this.

Mr. CANNON. Will the gentleman yield?

Mr. WOOD of Indiana. I will.

Mr. CANNON. Were the records kept in this building destroyed by fire the records of the Census?

Mr. WOOD of Indiana. No——

Mr. CLARK of Missouri. Yes; they were.

Mr. WOOD of Indiana. They were records belonging to the Census Bureau.

Mr. CANNON. Were they records of the First Census?

Mr. WOOD of Indiana. Well, I do not know.

Mr. CANNON. Well, I judge so, because some years ago after full investigation the House passed a bill, I recollect I was chairman of the committee that passed the bill, that they should be destroyed, and then came a perfect swarm of indignation all over this country, that the records of the First Census that ever was taken were to be destroyed. The only use I know ever made of them, and it was put upon that ground, was that people scattered all over the country who wanted to qualify as descendants of heroes of the Revolution, and as such, desired to use them [laughter] and that sentiment prevailed.

Mr. BLANTON. Mr. Chairman, I offer a substitute to the amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 84, line 25, strike out "80" and insert in lieu thereof "40."

Mr. BLANTON. Mr. Chairman, in support of his amendment to increase the number from 80 to 104 the distinguished gentleman from Florida [Mr. CLARK] spoke of what his Committee on Public Buildings and Grounds would do if the Congress would let them, or if the steering committee would let them. I want to say that if the committee was composed of just one member, and he the gentleman from Florida, I would probably not be afraid of his action being to the detriment or injury of the country, but as it is now composed I call the attention of my colleagues to what would happen if Congress would take off its brakes and let that committee have its way. Why, within the last few days the distinguished chairman of that committee, the gentleman from Kentucky [Mr. LANGLEY], from the Republican side of the aisle has introduced a bill in Congress to do what? To build a magnificent building here with splendid suites of apartments for each Member of Congress, each Senator, and each Delegate, and their families; to take the people's money, if you please, and construct a place of residence here for each Member and their families. And how much does he require us to pay for the residence? When we are now paying from one to a couple of hundred dollars per month for a place to live in furnished, he is requiring merely the upkeep and 2½ per cent as the return fund to the Government. That is a sample of the ridiculous kind of legislation that this Congress is requested to indulge in under the new régime and under the new Republican administration, as indicated by the distinguished chairman [Mr. LANGLEY].

Mr. CLARK of Florida. Will the gentleman permit a question?

Mr. BLANTON. I will permit it.

Mr. CLARK of Florida. Does not the gentleman think that something ought to be done to protect the average Member of Congress from the avaricious onslaughts of the hotel and apartment people in Washington?

Mr. BLANTON. Oh, yes; but the Congressmen and Senators ought to protect themselves by using their common sense and not do it at the expense of the people. I do not think that we ought to pass the profiteering in Washington onto the shoulders of the people by increasing their burden of taxation.

Mr. CLARK of Florida. If the gentleman will permit.

Mr. BLANTON. The gentleman is taking up my time.

Mr. CLARK of Florida. Just a moment.

Mr. BLANTON. I just want about a minute or more time.

Mr. CLARK of Florida. It will not be at the expense of the people if the Government gets a fair return upon its money, and that is Mr. LANGLEY's proposition.

Mr. BLANTON. That is the idea of some Members and Senators as to what is a fair return on the people's money—2½ per cent—while the people are paying right now 5½ per cent for all of their money regularly borrowed by their Treasurer, and yet we have some Congressmen who think that a fair return to them is 2½ per cent. I tell you it is the best thing on God's earth for the people of the United States that there are checks in Congress on some of these committee chairmen and on some Senators. Only day before yesterday we had an amendment offered to come on this bill. To do what? To increase our own salaries right here in reconstruction times from $7,500 to $10,000 a year. This would involve an increase in expenses of $1,337,500 each year. It was offered, and nobody raised a point of order from either side until after I had risen and made a point of order against it, and then the distinguished gentleman from Kansas [Mr. CAMPBELL] also rose and made the point of order, so as to help save the benefit of it going out as a Republican administration affair.

Mr. WALSH. Will the gentleman yield?

Mr. BLANTON. I will yield.

Mr. WALSH. Will the gentleman kindly inform the committee what he has done with his sense of humor?

Mr. BLANTON. My sense of humor since I got here has been absolutely swallowed up by the inexhaustible supply of humor held by the distinguished gentleman from Massachusetts. [Laughter.] He has really, with the aid of the distinguished gentleman from Illinois [Mr. MANN], made the Republican Party on the other side of the aisle. I have no more sense of humor.

Mr. CLARK of Florida. Mr. Chairman, I simply want to say one word. Mr. Chairman, I know whatever may be my faults—and they are many—I have never demagogued on this floor. When the salaries of Members were raised from $5,000 to $7,500 I voted for it, and I made a speech for it, and I think what Congress is suffering from to-day is its cowardice, if I may use that word. [Applause.] The salary of a Member of Congress ought to be $10,000 or $15,000 a year. [Applause.] I think I am a $10,000 man. [Applause.] And I am willing to vote for that amount, and I believe my people will support me in it.

My friend from Texas [Mr. BLANTON] might be a costly proposition at $2,000 [laughter], but I have a little higher opinion of my own work than to put it on that basis. I believe I can make my salary at home. I know I can. I did it before I came here, and I can do it again. And if Congress would simply get rid of all this infernal camouflage and come out straight and say, "We are going to fix a decent salary; we are going to cut out mileage and stationery, and all these devilish little things that do not amount to anything, but which simply are a source of great evil by the newspaper discussion of them," and pay a man a fair salary for what he does, it would seem a much fairer proposition. If I do not come back, I want my successor to get reasonable pay. And, Mr. Chairman, if it is necessary to protect Members and Senators by building an apartment house from which the Government will get a reasonable return on its investment, I say build it. I do not want the Government to furnish me a home, and my friend from Kentucky [Mr. LANGLEY] does not. But I am tired of being gouged and robbed and defrauded by Washington hotel men and apartment-house owners. [Applause.] We ought to do something to stop it; and Mr. LANGLEY is entitled to great credit for initiating this movement. We should either build a house and let the Government get a fair return on its investment, or else fix the price these cormorants can charge. [Applause.] I am in favor of it either one way or the other; I do not care which. I did not expect to make any money out of Congress when I came here, and I will not. I never cared much about money, anyhow, except what I could get for it, and the other fellow always got it about as soon as I made it. I am not a financier like my friend. I can not drive a bargain like he can. I ask what the price is and pay it. He may juggle with them, and he may offer all sorts of inducements such as his distinguished personality in the House as being an advertisement for the hotel. [Laughter.] I do not know. But I have nothing of that kind, and it is simply a question of "pay your money and take what you can get" with me. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida.

The question was taken, and the Chair announced that the noes appeared to have it.

Mr. CLARK of Florida. Division, Mr. Chairman.

Mr. WOOD of Indiana. Mr. Chairman, in order that the record may be correct, I call attention to the fact that the gentleman from Texas [Mr. BLANTON] offered an amendment.

The CHAIRMAN. The gentleman is correct. The question is on the substitute of the gentleman from Texas to the amendment offered by the gentleman from Florida.

Mr. WOOD of Indiana. Let it be read.

The CHAIRMAN. Without objection, the substitute will be reported.

The Clerk read as follows:

Amendment offered by Mr. BLANTON to the amendment offered by Mr. CLARK of Florida: Page 74, line 25, strike out the word "eighty" and insert in lieu thereof the word "forty."

The CHAIRMAN. The question is on agreeing to the substitute.

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Florida [Mr. CLARK].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For producing copies of weekly issue of drawings of patents and designs; reproduction of copies of drawings and specifications of exhausted patents, designs, trade-marks, and other papers; expense of transporting publications of of patents issued by the Patent Office to foreign governments; photo prints of pending application drawings; and photostat supplies and dry mounts; $230,000.

The CHAIRMAN. The Clerk calls the attention of the Chair to the fact that at the end of line 4, page 107, there is an extra word "of."

Mr. WOOD of Indiana. Mr. Chairman, I move that the word "of" at the end of line 4 be stricken out.

The motion was agreed to.

The Clerk read as follows:

For investigation of rural education, industrial education, physical education, and school hygiene, including personal services in the District of Columbia and elsewhere, and no salary shall be paid hereunder in excess of $3,500 per annuam, $50,000.

Mr. WALSH. Mr. Chairman, I move to strike out the last word.

Will the gentleman advise us what was done under this item during the last year for investigation of rural education, industrial education, physical education, and school hygiene, as mentioned in the item on page 108?

Mr. WOOD of Indiana. I will state to the gentleman from Massachusetts that the hearings in this case disclose in some considerable detail the people engaged in this work, and what was done under this item, and what they have been doing. We had some little information that they were perhaps diverting these appropriations for services other than those for which they were specifically designated. The gentleman at the head of the department tried as best he could to assure us that was not being done. The hearings disclose quite fully what they have been doing.

Mr. WALSH. Is the gentleman satisfied that these moneys are being utilized for the purposes specified in the paragraph?

Mr. WOOD of Indiana. Well, the only information we have, aside from the statement of the gentleman who is at the head of this bureau, is an anonymous communication—that, of course, you can not put much dependence in—that led us to make the investigation we did as to whether or not the money was being properly expended. And the only information we had on the subject, and the only way we had to get the information, was from the head of the bureau himself.

Mr. WALSH. Where were the activities carried on last year, particularly?

Mr. WOOD of Indiana. Well, there are various activities here with reference to the work that these people are supposed to be doing. Most of it was carried on here in the city of Washington. I will state that the head of this bureau said that most of this work has been done with reference to rural schools, and it was upon that subject we made our investigation as thoroughly as we could under the circumstances, in order to see whether or not he was doing all the work that could be done under this appropriation in the rural schools. The trouble with these gentlemen is that they take a good deal on themselves in the administrative function, and use a good deal of discretion in determining what is and what is not work under the appropriation. Sometimes it is legitimate and sometimes it is not, and sometimes it is very close to the border. And the gentleman from Massachusetts has seen enough of the functioning of those departments to know how adroitly they do that.

Mr. WALSH. It is the same amount that was appropriated last year?

Mr. WOOD of Indiana. He did not get any more. Some of the amounts have been reduced.

Mr. WALSH. Mr. Chairman, I ask unanimous consent to withdraw my pro forma amendment.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to withdraw his pro forma amendment. Is there objection?

There was no objection.

Mr. WALSH. And I thank the gentleman from Texas for his consideration.

Mr. WINGO. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WINGO. What is the paragraph that has been under discussion on the other side of the House?

Mr. BLANTON. Inasmuch as the gentleman from Massachusetts is satisfied, I am sure we all are.

Mr. WINGO. Mr. Chairman, I propose to renew my parliamentary inquiry.

The CHAIRMAN. The Chair will inform the gentleman that it was lines 3 to 7, on page 108.

Mr. WINGO. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Arkansas moves to strike out the last word.

Mr. WINGO. I want to get some information.

The CHAIRMAN. The gentleman from Arkansas is recognized.

Mr. WINGO. Will the gentleman please state what has been done under that? That is the appropriation that has been carried heretofore. I did not understand what the gentleman says has been done under that, although the gentleman has explained it to the gentleman from Massachusetts. We could not hear it over here.

Mr. WOOD of Indiana. I am sorry that I did not raise my voice loud enough to enable the gentleman to hear what went before.

Mr. WINGO. No; the dulcet tones of the gentleman from Massachusetts did not carry as far as the Democratic side.

Mr. WOOD of Indiana. The committee was anxious to ascertain some particulars under this item and obtain some information about it. We sent for the gentleman who was supposed to know all about it, and he came before us, and we had him describe every particular person employed, and the name and the class of work that person was engaged on. The hearings are very full on that proposition.

If the gentleman would take a little time in his leisure he can find out what the superintendent says they are doing, and if they are doing what he says they are doing, and nothing more, I suppose they are keeping within the purview of the authorization.

Mr. WINGO. I am neither criticizing nor commending this work. The gentleman understands that the reason why we have this large Committee on Appropriations is that we may get all the facts. It is impossible for me to do my other work and to read all the voluminous hearings. Can the gentleman tell us just what kind of work they have been doing last year?

Mr. WOOD of Indiana. The superintendent says the work has been mostly with reference to rural schools. They have had something to do with town schools also.

Mr. WINGO. What have they done with reference to rural schools?

Mr. WOOD of Indiana. They claim to be working along the higher lines of teaching and introducing new and improved methods, not only with respect to teaching in the schoolroom but with reference to hygienic conditions and the keeping of the property and grounds.

Mr. WINGO. Where did they get the men who are doing this—the men who are qualified by experience to do it?

Mr. WOOD of Indiana. We did not enter into any great minutiæ as to where they got them. They have got them, and they are drawing salaries. [Laughter.] We had some doubt as to whether the salaries were being paid for the services they were intended to pay for, and in order to solve our doubts we examined the superintendent in detail, and the explanation he gave was satisfactory, at least to himself, and in a measure it was satisfactory to us. [Laughter.]

Mr. WINGO. Mr. Chairman, of course I think the chairman has done the best he could, but I get little information even from his explanation. I am in sympathy with anything that will improve rural education, but I am afraid that some gentlemen are going into it backward. I have taught a country school in my day, and I have seen some of the people who have been sent out to tell people how to improve rural life, and they themselves have not gotten acquainted with rural life. They are good people, and possibly experts in their line; but the first thing that is essential in order that a man may help anyone in a given line, whether in a professional line or a scientific line or an industrial line, is to know something about it himself. I trust that during the next year this fund will be spent in paying salaries and traveling expenses to people who know something about country schools.

Mr. BYRNS of Tennessee. What particular official does the gentleman refer to?

Mr. WINGO. I am not referring to any particular official.

Mr. BYRNS of Tennessee. I will say this to the gentleman, so far as the commissioner of education is concerned, who is one of the ablest educators in America, that he happens to come from the eastern section of Tennessee, where I came from.

Mr. WINGO. I concur in the gentleman's opinion of Dr. Claxton, notwithstanding the fact he came from east Tennessee. The fact that one comes from west or middle Tennessee carries with it a presumption of both high character and exceptional ability, while one coming from east Tennessee must rebut the contrary presumption. I came from west Tennessee. [Laughter.]

Mr. BARKLEY. The gentleman means those in west Tennessee that are still there. [Laughter.]

Mr. WINGO. No; "still" gentlemen are confined to east Tennessee and Kentucky. [Laughter.]

Mr. BYRNS of Tennessee. The gentleman need have no suspicion about this particular official.

Mr. WINGO. I have no suspicion about him.

Mr. BYRNS of Tennessee. I want to say to the gentleman that many years prior to his appointment as commissioner of education—and he was appointed some 12 years ago—this gentleman was engaged in school work.

Mr. WINGO. I have not the slightest doubt of that; but what school? Not a country school?

Mr. BYRNS of Tennessee. I do not know of a man who has ever been commissioner of education who has had more experience with reference to common schools than he.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. Mr. Chairman, I ask unanimous consent for five minutes more. I want to get some facts. I am not criticizing this bureau.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. BYRNS of Tennessee. The gentleman has made it his life work.

Mr. WINGO. Did he ever teach a country school?

Mr. BYRNS of Tennessee. Yes, indeed.

Mr. WINGO. How long ago?

Mr. BYRNS of Tennessee. I can not tell the gentleman just how long ago, but all his life.

Mr. WINGO. Does the gentleman, after his experiences as a Member of Congress in Washington for 20 years, believe that it is possible for a man to live in the city of Washington for 12 years and then know anything about country schools? I used to teach a country school and made a success of it, but I have been in Congress for eight years and I think that has wholly unfitted me to teach a country school.

Mr. BYRNS of Tennessee. The gentleman from Arkansas was also a good lawyer when he came here.

Mr. WINGO. I plead guilty to that. [Laughter.]

Mr. BYRNS of Tennessee. Does the gentleman think his eight years in Washington have unfitted him to be a good lawyer now?

Mr. WINGO. I shall sooner or later return to the practice of the law, and I do not want to be estopped by any admission of record. [Laughter.] I am anxious to do all I can for rural schools, and I repeat I concur in the high estimate he has of the character and ability of Dr. Claxton.

Mr. CAMPBELL of Kansas. Mr. Chairman, I move to strike out lines 3 to 7, inclusive, on page 108.

The CHAIRMAN. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CAMPBELL of Kansas: Page 108, strike out the paragraph beginning with line 3 and ending with line 7, inclusive.

Mr. CAMPBELL of Kansas. Mr. Chairman, I offer the amendment to strike this out because it is a useless waste of $50,000.

Mr. WINGO. I hope the gentleman will not do that.

Mr. CAMPBELL of Kansas. Everybody who knows anything about the country schools and about the Bureau of Education in Washington, knows that this is a waste of just $50,000, and that the only people benefited by the appropriation are those who get the $3,500 a year to ride around over the country, from one State to another, probably drop in and see the State superintendent in one or two States of the Union during the year, and never visit a country school and never offer any suggestions that ever reach a country school or that ever benefit a country-school pupil.

I grew up in the country. I know country schools, and I know that even the visit of the county superintendent rarely was of any particular benefit to the country schools. Many suggestions came from the county superintendent, which were passed down from the State superintendent, that were of value; but no suggestion has been made by the Bureau of Education in Washington that has been of any benefit to country schools within the past year; and to appropriate $50,000 in this bill for the purposes indicated is simply to throw away that much money, so far as any value is concerned. If we are going to try to save money, we must begin somewhere, some time. There is no use to undertake to improve the country schools by any suggestions from the city of Washington, especially from the Bureau of Education. The present Bureau of Education can probably do that work just as well as any other, but the sooner the people of this country get away from the idea that they must begin in Washington with a central authority and go on down to the individual, rather than begin with the individual himself, the better it will be for the country. We are altogether too far away from the people, with the Government here in Washington. It is far better for the country schools to have a good board of directors in the country school district than it is to have an appropriation to waste $50,000 such as is contemplated here.

Mr. CONNALLY. Will the gentleman yield for a question?

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. CAMPBELL of Kansas. I ask for two minutes more. I should like to hear the question of the gentleman from Texas.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent that his time be extended two minutes. Is there objection?

There was no objection.

Mr. CONNALLY. I should like to ask the gentleman from Kansas if he wants to deny to the country schools whatever advantage there may be in this Bureau of Education? Does he want the activities of this bureau confined entirely to the city schools? I would like to have the gentleman explain how it would benefit the country schools at all.

Mr. CAMPBELL of Kansas. It would not benefit the country schools at all.

Mr. CONNALLY. Why not strike out the whole Bureau of Education and do away with it?

Mr. CAMPBELL of Kansas. I would like to see that done.

Mr. CONNALLY. Will the gentleman offer an amendment to have that done?

Mr. CAMPBELL of Kansas. We are working on this paragraph now.

Mr. CONNALLY. Why does not the gentleman offer an amendment to strike out the whole Bureau of Education and save not only $50,000 but perhaps $200,000 or $300,000?

Mr. BLANTON. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. BLANTON. If the gentleman from Kansas is against this $50,000 item, I want to ask him how on earth it ever got into the bill? [Laughter.]

Mr. CAMPBELL of Kansas. The gentleman from Texas is always at his best when he attempts to be facetious.

Mr. McARTHUR. Will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Kansas has again expired.

Mr. CAMPBELL of Kansas. I ask unanimous consent for one minute more.

The CHAIRMAN. The gentleman asks unanimous consent that his time be extended one minute. Is there objection?

There was no objection.

Mr. McARTHUR. I should like to ask the gentleman if in his judgment it is well for Congress to attempt to practice these small economies and then load onto the people of the United States 50 extra Members of Congress, with their salaries and mileage and clerk hire, and all those things?

Mr. CAMPBELL of Kansas. The gentleman from Oregon does not properly shake his gory locks at me. I am not in favor of increasing the membership of this House, and I hope it will not be done. [Applause.]

Mr. McARTHUR. I did not assume the gentleman was, but I wanted to get the benefit of his vast experience and knowledge in this House.

Mr. MANN of Illinois. If we are going to do it, would it not be a wise thing to save some money so as to pay for it?

Mr. McARTHUR. I think so.

Mr. FESS. Whatever be the value of this particular division of the work here on school matters, I think every member of the committee will recognize the importance of rural education. The drift for the last 20 years has been to the cities. There has been an effort to bring the country up to the same point of advantage that the city has. Consequently there has been a very wide movement throughout the Nation toward what we call the centralization of schools in almost every State, where a central school building is erected in the country district, giving opportunity for higher education the same as the city has. That has been a movement most distinct in the last two decades. Rural education has become extremely important because of the sparsity of the school children in the various sections where heretofore the schools were largely attended. I frankly admit that I can not speak with full information in respect to the particular work that the division of rural education connected with the Bureau of Education is doing, but I think it would be very unwise to now start in as a matter of economy on the basic element of our country's work, which is education in the rural sections of the land.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. FESS. Yes.

Mr. CAMPBELL of Kansas. In the vast experience in education that the gentleman from Ohio has had, can he point to a single instance of benefit going from Washington into the country school districts?

Mr. FESS. I think, without hesitation, that I can say that the findings in the surveys that have been reported and published here are of considerable value to the common country schools.

Mr. CAMPBELL of Kansas. What I want to know is, something that has been done.

Mr. FESS. I think there has been distinct value. I sympathize considerably with the spirit of the House.

Mr. CAMPBELL of Kansas. The State superintendents and county superintendents say they get no suggestions of value from these people who come from Washington; but, on the contrary, that whatever authority they have is in conflict with the idea of the local authorities, and they get no beneficial suggestions.

Mr. FESS. I would say to my friend from Kansas that if that is true then there must be a woeful lack of efficiency here on the part of those who are paid salaries because of special

fitness and equipment, because the field is certainly ripe for that sort of thing.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. WINGO. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. FESS. I yield.

Mr. CAMPBELL of Kansas. The State superintendent of the State of Kansas was here two or three weeks ago. I introduced her to the gentleman from Indiana [Mr. WOOD]. She stated to me what I have stated to the House, and I have no doubt that she stated it to the gentleman from Indiana. She thinks that every dollar that is expended on the Bureau of Education here in Washington is a waste of public money.

Mr. FESS. I would not agree with her on that.

Mr. CAMPBELL of Kansas. She says that they have always broken up the spirit of the organizations wherever they have gone out. In the first place, they draw larger salaries than the State educators get.

Mr. FESS. They ought to do that.

Mr. CAMPBELL of Kansas. And they offer silly suggestions that do not appeal to the good sense of the people who are responsible for the conduct of education in the States.

Mr. FESS. I frankly state to my friend that I do not sponsor everything that has gone out in the way of publications. I think mistakes are made, and there are statements made in the form of bulletins that do not do us any particular good, but I would not say that that is true in the main. It is far otherwise.

Mr. KELLY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FESS. Yes.

Mr. KELLY of Pennsylvania. The suggestion has been made by the gentleman from Kansas [Mr. CAMPBELL] and others that no single item of benefit has come from this appropriation. I want to call the attention of the House to one which has come to my attention in the past six months. It occurred in Adams County, Pa., the county in which the Battle of Gettysburg was fought. A township with seven small 1-room schools, ranging in number of pupils from 10 to 15 each, sent down to the Board of Education and asked it for a survey for a consolidated school. A survey was made, showing where in the center of that township a modern school could be erected, and that survey has been adopted by election by the people of that township.

Mr. CAMPBELL of Kansas. Could not the State of Pennsylvania have done that?

Mr. KELLY of Pennsylvania. It was done in cooperation with the State. The county superintendent made the request.

Mr. SUMMERS of Washington. Mr. Chairman, will the gentleman yield?

Mr. FESS. Yes.

Mr. SUMMERS of Washington. I wonder if the gentleman from Ohio could tell us if the distinguished friend of Eugene Debs who made the speech at Dallas, Tex., about a year ago is still in the employ of this Bureau of Education?

Mr. FESS. I am of opinion that he is not.

Mr. RAYBURN. Mr. Chairman, if the gentleman would permit, I would state that the Secretary of the Interior discharged him immediately. [Applause.]

Mr. FESS. Mr. Chairman, I desire to impress upon the committee the seriousness of taking any backward steps at this time in matters of education. The subject of education is susceptible of many suggestions along the line of theory which invite criticism on the part of hardheaded business men and men of affairs who are Members of this House and of the Senate. I say again that I sympathize with a good deal of criticism that has been offered on some phases, but certainly the most important feature of America is the education of the children of America, and the most important part of education now is in the rural districts. A large problem in education to-day is in the country. I would dislike to see a step taken to wipe out rural education at this particular time, although I am not fully advised as to all of the benefits that have come from this particular provision.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. I know something about rural schools. I grew up in the State of Indiana before there were any common schools there and when we had the three-R schools—readin', 'ritin', and 'rithmetic. In each neighborhood they made arrangements for the education of the children. So far as it went it was very good, and I want to say right now that so far as the State of Indiana is concerned—and I think I might also say the State of Illinois—I know that the education in those three-R schools turned out as good citizenship and as good men, as well qualified for the duties of life, as are being turned out to-day.

Let me come to Illinois; I am familiar with that. We have a State school superintendent with a staff, a very good man. Each county has its school superintendent, every school district in the cities has a board of three directors, and in the county—I might mention large counties—they frequently do not have more than two or three students. Under the law I think there is a chance there for the State legislature to act, and the people are acting. Why, in my city of 40,000 people, a little plus, there are two high schools. There is a new one just been authorized, and in every township—and there are a good many townships, so far as I know, in adjacent counties in eastern Illinois, and I am told that is so all over the State—there is a township high school, where the education is better and where children go. I want to say that education has improved in the last generation and is costing more. Oh, once in a while people with lots of money send their children to colleges if they want to do so, and the people who are poor, their children will go there when they can make their way in large part and pay their way, and get along fairly well. Now, I want to say——

Mr. SHERWOOD. Will the gentleman allow me to interrupt him?

Mr. CANNON. I will.

Mr. SHERWOOD. It seems to me that $50,000 is inadequate. If the General Government is going into this thing and investigate the rural schoolmarms, $50,000, at $10 per schoolmarm, will only investigate 500 schoolmarms. [Laughter.]

Mr. CANNON. If my colleague, the gentleman from Ohio, will bear with me a moment I will venture the assertion that there is not one dollar of this appropriation that is paid out for instruction in country schools; all in Washington. [Applause.] Now, I think, and I guard my words when I say so, the professional educator instead of going and teaching a country school, going and teaching a high school, going and taking a professorship in many of the colleges we have got in the country over—and I speak with respect to them, not abusing them at all—I think that if at this time there is important legislation reported to the House touching education, with papers and magazines and the books and the spirit of the generation, we do not want to strengthen Washington——

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANNON. I want about two minutes more; I will not take more time.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for three minutes.

Mr. CANNON. Make it five minutes.

The CHAIRMAN. For five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. The committee has not been able to find out what they have been doing with this $50,000. [Applause.] I venture the assertion in my opinion they have not done much of anything that was of any account except to draw a salary. There are other clauses here that will support this bureau of education in Washington; I think we have passed them by, and I do not make any motion to strike them out, but I am for this motion; it is too late to amend it otherwise. As you know, the Middle Western States, or the Eastern States, or the Western States all have common schools scattered here and there, and are very expensive. Of course, it is expensive to live, as far as that is concerned, and we do not wish to throw away an extra $50,000 per annum and give that much additional tax——

Mr. BARKLEY. Will the gentleman yield?

Mr. CANNON. In a moment. God knows in unscrambling the eggs we carry not only township, county, and State taxation and the taxation levied by the Federal Government in paying this enormous interest upon the public debt and meet all kinds of demands, most every one of them worthy; at least some of them that are proposed are worthy of examination to see whether they ought to run and glorify; but I do not desire, because somebody comes and asks it and cries, "Education, education, we must educate"—why, I will venture the assertion that, taking it all in all, the population throughout the United States are the best educated people on earth, and it has cost a good deal of money, and now when you take these multiplied millions and millions of dollars that we have got to meet, the burden that we have got to carry, I apprehend that when the people get a chance to speak two years from now or four years from now or six years from now or eight years from now, and I measure my words when I say it——

Mr. BEE. The gentleman will be here.

Mr. CANNON. There will be a surprise for myself and for gentlemen on both sides of the House. We can not carry that burden by wasting $50,000 or any other sum unless they bring the goods to show that the expenditure is a wise one. Take the gentleman in charge of the bill, take the knowledge that anybody has about the expenditure of this money, we know that $50,000 is gone. Why, we take the gentleman for whom I have very great respect, the Representative from Ohio [Mr. FESS], our colleague, who is an educator. He is not fierce in his support [laughter] of this proposition. He has an interrogation point——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BARKLEY. I ask unanimous consent that the gentleman's time be extended five minutes.

Mr. CANNON. Oh, no; I have said enough.

Mr. BYRNS of Tennessee. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I hope that the committee in its very earnest desire to practice economy, with which I am in entire accord, will not strike a blow at the country schools. [Applause.] This appropriation is made in the interest of the rural schools of the country. It is the only direct appropriation made under the Bureau of Education for the sole benefit of the rural schools

Mr. COOPER. Will the gentleman yield?

Mr. BYRNS of Tennessee. I will yield.

Mr. COOPER. I listened very attentively to the question asked the chairman of the committee by the gentleman from Massachusetts and the gentleman from Arkansas as to what this commission did with this money. Now, I fail to find any answer. The chairman of the committee did explain it in a measure; but will the gentleman from Tennessee please tell the House what they do with this money?

Mr. BYRNS of Tennessee. Well, I can not give any specific instances, such as was given by the gentleman from Pennsylvania [Mr. KELLY].

But I do know that these moneys are used by the Commissioner of Education for the purpose of doing what he can in the way of advice and help to rural communities in improving their schools and aiding in the work of better preparation of schoolteachers.

Mr. COOPER. Will the gentleman yield again?

Mr. BYRNS of Tennessee. I will yield.

Mr. COOPER. I spoke to the chairman of the committee a few moments ago and asked him what this commission was doing with this money. He said they were teaching the girls to knit and to make pie, and paying inspectors to go around, who would recommend, if they needed a window light, that a new window pane would be put in.

Mr. BYRNS of Tennessee. I am sure, if the chairman gave the gentleman that answer, he was entirely facetious.

Mr. MANN of Illinois. I would like to ask the gentleman if it was under this appropriation that the Bureau of Education made a survey of illiteracy?

Mr. BYRNS of Tennessee. I know they have made such surveys.

Mr. MANN of Illinois. Made surveys in States as to illiteracy?

Mr. BYRNS of Tennessee. Yes. The bureau made such a survey a few years ago in the State of North Carolina, as well as in other States. They made certain surveys, I think, in the State of Wisconsin and in a number of other States that could be cited. Now, the hearings conducted by the subcommittee at this time unfortunately, owing no doubt to lack of time, were very limited.

Mr. CARTER. Can the gentleman tell us what these fellows investigated?

Mr. BYRNS of Tennessee. As I stated a few moments ago, this appropriation is used by the Commissioner of Education for making surveys when they are requested by different communities. Of course, the Bureau of Education does not undertake to foist upon any State or any community any educational policy, but the Bureau of Education does consider that it is its proper function to give advice and aid to those States, counties, and communities which request assistance.

Now, as the gentleman from Illinois stated, the greater portion of this sum has been used, and those employed under this appropriation are being used, in making these surveys which are requested by the various States and communities. And I do happen to know from previous hearings of the commissioner that these requests are quite numerous, but owing to the inadequacy of the appropriation he is not able to comply with all of the requests that are made.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. CARTER. I ask unanimous consent, Mr. Chairman, that the gentleman may have five minutes more.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that the gentleman from Tennessee may have five minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. CARTER. Then these officials do not make any investigation?

Mr. BYRNS of Tennessee. They make surveys.

Mr. CARTER. Just what does the gentleman mean by a survey?

Mr. BYRNS of Tennessee. As I stated a while ago, in the State of North Carolina they made a survey as to the illiteracy in that State, as to the need of schools, and as to the advisability of consolidating and forming community schools in various States.

Mr. CARTER. To whom do they report?

Mr. BYRNS of Tennessee. They make these surveys and the reports are made to the States or communities asking for them. This survey is made for the purpose of rendering educational assistance to those communities and schools that ask for the assistance. The gentleman can see that with the very limited appropriation of $50,000 it is impossible for the commissioner to do very much work.

Mr. CARTER. What I want to get at is that if these gentlemen make reports to somebody they ought to be in existence, so that some of us could get hold of them and know what they are doing.

Mr. BYRNS of Tennessee. They do make the reports. They are published in the forms of bulletins and distributed in those States and communities which are directly concerned with the surveys that are made. That information is available to the gentleman, as to any other Member, if he desires it. I wish to say, furthermore, to the gentleman, as I have just been reminded, that the National Educational Association has indorsed the work being performed by the bureau, and has urged Congress to increase the appropriation that has been heretofore made.

Mr. CARTER. Do not the States do the same work that these Federal officials do?

Mr. BYRNS of Tennessee. Some of them do, but unfortunately there are some States that do not do the full amount of work that they ought to do in the interest of the education of the children.

Mr. CARTER. Why should not the States do it all?

Mr. BYRNS of Tennessee. That might be said of many of the activities of the Government. But as I view it, it is the function of the Federal Government within reasonable bounds to render aid to the States and communities by way of advice and information, and not for the purpose of creating any policy or anything of that sort.

Mr. CARTER. The States ought to be able to do anything along these lines that the Federal Government can do for them. Can the gentleman tell me how much of this money is spent in the rural districts and how much is spent in the District of Columbia?

Mr. BYRNS of Tennessee. All of it, I will say to the gentleman, is spent in the way of salaries and expenses of those who are sent out to these various communities where surveys are made for the purpose of offering advice and stimulating interest in education in rural communities.

Mr. CARTER. As I understand the gentleman, that is done only in rural communities and does not extend to the District of Columbia or to cities at all?

Mr. BYRNS of Tennessee. That is true.

Mr. BARKLEY. Is it not true that this bureau keeps in general touch with the bureaus of education in all the States, and they make suggestions to a State of valuable information obtained in other States, and incorporate this information in bulletins that are available to all the teachers in the various States?

Mr. BYRNS of Tennessee. The gentleman is right. It is what might be called a clearing house of information for the benefit of all the rural schools and the teachers of the country.

Mr. FIELDS. Mr. Chairman, I move to strike out the last two words.

I have given some attention to the work that is being done by the Bureau of Education on this line. It is true that some sections of the country are better advanced in education than others. These agents for the Bureau of Education, as I get it, make a general survey of the entire country and study the most advanced methods and give them to the entire country in the form of bulletins and documents that are available at the Bureau of Education. In addition to that they send representatives into communities where their presence is requested to consult with the local authorities. It brings together the sections of the country more advanced in education and those not so far advanced. I know that the bureau publishes valuable documents.

Mr. CAMPBELL of Kansas. Will the gentleman yield for a question?

Mr. FIELDS. And those documents are available for people who desire them.

Mr. CAMPBELL of Kansas. Now, the only suggestion that has been made here that would indicate that this bureau is doing anything of any value at all is that it makes a survey of the illiteracy in the States. Does not the census do that every 10 years?

Mr. FIELDS. I will say to the gentleman that that is not the only function of the bureau.

Mr. CAMPBELL of Kansas. This is the only function that has been assigned thus far for this $50,000.

Mr. FIELDS. I was trying to point out to the other gentleman other functions performed by the bureau.

Mr. CAMPBELL of Kansas. Is it not true that every State in the Union publishes an annual report on education, and that these annual reports are exchanged between superintendents of instruction in the States, and that they carry all that is of value in regard to the improvement of methods in the States and the educational activities in the several States?

Mr. FIELDS. It is my opinion that it does not bring it as directly before the people as the Bureau of Education does.

Mr. CAMPBELL of Kansas. How can the Bureau of Education with $50,000 do anything in this field that is of value to the people of the country? There ought to be $500,000 here, or else you should cut this out.

Mr. FIELDS. I admit that $500,000 would be better than the $50,000.

Mr. CAMPBELL of Kansas. The $50,000 here simply pays salaries up here in the bureau.

Mr. FIELDS. Our failure to appropriate this money would, I believe, be a backward step. As my colleague from Tennessee [Mr. BYRNS] suggested, this work has the indorsement of the National Educational Association.

Mr. CAMPBELL of Kansas. What is that?

Mr. FIELDS. The gentleman should know what the National Educational Association is.

Mr. FESS. Mr. Chairman, will the gentleman permit?

Mr. FIELDS. Certainly.

Mr. FESS. The membership of that association embraces 610,000 teachers in the United States.

Mr. FIELDS. Yes; as the gentleman from Ohio states, the National Educational Association is composed of 610,000 teachers in the United States. I recall that a few years ago I submitted a list of the teachers in my district to the Bureau of Education to receive bulletins from time to time, and I understood from them that they received a great many valuable bulletins on educational work.

Mr. FESS. Mr. Chairman, will the gentleman permit an interruption?

Mr. FIELDS. Yes.

Mr. FESS. One of the latest reports was made in North Dakota as to the ratio of schools without teachers and the ratio of schools under grade and the ratio of schools with teachers of college grade.

Mr. FIELDS. It is a very valuable work, and the appropriation ought to be made.

Mr. JONES of Texas. Mr. Chairman, I have an amendment I want to offer.

Mr. WOOD of Indiana. Mr. Chairman, I move that all debate on this paragraph and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from Indiana moves that all debate on this paragraph and all amendments thereto be now closed. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kansas [Mr. CAMPBELL].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. WALSH. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 25, noes 44.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. JONES of Texas. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JONES of Texas: Page 108, line 3, after the word "education," strike out the remaining part of line 3 and all of line 4 down to and including the word "hygiene."

Mr. JONES of Texas. Mr. Chairman, I ask unanimous consent to proceed for three minutes. The amendment has not been discussed.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for three minutes. Is there objection?

Mr. BARKLEY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BARKLEY. Did the gentleman from Indiana [Mr. WOOD] move that the debate on this paragraph and all amendments be closed?

The CHAIRMAN. Yes. Is there objection to the request of the gentleman from Texas?

Mr. WALSH. I object.

The CHAIRMAN. Objection is made. The question is on agreeing to the amendment offered by the gentleman from Texas [Mr. JONES].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For necessary traveling expenses of the commissioner and employees acting under his direction, including attendance at meetings of educational associations, societies, and other organizations, $7,500.

Mr. JONES of Texas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. JONES of Texas. The purpose for which I offered the other amendment was simply this, and I think it ought to be stated: The investigation provided for in the preceding paragraph, covering $50,000, is not limited to rural education, but it also includes industrial education, physical education, and school hygiene, which is not limited to rural communities. I am willing to help the country schools in any possible way, but I do not believe that those who have charge of this work should have the privilege under an appropriation for rural schools to go into any other kind of investigation. Here there is included in this "industrial education and physical education and school hygiene," none of which is limited to country schools, and under this appropriation the department could spend $1,000 for rural education or the investigation or survey of rural schools and the remaining $49,000 for industrial education or some other form of education in the cities.

There ought to have been some such limitation as my amendment provides for. All that my amendment does is to make them spend the money for the purpose it is intended. They need not use this appropriation, small as it is, for the manifest purpose for which it is intended but may use the money for other purposes.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield for a question?

Mr. JONES of Texas. Certainly.

Mr. CAMPBELL of Kansas. It makes better talk, though, to say that they are using it for rural schools.

Mr. JONES of Texas. Yes; I agree with the gentleman on that. But I do not believe that under that guise of rural education they should be given carte blanche to spend a lot of money for other purposes.

Mr. MANN of Illinois. The gentleman does not mean that it makes better talk, but that it gets more votes? [Laughter.]

Mr. CAMPBELL of Kansas. Yes; I accept the suggestion of the gentleman from Illinois.

Mr. JONES of Texas. Mr. Chairman, I withdraw my pro forma amendment.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

For investigation of elementary and secondary education, including evening schools and the wider use of the schoolhouse in cities and towns, including personal services in the District of Columbia and elsewhere, $9,000: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding $3,500 per annum.

Mr. KELLY of Pennsylvania. Mr. Chairman, I move to amend, in line 4, page 109, by striking out the figures "$9,000" and inserting in lieu thereof "$25,000."

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. KELLY of Pennsylvania: Line 4, page 109, strike out the figures "$9,000" and in lieu thereof insert "$25,000."

Mr. KELLY of Pennsylvania. Mr. Chairman, I have offered this amendment to provide $25,000 for furthering the use of the schoolhouse as the center of community association and activity. Of all the projects which are being urged to-day for the solution of our problems there is none which promises such certain success as the common-sense plan of organization of the citizenship of America in their local neighborhoods, so that by common counsel the people may discover the common interest and act upon it.

The great need is that American citizens have the sense of membership in America and that can only be done by getting

together as citizens and Americans, rather than as members of any lesser group.

If people are to get together there must be a place of meeting where they may gather as neighbors, members of the community. Only by mingling with each other on a common level can people come to know each other, and out of such knowledge agree upon a common purpose.

The unit of neighborhood in America is the public-school district. The entire Nation is divided into these natural communities, and in the center of each is a public building owned by all the people, regardless of all lines of class and creed and partnership and income. To them everybody comes by right and from them nobody can be excluded.

The schoolhouse is the one true answer to the demand for a meeting place where by association on a common level the sense of equality may be realized and where in the power and happiness of touching elbows Americans may banish the thousand and one divisive lines of danger.

The schoolhouse is a community building because of the community of its ownership. Every resident of the community, either directly or indirectly, pays taxes for its erection and its maintenance. Such common ownership is essential for any real community purpose. Many cities and towns have recently erected separate community buildings through private contributions or have inaugurated drives to secure funds for such buildings. These are not community buildings; they are simply clubhouses for groups of the people. They are necessarily governed under rules laid down by groups, where generally the largest contributors have the greatest influence, while those who gave nothing have nothing to say.

The citizen who is the largest taxpayer in the community has one vote in the control of the public school, so has the citizen who pays his taxes to his landlord. Each citizen has an equal share simply by virtue of his residence in the community. The school building is, therefore, the one possible agency for unified organization of the people of the United States. It stands ready waiting to be used for this supreme service in every neighborhood throughout the Nation.

When the Pilgrims hit upon the plan of taxing all the property of the community for the support of free schools it was the first time in the history of the world that this principle was suggested. They builded wiser than they knew, for they made these buildings the property of the people, and it is perfectly legitimate that the people use their own buildings for their own meetings for social, recreational, and other purposes when the school children are not occupying them.

It is important to recognize the fact that no right to use the public school building inheres in any clique or group or part of the people. Therefore the first essential in any community organization making this building its headquarters is an all-inclusive organization. In every organization using the term "community" it must be a fundamental principle that every citizen is a member by virtue of his residence in the community. Then it matters little how many attend any certain meeting if the doors are open to all who choose to attend.

Under the community organization any groups or clans may use the building by community permission, but no partisan or private group of any kind ought to be allowed to use the public school building except by invitation of the neighbors whose community home it is. That is the home development so needed in America; the group control is the method, in Roosevelt ian phrase, of the "polyglot boarding house."

This organization must be as wide as American citizenship. To gain admission to its fraternity must require no ritual and no dues. By virtue of his citizenship and his residence in the community the individual is a member, and no power may require other qualification. This is the fellowship of folks in America, and under no pretext may any of the folks be excluded.

To-day there are various incorporated societies, generally financed in New York, which maintain corps of highly paid organizers and executive secretaries to build local units and federate them into national organisms under the name of community service, of one variety or another. Appeals are made for popular contributions on the profession of such activities as separate clubhouses, forums, recreation grounds, and so forth. The funds raised are expended under autocratic control and permanent secretaries are named and retained by the few, while the people have no voice either in their selection nor retention. These are in no sense community organizations and have no right whatever to the name.

In the city of Washington, early in 1920, one of these societies began a drive for $83,500. The merits of this organization, as compared with the democratically organized community centers in the public school buildings, were brought before a joint committee of the Washington Board of Trade and Chamber of Commerce.

Lengthy and detailed hearings were held and an exhaustive investigation made of both types of organization. In the end these two business bodies flatly refused to recommend financial support for the privately owned and managed service but paid a high tribute to the community centers in the public schools.

Their report pointed out that $55,000 of the quota desired by the private organization was to be used for salaries for previously chosen employees. The report concludes:

> The board of trade and chamber of commerce do not hesitate to commend the community centers in the school buildings to favorable consideration and general support of all the people and urge them to be active in promoting the work of the centers located in their respective neighborhoods. We urge Congress to increase the annual appropriation for the use of this splendid community work.

Communities form the public and their work is public work. It is a disgrace to America when any private agency whatever undertakes the leadership in providing means by which communities may come together to effectively promote the public good. Unless the people pay the price in dollars gathered through the tax office, they must pay a far greater price, even in dollars and cents, through loss of unified action in preventing exploitation by the organized few who thrive on special privileges. Any private financing of the community interest is a contradiction in terms, while the attempt to do so shames the community.

Mr. Chairman, the Bureau of Education should make a careful study of all so-called community activities and place the facts before the public. That will require money, of course, but it is the truest economy to prevent waste of money. The public-school plant represents the largest single investment of the American people's money. America has invested in school buildings and grounds the immense sum of $1,983,508,818, and expends every year for school purposes $736,678,089.

That great plant is to-day being operated an average of but 7 hours a day for 181 days a year. Is that not extravagance and waste and is it not economy to promote the wider use of the schoolhouse for every proper purpose?

Mr. CAMPBELL of Kansas. Will the gentleman yield for a question?

Mr. KELLY of Pennsylvania. I should like to complete my statement, but I will yield for a question.

Mr. CAMPBELL of Kansas. I will ask if this great plant and this great organization were not perfected without a single suggestion from the Federal Government as to the organization—perfected by the States?

Mr. KELLY of Pennsylvania. Certainly not. Provision was made in the ordinance of 1787, which definitely directed the school system, and the United States Government at the very beginning took action on this subject.

Mr. CAMPBELL of Kansas. But the States perfected the organization.

Mr. KELLY of Pennsylvania. Certainly, under the direction and mandate of the United States Government. I insist that the United States Government is vitally interested in the public-school system from a financial standpoint, for we have given $1,000,000,000 for that system through land grants. Vastly more important, we are interested in the schoolhouse as the center of Americanization. Some one suggested a minute ago that America is the best educated Nation in the world. I wish that statement were true. America is down very far on the list. The latest figures show that there are 10,000,000 adults, one-tenth of the population of America, or more people than there were west of the Mississippi in 1910, who are unable to read and write the language of America. Of course, that includes three and one-half million aliens who are unable to speak the English language, together with those who are unable to read and write in any language.

Mr. FESS. Will the gentleman yield?

Mr. KELLY of Pennsylvania. Yes.

Mr. FESS. As I remember, the Smith-Hughes Act appropriates $200,000 for making investigations. Do not those investigations include the night schools in towns?

Mr. KELLY of Pennsylvania. They do not enforce the use of the schoolhouses for these activities.

Mr. FESS. Probably not the use of schoolhouses.

Mr. KELLY of Pennsylvania. I was referring to the use of schoolhouses and the schoolhouse plant.

Mr. Chairman, the 50,000 communities of America, organized and efficient, spell democracy. It means taking the points of separation out and making U. S. spell "us." It was a vision of such possibilities which caused Charles E. Hughes when governor of New York to say at a community center meeting in

Rochester, "I am more interested in what you are doing and what it stands for than anything else in the world. You are buttressing the foundations of democracy."

Once the schoolhouse is opened and lighted, and the people are welcome to use it for anything that occurs to them, experience shows that very many things occur to them to do.

The marvels of motion pictures may be used as a social magnet and dynamo of common entertainment and instruction. The community chorus, orchestra, and band may bring their never-failing delight to the people. Dramatic ability has the opportunity of expression in these community meeting places. There are holiday celebrations possible, where the spirit of Christmas and New Years may be spread broadcast and the message of Fourth of July, Washington's and Lincoln's birthdays, Memorial Day, Thanksgiving, and Labor Day may give refreshment and inspiration for every member of the community fellowship of folks.

Community baseball teams and other athletic organizations will stir the enthusiasm of American neighborhoods. Pageants where the folk songs and folk dances of America's adopted sons and daughters have a part will help give these former strangers a real sense of partnership in the great task of making America.

Libraries of reference books and material in the community center will make every citizen richer. This information will include official publications from the capitols of city and State and Nation for the use of citizens in the capitol of the community. There will be coordination of governmental activities, the lack of which has cost the people uncounted millions of dollars. In this community house the agricultural and industrial experts will find the people gathered to hear their messages of instruction. Here the Public Health Service will find the community service ready and eager for cooperation.

In the community secretary is found the logical person to act as census taker, not simply at 10-year periods, but to keep a sensible census, with all vital statistics kept up to date, ready for the many uses for which they are needed. No other person can serve so well as employment agent, for he is in direct touch with the people and with the conditions in the community.

In a multitude of ways this real community organization means efficiency and economy. Every dollar of tax money spent in the establishment and maintenance of community centers will return tenfold in the one item of saving of needless governmental activities and present duplications.

Over and above all these benefits, every one of which has been successfully carried out in public-school community centers, stands the major boon—the attainment of democracy—a people getting together for happiness and by common counsel and mutual agreement solving their problems of every kind. The tremendous responsibility of being citizens in a democracy upon which the future of the world's civilization depends becomes the joy of fellowship in the great cause of the world, the common good, when individuals may join hands with their neighbors for united efforts. Cooperation in business has been practiced for years, but the greatest business in the world to-day is the business of being a true American citizen. And it can best be accomplished in cooperation with fellow Americans in communities which are little democracies with the public schoolhouses as their capitols.

Mr. REED of New York. I move to strike out the last word.

I think this question of education is something too important at this time to be treated in either a facetious or a flippant manner. When we had the draft we saw 700,000 young men out of a total draft of 2,400,000 who were asked to go to fight for their country who could not read or write a word of our language, although they were native born. Gentlemen, I have always been in favor of anything that would help the agricultural interests and the dairy interests of this country. I think that it is vital to do so; but it seems strange to me that every time you mention a hog, a cow, a mule, or a horse on the floor of this House men will get up with tears in their eyes and plead for the removal of a wart on the left ear of a hog. Then you are willing to make appropriations running into the millions—and I, too, am in favor of making those appropriations—but when it comes to dealing with human flesh and blood, the very basic foundation of our Government, then these same men immediately get into a facetious frame of mind and ridicule any attempt to do something for the cause of education.

Now, here is an item that deals with night schools. I have worked among the aliens. I have worked among every nationality. I have been down in the schools late at night, where I have seen men all the way from 25 to 50 years of age, and some older, who have never had the advantage or the opportunity of schools. I have seen them working with the schoolteachers who were not paid overtime for teaching these aspiring adults to read and write.

I have some figures here that I think will be of interest to Members generally. A prominent educator from Kentucky found through surveys that in Alabama there were 350,000 illiterates; in Georgia, 380,000; in Kentucky, 208,000; in Louisiana, 339,000; in Mississippi, 288,000; in North Carolina, 288,000; in South Carolina, 276,000; and in Virginia, 230,000. This condition of illiteracy is not confined to these States but prevails in every State in varying degrees.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. In a moment. There is illiteracy in every one of the cities in this country, and it is one of the great problems of every large community. I know of industrial towns where there are people who have come from foreign lands, to say nothing of the native-born illiterates who have never had an opportunity to get an education, who are trying to obtain an education in the schoolrooms through the agency of the night school. There they can be taught not only to read and write but they can learn the ideals and the traditions of our Government. It is a vital problem at this time.

I know of my own knowledge of many towns—and I dare say there are hundreds of them, and possibly thousands, in this country—that are trying to get information from the Educational Bureau touching this question of Americanization. I know that some towns have framed programs of work, and are following them, from suggestions they have received from Washington. I have been down to the night schools here; I have been to the community centers; and I have seen the interest displayed by the citizens in the activities of the community centers. The appropriation asked for in this amendment is to conduct these community centers, and to give the adult people of the community a chance to get together and study their local problems. The people of this District do not have the vote. They have to depend upon Congress. They are trying to fight their battles under this small appropriation, trying to improve their local conditions, to carry out a program of Americanization, entertainment, and education. Aside from this the appropriation is needed to enable the bureau to distribute this information to those communities that are seeking light and guidance on this subject. Let us not destroy this clearing house of educational information, even though we do not approve of some of its activities.

Mr. GARD. Mr. Chairman, I rise in opposition to the amendment. It may be well for the committee to understand that this item and the succeeding item and the item we discussed a while ago are not items which have any very great effect upon the relief of illiteracy here in the District of Columbia or in any of the States of the American Union. When we analyze the items and come to see just what these appropriations are, we will find that they are in the main efforts to give somebody a job. That is the sum total of the whole business. On page 108 we have rural education, industrial education, physical education, school hygiene. On page 109 we have elementary and secondary education, then night schools, and a wider use of the schools in cities and towns, and on the same page we have an investigation of kindergarten education. So that it is manifest that under the guise of these appropriations the real intent is to provide a position for somebody here in the District of Columbia. I am not averse to this employment, this character of work, but it is well to know what we are doing. After all of the high-sounding language which we find here as to what shall be done, the appropriations wind up with the provision that no person shall be employed at a salary in excess of $3,500 a year or $2,500 a year, or whatever it may be. This salary appropriation is the real gist of the whole proposition, and the question of education, which has been so ably discussed here by the gentleman from Pennsylvania [Mr. KELLY] and the gentleman from New York [Mr. REED] has a very limited connection.

I am astonished to hear the gentleman from New York [Mr. REED] say that the schools of the District of Columbia are a national disgrace, in view of the fact that we pay out a very great amount of money here yearly and are supposed to have, and I think we have, in the District of Columbia schools of the highest class, probably of the very highest class in all these United States. We provide buildings for them, and the bill which we passed the other day provided for a great number of absolutely new school buildings, and for the maintenance of the school children, both in health and proper educational environment in this District.

When we discuss the paragraph under consideration, and the succeeding paragraph and that which has gone before, we must see that all of these things are of a peculiarly local character.

When you investigate the wider use of the schoolhouses in the cities and towns, the question depends upon local conditions. They have a different use in the small towns from what they have in a larger town. I do not know that I can agree that because a schoolhouse is used only a part of the year it does not, therefore, fulfill its mission. I am not in favor of using the schoolhouses for laundries or for general public uses not connected with the public benefit. A schoolhouse is a schoolhouse. If you can use it for a night school or for something pertaining to education, well and good; but they are not maintained for garden parties or euchre assemblies, nor is it necessary or proper to pay $25,000 in attempted justification of these things.

Mr. BEE. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. BEE. Does the gentleman think that the schoolhouse ought to be used as a community center, especially in the country, where the people of the country may gather, become acquainted, in order to discuss the subject of education and have a better understanding of the condition of the people generally?

Mr. GARD. Surely I do. I certainly agree to that, but I say that these conditions are known locally. The things that benefit a country community are one set of conditions, and the things that benefit a town community are another, while the things that benefit a city community are still another set of conditions.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. GARD. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GARD. It does not require an appropriation of $25,000 to put somebody in a job here in Washington to tell the gentleman's people in Texas what they are to do with the schoolhouse in some particular school district in Texas in order that it may be of the fullest benefit to the community.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. WINGO. I do not know the object of the question of the gentleman from Texas, but does the gentleman from Ohio think that it requires a Federal officer to lead the people of a community to their own schoolhouse? Can they not gather there without that aid?

Mr. GARD. Certainly. The point I make is that it is absolutely unnecessary, and we can not be justified in paying out $25,000 to have somebody tell the people in any community about things which they know better than the officeholder here in Washington.

Mr. BEE. Mr. Chairman, the gentleman from Arkansas says that he is unable to understand the question of the gentleman from Texas. I am not responsible for that misfortune, but I understood the gentleman from Ohio to suggest that schoolhouses were being used for laundries and public utilities. Of course, we are all opposed to that.

Mr. KELLY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. KELLY of Pennsylvania. Of course, my friend from Ohio recognizes that these residents of the rural sections, cities, and towns are all Americans and alike own the schoolhouses in their districts?

Mr. GARD. Surely.

Mr. KELLY of Pennsylvania. But the gentleman should realize that there are State laws dealing with the question in vastly different ways. Wisconsin has the best, in my opinion, by declaring that the people of the community have the right to use their own school buildings in any fashion they deem right and proper. In other States they have a provision for irresponsible group uses, and trouble has arisen on that score. In others conflicting boards control. The United States Bureau of Education should compare these laws and send out information as to their practical operation, so that they may be uniform and accomplish the best possible results.

Mr. GARD. I do not think the information will be of great benefit to the Government, as it seems to me the information is so peculiarly local it is known to the people themselves. They do not need a $25,000 official set here in Washington to tell them that which they know a great deal better than the one here knows.

Mr. WOOD of Indiana. Mr. Chairman, I wish to state in opposition to this motion, $9,000, I think, is ample for all the purposes of this activity. It is a mistake to think that any portion of this could be used, if you made it $50,000, for the purpose of doing the things they are talking about in the city of Washington, and that was explained so fully by the gentleman from New York [Mr. REED]. The only thing that could be used in the District of Columbia, if this appropriation were $9,000 or $50,000, is whatever might be used for a clerical force in the city of Washington. Besides, all of this matter is included in the Smith-Hughes bill. Here is one of the great troubles about this education proposition. We have got about six or seven activities over here in different branches of the Government, all having something to do with education, all contending that they should have exclusive jurisdiction of this, that, or the other. That is one of the baneful things in the educational system of the country, and it strikes me that we have reported all that should be voted on this item for this purpose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the Chair announced the noes appeared to have it.

On a division (demanded by Mr. REED of New York) there were—ayes 2, noes 40.

So the amendment was rejected.

The Clerk read as follows:

Office of Superintendent of the Capitol Building and Grounds: Superintendent, $6,000; chief clerk and accountant, $3,000; chief electrical engineer, $3,750; civil engineer, $2,400; construction draftsman, $2,000; 2 clerks, at $1,200 each; compensation to disbursing clerk, $1,000; laborer in charge of water-closets in central portion of the Capitol, $660; laborer for cleaning rotunda, corridors, dome, and old library portion of Capitol, $660; 2 laborers in charge of public closets of the House of Representatives and in the terrace, at $720 each; forewoman of charwomen, $480; 18 charwomen; in all, $28,110.

Mr. CANNON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 109, in lines 11 and 12, strike out the words "Superintendent of the Capitol Building and Grounds" and insert in lieu thereof "Architect of the Capitol."

And, after line 21, insert as a separate paragraph the following:

"The title of Superintendent of the Capitol Building and Grounds is hereby changed to Architect of the Capitol. But this change shall not affect the status of the present incumbent or require his reappointment."

Mr. GARD. Mr. Chairman, I reserve a point of order against the amendment.

Mr. CANNON. Mr. Chairman, I ask for recognition.

The CHAIRMAN. The gentleman from Illinois.

Mr. CANNON. The Superintendent of the Capitol came into the service many years ago, when quite a young man. The architect of the Capitol soon relied upon him as he aged; in performing his duties he grew in efficiency. The architect of the Capitol died and he became Superintendent of the Capitol and has occupied that position from that time to the present. I want to state that I am very well acquainted with this official, became acquainted with him when I came into the House almost a generation ago—well, not that long, but many years ago—and I want to say this, that I introduced as an amendment to an appropriation bill, at that time I was chairman of the Committee on Appropriations, by unanimous consent to construct the Office Building. This man was placed in charge, and performed his duty there as well as other duties. I have been somewhat proud of it and I have never regretted introducing that amendment. I was chairman of the commission for the construction of that Office Building. There were three of us. We chose the Superintendent of the Capitol. His salary was the same then as it is now. When it came to the restoration of the White House when the Roosevelt administration came in—that is, his first administration, as I recollect it, when he succeeded McKinley—McKim, Meade & White were employed to overhaul the White House. It needed overhauling. I will not go further into that, but there arose something of jealousy between the architects throughout the country because this man was not an architect; he had not graduated as an architect; but he was quite equal to any architect I ever was acquainted with. There came a condition under which this commission had to employ somebody. We employed the superintendent without increasing his salary. We gave him carte blanche, of course, subject to approval, but there was some disappointment amongst the craft of architects. We gave him full confidence, but the then President, sympathizing with the architects, there came up the question of whether this man could be reappointed as Superintendent of the Capitol.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that my colleague be given five additional minutes.

The CHAIRMAN. Is there objection. [After a pause.] The Chair hears none.

Mr. CANNON. So, to make a long story short, I do not care to go into detail, the commission was unanimous in saying to

this man, "Make your plans." Now, there was not only the building to be put up, but there was the heating, lighting, and power house, and all that kind of thing. And we said to him that if he desired to employ some architect in approval of the plans that he made, an expert, why, he had full power to do so.

He was quite the equal of any architect that I ever met. He did employ a Boston firm in an advisory capacity, and which was not expensive, and once in a while he employed an electrical expert, and so on. The result was that we have a magnificent building. The Senate authorized an office building, and Mr. Woods superintended the construction of that, as well as making the plans for it. I have no hesitation in saying that he is the equal of any architect in this country.

Now, there is no proposition to increase his salary here. It is $6,000. But he succeeded a man who was called "architect of the Capitol." I will not go further into how Mr. Woods happened to be appointed and reappointed as Superintendent of the Capitol. It grew out of the jealousy of the architects. I had an interview with the President, and I said to him, "This man is an employee of the House and the Senate, so far as that is concerned, under the authority of an appropriation that has been made. The House and the Senate pass the bills appropriating for the position, and it is for you to make the appointment if you want such an architect as they demand." But they wanted somebody who was called an architect. There was something of jealousy and disappointment. I do not mention any names. The House and the Senate both approved of Mr. Woods and desired his employment. The President said to me, "Mr. CANNON, all I want is to be relieved from criticism by this organization of architects." Well, I said, "Call him 'superintendent,' then." And he has been superintendent from that time to this.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CANNON. Mr. Chairman, I ask unanimous consent for one minute more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. Mr. Woods is aging, but he is as competent to-day as he ever was. He is the best architect that I ever met. He had charge of the construction of the buildings here; he had charge of the Court of Claims building, which was overhauled by him; and he had charge of the courthouse down here. You are familiar with his work. And he has done whatever he was called on to do without any increase of salary, so far as that is concerned, and he is not asking for it. He is not a very old man. I think he is between 50 and 60 years of age, but as he is getting along in years he would like to be called "architect," as his predecessor was always called "architect." And all that this amendment does is to give him that title. I hope there will not be a point of order made against this amendment.

Mr. GARD. Mr. Chairman, I am sure we are all very much indebted to the gentleman from Illinois [Mr. CANNON], who has so much excellent information about things pertaining to the Capitol and the buildings in the Capital City, as well as legislation generally, and I am sure, too, that we all appreciate the very excellent service of the Superintendent of the Capitol Building and Grounds. But in the matter of the reservation of the point of order, I am not advised by the gentleman from Illinois or anyone else as to any necessity for the return to the title of "architect of the Capitol Building and Grounds," or to see how that does anything more for the very excellent gentleman who is now Superintendent of the Capitol Building and Grounds than he can get under his present title or designation. And the reason I reserved the point of order was that I fear in our general policy of development of positions about here, if we create this new position of architect and place in it the present Superintendent of the Capitol Building and Grounds, we will have in a little while a Superintendent of Capitol Building and Grounds in addition thereto. In other words, it will be the entering wedge for another position. I do not know that that is in the gentleman's mind, nor do I say that it is. But for the reason that it may indirectly result in such a condition, and the additional reason that I do not see any additional benefit that will accrue to the gentleman who is now Superintendent of the Capitol Building and Grounds, I have made the reservation of the point of order.

Mr. MANN of Illinois. Mr. Chairman, I did not hear all that my colleague from Illinois [Mr. CANNON] said concerning this matter. I presume he made a full statement in reference to it.

This is a sentimental matter. When I came here there was an architect of the Capitol. Mr. Woods was an assistant to that architect. When the architect of the Capitol died President Roosevelt declined to appoint Mr. Woods as architect of the Capitol, because he was not well known professionally as an architect throughout the country. There was some opposition to the appointment being made. Everybody in the House, on both sides, everybody in the Senate, on both sides, wanted Mr. Woods, already in charge of the Capitol Building and Grounds, appointed as the architect of the Capitol. I do not think there was any division of sentiment at all. Certainly there was not any division in this House, and I think there was not any in the Senate. The title was changed to Superintendent of Capitol Building and Grounds, because the President said he would be very glad to appoint Mr. Woods to that position. I think he still occupies the same position in the minds of the Members of the House and the Senate that he did then. I think he has the confidence of everybody in the two bodies. Since that time he has had a great many duties conferred on him, among them the construction of the women's hospital, or some other hospital here, the reconstruction of the City Hall, the new courthouse, and various other things, besides the House and Senate Office Buildings, among which may be noted the heating plant of the Capitol Building and various things of that sort. He has established his reputation as an architect. Now, I am afraid to say——

Mr. GARD. Will the gentleman yield?

Mr. MANN of Illinois. In just one second. I am afraid to say I do not fully appreciate the sentimental side of it, because I am not an architect.

I am told, although I have not talked with Mr. Woods about it, that he has a sentiment in desiring to have the title of the architect of the Capitol. Formerly that did not involve an additional office of superintendent. It will not hereafter. It will add no additional employee or expense to the Government.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I would like to say a word about this.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word. There is a reservation of a point of order pending.

Mr. MADDEN. I would like to talk about the reservation.

Mr. MANN of Illinois. Mr. Chairman, has my time expired?

The CHAIRMAN. The Chair understood that the gentleman from Ohio [Mr. GARD] yielded to the gentleman from Illinois.

Mr. MANN of Illinois. I thought the gentleman from Ohio reserved a point of order when I took the floor.

Mr. GARD. I reserved a point of order.

The CHAIRMAN. The gentleman from Illinois would have two minutes remaining.

Mr. MANN of Illinois. All I wanted to do was to satisfy the gentleman from Ohio that there was no additional expense involved in this proposition.

Mr. GARD. The question I wanted to ask was this: When his title was changed, as the gentleman says it was, and as the gentleman from Illinois [Mr. CANNON] says it was, from the title of architect of the Capitol to that of Superintendent of the Capitol it was because the gentleman who was appointed as superintendent had not the technical title of a graduate architect, I suspect.

Mr. MANN of Illinois. That may have been the reason. The President declined to appoint him as architect of the Capitol, but did appoint him as Superintendent of the Capitol when we changed the law covering the case.

Mr. GARRETT. I suppose now to restore the original title will not again involve that difficulty when the time of a reappointment comes?

Mr. MANN of Illinois. Oh, no. I do not think there is a man in the country who is opposed to his appointment as architect of the Capitol now. I mean in the profession.

Mr. MADDEN. Mr. Chairman, the man who occupies the position of Superintendent of the Capitol Building and Grounds is a quiet, unassuming, painstaking, indefatigable worker who has every particle of technical knowledge required of any man who may be classed as an architect, no matter where he graduated.

I happen to have some knowledge of building myself, and I know from my contact with this man that there is no man anywhere in the United States who has better technical experience than he has, and there is no school in which a man can get knowledge so valuable as in the school of experience; and this man has had the experience that justifies the title proposed in the amendment offered by my colleague Mr. CANNON.

It was on account of the jealousy of some collegiate graduates who were architects that Mr. Woods was prevented from having the title of architect before now. As Superintendent of the Capitol Building and Grounds he has been in effect architect as well as superintendent, for he has made the plans, he has let the contracts, he has supervised the construction. He

has been both architect and superintendent. I very much hope that he will be given the title.

Mr. GARRETT. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. GARRETT. As I understand it, this appointment is not made for any fixed term?

Mr. MADDEN. No. I do not think it is made for any fixed term.

Mr. CANNON. If the gentleman will yield, without having it taken out of his time, it does not require any reappointment. The amendment takes care of that. It merely changes his title.

Mr. GARRETT. I noted that in the reading. What I am trying to get at is whether he is appointed as architect or as superintendent for a fixed term.

Mr. CANNON. No.

Mr. GARRETT. It is practically for life?

Mr. CANNON. Yes.

Mr. MADDEN. He would be that anyway, so long as he behaved himself. So long as he has been in the position he has merited the confidence of everyone with whom he has come in contact. The firm of McKim, Mead & White had the reputation of being among the greatest architects in America. They overhauled the White House, and they supervised the extension, which includes the offices. They started in to spend a small sum of money, and they spent $600,000 on that work. If Mr. Woods had had control of that operation, it would have been done for less than half of that. They went all over the world to find particular stones, for example, to match their color view in the extension of the White House. They finally landed at one of the American quarries and found the stone they wanted after they had traveled all over the world; and if anybody can find the stone that they put into it, I will eat it, and nobody can tell where it is. [Laughter.] It might just as well have been wood, so far as the architectural beauty is affected by it.

So here we have a man who knows his business thoroughly as an architect. He knows thoroughly his business as a superintendent. He realizes what construction means. He knows what a contract is when he sees it. He is not being paid a commission of 5 per cent or 10 per cent on the cost of the improvement, and hence he is willing to make the improvement at what it really ought to cost, whereas if you had an architect and paid him a commission, as you are obliged to do under the rules of the American Society of Architects, the more it costs the more his commission amounts to.

Here is a man whose compensation is fixed in the law at the paltry sum of $6,000 a year; and if anybody in the world in any public employment has ever earned the confidence of those who have employed him and those with whom he has come in contact, Elliott Woods is that man. And if it is any honor to him to be given the rank of architect of the Capitol, I hope he will have that honor. [Applause.]

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Certainly.

Mr. CAMPBELL of Kansas. Is it not true that many architects get much more than that out of a single job?

Mr. MADDEN. Oh, yes; the firm of McKim, Mead & White got over $75,000 on the expenditures in the White House extension.

Mr. GARD. Mr. Chairman, it seems from the statements of those who have been long in the House and who have had honorable service here that the services of the Superintendent of the Capitol Building and Grounds have been of the highest order of merit. The statement is made that the change in title is desired for a sentimental reason, that reason being that his predecessor had the title which he now wishes to assume. The point of order was reserved, as I said, for the purpose of being advised as to whether this was the entering wedge for a new position or not. Being assured that it is not, and with the statement of the gentleman that there will be no disturbance because of the change in the title, by reason of the necessity for a presidential reappointment, and in view of the fact that I confess that the sentiment which goes with the appreciation of labor well done is not a light one, and is to be honored wherever one can pay that honor, I withdraw the reservation of my point of order.

The CHAIRMAN. The reservation of the point of order is withdrawn. The question is on the amendment of the gentleman from Illinois [Mr. CANNON].

The amendment was agreed to.

Mr. WOOD of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment of Mr. WOOD of Indiana: Page 109, line 12, strike out the word "Superintendent" and insert "architect of the Capitol."

Mr. WOOD of Indiana. That is a necessary amendment to conform to the other.

The amendment was agreed to.

Mr. WOOD of Indiana. I ask unanimous consent to return to pages 7 and 11, to make the corresponding necessary changes.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to return to pages 7 and 11 for the purpose of making similar changes. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Indiana.

The Clerk read as follows:

Amendment offered by Mr. WOOD of Indiana: Page 7, lines 1 and 2, strike out the words "Superintendent of the Capitol Building and Grounds" and insert in lieu thereof the words "architect of the Capitol."

The amendment was agreed to.

Mr. WOOD of Indiana. A further amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WOOD of Indiana: Page 11, lines 15 and 16, strike out the words "Superintendent of the Capitol Building and Grounds" and insert "architect of the Capitol."

The amendment was agreed to.

Mr. DUPRÉ. I suggest to the gentleman from Indiana that the same amendment ought to be made in lines 9 and 10, page 7.

Mr. WOOD of Indiana. The same change may be necessary in other portions of the bill, and in order that it may be made wherever necessary I ask unanimous consent that this change may be made wherever the words may occur in the bill.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that the change may be made wherever the words occur in the bill to conform to the amendment just adopted. Is there objection?

Mr. GARD. Reserving the right to object, what is the amendment on page 11?

Mr. WOOD of Indiana. To strike out the words "Superintendent of the Capitol Building and Grounds" and insert "architect of the Capitol."

Mr. GARD. In the copy of the bill which I have it says "under Superintendent of the Capitol Building and Grounds."

Mr. WOOD of Indiana. We retain the word "under," but strike out the words "Superintendent of the Capitol Building and Grounds," and insert in lieu thereof the words "architect of the Capitol."

Mr. GARD. There is no new position at all created under the superintendent?

Mr. WOOD of Indiana. No.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read as follows:

Arizona: Surveyor general, $3,000; clerks, $17,820.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word. I notice there has been a reduction of $580 in the amount appropriated for clerks in the office of the surveyor general of Arizona, notwithstanding the fact that the Commissioner of the General Land Office asked for an increase of $3,000 for clerks in that office. I should like to find out why that reduction was made in this bill. It seems to me that the Committee on Appropriations is practicing a species of fine-spun economy for which there is absolutely no justification. Will the gentleman in charge of the bill advise me upon what theory or upon what basis of fact this small reduction was made when an increase of $3,000 was asked, and when the clerks in the office of the surveyor general of Arizona are all very busily occupied and actually behind with the work?

Mr. WOOD of Indiana. The gentleman knows that last year we undertook to abolish all of these surveyors general.

Mr. HAYDEN. Unsuccessfully.

Mr. WOOD of Indiana. Unsuccessfully, and we thought we would not undertake that this year, but would place them back where they were in 1920. We are retrenching and going back to prewar conditions as fast as possible.

Mr. HAYDEN. What the gentleman from Indiana sought to do last year was to abolish the office of surveyor general.

Mr. WOOD of Indiana. Yes.

Mr. HAYDEN. As long as there is a surveyor general it is necessary for him to have a clerical force. Now, I want to

know why the committee reduced this particular item for clerk hire by $580.

Mr. WOOD of Indiana. We fixed it this year at $17,820. The RECORD shows that when the amount was fixed at that sum of $17,820 all that was expended was $14,964.

Mr. HAYDEN. That may be true, but I know that when I went to the office of the surveyor general of Arizona this year to inquire about the work that he was doing, he told me that on account of a shortage of funds certain surveys had to be suspended, and that the work of his office was not up to date because of a shortage of the necessary clerks.

It may be that during the war, when many clerks went into the military service, the surveyor general could not fill all the clerical positions in his office, and therefore did not spend the money then appropriated by Congress, but that certainly is not true at this time.

Mr. WOOD of Indiana. I expect they will get along just as well with $17,820 now as they did in 1920.

Mr. HAYDEN. The Commissioner of the General Land Office this year asked for an increase of $3,000 for compensation for clerks in the surveyor general's office at Phoenix.

Mr. WOOD of Indiana. That is correct. They asked for increases for everything. They did not ask any last year, but this year they asked for increases from top to bottom, from one end of the Government to the other, from the President down.

Mr. HAYDEN. I am familiar with the work of this particular office and know that the amount of money available was not sufficient to adequately pay the number of clerks which should be employed by the surveyor general of Arizona to promptly and efficiently transact the business under his supervision. For some other unaccountable reason the appropriation for the contingent expenses of this office, for which $1,200 was allowed in 1918, has been cut in half. Of the $600 appropriated, $250 is retained by the General Land Office in Washington for stationery, and so forth, leaving but $350 to pay for telephone service and the purchase of typewriters, drafting instruments, office equipment, and ordinary repairs for a whole year. I would offer amendments increasing the allowance for contingent expenses to at least $1,000 and appropriating the full amount requested for clerk hire, but it is evidently useless to do so. But I must say, Mr. Chairman, that such petty economy, adopted without rhyme or reason, injures the public service and ultimately results in no real saving.

Mr. WOOD of Indiana. If the advice of the gentleman who is in charge of this work in the Department of the Interior, who is familiar with the work, had been taken, there would not be any salary voted at all.

Mr. HAYDEN. The gentleman from Indiana should understand by this time that I am not discussing the salary of the surveyor general. I am talking about the clerks in his office. An estimate was made for an increase of $3,000, and the committee has made an actual decrease of $580. Why was that done?

Mr. WOOD of Indiana. Because we wanted to put it back on the basis of 1920. It was done all through this bill with reference to the surveyors general.

Mr. HAYDEN. Why did the committee arbitrarily go back to the basis of 1920?

Mr. WOOD of Indiana. Because of the fact that the cost of living is being reduced, and the work in the offices of these surveyors general is on the decline.

Mr. HAYDEN. That is not true in Arizona. The work in the office of the surveyor general has not declined.

Mr. WOOD of Indiana. Possibly Arizona may be the exception.

Mr. HAYDEN. There are vast areas, millions of acres, of unsurveyed lands in that State which have not been surveyed.

Mr. WOOD of Indiana. We did not want to have any invidious comparisons with reference to reductions, and we made them all alike, endeavored to treat them fairly.

The CHAIRMAN. The time of the gentleman from Arizona has expired. The Clerk will read.

The Clerk read as follows:

For electrical power, electric light, gas, window washing, and telephone service, fuel, telephones, window shades, awnings, and other materials and supplies as in the judgment of the Secretary of the Interior may be required for general maintenance and operation of the building for Interior Department offices, $80,000.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word to call the attention of the Chairman to the fact that we have just about 30 Members present and to ask him if he does not think we better have a new shift or quit for the day. I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count.

Mr. WOOD of Indiana. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15543, the legislative, executive, and judicial appropriation bill, and had come to no resolution thereon.

LEAVES OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. GRIFFIN, indefinitely, on account of illness in his family;

To Mr. JOHN W. RAINEY, indefinitely, on account of death in his family;

To Mr. YATES, for to-day, on account of illness (at the request of Mr. ACKERMAN).

EXTENSION OF REMARKS.

Mr. BLACK. Mr. Speaker, the gentleman from Georgia [Mr. BRAND] had to leave the Chamber a moment ago. He made the request that I ask unanimous consent that he may extend in the RECORD his remarks which he made on this bill to-day.

The SPEAKER. The gentleman from Texas asks unanimous consent that the gentleman from Georgia [Mr. BRAND] may extend his remarks on this bill in the RECORD. Is there objection?

There was no objection.

Mr. GARRETT. Mr. Speaker, in February last the gentleman from Illinois [Mr. MANN] had read to the House a letter received by him from his brother on the nitrate question. It was a very interesting communication. The gentleman from Illinois [Mr. MANN] has been kind enough to show to me another letter which he has just received from the same gentleman upon the same subject. I have his permission to use the letter. I ask unanimous consent to extend my remarks in the RECORD—and I shall extend them in the extension part of the RECORD—by printing this letter, and that the letter itself may be referred to the Committee on Military Affairs.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by printing the letter in question and that the letter be referred to the Committee on Military Affairs. Is there objection?

There was no objection.

The letter is as follows:

GILMAN, ILL., *January 11, 1921.*

Hon. JAS. R. MANN, M. C.,
Washington, D. C.

DEAR J. R.: I am very glad to get the CONGRESSIONAL RECORD, to be able to read the debates regarding the disposition of the Muscle Shoals plant. While very interesting there are some vital facts which do not seem to have been given much consideration.

The greatest asset any nation ever had was the humus in the soils of this country, and the most valuable part of the humus is the nitrogen. We are drawing it out of the soils at a rapid rate, as shown by the crop yields:

Nitrogen requirements of crops.		Pounds nitrogen.
Corn	bushels 3,000,000,000	3,000,000,000
Wheat	do 1,000,000,000	1,500,000,000
Oats	do 1,500,000,000	1,000,000,000
Barley	do 250,000,000	160,000,000
Rye	do 50,000,000	75,000,000
Buckwheat	do 12,000,000	12,000,000
Flax	do 15,000,000	25,000,000
Potatoes	do 500,000,000	100,000,000
Cotton	bales 15,000,000	500,000,000
Total		[1] 6,372,000,000

As against this withdrawal a conservative estimate of returns is:

	Tons of nitrogen.
From legume crops	1,300,000
Imported nitrates	227,000
Coke ovens, etc	130,000
Farm manure	250,000
Total	1,907,000

The amount stated for legumes is about what could be secured if about one-fourth of the total acreage of cultivated crops were planted to legume crops.

The amount stated for manure is a conservative estimate of the nitrogen taken from the grain crops by animals, which would be used by following crops.

While the Muscle Shoals plant could not fix enough nitrogen to materially overcome the great annual deficit of nitrogen in the soils, it would be an expression of a rational policy for the conservation of the fertility of the soils, and would lead the way in the future to a possible solution of the great nitrogen problem.

In some of the debate it was stated that legumes should be used to fix nitrogen instead of using the Muscle Shoals power. Legumes are not very efficient in fixing nitrogen for two reasons: The amounts they require are comparatively small with reference to soil needs, and the further fact that legumes prefer and will use available soil nitrogen before resorting to bacterial or air nitrogen. A 4-ton crop of clover, the most efficient legume crop, needs about 160 pounds of nitrogen. If this were grown on an acre and all the nitrogen taken from the air,

[1] Equals 3,186,000 tons.

there could be fixed only 160 pounds of nitrogen; that is, an acre would be used the whole growing season for fixing 160 pounds of nitrogen. If nitrogen can be fixed at Muscle Shoals in the cheapest form for 10 cents per pound, it would mean that an acre would be producing but $16 worth of nitrogen for the season; the same land might produce 50 bushels of corn per acre, worth 50 cents per bushel.

Then, too, not all the nitrogen in legumes is fixed from the air, but comes from the soil. If land will produce 50 bushels of corn per acre, the soil must be able to supply about 75 pounds of nitrogen per acre, and nitrogen that the corn can get may also be taken up by the clover, and in such case the 160 pounds of nitrogen in 4 tons of clover might have been taken from the soil to the extent of 75 pounds and from the air 85 pounds.

I see no way out of the nitrogen problem but to use clovers or other legumes to the extent they may be needed to supply some humus for its physical effect, to keep up proper bacterial activities in the soil, and to supplement the legume nitrogen with some form of nitrogen taken from the air; and the cheaper this fixed nitrogen can be bought the cheaper the food of the future will be for all.

I sincerely hope for the sake of the Nation that some national policy toward fixing atmospheric nitrogen may be adopted.

Affectionately,

FRANK.

ENROLLED JOINT RESOLUTION SIGNED.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 244. Joint resolution providing for the payment of expenses of conveying votes of electors for President and Vice President.

RESIGNATION OF DR. COUDEN AS CHAPLAIN.

The SPEAKER laid before the House the following communication, which was read:

HOUSE OF REPRESENTATIVES,
CHAPLAIN'S OFFICE, *January 11, 1921.*

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

MY DEAR MR. SPEAKER: It becomes my sad and painful duty to tender my resignation as Chaplain of the House of Representatives, to take effect when my successor shall have been chosen, my only reason being physical disability.

Allow me to express my thanks to the Members of the House for their uniform courtesy and kindness through all these years.

Cordially and sincerely,

HENRY N. COUDEN.

ADJOURNMENT.

Mr. WOOD of Indiana. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 5 o'clock and 4 minutes p. m.) the House adjourned until to-morrow, Friday, January 14, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speakers' table and referred as follows:

237. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers, report on preliminary examination and survey of Calcasieu River from the Gulf of Mexico to the city of Lake Charles, La. (H. Doc. No. 974); December 17, 1920, referred to the Committee on Rivers and Harbors. January 13, 1921, ordered to be printed.

285. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers, report on preliminary examination of certain waterways in Texas, with a view to deepening and widening said waterways (H. Doc. No. 975); December 29, 1920, referred to the Committee on Rivers and Harbors. January 13, 1921, ordered to be printed, with illustrations.

323. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers, report on preliminary examination and survey of Willamette Slough, Oreg., with a view to removing old dikes and breakwaters now obstructing navigation (H. Doc. No. 976); January 11, 1921, referred to the Committee on Rivers and Harbors. January 13, 1921, ordered to be printed, with illustrations.

333. A letter from the Secretary of War, transmitting report on general instructions for the encouragement of breeding; to the Committee on Military Affairs.

334. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers on a preliminary examination and survey, respectively, of channel connecting the Houston Ship Channel with the Goose Creek oil field, Harris County, Tex. (H. Doc. No. 977); to the Committee on Rivers and Harbors and ordered to be printed.

335. A letter from the Secretary of the Treasury, transmitting copy of communication from the Secretary of the Interior, submitting a supplemental estimate of appropriation required by the National Park Service for completion of the free bathhouse at Hot Springs Reservation (H. Doc. No. 978); to the Committee on Appropriations and ordered to be printed.

336. A letter from the Chairman of the Federal Trade Commission, transmitting report on Future Trading in Grain, constituting volume 5 of its report on the grain trade; to the Committee on Agriculture.

337. A letter from the Postmaster General, transmitting claim of Albert S. Matlock, acting postmaster at Van Buren, Ark., for property lost through burglary of the post office at Van Buren, Ark.; to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. LITTLE, from the Committee on Revision of the Laws, submitted a supplementary report (No. 781, Pt. II) on the bill (H. R. 9389) to consolidate, codify, revise, and reenact the general and permanent laws of the United States in force March 4, 1919, which said report was ordered to be printed.

Mr. PORTER, from the Committee on Foreign Affairs, to which was referred the concurrent resolution (H. Con. Res. 71) to designate a day on which our people may be urged to contribute to the need of the suffering populations of the world stricken by war, famine, and pestilence, reported the same without amendment, accompanied by a report (No. 1186), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. JOHNSON of Mississippi, from the Committee on Public Lands, to which was referred the bill (H. R. 13499) authorizing the Secretary of the Interior to sell and patent to J. D. Calhoun, of Lincoln Parish, La., certain lands, reported the same with an amendment, accompanied by a report (No. 1187), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 14289) for the relief of Col. Deakyne, Corps of Engineers, United States Army; Committee on Military Affairs discharged, and referred to the Committee on Claims.

A bill (H. R. 14870) granting a pension to Mary Ellen Woodward; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15665) to amend section 6 of the act of Congress entitled "An act for the protection and regulation of the fisheries of Alaska," approved June 26, 1906; Committee on the Territories discharged, and referred to the Committee on the Merchant Marine and Fisheries.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. HERNANDEZ: A bill (H. R. 15712) to authorize an exchange of public lands of the United States for certain lands granted to the railroads in San Juan, McKinley, and Valencia Counties, State of New Mexico; to the Committee on the Public Lands.

By Mr. WINSLOW: A bill (H. R. 15713) to amend the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. BYRNS of Tennessee: A bill (H. R. 15714) to amend an act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes"; to the Committee on Public Buildings and Grounds.

By Mr. RHODES: A bill (H. R. 15715) to amend section 2324 of the Revised Statutes; to the Committee on Mines and Mining.

By Mr. LAMPERT: A bill (H. R. 15716) to authorize the establishment of aids to navigation and to improve the existing aids in Fox River, Lake Winnebago, and lakes and channels connecting therewith in the State of Wisconsin; to the Committee on Interstate and Foreign Commerce.

By Mr. KAHN: A bill (H. R. 15717) to provide transportation on vessels of the Army Transport Service to officers and employees of the Lighthouse Service and to immediate members of their respective families; to the Committee on Military Affairs.

By Mr. TOWNER: Resolution (H. Res. 643) for the immediate consideration of House bill 15476; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEGG: A bill (H. R. 15718) granting a pension to Dorcas A. Wilcox; to the Committee on Invalid Pensions.

By Mr. CALDWELL: A bill (H. R. 15719) granting back pension due to John J. Haggerty; to the Committee on Pensions.

By Mr. CRAMTON: A bill (H. R. 15720) granting a pension to Susan L. Paul; to the Committee on Invalid Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 15721) granting a pension to Harriet B. S. Soliday; to the Committee on Invalid Pensions.

By Mr. OGDEN: A bill (H. R. 15722) granting a pension to Isaac E. McClure; to the Committee on Pensions.

By Mr. OLDFIELD: A bill (H. R. 15723) granting an increase of pension to John C. Lane; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15724) granting an increase of pension to Sarah A. Brewer; to the Committee on Pensions.

By Mr. WELTY: A bill (H. R. 15725) granting a pension to Cerelda A. Robbins; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4943. By the SPEAKER (by request): Petition of National Grape Growers' Association of America, urging bonus for World War veterans; to the Committee on Interstate and Foreign Commerce.

4944. By Mr. EMERSON: Petition of American Association of State Highway Officials, favoring the McArthur bill (H. R. 14905); to the Committee on Roads.

4945. By Mr. GRIEST: Petition of S. E. Wanner, George W. Hoffer, Ezra R. Hegy, E. S. Rutt, John K. Zeamer, J. R. McLanachan, and Horace C. Wanner, all rural mail carriers of Lancaster, Pa., suggesting a new scale of compensation for rural mail carriers; to the Committee on the Post Office and Post Roads.

4946. By Mr. LINTHICUM: Petition of V. J. Blondell, of Baltimore, Md., concerning the American Legion bill; to the Committee on Ways and Means.

4947. Also, petition of C. J. Symington, of Baltimore, Md., concerning the collection of funds from Government by railroads; to the Committee on Interstate and Foreign Commerce.

4948. Also, petition of State game department, E. Lee Le Compte, of Baltimore, Md., concerning House bill 14757; to the Committee on Agriculture.

4949. By Mr. McLAUGHLIN of Michigan: Petition of residents of Arcadia, Mich., protesting against the occupation of Germany by French Negro troops; to the Committee on Military Affairs.

4950. By Mr. NEWTON of Minnesota: Petition of International Association of Machinists, Lodge No. 91, to encourage trade with soviet Russia; to the Committee on Foreign Affairs.

4951. Also, petition of Mrs. Julia Saxton, Mrs. Mabel L. Smith, Mrs. E. C. Hanson, and sundry citizens of Minneapolis, Minn., opposing the passage of the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4952. Also, petition of International Association of Boiler Makers and Iron-Ship Builders and Helpers of America, favoring a bonus of $240 for employees of navy yards and arsenals for the incoming fiscal year; to the Committee on Appropriations.

4953. By Mr. OGDEN: Petition of the Monday Afternoon Club, of Louisville, Ky., favoring the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4954. Also, petition of L. L. D. Club of the Young Women's Christian Association, of Louisville, Ky., favoring the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4955. Also, petition of the Crescent Hill Woman's Club, of Louisville, Ky., favoring the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4956. By Mr. SIEGEL: Petition of New York County organization of the American Legion, in opposition to the Sunday blue laws; to the Committee on Interstate and Foreign Commerce.

4957. By Mr. TEMPLE: Testimony in support of House bill 15681, granting an increase of pension to Ulysses Grant Kirker; to the Committee on Invalid Pensions.

SENATE.

FRIDAY, *January 14, 1921.*

(Legislative day of Thursday, January 13, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

SENATOR FROM OHIO.

Mr. POMERENE. Mr. President, I send to the desk the commission issued to Hon. FRANK B. WILLIS as a Senator from the State of Ohio under appointment by Gov. Davis to succeed Hon. WARREN G. HARDING.

The VICE PRESIDENT. The credentials will be read.

The Assistant Secretary read the credentials, and they were ordered to be placed on file, as follows:

In the name and by the authority of the State of Ohio; Harry L. Davis, governor of said State, to all to whom these presents shall come, greeting:

Know ye, that whereas FRANK B. WILLIS, of Delaware County, Ohio, has been duly appointed to the office of United States Senator from Ohio:

Therefore, by virtue of the power vested in me by the constitution, and in accordance with the provisions of the laws, I do hereby commission him, the said FRANK B. WILLIS, to be United States Senator from Ohio, as aforesaid, authorizing and empowering him to execute and discharge, all and singular, the duties appertaining to said office, and to enjoy all the privileges and immunities thereof for the unexpired term of Hon. WARREN G. HARDING, resigned.

In testimony whereof I have hereunto subscribed my name and caused the great seal of the State of Ohio to be affixed at Columbus this 10th day of January, in the year of our Lord 1921.

[SEAL.] HARRY L. DAVIS, *Governor.*

By the governor:

HARVEY C. SMITH,
Secretary of State.

Mr. POMERENE. Mr. President, I have the pleasure of announcing that Mr. WILLIS is present in the Chamber and ready to be sworn in.

The VICE PRESIDENT. Is there any objection? The Chair hears none. The Senator appointed will present himself at the Vice President's desk and take the oath of office.

Mr. WILLIS, escorted by Mr. POMERENE, advanced to the Vice President's desk, and the oath prescribed by law having been administered to him, he took his seat in the Senate.

EMERGENCY TARIFF.

Mr. WARREN. Mr. President, I have a message in the way of a petition from the governor of the State of Wyoming, who telegraphs as follows:

Wyoming Legislature in session this morning unanimously passed a resolution requesting Congress to enact into law the emergency tariff bill.

The governor adds:

Am most hopeful that Congress may at an early date enact this measure into law, as I feel it will do much to help the agricultural interests of the Nation at this time.

R. D. CAREY, *Governor.*

The VICE PRESIDENT. The telegram will be referred to the Committee on Finance.

ENFORCEMENT OF PROHIBITION.

Mr. SHEPPARD. Mr. President, I send to the desk a telegram, and ask that it may be read for the information of the Senate.

The VICE PRESIDENT. Without objection, the telegram will be read.

The telegram was read and ordered to lie on the table, as follows:

NEW YORK, N. Y., *January 11, 1921—5 p. m.*

Hon. MORRIS SHEPPARD,
United States Senate, Washington, D. C.:

Federal Council Churches of Christ in America, representing 30 great Protestant denominations with 30,000,000 members at great meeting, Boston, December 6, unanimously and emphatically adopted following resolution:

"Prohibition of the liquor traffic should be judged not by results where the law is flagrantly violated, but by its results in communities where the law has been efficiently enforced. In order that the will of the people in the adoption of the eighteenth amendment may be carried into effect, we urge that an appropriation be made by Congress of whatever amount may be necessary for the effective enforcement of national prohibition."

Federal council confidently expects Congress to support law enforcement whole-heartedly with adequate appropriations. Certainly not less than the seven and one-half million asked by department.

BISHOP JAMES CANNON,
Chairman Business Committee Federal Council.

FRENCH COLONIAL TROOPS ON RHINE BORDER.

Mr. SPENCER. I ask to have printed in the RECORD a communication to the Senate resulting from a mass meeting of Catholic parishes in the city of St. Louis regarding the presence and action of French colonial troops upon the Rhine border.

There being no objection, the communication was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

ST. LOUIS, MO., *January 10, 1921—6 p. m.*

Hon. SELDEN P. SPENCER,
United States Senator from Missouri, Washington, D. C.:

At a mass meeting of Catholic parishes of the city of St. Louis, called and held this 9th day of January, 1921, for the purpose of aiding in the work of alleviating the distress in central Europe, it was unanimously resolved that one of the most cruel causes of outrage, mental torture, and distress was the presence and action of the French colonial troops in the Rhine regions.

The mass meeting appointed a suitable committee to collect money and clothes to alleviate the distress caused by hunger, sickness, and lack of fuel and clothes. It was also unanimously resolved that we ask Hon. JAMES A. REED and SELDEN P. SPENCER, Senators from Missouri, (1) to urge the State Department to request the French Government for early, complete, and final withdrawal of troops of African and Asiatic origin from the occupied territory of the German people; (2) to also present this request to the honorable the United States Senate; (3) to advise the undersigned chairman of the meeting of the result of this action.

Rev. JOSEPH F. LUBELEY, *Chairman,*
3519 North Fourteenth Street.
F. BROCKLAND, *Secretary.*

ENROLLED JOINT RESOLUTION SIGNED.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the Speaker of the House had signed the enrolled joint resolution (S. J. Res. 244) providing for the payment of expenses of conveying votes of electors for President and Vice President, and it was thereupon signed by the Vice President.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a communication from J. Cameron Jenkins, industrial commissioner of the Minneapolis Civic and Commerce Association, in relation to the proposed imposition of a tariff duty on Canadian lumber, giving a summary of an investigation among members of that association as to their attitude on the subject, and showing that the majority are not in favor of placing a duty on such lumber, which was referred to the Committee on Finance.

He also presented a memorial of the Crookston Lumber Co., of Minneapolis, Minn., remonstrating against the enactment of legislation placing a duty on Canadian lumber, which was referred to the Committee on Finance.

He also presented a resolution of the Chamber of Commerce of Minneapolis, Minn., giving rules under which farmers' selling agencies may be admitted as members of such organization, which was referred to the Committee on Agriculture and Forestry.

Mr. WARREN presented a resolution adopted by Local Union No. 2742, United Mine Workers of America, of Carneyville, Wyo., favoring an old-age pension law for superannuated industrial workers, which was referred to the Committee on Education and Labor.

Mr. McLEAN presented a memorial of sundry jewelers of New Haven, Conn., remonstrating against the enactment of legislation placing a tax on jewelry, which was referred to the Committee on Finance.

He also presented memorials of the Woman's Club of Enfield, of Thompsonville, Conn., and the Mosaic Club of Bridgeport, Conn., remonstrating against the enactment of legislation commercializing the national parks, which were referred to the Committee on Commerce.

He also presented memorials of the Polish American Republican Club, of Hartford, Conn., and organized Polish clubs of Meriden, Conn., remonstrating against the enactment of legislation restricting the immigration of aliens, which were referred to the Committee on Immigration.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 4844) granting a pension to Abner B. Harris (with accompanying papers); to the Committee on Pensions; and

A bill (S. 4845) to protect the name and insignia of the World War organizations; to the Committee on Military Affairs.

By Mr. HALE (by request):

A bill (S. 4846) to give effect to article 7½ of a convention between the United States of America and other powers for the protection of industrial property, signed at Washington, June 2, 1911, and for other purposes: to the Committee on Patents.

By Mr. JOHNSON of California:

A bill (S. 4847) granting an increase of pension to Mollie M. Wilkerson;

A bill (S. 4848) granting a pension to Frank Dixon;

A bill (S. 4849) granting a pension to J. B. Hicks; and

A bill (S. 4850) granting an increase of pension to Henry O. Welton; to the Committee on Pensions.

By Mr. FERNALD:

A bill (S. 4851) for the relief of Sarah E. Church; to the Committee on Claims.

By Mr. CALDER:

A bill (S. 4852) for the relief of C. F. E. Petersen; to the Committee on Claims.

AMENDMENTS TO SUNDRY CIVIL APPROPRIATION BILL.

Mr. JOHNSON of California submitted an amendment proposing to appropriate $10,000 for the conduct of investigations in the development and standardization of methods of preservation of Pacific coast fishes, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. NELSON submitted an amendment, with accompanying papers, proposing to appropriate $350,000 for topographic surveys in various portions of the United States, including lands in national forests and in St. Louis, Lake, and Cook Counties, Minn., etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

LIBRARY INFORMATION SERVICE.

Mr. McLEAN. Mr. President, I wish to present to the Senate a few observations in support of the bill (S. 2457) to provide for a library information service in the Bureau of Education. The bill was reported by the Committee on Education and Labor favorably, and is upon the calendar; and I think for variety sake the Senate will be glad to have its attention diverted from the pending measure for a few moments to one which, if enacted into law, will be of real and lasting benefit to the American people.

Mr. President, the bill to which I refer proposes to make available to the Federal Government the services of the libraries of the United States as centers for the dissemination of information prepared by the Government for the people. A full explanation of its purposes and proposed methods of work was given in the hearings on S. 2457, September, 1919, and on H. R. 6870, August, 1919. Comprehensive summaries will be found in Senate Report 167 and House Report 302.

Mr. President, the libraries are especially fitted to place Government printed matter before the people, because they are supported by the taxes of the people for the benefit of the people, and are nonpartisan in their attitude, because they were established and are maintained for the purpose of providing the people of the United States with printed matter along educational and informational lines.

It is a library's function to make printed information of national import easily accessible to the public. The proposed service is expected to serve as a clearing house through which information in hundreds of offices will be made available to librarians who have at present no satisfactory means of knowing in which of these hundreds of offices a particular piece of information is located. It is also expected to prepare comprehensive digests of current printed matter issued by the United States Government of which librarians should be informed. This service would benefit the Government, the libraries, and the people.

In December, 1919, the Boston Public Library started a local Government information service. There being no established library information office in the Government, it was necessary for the Boston Public Library to establish direct communication with some 200 Government offices. This Boston service is now supplying hundreds of citizens with current information on Government affairs. A little four-page monthly sheet entitled "News Notes on Government Publications," printed for the staff of the Boston Public Library, is sent by request to 30 States. One or two quotations from recent letters show that it has met a very definite need. The librarian of the Omaha (Nebr.) Public Library writes:

> We need the bulletin; it is an inspiration that should have sprung into being decades ago; it is a guiding star and a wonderful time-saver for every Government depository.

The librarian of the Cleveland (Ohio) Public Library writes:

> We have found the news notes on Government publications of very great service to us, and we could use 50 copies of it right here in our own library.

The librarian of a Boston business library writes:

> What could be more stupid than for the Government to go on spending vast sums of money in research of one kind and another and vast sums in publishing its results and leave undone the one item of expenditure that can make these precious labors available to those whom they are intended to benefit. I haven't the slightest doubt that such a service as you have proposed and have tried in a small way to render at the Boston Public Library would prove of constant and increasing value to business and commercial interests.

Mr. President, the Bureau of Education is the logical place for the proposed service. One of the main duties with which

this bureau is charged is, "To promote the cause of education throughout the country." The cause of education can not be better promoted than by making the people real partners in the Government through providing them with the means of becoming acquainted with Government affairs and actions, by recognizing the fact that the proposed library information service and by authorizing its establishment in the Bureau of Education the Government will gain the interested help of thousands of patriotic librarians who will gladly take the responsibility of placing Government publications in the hands of their patrons. It goes without saying that the people will more intelligently and whole-heartedly support a Government which is made a vital part of their daily lives than one whose affairs are considered none of their business. The service should be conducted along educational lines through educational institutions; it therefore belongs with that established branch of the Government charged with the duty of promoting the cause of education throughout the country.

This service is not a duplication of any of the various information and publicity services scattered through the departments. Each one of these services issues highly specialized information along the line of the work carried on by the bureau in which it is located. The proposed library information office should serve as a library clearing house for specialized information prepared by such offices as the Geological Survey, Census, Crop Estimates, and Internal Revenue.

Through this clearing house specialized information would be made available to libraries, and through libraries to those who need it and do not at present know where to find it. Specialized services will always be needed in those departments of the Government which deal with matters concerning the daily lives and business of the citizens of these United States, but, as they are carried on at a great expense for the benefit of the people, it is fitting that the results achieved should reach as great a number of the people as possible through such a central information service as the one proposed.

In the opinion of those who have made a study of this subject, this service does not duplicate the work of the Library of Congress. The only duplication pointed out is based on a remark made on page 7 of the hearing on H. R. 6870:

> Catalogue cards should be sent with the material, and it should be made accessible as soon as received.

These cards should not in any sense be a duplication of the carefully edited Library of Congress cards, but would be in the form of temporary ready-reference slips for immediate use in the public card catalogue of a library, pending the arrival of the Library of Congress cards. This is a mere minor detail of operation which would be a convenience, not a necessity.

The office of the superintendent of documents is not the logical place for this service, as is claimed by the opponents of this measure. The functions of the superintendent of documents office, as assigned by the act of January 12, 1895, are interpreted by that office as follows:

1. To sell at cost any public document in its charge, the distribution of which is not specifically directed in the law
2. To receive from any Government office any document published for sale, which sale must be made under the provisions of section 61.
3. To have general supervision of the distribution of all public documents (with exceptions as enumerated in the law).
4. To prepare and print at the close of each Congress a comprehensive index (Document Catalogue) of public documents.
5. To prepare and print at the close of each regular session of Congress a consolidated index (Document Index) of congressional documents.
6. To index such single volumes of documents as the Joint Committee on Printing shall direct.
7. To receive all accumulations of documents from the several executive departments, bureaus, and offices of the Government, and annually to take over their surplus for distribution or sale.
8. To prepare and publish a monthly catalogue of Government publications, which shall show the documents printed during a month, where obtainable, and the price thereof.
9. To thoroughly investigate the condition of the designated depositories.
10. To distribute the documents as issued to the designated depositories.

A careful study of these functions will convince any unprejudiced person that they do not include such an educational service as the one proposed.

The "overhead" carried by the bill would not be eliminated by requiring the library information service to be carried by the superintendent of documents. If the superintendent of documents office could perform the services of the proposed library information office in addition to the work now required without further appropriation, why is the required work of the documents office months behind? Up to December 10, 1920, no document catalogue had been issued since that one which covered the period from July 1, 1913, to June 30, 1915. No new edition of the Check List had been issued since that which included the publications of 1909. No Documents Index has been issued since that of the third session of the Sixty-fifth Congress, ending March 4, 1919. Persons capable of judging report that there is no more hard-worked set of people in the Government than the small but faithful and efficient staff of the documents office. It would seem "a more logical plan" to add a sufficient number to the force needed to carry on the distributing and expert indexing and cataloguing, which is the legitimate business of the office, than to add another service of a nature entirely foreign to its prescribed duties.

Mr. President, in pointing out the supposed duplication which would result from the creation of a library service as proposed by the bill, the superintendent of documents listed as follows some of the duties which he thought would be common to both his office and the library service if established in the Bureau of Education:

1. Collecting and organizing information relating to Government publications.
2. Maintaining a current file of Government publications.
3. Preparing bibliographical material.
4. Distributing Government publications to libraries.
5. Answering requests for information from libraries.
6. Routing requests where they belong.

It is the well-considered opinion of framers of this bill that such duplication would not occur. A brief explanation of these duties will show that it was a misinterpretation of their scope which prompted the assumption that duplication would result from the proposed legislation.

Collecting information does not mean collecting every Government publication issued. It means just what it says—"collecting information" with regard to the work and functions of the various Government departments. This is sometimes obtained from printed matter; sometimes from personal interviews or letters, often through departmental news releases and even newspaper clippings. A collection of this kind furnishes a basis for such studies as Bulletin No. 74 of the Bureau of Education, entitled "The Federal Executive Departments as Sources of Information for Libraries."

Again, the current printed matter referred to is that which would be needed for ready reference in preparing the suggested digests or news notes on Government publications. On receipt, these publications would be placed in a vertical file behind index guide cards. They would not be catalogued as at the Library of Congress or the office of superintendent of documents, and when they have served their purpose as current material they could be passed on to the department library.

It is not meant, according to the language or the intention of this bill, that the library information office should prepare bibliographical material with regard to the "distribution of Government publications to libraries," "the requests for information from libraries," and "the routing requests."

I will say that this bill does not provide that the library information office should distribute printed matter to libraries. The words "make available to the libraries of the United States the sources of such information" have been commented on as follows:

> The only way in which such "sources" could be made available would be by the distribution of the publications which are the "sources" referred to by the bill.

This is a misinterpretation. The sources referred to are the offices issuing the publications. At present it is sometimes necessary for a library to apply for publications to 20 or more different offices in a month. Under this plan, if a librarian is fortunate enough to guess correctly what bureau to ask for a given piece of information, he may in time receive it. The proposed office will relieve the librarians of the country from the burden of keeping up with the shifting functions of the bureaus from which information must be sought. When a question arises, the librarian need only send it to the proposed library information office in Washington, that office would then route his request to the proper bureau, which would order the requisite publication to be sent him from the documents office.

I wish to emphasize the fact that this bill is not intended to create a demand for further output of free printed matter, but to provide for an economical placement of that printed matter already authorized, of which, according to Senator SMOOT's statement, from $500,000 to $1,000,000 worth is wasted yearly. It is probable that a demand would be created for printed matter with a price. The cost of this material is so much

less than that of works published by private firms that librarians would undoubtedly welcome the opportunity to purchase publications of which they were intelligently informed.

Mr. President, as to cost, the facts gathered from the last report of the Public Printer are as follows: The cost of such informational publications as we have been referring to was during the fiscal year ending June 30, 1920, over $6,800,000. Four hundred and seventy-six depository libraries received $105,000 worth of publications. This means an automatic distribution to libraries of about one sixty-fifth of the value of the entire output. If even one twenty-fifth instead of one sixty-fifth could be intelligently distributed to and properly administered by libraries, the supporters of this bill believe an extended and intelligent use of Government publications would result.

The libraries of the United States could be adequately provided with publications desired. It is estimated that of the bulletins restricted, a free distribution to 600 or 700 libraries should be sufficient. Of very popular bulletins, like those of the Bureau of Education, the Geological Survey, and the Bureau of Mines, editions of from 10,000 to 12,500 are authorized. The bulletins of the Department of Agriculture, not exceeding 100 octavo pages each, are unlimited as to the number of copies which may be printed, editions sometimes running to over 50,000 copies. Through the educational advertising suggested, libraries could be made aware of the value of the printed matter issued by the Federal Government and, when necessary, would readily pay a price which is always far less than that charged for similar matter issued by other publishing houses.

Many libraries do not properly administer the printed matter now received. Librarians are very busy people and need to be reminded of the good things offered by the Government through the kind of educational advertising which it is the duty of an educational service such as that proposed to maintain.

The Committees on Education of both House and Senate have favorably reported the bill after listening to discussions covering 12 printed pages. The American Library Association has twice indorsed the bill and urged its passage. The League of Women Voters and numerous civic organizations have indorsed it. Two Secretaries of the Interior Department have signified their unqualified approval of the service after a thorough examination of the plans proposed, and the Vice President elect has written with regard to it, as follows:

THE COMMONWEALTH OF MASSACHUSETTS,
EXECUTIVE DEPARTMENT,
State House, Boston, December 1, 1919.

Mr. CHARLES F. D. BELDEN,
Public Library, Boston, Mass.

DEAR MR. BELDEN: You are to be most heartily congratulated upon the public-spirited action you have taken in preparing for an up-to-date Government news service in the Boston Public Library. It is to be sincerely hoped that Congress can at an early date pass the measure empowering the Interior Department, through the Bureau of Education, to establish an office which will make it possible to open this service to the public.

The stability of our Government depends on the loyalty of the citizens of the United States, who are, in the final analysis, the Government. Nothing will insure that loyalty more effectively than a knowledge of the functions and actions of that Government which libraries, above all institutions, are qualified to make clear to the people.

Very truly, yours,

CALVIN COOLIDGE.

Mr. President, as amended, this bill calls for an appropriation of $18,700 over and above the usual appropriation allotted to the Bureau of Education for the work at present performed. This sum is less than 2 per cent of the amount estimated to be wasted in the Government publications not now available to the people of the United States. The sentence containing the clause, "unless previously authorized by law," fixes a limit on the amount to be expended for the purposes named, and no greater amount can be expended unless by permission of Congress, except that, by order of the head of the department, the lump sum for travel expenses and the allotment for printing may be drawn upon if necessary.

The "National Library Service," which existed for six months in the Interior Department under the emergency fund and performed duties similar to those outlined, cost the department for those six months, for salaries and for six issues of Library Information Bulletins, averaging 30 pages each, and one issue of an information bulletin of 100 pages (10,000 copies of each issue) about $6,000. This sum did not include field service, travel, nor office supplies.

If the education of the American people with regard to the functions and actions of their Government is an economy measure, this bill is one of the most economical measures ever reported by congressional committees. Even if it must be considered purely from a dollars-and-cents point of view, it will stand the test. Wasted goods to the value of nearly $1,000,000 are a dead loss. Senator SMOOT recently said, "It would be more accurate to estimate the waste in Government publications to be nearly a million dollars a year." If for $18,700, which is about one fifty-fourth of a million, even one-tenth of the material could be salvaged, the new office would have justified itself as an economy measure. The American people support expensive research sections in practically every department of the Government. It is their right to have access to the results of this work which appear in printed form. It is, therefore, not ruthless elimination of valuable publications that is required, but educational advertising and intelligent placing of this printed matter.

Moreover, the bill will be a great time saver for Members of Congress in that their constituents who want public documents will soon acquire the habit of securing the information desired at the local libraries instead of writing to Members of the House and Senate, and my hope is that for this reason and the many other reasons which I have stated, the Senate will take the bill up for action in the near future.

FREIGHT RATES ON PERISHABLE PRODUCTS.

Mr. TRAMMELL. Mr. President, I am very heartily in sympathy with the remarks that have been made in behalf of the establishment of the nitrate plant with a view to giving more reasonable fertilizers to the agricultural interests of our country. I fully appreciate the merits of the pending bill and am giving it my most hearty support.

There is, however, another peril that I see at the present time that hangs over the farming interests of our country, particularly the producers of perishable products. I refer to the excessive freight rates that are being charged upon perishable products. With the enormous increase which was made upon all other commodities, a like increase was made upon citrus fruits, upon the products of the truck farm, upon peaches, apples, and other fruits in other sections, and including all those products that may be generally classed as perishable products. In my State to-day the producers are being confronted with a condition which requires them to market their products at the prewar prices and at the same time they are being charged extortionate freight rates that were fixed at a time when the prices of all commodities were high, and naturally fixed at a time when the producer was better able and the consumer was better able to pay upon the basis of the increased freight rates.

I wish to bring to the attention of the Senate, and also to the attention of the Interstate Commerce Committee, a telegram received by me from the president of the Florida Citrus Fruit Exchange:

TAMPA, FLA., *January 8, 1921.*

Hon. PARK TRAMMELL,
Senate Office Building, Washington, D. C.:

Your aid and assistance is asked for movement we have started for institution prewar freight rates as emergency rates now to enable movement of crops to market. During past 30 days wholesalers and retailers have scaled down prices and accepted enormous adjustment losses, thereby stimulating buying demand but at lessened purchasing power. New level of prices must be recognized and cost of production, gathering, packing, and transportation reduced sufficiently to yield profit to producers on new prices. Apparently neither railroads nor producers prosperous under present conditions. Producers of perishable foodstuffs are being compelled to sell their products at prewar prices, and it is going to be necessary for carriers to offer transportation on some basis of readjustment which will allow these products to go forward, thus avoiding loss to railroads of this immense tonnage and misfortune to producers. Unless relief is given many farmers will be ruined and our State tremendously damaged.

J. H. ROSS,
President Florida Citrus Exchange.

Mr. President, I think the condition is one that calls for and demands some immediate relief. There are two courses through which this relief can be granted. One is by a voluntary action on the part of the railroads of the country that are handling this perishable freight—and they should extend the relief. The other is an enactment by Congress calling upon the Interstate Commerce Commission to take steps immediately to revise the tariff upon perishable products to meet the situation. It is not only detrimental to the producer of the perishable foodstuff to be subjected to excessive and exorbitant freight rates, but, in my opinion, it is detrimental to the interests of the transportation companies.

If you discourage and hamper production, if you curtail the activities in any particular industry which furnishes business to the transportation companies, you necessarily reduce the railroad tonnage and affect the business of the common carrier. I was apprehensive when Congress enacted the present railroad law, especially for the interests of my own State, that it was authorizing rates which would prove very detrimental and serious to our industries, more particularly to the citrus fruit industries and to the producers of perishable products generally. I opposed the measure because I feared the rates would be fixed too high.

Perishable products have to be placed upon the market at a given time. They have to be offered for sale when matured,

and can not be marketed over an extended period, as may be done with more staple products. Consequently, if you have an exorbitant and excessive freight rate, your perishable products do not carry into the markets where they are sold an increased price on account of the excessive rates. The farmer, the fruit grower, is willing to pay reasonable transportation charges, but he does not wish to give all his profit to the common carriers.

I bring the matter to the attention of the Senate, believing that the situation is a serious one, and that if the railroads will not voluntarily cooperate with the producers of perishable foodstuffs Congress should take some action that will furnish relief, and that at an early date. Both freight and passenger rates are too high and should be revised downward.

ATMOSPHERIC NITROGEN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3390) to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production, and for other purposes.

The VICE PRESIDENT. The bill is before the Senate as in Committee of the Whole, and open to amendment.

Mr. NEW. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hale	Myers	Smoot
Beckham	Harris	Nelson	Spencer
Borah	Harrison	New	Stanley
Calder	Heflin	Nugent	Sterling
Capper	Henderson	Overman	Sutherland
Colt	Johnson, S. Dak.	Page	Swanson
Culberson	Jones, N. Mex.	Phelan	Townsend
Curtis	Kellogg	Phipps	Trammell
Dial	Kenyon	Poindexter	Underwood
Dillingham	Keyes	Pomerene	Wadsworth
Fernald	Knox	Robinson	Walsh, Mass.
France	La Follette	Sheppard	Walsh, Mont.
Gay	McCumber	Simmons	Warren
Gerry	McKellar	Smith, Ga.	Williams
Glass	McLean	Smith, Md.	Willis
Gronna	Moses	Smith, S. C.	Wolcott

Mr. CURTIS. I desire to announce the necessary absence on committee business of the Senator from Washington [Mr. JONES].

Mr. GERRY. I announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Missouri [Mr. REED] on account of illness; and the absence of the Senator from Nevada [Mr. PITTMAN], who is engaged on official businees of the Senate.

Mr. TRAMMELL. I desire to announce that my colleague [Mr. FLETCHER] is absent on official business in connection with the Commerce Committee.

The VICE PRESIDENT. Sixty-four Senators have answered to the roll call. There is a quorum present.

Mr. WADSWORTH. Mr. President, pursuant to the notice I gave yesterday, I offer the following series of amendments, which I ask may be considered separately. I hope Senators will follow the amendments as they are read.

The VICE PRESIDENT. The Secretary will state the amendments in their order.

The ASSISTANT SECRETARY. On page 2, line 12, strike out the words "Secretary of War" and insert the words "Secretary of the Treasury."

The amendment was agreed to.

The PRESIDING OFFICER (Mr. CURTIS in the chair). The Secretary will report the next amendment.

The ASSISTANT SECRETARY. On page 2, line 14, strike out "Secretary of War" and insert "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 3, lines 17 and 18, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 3, line 25, before the words "shall be ex officio," strike out the words "Secretary of War" and insert the words "Secretary of the Treasury."

The amendment was agreed to.

Mr. WADSWORTH. At this point, may I ask the Senator from Alabama whether the language of the sentence just before the one which has just been amended has been changed by amendment in the Senate? It reads in the original print of the bill:

The directors so appointed shall hold office at the pleasure of the Secretary of War.

Mr. UNDERWOOD. I did not offer the amendment, but it is my understanding that there was an amendment offered to substitute the President for the Secretary of War.

Mr. WADSWORTH. Was that the amendment offered by the Senator from North Dakota [Mr. GRONNA]?

Mr. UNDERWOOD. It was the amendment offered by the Senator from North Dakota, and I am speaking from recollection and not from the record.

The PRESIDING OFFICER. On page 3, line 23, an amendment was made striking out the words "Secretary of War" and inserting the words "President, by and with the advice and consent of the Senate." Does the Senator from New York offer another amendment on that page?

Mr. WADSWORTH. Yes, Mr. President.

Mr. ROBINSON. I will offer the amendment, if the Senator desires. It is in keeping with the other amendments which were made yesterday upon my motion.

Mr. WADSWORTH. I move, on page 3, lines 24 and 25, after the words "pleasure of the," that the words "Secretary of War" be stricken out and in lieu thereof the word "President" be inserted, so that it shall read:

The directors so appointed shall hold office at the pleasure of the President.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. On page 4, lines 3 and 4, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 8, line 13, it is proposed to make the same amendment.

The PRESIDING OFFICER. The attention of the Senator from New York is called to the fact that the paragraph on page 8 beginning with line 10 has been stricken out.

Mr. WADSWORTH. An amendment has taken its place, and I think the amendment contains the words "Secretary of War," and it should read "Secretary of the Treasury."

The PRESIDING OFFICER. The second paragraph of the amendment reads:

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President for the proceeds of the sale of nitrate of soda herein made available to the corporation, and for all unexpended balances now under the control of the Secretary of War—

And so forth.

Mr. WADSWORTH. Leave it as it is. Is there not another case in that same amendment where "the Secretary of War" appears?

The PRESIDING OFFICER. On page 8, line 15, the words "Secretary of War" have been stricken out.

Mr. WADSWORTH. That is correct. But further down in that amendment which has already been adopted do not the words "Secretary of War" appear again?

The PRESIDING OFFICER. It reads:

And for all unexpended balances now under the control of the Secretary of War and applicable to the nitrate plant at Sheffield, Ala., the corporation shall cause to be executed and delivered to the Secretary of the Treasury—

And so forth.

Mr. WADSWORTH. That is correct. It should read "Secretary of the Treasury."

The PRESIDING OFFICER. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. On page 9, lines 17 and 18, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 10, line 9, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 10, line 11, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 11, line 24, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Treasury."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 12, strike out lines 3 to 10, inclusive, and the proviso agreed to at the end thereof.

Mr. WADSWORTH. That is the amendment which takes away from the corporation the right to employ Army officers.

Mr. SMITH of South Carolina. Let the Secretary read the proviso which it is proposed to strike out.

The PRESIDING OFFICER. The Secretary will read.

The ASSISTANT SECRETARY. It is proposed to strike out lines 3 to 10, both inclusive, and the proviso added at the end of line 10, which reads:

Provided, That no officer so appointed shall receive two salaries.

The amendment was agreed to.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Have all the amendments of the Senator from New York been acted on?

Mr. WADSWORTH. I have not yet sent the others to the desk. That finishes all I have sent to the desk.

Mr. NELSON. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On page 11, line 22, after the words "United States," insert a comma and the words "except statutes relating to crimes and their punishment."

Mr. NELSON. I will state the object of the amendment. All this property comes from the United States and the stock is owned by the United States, and if there is any embezzlement or destruction of any of the property of the corporation, I want those guilty to be amenable to prosecution under the criminal statutes of the United States. Hence I propose to insert the words "except statutes relating to crimes and their punishment."

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, I offer another amendment.

The PRESIDING OFFICER. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On page 9, line 7, before the word "require," strike out the word "may" and insert in lieu thereof the word "shall," so that it will read:

The President or the Secretary of War, as a condition of the transfer, conveyance, or delivery to the corporation of any property herein referred to, shall require the corporation to assume any and all agreements and obligations entered into by the United States in connection with the construction, maintenance, or operation of such plants or other property.

Mr. WADSWORTH. I think the reason for that amendment is obvious. This property is not to be considered property of the United States according to one part of the bill, and in another part of the bill it is; the amendment will make it clear that it must be deemed to be Government property in so far as the existing obligations of the Government with respect to it are concerned.

Mr. UNDERWOOD. I think the Senator's amendment is correct. I have no objection to it.

The amendment was agreed to.

Mr. WADSWORTH. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 6, at the end of line 11, after the word "act," insert the following proviso:

Provided, That no property shall be acquired for or by this corporation under condemnation proceedings, nor shall the corporation acquire by any means any water-power site or hydroelectric-power plant other than the site at Muscle Shoals, and the hydroelectric-power plant now being constructed at that point upon the Tennessee River, and the electric-power unit at the Warrior River station of the Alabama Power Co. as provided in this act.

Mr. UNDERWOOD. The proposed amendment is in conformity to the statement made by the Senator from North Dakota [Mr. GRONNA], chairman of the committee, and agreed to by myself, the Senator from South Carolina [Mr. SMITH], and some others here yesterday. The substance of it is that it gives the opportunity for the corporation to acquire the plant which the Government now has but limits it to its present operating plant. I think that is all anyone wants or expects. I see no objection to the amendment.

Mr. WADSWORTH. I think for the purpose of consistency the word "this," in the first line of the new proviso, should read "the," so that it will read: "*Provided*, That no property shall be acquired for or by the corporation," and so forth. The corporation is referred to in that manner clear through the bill.

Mr. UNDERWOOD. That is correct.

Mr. WADSWORTH. May I state that it also cuts out the power of condemnation which was in the bill.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New York.

The amendment was agreed to.

Mr. WADSWORTH. I now offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 5 strike out subdivision (b) or all of lines 8 to 13, both inclusive, which read:

(b) To acquire, establish, maintain, and operate such other laboratories and experimental plants as may be deemed necessary or advisable to assist it in furnishing to the United States Government and others at all times nitrogen products for military or other purposes in the most economical manner and of the highest standard of efficiency.

Mr. SMITH of South Carolina. Mr. President, the object of subdivision (b), I understand, was to enable the Government, outside of these properties, to maintain, wherever they thought it was best, experimental plants and laboratories for the purpose of ascertaining what might be the best method of obtaining these ingredients. They might maintain one in Washington, or wherever in their wisdom it could be the most efficiently and most cheaply done, just as the Agricultural Department, in testing out the remedies for certain diseases, establish their plants and experimental stations and laboratories in such manner and at such places as they think may get the best results.

However, as the property seems to be sufficient at this stage to develop the best process and in order that we may get this very necessary work started, if that is possible, I shall offer no objection to the amendment, hoping that whatever experimental work may be done can be done on the premises after striking out the words referred to.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New York.

The amendment was agreed to.

Mr. WADSWORTH. I desire to offer one more amendment. I have not submitted it to the Senator from Alabama [Mr. UNDERWOOD], but I ask his consideration of it. It does not go to the fundamentals of the bill, and perhaps it will make the organization of the corporation a little more definite.

On page 3, commencing with line 20, we find the following language:

The corporation shall be conducted under the supervision and control of a board of directors, consisting of not less than 3 nor more than 11 members, to be appointed by the President by and with the advice and consent of the Senate.

I suggest that that be changed so as to read: "Consisting of not less than five nor more than seven members." From 3 to 11 is a very indefinite number, and it seems to me there is sufficient discretion left in the choice between 5 and 7.

Mr. UNDERWOOD. I have no objection to that amendment, if no one else has.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 3, line 22, strike out the word "three" and insert in lieu thereof the word "five," and in the same line strike out the word "eleven" and insert in lieu thereof the word "seven," so that the sentence will read:

The corporation shall be conducted under the supervision and control of a board of directors, consisting of not less than five nor more than seven members, to be appointed by the President, by and with the advice and consent of the Senate.

The amendment was agreed to.

Mr. TOWNSEND. Mr. President, before we proceed to vote on this bill I desire to state very briefly my reasons for having voted to recommit it and the reasons which will compel me to vote against its passage. I have known something about the Muscle Shoals proposition for some time, largely through our old-time and well-beloved friend, former Senator Bankhead, who was deeply interested in the matter. I do not wish at this time to charge any bad faith on the part of anyone supporting the measure. I do not believe in that kind of argument. But I must state the reasons which govern me in what I shall do with reference to the bill.

I realize, I think, as everyone does, that the project from its inception has been more or less tainted with corruptness. That does not necessarily mean that if the Government has improvidently expended money for a project which is worthy and which ought to be preserved it should abandon it because of such corruptness; but it does indicate to me that special consideration should be given to a project of that kind, when millions of dollars more are asked for investment in it.

The bill is urged on the ground that it will be beneficial to the farmers of the United States. I am going to predict now, although it may be unsafe to do so, that the farmers can and will obtain no benefits from the bill. I do not believe that such is the real object of it. I think it is clear, from the evidence as I have heard and read it, that nitrate can not be produced at the plant in competition with private enterprise unless the water-power plant there is completed. The Secretary of War says that it might be used in emergency, in case of war, when we do not pay any attention to the cost, and that nitrate might be produced through the use of steam power, but he also states that it can not be so produced commercially at a price within the reach of the farmers of the country for their use.

I said that I do not charge bad faith to any Senator who is advocating this measure, because many of them have been advocat-

ing the principle for years. But when I realize that the people who drew the bill, the people who urged its passage and who are to control it, might have a pecuniary interest in it, I am inclined to believe that some one has been deceived, and that this in reality is a bill which is going to inure to the benefit of the water-power company in Alabama. Therefore I can not support a measure which in my judgment would be a failure, measured by the purpose which is presented here, but which in my judgment will result in benefits to special interests and not to the Government or the farmers of the United States.

I have given careful attention to the matter, and I state with great confidence that the bill has been improperly considered. I voted in good faith to recommit it, thinking it was safer to frame a bill in committee than on the floor of the Senate, as this bill has been framed. I venture to say that no one knows exactly what we have done up to date. Although I have necessarily been absent some of the time, I have tried to follow what has been done on the floor of the Senate with reference to the measure. I do not think anyone understands just what we are providing, and it is unsafe to legislate in that way. In good faith I wanted the bill to go back to the committee, in order that the committee might consider all the objections which have been urged in the Senate. Then when I stop to think that some of the most influential members of the Committee on Agriculture and Forestry, men whose motives can not be questioned, are here in opposition to the measure and asking for greater and fuller consideration, it seems to me we have not followed the course of greatest wisdom.

Believing as I do believe that the measure is not in the interest of the farmers of the country, who are its alleged beneficiaries, believing that it is improperly framed and not understood, I can not support it.

The argument that we have invested $100,000,000 or more at Muscle Shoals and therefore ought to invest more does not appeal to me. About the first spare money I earned and practically all I had at that time I invested in a mining project. I started out very modestly by investing $500, with the understanding that that was all I would have to invest, but before I got through and in order to save what I had put in I had invested something over $7,000, and then lost it all. It would be much better, when we are convinced that an investment is bad, to quit sending good money after bad and take a smaller loss.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Montana?

Mr. TOWNSEND. I yield, although the mine was not located in Montana.

Mr. WALSH of Montana. The Senator refers to an experience which most of us western Senators have had. I am rather sympathetic about it.

Mr. TOWNSEND. I thought possibly I could strike a sympathetic chord there. Nearly every Senator has had a similar experience.

The fact is that the nitrate plant is practically complete now, but it can not be operated until the power plant is completed and $43,000,000 more is invested in it. It is also true that the plant, as the junior Senator from Wisconsin [Mr. LENROOT] has stated, could be maintained and cared for at a cost of $400,000 a year, and that the interest which we will have to pay, and which we will lose, on the amount of money that will be required to complete the dam would more than offset the amount we would expend in caring for the property.

Therefore, at this time and until the question of whether we are going to complete the dam is settled, we will make a mistake by enacting this legislation. The House has refused to appropriate any money for work on the Muscle Shoals Dam. Unless the Senate agrees to carry it on, and the House agrees, this is a vain thing, or rather, worse than that, it is a waste of public money and a false hope to the already several times deceived farmer.

Therefore, and for these reasons, it will be necessary for me to vote against the bill.

Mr. SMOOT. Mr. President, I do not know that it is worth while to take any of the time of the Senate to discuss the pending measure further; I do not know that any testimony given by any person in the United States, even one so well qualified as the Senator from North Dakota [Mr. GRONNA] has said Col. Cooper is, would change the vote of a single Senator, but for the RECORD I wish to make merely a few remarks before a vote is taken upon the bill.

When first I saw that the bill had been reported and placed on the calendar and I observed that the author of the bill was the Senator from New York [Mr. WADSWORTH], I thought there was some mistake; I did not believe that the Senator from New York could ever father such a measure; and I am very glad that it has developed that the bill was not the product of the Senator from New York, but that it was prepared by the War Department, and he was requested to introduce it in the Senate, which he did.

I have tried to learn whether or not the committee took a vote upon reporting the bill to the Senate. I have been unable to find that more than two Senators were at the meeting at the time the measure was reported out. The nominal author of the bill was not there; the chairman of the committee was not there; the bill was reported to the Senate, as I understand, with not exceeding two members of the committee present.

I have not had time to follow all of the amendments which have been offered to the bill, but I do not know that it would make any difference as to what amendments have been offered and agreed to. I think the Senator from Alabama [Mr. UNDERWOOD] wishes the bill, with any kind of amendments, to pass, notwithstanding he knows full well that it will not become a law at the present session of Congress. Its passage may, of course, give the bill a little better standing for the future, because it may be said that the Senate has already passed it. That may assist the Senator from Alabama in his request for an appropriation of $10,000,000 to be incorporated in the sundry civil bill for the dam at Muscle Shoals. However, so far as the passage of the bill at this time is concerned, it will not hasten it into law in the least, as every Senator knows.

I think it was on Thursday last that the chairman of the Committee on Agriculture and Forestry, the Senator from North Dakota [Mr. GRONNA], became very much excited over certain opposition to the bill, and then made some remarks which I do not think were really called for, and appealed strongly to the testimony of Col. Hugh L. Cooper, the consulting engineer on the part of the Government for this project. I then thought how strange it is that two persons hearing the same testimony could construe that testimony so differently as do the Senator from North Dakota and the Senator from Utah, as do the Senator from North Dakota and the Senator from Washington, and, I think, as do the Senator from North Dakota and the Senator from North Carolina. It is for that reason, Mr. President, that I now desire to call attention to some of the statements which were made by Col. Cooper in order to prove beyond a question of doubt that the statement which I made upon the floor of the Senate that this was a water-power proposition pure and simple is the fact.

I am not going to take time to read all of the testimony of Col. Cooper on this subject, although it would be very enlightening to have it go into the RECORD, but I am going to take time to call attention to some of the testimony which was given by him. In speaking of the amount for which the property as it exists to-day—that is, the work upon the dam—could be sold, this colloquy took place before the Committee on Appropriations:

Senator CURTIS. You might get $3,000,000 out of the $11,000,000?
Col. COOPER. Yes. We might not even get that, and when the work would be resumed I do not know, because private capital on a 5 per cent basis will not be found for a long time to come.
Senator SMOOT. It would not have to be made on a 5 per cent basis.
Col. COOPER. I do not know that it would, but it would be a low rate on the amount of money that would be required for private capital to go on and finish it.
Senator OVERMAN. How much would it take to complete it?
Col. COOPER. From now?
Senator OVERMAN. Yes.
Col. COOPER. If there are $11,000,000 in it now, it would take $39,000,000 more to complete it.
Senator SMOOT. It would cost $42,000,000 if private parties paid $3,000,000 for it, and put in $39,000,000 more?
Col. COOPER. Yes; and I do not think you would find private capital putting up $42,000,000 on that project in 10 years.
Senator SMOOT. Why not?
Col. COOPER. Because in order to sell its current and distribute it over a wide field, it has got to have the money at about 5 per cent interest; and when you get through I think you will find that the real interest of the United States and the large area of population down there is in the direction of having the Government go ahead and finish this thing.
Senator OVERMAN. You say this will furnish power to seven States?
Col. COOPER. Yes.
Senator SMOOT. Do you believe we ought to furnish this water power for the purpose of going into the manufacture of fertilizer?
Col. COOPER. I think that would be an awful mistake.
Senator SMOOT. What you think is this, that the Government ought to construct this power dam, finish the same, and lease the power out?
Col. COOPER. That is exactly it.

I wish more Senators were present, that I might call to their attention the testimony that follows later on this very subject. The power developed at Muscle Shoals, Senators, is to be leased out to the public utilities of seven Southern States, if the judgment of Col. Cooper is to be taken.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. I yield.

Mr. McNARY. I wish to ask the Senator from Utah where the colloquy which he has just read took place?

Mr. SMOOT. It took place in the Appropriations Committee of the Senate on Thursday last. I will say that it was in connection with a demand which was made upon the committee for an appropriation of $10,000,000 to continue the work on the dam.

Not only that, Mr. President, but Col. Cooper says that if we shall put $50,000,000 into this project it will take 10 years before all the power can be sold, and if operations are carried on for 30 years the Government can perhaps make 5 per cent upon its investment. He adds, however, that if the power is leased it will save to the public utility corporations of seven States of the South $10,000,000 a year. That is the object of the bill; that is why it is before the Senate of the United States.

I wish to ask Senators to follow me in order that they may know the object of the proposed legislation before they vote to expend tens of millions of dollars—and no one on earth can tell how much more—before the project is completed. The first estimate for plant No. 1 was $3,000,000. There has already been expended upon that plant $12,689,676.99. I have more confidence, however, in the judgment of Col. Cooper than I have in the judgment of the Government engineer who made the first estimate for plant No. 1. That estimate was never made in good faith; it was sent to Congress for the purpose of securing the first appropriation; and it is a well-known fact that when the first appropriation is made for any project by the Government it is always pointed to and appeals are made to Senators to make further appropriations in order that the first appropriation may not be lost. Now we are asked, Mr. President, to appropriate millions and tens of millions of dollars more to save an appropriation of $11,000,000, out of which, perhaps, we could get a salvage of $3,000,000, and no one knows how much it is going to cost to complete the project.

Mr. HARRISON. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. SPENCER in the chair). Does the Senator from Utah yield to the Senator from Mississippi?

Mr. SMOOT. Yes; I yield.

Mr. HARRISON. The Senator is in favor of making fertilizer at the Muscle Shoals plant, is he not?

Mr. SMOOT. No; I am not.

Mr. HARRISON. Is the Senator not in favor of making that plant a success?

Mr. SMOOT. Yes; if we build it; but it will never be successful in manufacturing fertilizer.

Mr. HARRISON. Will the Senator permit me to read, in his remarks on April 30, 1920, a statement about this proposition? It is very brief.

Mr. SMOOT. Yes; I will.

Mr. HARRISON. The Senator, in speaking about this proposition, said at page 6336 of the RECORD of April 30, 1920:

> The sum of $70,000,000 has been expended there, and no human being can tell how much more will be spent. So far as I am concerned, I want to see appropriated whatever amount is necessary to make the plant a success. I recognize, as well as does any man living, the necessity of the manufacture of nitrates in the United States.

Mr. SMOOT. And since April 30, 1920, every bit of testimony that has been given by anybody, as all who have followed the question from that time to the present know, is to the effect that the amount of nitrate made has cost more than it could be secured for from Chile or other sources. And so I say to the Senator that I think that in the future the plant will be operated in the same way if operated by the Government. Our Government is a failure in operating business concerns.

Mr. HARRISON. The Senator has changed his mind since April 30, 1920.

Mr. SMOOT. No; I have not changed my mind any further than this—that I believe that even under the most favored conditions the Government can not go into the manufacturing of nitrate and compete with private concerns. It is impossible for them to do it; and when you study the conditions surrounding any activity of the Government, I do not care what it may be, history shows that the estimates made are always less than the costs.

Why, take the reclamation projects of the West. The estimates that were made, and the farmers assured of the price that it would cost to develop the water power under such projects, have been in nearly every case 100 per cent more; in some cases that I know of 150 per cent more; and I am fearful that the result of this project will be the same.

Mr. President, Col. Cooper says that in the Muscle Shoals project there will be developed 100,000 primary horsepower, and ultimately there can be developed 450,000 secondary horsepower, and also that this is to be the cheapest power in the United States. The Keokuk plant has been developed to this extent: There is 125,000 primary horsepower, there is 75,000 secondary horsepower, and Col. Cooper testifies that the value of a secondary horsepower is equal to 30 per cent of the value of a primary horsepower. Now, let us see what this project is going to cost per horsepower, even on the estimates that we have, as compared with the Keokuk plant, built by this same Col. Cooper, and he is vice president of the company.

These are the figures for the Keokuk plant:

Primary power, 125,000 horsepower.

Secondary power, 75,000 horsepower.

Thirty per cent of 75,000 is 22,500, making a total primary power valuation of 147,500 horsepower. The colonel testifies that the 147,500-horsepower valuation cost $26,000,000, or a cost per horsepower of $176.

Take the Muscle Shoals plant, with 100,000 primary horsepower. Grant that there is 450,000 horsepower of secondary power that may be developed. Thirty per cent of 450,000 is 135,000 horsepower, or 235,000 horsepower valuation. Grant that it only costs $50,000,000, as estimated by Col. Cooper, and the cost per horsepower in the Muscle Shoals plant will be $213.

Mr. President, I recognize that that is a low price for power. This, however, is the price per horsepower at the dam, and the estimate that is made here of $50,000,000 is for the completion of the dam alone; and that power can not be utilized until the distributing system is run, covering 60,000 square miles of territory in the seven Southern States mentioned by Col. Cooper.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. Yes; I yield.

Mr. McNARY. May I remind the Senator from Utah of a patent error in his figures? In the hearings before the Appropriations Committee, to which the Senator called my attention a few moments ago, the figures at Muscle Shoals are given as 550,000 horsepower. The Senator's figures were computed on the basis of 450,000.

Mr. SMOOT. Oh, no; the Senator is wrong. I gave the figures as 100,000 primary horsepower and 450,000 secondary horsepower.

Mr. McNARY. I did not catch that.

Mr. SMOOT. I thought perhaps the Senator had not caught the first figures.

In order that there may be no question about it, I will refer right now to what Col. Cooper said in relation to secondary horsepower.

> Col. COOPER. The sale price I have figured for the secondary power is only 30 per cent of the primary-power rate. Senator SMOOT will agree with me that it is a very low price.
>
> Senator SMOOT. A very fair price, comparatively.

Therefore I take the 30 per cent of the secondary power and figure it into primary power, as suggested by Col. Cooper.

The Senator from Washington [Mr. JONES] asked the colonel this question:

> If there should be nobody ready at the time to lease it, the Government would have to go on operating it and sustain it?
>
> Col. COOPER. I have got to the point which, I think, is very important and which I touched upon in my letter to Senator SMOOT. That is this: The whole southern territory is at the mercy of this project. A great many different water powers in the South are ready for development at this time, but no private capital will go in there until the policy of the Government with respect to this energy at Muscle Shoals is defined. * * *
>
> Senator SMOOT. From your letter I judged that there are a number of industries that are ready to put the power in, but they can not go to work and put it in if the Government is going to construct this project and sell power at a cheaper rate than they can.
>
> Col. COOPER. That is it exactly.

Now, Senators, if we want the Government of the United States to spend $140,000,000 with the assurance that upon the $50,000,000 we will get at least 5 per cent during a period of 30 years, let us make this appropriation.

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Alabama?

Mr. SMOOT. I do.

Mr. HEFLIN. Would the Senator have the Government lose the eighty-odd million dollars already spent on this plant in order that private capital may have its way in developing various sites in the South?

Mr. SMOOT. No, Mr. President; but I think it would be very much cheaper for the Government of the United States to sell what they have now and take what loss they will have to take at first-hand than to go into it any deeper.

Mr. President, the dam proposition is the best proposition of this whole project as far as the Government's interest is concerned. I do not think they would lose more than 50 per cent in selling it if it were completed; but we have the testimony here that private parties are perfectly willing to go into the development of the water powers of the South, and develop the

water powers there the same as the water powers of all other parts of the United States have been developed. That, however, is not this proposition. At a time when the Government of the United States is paying 5¾ per cent for its money, and straining every effort to secure sufficient means to maintain our Government, and at a time when the taxpayers are burdened as they were never burdened before, we are asked to have the Government of the United States advance this immense amount of money and wait 10 years before the plant will even pay its running expenses.

It is true, I think, that the price at which Col. Cooper says this power can be sold, with the advance in the price of coal that will take place within the 20 years, will give a sufficient return to pay the Government an average of 5 per cent for 30 years.

If we are going into this plan and the Government has decided to go into the building of water powers, I think it had better reach out into all sections of the country and do the same thing.

Why should not the Government build a great power plant upon the Colorado River? Why should not the Government go into the State of Washington or the State of Oregon and develop the water powers there?

So the question now is, Is the Government of the United States to embark on this? Mr. President, there are many, many things which have been put through Congress under the guise of assisting the farmer, but I know of none since I have been in the Senate of the United States which equals this one. I assert to the farmers of the United States now that they will not get a dollar's benefit from it, unless perchance it may be through the public utilities of the seven Southern States or the water-power companies of those States. I make that last statement based upon what appears in the testimony before the committee.

I would like to see those seven Southern States developed. Nothing has pleased me more than to see the wonderful development of water powers in North Carolina; but North Carolina has not asked the Government of the United States to build them. Mr. President, this would never have been thought of if it had not been for the war. I am not going to discuss the question as to whether this plant, if completed, will tend in any way to the safety of our Government in time of war. Col. Cooper says it will not. The Senator from New York [Mr. WADSWORTH] answered the question so thoroughly and so splendidly that not one Senator questioned his statements.

I continue reading from the hearing:

Senator JONES of Washington. But suppose there is nobody to lease this and that conditions are such that when it is built it would not be leased and the Government goes on running it. If the Government runs it without the idea of making a profit, would there be any other development?

Col. COOPER. The answer to that is this, that the South has already a very great need for additional power. There are 10 or 12 distributing companies in the South.

Senator JONES of Washington. In this territory?

Col. COOPER. Yes; in territory that applies here—that are anxious to build right now.

Mr. President, there is not a Senator who does not know that no private concern will go on and develop water powers in the South when the consulting engineer of this project says that for 10 years there will be no profit, and without the project paying taxes of any kind or paying interest upon its obligations for years and years, and that for a period of 30 years the return is to be an average of but 5 per cent.

I continue reading:

Senator JONES of Washington. In your judgment, what is the use that justifies the Government in putting in that plant aside from the money that it now has in it?

Col. COOPER. I do not think there is anything except that it would be a great benefit to the people all over the South.

Mr. HEFLIN. What was the Senator's last statement?

Mr. SMOOT. It is not my statement; it is Col. Cooper's statement. Senator JONES of Washington asked the question of Col. Cooper.

Mr. HEFLIN. Just the last words.

Mr. SMOOT. The language was:

I do not think there is anything, except that it would be a great benefit to the people all over the South.

Mr. HEFLIN. Does the Senator object to benefiting 25,000,000 American people?

Mr. SMOOT. No; I object to taking money from the Treasury of the United States for the purpose of developing a water power in the South if that is not to be followed in the future by developing water powers in every part of the country.

Mr. HEFLIN. This is to provide the Government with a nitrate plant.

Mr. SMOOT. That is a camouflage. There is nothing in it, Mr. President. The object, as Col. Cooper said, is to develop the water power.

To continue reading from the testimony:

Senator SMOOT. The proposition, then, is for the Government to give the people of the South cheap power?

Col. COOPER. Yes; and I think it will give that.

Mr. WADSWORTH. At somebody else's expense?

Mr. SMOOT. At the taxpayers' expense. I would like to say to the Senator from Alabama that I would like to see the South develop, and I think it has been developing faster than any other section of the country; but I think that private capital will develop it, as it has done in the past.

I asked the question:

How much per horsepower per year?

Col. COOPER. That is probably as important and practical a question as could be asked. The answer to it is rather difficult, because you would have to know what the rate of use per day of the power would be before we could make a definite answer to the Senator's question. People do not understand what the load factor is in this sort of thing. The difficulty in figuring the power price, especially when a dam has storage behind it, such as this one has, is the fact that the rate of use of the power each day is not the same each hour.

For instance, I think in this particular territory the average use of this power would be around 12 hours a day, which would be half the day, or a 50 per cent load factor. Fortunately, because we have this big pool behind us, you can accommodate the output to whatever load factor comes along in the future. Now, if we figure on a 50 per cent load factor—in other words, taking a cotton factory, such as the South is supposed to be full of, their average rate of use is 12 hours a day. Such a factory would have to pay for guaranteed power, in order to take care of the 5 per cent interest, not exceeding $15 per horsepower.

I asked him whether that was $15 a horspower delivered at the factory or whether it was at the dam, and he said it was at the dam. I asked him what his estimate was as to the cost per horsepower for distribution, and he answered $12 additional, making $27 distributed.

The Keokuk plant is delivering power in St. Louis—or just outside of St. Louis, where the step-down transformer is—for $33 per horsepower, and I think that is the cheapest power there is in the United States, outside of the power that is delivered to one of the railroads, as I understand it, for about $28.

Mr. HEFLIN. Then this power at Muscle Shoals could be obtained for about $5 cheaper than the power now being transmitted to St. Louis?

Mr. SMOOT. So says Col. Cooper. I have never taken the position that it is not cheap power. I wish the Government of the United States would go out into our territory and develop power at that price. We would make our desert blossom like the rose. We would put the farmers on the land and take the water from underground, pump it upon millions of acres of land that is worthless to-day. But we have never thought it was the province of the Government to go out and develop water power for the people of the State of Utah.

Mr. HEFLIN. If the Senator will permit, the Government has spent a great deal of money in irrigation projects in the West, in making the desert blossom as the rose.

Mr. SMOOT. Yes; and the farmer has to pay back with interest every dollar advanced by the Government. If this proposition were one like that nobody would be objecting here, providing we had the money. Not only that, when public lands are sold within the States the money received goes to the reclamation fund, but every dollar expended is paid back with interest by the farmers benefited.

Mr. HEFLIN. The farmer has to pay for the fertilizer.

Mr. SMOOT. Yes; the farmer has to pay for the fertilizer, and will when this proposed plant is in operation. We will not get enough from fertilizer to reimburse the Government 1 per cent of the amount of money the Government is asked to put in that project.

Mr. HEFLIN. Is not that what people said about irrigation, that it would not be a success?

Mr. SMOOT. Some men may have said so, and in some places it has not been a success.

Mr. HEFLIN. But in the main it has been a great success.

Mr. SMOOT. Yes; and the people who get the water pay for it. But here you want the Government of the United States to put up every dollar, with no plan whatever for amortizing this expenditure. There is to be no end to this project. Not only that, but when the plant begins to run down and the machinery begins to wear out, Congress will be asked to vote for appropriations for the purpose of renewing the machinery; and Senators will say, "If you do not give us the money, you are going to lose what you put in," and, instead of it being $140,000,000, nobody on earth knows what it will be.

Mr. HEFLIN. If the Senator will permit, if it is a good thing, it ought to be kept going. We are still appropriating money for irrigation purposes.

Mr. SMOOT. I thought I answered the Senator upon the question of irrigation. The reclamation of the arid lands in the West is quite a different proposition from this. The farmer of the West has to put up his land and water, in many cases all his improvements, as security for the repayment of the money

advanced by the Government. He has to put up his primary water rights, whatever they may be, as security to the Government that the money which the Government expends shall be paid back in 20 yearly payments. Is there a farmer of the South, or a manufacturer in these seven Southern States, who is asked to put up any security? Not one.

Mr. HEFLIN. They will have to pay for the fertilizers they obtain, and other things produced there.

Mr. SMOOT. That is so far-fetched, Mr. President, that it is not worthy of discussion. This project is for development of water power, not fertilizer.

Mr. DIAL. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from South Carolina?

Mr. SMOOT. I yield.

Mr. DIAL. I would like to ask the Senator what his alternative proposition is, if he does not indorse this proposition, what does he propose?

Mr. SMOOT. My alternative proposition is to sell it now for all we can get out of it, and then let somebody develop a water power and go on and manufacture whatever they want to. If they want to sell it for power, let them sell it for power. Listen to this, Senators:

Senator JONES of Washington. And I understand, Col. Cooper, that when the Government gets this dam completed and the necessary things for the development of power are installed, it will not proceed any further?

Col. COOPER. No further. It will not have to proceed any further.

Senator JONES of Washington. What agency do you think will take it over? It would have to be taken over by one agency, would it not?

Col. COOPER. Yes. I think that agency will probably be the five or six or seven public utilities of the South operating under the direction of the Federal Power Commission.

Senator JONES of Washington. Are those public-utility companies in existence now?

Col. COOPER. They are.

Senator JONES of Washington. Where and what are they?

Listen!

Col. COOPER. Birmingham, and the Alabama Power Co., the Southern Power Co., and the York, Pa., interests—

And some others. Can you see, Senators, where our money is going?

Senator JONES of Washington. Suppose such an agency as that should not be formed and could not get together. Then the Government would have to maintain it and establish distributing systems and everything else.

Col. COOPER. The supposition that they would not proceed in that line is an economic mistake, because it is to their own interests to do it.

Senator SMOOT. They will do it all right.

Col. COOPER. Oh, absolutely; they will do it, and they are going to do it now.

Senator JONES of Washington. Build a plant?

Col. COOPER. No; but they are wanting to form an association to handle this current under this superpower commission that the Government is back of. This is a good thing. There is nothing in this project, as I see it to-day, that is not a very worthy use of public money. I do not think there is anything about it that can be criticized, if you will just stick to the power end of it.

Mr. HEFLIN. The Senator will admit under his own statement that the Government is going to make money, because these companies will buy the current produced. So it is going to be a money-making proposition after all.

Mr. SMOOT. Would the Senator vote for it if that was the case?

Mr. HEFLIN. The sale of power, if necessary, and making fertilizer and making nitrates.

Mr. SMOOT. Making fertilizer! Does the Senator think the Alabama Power Co. is going to make fertilizer? Do not let the Senator deceive himself for a minute.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. I yield.

Mr. McNARY. The Senator from Utah has read into the RECORD some very interesting excerpts from the testimony taken before the Committee on Appropriations, many of which, from his interpretation, show that the Government made a financial error in going into the plant. I should like to place an excerpt in the RECORD, because I think it is perfectly apropos.

Mr. SMOOT. If it is lengthy, I do not wish to have it in my remarks.

Mr. McNARY. I will ask the privilege of placing it in my own remarks.

Mr. SMOOT. Then it is not in my remarks.

Mr. McNARY. Does the Senator say that he does not wish the RECORD to show the whole story?

Mr. SMOOT. The Senator from Utah does not know anything about the length of the statement and does not know upon what subject it deals, but the Senator from Oregon can place it in the RECORD as a part of his own remarks.

Mr. McNARY. I will say to the Senator from Utah that it is a part of the same testimony from which he is reading, and pertains to the subject under discussion, which I suppose he would want the RECORD to show.

Mr. SMOOT. Does the Senator say the matter to which he refers was given in testimony before the Committee on Appropriations?

Mr. McNARY. I say it is from Col. Cooper's testimony, part of which I think the Senator, unintentionally or otherwise, has avoided reading. It is very short and is a part of his testimony in response to questions propounded by the Senator from Utah and the Senator from Washington [Mr. JONES].

Mr. SMOOT. The Senator can read it if he wants to do so now.

Mr. McNARY. Very well. I thank the Senator from Utah.

Mr. SMOOT. If it was given before the Committee on Appropriations, or anywhere else, the Senator may read it.

Mr. McNARY. This is a statement made by Col. Cooper before the Committee on Appropriations, found on page 6 of the printed hearings of Wednesday, January 12, 1921. The question was propounded by the Senator from Washington [Mr. JONES]:

Do you, as representing the Government, think this plant could be maintained and pay the expenses of operating it?

Col. COOPER. Yes; and get a net 5 per cent return without assuming any obligation at all.

Mr. SMOOT. That is just exactly what I have already stated, that Col. Cooper has stated in his testimony that at the end of a 30-year period, taking it as a whole, it would net the Government of the United States 5 per cent.

I do not think the Senator from Oregon wants the Government of the United States to go into any kind of investment, taking the chances necessarily taken here, on the basis of 5 per cent. I continue reading from the hearings:

Senator GRONNA. How long will it take to build the dam for the primary power?

Col. COOPER. I think 36 months yet.

That is, the dam will not be built for three years yet.

Now, another statement I would like to put in the record is this:

This is Col. Cooper continuing:

It is my belief that the construction of this thing by the Government in the manner that I have recommended will save the power consumers in this 60,000 square miles of territory $10,000,000 a year in power bills.

That is the statement that I made quoting from him in my opening remarks. Then he goes on and states about what the cost of the horsepower will be, in conformity with what I have already stated, plus the $12 per horsepower for the distributing part of the power, which is, according to his estimate, $12 for the distribution and $15 for the power developed at the dam, thus making a delivered price or cost of the power of $27.

Mr. WADSWORTH. Does the Senator recollect that the estimates of so-called experts, who figured how much it would cost to put out nitrate from the plant, only put the power in at $5?

Mr. SMOOT. In figuring on the cost of nitrates, in order to show some excuse for asking for the project, they figured in a way they thought would accomplish it, knowing the Government of the United States and the taxpayers would have to pay the deficit.

I continue reading:

Senator JONES of Washington. Looking at this from the national-defense standpoint, do you think that would justify the Government in putting it in now?

Col. COOPER. Oh, no; I do not think so.

I do not believe, if this project had not been started, that it would be possible to secure favorable action in either House. The only possible reason now given for favorable action is that we are going to save what we have already put in the project. My judgment is, and I expect to live to see the day when it will be developed, that it would have been cheaper for the Government of the United States to wash its hands of the whole thing and lose every dollar that it has in there at present rather than to go on to the completion of the plant.

Mr. SUTHERLAND. May I ask the Senator a question?

Mr. SMOOT. Certainly.

Mr. SUTHERLAND. Will the Senator state who Col. Cooper is and what connection he has now or has had with the project? I do not think the Senator has stated that.

Mr. SMOOT. Col. Hugh L. Cooper, I think, is the greatest irrigation engineer there is in the United States. He lives in the State of New York. He has built some of the greatest power plants in the world.

Mr. McNARY. Does not the Senator from Utah mean hydraulic engineer rather than irrigation engineer?

Mr. SMOOT. I think both, I will say to the Senator.

Mr. McNARY. I never heard of him as an irrigation engineer.

Mr. SMOOT. I have a great deal of faith in him. I know that he testified before the Committee on Appropriations that his connection with the Muscle Shoals plant as consulting engineer has virtually ostracised him from all business in that section of the country. He told the committee that he had been asked to map out and develop certain projects in those States that would have meant the expenditure of millions of dollars, and a handsome return to him and his associates, but that under no circumstances will he ever take any business in the seven States which will be served by the power from Muscle Shoals. In the testimony he gives the reason why, which I think shows him to be a man of unbounded integrity and honesty.

I did intend to take up the cost of the nitrate plant far in excess of the estimate, and go through that whole question, but it is not necessary.

I have received a number of telegrams contradicting certain statements made by the Senator from Kentucky [Mr. STANLEY] in his remarks the other day, but I do not even propose to ask that those telegrams shall be placed in the RECORD, although the parties sending the telegrams have requested it.

I can only express the hope that the bill will not be passed. I think it is for the best interests of the Government of the United States that it should fail. I do not believe it is going to bring one penny's worth of benefit to any farmer in the United States. I am fearful that some time in the future we will have to write off a loss to the Government of tens and tens of millions of dollars if the project is continued.

The PRESIDING OFFICER. The bill is still in Committee of the Whole and open to amendment.

Mr. WADSWORTH. Mr. President, I wish to ask a question about one feature of the bill which I think should be changed in order to make the bill consistent in its provisions.

On page 4, line 4, an amendment was adopted providing that not more than two officers of the War Department should be appointed as directors. The Senate has already stricken out the provision of the bill which authorizes War Department officers to be appointed as directors. So I think the amendment to which I have just called attention should be reconsidered and that provision stricken out.

Mr. UNDERWOOD. I do not think there is any objection to that. The amendment agreed to excludes Army officers. If there is a section of the bill which I had overlooked, and which indicates that they can be appointed, I think it would be negative anyhow, but the bill would be in better form if it were stricken out.

The PRESIDING OFFICER. Without objection, the amendment will be reconsidered. There being no objection, it is so ordered.

Mr. WADSWORTH. I ask that the amendment be disagreed to.

The amendment was rejected.

Mr. WADSWORTH. Mr. President, there is one other matter to which I wish to call the attention of the Senator from Alabama, or any other Senator who is interested in this attempt to put the Government into commercial business.

On page 11, commencing in line 11, we find this language:

> The corporation and all of its assets shall be deemed and held to be instrumentalities of the United States and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation.

Bearing that in mind, further down in the same paragraph we find language which reads as follows:

> And the property and moneys belong to said corporation, acquired from the United States, or from others, shall not be deemed to be the property and moneys of the United States, within the meaning of any statutes of the United States.

If the property and the moneys of the corporation are not to be deemed the property of the United States, why should they not be subject to local taxation?

Mr. UNDERWOOD. Of course, the people in the State where the plant is located would prefer to have them subject to local taxation, but I know of no other property which belongs to the United States which is taxed, and I think it would be a rather unwise thing as to property which is owned and controlled and belongs to the Government to subject such property to taxation.

Mr. WADSWORTH. I will discuss the matter for a few moments, for it becomes a very serious question to communities in the United States. When the Government acquires large blocks of property in a community instantly that property is withdrawn from the taxable resources of the community. I have known several such cases, and undoubtedly the Senator from Alabama can recollect them, where common schools have been starved out of existence because the Government has acquired nearly all of the real property in a given neighborhood.

The Government's property can not be taxed, and, therefore, the few remaining property owners can not stand the burden of supporting the school all by themselves. Instances such as that have happened in many communities. It is a very grave question here whether the proponents of the bill desire to starve out in the matter of taxable resourcecs important communities in their States.

Mr. UNDERWOOD. I do not think that would happen in this instance.

Mr. WADSWORTH. Oh, yes; it can happen.

Mr. UNDERWOOD. So far as this property is concerned, it has not been taxed in the past.

Mr. WADSWORTH. It has not?

Mr. UNDERWOOD. No.

Mr. WADSWORTH. At least the real property upon which the plants are located has been taxed in the past.

Mr. UNDERWOOD. Certainly it has. I mean that the Government property has not been taxed. The property that was taxable before was a small quantity of farm land.

Mr. WADSWORTH. Yes; and under this proposed legislation the communities will lose that taxable resource.

Mr. UNDERWOOD. That is a very small item.

Mr. WADSWORTH. It may seem small as compared to the whole United States, but it is very important to the people of the community.

Mr. UNDERWOOD. It comprises a few thousand acres of farm land there, and, of course, is a loss of that much in taxation; but it is not a great amount, figured in tax returns.

Mr. WADSWORTH. Of course, under the terms of the bill other properties may be transferred to the corporation, and then become exempt from any taxation on the ground that they are the property of the United States. Furthermore, under another provision of the bill they are deemed not to be the property of the United States in order to reach some other purpose. It seems to me that the two provisions of the bill are in direct conflict.

Mr. UNDERWOOD. If the Senator from New York wishes to amend the bill so that the property of the corporation shall be deemed to be the property of the United States, I shall have no objection to such an amendment, but I should not be willing to consent to an amendment that would make an exception in this case as to the taxation of Government property, because I think that would be going too far; it would be a change in the entire policy of the Government.

Mr. WADSWORTH. What is the Senator's idea of the meaning of the language which commences on line 18? What is the purpose of that language, which reads—

> and the property and moneys belonging to said corporation, acquired from the United States, or from others, shall not be deemed to be the property and moneys of the United States within the meaning of any statutes of the United States.

What is the object of that? Is it to subject those properties to certain civil procedure in the event of litigation to which they could not otherwise be subjected?

Mr. UNDERWOOD. The Senator from New York knows that I did not prepare the bill, or the language to which he refers, but I will interpret what I think the authors of it meant when they proposed it. They wanted to negative the idea that this was the property of the United States, so that they would have to make return of the profits to the Treasury, and which would require an appropriation to get it out. They wanted the corporation to function on its capital stock without the limitations imposed as to Government property. In other words, if the money earned by the corporation was Government money, then, of course, under the general statutes, it would go into the Treasury, and would not go back to them for the purpose of further operations; but I do not think it is necessary to put that limitation into the bill to enable the corporation to go ahead and use the money, because when it becomes a Government corporation, I think, it will function like any other corporation. That is my idea why the authors of the bill put that language into it. I am not concerned about that particular language, whether it stays in or goes out of the bill; but, as to the proposition of subjecting Government property to taxation by local authorities, I do not think it would be wise to change the general policy of the United States.

Mr. WADSWORTH. It is a grave question, I will admit to the Senator, but when I found that language in juxtaposition to the latter part of the paragraph, I wondered what the meaning of one was as contrasted with the other.

Mr. UNDERWOOD. As I did not prepare the bill, as I have already stated to the Senator, I did not know what the terms of the bill were until after it was introduced by him by request; so I know nothing of the viewpoint of the men who prepared the bill containing the language to which the Senator has referred. I imagine, however, their purpose in using the language was what I have stated to the Senator.

Mr. WADSWORTH. I desire, if I may, to ask the Senator one more question as to the interpretation of the language on page 6, line 16. He will notice subdivision (g) reads:

(g) To purchase, lease, or otherwise acquire United States or foreign patents and processes or the right to use such patents and processes.

Does the Senator think, in view of the amendment that was adopted this morning, that the words "or otherwise acquire" would not include condemnation?

Mr. UNDERWOOD. As I stated to the Senator in the beginning, I had very grave doubt in my mind whether the corporation could exercise the power of condemnation. Of course, the Senator's view differed from mine; but I had no desire in the world for the corporation to exercise the power of condemnation; so I readily agreed to the Senator's viewpoint.

Mr. President, I do not care to delay the Senate for any great length of time in connection with this matter. I listened to the speech made by the senior Senator from Utah [Mr. SMOOT] this morning in reference to the testimony of Col. Cooper. The Senator from Utah read from the testimony of Col. Cooper, and, of course, read the statement correctly; but I think he reflected into the Senate a viewpoint that was entirely different from that which Col. Cooper intended when he appeared before the committee.

Candor requires me to say that when Col. Cooper was asked the question as to whether the great power dam at Muscle Shoals should be used for the manufacture of fertilizer, he said he did not think it ought to be so used. That was Col. Cooper's view; but it is a question for the Congress to determine whether they intend to use the plant for other purposes or for the operation of it to produce fertilizer. Of course, the national defense act, which was an expression of Congress, contemplates its use for the manufacture of powder in time of war and fertilizers in times of peace, and that is the policy of the Government at present as reflected by its statute law.

Col. Cooper's testimony undoubtedly was not in favor of the use for fertilizer purposes of the power developed; but aside from that every word he uttered in his testimony before the subcommittee of the Committee on Appropriations considering the sundry civil appropriation bill was in favor of the development of the project at Muscle Shoals and not the abandonment of it. I am sure the Senator from Utah will agree with me as to that.

Mr. SMOOT. Mr. President, there is no doubt about that. I think if the Senator from Alabama will read Col. Cooper's testimony as I have read it he will find that it demonstrates beyond the question of a doubt that that is his position; but he states that he would not continue the development of the plant for the purpose of national defense or for the purpose of manufacturing fertilizer, just as the Senator from Alabama has stated.

Mr. UNDERWOOD. Undoubtedly. Of course, as to the question of building a great power dam for national defense, Col. Cooper did not explain why he did not think we needed it. He may have thought that we could depend on other sources for nitrogen. So far as I am concerned, I differ with him in that respect. We found in the World War that the other available sources of nitrogen did not protect us in time of war. The initiation of the great nitrate plant at Muscle Shoals was due to the fact that the General Staff woke up one morning and found that they did not have a month's supply on the front line for the entire allied armies, and that they were in doubt as to what Chilean nitrate they could obtain from the western coast of South America. They were confronted by a war emergency. I knew and every other Senator knew that, so long as we were engaged in a war in which we retained control of the sea, so long as the navies of Great Britain, France, Japan, and the United States operated as a unit in one concerted effort, there was no danger of an interrupted sea service between the Chilean nitrate beds and continental United States; but I know also that if in the future we should become involved in war with certain nations, control of the seas might be a very doubtful issue, and that if we could only depend upon the present supplies of nitrogen from the by-product coke ovens and other domestic supplies of that character in a few months we would find ourselves helpless before an enemy. It is difficult for the people of this country to realize, but I have seen the statement made by an Army officer that one division fighting for 30 days in the Argonne consumed more powder and other explosives than were used during the Civil War on both sides. I think that it would be absolute folly for a great Nation like ours not to avail itself not only of the great nitrate plant at Muscle Shoals but of the development of a great water power, which it may command at any time for the purpose of making nitrogen in the event of war. So I do not agree with Col. Cooper in that particular. I do not know on what his opinion is based, but I know that the production of nitrogen from by-product coke ovens is not in any way commensurate with what we use of nitrogen in time of war. If the by-product coke ovens were developed to the last analysis and every ton of pig iron manufactured in the future in the United States were manufactured from coke coming from by-product coke ovens, we would not have a sufficient supply of nitrogen to supply our needs in time of a real war.

I am free to say also that even with this great plant at Muscle Shoals, with a capacity of 120,000 tons of nitrogen per annum running on one day shift, or 240,000 tons operating continuously, and adding to that the supply from the by-product ovens, if you cut off the supply of Chilean nitrates you would not have enough nitrates in this country to continue for 60 days a war on anything like the basis of the European war. But there is this consideration: If we complete this great dam, with a potential horsepower of 550,000 units, we will have the available electricity to defend this country in the event of almost any war, and it is a very much quicker accomplishment to build nitrate plants than it is to dam rivers.

There is no doubt whatever in my mind that as a matter of national defense, regardless of cost, the greatest water power in continental United States should be completed by the Government and controlled by the Government of the United States for the future defense of this country, just as you build your navies and maintain your armies. But we are fortunate in this case in not having to make a sacrifice from the Public Treasury to build this dam—that is, if we are willing to take at par the statements of the greatest engineers of America, and there are none that rank higher in hydraulic engineering than Col. Hugh L. Cooper. He built the Keokuk Dam, and is to-day the vice president of the company that operates it. He has constructed many dams. He represented the Government as a consulting engineer during the war. He originated the plans of this particular dam, and is to-day the consulting engineer, and knows each item involved.

I ask, Mr. President, that when I conclude I may insert in full in the RECORD Col. Cooper's testimony on January 12 before the subcommittee of the Committee on Appropriations.

The VICE PRESIDENT. Without objection, it is so ordered. (See Appendix.)

Mr. UNDERWOOD. Without wearying the Senate with reading all the testimony of Col. Cooper in reference to this dam, I desire to read a few extracts from his testimony, because I do not want this debate to close with any idea that this great engineer has indicated in any way that this dam should not be completed.

On page 4 of his testimony Col. Cooper says, in answer to a question asked by the Senator from Washington [Mr. JONES]:

I think this dam has potentialities in it that are very important to a large portion of the South, but I think it would be a great mistake to assign those potentialities to a Government fertilizer plant. I am one of those who hold the belief that to put the Government of the United States into business is very bad business. I think they ought to stay out of it.

That is what he said in reference to a fertilizer plant.

Mr. SMITH of South Carolina. Mr. President will the Senator permit an interruption?

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from South Carolina?

Mr. UNDERWOOD. I yield.

Mr. SMITH of South Carolina. That was a mere expression of opinion as a citizen, and not as an engineer dealing with the things that he was employed to deal with.

Mr. UNDERWOOD. To be sure; that is why I read it. That was his expression of opinion as a citizen; but when it comes down to his opinion as the Government consulting engineer expressing his expert opinion—and no man has a better one—he says:

There is a tremendous amount of energy behind this dam. I think, perhaps, I can give you a better idea of the amount of this energy by telling you that when this structure is completed the amount of energy that will be created will be about two and one-half times that created at the Keokuk Dam. The Keokuk Dam, up to this date, is one of the biggest in the world, if not the biggest.

Two and a half times the energy created by the Keokuk Dam; and he says that dam on the Mississippi River is one of the largest in the world, if not the largest.

Then, in answer to a question of the Senator from Washington as to the amount of energy developed at the Keokuk Dam, Col. Cooper says:

Two hundred thousand horsepower. I happen to be vice president of the company there, and happened to build that plant.

This plant at Muscle Shoals will have about 550,000 horsepower installed, and usable at about the same rate of use as our 200,000 horsepower at Keokuk.

As I understood the speech of the Senator from Utah [Mr. SMOOT] he indicated that if this dam was built the question of its earning capacity was a doubtful issue; and yet the man whom the senior Senator from Utah says himself he considers the greatest hydraulic engineer of America makes the statement, in comparison of these two waterpower projects, that the Muscle Shoals project will have two and a half times more power, and that the use of the power is available in the same way that it is at Keokuk. He stated that the corporation at the Keokuk Dam was a successful one. On the other hand, the building of this dam by the United States Government has the advantage of a lower rate of interest on the money involved than that which goes into private enterprise, because the Government money is available for less than 5 per cent, and there is no money that is available for private enterprise for less than 6 or 7 per cent; and I have heard it stated that in dam projects, when you count the loss of interest from the time of commencing the building, it has usually averaged about 10 per cent. I say that merely to show that with this dam, with two and a half times as much power, and, according to the engineer, the same capacity for use and service, and with this cheaper money, it ought to be far more profitable than the Keokuk Dam.

I have seen it estimated by many engineers that 80 per cent of the cost of operation of a dam is in the interest on the borrowed money necessary to build it. Some others say it is 50 per cent; but even taking it at the lower rate of 50 per cent, the difference in favor of this dam built by Government money is apparent.

Col. Cooper goes on to say:

I think it would be a great mistake to take this tremendous amount of energy and say at this time, "We will just use it for one thing."

Then he goes on to say:

From careful investigations which I have made I find that the current from this dam can reach a territory of about 60,000 square miles, and that will affect people in seven States. Now, by the time the existing appropriations are exhausted there will be $17,000,000 in this plant, and the real question before the committee, as I take it, is whether they are going to stop at the end of the $17,000,000 and do nothing more or whether they are going to end up the work for three years, or indefinitely.

Then he goes on to say that, according to his estimates, it will take $50,000,000 to complete the dam, from which should be subtracted the $17,000,000 already allocated, which would require on his estimate an additional sum of $33,000,000—not $43,000,000, as stated here. On the other hand, the Government engineers, in estimating the cost of this dam, have estimated that the ultimate cost will be $45,000,000 as a whole; and if you subtract from that amount the $17,000,000 already allocated to the dam, it leaves $28,000,000 additional money needed to complete the dam.

Mr. President, before taking my seat I just want to call the attention of the Senate to another statement of Col. Cooper. In a comparison of the Muscle Shoals Dam and the Keokuk Dam, I asked him this question:

What was the primary and secondary power there developed—

That is, at the Keokuk Dam.

Col. Cooper answered:

One hundred and twenty-five thousand primary power and 75,000 more secondary power, or 200,000 horsepower primary and secondary, representing an investment of $130 per horsepower; but I would say that the secondary investment at Keokuk is not completed; when it is completed our total expense will be in the neighborhood of $150 per horsepower capital account, while in the case of the Muscle Shoals Dam it is less than $100.

Does that statement of Col. Cooper reflect the viewpoint which the Senator from Utah has presented to the Senate, that here is one of the greatest dams in the United States already in existence, and the engineer of it and its vice president say that when that dam is completed entirely the initial cost will represent $150 per horsepower, and yet it is a successful venture; and the completion of the Muscle Shoals Dam will represent a cost of less than $100 per horsepower. Yet the Senator from Utah would have the Senate believe that the Government could not successfully carry on this project and complete it.

Of course, I do not care to go into the question of the completion of the dam at this time, because that is not the issue before the Senate; but I was not willing to let this debate close and leave the impression that the Government would lose money on this project if it carries it out to completion.

APPENDIX.

SUNDRY CIVIL APPROPRIATION BILL, 1922.

UNITED STATES SENATE,
SUBCOMMITTEE ON APPROPRIATIONS,
Washington, D. C., January 12, 1921.

The subcommittee met, pursuant to call, at 10.30 o'clock a. m., in the committee room, Capitol, Senator FRANCIS E. WARREN presiding.

Present: Senators WARREN (chairman), SMOOT, JONES of Washington, CURTIS, GRONNA, OVERMAN, UNDERWOOD, OWEN, and GLASS.

NITRATE PLANT AT MUSCLE SHOALS.

The CHAIRMAN. Gentlemen, we have an amendment to the sundry civil bill, introduced by the Senator from Alabama, Mr. UNDERWOOD, to make an appropriation of $10,000,000 for the nitrate plant at Muscle Shoals; and we have before us Col. Cooper, who will address the committee on this subject.

Senator UNDERWOOD. Mr. Chairman, I thank the committee for giving us this hearing. I do not care to say anything myself now. When Col. Cooper has finished his main testimony I should like to have the privilege of asking him a few questions to bring out some points that I want to demonstrate to the committee about the surroundings there, and I may desire to say a few words myself. I should like to ask Col. Cooper to make his statement along his own lines.

STATEMENT OF COL. HUGH L. COOPER.

Col. COOPER. Mr. Chairman, I do not know that I am correctly informed as to just what I am expected to talk about.

I am the consulting engineer of the Government on the building of this dam at Muscle Shoals. My responsibilities relate to the designing of the work and the carrying of it out, in the sense of seeing that all of the plans and specifications are faithfully executed, the actual construction of the work being done by the United States Government. We report to the Chief of Engineers, and all the work that we do is under his direction.

As far as the nitrate question goes down there, I am not in accord with the views of the Secretary of War or the Chief of Engineers, as I understand it. I do not believe that the plant ought to be for fertilizer.

The CHAIRMAN. You have directed your attention to the line of water power and the amount of power possible to be derived from the dam?

Col. COOPER. Yes; and I thought possibly the first thing that might be of interest would be to give you an idea of what the work is going to look like when it is finished.

Senator JONES of Washington. I should like to get your views on the line you have just suggested before you go into that, with the permission of the chairman.

Col. COOPER. All right.

Senator JONES of Washington. You started to make a statement of your views.

Col. COOPER. Yes; I think this dam has potentialities in it that are very important to a large portion of the South, but I think it would be a great mistake to assign those potentialities to a Government fertilizer plant. I am one of those who hold the belief that to put the Government of the United States into business is very bad business. I think they ought to stay out of it. I think the way to get cheap fertilizer from this plant—that is, eventually to find out if that is the better use than general distribution of the power—is to finish the dam and then put the current up to competition and find out whether the best interests of the public lie along the fertilizer end or the power-distributing end.

There is a tremendous amount of energy behind this dam. I think, perhaps, I can give you a better idea of the amount of this energy by telling you that when this structure is completed the amount of energy that will be created will be about two and one-half times that created at the Keokuk Dam. The Keokuk Dam, up to this date, is one of the biggest in the world, if not the biggest.

Senator JONES of Washington. What is the amount of energy created by the Keokuk Dam?

Col. COOPER. Two hundred thousand horsepower. I happen to be vice president of the company there, and happened to build that plant.

This plant at Muscle Shoals will have about 550,000 horsepower installed and usable at about the same rate of use as our 200,000 horsepower at Keokuk. So that it has a very strong power element in it. I think it would be a great mistake to take this tremendous amount of energy and say at this time, "We will just use it for one thing." I think you should say, "We will create this energy, and when we get it created we will put the whole matter up at auction, so to speak, and we will find out where the greatest good to the greatest number will come from."

Senator JONES of Washington. I thought you were going to state whether or not you thought the Government should put it in; and if so, that you would give the reason for thinking that the Government should put it in.

Col. COOPER. That the Government should build the project?

Senator JONES of Washington. Yes.

Col. COOPER. That is what I am going to do now. From careful investigations which I have made I find that the current from this dam can reach a territory of about 60,000 square miles, and that will affect people in seven States. Now, by the time the existing appropriations are exhausted there will be $17,000,000 in this plant, and the real question before the committee, as I take it, is whether they are going to stop at the end of the $17,000,000 and do nothing more or whether they are going to end up the work for three years, or indefinitely.

Senator JONES of Washington. There is not $17,000,000 spent now?

Col. COOPER. I think about $11,000,000 or $12,000,000.

Senator JONES of Washington. Is the other under contract?

Col. COOPER. No; it is not under contract.

Senator JONES of Washington. We could stop now, could we not?

Col. COOPER. I do not think you could.

Senator JONES of Washington. If we thought that was a wise thing to do?

Col. COOPER. I do not know whether you can call back the appropriation or not. That is for you to say.

Senator JONES of Washington. Of course we can call back an appropriation that is not obligated by contracts.

Senator UNDERWOOD. There are contracts out for some of this machinery?

Col. COOPER. Yes; about $1,300,000 out for machinery.

Senator JONES of Washington. We could stop four or five million dollars.

Senator SMOOT. What do you think this thing could be sold for by the Government to a private concern?

Col. COOPER. I do not believe we would get much of anything for it in the present state of it, because the rate of interest that would have to be applied to the project would be so low that private people would not go into it. I think if you tried to sell it now you would lose $10,000,000.

Senator SMOOT. Out of $11,000,000?

Col. COOPER. No; I do not think you would lose $10,000,000 out of the $11,000,000. I think you could get $3,000,000 out of it.

Senator CURTIS. You might get $2,000,000 out of $11,000,000?

Col. COOPER. Yes; you might not even get that; and when the work would be resumed I do not know, because private capital on a 5 per cent basis will not be found for a long time to come.

Senator SMOOT. It would not have to be on a 5 per cent basis.

Col. COOPER. I do not know that it would, but it would be a low rate on the amount of money that would be required for private capital to go on and finish it.

Senator OVERMAN. How much would it take to complete it?

Col. COOPER. From now?

Senator OVERMAN. Yes.

Col. COOPER. If there are $11,000,000 in it now, it would take $39,000,000 more to complete it.

Senator SMOOT. It would cost $42,000,000 if private parties paid $3,000,000 for it and put in $39,000,000 more?

Col. COOPER. Yes; and I do not think you would find private capital putting up $42,000,000 on that project in 10 years.

Senator SMOOT. Why not?

Col. COOPER. Because in order to sell its current and distribute it over a wide field it has got to have the money at about 5 per cent interest, and when you get through. I think you will find that the real interest of the Government of the United States and the large area of population down there is in the direction of having the Government go ahead and finish this thing.

I have already stated to Senator SMOOT and Senator UNDERWOOD one thing that I would like to state to the full committee, and that is that I have not a dollar's interest in this at all. I am working for the Government of the United States without any profit of any kind.

Senator SMOOT. You get a dollar a year?

Col. COOPER. I get a dollar a year, but I have not got that yet, and my contract for service to the Government is cancelable on either side on 30 days' notice, so that I am not speaking to you at all as a person who has any financial interest, and it would be a great relief to me to have it canceled.

Senator OVERMAN. You say this will furnish power to seven States?

Col. COOPER. Yes.

Senator SMOOT. You do not believe we ought to finish this water power for the purpose of going into the manufacture of fertilizer, do you?

Col. COOPER. I think that would be an awful mistake.

Senator SMOOT. What you think is this: That the Government ought to construct this power dam, finish the same, and lease the power out?

Col. COOPER. That is exactly it.

Senator SMOOT. You think it can be done and bring to the United States a return?

Col. COOPER. I am very sure of that.

Senator SMOOT. That is what your letter said to me.

Col. COOPER. Yes; and that is a practical thing, and it is a thing that I do not think the Government would be taking any chances on at all.

Senator JONES of Washington. Do you, as representing the Government, think this plant could be maintained and pay the expenses of operating it?

Col. COOPER. Yes; and get a net 5 per cent return without assuming any obligation at all.

Senator JONES of Washington. Five per cent on what?

Col. COOPER. On what the job will have cost us when it is finished.

Senator JONES of Washington. On $50,000,000?

Col. COOPER. Yes.

Senator SMOOT. The water power of it?

Senator JONES of Washington. And then let the people who distribute it make a profit?

Col. COOPER. Yes; I have figured the price for the current so low that it would be attractive to many different lines of industry.

Senator SMOOT. I wish they would put our power plants in Utah on such a basis that we could get that rate.

Senator JONES of Washington. If it is such a desirable proposition as that, and would pay the Government 5 per cent, and then pay the private parties a profit, I do not see why private capital would not like to go into it.

Col. COOPER. Because private capital can not go in on a 5 per cent basis. The Government is the only agency that can produce the money for 5 per cent. Private capital is making 8 and 10 per cent on its investments now.

Senator SMOOT. We can not get it now.

Col. COOPER. That is the rate we are figuring.

Senator OVERMAN. You mean that when the Government has completed the dam it can lease its power at such a rate that it will pay the Government 5 per cent?

Col. COOPER. Yes; and pay all the expenses of operation and the upkeep expenses as well.

Senator JONES of Washington. If there should be nobody ready at the time to lease it the Government would have to go on operating it and sustain it.

Col. COOPER. I have got to the point which, I think, is very important and which I touched upon in my letter to Senator SMOOT. That is this: The whole southern territory is at the mercy of this project. A great many different water powers in the South are ready for development at this time, but no private capital will go in there until the policy of the Government with respect to this energy at Muscle Shoals is defined.

Senator JONES of Washington. That is, there are water powers that will serve the territory that would be served by this?

Col. COOPER. No; there are water powers in that territory that could serve that territory in conjunction with this or that could go it alone; but until the price and the policy with respect to this structure are determined, private capital will not go in, because nobody knows what they are going to do.

Senator SMOOT. From your letter I judged that there are a number of industries that are ready to put the power in, but they can not go to work and put it in if the Government is going to construct this project and sell power at a cheaper rate than they can.

Col. COOPER. That is it exactly.

Senator OVERMAN. Is South Carolina included in these seven States?

Col. COOPER. Yes.

Senator OVERMAN. There is great development there.

Senator SMOOT. Water powers can be developed in a great many places.

Senator OVERMAN. I mean the development in North Carolina and in South Carolina.

Col. COOPER. It is only a small corner of South Carolina, but there are 60,000 square miles.

Senator JONES of Washington. If this power was developed, then it would very likely prevent the development of other water powers in the territory covered by this that would be developed if this was not taken up?

Col. COOPER. No; it works just the other way. If this water power is developed, it makes possible a lot of water power in the South, in this same territory, that can not be developed at all otherwise, because this power will furnish a given number of kilowatt hours, which, if put into some storage proposition somewhere else, will create energy at a less price than either one of them can create it alone.

Senator JONES of Washington. For their own use?

Col. COOPER. Yes; for their own use, but when I say their own use, I mean it will be regulated as to price, service, etc.

Senator SMOOT. I think you misunderstood the question of the Senator, because your answer is virtually, as I understood it, and is virtually as you said before, and that is this: That if this is developed, the other private projects that are now under contemplation will not be completed?

Col. COOPER. No; they will not be completed. There will be nothing done in this territory.

Senator JONES of Washington. That is what I understood.

Col. COOPER. I misunderstood you.

Senator JONES of Washington. I thought you stated just the opposite.

Col. COOPER. No.

Senator JONES of Washington. I thought the development of this would lead to the development of the other enterprises.

Col. COOPER. No.

Senator JONES of Washington. And furnish them power which they could use in connection with that.

Col. COOPER. Let me see if I can state exactly what is in my mind.

Senator JONES of Washington. Senator SMOOT has just stated what I had in mind would be the result.

Col. COOPER. That is the situation as I see it: There are a lot of water powers in the South that ought to be developed in the territory that can be served by this plant. None of those powers will be developed until the policy with respect to the Muscle Shoals plant is known, because it might very well happen that a policy would be adopted that would call for the sale of the energy from the Muscle Shoals Dam at cost, for instance, and no private capital would undertake to go into competition with the United States Government in a matter of that kind. Now, supposing that the Government finally decides to go ahead and finish this plant and lease it to private capital. Then this plant will stimulate a great many plants and bring about the construction of a great many plants that would not otherwise be built at all, and at the same time those that could be built independently would also be constructed by private capital.

Senator UNDERWOOD. In other words, the construction of this dam would develop the building of water power throughout that entire territory.

Col. COOPER. Oh, yes; it is really the key to the whole situation.

Senator JONES of Washington. I think it would be, if it is handled in a certain way, but suppose there is nobody to lease this and that conditions are such that when it is built it would not be leased and the Government goes on running it. If the Government runs it without the idea of making a profit, would there be any other development?

Col. COOPER. The answer to that is this, that the South has already a very great need for additional power. There are 10 or 12 distributing companies in the South.

Senator JONES of Washington. In this territory?

Col. COOPER. Yes; in territory that applies here that are anxious to build right now. Some of them have approached me and tried to get me to become their consulting engineer. I have told them I could not serve them now or at any time in the future. If I have got to stay with this thing, I propose to be free from any financial interest in the future, and have told them that even after this plant is built I would not take any business down there, so that I think I am in a position to say that when the plant is built the Government will be in a position, because of the great demand for hydraulic power in that territory, to dictate its own price and will never be at the mercy of these other fellows. Just the minute this thing is finished the Government can say "unless you gentlemen agree to take this energy at these prices that will give us 5 per cent we will turn this thing over to a public instrumentality, financed with public money, that will sell in your own territory theoretically at a very much less price," and with a club like that over them you will not have any trouble at all.

Senator JONES of Washington. The others will be at the mercy of the Government.

Col. COOPER. Yes.

Senator JONES of Washington. Is anybody going to put any money into a proposition like that?

Col. COOPER. If the deal is made on a perfectly fair basis, there is always a fair way to do these things.

Senator JONES of Washington. Has it been your experience that the Government ever did these things on what you call a fair basis?

Col. COOPER. No; I do not think so.

Senator SMOOT. Then this is a project to encourage the development of industries by giving them cheap power?

Col. COOPER. Yes; and this Government can control the cheap power, and in doing so the territory can be developed, and, in my judgment, you can safely count on getting a net 5 per cent interest.

Senator OVERMAN. When it is completed and the power furnished, what is the trouble about furnishing the chemicals necessary for fertilizer?

Col. COOPER. There is no trouble about it at all; but I would not decide now which was the best way to use this energy. It is too far away. Suppose, for instance, that you decided to say that you were going to do something along the chemical lines. This plant will not be finished for three years. At the end of three years there might be a great deal better chemical use than you have to-day. I do not believe in selling anything until you have got something to sell.

Senator JONES of Washington. In your judgment, what is the use that justifies the Government in putting in that plant, aside from the money that it now has in it?

Col. COOPER. I do not think there is anything, except that it would be a great benefit to the people all over the South. It would be of tremendous benefit to the people of the South.

Senator UNDERWOOD. May I ask Col. Cooper a question right there?

The CHAIRMAN. Yes.

Senator UNDERWOOD. Of course, this improves the navigation of that river?

Col. COOPER. Yes.

Senator UNDERWOOD. And that is included in your estimate of cost?

Col. COOPER. Yes.

Senator SMOOT. You would not spend all that money for the little navigation you would have there?

Col. COOPER. No.

Senator UNDERWOOD. But if this were completed and the Government received the 5 per cent on its money, which is more than it pays for the use of the money, it would have furnished the improved navigation of that river without cost to the Government.

Col. COOPER. Yes; you can get that.

Senator UNDERWOOD. Do you not regard that a great power of this kind is a reserve war power of the Government that could be used in time of war if another emergency faced the counry like the one in 1917?

Col. COOPER. Yes, I think so; but I think you can always commandeer these powers.

Senator UNDERWOOD. It is true; but to commandeer would cost more money than if we owned it and had our own control?

Col. COOPER. Yes.

Senator UNDERWOOD. And I assume that this power at the dam could be sold by the Government, if it wanted to do it in that way, under a contract that would give the Government the right to take it back in time of war.

Col. COOPER. Yes; absolutely. That would not interfere with the 5 per cent at all.

Senator UNDERWOOD. So that the Government interests outside of what might be developed in that country would be that you have a great reserve power of electricity in time of war, and you make a navigable river without cost to the Government?

Col. COOPER. Yes.

Senator JONES of Washington. In that connection, is it not the expectation that under the water power act we will have water-power development all over the country that will be available in case of war for use for various purposes?

Col. COOPER. I think so; I would not say, however, of this magnitude.

Senator JONES of Washington. Not as large as this?

Col. COOPER. No.

Senator SMOOT. Even if this were in private hands, the Government of the United States could commandeer it if it wanted to?

Col. COOPER. Yes.

Senator SMOOT. And if it does not appear that the expense is greater than it is at many industries that the Government has commandeered it would be cheaper for the Government to do that than it would be to own it.

Senator UNDERWOOD. Let me ask a question there. How much of the initial cost that is chargeable to a plant in its operation is due to the interest on the money invested and how much to working cost?

Col. COOPER. I think it is about half and half, when you get all through. I have figured that the energy would be sold to produce a gross income of 10 per cent of the cost of the plant, of which 5 per cent would be absorbed by depreciation and upkeep and operation and taxes, etc., and the other 5 per cent would go to the Government.

The CHAIRMAN. I understand your argument so far as in the line of production of water power, etc. What would be your estimate if we had not commenced this at all? How would you figure on it? In the conclusions which you have reached are you figuring that we have already spent a large amount of money, and having expended that, are you figuring more upon the difference between what has been expended and what is to be expended than upon the cost of the whole? I should like to have you explain that a little.

Col. COOPER. All right. On the basis that the Government had not done anything to this plant, I do not believe that any man at this table would ever see the time when private capital would undertake this project.

The CHAIRMAN. It is the money already spent that you think makes it desirable now?

Col. COOPER. Yes; and I think also that at any time in the future that this great power was made available, it would have to be made available by Government money.

Senator SMOOT. Why so? For instance, take some of the water-power plants out West that have been carrying power from Idaho clear to Utah—from the northern part of Idaho to the southern part of Utah, 400 miles. The expenditure on it is very small compared to this. I do not see why private capital would not develop that power there if there is a demand for it.

Col. COOPER. Your "if" is very important. We figure that it will take 10 years to market this power, and I have figured interest during the interim; but the price that we are figuring here is so much lower than the price you get out in Utah that I do not think the thing is quite comparable.

Senator SMOOT. The proposition then is for the Government to give the people of the South cheap power?

Col. COOPER. Yes; and I think that it will give that.

Senator SMOOT. And the people of the West can get their own money and put it in, and pay any price they want to for their power?

Col. COOPER. That is the situation as I see it; that this is a project that can not be developed by private money.

Senator UNDERWOOD. Let me ask you a question. I do not want to interrupt you.

Col. COOPER. Go ahead.

Senator UNDERWOOD. But if private persons desire to develop this dam they would have to pay a good deal more in the way of interest for their money than the Government pays for interest on its money?

Col. COOPER. Yes.

Senator UNDERWOOD. Would not that cut a good deal of a figure?

Col. COOPER. That is the whole thing, the controlling thing.

Senator SMOOT. Then the Government should go into everything. The Government of the United States could borrow money cheaper, and therefore ought to go into everything.

Senator UNDERWOOD. The Government is in this, and the question is whether it should continue it. And I want Col. Cooper to explain why he thinks the Government should do this, rather than private capital.

Col. COOPER. If it were put on the basis of raising this money from private capital the amount the job would finally cost would be prohibitive, when you come to figure the cost of the energy. By the time you distributed it it would not be a profitable investment.

Senator JONES of Washington. Our usual experience is that Government estimates are always exceeded very largely in carrying out work.

Col. COOPER. Yes.

Senator JONES of Washington. What do you think is likely to be the result in this case? Will this $50,000,000 estimate take that into account, or is it likely to be $100,000,000 instead of $50,000,000?

Col. COOPER. It is utterly impossible for it to be $100,000,000. My contract with the Government does not make me responsible for the cost of the work.

Senator JONES of Washington. You know the way the Government carries on work?

Col. COOPER. Yes; I know; and they are carrying on this work. The Goverament estimates of the cost of this work is $45,000,000.

Senator JONES of Washington. That is the Government estimate?

Col. COOPER. Yes; and my estimate is $50,000,000.

Senator JONES of Washington. I thought you were the consulting engineer of the Government.

Col. COOPER. Yes; but I have nothing to do with the cost estimates.

Senator JONES of Washington. You have not?

Col. COOPER. No, sir.

Senator JONES of Washington. You think it will not run to $75,000,000 or $100,000,000?

Col. COOPER. No, sir. It is impossible for it to do that.

Senator SMOOT. Take the reclamation projects of the West. I do not believe there is a single one of them where the actual cost has not doubled the estimates of the Government, and in some cases the project has cost two and one-half times the estimate.

Col. COOPER. I am very glad you have brought up that subject, because I think perhaps I can tell you some things that I personally know that will lay that ghost.

Senator JONES of Washington. It is not a ghost so far as the reclamation proposition is concerned.

Col. COOPER. It is a ghost—not the Government paying high prices, but this question of the cost of a piece of work that is not finished. The $45,000,000 estimate of the Government is based upon unit costs that have already been developed on the job. They are not estimates at all. They are based upon fixed plans from which we know absolutely what the cubature is, and that number of yards have been multiplied by costs that have already been demonstrated by the Army engineers, and we had access to those things, and are quite sure they are correct; and as far as the machinery goes, the estimates of the engineers are based upon prices that have already been made, so that there is practically no risk on the amount you talk about in this job at this time. The drawings are completed. The drawings that I show you—I mean to say the designs are completed all the way through. This drawing I show you is made from mechanical drawings, and the question of the foundations have been so thoroughly proved out that I do not believe it is possible that there can be any such overrun as you speak of. It is not possible for it to be there.

Senator SMOOT. I have a great deal of confidence in your judgment as an engineer, as no doubt you are aware, and perhaps in this case the estimates are based upon a little better knowledge than were the estimates on every reclamation project that we have had in the United States.

Col. COOPER. You see we know what these foundations are.

Senator SMOOT. If they are not based on better knowledge, then the $45,000,000 might run over $100,000,000.

Col. COOPER. We know what these foundations are all the way across. I have here a panoramic view, not very well prepared, but it is the best one we have. Here is the south shore. Here is the cofferdam. Here is the water, coming through here, and all the foundations from this point to that point are absolutely known. In other words, we know now what 95 per cent of those foundations are, and it is in a laminated limestone country, where it can not possibly change in this upper part.

Senator SMOOT. Take one of the reclamation projects in Utah. It was a proposition of cutting a tunnel through a mountain for about 2 miles. The estimates upon that were based upon the drilling, which turned out to be absolutely correct. They had no trouble whatever about that. They knew just exactly what they had to meet; and yet the cost was two and a half times more than the estimates.

Col. COOPER. That was in the unit prices going along with the estimates; but here we are figuring on absolutely demonstrated unit prices.

The CHAIRMAN. Are you figuring the cost upon what you may expect may be the cost of materials and labor, or on what the actual cost of material and labor have been for the last year or two?

Col. COOPER. We are figuring on the existing cost of material and labor. I am glad you brought up that question, Senator WARREN, because I know the engineers are figuring on existing costs, and they are gradually and sensibly being reduced from day to day.

The CHAIRMAN. But they have not reached the bottom by any means?

Col. COOPER. No.

The CHAIRMAN. The Senator from Utah has stated that the costs of reclamation projects have run up. Unfortunately for the Government, those estimates were made at very much lower prices than the rates of material and labor, even before the war.

Col. COOPER. Yes.

The CHAIRMAN. Of course, that carried them up to a certain point; and the ones that were estimated later seem to have been unfortunate also.

Senator SMOOT. On the project out at Strawberry they asked for bids to do that work, and on receiving the bids they thought they were too high, and then the Government went on and did the work itself, and it cost two and a half times more than the bids were.

Senator JONES of Washington. Has it not always been true, as a general proposition under normal conditions, that the cost of Government work exceeded the estimates?

Col. COOPER. Yes.

Senator JONES of Washington. For public buildings and all that sort of thing?

Col. COOPER. Yes. The Panama Canal was originally estimated to cost $140,000,000, and it actually cost $310,000,000 for the same items. Those facts do not apply to this case, because this is not an estimate of something in the future.

Senator JONES of Washington. But is it not inherent—almost necessarily—in the Government doing things like that?

Col. COOPER. Yes, it is; but it often happens very largely even in private practice.

Senator JONES of Washington. Yes, I know; but is not that generally true of the Government—the kind of men you get in charge of the work and the legislative restrictions that are about them—that they can not deal with the work as they would if it were their own?

Col. COOPER. That is all true; but in this case the Government agency is already selected and installed and has produced the unit costs, which I have checked up, and that collectively brings it up to about the $45,000,000 estimate. Now, I have added for my own personal thought in the matter another $5,000,000, and I think it will cost $50,000,000.

Senator JONES of Washington. What is the Government agency you speak of as already installed?

Col. COOPER. The Corps of Engineers.

Senator JONES of Washington. That is a changing body.

Col. COOPER. That can not change while this job is on.

Senator JONES of Washington. Will the same men be on this work doing this job?

Col. COOPER. I think so. It can be fixed so that the same man will be.

Senator UNDERWOOD. Col. Cooper, the estimates were based on existing war prices for labor and material?

Col. COOPER. Yes.

Senator UNDERWOOD. If there is a reduction in the war prices as this work goes on it will have a tendency to reduce the cost, will it not?

Col. COOPER. Yes; but that question came up yesterday in a conference with the Chief of Engineers and Gen. Taylor, and I told them that in my 27 years' experience I never liked to talk about reducing costs until the work was over.

Senator SMOOT. Particularly when the Government did the work I would not guarantee, for $10,000,000, that it would be done for this amount.

Senator UNDERWOOD. Are they not buying cement at much lower figures than those on which the estimates were based?

Col. COOPER. At least $1.50 a yard, and no account of that has been taken in this estimate at all.

Senator UNDERWOOD. That would make a considerable reduction in the cost itself.

Col. COOPER. It would make only $2,000,000 difference. I do not believe that the committee would be justified in taking an adverse view of this project with any idea that it would cost any less than $50,000,000. I am quite confident that that would be a mistake. There has been too much work done, and there is too much of specific accomplishment behind it, to permit of any such adverse idea as that.

On the question of estimates, I should like to say that I understand that over in the House somebody said my estimates at Keokuk overran 75 per cent, or something like that. For the information of the committee and as a matter of record, I should like to say that the estimated cost per hour power at Keokuk came out within 1¼ per cent of the actual cost.

The CHAIRMAN. Has this work proceeded to a point where you can reckon the percentage of completion as they do on such projects as public buildings?

Col. COOPER. Yes, it has; and I think the percentage of work done is the same percentage that the amount expended up to date is of the total estimate.

Senator SMOOT. Which estimate; the last estimate or the first?

Col. COOPER. The last estimate.

Senator SMOOT. The first one was ridiculous. That was in order to get the first appropriation and get it started.

The CHAIRMAN. The reason I asked that question was because I supposed that in the initial proceedings the percentage of completion would be at a higher cost?

Col. COOPER. Yes; but in the estimates, Senator, the prefatory work that has already been done has been distributed over the total.

Senator OVERMAN. You have stated that you would not advise the expenditure of this money for the purpose of furnishing fertilizer to the whole country and nitrogen in time of war, but your argument is to finish it for the purpose of furnishing power to seven Southern States. The argument on the floor has been that we want fertilizer for the whole country, for all the factories of the whole country. How do you explain that?

Col. COOPER. I am not a fertilizer expert, but just a plain, ordinary business man, and I want to say this, that I would not commit myself to fertilizers or to power or anything else at this time. I would wait until I was approximately ready to do business with somebody and then I would find out what is the best interest of the South. As I take it this is distinctly a southern proposition, and a great many people of the United States are vitally interested in what this power can do, and two years from now, or two years and a half from now, when we are approaching the time when a definite policy ought to be formed, then let the Government find out by competition—I believe in competition—whether it is the best thing to do to go into the fertilizer business or to go into the general power-distributing business. I do not think this is the right time to fix exactly what they are going to do with something that is not ready to function for three years or more.

Senator SMOOT. You do not think that the Government will ever make a success of going into the fertilizer business, do you?

Col. COOPER. I am very much opposed to it. I think it would be a great mistake. I do not think any future condition could ever arise that would ever justify the Government of the United States in embarking in the fertilizer business or any other business.

Senator UNDERWOOD. The main point I want to bring out, and I think you have already stated it, is this: Your investigations assure you, as far as an engineer can know and be sure of anything, that this dam can be built within an initial cost of $50,000,000?

Col. COOPER. I think that is correct.

Senator UNDERWOOD. And that includes all the machinery for the manufacture of the electricity?

Col. COOPER. Yes.

Senator UNDERWOOD. And with that machinery installed, and within the $50,000,000, at what rate could the Government sell the electricity at the dam and pay the Government 5 per cent on its $50,000,000? I am not talking about the distributing wires, but I mean to sell it at cost at the dam. What would the Government sell it at per horsepower?

Senator SMOOT. That is, you mean with the private interests running their own transmission line?

Senator UNDERWOOD. That is not the question. I am talking about what it would cost the Government to sell the current at the plant, either to the Government itself for its own agricultural work, or powder plant, or to private persons; I want to know for what it could sell that power at the dam, basing the cost on the $50,000,000, and charging 5 per cent interest on the cost at the dam. What could the power be sold for without loss to the Government, including in that the operation of the dam and the locks?

Senator SMOOT. How much per horsepower per year?

Senator UNDERWOOD. How much per horsepower per year?

Col. COOPER. That is probably as important and practical a question as could be asked. The answer to it is rather difficult, because you would have to know what the rate of use per day of the power would be before you could make a definite answer to the Senator's question. People do not understand what the load factor is in this sort of thing; the difficulty in figuring the power price, especially when a dam has storage behind it, such as this one has, is the fact that the rate of the use of the power each day is not the same each hour. For instance, I think in this particular territory the average use of this power would be around 12 hours a day, which would be half the day, or a 50 per cent load factor. Fortunately, because we have this big pool behind us, you can accommodate the output to whatever load factor comes along in the future. Now, if we figure on a 50 per cent load factor—in other words, taking a cotton factory, such as the South is supposed to be full of, their average rate of use is 12 hours a day. Such a factory would have to pay for guaranteed power, in order to take care of the 5 per cent interest, not exceeding $15 per horsepower.

Senator SMOOT. Then if it runs only eight hours per day, it would be a third more, which is $20.

Col. COOPER. No; if it is eight hours, the kilowatt-hour price would go down with it.

Senator SMOOT. No.

Col. COOPER. Yes.

Senator SMOOT. It would go the other way.

Col. COOPER. No; not at all. If they only use it eight hours, the four hours that they did not use it would be sold to somebody else.

Senator SMOOT. You do not know whether you could do that.

Col. COOPER. If one fellow was doing it, the other fellow would be doing it, by the same economic law.

Senator SMOOT. Suppose there was a law that you could not work the employees in those mills more than eight hours?

Col. COOPER. They would then only pay for the eight hours. You see you could use three 1,000-horsepower units for eight hours or one 1,000-horsepower unit for 24 hours. That is the advantage of having a dam with storage.

Senator SMOOT. Yes; but on your theory the machinery and everything is there for the full time, and it seems to me that the less hours you run the higher the cost will be, unless you have somebody to take the power right up and go on with it and use the other four hours or eight hours.

Senator UNDERWOOD. I am assuming, as a basis of my question, that this power could be sold.

Col. COOPER. Yes.

Senator UNDERWOOD. To make it clearer, as soon as the dam can run on a 10 or 12 hour basis a day for 310 days a year, which excludes Sundays, what could the Government sell the power for at the dam without losing money, assuming that it found a consumer, where you were running on an estimate of a 10-hour day or a 12-hour day, whichever you think it wise?

Col. COOPER. I think a conservative point is 12 hours, and that would be at $15 a horsepower.

Senator UNDERWOOD. It can sell it at that and pay 5 per cent interest?

Col. COOPER. Yes.

Senator UNDERWOOD. Is that high or cheap power?

Col. COOPER. It is cheap.

Senator SMOOT. Very cheap. In fact, if you could get horsepower at $15 you could redeem the deserts of the West.

The CHAIRMAN. Is the nature of the construction such that you have got to practically complete the project before you can deliver power at all, or can you, with partial completion, commence to deliver power?

Col. COOPER. By the expenditure of $43,000,000 you can make available 25 per cent of the capacity of the plant.

Senator SMOOT. An expenditure of $3,000,000.

Col. COOPER. Yes.

Senator UNDERWOOD. You mean a total of $43,000,000?

Col. COOPER. Yes.

Senator UNDERWOOD. But with the $7,000,000 you can make it all available?

Col. COOPER. Yes.

Senator UNDERWOOD. Because all you would have to install with the other $7,000,000 would be the machinery to consume all the power?

Col. COOPER. Yes.

The CHAIRMAN. I am to understand, then, that it takes $43,000,000 before it is practicable to deliver power?

Col. COOPER. Yes.

The CHAIRMAN. Does this project have in contemplation secondary power—steam power?

Col. COOPER. The contemplation is to use all of the secondary power that can be possibly used, and I have figured, as I have already stated, that it would take 10 years to market the primary and secondary power.

Secretary BAKER. I think your question probably did not have in mind the fact that there is already there one of the most perfect steam plants in the world, in its economies, and a very large one. It is there, ready to be used.

The CHAIRMAN. But not for the sale of power?

Secretary BAKER. It is there and could be used.

The CHAIRMAN. When you speak of primary and secondary power, please explain that a little.

Col. COOPER. Primary power is the power that is available all the year around, because there is sufficient water to turn the turbines all the year around. Secondary power is power that is not available all the year around, because of a shortage of water—a greater or less amount.

The CHAIRMAN. In other words, when your load is not up to the maximum you can turn it in part to another use?

Col. COOPER. Yes, it could be used for that; but, on the other hand, supposing you do not have a nitrogen fixation in this at all. All the public utilities in the South have got steam plants that could fill in and make up the shortage of water, and make this secondary power into continuous power.

The CHAIRMAN. You are speaking of the plants now in existence, running by steam power?

Col. COOPER. Yes; so that the Government is protected in either direction which it desires to take. If they want to go into the thing on the basis of Government manufacture of fertilizer, they have got

their steam plant on that. If they want to go into power distribution to public utilities, the public utilities have got the steam power in reserve.

Senator OVERMAN. Speaking of this secondary power, have you estimated for the building of storage dams and reservoirs?

Col. COOPER. There are no storage dams possible that would have any practical value to increase the amount of primary power. It might be done 50 years from now, but even then it would be a very small amount.

Senator UNDERWOOD. Colonel, will you explain to the committee the size and length of the dam, its height, and the amount of storage basin, so that they can visualize it?

Senator JONES of Washington. Before he goes into that let me ask him a question.

Senator UNDERWOOD. Certainly.

Senator JONES of Washington. As I understand, Col. Cooper, that when the Government gets this dam completed and the necessary things for the development of power are installed, it will not proceed any further?

Col. COOPER. No further. It will not have to proceed any further.

Senator JONES of Washington. What agency do you think will take it over? It would have to be taken over by one agency, would it?

Col. COOPER. Yes. I think that agency will probably be the five or six or seven public utilities of the South operating under the direction of the Federal Power Commission.

Senator JONES of Washington. Are those public utility companies in existence now?

Col. COOPER. They are.

Senator JONES of Washington. Where and what are they?

Col. COOPER. Birmingham, and the Alabama Power Co., the Southern Power Co., and the York, Pa., interests—a great many of them.

Senator JONES of Washington. You think they would get together and form one company?

Col. COOPER. A distributing company that would get its rate of existence specified and the cost of selling the power specified in the lease that the Federal Government would execute for the use of this energy.

Senator JONES of Washington. Suppose such an agency as that should not be formed and could not get together. Then the Government would have to maintain it and establish distributing systems and everything else.

Col. COOPER. The supposition that they would not proceed in that line is an economic mistake, because it is to their own interests to do it.

Senator SMOOT. They will do it all right.

Col. COOPER. Oh, absolutely; they will do it, and they are going to do it now.

Senator JONES of Washington. Build a plant?

Col. COOPER. No; but they are wanting to form an association to handle this current under this superpower commission that the Government is back of. This is a good thing. There is nothing in this project, as I see it to-day, that is not a very worthy use of public money. I do not think there is anything about it that can be criticized, if you will just stick to the power end of it.

Senator UNDERWOOD. Will you explain to the committee the size of this dam. I want to get it into the record. I think the committee probably understand it, but I would like to have the record show the size of the dam and lake and the physical properties there.

Senator SMOOT. And the maximum horsepower that can be developed.

Col. COOPER. I have so many of these plants on hand that I have to make a little calculation; but I will say this, with respect to the maximum horsepower that can be developed—and this is very important, because we have got back to the question asked by Senator JONES and other Senators with respect to the reliability of the estimate—we have made an independent test of the quantity of water that passes this point, covering the last 20 years. No engineer or anybody else can tell how much it is going to rain in the future; but based upon the average of 20 years, and a check-up which we have made that is absolutely independent of the work of everybody else, I would like to have the statement go into the record that in my opinion this plant should be developed for 550,000 horsepower.

Senator SMOOT. Has the Geological Survey taken measurements during those 20 years?

Col. COOPER. Yes; many measurements, and the Army have made many measurements, and we have made 45 measurements.

Senator SMOOT. And all of them practically agree?

Col. COOPER. They agree surprisingly well. I do not remember whether there was even 1 per cent of difference. It is on those measurements that I base the statement as to 550,000 horsepower.

Senator SMOOT. How much of that is primary and how much secondary?

Col. COOPER. One hundred thousand is primary and 450,000 secondary; and 100,000 primary power will produce for commercial use 700,000,000 kilowatt-hours per annum. The amount of kilowatt-hours that will come of a secondary power character will be 1,470,000,000 kilowatt-hours. I think you ought to know that that means 6,500,000 tons of coal per annum saved in that district.

Senator SMOOT. When used.

Col. COOPER. When used. I have figured that it will take 10 years to get it into commission. This is not a promoter's estimate. I have taken the adverse view and the overconservative view of it altogether.

The CHAIRMAN. In a project of this size, with the amount of primary power which you have, do you consider it good business in the first instance to go on with the development of secondary power as well?

Col. COOPER. That question is answered in this way: We only put in the work for low water at this time. The $7,000,000 is to be put in as and when needed and at the rate that it is needed, so that there is very little of the money required for the secondary power that goes in in the first instance.

The CHAIRMAN. That is, you get the secondary power for a small additional expense?

Col. COOPER. Yes; and the sale price I have figured for the secondary power is only 30 per cent of the primary-power rate. Senator SMOOT will agree with me that it is a very low price.

Senator SMOOT. A very fair price, comparatively.

Senator JONES of Washington. Does it cost $43,000,000 to make available 100,000 primary horsepower?

Col. COOPER. Yes.

Senator UNDERWOOD. It would make the other 450,000 secondary horsepower available for an additional expense of $7,000,000 when it was needed?

Col. COOPER. Yes; as and when needed; and it would take 10 years to do that.

Senator SMOOT. That will not give you the additional machinery necessary as well as the building of the dam to hold that much more water, will it?

Col. COOPER. The dam is completed in the first instance.

Senator SMOOT. For all the secondary power?

Col. COOPER. Yes. The dam and all the navigation facilities are all completed for the first $43,000,000.

Senator SMOOT. It would take at least $7,000,000 to put in the machinery?

Col. COOPER. The $7,000,000 covers the cost of the secondary installation.

Senator GRONNA. How long will it take to build the dam for the primary power?

Col. COOPER. I think 36 months yet.

Now, another statement I would like to put in the record is this: It is my belief that the construction of this thing by the Government in the manner that I have recommended will save the power consumers in this 60,000 square miles of territory $10,000,000 a year in power bills. Now, I would say this, that when you get ready to do real business, and decide what you ought to do to this, if you can find a use for this vast amount of energy that will be more profitable than is represented by the saving of the $10,000,000, then I would say go to the other thing; but I would find out, just as you would with private capital, and I would find out the best trade I could make with this thing—and you are in no trading position now.

Senator SMOOT. Can you estimate what it will cost per horsepower per year for the distribution lines from the dam to the place where the power should be used, meaning by that the average; because, of course, those which were close by would not cost as much, and those farther away would cost more. But take an average distance for the seven Southern States, and what would the distribution lines add to the $15 a year per horsepower for the power created at the dam?

Col. COOPER. I think about $12.

Senator SMOOT. Making an average of $27 per horsepower.

Col. COOPER. Yes; which is a good deal less than half the cost by steam.

Senator SMOOT. Yes; I am quite sure it would be.

Col. COOPER. Yes; you can not possibly lose anything.

Senator JONES of Washington. You said that it might be contemplated to furnish this power for certain industries, but after we got it ready for distribution we might find a more attractive proposition presented by other industries and attempt to divert it to that use. What situation do you believe would then arise? Do you not think that you would find these different conflicting interests appealing to their Senators and Representatives to prevent diversion to this other use and all that sort of thing?

Col. COOPER. Of course, I will never be a Senator or public official, but if I were either one I would tell those fellows that I would use my own judgment and they could do what they pleased.

Senator JONES of Washington. I was just asking whether that would not be the result.

Senator SMOOT. You would not get very many votes if you did that.

Senator JONES of Washington. That would cause a whole lot of trouble and would be likely to interfere with the efficiency of the plant.

Col. COOPER. No; I do not think so. You can not change the efficiency of this masonry.

Senator JONES of Washington. Not of the masonry, but you just suggested that you could make $10,000,000 using this in a certain way, and yet some other avenue might open up wherein you could make $15,000,000 a year. If so the chances are you would not go into the $15,000,000 proposition.

Col. COOPER. Yes; I would.

Senator JONES of Washington. You can not run the Government in that way.

Col. COOPER. I think we should carry on all work on the basis of creating the greatest good for the greatest numbers; and if at the end of this thing I found the best I could do as a power proposition for the people of that district was $10,000,000 a year, and I found I could make a benefit of $15,000,000 a year for the people thereby using it along certain lines, along chemical lines, or if that benefit of $15,000,000 related not only to the people there but all over the United States, I would put it into the $15,000,000 proposition.

Senator SMOOT. You would if you owned it or controlled it.

Col. COOPER. I do not see why the Government does not control it.

Senator SMOOT. Oh, well, that is a different proposition.

Senator GRONNA. Are you speaking of the gross or the net profit?

Col. COOPER. The net profit.

Senator GRONNA. So that if the Government invests $50,000,000 in the Muscle Shoals Dam there is a possibility of making $10,000,000 a year profit?

Col. COOPER. To the people down there.

Senator SMOOT. Not to the Government, but to the users of the power in the seven States.

Senator CURTIS. The saving to them.

Col. COOPER. Yes; and at the same time the Government gets 5 per cent interest on the money it has put in. That is the expression of my best judgment.

Senator GRONNA. That the Government would get 5 per cent?

Col. COOPER. Yes; and the people save $10,000,000 in their power bills.

Senator SMOOT. That it would be an average of 5 per cent.

Col. COOPER. Yes.

Senator SMOOT. Not for the first 5 or 10 years.

Col. COOPER. No; that it would average 5 per cent over the time of the lease, that the Government would get its full 5 per cent.

Senator UNDERWOOD. Then the Government would get 5 per cent on its money?

Col. COOPER. Yes.

Senator JONES of Washington. Looking at this from the national defense standpoint, do you think that would justify the Government in putting it in now?

Col. COOPER. Oh, no; I do not think so.

The CHAIRMAN. Col. Cooper, if I understand you correctly, it would not be the purpose to keep this steam power in use for the manufacture of fertilizer or nitrogen, and so on. You would not like to use the secondary power or steam for that?

Col. COOPER. No; I have tried to present this thing to the committee on the basis of what the worst thing is that you can do; that is, the poorest showing you can make, and the one I am talking about would be where the steam plant of the Government would not be called into requisition, at all, that the steam reserves would be supplied by the

power companies. I have put it on that basis, because it is a basis that I know something about. The fertilizer business I do not know anything about.

The CHAIRMAN. The steam power is there to a large extent already?

Col. COOPER. Yes.

The CHAIRMAN. And the cost of the upkeep is considerable of course, whether used or not used?

Col. COOPER. Yes.

The CHAIRMAN. And your idea is that it would be perhaps some years before it would reach the place where it would be used.

Col. COOPER. Yes; I think so. But if you went before these public utility companies I think you would find that the same trade that leased this hydroelectric energy would take into account the taking care of the steam plant, which is a small amount.

The CHAIRMAN. In other words, that would be behind it as a guaranty or insurance.

Col. COOPER. Yes; I think the two would work very well together, and I think the Government is in a position to guarantee itself against loss and in a position to create very wide benefits by a great number of people.

Senator UNDERWOOD. What is the length of that Muscle Shoals Dam?

Col. COOPER. About a mile.

Senator UNDERWOOD. What is the height?

Col. COOPER. It lifts the water 92 feet.

Senator UNDERWOOD. What is the storage basin behind it?

Col. COOPER. It is about 20 square miles, but we have never figured that the storage basin behind it had any value except for daily peak-power requirements.

Senator UNDERWOOD. But there is a very large storage basin behind it?

Col. COOPER. Yes; a very considerable basin behind it, but we do not estimate that of any value.

Senator UNDERWOOD. Now, as a matter of comparison as showing the availability of this power, you built the so-called Keokuk Dam on the Mississippi River?

Col. COOPER. Yes.

Senator UNDERWOOD. You are one of the officers of that company now?

Col. COOPER. Vice president.

Senator UNDERWOOD. What was the cost of that dam?

Col. COOPER. About $26,000,000.

Senator UNDERWOOD. What was the primary and secondary power there developed?

Col. COOPER. One hundred and twenty-five thousand primary power and 75,000 more secondary power, or 200,000 horsepower, primary and secondary, representing an investment of $130 per horsepower; but I would say that the secondary investment at Keokuk is not completed; when it is completed our total expense will be in the neighborhood of $150 per horsepower, capital account, while in the case of the Muscle Shoals Dam it is less than $100.

Senator SMOOT. In this project it is 100,000 primary horsepower and with the Keokuk project it was 125,000 horsepower?

Col. COOPER. Yes.

Senator UNDERWOOD. This dam will be at least twice as great in its capacity to produce kilowatts as the Keokuk Dam?

Col. COOPER. Two and a half times.

Senator UNDERWOOD. And it will cost at least a third less per horsepower?

Col. COOPER. Yes, sir.

Senator UNDERWOOD. What is the average rate of interest that the Keokuk Dam is able to make on the capital invested?

Col. COOPER. We are not earning on a basis that will tell us that story yet. Up to date we are earning about 6 per cent.

Senator UNDERWOOD. What is the Keokuk power selling for?

Col. COOPER. About $23, on the same basis that we are using here—$23 to $24.

Senator SMOOT. At the dam?

Col. COOPER. No; at the dam it is about $19.

Senator SMOOT. As against $15?

Col. COOPER. As against $15. This is really a cheaper proposition and a better hydraulic proposition than the Keokuk Dam. I have looked at it many hours, and compared the two one with the other, and I am thoroughly satisfied as to that.

Senator OVERMAN. Where is the Keokuk Dam situated?

Col. COOPER. Across the Mississippi River at the southern boundary of the State of Iowa.

Senator UNDERWOOD. A good deal of that power at the Keokuk Dam you send to St. Louis?

Col. COOPER. Yes, sir.

Senator UNDERWOOD. What is that power sold at in St. Louis?

Col. COOPER. It is sold at about $33.

Senator UNDERWOOD. Thirty-three dollars in St. Louis?

Col. COOPER. Yes; to the central consumer.

Senator UNDERWOOD. And you have no difficulty in obtaining purchasers for the power?

Col. COOPER. None whatever.

Senator UNDERWOOD. You could sell more than you have?

Col. COOPER. Yes.

Senator UNDERWOOD. And you do not think there will be ultimately any difficulty in finding purchasers for this power?

Col. COOPER. I think that it will be all sold.

Senator OVERMAN. Could the Keokuk Co. and the Southern Power Co. of North Carolina get any benefit from this development?

Col. COOPER. No.

Senator SMOOT. Did the Keokuk Dam Co. put in the distributing system? Did they carry that power from the dam to St. Louis?

Col. COOPER. They carried it to the step-down transformer station 14 miles out of St. Louis.

Senator SMOOT. But it was within 14 miles?

Col. COOPER. Yes; within 14 miles Our distribution sets are 142 miles long.

Senator SMOOT. And this price of $33 per horsepower includes the cost of transmission?

Col. COOPER. Yes; it includes the cost of transmission and local distribution.

Senator SMOOT. And local distribution as well?

Col. COOPER. Oh, yes; in big blocks, not in little blocks.

Senator SMOOT. They are getting cheap power.

Col. COOPER. Yes; they are.

Senator UNDERWOOD. What is the cost of distribution wire, say, 100 miles, for 100,000 horsepower?

Col. COOPER. Do you mean the gross cost of a transmission system?

Senator UNDERWOOD. I do not know whether I express myself correctly, but I should like to have the record reflect what the cost is, not of the aggregate, but what it would cost to build the distribution wires on some unit, so that the Congress will understand.

Col. COOPER. On the basis of 100,000 horsepower distribution and 100 miles of distribution, at the present price of copper, I should say that it would cost, including right of way, somewhere in the neighborhood of two and a half million dollars.

Senator UNDERWOOD. Two and a half million dollars to build the plant to distribute——

Col. COOPER. To build the transmission system to distribute 100,000 horsepower 100 miles away.

Senator SMOOT. That is only the line and the poles?

Col. COOPER. Just the line; yes—that is, the step-up transformers, but not the step-down transformers.

Senator UNDERWOOD. Where you went into a distribution system you would find those already there, would you not?

Col. COOPER. Yes.

Senator OVERMAN. How far can you carry this power?

Col. COOPER. It depends upon the price of the coal with which you have to compete. On the basis purely of scientific achievement, it is quite possible to carry it 400 miles.

Senator SMOOT. We are doing that now.

Col. COOPER. Yes; absolutely; but on the basis of how far you can carry it commercially, it depends upon the price of coal. With coal at $5 a ton or $6 a ton you can go 400 miles, but if you are competing against $2.50 coal, 150 miles is the maximum distribution.

Senator UNDERWOOD. Your final conclusion about the matter is, Colonel, that the dam ought to be completed; that now that it is started, and we have the money in there, it is the economical thing to do to complete the dam?

Col. COOPER. Yes; you will lose $4,000,000 if you do not. I should like to direct the attention of the Senators to this photograph again, because it gives you some idea of what I refer to when I say that if you shut down the plant it will cost you $4,000,000. Here is this vast amount of work distributed over a mile of distance; all these derricks, all these locomotives, all these temporary bridges and temporary cofferdams and all that sort of thing will have to be totally abandoned; and if you shut this plant down now and start it up, say, three years from now, the minimum loss you will have sustained is $4,000,000, without any compensation; and if you sustain the $4,000,000 loss you never can put the plant on a 5 per cent basis in the future.

Senator SMOOT. Unless we sold out entirely.

Col. COOPER. Then you would have a bigger loss yet.

Senator UNDERWOOD. Without asking you to repeat what you have already said, you think it is advisable and the best course for the Government to pursue to complete the dam, and then you feel assured that if it is completed now the Government can undoubtedly receive, either from one source or from another, 5 per cent interest on every dollar that is put into the dam?

Col. COOPER. I so believe. That is the minimum.

Senator UNDERWOOD. That is the minimum that it can receive?

Col. COOPER. Yes, sir.

Senator UNDERWOOD. I believe that is all I want to ask.

Senator JONES of Washington. But you do not expect the Government ever to get its capital out?

Col. COOPER. I certainly would if I were Secretary of War. I would negotiate a contract with this crowd down there to get every dollar of it out.

Senator JONES of Washington. Do you think they could afford to pay 5 per cent interest?

Col. COOPER. At the end of 50 years the price of coal in this country will be such that the next lease that they made would contain an amortization provision that would take care of that thing and wipe it out in 10 years.

Senator JONES of Washington. You think that could be done in about 60 years?

Col. COOPER. Yes; I do not think in this first period there would be any need of amortization at all.

There is only one other thing I want particularly to say to this committee before I sit down, and that is this—that I am not in any way interested in any public utility in the South, and have declined to be at any time, now or in the future. I have kept myself out of a very large amount of prospective business for the sake of this Government and a dollar a year, because I can not possibly be in a position like this: Suppose the recommendation that I have made prevails, and some public utilities down there came across and got the power, and then I joined them on a profit basis; the dirty-minded people could say, "Why, he planned this whole thing as far as he was able to so that these public utilities could get a fat thing out of it." They will never get a fat thing out of it if the Secretary of War and the Federal Power Commission function properly; but I have put myself now and in other ways in a position where never at any time in the future will I accept a dollar's worth of retainer from any power company that will ever have any business relations with this Government.

Senator SMOOT. That cuts you out of seven Southern States?

Col. COOPER. Yes; I have shut myself out of those seven States forever, and I want this committee to know it.

Senator SMOOT. I want to congratulate you upon the fact that the Keokuk Power Co. is selling power delivered at $33 per horsepower, when it is going to cost under this project $27 and more, actual cost at this dam; so you are doing splendid work.

Col. COOPER. We are. We have been complimented, strange as it may seem, by the public service commissions of a lot of States that formerly thought we were very bad people.

Senator JONES of Washington. Mr. Cooper, do you think the Water Power Commission ought to have the control of the disposal or distribution of this power?

Col. COOPER. I do; no other agency.

Senator JONES of Washington. We ought to have a provision in the bill that is pending, for instance, if it is passed, giving them control?

Col. COOPER. Absolute, exclusive control.

Senator UNDERWOOD. When you answered the Senator's statement about this power costing $27 per horsepower, of course you meant, in answer to that, the cost of the power and distribution both?

Senator SMOOT. Oh, yes.

Col. COOPER. Oh, yes.

Senator UNDERWOOD. I knew it, but I just wanted the record to show it.

Senator SMOOT. I spoke of it, you know, in connection with the power that was distributed by the Keokuk Power Co.

Senator UNDERWOOD. But at that rate, counting the $27 for making the power and distributing it, it is very cheap power, is it not?

Col. COOPER. Oh, yes.
Senator SMOOT. There is no question about it.
Senator UNDERWOOD. Colonel, did you want to say anything further?
Col. COOPER. No.
Senator JONES of Washington. Did you see the amendment which Senator UNDERWOOD read into the record, I think yesterday or day before, that somebody suggested should be offered to the pending bill, relating to control by the Water Power Commission?
Col. COOPER. No.
Senator JONES of Washington. Do you know what that was?
Col. COOPER. No; I do not know anything about it. I never heard of it.
The CHAIRMAN. I wish to say to Col. Cooper that the committee are very much obliged to him.

Mr. DIAL. Mr. President, I desire to say that I am thoroughly opposed to the Government carrying on any business that can be conducted by a citizen. I do not deem it fair that the Government should compete with its citizens as an ordinary proposition, but this proposition is an extraordinary one. The product of the Muscle Shoals plant is needed in time of war. So far as I am concerned, I wish it had not been commenced; but having been commenced, and a large sum of money having been expended upon its construction, it seems to me the part of wisdom to complete it at as early a date as practicable. If it were abandoned now, or shut down, all the apparatus would rust, and it would deteriorate more by nonuse than by use.

Because it is located in the South there should not be any prejudice against the project. In the nature of things it is there, and it can not be moved. It is unkind and unfair to try to create any ill will by such an argument. If we should undertake to sell it, judging by the prices we get for abandoned camps and war supplies, we would get an exceedingly low price—in fact, only a small percentage of what it cost. If it could be disposed of for anything like its cost, or for a reasonable figure, perhaps that would be the best course to pursue. But there is no other alternative, to my mind, except to complete it.

I was pleased to hear the figures as to the estimate of its cost. As the Senator from Alabama [Mr. UNDERWOOD] has just said, the estimate was less than $100 per horsepower. I have had some experience in building a hydroelectric plant, and it is understood that if one can be built for even $200 a horsepower, if the plant is within reaching distance of customers, it is a good investment. The prices of engines, boilers, and all such materials fluctuate greatly, and I do not know what the present cost would be, but, from former experience, I imagine a steam plant of this capacity would cost perhaps half the amount estimated for this water-power plant. We all know that a water-power plant possesses great advantages over a steam plant. You have no coal to buy, your motive power is furnished you free, and no doubt it would be a paying proposition if managed properly, and I have no reason to say it would not be managed properly. While I am not very much in love with Government management—I think it is a great failure in many respects—that is no reason why we should condemn it.

This plant is located within a reasonable distance of a market, and it should make fair returns from the beginning, but I feel it is unfortunate that an amendment was adopted fixing a certain percentage which this plant had to make in such a short time. We all know that all enterprises have to get upon their feet, and it would be a remarkable proposition if a plant could make money from the beginning.

I happen to know of a plant in my section of the country which was built several years ago, and within 30 days after the plant was completed and turned over to the owner a flood came along, the greatest flood of which we had any record, and a great deal of the plant was washed away, and at least half of the capital was destroyed, and the question was whether they should abandon it or complete it. The owners decided to complete it, and to-day that proposition is paying anywhere from 25 to 33 per cent per annum; and there is no reason in the world why this plant should not pay.

As I said, I do not believe in the Government competing with citizens, but there is no other course open except to complete this plant, and there is no reason why it should not make handsome returns upon what it costs.

Mr. HEFLIN. Mr. President, I am in hearty accord with the position of the Senator from South Carolina [Mr. DIAL] when he said that he did not want to see the Government go into business generally. The Government in this instance is undertaking to supply itself with something that it very much needs, and something that it does not possess.

The Senator from Utah [Mr. SMOOT] said he was in favor of selling the whole project just as it now stands. Just a few months ago he stated on this floor, as the Senator from Mississippi has pointed out, that he wanted to appropriate all the money necessary to complete this very project. But the Senator from Utah has changed his mind.

I am hoping that after this bill passes the Senate, as I sincerely hope it will, by the time it gets through the House and comes back, the Senator will have changed his mind again and be in favor of the measure.

But the Senator says it can not succeed. Plant No. 2 has already succeeded; it is already producing the stuff for which it was built. The senior Senator from South Carolina [Mr. SMITH] had samples of the nitrate and fertilizers here on his desk that were manufactured at the plant at Muscle Shoals.

But the Senator from Utah said it will not succeed. That same thing was said about the irrigation projects on the arid lands of the West. Daniel Webster and Henry Clay both said that the arid section of the country would always remain a barren waste, and yet I have seen this Government convey water to those arid lands, and make them produce as the most fertile soil of the country, and it has made that once barren waste to produce in abundance and blossom as the rose.

I heard it said that we could not fly an airplane heavier than the air, and yet at Fort Myer I saw Orville Wright prove that you could do that very thing.

It was said years ago that you could not send a telegram by electricity, and a Member of Congress was defeated because he voted to appropriate $30,000 to make the experiment and see for certain whether or not it could be done. Back at home on the hustings his opponent charged that he had voted for an appropriation to send a telegram by lightning, and he was defeated, and yet to-day we flash messages by electricity across the continent and under the ocean to the uttermost ends of the earth.

Various things once considered doubtful or impossible have been accomplished, so we will not be discouraged because the Senator from Utah says that the Government's nitrate project will not be a success. It has already proven itself. It has already succeeded in producing the material for which it was constructed. Projects of this same character have succeeded in other countries; they succeeded in Germany and in France, and does anyone doubt the ability of our own people to make it a success in the United States?

Mr. President, when it is completed it will turn out nitrates for the Government and free it from dependence on a foreign country for its nitrates. It will furnish fertilizers to farmers, and it will deliver them from the clutches of the fertilizer trust, as I said before. Not only that, but the Senator from Utah has shown us that certain power companies are waiting to buy power from this very dam. So it can be made to serve four purposes—furnish nitrate to the Government, furnish fertilizers to the farmers, relieve them from the exorbitant prices now exacted by the fertilizer trust, and make money selling horsepower produced at Muscle Shoals. It will, when finally completed, serve the good purposes mentioned and also prove to be a good investment for the Government.

Some one has said that when the Wilson Dam is completed it will produce a gross annual income of $4,555,000, which is 10 per cent of the cost price of $45,000,000. As the Senator from South Carolina has just suggested, this will save to the people of the United States coal to the extent of 6,500,000 tons a year. It is a good project, and the Government should be permitted to go on and complete this great project rather than throw away the eighty-odd million dollars already expended. I submit, Mr. President, that if we follow the course suggested by the Senator from Utah [Mr. SMOOT] we will deprive the Government of the privilege of freeing itself from dependence upon a foreign country for nitrate in time of war and will throw away the opportunity of greatly benefiting the farmers of America by furnishing them more and cheaper fertilizers. Let no man who claims to be the friend of the farmer vote against this measure. Let no one who claims to be the friend of adequate preparedness for the national defense vote to destroy the Government's nitrate plant at Muscle Shoals. Let no one who wishes to see this Government free from dependence upon a foreign country for its explosive power in time of war vote against this bill.

Mr. KING. Mr. President, for information, what is the amendment before the Senate?

The VICE PRESIDENT. The bill is as in Committee of the Whole and open to further amendment.

Mr. KELLOGG. As I understand the Senator from Alabama [Mr. UNDERWOOD], the testimony of Col. Cooper did not apply to this particular bill, but Col. Cooper simply recommended the completion of the dam, and this does not provide for that at all.

Mr. UNDERWOOD. The Senator probably was not in the Senate when I commenced my remarks. I said that the dam was not involved in the bill directly, but the Senator from Utah

[Mr. SMOOT] had referred to it, and I was addressing myself to his remarks and his criticism.

Mr. KELLOGG. I heard that. As I said, as I understand the Senator from Alabama, this bill does not apply to the question of the completion of the dam, and, so far as the nitrate plant is concerned, Col. Cooper advised against the Government going into that business, so that I do not see how his testimony in any way supports the contention of the Senator from Alabama that Congress should complete this plant and go into the nitrate business.

There was one suggestion made in the speech of the Senator from Washington [Mr. POINDEXTER] on yesterday that I would like to call to the attention of the Senate in view of the amendment to subdivision (e) of the bill, on page 6. As I read subdivision (e) it confers upon the corporation by direction of the President all of the President's powers under the national defense act, of which sections 120 and 124 are parts. Subdivision (e) reads as follows:

> By direction of the President, to act as his agent in carrying out and performing any or all of the duties imposed upon him by section 124 of the act of June 3, 1916, known as the national defense act, including, after its completion, the operation of the hydroelectric power plant now being constructed at Muscle Shoals—

And so forth.

That does not confine the grant of power simply to the Muscle Shoals project. It simply includes, as one of the numerous powers conferred upon the President under the national defense act, the operation of the hydroelectric power plant after its completion. It leaves subdivision (e) so that the President can, through the corporation, carry out and exercise all of the powers in section 124 of the national defense act and all of the powers in relation to this subject in that act.

Not only that, but the subsequent part of subdivision (e) expressly confers all these powers, for it provides, among other things:

> And the President is authorized, in his discretion, to delegate to the corporation any and all powers and duties conferred or imposed upon him by said act which relate to the production, development, or manufacture of atmospheric-nitrogen products, or which are incidental thereto.

The Senator from Washington read the sections referred to and stated the powers conferred upon the President.

Mr. President, I do not believe there was ever a war or an emergency in this country where such extraordinary powers were conferred upon the President as were conferred by these acts and particularly by the act referred to. They apparently are not limited or defined. I make no complaint of that. The President insisted that they were necessary, and the Congress, in order that nothing might be neglected to win the war, conferred upon him these powers. I am opposed to the continuance of such unlimited, indefinite powers as these by the President or by the corporation in times of peace. I believe that the bill ought to define the powers conferred upon the corporation and upon the President. Congress ought to define those powers as powers proper to be granted in times of peace and ought not simply to refer to the national defense act and to confer upon the President and the corporation those extraordinary powers which were conferred upon the President during the war.

I believe the people of the country have come to the conclusion that those powers ought to have ended some time ago, and the President ought not now, and certainly ought not hereafter, to be exercising those powers granted for war purposes.

I shall not take the time of the Senate to go into the details of the powers referred to, but the different powers conferred by section 120 are most extraordinary. That section provides:

> The President in time of war or when war is imminent may exercise the following powers—

I am now speaking of section 120. We are still in war, legally, and just when we will get out of it I do not know that anyone can tell—certainly not until after the 4th of March.

But, passing from section 120, I come to section 124. The power of the President was not exhausted by selecting Muscle Shoals, because he might select any site or sites, and he might select a half dozen sites for dams "upon any navigable or non-navigable river or upon the public lands, as in his opinion will be necessary for carrying out the purposes of this act."

But it will be said that by the amendment agreed to this morning that power has been taken away from the President. The amendment adopted this morning simply took away from the President the power to acquire, by condemnation or in any other manner, any water-power site or hydroelectric power plant other than the site at Muscle Shoals, but it left the President free to acquire, "by lease, purchase, gift, grant, or devise, materials, minerals, processes, patents, necessary for the construction and operation of such plants." So that the corporation may go out and, under the direction of the President, still exercise the war powers granted by section 124, if not by other sections of the national defense act, which are vast powers undefined, unrestricted, and which may place a tremendous burden of debt upon the people of the United States.

The Senator from South Carolina [Mr. SMITH] said yesterday that the President's power was limited by the appropriation of $20,000,000 for the project. If that is true, I should like to know how it is that the President spent more than $100,000,000 in the construction of the plant and took the money from other appropriations made for general war purposes. If these powers continue in the President, I do not know how much money may be available in other appropriations which may have been made. I am told that there is $7,000,000 still available of the $20,000,000, and although they have spent over $100,000,000 on the plant, there is nothing to prevent the President, as I understand it, from spending that $7,000,000 in the completion of the dam. The Senator from New York will correct me if I am wrong.

Mr. WADSWORTH. He can spend it for any purpose connected with the dam or the project.

Mr. KELLOGG. There is no evidence that I know of before Congress that any more money is needed for the present for the construction of the dam than the $7,000,000 now available. But if the President goes on under the powers conferred under subdivision (e), he may impose great obligations upon the country, legal obligations for which it would be the duty of the Congress to make appropriations.

It seems to me, as I have listened to the debate upon the bill, that the Congress ought to have definite information as to just what it is going to cost and what the plan of operation of the power plant and other plants is. We ought not to be legislating in general terms and conferring upon the President and the corporation war powers without limitation in times of peace. The Government ought not generally now to be investing large sums of money to go into private business. I have not heard of any testimony before the Senate which would show that practically any material necessary or to be used can with advantage be produced commercially by the company for fertilizer.

It is about time that Congress stopped spending money extravagantly in plants like shipping plants and power plants until we know where we are coming out with the enormous Government deficit and the bills that we already have got to pay. It does seem to me as though at least this one provision, which I have not discussed, and many other provisions, the particulars of which have been presented so ably by other Senators, should be further considered, and that we ought to make the powers conferred upon the corporation specific and definite and not merely refer to the national defense act.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed and to be read a third time.

The bill was read the third time.

Mr. WADSWORTH. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Beckham	Harris	Nugent	Stanley
Calder	Harrison	Page	Sterling
Capper	Heflin	Phipps	Sutherland
Culberson	Henderson	Pittman	Swanson
Curtis	Johnson, Calif.	Poindexter	Townsend
Dial	Jones, N. Mex.	Robinson	Trammell
Dillingham	Kellogg	Sheppard	Underwood
Fernald	King	Simmons	Wadsworth
France	McKellar	Smith, Md.	Walsh, Mass.
Gay	McNary	Smith, S. C.	Williams
Gerry	Moses	Smoot	Willis
Gronna	New	Spencer	

The VICE PRESIDENT. Forty-seven Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of absent Senators.

The reading clerk called the names of absent Senators, and Mr. KNOX, Mr. LA FOLLETTE, and Mr. WARREN answered to their names when called.

Mr. ASHURST, Mr. COLT, Mr. OVERMAN, Mr. WALSH of Montana, Mr. HALE, Mr. GLASS, Mr. JOHNSON of South Dakota, Mr. KEYES, and Mr. MCCUMBER entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-nine Senators have answered to the roll call. There is a quorum present. The pending question is, Shall the bill pass?

Mr. POINDEXTER. Mr. President, I understand one of the strong arguments in behalf of the passage of the pending bill is that it will relieve the farmers from the grip of the fer-

tilizer trust. If a condition such as that exists, it would be a very important element in this problem which we are trying to solve; but so far as I have been able to attend the debates I have not heard any presentation or analysis of the situation as to fertilizer upon which it would be possible for anyone to form an opinion upon that subject.

My understanding is that the Muscle Shoals plant will manufacture sulphate of ammonia, and there is not any showing here that there is any combination or trust or oppression of the farmers in the sale to them of that commodity or in the condition of the supply of sulphate of ammonia, and unless there is, of course, the argument to which I have referred loses its force altogether.

I am told—I can not personally vouch for the reliability of the statement, but upon what I regard as very reliable authority—that there is an oversupply at the present time of ammonium sulphate in the country and that there is very little market for it. Germany when she entered the war had a great advantage over the Allies by reason of the large extent to which she had developed the process of the manufacture of coke in what are called by-product ovens. When she captured Belgium and northern France she added to her control of by-product coke ovens a large number of them which were located in those territories and which supplied ammonium sulphate, which is obtained from the gases that ordinarily escape under the old process of manufacturing coke, but which are reduced under the new process of the by-product system from the coke ovens to which I have referred.

I am informed—and if it is correct it is a very important consideration in connection with the disposition of this bill—that in recent years, largely since the United States entered the war with Germany, the method of manufacturing coke by this new process has so developed that we now have as many by-product coke ovens in the United States as Germany had when she began the war against France. If that is the case, and if there has been produced by that system at the present time an oversupply of ammonium sulphate, which is the product to be obtained from the Muscle Shoals project in case it should be completed, I fail to understand how the Fertilizer Trust, if there is a Fertilizer Trust, will be affected in any way at all by adding this additional source of supply.

It has not been shown that there is any combination or trust that controls the manufacture of coke in the United States. That industry is perhaps freer from centralized control than almost any other industry in the country. It has not been shown in this debate that the product of the Muscle Shoals project can be used, or, if it can be used, to what extent it can be used, by the farmers of the country without mixture with other products, and if it is to be mixed with other products, to what extent it is to be mixed, and what other products it should be mixed with. Consequently, there is no analysis of the situation dealt with by this bill which would enable any Senator to form an intelligent opinion as to what real effect upon the agriculture of the country the establishment of the Muscle Shoals plant at an unknown cost will have.

There are various other sources of supply of fertilizer. I am frank to say that I have only a rather confused and indefinite idea as to the proportion in which the various elements entering into the ordinary commercial fertilizer are used in the different sections of the country, in what combinations they are used, or what part ammonium sulphate, which will be produced by this plant, will play in affecting the market and the supply of those elements necessary to a restoration of the soil.

Furthermore, the statements in behalf of this bill are unsupported by any facts upon which we can determine how it will aid the military preparedness of the United States.

One of the elements that enter into the manufacture of powder is toluol. Are you going to manufacture toluol at this plant? I have not heard anybody say so; and if you are not going to manufacture toluol, how is the product of this plant to supply the Nation in time of need with high explosives for its heavy artillery? How is it going to be a means of preparedness?

My opinion is that this bill should be referred to a committee, and that the committee should be asked to report upon these essential and fundamental questions upon which there is no report and upon which there is no adequate information before the Senate.

Mr. President, I move that this bill be referred to the Committee on Military Affairs and that the committee be asked to report to the Senate the extent, if any, to which the products of the plant proposed to be established by the bill will enter into the manufacture of ammunition for use by the Government in its military operations.

The VICE PRESIDENT. The question is on the motion of the Senator from Washington.

Mr. POINDEXTER. I ask for the yeas and nays upon that motion.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. McCORMICK], which I transfer to the junior Senator from Nebraska [Mr. NORRIS] and will vote. I vote "nay."

Mr. POMERENE (when his name was called). I have temporarily a general pair with the senior Senator from Iowa [Mr. CUMMINS]. I do not know how he would vote on this subject, and therefore withhold my vote.

Mr. SMITH of Georgia (when his name was called). I have a pair with the senior Senator from Massachusetts [Mr. LODGE]. As I can not obtain a transfer, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. SWANSON (when his name was called). I am paired with the senior Senator from Washington [Mr. JONES]. I do not know how he would vote on this proposition. Consequently I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. WALSH of Montana (when his name was called). I am paired with the Senator from New Jersey [Mr. FRELINGHUYSEN]. I transfer that pair to the Senator from Louisiana [Mr. RANSDELL] and vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Missouri [Mr. REED] and will vote. I vote "nay."

The roll call was concluded.

Mr. HARRISON. I desire to announce that the Senator from Delaware [Mr. WOLCOTT] has a general pair with the Senator from Indiana [Mr. WATSON].

Mr. GLASS (after having voted in the negative). I have a general pair with the Senator from Illinois [Mr. SHERMAN]. I transfer that pair to the Senator from Arkansas [Mr. KIRBY], and will let my vote stand.

Mr. McCUMBER. I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. Understanding that he would vote the same way that I shall vote upon this subject, I vote "yea."

Mr. KNOX. I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. I transfer that pair to the junior Senator from Iowa [Mr. KENYON] and vote "yea."

Mr. TRAMMELL. I desire to announce the absence of my colleague [Mr. FLETCHER] in attendance upon the business of the Committee on Commerce. He has a pair with the Senator from Delaware [Mr. BALL], who is also absent in attendance upon the business of that committee. If my colleague [Mr. FLETCHER] were present, he would vote "nay."

Mr. SMITH of South Carolina (after having voted in the negative). I see that the Senator from South Dakota [Mr. STERLING], with whom I have a pair, has not voted; and, being unable to obtain a transfer, I shall have to withdraw my vote.

Mr. CURTIS. I have been requested to announce that the senior Senator from Washington [Mr. JONES] is absent on committee business.

The result was announced—yeas 26, nays 35, as follows:

YEAS—26.

Borah	Gore	McLean	Spencer
Calder	Hale	Moses	Sutherland
Colt	Kellogg	New	Wadsworth
Curtis	Keyes	Page	Warren
Dillingham	King	Phipps	Willis
Fernald	Knox	Poindexter	
France	McCumber	Smoot	

NAYS—35.

Ashurst	Harris	McNary	Smith, Md.
Beckham	Harrison	Myers	Stanley
Capper	Heflin	Nugent	Townsend
Culberson	Henderson	Overman	Trammell
Dial	Johnson, Calif	Phelan	Underwood
Gay	Johnson, S. Dak.	Pittman	Walsh, Mass.
Gerry	Jones, N. Mex.	Robinson	Walsh, Mont.
Glass	La Follette	Sheppard	Williams
Gronna	McKellar	Simmons	

NOT VOTING—35.

Ball	Hitchcock	Newberry	Smith, Ariz.
Brandegee	Jones, Wash.	Norris	Smith, Ga.
Chamberlain	Kendrick	Owen	Smith, S. C
Cummins	Kenyon	Penrose	Sterling
Edge	Kirby	Pomerene	Swanson
Elkins	Lenroot	Ransdell	Thomas
Fall	Lodge	Reed	Watson
Fletcher	McCormick	Sherman	Wolcott
Frelinghuysen	Nelson	Shields	

So Mr. POINDEXTER's motion was rejected.

Mr. TOWNSEND. Mr. President, I voted against the motion made by the Senator from Washington [Mr. POINDEXTER] because I believe that the proper committee to consider this proposition is the Agricultural Committee. I believe it has not considered the question suggested by the Senator from Washington,

and many other questions which should receive consideration. I in good faith believe that the Senate does not understand just exactly what it has done up to date; and, at the risk of being criticized, I am going to move that this bill be re-referred to the Committee on Agriculture and Forestry.

Mr. SMITH of South Carolina. Mr. President, a parliamentary inquiry. This motion has already been made while the bill was in Committee of the Whole, and has been voted down. Can the same proposition be made again?

The VICE PRESIDENT. The Chair is of the opinion that these motions may be made a reasonable length of time apart after the bill has been changed as this bill has been changed in the Senate.

Mr. SMITH of South Carolina. Therefore the ruling of the Chair is that this motion is in order?

The VICE PRESIDENT. The motion is in order, in the opinion of the Chair, a sufficient time having elapsed since the former motion was made, and a number of changes having been made in the bill. The question is on the motion of the Senator from Michigan.

Mr. TOWNSEND. I ask for the yeas and nays on that motion.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. GLASS (when his name was called). Repeating the previous announcement, I transfer my pair with the senior Senator from Illinois [Mr. SHERMAN] to the junior Senator from Arkansas [Mr. KIRBY] and vote. I vote "nay."

Mr. HENDERSON (when his name was called). Making the same announcement as before of my pair and its transfer, I vote "nay."

Mr. KNOX (when his name was called). Repeating the announcement I made on the last vote, I vote "yea."

Mr. McCUMBER (when his name was called). Making the same announcement that I did on the previous vote, I vote "yea."

Mr. POMERENE (when his name was called). When a similar motion was made several days ago, to refer the bill back to the Committee on Agriculture and Forestry, after a conference with the junior Senator from Iowa [Mr. KENYON] I felt free to vote, knowing that my vote would be the same as that of the senior Senator from Iowa [Mr. CUMMINS], with whom I have a pair. I therefore vote "yea."

Mr. SMITH of Georgia (when his name was called). I have a pair with the senior Senator from Massachusetts [Mr. LODGE]. I am unable to get a transfer, and therefore I refrain from voting. If at liberty to vote, I would vote "nay."

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. Being unable to get a transfer, I can not vote. If permitted to vote, I would vote "nay."

Mr. WALSH of Montana (when his name was called). I have a general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN], which I transfer to the Senator from Louisiana [Mr. RANSDELL] and vote. I vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement made on the last roll call, I vote "nay."

The roll call was concluded.

Mr. TRAMMELL. I desire to repeat the announcement I made in regard to the absence of my colleague [Mr. FLETCHER] and to state that if present he would vote against the motion.

The result was announced—yeas 29, nays 35, as follows:

YEAS—29.

Borah	Hale	New	Sutherland
Calder	Kellogg	Page	Townsend
Colt	Keyes	Phipps	Wadsworth
Curtis	King	Poindexter	Warren
Dillingham	Knox	Pomerene	Willis
Fernald	McCumber	Smoot	
France	McLean	Spencer	
Gore	Moses	Sterling	

NAYS—35.

Ashurst	Harris	McNary	Smith, Md.
Beckham	Harrison	Myers	Smith, S. C.
Capper	Heflin	Nugent	Stanley
Culberson	Henderson	Overman	Trammell
Dial	Johnson, Calif.	Phelan	Underwood
Gay	Johnson, S. Dak.	Pittman	Walsh, Mass.
Gerry	Jones, N. Mex.	Robinson	Walsh, Mont.
Glass	La Follette	Sheppard	Williams
Gronna	McKellar	Simmons	

NOT VOTING—32.

Ball	Frelinghuysen	McCormick	Sherman
Brandegee	Hitchcock	Nelson	Shields
Chamberlain	Jones, Wash.	Newberry	Smith, Ariz.
Cummins	Kendrick	Norris	Smith, Ga.
Edge	Kenyon	Owen	Swanson
Elkins	Kirby	Penrose	Thomas
Fall	Lenroot	Ransdell	Watson
Fletcher	Lodge	Reed	Wolcott

So the Senate refused to recommit the bill.

The VICE PRESIDENT. The question now is, Shall the bill pass?

Mr. UNDERWOOD. I ask for the yeas and nays.

Mr. POINDEXTER. Mr. President, I understand that by the adoption of an amendment offered by the Senator from New York [Mr. WADSWORTH], some of the objections to which I called attention yesterday, arising out of section 124 of the national defense act, which is practically made a part of this bill by the terms of the bill, have been removed and in that respect the bill greatly improved, as I view it, limiting the extent to which Congress would have surrender its powers of legislation to the executive department of the Government. As the bill was framed in the War Department there was no limit either as to the obligations which might be incurred by the Government or as to the number of plants which might be established, or as to the control by the President of the United States, who would have the power to designate this corporation as his agent, over any manufacturing industry a part of whose product entered into the composition of ammunition. That part of it, at least, has been improved by the amendment which was adopted.

Also another portion of section 124 of the national defense act has practically been eliminated by an amendment which was adopted upon the motion originally, I believe, of the Senator from North Dakota [Mr. GRONNA] prohibiting the exercise of the power of eminent domain in the compulsory taking of property, personal or real, for the purposes of this act.

But, Mr. President, there are other portions of section 124 of the national defense act which are not affected by any of the amendments which have been adopted, so far as I am informed, which are of importance, unless the Senate of the United States has come to the point, through long experience with executive extravagance in the conduct of the finances of the Government in the last three or four years, of perfect indifference as to such extravagance and has arrived at a point when it has lost its appreciation of the value of the money of the people in exercising its part of the function vested in Congress of making appropriations.

We are supposed to authorize the appropriation of a certain amount in this bill, and yet by a more or less concealed clause in the bill, which authorizes the President to continue the exercise of the powers which were vested in him for the purposes of the war ended two years ago, which powers by this bill would be projected into times of peace, sums vastly in excess of those directly appropriated in the bill are made available for expenditure under it. I do not think that the Senate intelligently would vote to vest these extraordinary powers permanently in the executive branch of the Government, or to authorize the expenditure for the purposes of this bill of sums which were appropriated under the great emergency of war in which the Nation at that time found itself.

I want to call attention again, Mr. President, to one paragraph in section 124 of the national defense act, which is found on page 57 of that act, at the top of the page, as follows:

> The sum of $20,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, to enable the President of the United States to carry out the purposes herein provided for.

That act was passed June 3, 1916. After that a hundred million dollars in one appropriation was appropriated by Congress and given to the President to be used in his discretion as a war fund, and various other amounts at different times have been appropriated under the national defense act, since the passage of the original act, to enable the President to carry out its terms, of which considerable sums remain unexpended.

Near the top of the same page in the national defense act is this further paragraph, which is carried into effect by the bill which is now pending before the Senate:

> In order to raise the money appropriated by this act and necessary to carry its provisions into effect, the Secretary of the Treasury, upon the request of the President of the United States, may issue and sell, or use for such purpose or construction hereinabove authorized, any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $20,000,000: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable, and fix, instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years.

That is the concluding part of section 124 of the national defense act, which I have read verbatim from an official copy of the act.

On page 5 of the pending bill, among the powers of the corporation which is created by it, there is this provision:

> By direction of the President, to act as his agent in carrying out and performing any or all of the duties imposed upon him by section 124 of the act of June 3, 1916, known as the national defense act, including, after its completion, the operation of the hydroelectric power plant

now being constructed at Muscle Shoals, and the use and sale of the hydroelectric power to be developed under authority of the act of June 3, 1916, aforesaid, and the President is authorized, in his discretion, to delegate to the corporation any and all powers and duties conferred or imposed upon him by said act which relate to the production, development, or manufacture of atmospheric nitrogen products, or which are incidental thereto, and to pay into the Treasury of said company any unexpended balance out of the appropriation made by section 124 of the act of June 3, 1916, such funds to be used by the corporation for the purpose of said act as amended by this act.

Now, I assert under that, among the powers vested in the President of the United States by section 124, being the power to request the Secretary of the Treasury to issue and sell Panama Canal bonds to the extent of $20,000,000 for the purposes of section 124, that section being expressly and unequivocally reenacted by the paragraph in the pending bill to which I have just referred and which I have just read, that it would enable the President—and it makes no difference to me for the purposes of the bill whether it be the President who now is exercising the powers of the office or some one to succeed him, because the principle is the same in all cases and it has no personal or political significance, but involves one of the great fundamental principles of this Government, the division of powers between the legislative and executive departments—to take over from Congress the power to sell the bonds of the Government to the extent of $20,000,000, in his discretion, to be expended upon the further construction of the plant which Maj. Wentz, who built the plant, testified, according to a statement made by the distinguished Senator from Ohio [Mr. POMERENE] on the floor of the Senate, could not be sold for anything at all. I doubt very much indeed whether Senators who have been supporting the measure intended to vest that power in the President or to invest that much money in a further effort to derive some benefit out of a plant which has already cost the incalculable sum of $100,000,000 and yet which the gentleman who constructed it says could not be sold for anything.

So, Mr. President, I move as an amendment to subdivision (e) of section 2 of the bill a proviso——

Mr. ROBINSON. Mr. President, I make the point of order that amendments are not now in order.

The VICE PRESIDENT. The point of order is sustained.

Mr. POINDEXTER. A parliamentary inquiry. Has the bill been disposed of in Committee of the Whole?

The VICE PRESIDENT. It is on its final passage now. It has gone out of the Senate.

Mr. POINDEXTER. I was not aware of that. I wish, then, merely to call attention to the fact that the amendment which I propose ought to be made and has not been made, and that the bill as it now stands, although these circumstances were called to the attention of the Senate on yesterday, carries with it the extraordinary authority to which I have referred, and enables appropriations of public funds to be made by the President instead of by Congress.

Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Beckham	Gronna	McLean	Smith, Ga.
Borah	Hale	McNary	Smith, Md.
Calder	Harris	Moses	Smith, S. C.
Capper	Harrison	Myers	Smoot
Colt	Heflin	New	Spencer
Culberson	Henderson	Nugent	Sterling
Curtis	Johnson, Calif.	Overman	Sutherland
Dial	Jones, N. Mex.	Page	Swanson
Dillingham	Kellogg	Phelan	Trammell
Fernald	Keyes	Phipps	Underwood
France	King	Poindexter	Wadsworth
Gay	Knox	Pomerene	Walsh, Mass.
Gerry	La Follette	Robinson	Walsh, Mont.
Glass	McCumber	Sheppard	Williams
Gore	McKellar	Simmons	Willis

Mr. TRAMMELL. I wish to announce the absence of my colleague [Mr. FLETCHER] on official business of the Senate.

The VICE PRESIDENT. Sixty Senators have answered to the roll call. There is a quorum present. The pending question, on which the yeas and nays have been requested, is, Shall the bill pass?

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. GLASS (when his name was called). I transfer my pair with the senior Senator from Illinois [Mr. SHERMAN] to the junior Senator from Arkansas [Mr. KIRBY] and vote "yea."

Mr. HENDERSON (when his name was called). Making the same announcement with reference to my pair and its transfer as on the previous vote, I vote "yea."

Mr. CURTIS (when the name of Mr. JONES of Washington was called). I was requested to announce the absence of the Senator from Washington [Mr. JONES] on official business of the Senate. If present, he would vote "nay." He is paired with the Senator from Virginia [Mr. SWANSON].

Mr. KNOX (when his name was called). Repeating the announcement made by me on the previous vote, I vote "nay."

Mr. CURTIS (when Mr. LENROOT's name was called). I was requested to announce the absence of the junior Senator from Wisconsin [Mr. LENROOT], and that he is paired with the Senator from Tennessee [Mr. SHIELDS]. If present, the junior Senator from Wisconsin would vote "nay."

Mr. CURTIS (when Mr. LODGE's name was called). I was requested to announce the absence of the Senator from Massachusetts [Mr. LODGE], and to state that he is paired with the Senator from Georgia [Mr. SMITH]. Were he present, the Senator from Massachusetts would vote "nay."

Mr. McCUMBER (when his name was called). Making the same announcement as upon the previous vote, I vote "nay."

Mr. POMERENE (when his name was called). As heretofore announced, I have a temporary pair with the senior Senator from Iowa [Mr. CUMMINS]. I do not know how he would vote on this question, and therefore I withhold my vote.

Mr. SMITH of Georgia (when his name was called). On account of my pair with the senior Senator from Massachusetts [Mr. LODGE] I refrain from voting. If permitted to vote, I would vote "yea."

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. I transfer that pair to the senior Senator from Louisiana [Mr. RANSDELL] and vote "yea."

Mr. WALSH of Montana (when his name was called). As heretofore announced, I have a pair with the Senator from New Jersey [Mr. FRELINGHUYSEN]. Being unable to obtain a transfer of my pair, I withhold my vote.

Mr. NEW (when Mr. WATSON's name was called). I desire to announce the absence of my colleague [Mr. WATSON] on account of illness. If he were present, he would vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement with regard to my pair and its transfer which I made upon the previous vote, I vote "yea."

Mr. HARRISON (when Mr. WOLCOTT's name was called). I was requested to announce the necessary absence of the Senator from Delaware [Mr. WOLCOTT] and that he has a general pair with the Senator from Indiana [Mr. WATSON].

Mr. TRAMMELL. I wish to announce the absence of my colleague [Mr. FLETCHER] on official business and to state that he is paired with the Senator from Delaware [Mr. BALL]. If present, my colleague would vote "yea."

Mr. GORE. I desire to announce the absence of the senior Senator from Missouri [Mr. REED] on account of illness.

Mr. McNARY. I wish to announce the absence of my colleague [Mr. CHAMBERLAIN] on account of illness. If present, he would vote "yea."

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Connecticut [Mr. BRANDEGEE] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Arizona [Mr. SMITH];

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK];

The Senator from Wisconsin [Mr. LENROOT] with the Senator from Tennessee [Mr. SHIELDS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Delaware [Mr. WOLCOTT].

The result was announced—yeas 34, nays 29, as follows:

YEAS—34.

Ashurst	Harris	Myers	Smith, S. C.
Beckham	Harrison	Nugent	Stanley
Capper	Heflin	Overman	Swanson
Culberson	Henderson	Phelan	Trammell
Dial	Johnson, S. Dak.	Pittman	Underwood
Gay	Jones, N. Mex.	Robinson	Walsh, Mass.
Gerry	La Follette	Sheppard	Williams
Glass	McKellar	Simmons	
Gronna	McNary	Smith, Md.	

NAYS—29.

Borah	Hale	Moses	Sutherland
Calder	Johnson, Calif.	New	Townsend
Colt	Kellogg	Page	Wadsworth
Curtis	Keyes	Phipps	Warren
Dillingham	King	Poindexter	Willis
Fernald	Knox	Smoot	
France	McCumber	Spencer	
Gore	McLean	Sterling	

NOT VOTING—33.

Ball	Cummins	Fall	Hitchcock
Brandegee	Edge	Fletcher	Jones, Wash.
Chamberlain	Elkins	Frelinghuysen	Kendrick

Kenyon	Newberry	Reed	Walsh, Mont.
Kirby	Norris	Sherman	Watson
Lenroot	Owen	Shields	Wolcott
Lodge	Penrose	Smith, Ariz.	
McCormick	Pomerene	Smith, Ga.	
Nelson	Ransdell	Thomas	

So the bill was passed.

REDUCTION OF THE ARMY.

Mr. NEW. Mr. President, I move that the Senate proceed to the consideration of the resolution (S. J. Res. 236) directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 175,000.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the joint resolution.

The VICE PRESIDENT. The pending question will be stated.

The ASSISTANT SECRETARY. The pending question is on the amendment offered by the Senator from Wisconsin [Mr. LENROOT] in the text of the joint resolution on page 2, lines 8 and 9, to strike out "175,000" and to insert "150,000."

Mr. McKELLAR. Mr. President, my recollection is that the yeas and nays have already been ordered on the amendment.

The VICE PRESIDENT. The yeas and nays have been ordered. Is the Senate ready for the question?

Mr. McKELLAR and others. Vote!

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. CALDER (when his name was called). On this vote I am paired with the senior Senator from Washington [Mr. JONES]. If he were present, he would vote "yea." If I were at liberty to vote, I should vote "nay."

Mr. GLASS (when his name was called). I transfer my general pair with the senior Senator from Illinois [Mr. SHERMAN] to the junior Senator from Arkansas [Mr. KIRBY] and vote "yea."

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. McCORMICK]. I am not informed as to how he would vote on this matter, if present; and, being unable to secure a transfer of my pair, I withhold my vote.

Mr. KNOX (when his name was called). I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN], who is absent. I am unable to secure a transfer of the pair, and therefore withhold my vote.

Mr. CURTIS (when Mr. LENROOT's name was called). I am requested to announce the absence of the Senator from Wisconsin [Mr. LENROOT]. He is paired with the Senator from Tennessee [Mr. SHIELDS]. Were the Senator from Wisconsin present, he would vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. Not knowing what his vote would be upon this question, if present, I withhold my vote.

Mr. BORAH (when the name of Mr. NORRIS was called). I desire to announce the absence of the Senator from Nebraska [Mr. NORRIS]. He is paired with the Senator from Florida [Mr. FLETCHER]. If present, the Senator from Nebraska would vote "yea" on this question.

Mr. POMERENE (when his name was called). Again announcing my general pair with the senior Senator from Iowa [Mr. CUMMINS], I have to say that I do not know how he would vote on this amendment, if present, and therefore I withhold my vote.

Mr. GORE (when Mr. REED's name was called). I again announce that the senior Senator from Missouri [Mr. REED] is absent on account of illness.

Mr. SMITH of Georgia (when his name was called). On account of my pair with the senior Senator from Massachusetts [Mr. LODGE] I withhold my vote.

Mr. SWANSON (when his name was called). I have a general pair, in his absence, with the senior Senator from Washington [Mr. JONES]. On this question, however, he and I are in accord. On this vote the Senator from Washington is paired with the junior Senator from New York [Mr. CALDER]. I vote "yea."

Mr. WALSH of Montana (when his name was called). I have a general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN], which I transfer to the Senator from Louisiana [Mr. RANSDELL] and vote "yea."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Missouri [Mr. REED] and vote "yea."

The roll call was concluded.

Mr. KNOX. I transfer my pair with the senior Senator from Oregon [Mr. CHAMBERLAIN] to the junior Senator from Delaware [Mr. BALL] and vote "nay."

Mr. TRAMMELL. I desire to announce that my colleague, the senior Senator from Florida [Mr. FLETCHER], is absent on official business. On this amendment he is paired with the Senator from Nebraska [Mr. NORRIS]. If my colleague were present, he would vote "nay."

Mr. SMITH of Georgia. I am advised that the Senator from Massachusetts [Mr. LODGE], with whom I am paired, if present, would vote as I shall vote. Therefore I feel at liberty to vote. I vote "nay."

Mr. GERRY. I desire to announce that the senior Senator from Oregon [Mr. CHAMBERLAIN] is detained from the Chamber by illness.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Connecticut [Mr. BRANDEGEE] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Arizona [Mr. SMITH];

The Senator from Wisconsin [Mr. LENROOT] with the Senator from Tennessee [Mr. SHIELDS];

The Senator from Indiana [Mr. WATSON] with the Senator from Delaware [Mr. WOLCOTT]; and

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK].

The result was announced—yeas 34, nays 28, as follows:

YEAS—34.

Borah	Gore	McNary	Stanley
Capper	Gronna	Nugent	Swanson
Colt	Harrison	Overman	Trammell
Culberson	Heflin	Page	Underwood
Curtis	Johnson, S. Dak.	Sheppard	Walsh, Mass.
Dial	Jones, N. Mex.	Simmons	Walsh, Mont.
France	King	Smith, Md.	Williams
Gerry	La Follette	Smith, S. C.	
Glass	McKellar	Smoot	

NAYS—28.

Ashurst	Johnson, Calif.	New	Spencer
Beckham	Kellogg	Phelan	Sterling
Dillingham	Keyes	Phipps	Sutherland
Fernald	Knox	Pittman	Townsend
Gay	McLean	Poindexter	Wadsworth
Hale	Moses	Robinson	Warren
Harris	Myers	Smith, Ga.	Willis

NOT VOTING—34.

Ball	Frelinghuysen	McCormick	Reed
Brandegee	Henderson	McCumber	Sherman
Calder	Hitchcock	Nelson	Shields
Chamberlain	Jones, Wash.	Newberry	Smith, Ariz.
Cummins	Kendrick	Norris	Thomas
Edge	Kenyon	Owen	Watson
Elkins	Kirby	Penrose	Wolcott
Fall	Lenroot	Pomerene	
Fletcher	Lodge	Ransdell	

So Mr. LENROOT's amendment was agreed to.

Mr. WADSWORTH. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. After line 11, on page 2, it is proposed to insert the following proviso:

Provided, however, That during the period in which the Army is being reduced to such enlisted strength sufficient enlistments may be made in any branch of the Army to bring such branch to not more than 53½ per cent of the number prescribed therefor in the act entitled "An act to amend an act entitled 'An act making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, and to establish military justice," approved June 4, 1920.

Mr. BORAH. Mr. President, what is the effect of that amendment?

Mr. WADSWORTH. I described yesterday, I think, the situation which this amendment is meant to cover. Let me say that if this amendment does not carry—I say it very frankly—the wreck of the Army is about completed. It has to do with this situation:

Under the joint resolution as it was reported from the committee, and with the amendments which were suggested by the committee, and which were adopted, no men can be recruited in the Army until it has been reduced to a certain figure, now fixed at 150,000. It so happens that as men have been recruited in the service during the last 8 or 10 months they have expressed their preference as to which branch of the service they wanted to go in. The Government has accepted them, very properly, upon that basis, with the result that certain branches of the service are filled to authorized strength—indeed, one or two of them are slightly over the authorized strength—and with the further result that some other branches of the service are far below authorized strength, and, indeed, are still on a desperately skeletonized basis. The branches of the service which are upon a desperately skeletonized basis, or will be, especially so under the amendment just adopted, are the com-

bat branches, especially the Infantry, the Chemical Warfare Service, the Air Service, and the Field Artillery, all of them combat branches.

The amendment which I have offered will authorize the War Department to admit men in those branches up to the point at which they will approximate or equal, but not exceed, 53½ per cent of the total authorized strength. Fifty-three and a half per cent, if attained in each of the branches of the service, will make an Army of 150,000 men. If the amendment is not adopted, the War Department will not be able, under the language of the joint resolution, to maintain the different branches of the service balanced properly one with the other, and the conspicuous result will be that the branches upon which the country must depend most of all are the ones which will be skeletonized down to a very low figure.

The amendment which I offer will not raise the Army above 150,000 men, because 53½ per cent of 280,000, the maximum authorized strength, makes 150,000. I explained it in part yesterday. Had the Senate seen fit to retain the figure of 175,000, which I regret exceedingly it did not, I would have offered the amendment in the form of having the percentage 62½ per cent; but in view of the action of the Senate just taken I have changed the amendment so that it will read "53½ per cent." The thing is vital to the service.

Mr. BORAH. Mr. President, the only thing I desire to know concerning the matter has been stated by the Senator, as I understand, and that is that the amendment does not enable the Army to be raised above 150,000.

Mr. WADSWORTH. It does not; but it does permit the acceptance of some new enlistments in the undermanned branches while men are being discharged by reason of expiration of enlistments from the overmanned branches.

Mr. McKELLAR. In other words, as I understand, it equalizes the various branches of the service?

Mr. WADSWORTH. It will result finally in an equalization or balancing among the different branches; but I will say perfectly frankly that it will slightly retard the rate of reduction in the whole Army.

Mr. DIAL. Mr. President, I should like to ask whether this decrease will result in a decrease of all the officers in proportion?

Mr. WADSWORTH. It has nothing to do with the officers. The joint resolution does not affect the officers at all. It applies only to the enlisted men. Officers can be separated from the service only by court-martial, or resignation, or death.

Mr. NEW. Mr. President, if I may add one point to what the Senator from New York has just stated, it is true that you can not supply the deficiency in some of these special services by transfers from the other corps. For instance, there is required for the Air Service a type of man that is not to be obtained, for instance, from the Quartermaster Department, which already has an oversupply. They must be permitted to enlist men with a certain degree of education in mathematics, and all of that, which is required to make a man proficient in the Air Service. This amendment provides for that; and the fact that those services are now below the proportion to which they are entitled is due to the further fact that the War Department has prevented their taking enlistments in those particular corps as the matter of recruiting the Army has proceeded. Enlistments have been limited to certain branches of the Army; and, in so far as I am able to do so, I accept the amendment offered by the Senator from New York.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from New York.

The amendment was agreed to.

The VICE PRESIDENT. The Secretary will state the amendments proposed by the committee.

The ASSISTANT SECRETARY. The committee proposes the following amendment:

On page 2, line 4, strike out the words "and instructed."

The amendment was agreed to.

The ASSISTANT SECRETARY. Also, after the words "Regular Army" at the end of line 4 it is proposed to insert the following words:

except reenlistments of men who at the time of the passage of this act have served more than one year in the Regular Army or the Army of the United States during the recent emergency.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 10, after the words "pay of," it is proposed to insert "more than 175,000."

Mr. WADSWORTH. Mr. President, in order to be consistent, that ought to be changed to "more than 150,000."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to amend the amendment by striking out "175,000" and inserting in lieu thereof "150,000."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The ASSISTANT SECRETARY. The committee proposes to add a new section to the joint resolution, to be known as section 2, and to read:

SEC. 2. That until the enlisted strength of the Army is reduced to 175,000 men the Secretary of War is authorized in his discretion to grant applications for discharge of enlisted men who have served one year or more with records satisfactory to their commanding officers without regard to the provisions of existing law respecting discharges.

Mr. McKELLAR. I move to strike out "175,000" and insert "150,000."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to strike out "175,000," and in lieu thereof to insert "150,000."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, and was read the third time.

The VICE PRESIDENT. The question is, Shall the joint resolution pass?

Mr. WADSWORTH. Mr. President, I have grave doubts as to whether it would be worth while, under these circumstances, to ask for the yeas and nays. I simply wish to have it noted in the RECORD that I am opposed to this very, very drastic reduction in the military force.

Mr. NEW. Mr. President, I desire to define my position as exactly that of the Senator from New York. I think we can go to the extent of 175,000. I do not believe it is expedient or safe to go to the point of 150,000. I agree absolutely with the position of the Senator from New York, and I wish to have it so understood, and to be so recorded.

Mr. HARRIS. Mr. President, I am in favor of reducing the Army even below 150,000; but, as stated by the chairman of the committee, the Senator from New York [Mr. WADSWORTH], it will require six months for the present force to be reduced to 175,000, and as Congress will be in session at that time we shall be better able to decide how much more to reduce it. There are certain reasons, satisfactory to myself, which make me vote to reduce it only to 175,000 at this time.

The VICE PRESIDENT. The question is, Shall the joint resolution pass?

Mr. PHELAN. I ask for the yeas and nays.

The yeas and nays were not ordered.

The joint resolution was passed.

The preamble was amended by striking out "175,000" and inserting in lieu thereof "150,000," and as amended was agreed to.

The title was amended so as to read: "Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 150,000."

DISTRICT OF COLUMBIA APPROPRIATIONS.

Mr. CURTIS. I move that the Senate proceed to the consideration of H. R. 15130, the District of Columbia appropriation bill.

Mr. POINDEXTER. Mr. President, I should like to take advantage of this opportunity to give notice, and particularly call the attention of the Senator from Wisconsin [Mr. LA FOLLETTE] to the fact that in case the Senate takes up the District of Columbia appropriation bill, at the conclusion of the consideration of that bill, if I have an opportunity to do so, I shall move to proceed to the consideration of the so-called antistrike bill, S. 4204, in regard to which there is a motion for reconsideration pending.

Mr. JOHNSON of California. Mr. President, I wish to give notice that at the conclusion of the consideration of the District bill I shall move to take up the minimum wage bill, which has been pending here for a long period of time.

The VICE PRESIDENT. The Chair wishes to serve notice that both bills can not be taken up at the same time.

Mr. JOHNSON of California. I shall be very glad to take them up together.

Mr. LA FOLLETTE. Mr. President, I should like to suggest that a motion to take up the antistrike bill would hardly be in order until the motion to reconsider is disposed of.

The VICE PRESIDENT. We will dispose of that question when we reach it. The question is on the motion of the Senator from Kansas [Mr. CURTIS].

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 15130) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes, which had been reported from the Committee on Appropriations, with amendments.

RECESS.

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 4 o'clock and 43 minutes p. m.) the Senate took a recess until to-morrow, Saturday, January 15, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, *January 14, 1921.*

The House met at 12 o'clock noon.

Dr. James Shera Montgomery, pastor of Calvary Methodist Church, offered the following prayer:

Almighty God, Thou art our Father and we are Thy servants. Thou wilt surely hear us when we pray. Lift upon us all the light of Thy holy countenance, inspire us this day by Thy truth, direct us by Thy wisdom, regard our beloved country in Divine favor, and lead our citizens everywhere in the pathways of duty and righteousness. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

ELECTION TO COMMITTEES.

Mr. MONDELL. Mr. Speaker, I present the following resolution and ask its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 644.

Resolved, That CLARENCE J. MCLEOD, Member of Congress from Michigan, be, and is hereby, elected a member of the standing committees of the House as follows: Census, Industrial Arts and Expositions, and Insular Affairs, and

That CHARLES SWINDALL, Member of Congress from Oklahoma, be, and is hereby, elected a member of the Committee on the Public Lands.

The question was taken, and the resolution was agreed to.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. WOOD of Indiana. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543, with Mr. FESS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15543, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15543) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1922, and for other purposes.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Montana: Surveyor general, $3,000.

Mr. GARNER. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I do this for the purpose of asking the gentleman from Wyoming a question. Does the gentleman hope to take up the apportionment bill this week or at what date?

Mr. MONDELL. Well, I had thought we might be able to reach it, but in view of the fact that it will take all day to-day to dispose of this bill, it occurred to me it would not be wise to take up the apportionment bill on Saturday. It will probably go over until Tuesday.

Mr. GARNER. Tuesday, that probably will be the date when it will be considered?

Mr. MONDELL. Yes.

Mr. BLANTON. Mr. Chairman, I rise in opposition to the pro forma amendment. I desire to ask the gentleman from Wyoming a question as to whether this great party now in power is going to permit the representation of Congress to be increased to 483 Members?

Mr. MONDELL. That will depend to some extent on whether or no the minority does its duty.

Mr. BLANTON. Good.

The Clerk read as follows:

For incidental and contingent expenses, clerk hire, not to exceed $2,500; janitor service for the governor's office and the executive mansion, not to exceed $1,200; traveling expenses of the governor while absent from the capital on official business; repair and preservation of executive mansion and furniture and for care of grounds; stationery, lights, water, and fuel; in all, $7,500, to be expended under the direction of the governor.

Mr. GARD. Mr. Speaker, I move to strike out the last word for the purpose of asking a question of the chairman of the committee. Is there any increase in the salary of judges and district attorneys in this Alaska appropriation?

Mr. WOOD of Indiana. There is not.

The Clerk read as follows:

Territory of Hawaii: Governor, $7,000; secretary, $4,000; chief justice, $6,000; two associate justices, at $5,500 each; in all, $28,000.

Mr. GARD. Mr. Chairman, I move to strike out the last word. What is the reason for giving a larger appropriation for the judges in the Territory of Alaska, about $2,000, more than the judges in the Territory of Hawaii?

Mr. WOOD of Indiana. Well, it is the statutory law. We created these salaries under statutory law, and we fixed it at this. This is another sample of the inconsistency, I take it, of salary fixing.

Mr. GARD. I note here that the chief justice of the Territory of Hawaii gets $1,500 less than the judge in Alaska, and the associate judges get $2,000 less. I do not know, unless there is some very great disparity in the court's business of Alaska and Hawaii, why this should be.

Mr. WOOD of Indiana. I do not know. There is some difference in the living expenses. The living expenses in Hawaii are not to be compared with those in Alaska, as I understand. That may have actuated Congress at the time these salaries were fixed. I do not know any other reason. I do not know about there being any disparity in their service.

Mr. GARD. In Hawaii one does not need to wear so much woolen clothing, and in Alaska one does not have to buy ice. That is about the only difference that I know.

Mr. WOOD of Indiana. They both live mostly on fish, I guess.

Mr. GARD. Those are the salaries that have been fixed by law?

Mr. WOOD of Indiana. Yes; for some time.

The Clerk read as follows:

In making readjustments hereunder, the salary of any clerk in any class may be fixed by the Postmaster General at $100 below the salary fixed by law for such class and the unused portion of such salary shall be used to increase the salary of any clerk in any class entitled thereto by not less than $100 above the salary fixed by law for such class. The Postmaster General shall assign to the several bureaus, offices, and divisions of the Post Office Department such number of the employees herein authorized as may be necessary to perform the work required therein; and he shall submit a statement showing such assignments and the number employed at the various salaries in the annual Book of Estimates following the estimates for salaries in the Post Office Department.

Mr. GARD. Mr. Chairman, I reserve the point of order on the paragraph, page 114, lines 1 to 13, for the purpose of asking if this was in the former bill, or is it absolutely a new legislative direction?

Mr. WOOD of Indiana. It was in the bill for four or five years in exactly the same language.

Mr. GARD. In the same language?

Mr. WOOD of Indiana. Yes.

The Clerk read as follows:

For purchase, exchange, hire, and maintenance of horses and horse-drawn and motor-driven passenger-carrying vehicles and repair of vehicles, including motor trucks and harness, $3,100: *Provided*, That the Secretary of War shall transfer without payment therefor to the Postmaster General for use of the Post Office Department a 1-ton motor truck.

Mr. GARD. Mr. Chairman, I make the point of order against the proviso in lines 10, 11, and 12, page 119, providing for the transfer of trucks.

Mr. MOORE of Virginia. May I ask the gentleman why he makes the point of order? Does not the gentleman think it is desirable that unused vehicles in the hands of the War Department should be transferred to departments that need them?

Mr. GARD. I do; but I think they should be transferred after proper investigation by a proper committee. This seems to be a haphazard transfer.

Mr. MOORE of Virginia. May I say to my friend he recognizes there is no comprehensive investigation and there is not any promise of any?

Mr. GARD. There may be a proper legislative investigation.

Mr. WOOD of Indiana. Will the gentleman yield for a moment?

Mr. GARD. Yes.

Mr. WOOD of Indiana. I wish to state what will be the result if this point of order is sustained. Of course, it is subject to a point of order. In this particular case we struck out $900 for a new machine and made this transfer in order to save $900 to the Treasury.

The CHAIRMAN. The Chair sustains the point of order.

Mr. WOOD of Indiana. We are getting over to where we will consider the item in reference to the bonus. I want to state that the whole item is subject to a point of order. There are several paragraphs. I wish to ask at this time unanimous consent that when this item is considered that the whole section 6 may be considered together, and that a point of order be not made against a part of it, but, if a point of order is made, it be against the whole section.

Mr. GARD. With the understanding that no rights are forfeited.

Mr. WOOD of Indiana. I want to ask unanimous consent that when we come to it the whole section be considered together, for the reason that it would be unfair to raise a point of order against one portion and no point of order against another part of it, inasmuch as the whole thing is so interwoven that if any of it goes out it ought all to go out.

Mr. GARD. What is the page?

Mr. WOOD of Indiana. Page 155.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that section 6, page 155, shall be read as a whole and considered as a whole, instead of by paragraphs. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Appropriations made for the service of the Post Office Department in conformity with the act of July 2, 1836, shall not be expended for any of the purposes herein provided for on account of the Post Office Department in the District of Columbia.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. I do this for the purpose of calling to the attention of the committee a matter that has been brought to my attention by the adjutant general of the State of Texas.

We have been carrying in these appropriation bills very large appropriations for additional clerical hire for the War Department, The Adjutant General's office particularly, for the purpose of getting out the service records of the men who served in the World War. I am in receipt of a letter this morning from the adjutant general of my State, which calls attention to the incompleteness of those records in a very marked and signal way. The incompleteness is so well pointed out in the letter that I will read it. It is not very long. It says:

STATE OF TEXAS,
ADJUTANT GENERAL'S DEPARTMENT,
Austin, January 10, 1921.

Hon. CLAY STONE BRIGGS,
Washington, D. C.

MY DEAR CONGRESSMAN: You will doubtless recall that in the annual appropriation for the fiscal year ending June 30, 1920, Congress set aside the sum of $3,500,000 to be expended under the direction of The Adjutant General of the Army in preserving and caring for the selective records and for the purpose of furnishing to the adjutants general of the several States statements of service for all officers and men who served in the Army during the World War. The unexpended balance of this sum was reappropriated for the same purpose this year.

A considerable number of these record cards have already been received by this office, and information given out by The Adjutant General of the Army indicates that this work is being pushed to completion as rapidly as possible. It has been noted, however, that the records which are being furnished are incomplete in some very essential respects.

Especially noteworthy is the fact that records of the officers and men who were killed or died from wounds or other causes do not in any case show the place of death. Many of these records, moreover, fail to show the engagements in which the soldier fought, and in the case of men who were wounded in action only the date is given, the vitally interesting information as to the place and engagement in which wounded being omitted from the record.

You will readily see how important it is that the place of death or the place and engagement in which wounded be given if these records are to be of any great historical value, and since this information is undoubtedly available in most cases, it is not understood why these records should not be made complete in every respect.

As a constituent, and speaking in behalf of the historical associations of this State and the thousands of Texas mothers who are looking to this department for information regarding their sons who died overseas, I wish to strongly urge that this matter be investigated by a congressional committee with the view of ascertaining why these records are not being made complete, since a special appropriation has been made to cover the expense of furnishing complete records.

Assuring you that any action you may take to the end that The Adjutant General of the Army be required to furnish complete records of the men who served during the World War will be deeply appreciated by me personally and by those for whom I speak, I beg to subscribe myself with sentiments of high esteem.

Yours, truly,

W. D. COPE,
The Adjutant General.

It may be that in some cases the records in the possession of the War Department may be incomplete, but certainly wherever that information is available it ought to be now compiled and furnished to the States and to the relatives of the men who served. I have had several instances called to my attention of discharges granted to boys who served on the other side, fought in important engagements there, but whose discharges showed no foreign service whatever. They simply show that they were members of certain companies, when discharged, with other personal data, but with no record of their service abroad or battles in which they fought. Discharges were returned to me in one or two cases by the mothers of boys who were wounded in France and who, after discharge, subsequently died, asking if the discharges could not be corrected in order to reflect the fact that the boys participated in engagements in the World War. Up to this time I have never been successful in accomplishing that, for one reason or another, chiefly because of the difficulty of the War Department, I think, in locating those records of service. Inasmuch as this Congress has provided and required that these records be preserved and that copies thereof be given to the various States of this Nation, so that the record of deathless glory of the boys who served in the World War may be available and known to all, I insist those records ought to be made complete, and everything that this Congress can do to accomplish that ought to be done without delay. If it is necessary for the Committee on Military Affairs or other committee to report additional legislation to insure the compilation of the records as Congress intended, then I hope it will do so, to the end that complete records can be transmitted to the various States and give them what they have a right to have—a true and authentic history of the heroic and unsurpassable service and valor of the boys from Texas and other States in the World War. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

DEPARTMENT OF JUSTICE.

Office of the Attorney General: Attorney General, $12,000; Solicitor General, $10,000; assistant to the Attorney General, $9,000; 6 Assistant Attorneys General, at $7,500 each; Solicitor for the Department of the Interior, $5,000; Solicitor for the Post Office Department, $5,000; Solicitor of Internal Revenue, $5,000; Solicitor for the Department of State, $5,000; 4 attorneys at $5,000 each, one of whom shall have charge of all condemnation proceedings in the District of Columbia and supervise the examination of titles and matters arising from such condemnation proceedings in which the United States shall be a party or have an interest, and no special attorney or counsel, or services of persons other than of those provided for herein, shall be employed for such purposes; attorneys—1 $4,500, 1 $3,750, 4 at $3,500 each, 1 $3,250, 14 at $3,000 each, 2 at $2,500 each; assistant attorneys—1 $3,500, 2 at $3,000 each, 2 at $2,750 each, 5 at $2,500 each, 1 $2,400, 2 at $2,000 each; assistant examiner of titles, $2,000; chief clerk and ex officio superintendent of buildings, $3,500; superintendent of buildings, $500; private secretary and assistant to the Attorney General, $3,600; clerk to the Attorney General, $1,800; stenographer to the Solicitor General, $1,600; law clerks—3 at $2,000 each, 2 at $1,800 each; clerk in the office of Solicitor of Internal Revenue, $1,800; attorney in charge of pardons, $3,600; superintendent of prisons, $4,000; disbursing clerk, $2,750; appointment clerk, $2,000; chief of division of investigation, $4,000; librarian, $1,800; clerks—8 of class 4, 12 of class 3, 12 of class 2, 27 of class 1, 16 at $1,000 each, 15 at $900 each; chief messenger, $1,000; packer, $900; messenger, $960; 6 messengers; 13 assistant messengers; 7 laborers; 7 watchmen; engineer, $1,200; 2 assistant engineers, at $900 each; 2 telephone switchboard operators; 4 firemen; 4 elevator conductors, at $720 each; head charwoman, $480; 24 charwomen. Division of Accounts: Chief, $3,000; administrative accountant, $3,000; chief bookkeeper and record clerk, $2,200; examiners—2 at $2,500 each, 4 at $2,250 each, 2 at $2,000 each, 3 at $1,800 each; clerks—3 of class 4, 6 of class 3, 6 of class 2, 5 of class 1, 3 at $900 each; in all, $484,310.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. I do this in connection with the matter I discussed a moment ago in order to ask the chairman of this committee if he had occasion to investigate the matter to which attention was called by the adjutant general of Texas?

Mr. WOOD of Indiana. I will state to the gentleman that the committee gave it very full investigation. We had similar letters to the one the gentleman read from the adjutant general of Texas from various States of the Union, and we called the matter to the attention of The Adjutant General. And if the gentleman will read the hearings, commencing on page 584, he will see his statement. If it was not so long, I would read it into the RECORD. But The Adjutant General states his excuses there.

Mr. BRIGGS. Will the gentleman state what those excuses are?

Mr. WOOD of Indiana. As I recall it, his contention is that it is not proper information to furnish the adjutants general of the States; that it is information peculiarly valuable to the families of the deceased, and that in order to get it they have to search the hospital records; that every time they receive a request from parents or relatives of the deceased soldier they make that search. I suggested to him that it occurred to me that one of the most valuable things in reference to this record was the place of a man's death and the engagements in which

he participated. If my memory serves me correctly, he said that there were tens of thousands of these cases where the War Department did not know in what place the boys were killed; that if you are to get this information, the places where the soldiers were killed or disabled, that information could be furnished by the hospital records, but it would cost $1,000,000 in addition to what it has already cost.

Mr. BRIGGS. Does not the gentleman think that in order to be valuable and worth while it should be done as soon as possible?

Mr. WOOD of Indiana. I think there is no doubt about that. They are very incomplete now, and I do not think that as much care has been taken in the expenditure of this fund for the collection of the records as should have been taken. I may say that the form of the card now issued by the several adjutants general was gotten up as a result of a conference with the adjutants general of the several States of the Union, quite a number of them, and as a result of the criticisms made they finally formulated the card that was adopted; and I think, among other things, this particular item of information as to where the soldier fell was not added to the card by the adjutants general at the time the standard card was agreed to, because it was not suggested.

Mr. BRIGGS. Is it the purpose of The Adjutant General to get up such supplemental information and communicate it to the various States?

Mr. WOOD of Indiana. It is not.

Mr. BRIGGS. Is it not the gentleman's feeling that that ought to be done and that the Congress ought to indicate that it should be done?

Mr. WOOD of Indiana. I suggested to The Adjutant General, inasmuch as the service records of these boys are supposed to be completed, although they are not fully comprehensive, that they should be made complete. All the papers concerning these soldiers, you must understand, are in a jacket by themselves. The contents of these jackets are used by these clerks in making up these service records. I suggested to him that in many of them the very information which it is complained is not being furnished has not been included, and that information should be placed on the cards as far as possible. He said that would consume a great deal of time and that not to add it to all of them would cause more trouble than ever.

Mr. BRIGGS. It is my opinion that these records, in order to be of real value, ought to be complete in every case where it is possible to make them so.

Mr. WOOD of Indiana. I expect we were a little premature in making appropriations before they were ready to expend them properly and before these hospital records were completed. They will all be in the hands of The Adjutant General, and then we will be asked to make another appropriation of a million or more in order to complete this uncompleted work.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BRIGGS. Mr. Chairman, I ask unanimous consent to proceed for one minute more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BRIGGS. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks. Is there objection?

There was no objection.

Mr. BRIGGS. Because of the great interest in this question I call attention to part of the testimony in the hearings before the Appropriations Committee:

Gen. HARRIS. That is the only point that is at issue, and I would like to explain the way the matter was started and the development of it.

Before doing any work whatever I addressed a letter to the adjutant general of every State and inclosed a card showing just what I really thought we could furnish with the appropriation available, and I asked them to make suggestions. They made very few suggestions, and nearly all of the suggestions that were made were approved and were embodied in that card as we finally printed it and as we are now using it. The only item that has caused the adjutant general of Iowa so much concern, and through him the adjutants general of all the States, is that in connection with the place of death.

Our reports coming from France give the dates only. We get a cablegram giving the date of death. The place of death frequently is not shown on any of our records. A man would go to a hospital and the organization report would show that he left the front wounded for the hospital. An exhaustive search through all the hospital records will show that that man died at a particular hospital. The place of death is not on the individual record. If mothers write us, we must search the hospital records and try to give the places of death. But that involves a very extensive search in order to find the place of death, and the Secretary declined to give it on the statement of service cards because we thought it would cost fully a million dollars to work out the places of death in the cases of all these men; that is, at this particular time.

Mr. WOOD. The records of your office with reference to any given soldier are not complete and they will not be complete unless you do have on them the place of death.

Gen. HARRIS. The place of death is there somewhere, but it is not in a vast number of cases on the service record or on the individual record. It is in the hospital records, and we have not the time and money now to dig out the place of death for these records.

Mr. WOOD. If this work is to be done over again for the purpose of completing these records, which was supposed to be the purpose of these appropriations, you will have to go over this again and it will require as much more money to do the incompleted work as it has to do this partially finished work.

Gen. HARRIS. Not at all. We simply have to go to the hospital records to determine the place where a man died.

Mr. WOOD. You say it will take a million dollars to do it?

Gen. HARRIS. I think so.

Mr. WOOD. But if we have not the complete records of these soldiers we have at least wasted a million dollars in trying to do the work before The Adjutant General was prepared to do it.

Gen. HARRIS. The record is complete except as to one point, and that is the place of death.

Mr. WOOD. Do you not think that that is a very essential point?

Gen. HARRIS. I do not, not for the adjutants general of the States.

Mr. WOOD. Nearly every State after the Civil War got out a set of reports. The Indiana reports give all this data.

Gen. HARRIS. The information I am furnishing now is far more complete than any information of that sort which the adjutants general of the States ever had in the history of the United States.

Mr. WOOD. Possibly that is true, because you have had more money with which to do the work.

Gen. HARRIS. I am not so sure that I have had, because for prior wars it is spread over a long period of time.

Mr. WOOD. We have been appropriating it; I do not know what has been done with it.

What about this statement in which you say you are not going to say anything more about the discharges because of the fact that mistakes have been made and will continue to be made?

Gen. HARRIS. As I remember it, I told that adjutant general that that might be necessary. It has not become necessary. We are giving the dates of discharge as shown by the service records.

STATUS OF WORK.

Mr. WOOD. What percentage of these records have you gotten completed?

Gen. HARRIS. On October 31 we had completed 1,138,967 out of a total of 4,237,348.

Mr. WOOD. About one-third?

Gen. HARRIS. A little more than one-fourth. At the rate we are now turning them out we will complete all of this work, except the cases where there is some conflict of record that will require special search, within the appropriation now available and before the end of the fiscal year.

Mr. WOOD. You say you will complete the work within the appropriation?

Gen. HARRIS. Yes, sir. Our work so far has been in the preliminary stage, getting the things ready so we can turn them out.

Mr. WOOD. This letter from the adjutant general of Iowa is under date of November 16. He says only about 11 per cent of these records had been delivered to the States, and that you have not even furnished the records up to date of all the dead.

Gen. HARRIS. The difference between what he has received and what I give here are those in process of being mailed to them. We number them and keep statistics of those sent out. But the actual number that had been completed on October 31 was what I gave you a moment ago. We are turning them out at the rate of nearly 15,000 cards a day now.

INABILITY TO FURNISH PLACE OF DEATH.

Mr. WOOD. What have you to say with reference to the criticism that when these men have tried to get the information which your card does not furnish they have been advised to get it from the families of the deceased?

Gen. HARRIS. That is in regard to the place of death?

Mr. WOOD. They say they tried to get it from you, and they could not succeed in getting it from the War Department.

Gen. HARRIS. There will probably be thousands of cases where we will never know where the man died. We have had to presume from our records that men died of wounds received in action. They simply left the company wounded, and that is the last we know of them. We are hunting through the hospital records, and every day or two we are locating the place of death of another man. But that work will require an exhaustive and very long search. Eventually we will put it on the card of the individual, and then we can furnish it to the adjutants general of the States. I would like to repeat that we are furnishing more information of every kind than has ever been attempted in the history of the world.

Mr. WOOD. One reason for that is that after the Civil War this work was not attempted for 15 or 20 years.

Gen. HARRIS. The difference is in the way our records are kept. They are kept in such shape that we can furnish information more promptly. We are now where we were 30 years after the Civil War in so far as the information we furnish to the adjutants general of the States is concerned; that is, what we are now giving them was not available to the adjutants general of the States for 30 years after the Civil War. They had to go through the various rolls of organizations and we have eliminated that by our system of record keeping.

Mr. WOOD. The system of record keeping during the present war was supposed to be up to date as compared with what these people had before.

NUMBER KILLED IN WAR.

Mr. SISSON. In connection with the place of death of the soldiers, how many were killed or died in the war?

Gen. HARRIS. There were 107,412 deceased, and 189,655 wounded.

* * * * * * *

Mr. SISSON. What search do you make of the hospital records now in making this service card?

Gen. HARRIS. We do not search the hospital records. We found it was impossible, with the money available, to go through any records and get any information not actually in the jackets with the service records. In the jacket we have the enlistment record which, of course, is an accurate record; then we have the service record, which begins

at the time of enlistment and follows the man until he is discharged, when it comes to our office. They are kept in the company, and we have found a good many mistakes in them.

* * * * * * *

Gen. HARRIS. Our declining to put the place of death on the card does not indicate that we have let up a particle in our efforts to determine that and to furnish the information to the families. It simply means that we have not got the data in such shape that we can put it on the statements of service cards.

Mr. SISSON. You have above and beyond a mere sentimental value a real and almost tragic value sometimes to the family, which would be to have an absolute certainty of the death of the boy in the Army. I do not know that the place of death would amount to so much, but in order to ascertain that the man died it would be necessary that the records show the place of death. I have some cases of that kind, and I have to tell them——

Gen. HARRIS (interposing). We are doing everything that is humanly possible to determine that.

Mr. WOOD. Do you not put on any of these cards the date and place of death?

Gen. HARRIS. We give the date of death, but not the place. Our cable reports contain the date of death.

Mr. WOOD. Some of these jackets have the information with reference to the place of death of the soldier?

Gen. HARRIS. Some do and some do not.

Mr. WOOD. Where they do have it and where it can be put on without any trouble, why do you not put it on so that you would save yourselves that much?

Gen. HARRIS. The point was not raised by any adjutant general until the cards had been typewritten; no one asked that that be put on there until the cards for deaths were all typewritten.

Mr. WOOD. Are the cards all typewritten?

Gen. HARRIS. Yes, they are; and have been delivered to the States. The point came up after that phase of the work had been completed, and that is why it will cost that amount of money now to get that one item.

Mr. WOOD. It did not occur to you in advance that there would be any question about that?

Gen. HARRIS. The adjutants general of the States had all the cards, and they did not bring it up at that time.

Mr. WOOD. You say they had the form of the cards?

RECORDING ENGAGEMENTS IN ISSUE OF VICTORY MEDALS.

Gen. HARRIS. They had the form of the cards. We sent them the printed form and they practically approved it before we began to typewrite any of them.

One thing that the adjutant general of Iowa said was that in case of death our record did not show that any of them had been in engagements. In the issuing of the victory medals we are compelled to go through our records to determine what engagements a man participated in.

Mr. WOOD. Why did you not put that on the cards?

Gen. HARRIS. On our card as originally prepared we had a place for the engagements, but we found it would be more economical to the Government to furnish the adjutants general of the States with copies of the cards we use in issuing the victory medals. Those copies show the engagements, and we will furnish them to the adjutants general of the States.

Mr. WOOD. That will only show the engagements of those entitled to the victory medals?

Gen. HARRIS. Every man who served in the war is entitled to a victory medal, and those who participated in engagements are entitled to battle clasps, and we determine what clasps shall be put on the medal. We have to furnish the Quartermaster Corps with the list of engagements, so we are going to give the adjutants general copies of those cards which will furnish that information.

Mr. WOOD. How much additional will that cost the Government?

Gen. HARRIS. Of course, that is costing a lot of money; I do not know just how much.

Mr. WOOD. I mean how much additional will it cost the Government because of the information that you furnish to the adjutants general in regard to these engagements?

Gen. HARRIS. We are furnishing that information as an incident to the issuance of the victory medals. We simply make out two cards for each victory medal. We make a carbon copy of the application card which shows the engagements.

Mr. WOOD. What is your estimate as to how much the work necessary in furnishing this information to the adjutants general will add to the cost of the victory medal?

Gen. HARRIS. I should say it is simply the making of a carbon copy; that is all.

Mr. WOOD. What will it cost, from first to last, for furnishing this information, including clerk hire and everything else?

Gen. HARRIS. You mean the information furnished the adjutants general of the States?

Mr. WOOD. Yes.

Gen. HARRIS. About 50 cents a card; about $2,000,000 altogether. The difference between the $2,000,000 and the $3,500,000 appropriated is for the work connected with the selective service records.

Before we leave the statements of service cards, I have a few more words I should like to say on that subject.

To show the committee the nature and the extent of the information that we are actually furnishing the adjutants general of the States, I would like to read the headings of the cards on which we prepare these statements. I will take a card that we prepare in the case of a soldier who was killed in action. First, we give the soldier's surname, his Christian name, his Army serial number, and his race, whether white or colored. We then give his residence, street, and house number, town or city, county, and State; whether he entered the service through enlistment or induction; whether from the National Guard, Regular Army, or enlisted reserve corps; the date of his entry into the service, his place of birth; his age or date of birth; organization in which he served, with the dates of assignments and transfers, grades, and the dates of appointments and engagements. The engagements, as I explained, are furnished now on a separate card. Service overseas, giving the date of sailing from the United States, the arrival in France, and the return from France to the United States; killed in action on a date which is furnished; other wounds or injuries received in action; persons notified of death; name and degree of relationship, the number and street or rural route, city, town, or post office, State or county; and a place for remarks is also provided for on the card.

The other cards are substantially the same as that.

In connection with the place of death, when the cards were originally sent out to the State adjutants general for approval, one, or possibly two, of the adjutants general suggested that it would be advisable to show the place of separation from the service, which in the case of death, of course, would be the place of death. I wrote them explaining the difficulties in the way, due to the fact that the service records frequently would not give the place of separation from the service, and told them that I thought the expense involved in putting that data in was greater than would be justified, and that we are already furnishing as much information as I felt could be furnished with the appropriation. Our effort was to furnish the adjutants general of the States just as much information as we could with the money available, and that has been considered all through.

Mr. WOOD. The trouble, General, is this, that you have not furnished the complete information, and it is not going to be satisfactory to anybody, and it never will be satisfactory until this complete information is furnished, and it occurred to me that it is going to result in our spending a whole lot of money that need not have been expended if we had made the thing complete as we went along.

Gen. HARRIS. It would have very materially delayed the preparation of these cards and very greatly increased the expense. It is not the typeing of those cards with that information on it that is expensive; it is the searching the records for the information.

Mr. WOOD. You stated, if I understood you correctly, that on that card you were furnishing the engagements, but you did not furnish it on that card.

Gen. HARRIS. We are going to furnish that on a separate card.

Mr. WOOD. That is going to require some additional effort. It might have been furnished at the same time without that additional effort, might it not?

Gen. HARRIS. No. There are several things in connection with that. The first is that in order to get the engagements it is necessary to make a search of the organization records, and each case requires a special search of the records. The man himself, in making application, claims that he has served in certain engagements. We then take his claim and go through all of our organization records, as well as the hospital records, and determine whether or not the record substantiates his claim.

Mr. WOOD. Do you take the man's claim as the basis of what action he was engaged in? Have you not a positive record of the units and different organizations and the engagements they were in? Is not that a part of the Army record, without regard to the man's claim?

Gen. HARRIS. Yes; except that the record is scattered in a number of different places, and we thought it would be better to ask the man to make his claim, as we could look up his record more readily. If the claim is that he served in a particular engagement in a particular organization on a given date, we will go to that particular organization and find out whether the record shows it. That is more economical than to have to go through all the records each time.

Mr. WOOD. Suppose a man never made any claim about it. Then you would have no record of that man?

Gen. HARRIS. Well, for those that make no claim we will go through their records and determine it.

Mr. WOOD. After a while they will be asking, as the soldiers of the Civil War are now asking, for their military and medical records. Some time or other you must have a complete record of this thing, must you not?

Gen. HARRIS. We are completing the records every day. It is a rather complete record. It is more than ever was attempted to be furnished at any time in our past history.

The place of death, of course, is one item that may be desirable, and after the other work is completed, if there is any money available, or even next year, if the clerks are available, I will be very glad to furnish it, but it is a mistake to say that it costs considerably more to do it as separate operations than to do it when you prepare the other card. The difference is simply in writing the man's name twice. In making the new card we have got to make a heading to show his name, which would not be necessary if we put it all on one card. We have to make a special search in every one of those cases, or the vast majority of them, because the service record in that respect is very deficient.

Mr. WOOD. Is that all you have to say on the subject?

Gen. HARRIS. I might mention one particular case of a soldier to show some of the difficulties we had in France. I remember particularly the case of a soldier who was at a hospital. We have a record of his movements up to that time, but that was the last we heard from him except that he left the hospital. His family wrote about him. I wrote hundreds of letters, literally. His friends wrote about him. They said they knew this man could not have deserted. He never reached the organization after he left the hospital. We searched through the other hospital records to see if that man could have reached any of these different hospitals. We finally discovered from the records of one of the way stations there that this man passed through that station on a certain date. They did not show where he was going, simply that he passed through there. We also found from another record that there had been a railroad accident near this place, and that an unidentified American soldier was killed and his remains were buried. We finally put those two records together; sent to France and had the body disinterred, had a chart made of his teeth, measured the body to determine his height, and got such other personal description as could be made at that time. We then compared that description with his physical examination when he entered the service, and we have now reached the conclusion that this unidentified soldier who was killed in this railroad accident was the man who disappeared after leaving the hospital.

We have had hundreds of just such cases as that. We are furnishing the family with all the information available, and we will continue to do so. We follow every clue. We are writing to everybody that knows anything about it, and a little bit later we hope to have the information as to place of death where we can furnish it to the adjutants general of the States as a separate undertaking. We are furnishing the information immediately to the relatives, and we furnish the adjutants general with the names of the relatives, from whom they can get the information.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Shipping service: For shipping commissioners in amounts not exceeding the following: Baltimore, $2,000; Boston, $3,000; New Bedford, $1,200; New Orleans, $2,500; Newport News, $1,500; New York, $5,000; Norfolk, $1,800; Philadelphia, $2,400; Bath, Me., $1,000; Rockland, Me., $1,200; Portland, Me., $1,300; Charleston, S. C., $1,200; Seattle, $3,500; Providence, $1,800; Galveston, $1,800; San Francisco, $4,000; in all, $35,200.

Mr. DUPRÉ. Mr. Chairman, I desire to offer an amendment in line 21, page 130, to strike out the figures "$70,000" and insert in lieu thereof the figures "$83,200."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Louisiana.

The Clerk read as follows:

Amendment offered by Mr. DUPRÉ: Page 130, line 21, strike out the figures "$70,000" and insert in lieu thereof the figures "$83,200."

Mr. BLANTON. Mr. Chairman, I make a point of order against the amendment.

Mr. DUPRÉ. The amendment is not subject to a point of order at all.

Mr. BLANTON. These are statutory positions, and the amount is fixed by law and controlled by law.

Mr. DUPRÉ. Not at all. The amount that can be allotted to this particular service is entirely in the hands of Congress. Whether this particular amount should be increased or not is a matter that I shall undertake to discuss later. But the particular amount that is to be disbursed is not fixed by any form of statute. It depends upon the particular view that the Congress may take of the service at any time.

The CHAIRMAN. The Chair thinks it does not require legislation to fix the total amount, and therefore the Chair overrules the point of order.

Mr. DUPRÉ. The amount asked by the Bureau of Navigation in the Department of Commerce for this particular item in its estimate was some $92,000. The amount allowed by the committee is the amount that is carried in existing law. It is true that the last time this bill came before the Congress there was an increase in the amount allowed for clerk hire, but it has proven insufficient, and the object of my amendment is not to increase the pay of any existing employee or permit the promotion of any existing employee to another and higher grade, but simply to give 11 additional clerks to various shipping commissioners in different parts of the country.

On page 1225 of the hearings, the Commissioner of Navigation, Mr. Chamberlain, being on the stand, and his assistant, Mr. Tyrer, the latter gentleman stated:

Mr. TYRER. We are asking for one new clerk at Baltimore, two new clerks at New Orleans, four new clerks at New York, one new clerk at Savannah, two new clerks at Portland, one new clerk at Seattle.

That is, 11 new clerks are asked, and I have concluded that the minimum wage for which proper employees could be secured would be on a basis of $1,200 per annum, and to take care of these 11 employees at $1,200 per annum I have moved to increase the allowance from $70,000 to $83,200.

I do not know what the conditions are at New York, Seattle, Portland, and Baltimore, but I do know what the conditions are at New Orleans. My colleague and myself and the two Senators from Louisiana are constantly receiving protests from the shipping interests there, to the effect that the clerical force in the office of the shipping commissioner is absolutely insufficient to meet the needs of the port. When we have appealed for relief to the Department of Commerce we have been informed that the appropriation is not sufficient to grant additional clerks in New Orleans, and I assume the same conditions must apply in other places.

With a view to having proper service given to this important branch of our Government, I move to amend in the manner I indicated by the amendment which I have offered. I have a letter here from the president of the Steamship Association at New Orleans, S. T. De Milt, in which he says:

I am pleased to advise that as a result of your efforts one additional clerk was allocated to the office of United States Shipping Commissioner Smith E. Reynolds at New Orleans.

It is a fact, however, that this slight increase in the office force has not resulted in enabling the shipping commissioner to render full efficiency in handling this branch of the Bureau of Navigation at this port. The business of that branch continues to increase at a rapid rate, and Mr. Reynolds's annual report for the fiscal year ending June 30, 1920, shows an increase of 19,172 men shipped and discharged over the year which ended June 30, 1919. His force is handling business at the rate of approximately 100,000 men per year, as compared with 48,950 men during the year 1919.

You are, therefore, respectfully requested to make another effort during the present session of Congress to secure for the New Orleans branch of the Bureau of Navigation, under the jurisdiction of Commissioner Reynolds, at least four additional clerks.

I think the amendment ought to prevail, and I hope the gentleman from Indiana will view it in that light.

Mr. WOOD of Indiana. Mr. Chairman, the purpose of this amendment is to increase the salaries of these clerks.

Mr. DUPRÉ. I distinctly disclaimed any such intention. I said it was to add 11 new clerks.

Mr. WOOD of Indiana. The hearings disclose the fact that the commissioner having this work in charge asked this increase for the purpose of making some additions, and for the purpose of increasing the average salaries of his clerical force from $1,000 to $1,250 per annum.

The committee recommended the same appropriation that is carried in the current law. We did not reduce it in the least. If we made any mistake we made it in not reducing the amount, because it is a fact that the shipping activity is not nearly what it was at the time we made the appropriation in this bill last year; so that there is absolutely no necessity for the increase of this appropriation unless it is for the increasing of the salaries of these clerks, as stated in the hearing. This is now denied by the gentleman from Louisiana [Mr. DUPRÉ], and I take it for granted that he knows what he is talking about; but the commissioner having the matter in charge stated that he wanted to increase these salaries.

Mr. DUPRÉ. But I called attention to the fact that he said he needed 11 new clerks to be distributed at these points, and my amendment would provide only sufficient money to allow these new clerks at the various offices. I do not ask to increase the salary of anyone in this branch of the service at all. I am trying to get efficient service, which can only be secured at New Orleans and other ports in the country by the allowance of a sufficient sum to provide for the employment of the necessary clerical force. The gentleman from Indiana ought not to state my object to be a different one, as I distinctly stated the object I had in mind in offering the amendment.

Mr. WOOD of Indiana. I accept the statement of the gentleman, but I contend that as they got along with this appropriation all right last year there will not be any greater necessity for it this year than there was then.

Mr. DUPRÉ. But they did not get along all right.

Mr. WOOD of Indiana. There is a constant effort to increase these bureaus. This one has been doing pretty well. The appropriation carried in this bill is $70,000. In 1915 it was $35,000. It has just been growing each year until they have exactly doubled the amount of this item.

Mr. DUPRÉ. The shipping business of the country has more than doubled.

Mr. WOOD of Indiana. It has not been anywhere near doubled, and the hearings showed that it is not what it was a year ago. If there is any need for these clerks now, there was an overwhelming necessity for them some time ago.

The CHAIRMAN. The question is on the amendment of the gentleman from Louisiana.

The question being taken, on a division (demanded by Mr. DUPRÉ) there were—ayes 22, noes 40.

Accordingly the amendment was rejected.

The Clerk read as follows:

Contingent expenses, Department of Commerce: For contingent and miscellaneous expenses of the offices and bureaus of the department, for which appropriations for contingent and miscellaneous expenses are not specifically made, including professional and scientific books, law books, books of reference, periodicals, blank books, pamphlets, maps, newspapers (not exceeding $2,500); stationery; furniture and repairs to same; carpets, matting, oilcloth, file cases, towels, ice, brooms, soap, sponges; fuel, lighting, and heating; purchase and exchange of motor trucks and bicycles; maintenance, repair, and operation of one motor-propelled passenger-carrying vehicle and of motor trucks and bicycles, to be used only for official purposes; freight and express charges; postage to foreign countries; telegraph and telephone service; typewriters, adding machines, and other labor-saving devices, including their repair and exchange; repairs to building occupied by offices of the Secretary of Commerce; rental of water-cooling plant in Commerce Building, not to exceed $1,400; first-aid outfits for use in the buildings occupied by employees of this department; storage of documents belonging to the Bureau of Lighthouses, not to exceed $1,500; street car fares, not exceeding $300; and all other miscellaneous items and necessary expenses not included in the foregoing, $50,000, and in addition thereto sums amounting to $50,750 shall be deducted from other appropriations made for the fiscal year 1922 and added to the appropriation "Contingent expenses, Department of Commerce," in order to facilitate the purchase through the central purchasing office as provided in the act of June 17, 1910 (Stats. L., vol. 36, p. 531), of certain supplies for bureaus and offices for which contingent and miscellaneous appropriations are specifically made as follows: Bureau of Foreign and Domestic Commerce—promoting commerce $4,500, promoting commerce (South and Central America) $3,000, commercial attachés $6,000, promoting commerce in the Far East $4,000; general expenses, Lighthouse Service, $8,500; contingent expenses, Steamboat-Inspection Service, $7,500; contingent expenses, shipping service, $500; instruments for measuring vessels, $500; instruments for counting passengers, $250; enforcement of wireless communication laws, $1,000; Bureau of Standards—equipment $1,000, general expenses $1,000; general expenses, Coast and Geodetic Survey, $4,500; miscellaneous expenses, Bureau of Fisheries, $8,500; and the said total sum of $100,750 shall be and constitute the appropriation for contingent expenses, Department of Commerce, to be expended through the central purchasing office (Division of Supplies), Department of Commerce, and shall also be available for objects and purposes of the several appropriations mentioned under the title "Contingent expenses, Department of Commerce," in this act.

Mr. BLANTON. I move to strike out the last word, for the purpose of getting information. I want to ask the chairman of the committee why it is necessary to allow this department $2,500 for the purchase of newspapers, as shown on page 140.

Mr. WOOD of Indiana. It is not all for newspapers.

Mr. BLANTON. It says not exceeding $2,500.

Mr. WOOD of Indiana. For law books, books of reference, periodicals, blank books, pamphlets, maps, and newspapers.

Mr. BLANTON. But they could spend this whole sum on any one of these items if they wanted to.

Mr. WOOD of Indiana. They submit an itemized account of the manner in which they expend it.

Mr. BLANTON. Why should we allow them anything for newspapers? Why should they not buy their own newspapers?

Mr. WOOD of Indiana. The Department of Commerce is a very important activity in the Government of the United States, and I take it that in order that they may be informed as to what is going on in the commercial world, they ought to be in touch with the commercial news. These are largely commercial papers. There are all sorts of commercial papers. Every State in the Union has some chamber of commerce which gets out a periodical. In the great commercial cities there are dailies devoted to matters of commerce, and I believe that the Department of Commerce, which is supposed to be the fountainhead of all our commercial relations, not only in this country but with foreign countries as well, ought to have some means of informing itself.

Mr. BLANTON. I take it that every citizen of the United States who has any enlightenment at all takes the newspapers of the country. There was a time when the farmers did not take them, because of the irregularity of mails, but now every morning the newspapers are delivered by the rural carriers to the homes of all the farmers. They read them, too. And they pay for them. Why should we pay for the newspapers for every one of these departments?

Mr. WOOD of Indiana. The commercial news received by this clearing house of the commerce of the world must be gathered not from the Washington Post or the Washington Star but from the commercial centers all over the country. Commerce is a very sensitive thing, and I expect that if the departments were derelict, if they did not keep themselves posted with reference to the activities of the commercial world generally, we would complain about it very much.

Mr. BLANTON. I notice that the committee has allowed this department, as it has done the others, practically everything on earth that one could think of or they could possibly wish, officially and personally. Therefore, I presume it is all right for the chairman to allow them newspapers. I withdraw the pro forma amendment.

The Clerk read as follows:

Commissioners of conciliation: To enable the Secretary of Labor to exercise the autority vested in him by section 8 of the act creating the Department of Labor and to appoint commissioners of conciliation, for per diem in lieu of subsistence at not exceeding $4, traveling expenses, and not to exceed $12,000 for personal services in the District of Columbia, $100,000.

Mr. WASON. Mr. Chairman, I notice on page 143, line 13, that the word "authority" is incorrectly spelled. I ask unanimous consent that the Clerk be authorized to spell the word correctly.

The CHAIRMAN. Without objection, it will be so ordered.

There was no objection.

The CHAIRMAN. The Chair would call the attention of the gentleman from Indiana to the fact that on page 139, line 15, the word "industrial" is misspelled.

Mr. WOOD of Indiana. Mr. Chairman, I ask unanimous consent that the spelling of that word be corrected.

The CHAIRMAN. Without objection, it will be so ordered.

There was no objection.

Mr. GARD. Mr. Chairman, I move to strike out the last word for the purpose of making an inquiry of the chairman of the committee about what may be an inconsistency. I note on page 143, line 16, that provision is made for per diem in lieu of subsistence of not exceeding $4, and on page 144, line 8, apparently the rate of subsistence is not exceeding $8 per day.

Mr. WOOD of Indiana. Mr. Chairman, if the gentleman will note the punctuation, I think that will clarify the situation. On page 144 the provision for $8 a day is the salary allowance, not the subsistence.

Mr. GARD. I thought it was the same thing on page 144 as on page 143—per diem in lieu of subsistence of special agents.

Mr. WOOD of Indiana. The gentleman will note that there is a semicolon after the word "transportation." The per diem is fixed by law.

Mr. GARD. Is there supposed to be a different condition between the necessary expenses for the commissioners of conciliation, who are to get $4 per day, and the expenses of the special agents and employees, who get $8 per day?

Mr. WOOD of Indiana. The $8 per day is their pay. That is not for expenses at all. They are paid at the rate of not exceeding $8 per day. The other item is for subsistence.

Mr. GARD. What is the gentleman's construction, anticipating a little bit, on page 144, line 5, where there is a provision for per diem in lieu of subsistence of special agents and employees and for their transportation? How much do they get per day in lieu of subsistence?

Mr. WOOD of Indiana. Four dollars. That is the amount fixed by law.

The Clerk read as follows:

For per diem in lieu of subsistence of special agents, and employees, and for their transportation; experts and temporary assistance for field service outside of the District of Columbia, to be paid at the rate of not exceeding $8 per day; temporary statistical clerks, stenographers, and typewriters in the District of Columbia, to be selected from civil-service registers and to be paid at the rate of not exceeding $100 per month, the same person to be employed for not more than six consecutive months, the total expenditure for such temporary clerical assistance in the District of Columbia not to exceed $6,000; traveling expenses of officers and employees, purchase of reports and materials for reports and bulletins of the Bureau of Labor Statistics, $69,000.

Mr. BLANTON. Mr. Chairman, I reserve the point of order against the paragraph for this reason: I called the attention of the chairman of the committee a few moments ago to the very question which was raised by the gentleman from Ohio [Mr. GARD] a moment ago with respect to this per diem in lieu of subsistence allowance on page 144, in this paragraph, of not exceeding $8 a day. The chairman then stated that he thought that the punctuation would control it. In order that the matter may be absolutely clear, would the chairman object to an amendment designating that the per diem allowance shall not exceed $4?

Mr. WOOD of Indiana. That is fixed by law. I suggest a better amendment, I think. After the semicolon, in line 6, insert the words "compensation of" immediately before the word "expert."

Mr. BLANTON. Why not fix it so that there can not be any doubt about our intention not to increase the per diem allowance in lieu of subsistence from $4 to $8 per day? The department, as the gentleman knows, has a habit of putting a different construction on language from that which Congress intended.

Mr. WOOD of Indiana. They could not put any different construction on this, because the per diem rate is fixed by law.

Mr. BLANTON. Then, as fixed by law—

For per diem in lieu of subsistence of special agents and employees, and for their transportation, not exceeding the amount fixed by law.

Mr. WOOD of Indiana. I have no objection to that.

Mr. BLANTON. The gentleman would agree to that amendment?

Mr. WOOD of Indiana. Yes.

Mr. BLANTON. Then, Mr. Chairman, I withdraw the reservation of the point of order and offer the amendment which I have suggested.

The CHAIRMAN. The gentleman offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Page 144, line 6, after the word "transportation," insert the words "not exceeding the allowance now fixed by law."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. GARD. Mr. Chairman, as a substitute for that I offer to amend, after the word "subsistence," in line 5, page 144, by inserting the words "at not exceeding $4."

Mr. WOOD of Indiana. I think that is better.

Mr. BLANTON. I accept the gentleman's substitute.

The CHAIRMAN. The gentleman from Ohio offers an amendment which the Clerk will report.

The Clerk read as follows:

Substitute offered by Mr. GARD: Line 5, page 144, after the word "subsistence," insert "at not exceeding $4."

The CHAIRMAN. The question is on agreeing to the substitute offered by the gentleman from Ohio.

The substitute was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment as amended by the substitute.

The amendment as amended was agreed to.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks and withdraw the pro forma amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington? [After a pause.] The Chair hears none.

The Clerk read as follows:

District courts: Ninety-nine district judges, at $7,500 each, $742,500: *Provided*, That this appropriation shall be available for the salaries of all United States district judges lawfully entitled thereto for the fiscal year 1922.

Mr. HUDSPETH. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. I see there is an appropriation here for district judges. Are Federal attorneys paid a salary?

Mr. WOOD of Indiana. Yes.

Mr. HUDSPETH. What was the appropriation in here?

Mr. WOOD of Indiana. That is carried in the sundry civil act.

Mr. HUDSPETH. Mr. Chairman, I would like to ask the gentleman if he recalls whether or not they are paid the same salaries throughout the United States?

Mr. WOOD of Indiana. I understand their salaries differ.

Mr. HUDSPETH. In different districts.

Mr. BEE. In reply to the question of my colleague from Texas I would like to state that the salaries of United States attorneys differ in different places. The gentleman from Texas my colleague [Mr. GARNER] and myself prepared a bill, which I have introduced, to raise the salary of the district attorney at San Antonio, who now receives $4,000, which bill is now before the Committee on the Judiciary.

Mr. HUDSPETH. If the gentleman will permit, he receives $4,000 now.

Mr. BEE. Yes; but other district attorneys in different parts of the country receive more.

Mr. WOOD of Indiana. I think the highest salary paid——

Mr. HUDSPETH. I would like to ask whether or not a uniform salary is received in Texas by district attorneys?

Mr. BEE. I could not speak with knowledge, but I am inclined to think that it is uniform. I know the district attorney of San Antonio receives $4,000 a year.

The Clerk read as follows:

National Park commissioners: For commissioners in the Crater Lake, Glacier, Mount Rainier, Yellowstone, Yosemite, and Sequoia and General Grant National Parks, at $1,500 each, $9,000. The provisions of section 21 of the legislative, executive, and judicial appropriation act approved May 28, 1896, shall not be construed as impairing the rights of said commissioners to receive the salaries provided herein.

Mr. GARD. Mr. Chairman, I reserve a point of order against the paragraph for the purpose of asking what is the meaning of lines 6, 7, 8, 9, and 10, page 150, where it says the provisions of this particular section 21 shall not be construed as impairing the rights of said commissioners to receive the salaries provided herein.

Mr. WOOD of Indiana. Well, that is for the purpose of receiving fees. The language of this paragraph is for the purpose of allowing these gentlemen to receive certain fees which I understand amount to but little.

Mr. GARD. This would permit them to receive both fees and salaries?

Mr. WOOD of Indiana. I understand they receive $1,500 and then some fees, I forget what those fees amount to, but practically nothing, for some small service which is a matter of convenience. They are given certain semijudicial powers.

Mr. GARD. I am interested for the reason I think these national park commissioners ought to be paid by the National Government, and there should be no part of their revenue which should come from assessing those who tour these national parks to pay these commissioners.

Mr. WOOD of Indiana. There is not anything of that character, I understand. They have a certain semiofficial capacity, the right to do certain things for which they can charge certain fees. I do not know exactly what that is.

Mr. GARD. I was not familiar with the provisions of section 21 in the act and thought possibly the gentleman who is chairman of the subcommittee could tell me.

Mr. WOOD of Indiana. We did go into it, not this year but last year; but my memory is a little hazy in consequence, but the amount brought in by fees is very insignificant, and we felt that we should not interfere with that until it amounts to something. I could look the matter up and find out, but it would take a little time to do it.

Mr. GARD. Well, if the gentleman is satisfied the fees are not of any consequence and are not imposed on the tourists who go there——

Mr. WOOD of Indiana. There is no complaint.

Mr. MILLER. Will the gentleman permit me to ask him if this is the salary for all these commissioners, $1,500 each?

Mr. WOOD of Indiana. Yes.

Mr. MILLER. Does the gentleman happen to know what the compensation of the superintendents is?

Mr. WOOD of Indiana. The salary? That is carried in the sundry civil act. I do not happen to know what it is, but it varies in different parks.

Mr. MILLER. I am aware it is in that bill.

Mr. GARD. Just a moment, in the same connection. Is this supposed to cover fees that our commissioners may charge to the men establishing concessions in the parks?

Mr. WOOD of Indiana. They have absolutely nothing to do with these concessions. It is pay for acting in a semijudicial way. It is not for anything connected with concessions. All that jurisdiction is under the Department of the Interior and is directly under the supervision of the superintendent of the national park.

Mr. GARD. My observation is sometimes these establishments of concessions lead to results which, I am afraid, are not contemplated by this legislative body. I think they tend to establish a monopoly sometimes for the financial benefit of persons.

Mr. WOOD of Indiana. We have never had any complaint in reference to fees collected by these commissioners in that direction.

Mr. MANN of Illinois. They are court officers?

Mr. WOOD of Indiana. They are just simply court officers.

Mr. MANN of Illinois. And they enforce the criminal statutes?

Mr. WOOD of Indiana. It is very essential that they have them, too. What little infractions they have in these parks are tried before the commissioner. He is a sort of a justice of the peace. If it was not for them, they would not have enough to do.

The CHAIRMAN. The Clerk will read.

Mr. SMITH of Idaho. Mr. Chairman, I move to strike out the last word in order to ask the gentleman a question about the last paragraph. What is the difference between a national park commissioner and superintendent of parks?

Mr. WOOD of Indiana. Well, the one is a judicial officer, as has just been stated, and the other is an administrative officer. The superintendent is a man who has charge of the administration of the park.

Mr. SMITH of Idaho. And so in each national park there is a United States commissioner?

Mr. MANN of Illinois. He is a United States commissioner.

Mr. SMITH of Idaho. The commissioner has nothing to do with the administrative part of the park at all?

Mr. WOOD of Indiana. No.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Court of Claims: Chief justice, $8,000; 4 judges, at $7,500 each; chief clerk, $3,500; assistant clerk, $2,500; bailiff, $1,500; clerks—2 at $1,600 each (one of whom shall be a stenographer), 1 $1,400, 2 at $1,200 each; 4 stenographers, at $1,200 each; chief messenger, $1,000; 2 assistant messengers; 3 firemen; 3 watchmen; elevator conductor, $720; 2 laborers; 2 charwomen; in all, $66,580

Mr. BLANTON. Mr. Chairman, I move to strike out the last word.

This particular paragraph relates to the Court of Claims, but I desire to discuss for just a moment the provisions of section 6, which is to follow, and in which the committee has seen fit to provide another bonus of $240 each for over 140,000 Government employees during the next fiscal year, which involves about $40,000,000. If the committee had seen fit to treat all of the Government employees alike in this respect, without discrimination, their action probably would be less inexcusable. I give notice that when section 6 is read that I shall make a point of order against it and have it stricken out of the bill in an effort to save this $40,000,000. Take, for instance, the policemen of this District and the firemen of this District——

Mr. WOOD of Indiana. They are not included in this bill.

Mr. BLANTON. They are not included in this bill, and that is one of the very reasons why I am objecting to it. We have taken the strike privilege away from the firemen in the District of Columbia, and we have taken it away from the policemen, and after we have prevented them from belonging to strike organizations I am not a Member of Congress who will stand here on the floor and take advantage of them. During a night like last night, with snow and sleet and rain and cold, with freezing weather, and a wet, cold day like to-day, you find the policemen and the traffic cops on their beats bravely attending to their duties, suffering hardships, if you please, almost every moment of the time that they are on duty, and daily risking their lives in our defense and the defense of our property. We find the firemen almost every day taking chances with respect to their lives, and it has not been more than a couple of weeks since several of them risked their lives in saving the lives of others in this District, and they did it bravely and successfully. Yet after we rob them of their strike privilege we take advantage of them in this bill by discriminating against them. And I am not going to be a Member of Congress that will permit it in silence.

Now, this bonus matter was a war question. It arose during the exigencies of the war by reason of war hardships and the high price of all commodities. But I want to say now that we are getting back to normal times, and I think the time has

come when we ought to quit paying a war bonus to civilian employees when you deny it not only to the police and firemen but also to our brave soldiers of the country, who saved this Government and Republic from the encroachment of the Hun. Therefore, in view of the discrimination that has been shown in this bill against the deserving firemen and deserving policemen of this District, than whom there are no more deserving employees of the Government, when that section is read I intend to make a point of order against it and force it out of the bill.

The CHAIRMAN. The Clerk will read.

Mr. MANN of Illinois. Mr. Chairman, just a word on that subject. Of course, it is out of order, but the discussion has been started. It may be that there is some argument in favor of paying the bonus to the policemen and firemen of the District of Columbia, but here is the situation:

The employees provided for in the bill have not had their salaries or pay increased in recent years, except through the bonus. The policemen and firemen of the District of Columbia have had their salaries readjusted and largely increased since the beginning of the war. They are not on the same footing at all with the other employees of the Government. When we passed the bills increasing the pay of the policemen and the firemen, in some cases the pay was increased from $700 to $800 to $1,500 or $1,600 a year. That is a considerable increase. Now, to say that unless we pay the bonus to them in addition to the increase of pay which they have already received we will not pay a bonus to those who had no increase in pay at all seems to me very unfair.

Mr. SNYDER. Will the gentleman yield for a suggestion?

Mr. MANN of Illinois. I will.

Mr. SNYDER. The gentleman will recall that when that bill was on the floor a year ago and the raises to the firemen and policemen were made it was distinctly understood that they were not to carry the bonus, but were in lieu of all bonus for the future.

Mr. MANN of Illinois. Why, of course, that was the distinct understanding, but distinct understandings never amount to anything unless they are written into statute law, as I have discovered, and then they do not amount to much.

Mr. NOLAN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. NOLAN. Mr. Chairman, inasmuch as notice has been served on the House that a point of order will be made on the bonus section, I think there ought to be called to the attention of the House the fact that the navy yard and the arsenal employees are discriminated against in the section put into this bill by the subcommittee having the legislative, executive, and judicial bill in charge. The gentleman from Wisconsin [Mr. FREAR] recently wrote to the Secretary of the Navy to find out what sort of an understanding was reached in reference to the last readjustment of the pay of the navy-yard employees, and under date of January 12 the Secretary of the Navy wrote to Mr. FREAR as follows:

NAVY DEPARTMENT,
Washington, January 12, 1921.

MY DEAR MR. FREAR: I have your letter of January 11 in regard to the allowance of the $240 per annum bonus to employees of the Naval Establishment.

Prior to the increase authorized by the department, effective September 16, 1920, the rate of pay for representative trades was $6.40 per diem, or $0.80 per hour. Under the 5 per cent increase allowed under the above-mentioned readjustment, which was in addition to the allowance of the congressional bonus of $240 per annum, the basic rate of pay for representative trades was $6.72 per diem, or $0.84 per hour, which, plus the above-mentioned bonus of $0.76 plus per diem, or $0.09½ plus per hour, equals $0.93½ per hour, this being the official rate determined and approved by me as a proper and just rate at this time.

The law under which the employees receive the bonus distinctly states that we must count this bonus as a part of the regular wage in making any revisions of wages. As this bonus is not paid from Navy Department funds, our wage scale, as issued, shows an apparently lower rate than $0.93½ per hour, but this does not alter the fact that $0.93½ is the rate which the board considered the representative trades were entitled to.

Should Congress fail to continue the bonus, the result will be an automatic decrease in the amount received by the men below the sum which I have already approved as being just and proper.

It is quite true that the reduction in the number of working hours per week from 48 to 44 will result in the loss of a half day's pay per week to employees. The action of the department with respect to reducing the working hours was taken at the earnest solicitation of organized labor as a step toward the betterment of working conditions.

Sincerely, yours,

JOSEPHUS DANIELS,
Secretary of the Navy.

Hon. JAMES A. FREAR, M. C.,
House of Representatives, Washington, D. C.

Mr. COOPER. Mr. Chairman, will the gentleman yield right there?

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. KNUTSON. Mr. Chairman, I move that the gentleman be given an additional five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. SISSON. Mr. Chairman, this is all out of order.

Mr. NOLAN. I appreciate that fact, but——

Mr. SISSON. When we reach the item in the bill the gentleman will have opportunity.

Mr. NOLAN. I will state to the gentleman from Mississippi that notice has already been served on the House by the gentleman from Texas [Mr. BLANTON] that when we reach that point he will make a point of order against the entire bonus section.

Mr. SISSON. I do not see why we should now continue a useless discussion if the gentleman from Texas is going to make a point of order. I will make a point of order against further discussion of the matter until we reach it.

Mr. BLANTON. I propose to make the point of order, Mr. Chairman.

Mr. SISSON. I hope that the gentleman from California will wait until we reach the item in the regular order.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield.

Mr. COOPER. I would like to ask the gentleman from California if he can tell the committee, if this bonus is taken away from the navy-yard employees, how their wages will compare with the wages of machinists in private industry?

Mr. NOLAN. They will be about 76 cents a day less.

Mr. MANN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. Yes.

Mr. MANN of Illinois. If the bonus is taken away from the navy-yard employees in the various navy yards, will not the Secretary of the Navy, under the law, increase the pay to be paid out of the appropriation for the Navy, instead of now paying a large share of their wages out of the Treasury and not charging it to the Navy at all?

Mr. NOLAN. I do not think he will.

Mr. MANN of Illinois. The law requires him to do it.

Mr. NOLAN. It does not require him to do it. It says "he shall from time to time adjust their wages." Now, if the Secretary of the Navy does not convene the wage board, such as was convened in September, between now and the 1st of July, these men will suffer a reduction of 76 cents per day.

Mr. MANN of Illinois. If we do not make the appropriation they will not get any, but the Secretary of the Navy will convene the wage board.

Mr. NOLAN. A new Secretary of the Navy comes in on March 4 and a new Secretary of War, and between then and the 30th day of June is a very short time. These men are fearful that the question of their wages will not receive the attention that it should receive and which they are entitled to. Now, what is the difference as to what fund pays the wage? It is simply taking it out of one pocket and putting it in another.

Mr. MANN of Illinois. There is quite a difference, in this sense: It is not now charged to the naval expenses at all. It ought to be.

Mr. NOLAN. Exactly. But why not let this continue another year if we are going to continue the bonus, and let the Secretaries fix the navy yard basic pay and the arsenal basic pay?

Mr. MANN of Illinois. It should be fixed now. Twenty per cent of it now comes from the civil side and the rest from the appropriations for the Army and Navy.

Mr. NOLAN. We are not making a saving. I look at it from the point of view as to how it will affect the morale of the men. If we take this from them or serve notice on them to that effect, it is bound to affect them. The legislative subcommittee, in view of the fact that we are going to have a change of administration, should allow this thing to be continued until next year.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. Yes.

Mr. MADDEN. Of course, this will not go into effect before the 1st of July and the Navy board could adjust it so that it will take effect after the 1st of July, and in the meantime they will be getting the bonus.

Mr. NOLAN. It took them nearly a year to get the adjustment that took place last September, to bring the wages of the mechanics in the navy yards up to the standard of wages received by those outside doing the same class of work. If that is to be their experience between the 4th of March and the 30th of June, these men will necessarily suffer a reduction.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. Yes.

Mr. SNELL. The men who will have their wages decreased 76 cents a day are high-priced mechanics, are they not?

Mr. NOLAN. They are skilled mechanics.

Mr. SNELL. They are reasonably highly paid, are they not?

Mr. NOLAN. They are supposed to get the same wages as those paid in similar industries outside.

Mr. SNELL. Will their pay be decreased more than that of other men outside, even if we decrease 76 cents a day?

Mr. NOLAN. In the same trades outside there has been no reduction in the private establishments of the country. Naturally these men will always receive a high rate of pay. They are highly skilled mechanics.

Mr. SNELL. Those men in private employment have been reduced throughout the country, have they not, as well as men engaged in other trades?

Mr. NOLAN. No; I do not think there has been any reduction in the pay of men of that class.

Mr. WOOD of Indiana. These salaries or wages of men employed in navy yards and arsenals are fixed on a basis of eight hours' work per day for those who work for the Government, and they get the same pay for eight hours' work as men on the outside get for nine hours.

Mr. NOLAN. No. Eight hours a day has been the standard, except in the great steel mills. Elsewhere the 8-hour day has been established. I do not think that any progressive industry in the country will ever attempt to go back either to the 9-hour day or to the 10-hour day.

The CHAIRMAN. The time of the gentleman from California has again expired. The Clerk will read.

The Clerk read as follows:

All purchases of typewriting machines during the fiscal year 1922 by the various branches of the Government of the United States for use in the District of Columbia or in the field, except as hereinafter provided, shall be made from the surplus machines in the stock of the General Supply Committee. The War Department shall furnish the General Supply Committee, immediately upon the approval of this act, a complete inventory of the various makes, models, and classes of typewriters in its possession, the condition of such machines, and the point of storage, and shall turn over to the General Supply Committee such typewriting machines in such quantities as the Secretary of the Treasury from time to time may call for by specific requisition for sale to the various services of the Government. If the General Supply Committee is unable to furnish serviceable machines to any branch of the Government, it shall furnish unserviceable machines at current exchange prices, and such machines shall then be applied by the branch of the Government receiving them as part payment for new machines from commercial sources in accordance with the prices fixed in the preceding paragraph. And in selling typewriting machines to the various branches of the Government service the General Supply Committee may accept an equal number of unserviceable machines as part payment thereon at the exchange prices quoted in the current general schedule of supplies. Until June 30, 1922, the War Department shall not dispose of any typewriting machines except to the General Supply Committee as authorized herein.

Mr. SNYDER. Mr. Chairman, I make a point of order on the section. It is not authorized by law.

The CHAIRMAN. The gentleman from New York makes a point of order on the paragraph. The Chair sustains the point of order. The Clerk will read.

Mr. GARD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARD. When the point of order was made by the gentleman from New York [Mr. SNYDER], was it against the first paragraph or the second?

Mr. SNYDER. Beginning on line 18, on page 153.

The CHAIRMAN. On line 18. The Clerk will read.

The Clerk read as follows:

SEC. 5. That in expending appropriations made in this act persons in the classified service in the District of Columbia shall not be detailed for service outside of the District of Columbia except for or in connection with work pertaining directly to the service at the seat of government of the department or other Government establishment from which the detail is made: *Provided*, That nothing in this section shall be deemed to apply to the investigation of any matter or the preparation, prosecution, or defense of any suit by the Department of Justice.

Mr. DALLINGER. Mr. Chairman, I ask unanimous consent to proceed out of order, and I assure the House I shall not repeat what was said by the gentleman from California [Mr. NOLAN].

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to proceed for five minutes out of order. Is there objection?

Mr. WOOD of Indiana. Mr. Chairman, I object, until we get to that point.

Mr. DALLINGER. I will not get an opportunity then. I trust the gentleman will not object. I want only five minutes.

Mr. SISSON. Mr. Chairman, I did not have the gentleman from Massachusetts in mind particularly, but I stated when the gentleman from California [Mr. NOLAN] had the floor that I would make a point of order against further discussion on this matter until we got to it. I have no doubt that the point of order on the paragraph can be reserved, and that it can be discussed at reasonable length; but we ought to proceed in an orderly way.

Mr. KING. The gentleman from Texas [Mr. BLANTON] was permitted to discuss the matter out of order and no objection was made.

Mr. SISSON. And no objection was made to the discussion by the gentleman from California [Mr. NOLAN]. But the fact that we have had two speeches out of order is no reason why we should have three or four, because if that should be the rule, then every one of the 435 Members of the House ought to be permitted to speak out of order.

The Clerk read as follows:

SEC. 6. That all civilian employees of the Government of the United States and the District of Columbia who receive a total of compensation at the rate of $2,500 per annum or less, except as otherwise provided in this section, shall receive, during the fiscal year ending June 30, 1922, additional compensation at the rate of $240 per annum; *Provided*, That such employees as receive a total of annual compensation at a rate more than $2,500 and less than $2,740 shall receive additional compensation at such rate per annum as may be necessary to make their salaries, plus their additional compensation, at the rate of $2,740 per annum, and no employee shall receive additional compensation under this section at a rate which is more than 60 per cent of the rate of the total annual compensation received by such employee; *Provided further*, That the increased compensation at the rate of $240 per annum for the fiscal year ending June 30, 1921, shall not be computed as salary in construing this section: *Provided further*, That where an employee in the service on June 30, 1920, has received during the fiscal year 1921, or shall receive during the fiscal year 1922, an increase of salary at a rate in excess of $200 per annum, or where an employee whether previously in the service or not, has entered the service since June 30, 1920, whether such employee has received an increase in salary or not, such employees shall be granted the increased compensation provided herein only when and upon the certification of the person in the legislative branch or the head of the department or establishment employing such persons of the ability and qualifications personal to such employees as would justify such increased compensation: *Provided further*, That the secretary of the Civil Service Commission shall be deemed an employee for the purposes of this section.

The provisions of this section shall not apply to the following: Employees paid from the postal revenues and sums which may be advanced from the Treasury to meet deficiencies in the postal revenues; employees whose pay is adjustable from time to time through wage boards or similar authority to accord with the commercial rates paid locally for the same class of service; employees of the Panama Canal on the Canal Zone; employees of the Alaskan Engineering Commission in Alaska; officers and members of the Metropolitan police of the District of Columbia and the United States Park police who receive the compensation fixed by the act approved December 5, 1919; officers and members of the fire department of the District of Columbia who receive the compensation fixed by the act approved January 24, 1920; employees paid from lump-sum appropriations in bureaus, divisions, commissions, or any other governmental agencies or employments created by law since January 1, 1916, except employees of the United States Tariff Commission, the Bureau of War Risk Insurance, and the Women's Bureau, who shall be included. The provisions of this section shall not apply to employees whose duties require only a portion of their time, except charwomen, who shall be included; employees whose services are utilized for brief periods at intervals; persons employed by or through corporations, firms, or individuals acting for or on behalf of or as agents of the United States or any department or independent establishment of the Government of the United States in connection with construction work or the operation of plants; employees who receive a part of their pay from any outside sources under cooperative arrangements with the Government of the United States or the District of Columbia; employees who serve voluntarily or receive only a nominal compensation, and employees who may be provided with special allowances because of their service in foreign countries. The provisions of this section shall not apply to employees of the railroads, express companies, telegraph, telephone, marine cable, or radio system or systems taken over by the United States, and nothing contained herein shall be deemed a recognition of the employees of such railroads, express companies, telegraph, telephone, marine cable, or radio system or systems as employees of the United States.

Section 6 of the legislative, executive, and judicial appropriation act approved May 10, 1916, as amended by the naval appropriation act approved August 29, 1916, shall not operate to prevent anyone from receiving the additional compensation provided in this section who otherwise is entitled to receive the same.

Such employees as are engaged on piecework, by the hour, or at per diem rates, if otherwise entitled to receive the additional compensation, shall receive the same at the rate to which they are entitled in this section when their fixed rate of pay for the regular working hours and on the basis of 313 days in the said fiscal year would amount to $2,500 or less: *Provided*, That this method of computation shall not apply to any per diem employees regularly paid a per diem for every day in the year.

So much as may be necessary to pay the additional compensation provided in this section to employees of the Government of the United States is appropriated out of any money in the Treasury not otherwise appropriated.

So much as may be necessary to pay the increased compensation provided in this section to employees of the government of the District of Columbia is appropriated, 40 per cent out of any money in the Treasury not otherwise appropriated and 60 per cent out of the revenues of the District of Columbia, except to employees of the Washington Aqueduct and the water department, which shall be paid entirely from the revenues of the water department, and to employees of the Minimum Wage Board and the playgrounds department, which shall be paid wholly out of the revenue of the District of Columbia.

So much as may be necessary to pay the increased compensation provided in this section to persons employed under trust funds who may be construed to be employees of the Government of the United States or of the District of Columbia is authorized to be paid, respectively, from such trust funds.

Reports shall be submitted to Congress on the first day of the next regular session showing for the first four months of the fiscal year the average number of employees in each department, bureau, office, or

establishment receiving the increased compensation at the rate of $240 per annum and the average number by grades receiving the same at each other rate.

Mr. BLANTON. Mr. Chairman, I make a point of order against all of section 6, and against each paragraph separately thereof, as being legislation on an appropriation bill and unauthorized by law.

Mr. DALLINGER. Will the gentleman reserve the point of order?

Mr. BLANTON. For the benefit of the gentleman I reserve the point of order.

Mr. DALLINGER. Mr. Chairman, not knowing that a point of order was going to be made against this whole section, I had prepared two amendments, striking out the exceptions at the bottom of page 156 and at the top of page 157, which were inserted by the Committee on Appropriations with the deliberate purpose of taking away the $240 bonus from the civilian employees of the arsenals and navy yards of the country, and also from the policemen and firemen of the District of Columbia—the only civilian employees of our Government who perform strenuous physical work, and in the case of the policemen and firemen, who frequently risk their lives—while the great army of clerks, who are supposed to work with their heads, but so often do not, are granted the bonus as usual.

Mr. Chairman, I do not know the reason which actuated the Committee on Appropriations in making this unjust discrimination. I am absolutely convinced that the alleged facts on which the members of the committee say that they relied are erroneous. The gentleman from California [Mr. NOLAN] has already introduced into the RECORD a letter from the Secretary of the Navy in which that official expressly says that the wage boards in determining the average wage in establishments in the vicinity for the purpose of determining the wage in any particular navy yard under existing law took into account the bonus and subtracted it from the average wage so ascertained, and that this unfair discrimination in the bill would actually result in a reduction of the wages of the men who work in the navy yards.

In the case of the arsenals the civilian employees were deprived of the $240 bonus by an indirect method. In order to deprive the employees of the arsenals of the benefit of this bonus passed by Congress last year the Ordnance Bureau and the War Department made a new ruling when the last wage boards met. Up to that time it had been the rule to divide the average weekly wage paid in private plants in the vicinity by five and one-half in order to determine the daily wage for the arsenal. In order to deprive the workingmen of the bonus the Ordnance Bureau and the War Department made a new ruling and divided the average weekly wage by six, which resulted in a reduction of over $200 a year in the pay of the employees of the arsenal. They also made the strange ruling that railroad shops should not be considered among the private establishments in the vicinity, as they always had been.

In the vicinity of the Watertown Arsenal the principal shops where skilled machinists are employed are the railroad shops of the railroads concentrating at Boston. The result is that to-day, in spite of the bonus, painters in the Watertown Arsenal are receiving 66 cents an hour and in private establishments in the vicinity $1 an hour. Carpenters are receiving 67 cents an hour in the arsenal and in private establishments in the vicinity $1 an hour. Pattern makers, although they are receiving proportionally more, because of the fact that the Government can not get highly skilled employees of this kind unless they do pay them more in proportion, are receiving 98 cents an hour in the Watertown Arsenal and $1.10 in the vicinity. Machinists receive $5.68 a day in the Watertown Arsenal and $6.80 a day across the river in the shops of the Boston & Albany Railroad.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DALLINGER. Mr. Chairman, I ask for two minutes more.

Mr. BLANTON. If it will not interfere with the point of order.

The CHAIRMAN. It does not. The gentleman from Massachusetts asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. DALLINGER. Now, Mr. Chairman, I am informed that the employees of these Government establishments respectfully requested a hearing before the subcommittee of the Committee on Appropriations and that they were told that the committee had all the information it desired. I do not know whether that is correct or not, but that is what I am informed. It seems to me it is clear now from the letter of the Secretary of the Navy just read by the Congressman from California [Mr. NOLAN], and from the figures which I have given in regard to the Watertown Arsenal, that there was made, perhaps unintentionally, by the Committee on Appropriations, an unfair and unjust discrimination against these employees of the Government. It seems to me that if we are going to pay the $240 bonus to all the civilian employees of this Government we ought to be fair to the men who labor with their hands as well as to the policemen and firemen who, at the risk of their lives, protect the lives and property of the people of the Nation's Capital, and give to them the same treatment that we give to the clerks in all the other Government departments not only in the District of Columbia but throughout the country. [Applause.]

Mr. WOOD of Indiana. Mr. Chairman, I wish to state that gentlemen are laboring under a very great misapprehension, I think. If not, the committee has been very ill advised, not only by the Secretary of the Navy but also by the gentlemen who have charge of these navy yards and arsenals. And I wish in passing to state that the gentleman from Massachusetts [Mr. DALLINGER] and the gentleman from California [Mr. NOLAN], speaking on behalf of those employed in the navy yards and the arsenals, have not called attention to the fact that every employee in the arsenals and in the navy yards gets 30 days' leave of absence each year with full pay that the employees on the outside do not get. In addition, if we are correctly informed, those who are working in the navy yards and in the arsenals are getting the same pay for eight hours per day that the gentlemen on the outside are receiving for nine hours per day.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. JOHNSON of Mississippi. What is the basic pay of the navy-yard employees?

Mr. WOOD of Indiana. It is fixed by an adjusting board in the different localities, based on what like service is being paid.

Mr. JOHNSON of Mississippi. Is the $240 taken from that?

Mr. WOOD of Indiana. No; they are getting it now. We have stricken it from this bill. I wish to call the attention of the House to what the Secretary of the Navy has advised the committee upon this subject.

The Labor Wage Adjustment Board appointed to consider the question of a readjustment in the wages for employees under the Naval Establishment finds that the existing wage scale for the Naval Establishment is higher, the $240 per annum congressional bonus considered, than the wage scale of any other industry as a whole in the United States, of which it has information. The present wage scale of the shipbuilding industry is lower than that of the railroad industry. The difference between the navy-yard scale and the shipbuilding industry is practically the congressional bonus of $240 per annum, which was granted to all employees under the Naval Establishment on July 1, 1920, who are receiving less than $2,740 per annum.

That is what the Secretary of the Navy tells us. I call attention now to what Maj. Wesson, of the Army, testified with reference to these employees in the arsenals:

Mr. WOOD. You are required to pay your men the compensation being paid to men engaged in like service, or who are doing the same character of work, in your vicinity?

Maj. WESSON. Yes, sir.

Mr. WOOD. Then, after having fixed your wages for your men upon that basis, and having fixed the base pay at an amount equal to that being paid by other industries employing like services in your vicinity, you add to that the bonus?

Maj. WESSON. Yes, sir.

Mr. WOOD. Then, they are getting more than they ought to be getting by the amount of the bonus, because of the fact that they are getting by the amount of the bonus more than like services command in private employment in the several localities.

Maj. WESSON. That is true, but it should be qualified to this extent: Our base pay is determined by a comparison with the pay paid in private establishments, but we do not consider the hours for which the private establishments pay for overtime work. For example, many private establishments have a basic 48-hour week, but they work from 55 hours to 60 hours, for which extra hours they pay overtime.

Mr. Chairman, that is what the Secretary of the Navy says and what Maj. Wesson says. We are told that these men are getting the amount of $240 more than anybody is getting for a like service. It is absolutely unfair to every other employee of the Government and, I think, unfair to the Treasury of the United States.

Mr. BLANTON. Mr. Chairman, I make the point of order to the section and to all of the paragraphs in the section.

The CHAIRMAN. Does the gentleman from Indiana desire to discuss the point of order?

Mr. WOOD of Indiana. No; there is no doubt that the whole section is subject to the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. GALLIVAN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GALLIVAN. Does that mean that the entire section goes out?

The CHAIRMAN. Yes. The gentleman from Texas made the point of order against the entire section and to all the paragraphs therein.

Mr. MAPES. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MAPES. Mr. Chairman, I have not heard all of the discussion of this paragraph relating to the bonus for the members of the police force and the fire department of the District of Columbia, but I think it ought to be said for the benefit of the record that it was the understanding of the members of the Committee on the District of Columbia at the time the legislation was passed increasing the salaries of the men in these two departments that they would get the bonus in addition to the salaries fixed at that time. That statement was made in the report of the committee at the time. It was made definitely on the floor of the House of Representatives in the consideration of one of the bills in a colloquy between the gentleman from New York, Mr. GOULD, and the gentleman from New York, Mr. SNYDER. It was the general understanding of the members of the District Committee. The men in these departments are men with families. They are very much in need of this additional pay. On my way home last night, while waiting for a car, I saw an advertisement in the window of one of the stores for policemen and firemen in the District of Columbia, asking applicants to apply to the Civil Service Commission. Both departments are away behind in their personnel, and it is very difficult to get men in this service under present conditions. If anyone is to receive the bonus, it seems to me that the policemen and the firemen are entitled to it.

Mr. WOOD of Indiana. Mr. Chairman, I move that the committee do now rise and report the bill with the amendments to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. SABATH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SABATH. Would it not be in order, in view of the fact that the Chair has sustained the point of order to the bonus proposition, for the Rules Committee to bring in a rule to make that section in order?

The CHAIRMAN. The Chair does not regard that as a parliamentary inquiry.

Mr. MANN of Illinois. It would not be in order in the Committee of the Whole. Everyone knows that except my colleague.

Mr. WOOD of Indiana. Mr. Chairman, I renew my motion.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15443, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. WOOD of Indiana. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. WOOD of Indiana. Mr. Speaker, I demand a separate vote on the amendment of the gentleman from Utah [Mr. MAYS], whereby Salt Lake City, Utah, assay office was added to the bill.

The SPEAKER. The Clerk will report the amendment referred to.

The Clerk read as follows:

Amendment offered by Mr. MAYS: Page 68, line 25, after the figures "$115,500" add a new paragraph, as follows:

"Salt Lake City, Utah, assay office: Assayer in charge, who shall also perform the duties of melter, chief clerk, and cashier, $1,800; for services of workmen and other employees, $1,500; other incidental and contingent expenses, $600; in all, $3,900."

The SPEAKER. Is a separate vote demanded on any other amendment? [After a pause.] If not, the Chair will put them en grosse. The question is on agreeing to the other amendments.

The other amendments were agreed to.

The SPEAKER. The question now is on the Mays amendment.

The question was taken; and on a division (demanded by Mr. MAYS) there were—ayes 65, noes 79.

Mr. MAYS. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. It is evident there is no quorum present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll. The question is on agreeing to the Mays amendment.

The question was taken; and there were—yeas 154, nays 124, answered "present" 1, not voting 151, as follows:

YEAS—154.

So the amendment was agreed to.

The Clerk announced the following pairs:

Mr. HENRY T. RAINEY (for) with Mr. FORDNEY (against).

Mr. WRIGHT (for) with Mr. HOCH (against).

Mr. HULL of Tennessee (for) with Mr. GREEN of Iowa (against).

General pairs:

Mr. RODENBERG with Mr. SANDERS of Louisiana.

Mr. JUUL with Mr. CRISP.

Mr. BLAND of Indiana with Mr. MCKEOWN.

Mr. SANDERS of Indiana with Mr. RANDALL of California.

Mr. MONAHAN of Wisconsin with Mr. BRUMBAUGH.

Mr. WALSH with Mr. O'CONNELL.

Mr. WOODYARD with Mr. BELL.

Mr. VOLK with Mr. OVERSTREET.

Mr. WINSLOW with Mr. KETTNER.

Mr. GOOD with Mr. BYRNS of Tennessee.

Mr. TINCHER with Mr. GOLDFOGLE.

Mr. PARKER with Mr. LINTHICUM.

Mr. WILLIAMS with Mr. VENABLE.

Mr. SINCLAIR with Mr. BABKA.

Mr. COOPER with Mr. TAYLOR of Colorado.

Mr. WARD with Mr. DOMINICK.

Mr. HARRELD with Mr. FERRIS.

Mr. VARE with Mr. LESHER.

Mr. MCPHERSON with Mr. SCULLY.

Mr. GRAHAM of Pennsylvania with Mr. STEELE.

Mr. HAUGEN with Mr. DOREMUS.

Mr. TAYLOR of Tennessee with Mr. MOON.

Mr. NELSON of Wisconsin with Mr. BLACKMON.

Mr. MCLAUGHLIN of Michigan with Mr. BEE.

Mr. SWEET with Mr. BYRNES of South Carolina.

Mr. LAYTON with Mr. KINCHELOE.

Mr. STRONG of Pennsylvania with Mr. MAHER.

Mr. MERRITT with Mr. CANTRILL.

Mr. DENISON with Mr. RAYBURN.

Mr. SIEGEL with Mr. LONERGAN.

Mr. KREIDER with Mr. EVANS of Nevada.

Mr. MOORE of Ohio with Mr. DAVEY.

Mr. DEMPSEY with Mr. JOHNSTON of New York.

Mr. REBER with Mr. MANN of South Carolina.

Mr. SINNOTT with Mr. DENT.

Mr. DICKINSON of Iowa with Mr. PELL.

Mr. ROSE with Mr. MCLANE.

Mr. PERLMAN with Mr. BLAND of Missouri.

Mr. BACHARACH with Mr. HAMILL.

Mr. REED of West Virginia with Mr. SULLIVAN.

Mr. STINESS with Mr. ROWAN.

Mr. MCKENZIE with Mr. RAKER.

Mr. JEFFERIS with Mr. BOOHER.

Mr. GOULD with Mr. EAGAN.

Mr. BOWERS with Mr. HARRISON.

Mr. ESCH with Mr. SMALL.

Mr. LEHLBACH with Mr. WISE.

Mr. KIESS with Mr. WILSON of Pennsylvania.

Mr. BURKE with Mr. MCKINIRY.

Mr. LANGLEY with Mr. NICHOLLS.

Mr. ELLSWORTH with Mr. CARSS.

Mr. HAYS with Mr. KITCHIN.

Mr. LITTLE with Mr. MCGLENNON.

Mr. IRELAND with Mr. MONTAGUE.

Mr. COPLEY with Mr. DOOLING.

Mr. GREENE of Vermont with Mr. EAGLE.

Mr. HAWLEY with Mr. GOODWIN of Arkansas.

Mr. CRAGO with Mr. GALLAGHER.

Mr. JOHNSON of South Dakota with Mr. CANDLER.

Mr. MORIN with Mr. DEWALT.

Mr. HUTCHINSON with Mr. MAJOR.

Mr. KELLEY of Michigan with Mr. MOONEY.

Mr. MOTT with Mr. RAINEY of Alabama.

Mr. HUSTED with Mr. JOHN W. RAINEY.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present; the Doorkeeper will open the doors. The question is on the engrossment and third reading of the bill.

Mr. GALLIVAN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. GALLIVAN. To ask for the yeas and the nays on the passage of the bill.

The SPEAKER. We have not yet reached the passage of the bill.

The bill was ordered to be engrossed and read the third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. GALLIVAN. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. Twelve gentlemen have risen in support of the yeas and nays, not a sufficient number, and the yeas and nays are refused.

The question was taken, and the bill was passed.

On motion of Mr. WOOD of Indiana, a motion to reconsider the vote by which the bill was passed was laid on the table.

INDIAN APPROPRIATION BILL.

Mr. ELSTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15682, the Indian appropriation bill, and pending that, Mr. Speaker, I would like to arrive at an agreement with the gentleman from Oklahoma [Mr. HASTINGS] in regard to the time for general debate. Has the gentleman any suggestion?

Mr. HASTINGS. What time does the gentleman from California suggest? I desire to know if he included in that request that the debate be confined to the bill?

Mr. ELSTON. No; I preferred not, because the only request I have acceded to for time I understand is to be used by a gentleman who does not intend to confine his remarks to the bill. Having acceded to his request, I do not think I should put the unanimous-consent request in that form.

Mr. HASTINGS. How much time does the gentleman think? I had hoped the gentleman would make that request inasmuch as there is absolutely no legislation upon this bill, and I thought we could very much expedite its consideration if we could confine the debate to the bill.

Mr. ELSTON. Well, I can not accede to that suggestion. I ask unanimous consent, Mr. Speaker, that general debate be confined to an hour and a half, half of that time to be controlled by myself and half by the gentleman from Oklahoma [Mr. HASTINGS].

The SPEAKER. The gentleman from California asks unanimous consent that general debate be limited to one hour and a half, half of that time to be controlled by himself and half by the gentleman from Oklahoma. Is there objection?

Mr. GALLIVAN. Mr. Speaker, I object; and I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Massachusetts makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and eighty-five gentlemen are present, not a quorum.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and following Members failed to answer to their names:

Almon	Ferris	McKeown	Sanders, N. Y.
Andrews, Md.	Fordney	McKiniry, N. Y.	Sanford
Babka	Frear	McKinley, Ill.	Scully
Bacharach	Gallagher	McLane	Sells
Baer	Good	McLaughlin, Mich.	Siegel
Bell	Goodwin, Ark.	McPherson	Sims
Benham	Gould	Maher	Sinclair
Blackmon	Graham, Pa.	Major	Sinnott
Bland, Ind.	Green, Iowa	Mann, S. C.	Small
Bland, Mo.	Greene, Vt.	Martin	Smith, Ill.
Booher	Hamill	Merritt	Smith, Mich.
Bowers	Hamilton	Monahan, Wis.	Smithwick
Brumbaugh	Harreld	Montague	Steele
Burke	Harrison	Moon	Stephens, Miss.
Butler	Haugen	Mooney	Stiness
Caldwell	Hawley	Moore, Ohio	Strong, Pa.

Dewalt	Kitchin	Randall, Calif.	Watson
Dominick	Kreider	Randall, Wis.	Williams
Dooling	Lampert	Rayburn	Wilson, Ill.
Doremus	Langley	Reber	Wilson, Pa.
Dunbar	Layton	Reed, W. Va.	Winslow
Eagan	Lehlbach	Rodenberg	Wise
Eagle	Lesher	Rose, Pa.	Woodyard
Ellsworth	Linthicum	Rowan, N. Y.	Wright
Emerson	Lonergan	Rowe, N. Y.	
Esch	McCulloch	Sanders, Ind.	
Evans, Nev.	McGlennon	Sanders, La.	

The SPEAKER. Two hundred and sixty-seven Members have answered to their names. A quorum is present.

Mr. MONDELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors. The question is, Will the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Indian appropriation bill?

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. GALLIVAN. Mr. Speaker, I ask for a division.

The House divided; and there were—ayes 102, noes 15.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15682, the Indian appropriation bill, with Mr. FESS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of H. R. 15682, the Indian appropriation bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15682) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922.

Mr. ELSTON. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from California asks unanimous consent that the first reading of the bill be dispensed with. Is there objection? [After a pause.] The Chair hears none.

Mr. ELSTON. Mr. Chairman, I do not intend to consume more than a very few minutes in the discussion of this Indian appropriation bill, covering appropriations for the fiscal year beginning next July. I will invite the attention of the committee to the estimates submitted by the department, on which this bill was based. These estimates aggregate as a grand total the sum of approximately $15,000,000. The total of appropriations carried by this bill approximate $11,944,000, or a decrease from the estimates of about $3,000,000. Last year's appropriation bill for this service carried a grand total of $12,847,000. So that the present appropriation bill now under consideration carries about $1,000,000 less than last year's bill. In fact, the present bill takes us back in the matter of appropriations to the prewar years of 1914 and 1915.

The House, I have no doubt, is familiar with the classification of appropriations made under this bill. The mention of the grand total is somewhat misleading, inasmuch as the whole amount of that grand total does not come out of the Treasury of the United States. The classification of appropriations falls into four groups, as follows: Gratuity appropriations, reimbursable appropriations, appropriations made under the obligations of treaties, and appropriations out of tribal funds.

The main concern of the House is with regard to the total amount of gratuity appropriations, inasmuch as those appropriations come out of the Treasury of the United States. Its next concern might be in the matter of the total of treaty appropriations, although they are in pursuance of treaties, and to that extent we are obligated to make appropriations under their provisions, but there is no reimbursement to the Treasury.

It is with some pleasure, therefore, that I invite your attention to the aggregate of gratuity appropriations in the present bill. These appropriations amount to $6,839,000, as against estimates of $8,221,000 and as against gratuity appropriations in the Indian appropriation bill of last year of $7,251,000. The gratuity appropriations in the bill of 1914 amounted to $6,650,000 and in the year 1915 to $6,872,000, so that the gratuity appropriations under this bill are very slightly in excess of appropriations of like character in 1914 and are under the total of gratuity appropriations made in 1915.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. ELSTON. I yield.

Mr. JOHNSON of Mississippi. I understand there are about 1,100 Choctaw Indians in Mississippi, and recently I have been informed that a number of them have moved into my district. Is this fund available for the building of schools and for the general welfare of those Indians who have moved from the place where they were at the time the first appropriation was made? Would this fund be available to put up schools for them and to educate them in growing cotton, and so forth?

Mr. ELSTON. You mean that this change of residence has not been outside of Mississippi?

Mr. JOHNSON of Mississippi. No.

Mr. ELSTON. My understanding is it would not affect their right to participation in the fund that is appropriated for the civilization of those Indians in Mississippi.

Mr. JOHNSON of Mississippi. May I ask now how this fund is administered? I am not familiar with it.

Mr. ELSTON. It is administered under the agents of the Indian Bureau.

Mr. JOHNSON of Mississippi. From Washington?

Mr. ELSTON. From Washington, although there are local agents down there, I assume. I do not know that there is an agency there, but there are agents of the bureau down there who supervise the expenditure of the money.

Mr. LARSEN. Will the gentleman yield?

Mr. ELSTON. I prefer not to yield now.

Mr. LARSEN. I wish to ask a short question.

Mr. ELSTON. If the gentleman will permit, I would like to complete this statement.

I shall put into the RECORD tables illustrating the remarks I have made with regard to the comparison of appropriations in this bill and in previous bills, and with the estimates, and shall also put into the RECORD the total appropriations, under proper subheads, from the years 1914 to 1921, inclusive:

ESTIMATES, FISCAL YEAR 1922.

The estimates submitted by the department upon which this bill is based are to be found in the Book of Estimates, 1922, pages 423 to 501, and are as follows:

Gratuity appropriations	$8,221,599.67
Reimbursable appropriations	2,834,484.00
Appropriations under treaty	933,620.00
Total from Treasury	11,989,703.67
Appropriations of tribal funds	3,089,886.30
Grand total	15,079,589.97

APPROPRIATIONS, FISCAL YEAR 1921.

In the Indian appropriation act approved February 14, 1920, the appropriations were as follows:

Gratuity appropriations	$7,251,985.20
Reimbursable appropriations	1,941,950.07
Appropriations under treaty	826,620.00
Total from Treasury	10,020,555.27
Appropriations of tribal funds	2,827,442.12
Grand total	12,847,997.39

APPROPRIATIONS IN PRESENT BILL.

Gratuity appropriations	$6,839,525.00
Reimbursable appropriations	1,609,735.00
Appropriations under treaty	856,620.00
Total from Treasury	9,305,880.00
Appropriations of tribal funds	2,638,655.30
Grand total	11,944,535.30

In fact, the appropriations recommended in the present bill approximate, as I have stated, the amounts appropriated in the prewar years of 1914 and 1915, as will be seen from the following table showing the aggregate of the appropriations for the fiscal years 1914–1921, inclusive, with their distribution under the proper subheads:

Year.	Gratuity.	Reimbursable.	Treaty.	Tribal funds.	Total.
1914	$6,646,659.67	$1,993,900.00	$888,635.07	$508,500.00	$10,037,694.74
1915	6,872,307.26	1,838,520.00	936,040.65	1,567,785.00	11,214,653.91
1916[1]					
1917	7,283,991.44	2,830,186.00	796,760.00	1,304,000.00	12,214,937.44
1918	7,705,446.67	2,194,950.00	845,360.00	1,291,117.38	12,036,874.05
1919	7,334,656.13	2,927,750.00	834,860.00	4,385,000.00	15,482,266.13
1920	7,501,095.95	2,767,941.08	834,860.00	4,169,711.81	15,273,608.84
1921	7,251,985.20	1,941,950.07	826,620.00	2,827,442.12	12,847,997.39

[1] Resolution continuing 1915 appropriations.

While the present bill carries appropriations of nearly $1,000,000 under the total appropriations contained in the bill of 1921, I believe that your committee has used judgment in the matter of retrenchment and that the cuts will not seriously affect any important activity in the Indian Service. For instance, we have not materially touched in the way of our reductions the very important item of school activities. We have left the estimate for health activities of the bureau practically intact. We have left the framework of the organization of the Indian Bureau intact in so far as personnel is concerned, with very few exceptions. We decreased the appropriation for Indian police and, as I remember, reduced that appropriation $50,000. It is apparent that in a great many of the States in which Indians are now located civilization has progressed, and law and order have reached a stage where the local county and municipal authorities can take care of police matters.

Mr. LARSEN. Mr. Chairman, will the gentleman yield now?

Mr. ELSTON. Yes.

Mr. LARSEN. Will the gentleman explain on page 5, on the question of the traffic in intoxicating liquor among the Indians, the item of $20,000? What is the special reason for

carrying that appropriation here, inasmuch as we have prohibition enforcement officers all over the country, and it is supposed that there are no intoxicating liquors distributed among the people anyway? What is the special reason for continuing that appropriation at the present time?

Mr. ELSTON. If the gentleman is familiar with the appropriations carried in the bills in the past——

Mr. LARSEN. I know it has been carried in the past, but why should it be continued?

Mr. ELSTON. There has been a decrease in the appropriation. The present bill carries only $20,000, whereas the act last year carried $65,000, and I believe the act for the year previous carried $100,000. We have reduced the amount down to the minimum, which we believe will be sufficient to keep the most efficient employees in this service. We have left what might be called a contract between the Indian Service and the revenue enforcement officers who are charged with the enforcement of the Volstead Act.

We felt that to eliminate that appropriation altogether would be a serious loss in efficiency. It would be a good thing to retain in the Indian Bureau a number of employees who would be acquainted with the Indian country.

Mr. LARSEN. Does it involve a duplication of the work at this time?

Mr. ELSTON. We felt that it would not be a duplication. We felt that the Indian officials could cooperate with the officials of the revenue bureau, and that a great deal of use could be made of these officials employed under the appropriation of $20,000 left in the bill.

Mr. LARSEN. Now, just one question further: If these officers now employed are efficient—and I take it they are—would it not be quite likely that they would be employed by the force especially intrusted with the enforcement of the prohibition law without this appropriation here?

Mr. ELSTON. The gentleman can answer that as well as I. I know that would be the result in regard to necessary dismissals incident to the decrease of these appropriations from $65,000 to $20,000.

Mr. LARSEN. What is the practical effect of it? Is the practical effect this, that it just causes a withdrawal of the prohibition forces, the officers in this prohibition territory, and reduces it to the officers provided under this bill? Or do you know on that point?

Mr. ELSTON. The committee thought that in the enforcement of the Volstead Act there would be a number of these officials all over the United States and that the organization under the revenue bureau would scatter its forces everywhere, and they would naturally cross the path every day of like officials employed in the Indian Bureau. We wanted to stop that duplication. If there is any illicit manufacture of liquor going on it is the duty of the Volstead officers to follow it to its source, and if its source is in the Indian country they should follow it there. We have provided so that they may get the assistance of the officials in the Indian Bureau.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. Yes.

Mr. BLANTON. Assurance was attempted to be given us that there was absolutely no legislation in this bill. I want to call the attention of the gentleman from California to a like assurance given at the beginning of the discussion of the legislative bill, when we began the discussion of it. And yet the gentleman remembers that the Chair sustained a point of order knocking out five pages and involving $4,000,000, and knocked out various other paragraphs involving several thousand dollars. And likewise the assurance was given by members of the Committee on Appropriations——

Mr. ELSTON. Will the gentleman come to the point?

Mr. BLANTON. I can come to the point in a moment if the gentleman will just answer this question: Assurances were given by the subcommittee in charge of the Post Office appropriation bill and by the subcommittee in charge of the sundry civil bill that there was no legislation in those bills, and yet big items were knocked out of those bills on points of order made against legislative provisions. Now, are there any items of legislation really in this bill or not?

Mr. ELSTON. I will make no guaranty, but if the gentleman will take my conclusion only I will say that there is practically no legislation of any kind——

Mr. BLANTON. Except as to provisos making funds immediately available. I notice a good many of them.

Mr. ELSTON. There are few even of that kind of legislative provisions.

Mr. BLANTON. Yes. Outside of them there is no legislation?

Mr. ELSTON. There may be one or two exceptions to that. That is why I said "practically." But I can think of nothing in the way of the inauguration of a new policy or the insertion of a new provision of law in the bill, excepting, perhaps, a few minor clauses.

Mr. GARD. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I would like to make one further statement first. I will conclude with the statement that the committee in making the decrease of about $1,000,000 from last year's bill has taken up a great deal of that amount by not appropriating to the limit for western irrigation projects that have heretofore been appropriated for in the Indian bill. I shall not go into that beyond saying this, that we have tried to do the best thing we could by these projects. We have tried to appropriate for each of them at least a sum sufficient to continue their maintenance and operation and in some cases an additional amount to protect new work, in the nature of consolidation work, to keep the projects from deterioration and waste.

We were prompted to this retrenchment in view of the fact that every one of these irrigation projects has reached the point where the Indians have been absolutely provided for in the way of irrigable land, and the appropriations that are now requested are for enlarging the distributing system or of enlarging the project itself for the benefit of lands purchased by white settlers or owned by them originally. Now, we have done a rather drastic thing, but it is in pursuance of a policy that was announced by the Indian Affairs Committee last year after investigations made by its chairman, Mr. SNYDER, and I feel that the committee are following a good principle in applying these suggestions.

I understand that the chairman of the Indian Affairs Committee [Mr. SNYDER] has proposed, in a bill which has been introduced in the House, a reformation of this system of appropriating moneys in the Indian appropriation bill for the inauguration or continuation of projects which are mainly for white settlers. Such projects should naturally come under the jurisdiction of the Reclamation Service. We believe this bill should concern itself only with Indian projects.

I shall not take up the time of the House to discuss any further details, as they will be developed when we come to read the bill section by section. I have made this general statement to give you a slight idea of the broad features of the bill and what this committee has done in the way of large totals.

Mr. Chairman, I reserve the remainder of my time, and yield three minutes to the gentleman from California [Mr. KAHN].

Mr. GALLIVAN. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. GALLIVAN. That there is no quorum present.

The CHAIRMAN. The gentleman from Massachusetts makes a point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and six Members present, a quorum.

Mr. KAHN. Mr. Chairman, on the 6th of January the gentleman from New Jersey [Mr. HUTCHINSON] introduced a privileged resolution which went to the Committee on Military Affairs. It called for information regarding the quantity of nitrate of sodium that was on hand in the War Department and the price at which it was bought. The Secretary of War has written me a letter upon the subject, showing that 249,585 long tons are on hand, and that the prices vary. I ask unanimous consent to insert the resolution and the letter of the Secretary of War in the RECORD.

The CHAIRMAN. The gentleman from California asks unanimous consent to insert in the RECORD the documents to which he refers. Is there objection?

There was no objection.

The resolution and the letter referred to are as follows:

House resolution 637.

Resolved, That the Secretary of War be, and he is hereby, directed to furnish the House of Representatives, not later than February 1, 1921, a statement showing the amount of nitrate of soda on hand in the War Department and the price paid for the same per ton.

WAR DEPARTMENT,
Washington, January 12, 1921.

Hon. JULIUS KAHN,
Chairman Committee on Military Affairs,
House of Representatives, Washington, D. C.

MY DEAR MR. KAHN: In compliance with House resolution 637, I wish to inform you that there are on hand in the War Department 294,585 long tons of sodium nitrate.

It is not possible to give the exact cost per ton of the above-mentioned stocks inasmuch as some represent purchases made prior to the war and some undoubtedly the peak price paid during the war. These prices range from $42 per ton prewar to $110 per ton peak war price, both quotations being f. o. b. New York.

An examination of the amounts purchased and of the contract prices paid would indicate that a fair average cost is $85 per ton for the stocks now on hand.

Cordially, yours,

NEWTON D. BAKER,
Secretary of War.

Mr. KAHN. Mr. Chairman, I yield back the remainder of my time.

Mr. ELSTON. Mr. Chairman, may I ask how much time has been consumed?

The CHAIRMAN. The gentleman has used 21 minutes.

Mr. ELSTON. I yield 10 minutes to the gentleman from Oklahoma [Mr. HASTINGS].

Mr. HASTINGS. Mr. Chairman, I want to emphasize at the outset what has already been so well said by the gentleman from California [Mr. ELSTON] who has this bill in charge, and that is that there is no new legislation upon this bill. I think that there is less objectionable matter in this bill than in any other appropriation bill that has been considered here since I have been a Member of the House. I want to qualify my general statement by saying that a few of the items, some two or three in the bill, are made immediately available. A very creditable showing was made upon those items before the committee that held the hearings upon the bill, and this was done for the purpose of meeting certain emergencies.

I want to qualify my statement further by saying that if there is any legislation in the bill, it is not new legislation, but we have used the old language as heretofore used.

I want also to emphasize what the chairman of the committee has said, that this bill carries a reduction of $903,462.09 below the amount carried in the last bill, a saving of almost a million dollars.

Mr. BLANTON. Will the gentleman yield?

Mr. HASTINGS. I will.

Mr. BLANTON. I suppose it will be admitted by everyone that the gentleman from Oklahoma [Mr. HASTINGS] is the best posted man in the House about this Indian bill.

Mr. HASTINGS. I disclaim that honor.

Mr. BLANTON. The gentleman heard what was said by the gentleman from California [Mr. ELSTON]. I want to ask the gentleman from Oklahoma his idea as to legislation contained in the bill. Is there any?

Mr. HASTINGS. The gentleman from Texas did not hear me a moment ago when I said that, so far as I knew, there was absolutely no new legislation, except there were one or two items in the bill where the sums appropriated were made immediately available, but outside of that I know of no new legislation.

Mr. BLANTON. My attention was diverted at the time the gentleman made the statement.

Mr. HASTINGS. I said there was no new legislation in the bill; that is, no new activities or projects provided for.

I want to make one further qualifying statement, which is that there is a Minnesota item where the appropriation was made in a little different language from that carried in last year's bill, but it was represented to the committee that it was for the same purpose, and the Indians themselves and their representatives and the department had held a hearing and agreed upon the particular language, and it was represented that it did not carry anything new, but itemized and differently expressed.

I think outside of that, so far as I know, there is no new legislation in this bill. As has been suggested, we have used the old language which has been carried in the bill for a number of years.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. HASTINGS. Yes.

Mr. CARTER. Is it not a fact that the Minnesota item is similar to the one that has been carried in the bill for a great number of years, but that there are simply some changes in the language?

Mr. HASTINGS. That is what I tried to say. It provides for exactly the same thing, using a little different language, but the Indians and the representatives of the Indians and of the department all agreed to the change in the language, and the money comes out of the Indians' own tribal fund. So that I think there is no additional authority such that the House could possibly object to.

Mr. MANN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. HASTINGS. Yes.

Mr. MANN of Illinois. Is the item which the gentleman refers to the one which authorizes the Secretary to turn over to the State of Minnesota certain hospitals?

Mr. HASTINGS. I do not have a copy of the bill before me at this time.

Mr. MANN of Illinois. I supposed the gentleman would know the item that we are talking about.

Mr. HASTINGS. I have not a copy of the bill, so that I can refer to the lines in the bill, but that is what I have reference to.

Mr. MANN of Illinois. Authorizing the Secretary of the Interior to turn over to the State of Minnesota hospital plants and equipment. Does the gentleman say that that has been carried in the bill for a number of years?

Mr. HASTINGS. No; I did not say that.

Mr. MANN of Illinois. Some one said it. That is a new provision.

Mr. KNUTSON. In what part of the bill does that occur?

Mr. MANN of Illinois. It is in the bill. I know where it is.

Mr. KNUTSON. I have not had that called to my attention.

Mr. MANN of Illinois. It is at the bottom of page 25. That is one place where there is legislation. There are a number of other appropriations that are carried without any authority of law. All through the bill it is the same way.

Mr. HASTINGS. I called attention to the Minnesota items, where the language has been changed, but it appropriates for exactly the same thing, where the Indians themselves, and representatives of the Indians and representatives of the department have agreed upon it, and these constitute the only changes in the bill.

Mr. GARD. Mr. Chairman, will the gentleman yield?

Mr. HASTINGS. Yes.

Mr. GARD. I was unable to get the courtesy of a reply from the chairman of the committee, so I am going to ask the ranking Democrat on the committee a question: The bill does carry a number of legislative items, does it not, which the gentleman classes as old legislation? What I particularly wanted to know is whether there is any legislation that can be characterized as a limitation in this bill.

Mr. HASTINGS. If there is, it is not new legislation or new language that we have added to the bill. It is the old language that has been carried in the bill for a number of years prior to this time.

Mr. GARD. Of course, there is a very considerable amount of that which can be strictly classed as legislation. The gentleman calls it old legislation and makes a point of difference between old legislation and new legislation. This bill, of course, does carry a great deal of what might be called legislation—possibly necessarily.

Mr. HASTINGS. What I have been trying to explain to the Members of the House is that we have taken up the language used in previous Indian appropriation bills, and except in the cases that I have mentioned, so far as I now recall, we have not changed that language, except here and yonder dropping from the bill legislation that was regarded as of a permanent nature, which had been theretofore carried in the bill.

The Indian question is one older than our Government. The Indians were found here when the first English settlers landed on the eastern coast. They roamed over all the territory now embraced in the United States, from ocean to ocean and from the Great Lakes to the Gulf. Each colony dealt with them separately—sometimes humanely but oftentimes adopting a wrong policy.

To discuss these matters, more than a century old, would not be of any beneficial use in the consideration of the pending bill.

After the adoption of our Constitution the Indians were pacified and controlled by the War Department with disastrous results at times. Later a policy of making treaties was adopted with several tribes of Indians, limiting the area that each occupied and defining their boundaries. A Commissioner of Indian Affairs at Washington was provided for at an early date, and when the Department of the Interior was created, on March 3, 1849, the policy of controlling the Indians under the War Department was changed. The Indian Bureau was made a part of the Interior Department. In 1871 Congress adopted the policy of making no more treaties with the Indians and they were thereafter dealt with by agreement or by direct acts of Congress.

While a treaty with the Indians was thought to be a more solemn and binding matter than agreements or acts of Congress, its legal effect, as defined by the Supreme Court in a great number of cases, is of no more binding force. It is subject to amendment or repeal in the same way. This has never been understood by the Indians of the country, and I fear that it never will be. The Indians can not break a treaty with the Government, because they do not have the physical power, and they do not understand how the Government can violate its obligations with impunity.

Within the last few years a very large number of the Indians have been allotted their lands and many of them have been freed from governmental supervision.

The total Indian population, as shown by the report of the Commissioner of Indian Affairs, is given as 336,337 in the United States, of whom 101,506 are members of the Five Civi-

lized Tribes in Oklahoma. In addition there are a number of smaller tribes, aggregating about 15,000 additional Indians, in that State alone. The Indians are located for the most part upon reservations in States west of the Mississippi River, and are largely in Oklahoma, Arizona, New Mexico, Montana, and the Dakotas.

The question is frequently asked, What is to become of the Indian and what is the solution of the Indian question? In my judgment, the correct answer lays in his industrial education. Much is being done along this line. In the last few years the Government has expended large sums of money in educating Indian children in the day and boarding schools. We have a large number of boarding schools, known as reservation and nonreservation schools. Many of these schools are doing a great work.

During the month of May, 1920, a subcommittee of the Committee on Indian Affairs visited a great many of these schools. I want to testify to their splendid work on behalf of the Indian. Connected with most of these schools are tracts of land that are cultivated by the Indian boys. In addition they are given training in many trades. The girls are taught domestic science and occupations useful to women. If these schools were enlarged and their capacity increased, so as to accommodate all the Indian children and so they could be intensively trained for the next 10 years, the Indian question would in a large measure be solved. Of course, we would have some of the older Indians still with us. We must not be too impatient in attempting to solve the question. It can not be done in a day. It must be remembered that these children of the forest and the chase must be first taught the English language and think in terms of English.

Again, it must be remembered that in dealing with the Indians you are dealing with a race of people who have never had a proper appreciation of the value of property, real or personal. Permit me to say, that the proper solution of the Indian question is largely an individual question. There are a large number of Indian tribes scattered throughout the West and Northwest. Legislation that is suited to one may be entirely unsuited to another tribe. You can not legislate for the Navajo Indians, who are sheep herders in Arizona, like you would legislate for the Chippewa Indians, who live in Minnesota. You can not have the same policy with reference to Indians with a small degree of Indian blood, who have a century of education behind them and who have had the advantages of intermingling with white people through a long term of years, like you can with Indians of pure blood living upon a reservation. The people of the United States do not understand this, and it is with reluctance that I make the statement that but few Members of Congress understand it.

When you mention the word Indian here or elsewhere the sentimentalist, the dreamer, and the impractical man pictures before him the wild Indian of the western plains. He does not take into consideration that there are Indians of such varying degrees of civilization. Let me repeat that the proper solution of the Indian question is largely an individual one, and you must approach it differently with each tribe.

The question is frequently asked in the House, "Why is it we appropriate more money now than we used to a number of years ago, inasmuch as it is stated that many Indians are being relieved of governmental supervision?" Years ago the Indian tribes were dealt with as tribes. Since Congress has adopted a policy of allotting Indian lands we have been trying to educate the Indian up to where he will be able to assume the responsibility of citizenship and to take care of his property. The result has been that it requires a much larger field force to make the rolls, to grade, appraise, and allot the lands, and to look after the individual Indian, than to look after the tribe as a whole. Within the next 10 years the Indian question will largely be solved. The ones who have been placed in school and given an industrial education will be turned loose from any governmental supervision.

This bill appropriates $903,462.09 less than the Indian bill of last year. We are practicing economy wherever it can be practiced without detriment to the service. The suggestion that I have to make is that I believe the estimates of the department for additional buildings and equipment in connection with boarding schools should be allowed so as to increase the capacity of these schools and give the children the benefit of an industrial training there.

The subcommittee carefully went over each item and the justification made in its behalf. We have practiced the severest economy. The total amount carried in this bill is $11,944,535.30. There is absolutely no general legislation on it, unless it be provisions heretofore carried in the bill. We have allowed no new provision subject to a point of order to be inserted. Ours is an appropriating committee and not a legislative committee. We have pursued the policy that matters of general legislation should be referred to the Committee on Indian Affairs and not to the Appropriations Committee.

The amount appropriated in the bill is divided up as follows:

Gratuity appropriations	$6,839,525.00
Appropriations pursuant to treaties	856,620.00
Reimbursable appropriations	1,609,735.00
Appropriations from tribal funds	2,638,655.30
	11,944,535.30

The amount taken from tribal funds, generally speaking, is used to supplement the other appropriations in the support and maintenance of the Indians.

There are two other thoughts that I want to suggest. The first is that I have never laid much stress, as some people do, on the preservation of the Indian's property. Of course, I would protect him as far as I reasonably could against his losing it; but instead of stressing this point, I emphasize the development of the Indian. Every Indian should be taught and encouraged in every possible way to become a useful, productive citizen of the United States, and should not be encouraged to remain in idleness renting his property to others. The young should be given industrial training in school and the older ones the practical training upon the farm, as to how to utilize their land, take care of their stock and market their crops.

It is better to point with pride to an Indian personally cultivating 5 or 10 acres of land, than to his remaining in idleness and living on rentals from larger areas. The renting of land allotted to Indians for long periods of time should be discouraged, and the able-bodied Indian should be made to improve and cultivate some of his holdings.

The second suggestion that I want to make is that I have never been in favor of long-distance government. I believe that the Indian Bureau in Washington should exercise a broad general supervision over Indian tribes throughout the United States, but that a larger amount of authority should be given to the local superintendents and that they should be held to a stricter accountability. It is worse than folly for anyone to attempt to justify a central office in Washington 1,500 or 2,000 miles away, supervising administrative details between a superintendent and the individual Indian. It leads to delays. The Indian is discontented and the service is unsatisfactory. The local representative of the Indian Office gets out of the habit of assuming responsibility, passes the matter up to the Indian Office with a long report, and frequently additional reports are called for. All this results in delays of weeks and months upon matters that ought to be settled at once. This is to the Indian's detriment. To argue that a local Federal officer should not be intrusted with more responsibility is to argue against republican government. To follow this to its legitimate conclusion would be to say that you ought not elect a county attorney, as he would not enforce the laws in the county, because he would be influenced by local sentiment; and that you should not elect a local man as county judge, because his decisions would be influenced by the community in which he lives. In every city and town you should send to a distant State for some man to administer their affairs, as no one there could be trusted. There should not be a man in the Government service that is not honest and that has not the strength of character to do the right thing. I have no patience with any man or any department, who is afraid to trust its own employees. No local officer should be afraid to assume responsibility, nor should he be afraid to do the right thing.

Mr. SEARS. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Florida makes the point of order that there is no quorum present. The Chair will count. [After counting.] Ninety Members, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Andrews, Md.	Butler	Dale	Esch
Babka	Caldwell	Davey	Evans, Nev.
Bacharach	Campbell, Kans.	Davis, Minn.	Fairfield
Baer	Candler	Dempsey	Ferris

Layton	Nolan	Sims	
Lehlbach	O'Connell	Sinclair	
Lesher	Oldfield	Sinnott	

The committee rose; and Mr. MADDEN having assumed the chair as Speaker pro tempore, Mr. FESS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Indian appropriation bill, and finding itself without a quorum he had caused the roll to be called, when 233 Members answered to their names, a quorum, and he handed in the list of the absentees.

The committee resumed its session.

Mr. ELSTON. Mr. Chairman, how much time remains?

The CHAIRMAN. Twenty-nine minutes.

Mr. ELSTON. Mr. Chairman, I yield 28 minutes to the gentleman from Massachusetts [Mr. TINKHAM].

Mr. TINKHAM. Mr. Chairman, on Tuesday next the bill apportioning Representatives among the several States is to be considered by this House. The managers on both sides of this bill under general debate have refused me time to speak. Therefore I have been compelled to ask the chairman of the subcommittee on Indian affairs of the Appropriations Committee to give me at least half an hour in which to address the House on one of the most vital questions that can come before this House in this Congress or in any other Congress.

The House of Representatives is about to pass a bill apportioning Representatives among the several States of the Union in accordance with the census of 1920 and section 2, Article I of the Constitution of the United States, which directs that this shall be done every 10 years.

The electoral college for the election of Presidents is constituted of electors equal to the whole number of Senators and Representatives to which a State may be entitled in the Congress.

This bill consequently determines the number of Representatives of which this House shall consist for the next 10 years and determines the number of electors in the electoral college which shall elect the next two Presidents of the United States.

It will be a perilous proceeding in these days of revolt against all law and defiance of constituted authority, equivalent almost to revolution, if representation in this House and in the election of our Presidents is not squarely placed upon a constitutional and lawful basis.

The fourteenth article, in addition to an amendment of the Constitution of the United States, section 2, provides:

> Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State or the members of the legislature thereof is denied to any of the male inhabitants of such State being 21 years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such State.

It is under this amendment that the House of Representatives is to proceed to act.

The words "shall be reduced" make this amendment mandatory, and no apportionment of Representatives among the several States can be made unless the House of Representatives in good faith at least has attempted to carry out the constitutional mandate that if the right to vote is denied "or in any way abridged" by any State there shall be a proportionate reduction in representation.

No attempt to carry out this constitutional mandate has been made and no action has been taken. The responsibility for this reprehensible course of conduct falls entirely upon this House of Representatives, which is about to attempt to pass a bill to apportion Representatives without the application of this constitutional command.

Chapter 2, section 22, of the Revised Statutes says:

> Should any State deny or abridge the right of any of the male inhabitants thereof, being 21 years of age and citizens of the United States, to vote at any election named in the amendment to the Constitution, Article XIV, section 2, except for participation in the rebellion or other crime, the number of Representatives apportioned to such State shall be reduced in the proportion which the number of such male citizens shall have to the whole number of male citizens 21 years of age in such State.

H. R. 9389, a bill to consolidate, codify, revise, and reenact the general and permanent laws of the United States in force March 4, 1919, says:

> Should any State deny or abridge the right of any of the male inhabitants thereof, being 21 years of age and citizens of the United States, to vote at any election named in the amendment to the Constitution, Article XIV, section 2, except for participation in the rebellion or other crime, the number of Representatives apportioned to such State shall be reduced in the proportion which the number of such male citizens shall have to the whole number of male citizens 21 years of age in such State.

This consolidation and codification was passed by this House on December 20 last, and if in this apportionment bill now before the House of Representatives no attempt is made in good faith to carry out these directions, the House of Representatives becomes responsible not only for the nullification of the Constitution but for the repudiation of statutory law and of its own legislative action taken within 30 days.

This question and this issue is not a color question nor a race issue, except in a collateral way.

It is a question of constitutional enforcement and equal franchise rights among the several States of the Union under the Constitution.

At the base of this Union of States is the theory of equal power among them and equality in authority under the Constitution; were it otherwise there would be totally destroyed that equilibrium so necessary to the permanency of the Republic. Each of the States must be equally represented in Congress or this equal power and equality in authority is totally extinguished.

Equal representation in the House of Representatives can only mean under the Constitution that all Representatives shall represent equal constituencies of enfranchised voters, because the fourteenth amendment compels a reduction in representation where disfranchisement exists.

This in a finality can only mean that the vote of one citizen in one State shall be equal to the vote of another citizen in another State, so far as representation in Congress is concerned.

If this were not true, then the voters in States where disfranchisement was great would have much greater political power than the voters in States where no disfranchisement existed and consequent disproportionate representation in the Federal Congress.

That this situation exists in the United States to-day no man can deny.

If the fourteenth amendment were not a part of the Constitution it would only be franchise justice and equality to say that no State should receive representation in our Federal Union on a basis of population and then be allowed to disfranchise a part of that population who are citizens.

The nineteenth amendment to the Constitution recently adopted enfranchises all women in the United States, so that the disproportion would now be nearly double between those States which enfranchise its citizens and those which disfranchise its citizens. This makes this issue between the several States of the Union more profound and more vital than ever before in the history of our country.

President Wilson, not later than December 7 last, in his annual message to Congress, said:

> Democracy is an assertion of the right of the individual to live and to be treated justly as against any attempt on the part of any combination of individuals to make laws which will overburden him or which will destroy his equality among his fellows in the matter of right or privilege, and I think we all realize that the day has come when democracy is being put upon its final test. The Old World is just now suffering from a wanton rejection of the principle of democracy and a substitution of the principle of autocracy as asserted in the name but without the authority and sanction of the multitude. This is the time of all others when democracy should prove its purity and its spiritual power to prevail. It is surely the manifest destiny of the United States to lead in the attempt to make this spirit prevail.
>
> There are two ways in which the United States can assist to accomplish this great object: First, by offering the example within her own borders of the will and power of democracy to make and enforce laws which are unquestionably just and which are equal in their administration, * * *

I say to you that the essence of the will of democracy is the ballot, and the quintessence of equality in a democracy is an equal ballot, and no laws are just which do not establish, enforce, and protect this right.

The States have full authority over the elective franchise and may make what restrictive laws they wish, limited only by the inhibition of the fifteenth amendment to the Constitution which forbids the denial or abridgment of the franchise by any State by any law "on account of race, color, or previous condition of servitude," which has been decided by the Supreme Court to mean in its expressed terms, not necessarily in its application nor effect, but subject always to the fourteenth amendment, which provides for a reduction in representation for disfranchisement.

The power to reduce representation for disfranchisement is the only repressive force in the Constitution to prevent the institutions of the States from gravitating into oligarchies and aristocracies by limiting the elective franchise to a few of the citizens or to a class.

Shall the House of Representatives "when democracy is being put to a final test" allow aristocracies in States to be established and maintained and at the same time violate a constitutional mandate? If the House of Representatives does so it not only substitutes aristocracy for democracy but destroys democracy. It becomes a handmaid of anarchy and a destroyer of the Constitution it has sworn to obey.

No matter with what intent the fourteenth amendment to the Constitution was added to that instrument, the plain and unequivocal language of that amendment must be obeyed and applied.

This question is not a sectional question nor a sectional issue, nor should the fourteenth amendment be sectional in application. It is a national question and should be national in application. If Massachusetts disfranchises her citizens the reduction in representation should be made in Massachusetts as in any other State, no matter where situated.

President Garfield on the 6th of December, 1871, then a Member of the House of Representatives, said upon the apportionment bill under the census of 1870, the first apportionment after the passage of the fourteenth amendment:

> In the State of Massachusetts people are deprived of suffrage on account of inability to read and write. All such persons, under the constitutional amendments which I have indicated, must be subtracted from the total population of Massachusetts before we can know what is her representative population. If in the Southern States men are still denied the right to vote, in consequence of race or color or for lack of property qualification, their total must be reduced accordingly. I do not know how large the sum to be subtracted is in any State. I am aware that the facts were very difficult to ascertain, and perhaps the result may not change the number of Representatives in any State, but it is clear that we ought to have all the facts before we proceed to fix the relative number of Representatives of the States.

And on the 12th day of December Judge Shellabarger, of Ohio, one of the ablest lawyers in the House of Representatives, in delivering a speech on the same subject, said:

> Now, I say it was the design of this constitutional amendment, and it was a beneficent one, that wherever a State may choose to do a thing—and the State may do it—the fourteenth amendment does not take away the power to do it. You in Massachusetts may establish your qualification of intelligence, or you in New York and Rhode Island may establish your property qualifications as you may please, but you take the consequences in their effect upon your power in this House. You have your choice. The design of this constitutional amendment was that the poor man, the ignorant man, the colored man, should be secured, should be guaranteed his right to vote; that the States should not deprive him of his right of representation except by taking the consequences of not having in this Hall representation for those of his class.
>
> That is to say, if a State decided that a man is not good enough to vote, the State shall therefore be regarded as saying that he is not good enough to be represented here.

National elections in the United States can no longer be half constitutional and half unconstitutional. There can be no double standard of constitutional enforcement.

The Federal political morality of one State of the Union must be the Federal political morality of all States of the Union.

The very essence of law and order is the enforcement of the fundamental law of the land, which in the United States is the Constitution.

The Congress of the United States has no moral right to ask the citizens of the United States to obey laws which it itself passes when it refuses to obey the plain commands of the Constitution in relation to its own elections and how it shall be constituted. Its acts are vitiated at their source and have little or no moral sanction.

For America to pose before the world as a dictator of international law and order and sponsor of international morality and ethics with her national Representatives elected in flagrant and defiant violation of her Constitution is the height of national hypocrisy and the pinnacle of anarchism.

These things must come to an end or the Republic is destroyed and democracy annihilated.

Mr. ELSTON. Mr. Chairman, I yield back what time I have remaining.

Mr. HASTINGS. Mr. Chairman, I desire to be recognized in my own right.

The CHAIRMAN. The gentleman is recognized.

Mr. HASTINGS. I ask unanimous consent that I may yield of the hour which I understand is given to me.

The CHAIRMAN. That is what we have been doing.

Mr. HASTINGS. I yield 10 minutes to the gentleman from Arizona [Mr. HAYDEN]. [Applause.]

Mr. HAYDEN. Mr. Chairman, I was not aware that the Indian appropriation bill was to come up for consideration in the House to-day, but, nevertheless, I want to submit a few rambling remarks on the method whereby this bill was prepared. I was absent on a tour of the western reservations with the Committee on Indian Affairs when the rules of the House were changed to allow the Committee on Appropriations to appropriate for Indian Affairs, thus taking that jurisdiction away from the Committee on Indian Affairs. I have no complaint to make about the fairness, the care, nor the consideration given by the members of the subcommittee in charge of this bill. I am sure that they performed their duty honestly and faithfully and to the best of their ability, but they have been limited by the rules of the House to such an extent that they have been unable to adequately provide for the Indian Service as it has been cared for heretofore by the Committee on Indian Affairs. Under the rules of the House the committee could not place legislation of any character in this bill, nor could they appropriate for any kind of a new project. It makes no difference how badly a school building is needed, how urgently any kind of a new project is demanded, under the rules and under the instructions given to the subcommittee by the Committee on Appropriations all such requests were absolutely refused.

And what is the result? By the adoption of the new budget committee system, as it has been erroneously called, the Members of the House of Representatives and particularly the members of the committee having knowledge of Indian Affairs have had their hands tied so that only by unanimous consent can they offer any amendment to expedite or improve the business of the Indian Bureau. The practical effect of this change is that Senators in another body must be depended upon to initiate every new activity undertaken by way of an annual appropriation bill, and it is to that point I wish to address myself. I am convinced that this new method which concentrates all the power and authority to make appropriations in one committee will fail to result in any real economy, because there is no check whatever upon another legislative body at the other end of the Capitol. The only way to actually save money for the taxpayers is to provide that a concurrent resolution shall be passed at the beginning of each regular session of Congress which definitely fixes a certain aggregate sum of money to be appropriated for each governmental activity.

If both the House and the Senate should agree in advance that not more than $500,000,000 should be appropriated for the Army, another half billion for the Navy, a quarter of a billion for sundry civil expenses, fifteen million for the conduct of Indian Affairs, and so on through every branch of the public service, and that the sums as thus agreed upon would be binding upon both the House and the Senate, then a real budget would be established and real economy could be practiced. But as it is the Members of the House are bound by a rule which does not permit the offering of amendments to appropriation bills which provide for new projects. Members of the House can not propose any new activity in the Government service, while Senators in another body are perfectly free to offer such amendments as they see fit.

I have served in this House for nearly nine years, and I can say without fear of successful contradiction that the history of every appropriation bill is that the House has been economical; that under the rules here new projects have been kept out of appropriation bills except in meritorious cases. There is no such strict rule in the Senate. The rules of the Senate permit an amendment to be offered if an estimate has been made in the Book of Estimates, or an amendment may be offered if a bill containing the proposition has been favorably reported by any committee of the Senate.

A study of the appropriations made during any period of years will not fail to demonstrate that the greater increases are almost invariably made in another body and not in the House, and therefore it seems to me that there was no real necessity for the adoption of this so-called budget plan unless it is made applicable to both Houses of Congress. If a budget

resolution was agreed upon by the Senate and House at the beginning of the session showing just how much money is to be devoted to each activity of the Government and the details of making the appropriations within the limits so fixed were distributed among the various committees who by experience and study actually know something about the business to be transacted, undoubtedly the best use would be made of the available sum of money. When an appropriation bill passes the House and the Senate decided upon an increase in one part of the bill, a reduction would have to be made somewhere else in order to keep the total sum appropriated within the limits previously fixed. By no other means will we ever have an effective budget system.

The people of the United States are not going to be deceived very long in the belief that any actual or real economy has been accomplished by the mere adoption of a rule which concentrates in one committee of the House the sole authority to report appropriations when no limitation is placed upon the committees or the Members of the Senate. The American taxpayers will soon discover that in the end they are still paying the same sums as heretofore, because there has been no real or final reduction in appropriations by the body at the other end of the Capitol, but that in fact the Senate has continued to add to the appropriation bills as in the past. All that the Members of this House have accomplished by the adoption of this new Budget Committee plan is to deprive themselves of authority which they have heretofore enjoyed, and whatever power they had to initiate new enterprises has been transferred to the other end of the Capitol.

If during the consideration of this bill in the House a Member from the State of South Dakota, for instance, presents a good case showing that a new building, which has been estimated for by the Interior Department, should be erected at an Indian school in his district, under the rules of the House such an amendment would not be in order. But when this bill is considered by the Senate and the same facts are presented there is no rule which will prevent a vote on the merits of the amendment, and the construction of the new school building will be authorized; but who gets the credit?

Mr. GARRETT. Will the gentleman yield?

Mr. HAYDEN. I yield.

Mr. GARRETT. Unless a Member in the House guards himself very closely, perhaps the Senate will get the credit, but if he does guard the situation closely and such an amendment is put on by the Senate, when it is brought back here he will have to have a separate vote in the House before it can be agreed to.

Mr. HAYDEN. But if the proposition is meritorious in the beginning, if such an improvement ought to be made, and it is generally conceded that it should be made, why should Members of the House tie their hands and by a rule deny themselves the right to legislate?

Mr. MANN of Illinois. Does the gentleman claim there has been any change in the rule at all with reference to adding amendments to the Indian appropriation bill?

Mr. HAYDEN. I do not.

Mr. MANN of Illinois. The rule is just the same as it was before.

Mr. HAYDEN. But the practice is decidedly different, as the gentleman will well realize if he examines this bill.

Mr. MANN of Illinois. An amendment can not be added now that might not have been added before. There has been no change in the rules in that respect.

Mr. HAYDEN. That is very true, but the actual situation is that if a committee having combined jurisdiction over legislation and appropriations reports legislation on an appropriation bill, it is much more likely to have that legislation passed by the House without invoking the rule than a committee whose jurisdiction is strictly confined to appropriations and of which all other committees are jealous if it assumes the power to report legislation.

Mr. MANN of Illinois. That is purely a matter of practice and not a matter of the rules of the House. What the practice will be is problematical.

Mr. HAYDEN. Under the practice of the House new legislation and appropriations for new projects have generally been adopted and carried in appropriation bills by the application of common sense to the rules of the House.

Mr. MANN of Illinois. I do not know that we have lost our common sense. Maybe we have.

Mr. SNYDER. Will the gentleman yield?

Mr. HAYDEN. I yield to my friend from New York.

Mr. SNYDER. I would like to point out one thing to the gentleman. To an appropriation bill coming in as this has done, without legislation on it, a Member may offer an amendment which is subject to the same point of order as it would be if it was on the other appropriation bill. But everyone in the House knows that that amendment as offered on the floor has not been discussed or investigated by the legislative committee, and therefore there is much more reason for a point of order being made to the amendment than if offered on the floor to a legislative committee appropriation bill.

Mr. MANN of Illinois. Any one Member can make a point of order. That situation still exists. I hope there will be a different practice.

Mr. HAYDEN. The gentleman from Illinois [Mr. MANN] has admitted that there has been a substantial change in the practice of the House with respect to new legislation on appropriation bills since this new rule was adopted, and I would like to inquire of him as an experienced legislator——

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. HASTINGS. Mr. Chairman, I yield five minutes more to the gentleman from Arizona.

Mr. HAYDEN. I would like to hear from the gentleman from Illinois as to what, in his opinion, will be the effect of this new rule, whether it does not reduce the opportunities and the privileges of the Members of the House, and whether it does not actually increase the power exercised by the Senate?

Mr. MANN of Illinois. I am inclined to think it decreases the power exercised by the Senate, because, under the rule, there is a substantial change. If the Senate adds an amendment to this bill which would have been subject to a point of order in the House, it can not be agreed to by the conferees on the part of the House. It must be agreed to in the House itself by a separate vote. I think it takes away largely the power of the Senators.

Mr. HAYDEN. Does the gentleman from Illinois believe that this new rule will actually result in any substantial economy?

Mr. MANN of Illinois. Oh, I did not vote for the rule. I do not know what will be the result. I did not approve of it.

Mr. HAYDEN. I am glad to know the gentleman from Illinois did not approve of the adoption of this rule, and I can further say that there are many other gentlemen in this House who are no better satisfied with it than he is.

Mr. SNYDER. Of course, the gentleman understands the position this bill is in in the House is different from any other bill, inasmuch as there is no new legislation in it. Every amendment that is offered on the floor that contains new legislation is, of course, subject to a point of order the same as it would have been had it been in the other bill.

Mr. HAYDEN. It is obvious that the reason why there is no new legislation in this bill is that if legislation were reported in the bill the House would naturally conclude that the Committee on Appropriations, not being a legislative committee, should therefore not be permitted to report legislation.

Mr. SNYDER. As to the position of the committee and the gentlemen in the House interested in that work, as the matter stands to-day, there is an appropriation bill here, but there is no matter before the Indian Committee in the matter of legislation that ought to be on the bill. Neither did the Appropriations Committee hand over such a bill as that, and no legislation has been sent to it. Therefore, practically, there is no use for the Indian Committee, except for the work it has done in its effort to carry out the investigations.

Mr. GARRETT. Will the gentleman from Arizona yield?

Mr. HAYDEN. Certainly.

Mr. GARRETT. The gentleman from New York [Mr. SNYDER] does not mean to commit himself to the proposition that there is no legislation in this bill?

Mr. SNYDER. Well, I would not say, as I have not read the bill carefully, not having any great interest in it. There may be some matter in it that is legislative.

Mr. HAYDEN. It would be not only useless but foolish to go through the motions of having the Committee on Indian Affairs report out a bill authorizing the construction of a new building at an Indian school and to insist that such a bill receive consideration in the House, when we know that even if it passed the House such a bill would not receive consideration in the Senate, because the body at the other end of the Capitol if it deems such an item to be necessary, will merely insert it in the Indian appropriation bill, which must of necessity become a law before the 4th of March.

Mr. SNYDER. What I mean to say is that the function of the Committee on Indian Affairs to-day, as the matter now stands, is practically eliminated. There is no use for it, and I think it is in the same position as every other so-called legislative committee in this House if you have this appropriating committee constituted as it is, since it has no function except to

appropriate. You might as well discharge all the other committees, and when a bill comes in attempt to put on legislation by amendment. There is no use in having a legislative committee.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. HASTINGS. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

The CHAIRMAN. The gentleman from Texas is recognized for five minutes.

Mr. BLANTON. Mr. Chairman, in reply to the statement of the distinguished gentleman from New York [Mr. SNYDER], who just stated with assurance that there is no legislation in this Indian appropriation bill prepared by the new Committee on Appropriations, which was to have no legislative power but only appropriating power, I want to point out a few paragraphs that are still legislative and unauthorized by law.

Mr. SNYDER. That may be.

Mr. BLANTON. Take, for instance, at page 13, Indian Service inspectors. There is a paragraph appropriating $25,000. There is no law authorizing that. Then on page 14 there is a paragraph for vehicles for the Indian Service.

Mr. SNYDER. They were appropriated for in every bill for the last five years.

Mr. BLANTON. Oh, yes; but have never been authorized by any law, yet they involve the expenditure of some thousands of dollars. That is all unauthorized legislation. There is no substantive law authorizing it. Then on page 15 there is a whole paragraph for suppressing contagious diseases among the live stock of Indians, involving an appropriation of $25,000. That is legislation unauthorized by any substantive law.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. In a moment. Then on page 15 is the whole paragraph for developing water for Indian stock, involving $50,000 more. That is legislation that has no substantive law authorizing it. And so on throughout the bill. The gentleman's answer is that they are items that have been carried in appropriations without law authorizing it year after year. I grant that.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. This is what the gentleman was trying to ask me.

Mr. SNYDER. Oh, no.

Mr. BLANTON. Still they are items of legislation on an appropriation bill, right in the face of the assurance which the members of the Committee on Appropriations gave us that they would not put legislation on the appropriation bills.

Now I yield to the gentleman.

Mr. SNYDER. Of course, I am not certain that the gentleman is any more sure of the statement that he has made than I am of the one that I have made.

Mr. BLANTON. If there is a man of the gentleman's party who says he knows the fact who will get up and say that there is any substantive law authorizing the items I have mentioned, I will now yield to him. The men in charge of the bill know it; they are just items of appropriation in the way of legislation that have been carried in this bill from year to year without authority of law.

What I am trying to get at is this: Let us confine this new Committee on Appropriations, which has taken away all the appropriating power from all the other committees of this House, to appropriations and nothing else. We must hold them down and not let them assume legislative authority, for if they continue to assume and arrogate to themselves authority and power in this House it will mean that the House of Representatives in the next Congress is going to be a House of 35 Members, no matter how many Members you may increase it to under the proposed Siegel bill.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. CANNON. These various provisions in this bill, if not authorized by legislation, are subject to a point of order. The Committee on Indian Affairs has legislative power, and they can sit and report a bill covering these matters.

Mr. BLANTON. Oh, yes; but we do not want to put them to the trouble of doing that. I am not going to make a point of order against any of these items, because they are items which will properly be expended for the Indians, and I do not want to put the legislative committee to the trouble of holding hearings and preparing and introducing bills covering these items.

But it is the principle of the thing that I am objecting to. It is the assumption, and the continued assumption, of power by this great Committee on Appropriations that I am protesting against.

Mr. CANNON. The legislative committee can make a point of order on these items, and they can consider matters of legislation. Legislation and appropriation ought not to go together.

Mr. BLANTON. They ought not to; I am glad that the gentleman agrees with me on this subject.

Mr. CANNON. Very well. Then abolish the Committee on Indian Affairs, if it is not going to perform its functions. Abolish it, and create a new committee that will perform its functions.

Mr. BLANTON. Some of the members of the Committee on Indian Affairs that I know are among the most responsible and active and able Members of this House, and if given a chance they would function.

Mr. CANNON. Have they considered these various matters on these bills?

Mr. BLANTON. Yes; but in former appropriation bills only.

Mr. CANNON. But are those matters covered in bills that are on the calendar?

Mr. BLANTON. No. These items have been carried on year after year unauthorized by law. It was the policy I was speaking against and registering my protest against.

Mr. CANNON. Does the gentleman desire the Committee on Indian Affairs to be an appropriating as well as a legislative committee?

Mr. BLANTON. No. I was in favor of and voted for this change, but I hoped when I voted for it that the Committee on Appropriations would confine itself to appropriations and let legislation alone, and not assume authority it did not possess.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. GALLIVAN. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Massachusetts makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and three Members are present, a quorum. The Clerk will read.

Mr. HASTINGS. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. SUMMERS of Washington. Mr. Chairman, I want to express my hearty approval of all that has been said by the gentleman from Arizona [Mr. HAYDEN] and the gentleman from New York [Mr. SNYDER] in regard to the difficulty of getting before this House the consideration of meritorious legislation, which sometimes, it seems, must come in the form of an amendment.

At this particular time I also want to say that I am in full sympathy with this committee and with every other committee that is endeavoring to cut down appropriations, speaking by and large; but there are times when the cutting of appropriations can act as a distinct injury to meritorious undertakings in this country which should not be handicapped, not even at this time; and one of these, I believe, is the Wapato Indian project, a part of the Yakima Indian Reservation, in the State of Washington.

There are in this project 70,000 acres of land under cultivation, which produced last year between $9,000,000 and $11,000,000 worth of crops. The great State of Illinois or the great State of Iowa or any of the other great States of this Union can not compare with the production per acre of the Wapato Indian project during the last few years.

The act of August 1, 1914, provided water for 40 acres of each Indian allotment within the 120,000 acres known as the Wapato project. The acreage irrigated in 1920 was approximately 70,000 acres. All lands in white ownership have signed water-right applications, agreeing to pay for both the construction charges and the storage charges. Approximately $125,000 is now being collected at the rate of $5 per acre to repay the irrigation cost. There yet remains 50,000 acres that can not make use of any of the water, provisions for which was made in the act of August 1, 1914. Other lands now irrigated are badly in need of drainage.

It is believed that the total acreage cost of this project, including storage, will not exceed $50 per acre. It is the cheapest project of any size in the Northwest, if not the entire West. There is a demand for land as fast as water is provided.

You must understand that this land without irrigation is worth a mere bagatelle—$3 or $5 per acre.

An irrigation program of $500,000 a year for three years would complete this project at minimum cost. Equipment is now on the job and able to carry out the program outlined above. Some of the water will be used over the second time by collecting the drainage water, which now goes to waste.

I want to bring to your attention the testimony of Mr. Meritt, Assistant Commissioner of Indian Affairs, before the Indian

Subcommittee on Appropriations. He asked for an appropriation of $350,000. The committee have seen fit to reduce this to $250,000. He said:

The appropriation asked for is desired to enlarge the existing system so as to supply water to additional lands, particularly for the construction of 26 miles of lateral, distributing works, and drainage system. It is estimated that this alone will cost approximately $325,000. Funds will also be needed, of course, for the usual operation and maintenance expense.

This is one of the very best irrigation projects in the Indian Service; the land is exceedingly valuable when placed under irrigation and the amount of crops produced on that reservation is enormous.

Mr. ELSTON. Is there any question about reimbursement?

Mr. MERITT. No, sir; the land is worth anywhere from $200 to $1,000 an acre, and the land is held responsible for the construction charges.

Mr. ELSTON. Is the land owned by the Indians or has that reservation been broken up?

Mr. MERITT. The land has been opened to settlement and part of the land has been acquired by white owners.

Mr. ELSTON. And this system extends over all of the lands?

Mr. MERITT. Yes, sir.

Mr. ELSTON. It covers the whole area?

Mr. MERITT. It covers part of the Yakima Reservation.

Mr. ELSTON. How much is used for maintenance and operation?

Mr. MERITT. About $80,000.

Mr. ELSTON. Then a large part of this appropriation will be used to extend the project?

Mr. MERITT. Yes, sir.

Mr. HASTINGS. That is, the remainder of the $325,000?

Mr. MERITT. Yes, sir.

Mr. HASTINGS. In other words, about $245,000 or thereabouts?

Mr. MERITT. Yes, sir.

Mr. Reed, the chief engineer of the Indian Service, testified:

I might say that on the Yakima Reservation as rapidly as the land is supplied with irrigation facilities it is put under cultivation. You will note that last year we had a report that a little over 1,000 acres were not under cultivation; that came about as the result of the project having reached this land later than it was advisable to put in crops for that year; the farming operations are keeping right up on the heels of construction and there is always a clamor for more. It is one of the great producing sections of the Northwest, and it seems economic waste not to have this land produce when the project is so well along.

Mr. ELSTON. How successful are you in making collections in the way of reimbursement of principal and maintenance?

Mr. REED. We are just beginning this year; the accounts are due now, but we have not had a report; we commenced in December to make the collections for this year; on the maintenance and operation, so far as the white men are concerned, we have collected from them right up to date; the Indians, where their land is leased, also pay, for the reason that in the lease is placed a clause that covers the payment of that by the white people who lease the land. Some of the Indians who have irrigated have not paid yet, because they are not quite as successful and did not get started as well, but I have no doubt but what they will pay. So that we are very successful in collecting our maintenance and operation charge and we are just beginning to collect our construction charge.

Mr ELSTON. About how much, on the average, goes into the United States Treasury?

Mr. REED. Last year we collected $5 on all the white owners' lands, and according to my last report there were about 30,000 acres, so that at $5 it would mean $150,000.

Mr. ELSTON. What would you say could be expected during the fiscal year for which this appropriation is made; that is, how much you would expect to get in the way of collections?

Mr. REED. I should say at least $150,000.

Mr. ELSTON. Of course, the rate of collection should increase tremendously in the next three years and it should overtake not only the current appropriations but should apply on the back amounts appropriated.

Mr. REED. It will.

Now, gentlemen, here is a project for which there is an authorization of law for the supplying of water to these 40-acre units allotted to the Indians. It is testified to as being one of the most productive Indian projects in the United States; that the land after the water goes onto it is worth from $200 to $1,000 per acre; that the crops last year amounted to from $9,000,000 to $11,000,000 on something like 70,000 acres.

It seems to me that in this instance we would be justified in appropriating the amount of money, $350,000, which was asked by the commissioner. This, by the way, is several hundred thousand dollars less than they actually need. The recommendation was made to the department by the local engineer on the project that there be something over $800,000 expended on the project in the next year.

At the proper time I contemplate offering an amendment to increase this to the amount asked by the Commissioner of Indian Affairs, and I simply take this occasion to lay before you the facts in regard to this project. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the purpose of paying the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and in full compensation for all offices and salaries which are provided for herein for the service of the fiscal year ending June 30, 1922, namely:

Mr. ELSTON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FESS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the Indian appropriation bill, H. R. 15682, had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. OVERSTREET, indefinitely, on account of important business.

ADJOURNMENT.

Mr. ELSTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 57 minutes p. m.) the House adjourned until Saturday, January 15, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

338. A letter from the Secretary of the Treasury, transmitting items in connection with immigrant stations under the control of that department; to the Committee on Public Buildings and Grounds.

339. A letter from the Secretary of the Treasury, transmitting items in connection with hospitals, etc., under control of the Public Health Service; to the Committee on Public Buildings and Grounds.

340. A letter from the Secretary of the Treasury, transmitting communication from the Assistant Secretary of the Navy, submitting an estimate of appropriation to pay claim for damages by naval vessels adjusted by the Navy Department (H. Doc. No. 979); to the Committee on Appropriations and ordered to be printed.

341. A letter from the Secretary of the Treasury, transmitting communication from the Secretary of the Interior, submitting a supplemental estimate of appropriation required by the Freedmen's Hospital, Washington, D. C., for necessary fuel, fiscal year 1921 (H. Doc. No. 980); to the Committee on Appropriations and ordered to be printed.

342. A letter from the president of the Chesapeake & Potomac Telephone Co., transmitting report of that corporation for the year 1920; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SNYDER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 15663) to reorganize the Indian Service, to expedite the settlement of Indian affairs, and for other purposes, reported the same with amendments, accompanied by a report (No. 1189), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. CALDWELL, from the Committee on Military Affairs, to which was referred the bill (H. R. 15678) for the relief of Oliver A. Campbell, reported the same without amendment, accompanied by a report (No. 1188), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (S. 2274) for the relief of the owners of the schooner *Charlotte W. Miller*, reported the same with an amendment, accompanied by a report (No. 1190), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15575) for the relief of Dampskibsselskabet Dannebrog, owner of the Danish steamship *Flynderborg*, reported the same without amendment, accompanied by a report (No. 1191), which said bill and report were referred to the Private Calendar.

Mr. REED of New York, from the Committee on War Claims, to which was referred the bill (H. R. 10635) for the relief of Vincent L. Keating, reported the same without amendment, accompanied by a report (No. 1192), which said bill and report were referred to the Private Calendar.

UMI

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MOORES of Indiana: A bill (H. R. 15726) to prohibit the withholding from retired Government employees who may have been reemployed in the Government service any part of their retirement annuities or other pay for service since retirement, and for other purposes; to the Committee on Reform in the Civil Service.

By Mr. BUTLER: A bill (H. R. 15727) authorizing the disposition of certain lands, title to which was acquired by the United States for naval purposes during the war, which lands are no longer needed for naval purposes; to the Committee on Naval Affairs.

Also, a bill (H. R. 15728) authorizing the President to requisition fuel necessary to maintain the Navy, and for other purposes; to the Committee on Naval Affairs.

Also, a bill (H. R. 15729) authorizing the removal of the War College, Rhode Island, to the District of Columbia; to the Committee on Naval Affairs.

Also, joint resolution (H. J. Res. 447) to provide a commission to inquire into and submit recommendations to Congress relative to the advisability of erecting a naval museum in Washington, D. C.; to the Committee on Naval Affairs.

Also, joint resolution (H. J. Res. 448) to provide a commission to inquire into and submit recommendations to Congress relative to the necessity and advisability of erecting a new chapel at the United States Naval Academy; to the Committee on Naval Affairs.

By Mr. GANDY: Memorial of the Legislature of the State of South Dakota, in extraordinary session at Pierre, S. Dak., on the 25th day of June, 1920, urging the repeal of the act entitled "An act to promote reciprocal trade relations with the Dominion of Canada, and for other purposes," approved July 26, 1911; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of South Dakota, at the sixteenth session thereof, urging legislation for the stabilization of the prices of farm products; to the Committee on Agriculture.

Also, memorial of the Legislature of the State of South Dakota, at the sixteenth session thereof, urging that a reasonable amount of money be appropriated to indemnify and reimburse the owners of flooded lands at Lake Andes, S. Dak., and that no action be taken or money expended for the draining or lowering of said lake; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEGG: A bill (H. R. 15730) to provide for the retirement, as second lieutenant of Field Artillery in the Army, of Cadet Frederick S. Warren; to the Committee on Military Affairs.

By Mr. CANNON: A bill (H. R. 15731) granting an increase of pension to Jerry Fitzpatrick; to the Committee on Pensions.

By Mr. COLE: A bill (H. R. 15732) granting a pension to Amanda J. Gilmore; to the Committee on Invalid Pensions.

By Mr. DUNBAR: A bill (H. R. 15733) granting a pension to Ellen E. Brock; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 15734) granting a pension to Sarah McGowan; to the Committee on Invalid Pensions.

By Mr. GANDY: A bill (H. R. 15735) granting a pension to Daniel Lynch; to the Committee on Invalid Pensions.

By Mr. HOWARD: A bill (H. R. 15736) granting a pension to Lee F. Pixley; to the Committee on Pensions.

By Mr. KLECZKA: A bill (H. R. 15737) for the relief of Maj. F. Ellis Reed; to the Committee on War Claims.

By Mr. LANHAM: A bill (H. R. 15738) granting an increase of pension to John A. Poe; to the Committee on Pensions.

By Mr. MICHENER: A bill (H. R. 15739) granting a pension to Mary Collum; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 15740) granting a pension to Florence Whitaker; to the Committee on Invalid Pensions.

By Mr. PARRISH: A bill (H. R. 15741) for the relief of Ella Allison; to the Committee on Claims.

By Mr. HENRY T. RAINEY: A bill (H. R. 15742) granting an increase of pension to Amanda Baird; to the Committee on Invalid Pensions.

By Mr. SMITHWICK: A bill (H. R. 15743) granting a pension to Alice Dunbar; to the Committee on Invalid Pensions.

By Mr. SWOPE: A bill (H. R. 15744) granting a pension to Charity A. Freeman; to the Committee on Pensions.

By Mr. TOWNER: A bill (H. R. 15745) granting a pension to John A. Thomas; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4958. By Mr. BRINSON: Petition of sundry citizens of the third district of North Carolina, urging that relief be granted the starving people of China; to the Committee on Foreign Affairs.

4959. By Mr. BURROUGHS: Petition of Zetta Learmonth, recording secretary of the Woman's Christian Temperance Union of Manchester, N. H., indorsing the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4960. By Mr. CARSS: Petition of the Commercial Club of Duluth, Minn., favoring appropriation for the improvement of the mouth of the Mississippi River; to the Committee on Rivers and Harbors.

4961. By Mr. CURRY of California: Petition of the California State Rural Letter Carriers' Association, favoring a salary adjustment which will equalize the pay of both city and rural carriers; to the Committee on the Post Office and Post Roads.

4962. By Mr. DALLINGER: Petition of Cambridge Central Labor Union, of Cambridge, Mass., favoring trade relations with the Russian Government; to the Committee on Interstate and Foreign Commerce.

4963. By Mr. DYER: Petition of M. W. Schmidt, N. C. Barck, and J. J. Ehresmann, protesting against the occupation of Germany by French territorials; to the Committee on Foreign Affairs.

4964. Also, petition of the Merchants' Exchange of St. Louis, Mo., favoring the erection of a transfer grain elevator at St. Louis; to the Committee on Agriculture.

4965. Also, petition of the Cal Hirsch & Sons Mercantile Co., of St. Louis, Mo., in support of House bill 11716; to the Committee on War Claims.

4966. Also, petition of the National Surety Co. of New York, favoring an appropriation of more than $10,000 for the continuance of the section of surety bonds of the Treasury Department; to the Committee on Appropriations.

4967. Also, petition of the St. Louis Screw Co., urging the Treasury ruling against partial payment of Interstate Commerce Commission certificates be withdrawn; to the Committee on Interstate and Foreign Commerce.

4968. Also, petition of the American Car & Foundry Co., of St. Louis, Mo., favoring the passage of House bill 15551; to the Committee on Inter[illegible] and Foreign Commerce.

4969. Also, petition [illegible] the St. Louis Public School Patrons' Alliance, in support of the Smith-Towner bill; to the Committee on Education.

4970. Also, petition of the American Car Foundry, of St. Louis, Mo., favoring the passage of House bill 15551, introduced by Mr. WINSLOW; to the Committee on Interstate and Foreign Commerce.

4971. Also, petition of Rev. H. V. Ceré, requesting aid for Albanian missions; to the Committee on Foreign Affairs.

4972. Also, petition of John J. Kain Council, No. 828, Knights of Columbus, protesting against the enactment of the Smith-Towner bill; to the Committee on Education.

4973. Also, petition of Mr. Charles Rippin, of St. Louis, Mo., regarding proposed reduction in rates from western grain fields to eastern seaboard territory on grain and grain products; to the Committee on Interstate and Foreign Commerce.

4974. By Mr. GALLIVAN: Petition of the J. L. Mott Iron Works, Boston, Mass., favoring the emergency deficiency bill; to the Committee on Appropriations.

4975. Also, petition of the Brooks Barley Co., favoring a high tariff on Robinson's patent barley; to the Committee on Ways and Means.

4976. Also, petition of David Barry and the Worcester Polytechnic Institute, favoring an appropriation for carrying on the work of stream gauging; to the Committee on Rivers and Harbors.

4977. Also, petition of Frank T. Widmer, manufacturing jeweler, and the Frank N. Nathan Co., both of Boston, Mass., protesting against any further increase in the tax on jewelry; to the Committee on Ways and Means.

4978. Also, petition of the Lowell-Oakland Co., distributors of Oaklands and Clydesdales, Lowell, Mass., favoring a large appropriation for the Bureau of Foreign and Domestic Commerce; to the Committee on Appropriations.

4979. By Mr. GANDY: Resolutions by the Board of Commissioners, Pennington County, S. Dak., urging larger appropriations of moneys for the construction of roads and trails within the national forests; to the Committee on Agriculture.

4980. By Mr. LONERGAN: Petition of the Women's Club, of Enfield, Conn., opposing House bill 12466; to the Committee on the Public Lands.

4981. Also, petition of the Daughters of the American Revolution, Connecticut Branch, favoring House bill 12562; to the Committee on Education.

4982. By Mr. MACGREGOR: Petition of 1,098 citizens of the State of New York, protesting against the presence of French Negro troops in German territory; to the Committee on Foreign Affairs.

4983. By Mr. MICHENER: Petition of sundry citizens of Dundee, Mich., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

4984. By Mr. MURPHY: Memorial of the Travelers' Club of Salem, Ohio, opposing the passage of the so-called chiropractic bill; to the Committee on Interstate and Foreign Commerce.

4985. Also, memorial of the Travelers' Club of Salem, Ohio, praying for the passage of the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

4986. By Mr. O'CONNELL: Petition of the Commercial Telegraphers' Union of America, opposing the passage of H. R. 14657; to the Committee on Agriculture.

4987. Also, petition of the World Metric Standardization Council, San Francisco, Calif., favoring the passage of H. R. 15420, for the establishment of the decimal metric system of weights and measures; to the Committee on Coinage, Weights, and Measures.

4988. Also, petition of the American Exporters and Importers' Association, New York, urging moderation in increasing duties on imports, depending instead on sales tax for revenue; to the Committee on Ways and Means.

4989. By Mr. SINCLAIR: Petition of the North Dakota Federation of Women's Clubs, favoring Smith-Towner bill; to the Committee on Education.

4990. Also, petition of the Women's Nonpartisan Club, of Emerson, N. Dak., favoring the Sheppard-Towner maternity bill; to the Committee on Interstate and Foreign Commerce.

4991. By Mr. SNYDER: Petition of the Chamber of Commerce, of Ilion, N. Y., urging the erection of a Federal building at that place; to the Committee on Public Buildings and Grounds.

4992. By Mr. TEMPLE: Petition of the Twentieth Century Club, of Rochester, Pa., favoring the passage of the Smith-Towner bill (H. R. 7 and S. 1017); to the Committee on Education.

4993. Also, petition of the Twentieth Century Club, of Rochester, Pa., favoring the passage of the Sheppard-Towner bill (H. R. 10925 and S. 3259); to the Committee on Interstate and Foreign Commerce.

4994. Also, petition of the Twentieth Century Club, of Rochester, Pa., opposing the passage of House bill 12466; to the Committee on the Public Lands.

4995. By Mr. TINKHAM: Petition of the Associated Industries of Massachusetts, favoring the passage, without riders, of the Nolan bill (H. R. 11984); to the Committee on Patents.

4996. By Mr. WATSON: Petition of the Ministerial Union of Philadelphia and vicinity, urging the passage of the Jones-Miller bill; to the Committee on Interstate and Foreign Commerce.

SENATE.

SATURDAY, *January 15, 1921.*

(Legislative day of Thursday, January 13, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

SENATOR FROM IDAHO.

Mr. BORAH. Mr. President, the credentials of Mr. GOODING, appointed to succeed Mr. NUGENT, are upon the desk, and I understand they have already been read. Mr. GOODING is present and ready to take the oath.

The VICE PRESIDENT. Is there any objection? The Chair hears none. The Senator appointed will present himself at the Vice President's desk and take the oath of office.

Mr. GOODING, escorted by Mr. BORAH, advanced to the Vice President's desk, and, the oath prescribed by law having been administered to him, he took his seat in the Senate.

CREDENTIALS.

Mr. McCUMBER. Mr. President, I file and ask to have read the credentials of Mr. LADD, elected a Senator from the State of North Dakota.

The Assistant Secretary read the credentials, and they were ordered to be placed on file, as follows:

CERTIFICATE OF ELECTION, STATE OF NORTH DAKOTA.

At an election held on the 2d day of November, 1920, E. F. LADD was duly elected to the office of United States Senator to represent the State of North Dakota for the term of six years, commencing the 4th day of March, 1921.

Given at Bismarck this 8th day of December, 1920.

[SEAL.] LYNN J. FRAZIER,
Governor.

THOMAS HALL,
Secretary of State.

Attest:

KARL R. KORITZKY,
Member of State Board of Canvassers.

Mr. SIMMONS. Mr. President, I wish to present the certificate of election of my colleague, Mr. OVERMAN, to a full term in the Senate, beginning March 4 next. I ask that the certificate be read, filed, and take the usual course.

The Assistant Secretary read the credentials, and they were ordered to be placed on file, as follows:

EXECUTIVE DEPARTMENT,
State of North Carolina.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 2d day of November, 1920, LEE SLATER OVERMAN was duly chosen by the qualified electors of the State of North Carolina a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1921.

Witness his excellency our governor, Cameron Morrison, and our seal hereto affixed at Raleigh, this 12th day of January, A. D. 1921.

[SEAL.] CAMERON MORRISON,
Governor.

By the governor:

J. BRYAN GRIMES,
Secretary of State.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the bill (H. R. 15543) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1922, and for other purposes, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. TOWNSEND presented memorials of the Penelopian Club, of Cadillac; the Rotary Club, of Muskegon; and the Detroit Federation of Women's Clubs, of Detroit, all in the State of Michigan, remonstrating against the enactment of legislation commercializing the national parks, which were referred to the Committee on Commerce.

He also (for Mr. NEWBERRY) presented resolutions adopted by the Michigan State Farm Bureau, of Lansing, Mich., and the executive committee of the St. Clair County Farm Bureau, of Port Huron, Mich., favoring the so-called truth-in-fabric bill, which were referred to the Committee on Interstate Commerce.

He also (for Mr. NEWBERRY) presented a petition of sundry citizens of Cadillac, Mich., praying for the enactment of legislation providing for the public protection of maternity and infancy, which was ordered to lie on the table.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 4853) to prohibit smoking in buildings owned by the Government of the United States and used by any executive department or independent establishment of the Government; to the Committee on Appropriations.

By Mr. McCUMBER:

A bill (S. 4854) granting an increase of pension to Anna T. Barclay; to the Committee on Pensions.

By Mr. ELKINS:

A bill (S. 4855) granting an increase of pension to Hulda A. Freer; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 4856) to amend an act entitled "An act for the establishment of marine schools, and for other purposes," approved March 4, 1911 (with accompanying papers); to the Committee on Naval Affairs.

By Mr. HARRIS:

A bill (S. 4857) for the relief of the Gadsden Contracting Co.; to the Committee on Claims.

By Mr. WADSWORTH:

A bill (S. 4858) for the relief of Iva Lee; to the Committee on Claims.

HOUSE BILL REFERRED.

The bill (H. R. 15543) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1922, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

HOSPITALS OF THE PUBLIC HEALTH SERVICE.

Mr. ASHURST. Mr. President, I desire at this time to lay before the Senate a very important subject, referred to in a letter from the Surgeon General of the Public Health Service addressed to me, dated January 12, 1921, reading as follows:

TREASURY DEPARTMENT,
BUREAU OF THE PUBLIC HEALTH SERVICE,
Washington, January 12, 1921.

Hon. HENRY F. ASHURST,
United States Senate, Washington, D. C.

MY DEAR SENATOR ASHURST: I wish to invite your attention to the fact that since June 2, 1920, the date on which the France bill (S. 4357) to authorize the Secretary of the Treasury to provide medical, surgical, and hospital services and supplies for discharged soldiers, sailors, marines, Army and Navy nurses (male and female), and for other purposes, was favorably reported, the number of patients has increased from 17,445 to 22,292 for the week ending January 1, 1921.

On the week ended January 1, 1921, there were in hospitals operated by the Public Health Service 12,511 patients and in hospitals under contract with the Public Health Service 9,781. Of this number 19,019 were patients of the War Risk Insurance Bureau. It is understood that there were approximately 3,000 patients of the Bureau of War Risk Insurance in hospitals operated by the National Home for Disabled Volunteer Soldiers and Army and Navy hospitals.

The present rate of increase in patients in hospitals of the Public Health Service is approximately 1,000 per month, and it is expected that before the peak is reached the number of beds required will approximate 30,000 to 35,000. It is estimated that the peak will not be reached before 1927 to 1929.

The Public Health Service now has or in the near future will have under operation hospitals providing approximately 19,879 beds. Of this number of beds 10,347 are in hospitals of flimsy and inflammable construction or in hospitals leased by the service under leases which will expire at certain periods after the declaration of peace or are otherwise not to be counted upon in the program for permanent care. It is understood that when the soldiers' homes are remodeled for the purpose of receiving beneficiaries of the Bureau of War Risk Insurance requiring hospital care they will be able to accommodate approximately 6,000 patients. The use of beds in Army and Navy hospitals is not considered advisable except as a temporary expedient. On this account beds in these institutions should be left out of consideration in planning for the permanent care of ex-service men and women.

An analysis of the 19,019 war-risk insurance patients in hospitals of the Public Health Service for the week ended January 1, 1921, shows that they were distributed according to disease as follows:

Tuberculous	7,586
Neuro-psychiatric	5,690
General medical and surgical	5,743
Total	19,019

The most pressing need is for tuberculous and neuro-psychiatric patients.

For tuberculous patients there are 7,431 beds in hospitals operated by the Public Health Service and 1,000 beds in the soldiers' home at Johnson City, Tenn. Of the number now in Public Health Service hospitals approximately 5,251 are not satisfactory and should be replaced at the earliest practicable date, because they are in flimsy and inflammable structures or in leased institutions, etc.

For neuro-psychiatric patients there are 2,500 beds in institutions operated by the Public Health Service and 1,000 beds in the soldiers' home at Marion, Ind. Of the 2,500 beds of the Public Health Service 475 are in leased institutions and owing to the character of the leases are not to be counted upon in the permanent hospital program.

For general medical and surgical patients there are 9,948 beds in institutions either operated by the Public Health Service or to be acquired by the service. Of this number 4,621 are not satisfactory and should be replaced at the earliest practicable date. The reason for the unsatisfactory conditions is that they are in flimsy and inflammable structures or in leased institutions where the leases expire at certain periods after the declaration of peace.

After careful consideration of (1) the number of war-risk insurance patients now in hospitals, (2) the present Government hospital facilities, (3) the necessity of replacing some of the undesirable hospitals, (4) the increase in the number of war-risk insurance patients within the past 20 months, and (5) the geographical distribution of the ex-soldier population, it is found that there is urgent need for 4,800 additional beds for tuberculous patients, 4,500 additional beds for insane patients, and 900 additional beds for general medical and surgical patients.

In round numbers 10,000 beds are urgently needed, of which the beds for tuberculous and neuro-psychiatric patients are of the greatest urgency. These additional beds will serve only to meet the present needs of the increase expected within the present fiscal year.

At the estimated cost of $3,000 per bed, the 10,000 beds urgently needed would require an appropriation of $30,000,000. The amount authorized by S. 4357—$29,580,000—is approximately correct. From the best advice obtainable, it is not believed that the estimate of $3,000 per bed for hospital construction is excessive. Indeed, unless there is a further decline in the cost of material and labor, it is doubted whether this estimated cost would be sufficient.

Respectfully,

H. S. CUMMING, *Surgeon General.*

The bill referred to by the Surgeon General, proposing to grant adequate relief in this emergency, was introduced by the Senator from Maryland [Mr. FRANCE] and has been favorably reported to the Senate. I hope the Senate, at the earliest practicable date, will take up the so-called France bill, and will pass the same so that it may become a law before the 4th of March, or that the Committee on Appropriations, made up of Senators of wide experience, large vision, and large humanity, will include in the appropriation bill the necessary sum of $30,000,000 for the hospitalization of the ex-service men who are now in such desperate need. Our ex-service men fought in a cause as high and as noble as ever animated the breast or nerved the arm of patriot warrior, and no Senator ought to be frigid or indifferent to their sufferings.

MEAT-PACKING INDUSTRY.

Mr. SHERMAN. Mr. President, I wish to give formal notice that on Tuesday next at the conclusion of the routine business, if that shall be the order under which we are proceeding, I shall submit some remarks upon Senate bill 3944, commonly known as the antipackers bill.

REDUCTION OF THE ARMY.

Mr. PHELAN. Mr. President, I desire to give notice that I shall move a reconsideration of the vote by which the Senate passed the joint resolution (S. J. Res. 236) directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 150,000.

The VICE PRESIDENT. The motion to reconsider will be entered.

DISTRICT OF COLUMBIA APPROPRIATIONS.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 15130) making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. CURTIS. I ask unanimous consent to dispense with the formal reading of the bill, that it be read for amendment, and that the committee amendments be considered first.

The VICE PRESIDENT. Is there objection?

Mr. KING. Let me make an inquiry of the Senator from Kansas. I know it is the custom to consider committee amendments first and to go through the bill page by page from beginning to end, considering the committee amendments. I should like to ask the Senator from Kansas whether he considers that to be the most practical method.

Mr. CURTIS. It always has been done, and it is the better practice. Then Senators can offer amendments to committee amendments as they are reached or they can offer individual amendments after the committee amendments have been disposed of.

Mr. KING. Of course, I appreciate that it is the practice; but it seems to me it is not a wise practice, that it leads to confusion and compels the consideration of matters over and over again.

Mr. CURTIS. I think the Senator is mistaken about that.

Mr. KING. However, I have no objection to the Senator's request.

The VICE PRESIDENT. Is there any objection?

Mr. HARRISON. I did not understand what the Senator from Kansas said. Does the Senator wish to take up the committee amendments first?

Mr. CURTIS. I asked unanimous consent to dispense with the formal reading of the bill; that it be read for amendment; and that the committee amendments be considered first.

Mr. HARRISON. Then there are certain parts that will not be read at all under that plan.

Mr. CURTIS. Certainly the whole bill will be read.

Mr. HARRISON. I think I shall object.

Mr. CURTIS. I ask that the bill be read.

The VICE PRESIDENT. The bill will have to be read.

The reading clerk proceeded to read the bill.

Mr. CURTIS. I renew the request which I made a few moments ago to dispense with the formal reading of the bill, and that the bill be read for committee amendments.

The VICE PRESIDENT. The Senator from Kansas asks unanimous consent that the formal reading of the bill be dispensed with; that the bill be read for amendment; and that the committee amendments first be considered. Is there objection? The Chair hears none, and it is so ordered.

The first amendment of the Committee on Appropriations was, on page 1, after line 2, to strike out:

That 40 per cent of the following sums, respectively, is appropriated out of any money in the Treasury not otherwise appropriated, and 60 per cent out of the revenues of the District of Columbia, in full for the following expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, only, namely:

Appropriations for the fiscal year ending June 30, 1922, heretofore or hereafter made in other acts and chargeable in any proportion against the revenues of the District of Columbia, shall be paid in the proportions of 40 per cent from the Treasury of the United States and 60 per cent from the revenues of the District of Columbia.

If the estimated net revenues of the District of Columbia for the fiscal year ending June 30, 1922, are not sufficient to meet the proportion of the appropriations for that fiscal year charged against such revenues by this and all other acts, or which may be estimated to be charged against such revenues by acts that may be approved during such fiscal year, the Commissioners of the District of Columbia shall increase the rates of taxation on real estate and tangible personal property sufficiently to make up the difference: *Provided, however,* That such rates of taxation shall in no event be less than 1½ per cent nor more than 2 per cent.

And to insert:

That 50 per cent of the following sums, respectively, is appropriated out of any money in the Treasury not otherwise appropriated, and 50 per cent out of the revenues of the District of Columbia, in full for the following expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, namely:

Appropriations for the fiscal year ending June 30, 1922, heretofore or hereafter made in other acts and chargeable in any proportion against the revenues of the District of Columbia, shall be paid in the proportions of 50 per cent from the Treasury of the United States and 50 per cent from the revenues of the District of Columbia.

Hereafter the Secretary of the Treasury is authorized and directed to advance, on the requisition of the Commissioners of the District of Columbia, made in the manner now prescribed by law, out of any moneys in the Treasury of the United States not otherwise appropriated, such sums as may be necessary from time to time to meet the general expenses of said District, as authorized by Congress, and to reimburse the Treasury for the portion of said advances payable by the District of Columbia out of the taxes and revenues collected for the support of the government thereof. If in any year the taxes and revenues of the District of Columbia shall be insufficient to reimburse the Treasury for the portion of said advance payable by the District of Columbia, such unpaid advance shall be reimbursed to said Treasury out of the revenues of the District of Columbia of the succeeding year or years. If in any year the taxes and revenues of the District of Columbia shall be more than sufficient to reimburse the Treasury for the portion of said advances payable by the District of Columbia, such surplus of revenue and all unexpended or unappropriated surpluses of the District revenue shown by the reports of said commissioners to have been heretofore accumulated and deposited in the Treasury of the United States shall be held in the Treasury as a trust fund for the benefit of said District and be available as revenue of the District of Columbia for meeting the portion of appropriations payable by said District in the succeeding year or years.

Hereafter the per cent of approved estimates to be levied and assessed under the act of June 11, 1878, upon the taxable property and privileges in said District shall be raised by the imposition of such rate of taxation on realty and tangible personal property as the commissioners shall ascertain to be necessary to raise annually, in combination with other District tax revenues and unexpended tax surpluses of previous years, a sum sufficient to meet the proportion of expenses to be paid by the District of Columbia under existing law: *Provided, however,* That such rate of taxation shall in no event be less than 1½ per cent.

Mr. CURTIS. I move to correct the committee amendment, on page 2, line 20, by striking out the word "the," where it first occurs. It is a clerical error.

The VICE PRESIDENT. Without objection, the amendment to the committee amendment is agreed to.

Mr. HARRISON. Mr. President, I desire to ask the Senator from Kansas [Mr. CURTIS] what is the status of the legislation touching the half-and-half plan of taxation in the District of Columbia?

Mr. CURTIS. That matter is now in conference. Because of the absence of two of the House conferees, the conferees were unable to meet until early in the present week, when the first meeting took place. I understand the conferees are arranging for other meetings in an effort to bring about an agreement.

Mr. HARRISON. How long has the question been in conference?

Mr. CURTIS. It was sent to conference toward the end of the last session of Congress. It has really been in conference since that time.

Mr. HARRISON. Does the Senator from Kansas think that the conferees can get together on the proposition?

Mr. CURTIS. I hope so; and I will say to the Senator from Mississippi that if they do not, I am satisfied the conferees on the pending bill will get together on some other satisfactory arrangement.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee as amended.

Mr. KING. Mr. President, before the amendment is agreed to I desire to say that I do not approve of the amendment reported by the committee which has just been stated. I think the bill as it passed the other House more nearly approximated a standard of justice with respect to the burdens to be imposed upon the property of the District for municipal purposes than does the amendment reported by the committee; indeed, in my opinion, neither the system which has prevailed here for so many years nor the proposed system of dividing the burden of taxation in the ratio of 40 to 60—60 per cent upon the District and 40 per cent upon the Government—is the one which should obtain. Both are unsound as a basis for determining the contributions to be made by the District and by the Federal Government to meet the expenses required for District purposes. I am unable to understand why the property in the District of Columbia should not be assessed as is property in other cities of the United States and why the inhabitants of the District of Columbia should not pay a reasonable tax upon the value of their property, both real and personal, in order to maintain the government of the District.

Mr. President, I believe Washington to be the best governed city in the world, and I know of no place in the world where the municipal improvements are of a higher standard.

The inhabitants of this District enjoy many benefits by reason of the superior municipal improvements that have come to the city. I therefore believe for the benefits which they derive they should pay an adequate tax upon their property. A fifty-fifty division of the cost necessary to maintain the District Government is not, as I view the matter, scientifically sound and can not be defended as resting upon an equitable basis. The United States have certain interests here, and should pay not only a fair but a generous portion of the burdens entailed in the conduct of the government of the District, but the privately owned property within the District should be subject to a fair tax. The District of Columbia is the headquarters of the Government; the chief officials of the Government are here; there are a large number of buildings owned by the Government, and it is the holder of considerable property. Under these circumstances it should bear a considerable part of the municipal burdens. But I have been unable to appreciate the logic of those who established an arbitrary system—and I insist that it is arbitrary—of requiring the Government of the United States to pay 50 per cent of the expenses of the District, leaving the residents and property of the District to bear the remainder.

Mr. President, the property of the cities in the United States bears a burden of from 3 to 4 per cent per annum for municipal, county, and State purposes. If the inhabitants of this city obtain a government equal to, and, indeed, superior to that enjoyed by other municipalities in the United States, there is no reason why they should not meet as large a charge as that imposed upon the property situated in other cities of the United States.

I am in favor of a proposition—and I submit that it is fair and just—to assess the property of the District of Columbia at its fair cash market value; then, in order to determine what would be a proper levy or rate, the rate and valuations in other cities of the United States should be considered, with a view to ascertaining the average tax paid therein for all purposes. A fair average of the tax paid in other cities would be a factor in determining the rate to be levied in the District. If the well-governed cities of the United States pay 2 or 3 per cent upon the property valuations therein, and such valuations are reached by assessing the property at full value, then a similar tax, reached in the same manner, would not be unjust if imposed in this city.

If after such a levy there was a deficiency—and, of course, such would be the case—the Federal Government should meet such deficiency, no matter if in so doing it paid more than 50 per cent of the tax burdens of the District.

The plan should be to tax the property of the District fairly, and require the Federal Treasury to meet whatever else may be necessary to run the District government.

Mr. CURTIS. Mr. President——

Mr. KING. I yield to the Senator from Kansas.

Mr. CURTIS. I merely wish to ask the Senator if he does not realize that the whole tax question is now in conference

between the House and the Senate, conferees having been appointed from the District Committee of the House and the District Committee of the Senate on a bill heretofore passed?

Mr. KING. I do not realize that fact in the broad sense that the Senator states it. I realize that the proposition before the conference is rather the question whether the ratio shall be 50–50 or 60–40.

Mr. CURTIS. Oh, no; the whole tax question is in conference.

Mr. KING. Does the Senator state that the conferees are dealing with the entire subject?

Mr. CURTIS. They have the power to do so. The House passed a bill containing certain provisions, for which the Senate substituted a bill continuing the 50–50 plan in lieu of the general tax proposal adopted by the House. So the tax proposition before the conferees is not limited to the 50–50 plan or the 60–40 plan.

Mr. KING. My understanding is that the authority of the conferees is limited to a determination of the per cent of taxation which shall be borne by the District and the percentage which shall be met by the Government, and that they would not have the authority to devise a system of taxation along the lines which I have just indicated. If the Senator states that they can go into the entire subject and submit a revenue bill of the character which I have described, or one which deals with the question ab initio, then my remarks may not be pertinent, although, Mr. President, I do not want the amendment to pass without the Senate understanding that I, at least, object to the system proposed by the committee amendment. It seems to me that if we adopt the amendment it is, if not an indorsement, at least an admonition to the conferees that the Senate approves of the half-and-half plan.

Mr. CURTIS. Mr. President, it is simply taking the same position which the Senate took in connection with the bill now in conference, and any change would tie the hands of the Senate conferees.

Mr. KING. The Senator does not believe, then, that the adoption of this amendment in any way commits the Senate to an approval of the 50–50 plan, or that our action upon this amendment affirmatively would be so construed by the conferees?

Mr. CURTIS. It will not bind the conferees, because the tax question is in their hands. The amendment now under discussion simply carries out existing and permanent law as found in the organic act of 1878. The question of changing that law is in conference between the House and the Senate, and if we adopt the pending amendment we are simply sustaining the action taken by the Senate at the previous session of Congress.

Mr. KING. May I inquire of the Senator if he can assure the Senate that the adoption of the committee amendment, which, by implication at least, approves the 50–50 plan, will not be used and can not be used by the conferees as an argument in favor of the House receding from its action and for the continuation of the old plan?

Mr. CURTIS. No more than the former action of the Senate at the last session when it stood for the 50–50 plan and the House stood for another plan, thus opening up the question. That whole question is now in conference. The Senate Committee on Appropriations thought it would be unfair to the conferees to tie them up to the 60–40 plan and thus change the existing system, when that question and all other tax questions relating to the District of Columbia are in the hands of the conferees.

Mr. KING. Speaking for myself—and I know for some other Senators—I wish to serve notice on the Senator, if he is a member of the conference committee, that the adoption of the amendment is not to be regarded as an approval of the 50–50 plan, and I hope that the conferees will not deduce any argument or look to this action to-day as any sort of a moral support of the 50–50 plan. I hope, Mr. President, if the conferees have the broad powers suggested by the Senator from Kansas, that they will consider the question of a comprehensive system of taxation and report a revenue bill which will meet in a fair and practical way the rather complicated question of taxation which has so long agitated the Congress and the people of the District.

Mr. ROBINSON. Mr. President, this question has arisen almost every year for the last 10 or 15 years, and it originated a great many years ago. The subject is not without very great difficulty. Nevertheless, I am convinced by a study of it extending over a period of some years that the plan incorporated in the committee amendment is, on the whole, as fair, if not fairer, than any other plan that has yet been suggested.

The Senate has uniformly taken the position that is implied in the pending Senate amendment. It is not a scientific manner in which to settle the controversy, and the controversy probably will continue until some scientific plan is worked out upon which the Congress may determine the relative portion of these appropriations to be paid respectively by the Federal and the local Governments.

I want to point out in this connection, however, that the problem lies too deep to work it out by a mere suggestion such as has been made by my friend the Senator from Utah. His plan will not stand the test of careful consideration. His suggestion is that the property in the District of Columbia and the people of the District of Columbia be required to pay the same taxes that are levied in other similar municipalities, and he proposes to reach a conclusion as to what that tax shall be by striking an average.

Every Senator knows that taxation in the various municipalities varies a great deal and is dependent upon a great many subjects, including, of course, the manner of administration respecting the economical expenditure of public funds, and the purposes for which those funds are expended, including among other things the enterprises which are conducted in some of the municipalities at least as public enterprises and which in others are conducted as private enterprises. But I can not comprehend how anyone who has studied this subject at length could reach the conclusion that the way to solve it is to reach an average of the taxes paid by the various cities of the United States, and I do not believe my friend from Utah will adhere to that proposition when it is pointed out to him that it is totally unscientific, even more unscientific than the method which has been pursued heretofore of adjusting this controversy in the District of Columbia.

Until a conclusion has been reached, based upon a careful knowledge of all the facts and circumstances, I favor the retention of the 50–50 plan, and have no hesitancy in saying so. I shall not insist upon it when the subject has been carefully worked out and what I regard as a better plan has been found.

Mr. KING. Mr. President, just a word.

I appreciate the superior knowledge that my distinguished friend has upon this subject, and I have a profound regard for his opinions and the conclusions which he reaches upon any matter.

But let me say to my friend that this is not a new subject with me. When I was in the House a number of years ago, and was a member of the District Committee, I found that much if not all of the personal property of the District was not being taxed; and, as I recall now, I aided in preparing a revenue measure which subjected to taxation the personal property within the District. I did not believe that the men who had homes or investments or property, real or personal, situate within the District of Columbia, should be relieved from a fair and just taxation. If any citizen prefers to make his investments here, I see no reason why those investments, whether in the form of real or personal or mixed property, tangible or intangible, should not bear a fair rate of taxation. I concede what my friend the Senator from Arkansas says—that after the property has been assessed at its value there is some difficulty in determining the rate of the levy; and it may be that the suggestion which I made, that an average of the taxes paid by cities in the United States—selecting those best governed and of the most progressive character—be selected as a basis for determining the levy to be made in the District, would not meet the test of scientific accuracy; but it seems to me that it would be more scientific than the present plan, and would be more nearly in harmony with the principles of justice and fair dealing. The private property within the District should pay a just tax. There can be no question about that proposition. What is a fair tax, and what would be the most satisfactory method of fixing values for taxation and the rate of levy to be laid?

What is a reasonable levy or a reasonable rate? I fancy that one of the factors to be considered in answering that question is what rate is imposed upon property in other cities of the United States.

It might not be scientific to strike an average. It might not be scientific or fair to take the highest. It might be improper and unfair to take the lowest rate imposed in the various municipalities of the United States. Therefore the thought occurred to me years ago, and I have adhered to it, that the proper and the fairest method would be to ascertain the taxes paid in the various municipalities of the United States and then try to reach an average of the same based upon valuations and rates of levy.

At any rate, Mr. President, to say arbitrarily, "We will tax the District 50 per cent and then resort to the Federal Treasury

for the remainder," does not seem to me to be "scientific" and can not be defended in justice, unless a full investigation demonstrates that 50 per cent of the cost of governing the municipality would absorb the amount derived from taxing the private property within the District at substantially the rate levied in the cities of the United States used as a standard for comparison. So I hope that the committee will fully investigate this matter and endeavor to solve it in a practical and—to use my friend's expression—a "scientific" manner.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 6, line 23, in the items for the assessor's office, clerks, to strike out "three" and insert "two," so as to read "2 at $1,200 each," and on page 7, line 4, to reduce the total of the appropriation for the assessor's office from $58,120 to $56,920.

The amendment was agreed to.

The next amendment was, in the items for the auditor's office, clerks, page 8, line 7, to strike out "five" and insert "four," so as to read "4 at $1,400 each," and, in line 14, to reduce the total of the appropriation for the auditor's office from $56,000 to $54,876.

The amendment was agreed to.

Mr. HARRISON. Mr. President, may I inquire of the Senator from Kansas touching the Public Utilities Commission? This is the commission that has recently granted an increased rate of fare on the street cars, is it not?

Mr. CURTIS. Yes, sir; that is, the District Commissioners are the Public Utilities Commission. I will state, as chairman of the subcommittee, that I am in favor of a separate and distinct commission. I do not think the District Commissioners ought to be the Public Utilities Commission, but that is the existing law, and we are making appropriations to carry out existing law.

Mr. HARRISON. So there is no separate Public Utilities Commission?

Mr. CURTIS. Not in the District; no.

Mr. HARRISON. It is composed of the Commissioners of the District?

Mr. CURTIS. Yes.

Mr. HARRISON. These are the various officers under them that do that work?

Mr. CURTIS. Yes.

Mr. HARRISON. So it was really the District Commissioners, then, that approved the increased car fare rate here in the city?

Mr. CURTIS. That is right.

Mr. HARRISON. Has the committee gone into an investigation of that proposition?

Mr. CURTIS. That would be a question for the District Committee and not for the Committee on Appropriations. We have no jurisdiction over that question. That is for the District Committee, of which I am not a member. I understand that there is a resolution pending to investigate it; but the Senator from Washington [Mr. JONES], who is a member of that committee, is not present. I think, were he here, he could give the Senator the information.

Mr. HARRISON. I understood that the Senator from Washington had a bill to merge the two traction lines, or the purpose of which was to do something to remedy the situation. As I understand, one of the lines is making large profits and the other is incurring a deficit all the time.

Mr. CURTIS. The question was up before the District Committee, but I am unable to tell the Senator just in what form, because I am not a member of that committee.

The VICE PRESIDENT. The Secretary will continue the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 11, line 6, in the items for Public Utilities Commission, to insert "statistical clerk, $1,500," and in line 11, to increase the total from $30,840 to $32,340.

The amendment was agreed to.

The next amendment was, on page 11, line 14, to reduce the appropriation for incidental and all other general necessary expenses authorized by law for the Public Utilities Commission from $12,500 to $5,000.

The amendment was agreed to.

The next amendment was, on page 11, line 15, to reduce the total of the appropriation for the Public Utilities Commission from $43,340 to $37,340.

The amendment was agreed to.

The next amendment was, on page 12, line 19, in the items for Minimum Wage Board, to insert "assistant secretary, who shall be a stenographer, $1,200"; in line 21, to reduce the appropriation for clerical, contingent, and miscellaneous expenses from $2,500 to $1,000; and in line 22, to reduce the total of the appropriation for Minimum Wage Board from $5,000 to $4,700.

The amendment was agreed to.

The next amendment was, on page 13, line 22, in the items for Free Public Library, after the word "attendants," to strike out "three" and insert "two," so as to read: "attendants—2 at $900 each"; and on page 14, line 3, to reduce the total of the appropriation from $78,700 to $77,800.

The amendment was agreed to.

The next amendment was, on page 14, line 8, in the item for Free Public Library, to strike out "$3,000" and insert "$4,000," so as to read:

For extra services on Sundays, holidays, and Saturday half holidays, $4,000.

The amendment was agreed to.

The next amendment was, on page 15, line 20, to strike out "$10,000" and insert "$5,000," so as to read:

For printing all annual and special reports of the government of the District of Columbia for the fiscal year ending June 30, 1921, for submission to Congress, $5,000.

The amendment was agreed to.

The next amendment was, on page 15, after line 20, to insert the following proviso:

Provided, That authority is hereby given the Commissioners of the District of Columbia to discontinue the printing of any annual or special reports of the government of the District of Columbia in order to keep the expenditures within this appropriation. In all cases where the printing of said reports is discontinued, the original copy thereof shall be kept on file in the offices of the Commissioners of the District of Columbia for public inspection.

The amendment was agreed to.

Mr. KING. Mr. President, I desire to call the attention of the Senator from Kansas to a number of items. Let me say to the Senator that I have been visited by a number of residents of the District and have received a number of communications complaining of extravagances in the District government and of appropriations carried in the House bill. I have made a hasty comparison between the bill as it passed the House and the Senate committee bill with respect to some of the items or matters referred to by some of the complainants. I find that there has been no reduction in some items and in some instances there has been an increase.

Mr. CURTIS. Mr. President, the Senate committee reduced the bill as it passed the House by $66,000, and in addition to that we provide for a completion of the installation of the water mains for the entire District, and there has been a very material reduction by the Senate committee bill over the bill as it passed the House, except as to section 9, which deals with the surplus money in the Treasury.

Mr. KING. There may have been and doubtless is a reduction, as the Senator has said; but that reduction does not relate, I think, to the items to which I was about to call the Senator's attention.

One of the communications thus received—and I have it here—makes complaint because of the surplus employees in the District service. The writer of this letter is a man who is familiar with the District and is interested in the employees and in the welfare of labor generally. He states that a survey of the District activities would establish the fact that the employees of the District should be reduced at least one-third. In some departments, he states, the employees are inefficient and in practically all the number is entirely too large.

Mr. CURTIS. Mr. President, I want to state to the Senator that if he carefully examines the bill he will find that we have reduced the number of employees, except, I believe, in the attendance department, and the committee are advised that in increasing that number in placing children there could be vast sums saved to the District. We thought it better to have more attendance officers, so that the children who are assigned to that department could be placed. That is the only place in the bill where there has been any material increase. In other places the number of employees have been reduced, as will be shown by the bill.

Mr. KING. Mr. President, I approve of the increase which the Senator has indicated, but I am merely calling the Senator's attention to the complaints made as to the unnecessary number of employees in the District. I know that there is a feeling upon the part of many that the personnel is too great and that there could be a material reduction. Attention is called in the letter which I hold in my hand to the "purchasing office." It is alleged that the number of clerks and employees in that office

are disproportionate to the amount of service required and the amount of labor actually performed. I would like to inquire of the Senator whether he has investigated this office?

Mr. CURTIS. Mr. President, in the purchasing division the House gave to the District the exact number they have now. The Senate committee made no amendments to that whatever. In the estimates the commissioners asked that the salaries of 30 employees be increased, which we declined to do, and in the item before that they asked for four additional employees, which increase was refused by the committee.

Mr. KING. The strictures which have been made in my presence, and in the communications which I have received, against the purchasing office of the District are very severe, and it is charged that there is inefficiency in that office and that the number of employees is entirely too great. The limited investigation which I have been able to make tends to corroborate the complaints to which I refer.

Like complaints, Mr. President, have been made with respect to the assessor's office. It is charged that there are entirely too many clerks there, and especial attention is called to the field men, carried at $2,000 per annum. The charge is that they are unnecessary, and render services entirely disproportionate to the compensation received.

Mr. CURTIS. On that item I will state that the House gave them one additional, and the Senate committee took that additional employee off. The commissioners also asked for a great increase in salaries all along the line, which was refused by both the House and the Senate committees. They asked for three additional clerks, which we refused to give them.

Mr. KING. Mr. President, I have read a great deal of the testimony given before the House committee and all that was taken by the Senate committee. I make no criticism, but it seems to me that the methods of ascertaining the needs of the District are not as exhaustive as they might be. The commissioners and interested parties, those who are seeking increases in salaries, enlargement of their jurisdiction, and an increase in the personnel of their various divisions, departments, and bureaus were the only ones, as I recall, who testified at the hearings, and the testimony in many instances was not full or enlightening.

It was purely ex parte; and, in the main, from the lips of interested parties. Nor does there seem to be any practical means of checking this ex parte testimony. It is impossible for committees or Senators to obtain all the facts relating to the multitude of items and matters covered by the appropriation bills. The commissioners or the persons interested state that there should be so many clerks or that there should be so much appropriated, and the information conveyed as to the necessities and as to the work done in many instances is limited and wholly unsatisfactory.

I might say, in passing, that the commissioners invariably, as I recall the testimony—and it consists of hundreds of pages—asked for larger salaries, increase in the personnel, and an extension of the functions and activities of many of the organizations and departments of the District. They seemed to be absolutely oblivious to the fact that the Government of the United States will have a deficit of nearly $2,000,000,000 for the coming year. They seem to absolutely ignore the fact that the people of the United States are burdened with taxes now which are almost unbearable, and that no means have been devised yet to meet the enormous deficit of $2,000,000,000.

Notwithstanding the fact that prices are falling and that the Government will encounter almost insuperable obstacles in meeting its obligations, the Commissioners of the District and the heads of departments and bureaus in the District, in nearly every instance, as I recall, demanded large increases. Unfortunately, too many public officials have no sense of proportion and evince no concern in the public welfare. They see only one side of the shield. The toiling masses who produce and who pay taxes are not envisaged by them. I have said before, and again repeat it, our Government costs too much. There are too many administrative bodies and too many officeholders. There must be reductions everywhere—in National, State, and municipal governments. We talk much of economy, but we fail to practice it. Like persons under the influence of an opiate we go on blindly spending and pressing upon the backs of labor increased burdens of taxation. I regret that the committee did not cut from this bill at least two to three million of dollars.

As I recall, the bill carries a larger appropriation for the District than that of a year ago. Will the Senator advise me as to the increase in the amount?

Mr. CURTIS. The bill carries $3,021,000 less than the estimates. It carries about $2,000,000 more than the bill of last year carried, but that is caused by the fact that we have put in this bill section 9, which provides for the using of the surplus in the Treasury to the credit of the District in the purchase of school sites, playgrounds, parks, and necessary sites for buildings in the District.

Mr. KING. It is obvious, then, as stated by the Senator, that there is an increase; that, notwithstanding the financial difficulties of the Government, we are appropriating here more than $2,000,000 in excess of the appropriations a year ago.

Mr. CURTIS. The Senator did not catch my statement. Section 9 is submitted as a separate and distinct proposition for the judgment of the Senate as to whether we shall authorize the use of the surplus now in the Treasury of the United States to the credit of the District, amounting to over $4,000,000, or a part of it, for the purchase of necessary school sites, playgrounds, parks, and grounds for public buildings which are needed, which perhaps can be bought more cheaply now than ever can be done again. It is simply put up to the Senate to say whether they will indorse that recommendation of the committee or not. It is put here as a separate section, at the end of the bill, so that the Senate can discuss it and do just as they see fit about it.

Mr. KING. May I inquire of the Senator, if that section were eliminated, whether the aggregate of the appropriation carried by the bill would be greater or less than the appropriation for the fiscal year 1921?

Mr. CURTIS. It will be less, if you eliminate the emergency items.

Mr. KING. And those relate entirely to education?

Mr. CURTIS. Playgrounds, parks, and building sites for buildings for the District which they absolutely need, which perhaps can be purchased cheaper now than they could ever be purchased again. It is simply a question whether we want to let that surplus lie idle in the Treasury or whether we will use it now, when this property can be had. That is a question the Senate will be called upon to decide in the last section of the bill.

Mr. KING. The surplus might be devoted to other expenses of the District. However, I shall not quarrel with the action of the committee in making recommendations or submitting its report with respect to the acquisition of lands for educational and school purposes, although I differ from the Senator in the view expressed that we can get school sites cheaper now than we can at a later date. I have made some little investigation, and I will say to the Senator, in passing, that, in my opinion, some additional schoolhouses are required, and I should approve of any plan which would lead to the acquisition of lands for that purpose.

I want to say right here, Mr. President, that a number of citizens of the District—so they claim in their statements to me and in their letters—made a survey of the school situation. They aver that the rooms which are now not properly employed in the schoolhouses could be remodeled and, with slight expense, made to care for 20,000 pupils; in other words, that while there is a shortage of schoolhouses and schoolrooms in the District, with but slight expenditure the present buildings could be so improved as to care for 20,000 additional pupils, and that those having charge of the schools do not make a proper distribution; that some buildings are overcrowded and congested, whereas others do not have an adequate number of pupils assigned to them.

Mr. CURTIS. Mr. President, this question was taken up in the committee, and when the item for additional school buildings was reduced, because of the excessive price asked, the suggestion was made by the subcommittee to the officers that they use the assembly halls and buildings that are now not being used for school purposes, and I am pleased to inform the Senator—and I am glad he brought the matter up and am pleased to know that he has studied the bill as he has—that the officers have arranged and are arranging to use some of those rooms to accommodate the children who are now without facilities.

But there are some 6,000 children in the District without school facilities, and they need them and need them badly, and they ought to be provided. I will say, further, that the committee would have recommended the buildings and proposed appropriations for enough buildings to have taken care of most of them if it had not been for information which came to the committee as to the excessive cost of the erection of school buildings in the District of Columbia.

Mr. HARRISON. In connection with the question of more school buildings——

Mr. KING. Will the Senator pardon me for a moment? I would like to state to the chairman of the subcommittee that I desire a little later to call attention to a number of matters, but I am compelled to leave the Chamber for a short time. When I return, if we have gone beyond the items to which I wish to call attention, I hope the Senator will not object to recurring to them.

Mr. CURTIS. Certainly not.

Mr. HARRISON. I only wish to say at this time, touching school buildings, that at the proper time I shall offer amendments and I shall very strenuously urge the adoption of them. I hope I can show certain facts to the Senate that will warrant the adoption of the amendments. I am sure that I have the sympathy of the subcommittee and of the main Committee on Appropriations, because I know they are aware of the need for public-school buildings, but it is a question that ought to be left to the Senate to decide whether we shall have additional school buildings, as I think we should. I shall very fully discuss the proposition at the proper time.

The reading of the bill was resumed.

The next amendment was, on page 16, line 10, before the word "new," to strike out "six" and insert "eleven," so as to read:

For the purchase of 11 new automobiles (to replace horse-drawn vehicles) for use of the various departments of the government of the District of Columbia, and for the exchange of such automobiles now owned by the District of Columbia as, in the judgment of the commissioners of said District, have or shall become unserviceable, $8,400.

The amendment was agreed to.

The next amendment was, on page 16, after line 15, to insert the following proviso:

Provided, That the part of this sum for the purchase of new automobiles shall only be available for the purchase of automobiles from the supply now on hand of the War Department, and the Secretary of War is hereby authorized and directed to execute said sale on terms mutually agreeble to both the government of the District of Columbia and the War Department.

The amendment was agreed to.

The next amendment was, on page 18, line 24, to strike out "$7,500" and insert "$8,500," so as to read:

The commissioners are authorized, in their discretion, to furnish necessary transportation in connection with strictly official business of the District of Columbia by the purchase of car fares from appropriations contained in this act: *Provided*, That the expenditures herein authorized shall be so apportioned as not to exceed a total of $8,500.

The amendment was agreed to.

The next amendment was, on page 20, after line 11, to strike out:

Court of Appeals Building: For fitting up the top story and basement of the Court of Appeals Building, including material and labor and each and every item incident to such work, $22,000, to be available immediately.

The amendment was agreed to.

The next amendment was, on page 20, after line 15, to insert:

For rent of offices of the recorder of deeds, including services of cleaners as necessary, not to exceed 30 cents per hour, to be expended under the direction of the Commissioners of the District of Columbia, $6,000.

The amendment was agreed to.

The next amendment was, on page 21, line 7, to strike out "$15,000" and insert "$17,500," so as to read:

For purchase of metal identification number tags for horse-drawn vehicles used for business purposes and motor vehicles in the District of Columbia, $17,500.

Mr. HARRISON. In this connection, that does not touch the tax on automobiles, does it?

Mr. CURTIS. It provides for the purchase of tags for automobiles and horse-drawn vehicles, from which tags the District derives a revenue of about $250,000.

Mr. HARRISON. Will the Senator allow the amendment to be passed over for the present and allow me to offer an amendment to the amendment and let it be pending?

Mr. CURTIS. Certainly.

Mr. HARRISON. The object of the amendment to the amendment is to reach certain States adjoining the District of Columbia where automobile owners entering those States whose machines bear certain tags are not treated with the same privileges and courtesies that the District of Columbia treats the automobilists who enter the District from other States. It is to compel an equality of treatment.

The VICE PRESIDENT. The amendment to the amendment will be read.

The ASSISTANT SECRETARY. On page 21, after line 7, insert:

That until further provision is made by Congress, the use and operation of all automobiles and all self-propelled vehicles using the public highways in interstate commerce shall be regulated in conformity with the laws of the States, Territories, or Districts, respectively, wherein the owners and operators of such vehicles may reside, subject to the following qualifications and limitations: No person personally qualified under the laws and regulations of the State, Territory, or District of his residence to use and operate such vehicle or vehicles shall be required in any other State, Territory, or District into which he may go for business or pleasure to make any additional registration or take out any additional license or tag or pay any additional tax in order to use and operate any such machine; nor shall any owner of such vehicle who has complied with the laws of his own State as to registration, license, tagging, or tax be required, in order to operate the same vehicle in any other State, Territory, or District to make any additional registration or secure any other license or tag or pay any additional tax. The certificate of the proper local officers shall, when demanded, be taken and accepted in all States, Territories, and Districts as competent and sufficient evidence that such person has complied with the laws and regulations of the State, Territory, or District of his residence, but nothing herein contained shall be construed to exempt any person from the police regulations of any State, Territory, or District into which he may go, save only the additional registration and the taking out of additional license or tag or paying of additional tax in case he shall have complied with the laws and regulations of his own State, Territory, or District: *Provided*, That any Senator, Representative, official, or any other person temporarily located in the District of Columbia, but retaining citizenship in a State, must comply with the laws and regulations of such State, and such compliance shall entitle such person to the benefits of this act.

Mr. CURTIS. I dislike very much to make a point of order against the amendment, because I am in sympathy with the proposal, but I was instructed by the committee to make a point of order against all legislation offered and amendments proposed which were in violation of the rule. Therefore I make the point of order that the proposed amendment to the amendment is general legislation.

Mr. HARRISON. Of course, as a new paragraph, the point of order would be well taken. I ask that the provision be passed over for the present, and I will see if I can not conform my amendment to the amendment so that it will not be open to a point of order.

Mr. CURTIS. I am very glad to consent to that.

The Assistant Secretary continued the reading of the bill.

The next amendment was, at the top of page 23, to insert:

Employment service: For personal services and miscellaneous and contingent expenses required for maintaining a public employment service for the District of Columbia, $7,500.

Mr. HARRISON. This seems to be a Senate committee provision to take care of unemployment in the District. Past appropriation bills have carried a larger sum than this, have they not?

Mr. CURTIS. No. This is the first time any item of the kind has been included in the bill. It was submitted to the House and, as I understand it, though my recollection may be wrong about it, it was stricken out on a point of order in the House. This is new, so far as the District appropriation bill is concerned.

The service has been maintained for the last two years by contributions from the merchants of the District. Last year they raised $10,500, and that sum was met by an equal sum from the Department of Labor. This year they asked for $10,500, and it was recommended by the District Commissioners, but the item went out on a point of order in the House. After hearing all the testimony the subcommittee of the Senate thought that $7,500 would be sufficient and recommended it, with the understanding, of course, that that sum would be met by an equal sum from the Department of Labor.

Mr. HARRISON. Heretofore the appropriation has been made by Congress to the Labor Department?

Mr. CURTIS. Yes; to the Labor Department.

Mr. HARRISON. It has been used in part by the District to take care of this matter?

Mr. CURTIS. Yes. Last year they used $10,500 of their money to meet the $10,500 raised by the business men of the District.

Mr. HARRISON. I am in entire sympathy with the proposition. I was just wondering if there is any duplication there, and how the money is to be expended.

Mr. CURTIS. It will be expended through the District Commissioners, of course, probably under the present organization which is in existence and for which there was submitted an estimate showing the number of employees and the salary of each.

Mr. HARRISON. At present, I understand, it is maintained through private subscriptions in part, but through a Government agency.

Mr. CURTIS. That is, the Government contributes $10,500 to meet what is contributed by the merchants of the District.

Mr. HARRISON. It is under the control of the District Commissioners?

Mr. CURTIS. Yes; virtually.

Mr. HARRISON. The Senator says "virtually"?

Mr. CURTIS. Of course, the Labor Department would have control of the men they employ or assign from their department and pay with their money, but the proposition has been under the control of the District Commissioners and will continue to be if this goes through. I suppose the Labor Department could make certain conditions, if they allotted any money, as to how that part should be expended. I think the director probably was employed originally upon the request or recommendation of the Labor Department. However, he has resigned.

The amendment was agreed to.

The next amendment was, on page 23, after line 12, to strike out:

Northwest: For paving Ingraham Street, east of Fourteenth Street, 30 feet wide, $8,500.

The amendment was agreed to.

The next amendment was, on page 23, line 16, to strike out "$10,800" and insert "$10,260," so as to read:

Northeast: For paving Eleventh Street, D Street to Maryland Avenue, 32 feet wide, $10,260.

The amendment was agreed to.

The next amendment was, on page 23, line 18, to strike out "$9,900" and insert "$9,405," so as to read:

Southeast: For paving Sixteenth Street, G Street to Kentucky Avenue, 30 feet wide, $9,405.

The amendment was agreed to.

The next amendment was, on page 23, line 20, to strike out "$14,400" and insert "$13,680," so as to read:

Southeast: For paving Kentucky Avenue, Fifteenth Street to Sixteenth Street, 40 feet wide, $13,680.

The amendment was agreed to.

The next amendment was, on page 23, after line 20, to strike out:

Northwest: For grading Thirteenth Street, Buchanan Street to Shepherd Street, $14,900.

The amendment was agreed to.

The next amendment was, on page 23, after line 22, to strike out:

Northwest: For paving Upshur Street, New Hampshire Avenue to Fourth Street, 45 feet wide, $10,300.

The amendment was agreed to.

The next amendment was, on page 24, line 2, to strike out "$10,800" and insert "$10,260," so as to read:

Northwest: For paving Webster Street, Sixteenth Street to Seventeenth Street, 30 feet wide, $10,260.

The amendment was agreed to.

The next amendment was, on page 24, line 4, to strike out "$3,600" and insert "$3,420," so as to read:

Northwest: For paving Upshur Street, Rock Creek Church Road to Second Street, 45 feet wide, $3,420.

The amendment was agreed to.

The next amendment was, on page 24, after line 4, to strike out:

Northwest: For paving Yuma Street, Thirty-eighth Street to Thirty-ninth Street, 30 feet wide, $10,800.

The amendment was agreed to.

The next amendment was, on page 24, after line 6, to strike out:

Northwest: For paving Varnum Street, Second Street to Rock Creek Church Road, 30 feet wide, $6,800.

The amendment was agreed to.

The next amendment was, on page 24, after line 8, to strike out:

Northwest: For paving Third Street, Taylor Street to Upshur Street, 30 feet wide, $6,800.

The amendment was agreed to.

The next amendment was, on page 24, after line 10, to strike out:

Northwest: For paving Allison Street, Fifteenth Street to Sixteenth Street, 30 feet wide, $7,500.

The amendment was agreed to.

The next amendment was, on page 24, after line 12, to strike out:

Northwest: For paving Arkansas Avenue, Emerson Street to Farragut Street, 40 feet wide, $10,400.

The amendment was agreed to.

The next amendment was, on page 24, after line 14, to strike out:

Northwest: For paving Shepherd Street, west of Fourteenth Street, 30 feet wide, $5,300.

The amendment was agreed to.

The next amendment was, on page 24, line 18, to strike out "$6,800" and insert "$6,460," so as to read:

Northwest: For paving Seventh Street, Webster Street to Allison Street, 30 feet wide, $6,460.

The amendment was agreed to.

The next amendment was, on page 24, after line 18, to strike out:

Northwest: For paving Taylor Street, east of Fourteenth Street, 30 feet wide, $8,300.

The amendment was agreed to.

The next amendment was, on page 24, line 22, to strike out "$6,300" and insert "$5,985," so as to read:

Northeast: For paving Bryant Street, east of North Capitol Street, 30 feet wide, $5,985.

The amendment was agreed to.

The next amendment was, on page 24, line 24, to strike out "$5,000" and insert "$4,750," so as to read:

Northeast: For paving Evarts Street, east of North Capitol Street, 30 feet wide, $4,750.

The amendment was agreed to.

The next amendment was, at the top of page 25, to strike out:

Northwest: For paving Twenty-eighth Street, south of Cathedral Avenue, 30 feet wide, $11,200.

The amendment was agreed to.

The next amendment was, on page 25, line 5, to strike out "$5,000" and insert "$4,750," so as to read:

Northwest: For repaving the cobble roadway of C Street, Thirteen-and-a-half Street to Fourteenth Street, 40 feet wide, $4,750.

The amendment was agreed to.

The next amendment was, on page 25, after line 5, to strike out:

Northeast: For grading Eckington Terrace, Prospect Street to T Street, $8,100.

The amendment was agreed to.

The next amendment was, on page 25, after line 7, to strike out:

Northwest: For paving the roadway of New Hampshire Avenue between Upshur Street and Grant Circle, 50 feet wide with 10-foot center parking, and the roadway around Grant Circle, 40 feet wide, with standard asphalt pavement, including resetting existing curb where required, $37,800.

The amendment was agreed to.

The next amendment was, on page 25, after line 13, to insert:

Northwest: For grading Second Street, Laurel Street to Whittier Street; Eastern Avenue, Laurel Street to Whittier Street; Whittier Street, First Street to Second Street; First Street, Whittier Street to Van Buren Street; and Van Buren Street, First Street to Second Street, $10,795.

The amendment was agreed to.

The next amendment was, on page 25, after line 19, to insert:

Northwest: For repaving the granite-block roadway of Georgia Avenue, Florida Avenue to Barry Place, present width, $31,195.

The amendment was agreed to.

The next amendment was, on page 25, line 23, to strike out "$219,300" and insert "$110,960," so as to read:

In all, $110,960, to be disbursed and accounted for as "street improvements," and for that purpose shall constitute one fund.

The amendment was agreed to.

The next amendment was, at the top of page 26, to insert:

Howard Road: In view of the urgent necessity for laying a concrete roadway on Howard Road from Nichols Avenue to a point 1,600 feet west therefrom, in the month of November, 1918, at a cost double the average cost of laying such roadways, one-quarter of the cost of said work shall be assessed against abutting property in lieu of one-half said cost, and all assessments heretofore levied for one-half of said cost are hereby canceled, and the Commissioners of the District of Columbia are directed to levy a new assessment in accordance with the provisions hereof.

Mr. SMOOT. I should like to ask the Senator why that change has been made in Howard Road?

Mr. CURTIS. For the reason that the road runs through a part of the District which is inhabited by a number of very poor people. The road was built in war times at war prices, and if they were compelled to pay one-half the cost it would absolutely confiscate their properties. The committee went out there and went over the ground and looked at the houses and agreed to the recommendations of the commissioners that those people ought to be relieved of a part of the payment for the road. The road was put in wholly for the use of the Government, not at the request of the local residents, but at the request and for the use of the Government during the war times for war purposes.

Mr. SMOOT. That is the only possible reason that could be given for making the change. Perhaps it may be satisfactory.

Mr. CURTIS. I will say to the Senator that the road goes to Bolling Aviation Field. There was no request in the neighborhood at all for it; none of the people asked for it. It was put in virtually over their objection, and to make them pay the amount required by law would be a practical confiscation of their property.

Mr. DIAL. Mr. President, I take great pride in the city of Washington. I wish to see it have magnificent streets, parks, and everything else which will make it a pleasant place in which to live. I wish to say, however, that last summer I saw pavements being torn up here which would be a credit to any city in the world. On New York Avenue, near Fifteenth Street, pavements were being taken up which seemed to me to be perfect. I got out of the street car onto the pavements which were being torn up, and on an examination could not find any cracks or defects in them whatever. I believe in proper liberality in these matters, but at the same time the Commissioners of the District of Columbia in their administration of affairs here should exercise good judgment, common sense, and economy. I took the

liberty, although I am not a member of the Committee on the District of Columbia, of writing a letter to the District Commissioners calling their attention to the fact that to my mind they were throwing away the taxpayers' money in tearing up pavements in this city which, as I have said, would be a credit to any city in the world and which the people in other cities would be proud to have. I merely wish to sound a note of warning to the commissioners that they exercise economy in these matters. They should not be allowed to tear up pavements until they shall have served their purpose.

Mr. CURTIS. I will say to the Senator from South Carolina that there is no reference to that item in the pending bill.

Mr. DIAL. But there are provisions relative to other street pavements, although not at the particular place to which I referred.

Mr. CURTIS. There is nothing whatever in the pending measure affecting the matter to which the Senator from South Carolina refers. The appropriation for that purpose must be contained in some other bill.

The VICE PRESIDENT. Without objection, the amendment is agreed to. The Chair hears none.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 26, after line 10, to insert:

Rock Creek Ford Road: The Commissioners of the District of Columbia are hereby authorized to close that portion of Rock Creek Ford Road lying between Broad Branch Road and Rittenhouse Street upon the application in writing of the owner or owners of all of the property abutting on said road between the limits named, and upon the closing of said road the land embraced therein shall revert to the owners of the abutting property.

The amendment was agreed to.

The next amendment was, on page 26, line 22, to strike out "$30,000" and insert "$40,000," so as to read:

Grading streets, alleys, and roads: For labor, purchase and repair of cars, carts, tools, or hire of same, and horses; and labor of the inmates of the Washington Asylum and Jail may be used in connection with this work, $40,000.

The amendment was agreed to.

The next amendment was, on page 27, line 7, after the word "Georgetown," to strike out "$50,000" and insert "there is appropriated such sum as is necessary for said purpose during the fiscal year 1922," so as to read:

To carry out the provisions contained in the District of Columbia appropriation act for the fiscal year 1914 which authorize the commissioners to open, extend, or widen any street, avenue, road, or highway to conform with the plan of the permanent system of highways in that portion of the District of Columbia outside of the cities of Washington and Georgetown there is appropriated such sum as is necessary for said purpose during the fiscal year 1922, to be paid wholly out of the revenues of the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 28, line 20, to strike out "$25,000" and insert "$27,500," so as to read:

Bridges: For construction and repair, including the allowance to the overseer of bridges for the maintenance of an automobile for use in performance of his official duties of not to exceed $30 per month, $27,500.

The amendment was agreed to.

The next amendment was, on page 29, after line 22, to insert:

Hereafter the jurisdiction and control of the Highway Bridge across the Potomac River, including appropriations and employees, shall be under the Commissioners of the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 30, after line 21, to strike out:

Upper Potomac interceptor: For continuing the construction of the Upper Potomac interceptor between Twenty-seventh and K Streets and the Chain Bridge, $4,000.

The amendment was agreed to.

The next amendment was, on page 32, after line 15, to insert:

Section 12 of the act entitled "An act to provide for eliminating certain grade crossings in the line of the Baltimore & Potomac Railroad Co. in the city of Washington, D. C., and requiring said company to depress and elevate its tracks, and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901, is amended by adding thereto the following:

"And such tax shall be a lien until paid upon all the property of such street railway company and may be enforced in the name of the District of Columbia by a bill in equity brought by the commissioners of said District in the Supreme Court of said Distret against such street railway company; and in addition thereto the District of Columbia shall have all common-law remedies for the collection of such tax and shall be entitled to those provided in paragraph 12, section 6, of the act entitled 'An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes,' approved July 1, 1902."

The amendment was agreed to.

The next amendment was, on page 33, line 16, to strike out "$50,000" and insert "$60,000," so as to read:

Parking commission: For contingent expenses, including laborers, trimmers, nurserymen, repairmen, teamsters, hire of carts, wagons, or motor trucks, trees, tree boxes, tree stakes, tree straps, tree labels, planting and care of trees on city and suburban streets, care of trees, tree spaces, maintenance of two motor trucks, and miscellaneous items, $60,000.

The amendment was agreed to.

The next amendment was, on page 34, line 23, before the word "swimming," to strike out "five" and insert "three," so as to read:

For supplies, installing electric lights, repairs, maintenance, and necessary expenses of operating three swimming pools, $3,000.

The amendment was agreed to.

The reading of the bill was continued to the end of line 24, on page 37, as follows:

PUBLIC SCHOOLS.

Officers: Superintendent, $6,000; 2 assistant superintendents, at $3,750 each; director of intermediate instruction, 13 supervising principals, supervisor of manual training, and director of primary instruction, 16 in all, at a minimum salary of $2,400 each; secretary, $2,000.

Mr. HARRISON. I wish to offer an amendment, in line 20, on page 37, to strike out——

The VICE PRESIDENT. It has been agreed that committee amendments shall first be considered.

Mr. CURTIS. The amendment desired to be offered by the Senator from Mississippi will be proper after the consideration of the committee amendments shall have been concluded.

Mr. HARRISON. Very well.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 38, line 1, after the word "each," to strike out "3 at $1,000 each, 1 (to carry out the provisions of the child-labor law) $900," and insert "4 at $1,000 each (1 of whom to carry out the provisions of the child-labor law)"; and in line 5 to strike out "$72,120" and insert "$72,220," so as to read:

PUBLIC SCHOOLS.

Officers: Superintendent, $6,000; 2 assistant superintendents, at $3,750 each; director of intermediate instruction, 13 supervising principals, supervisor of manual training, and director of primary instruction, 16 in all, at a minimum salary of $2,400 each; secretary, $2,000; financial clerk, $2,000; clerks—1 $1,600, 2 at $1,500 each, 1 $1,400, 3 at $1,200 each, 4 at $1,000 each (1 of whom to carry out the provisions of the child-labor law); 2 stenographers, at $1,000 each; messenger, $720; in all, $72,220.

The amendment was agreed to.

The next amendment was, on page 39, line 16, after the word "instruction," to insert "who shall hereafter be known as director of primary instruction in the colored schools"; in line 18, before the word "director," to strike out the word "assistant," and in line 19, after the word "instruction," to insert "in the colored schools," so as to read:

Assistant director of primary instruction, who shall hereafter be known as director of primary instruction in the colored schools, $1,800: *Provided*, That the director of primary instruction in the colored schools now in the service of the public schools or hereafter to be appointed shall be placed at the basic salary of $1,800 per annum, and shall be entitled to an increase of $50 per annum for five years.

The amendment was agreed to.

The next amendment was, on page 39, line 24, after the words "assistant directors," to insert "who shall hereafter be known as directors in the colored schools," so as to read:

Assistant directors, who shall hereafter be known as directors in the colored schools, of music, drawing, physical culture, domestic science, domestic art, kindergartens, and penmanship, 7, at $1,800 each.

The amendment was agreed to.

The next amendment was, on page 40, line 7, after the word "training," to insert "who shall hereafter be known as director of manual training in the colored schools," so as to read:

Assistant supervisor of manual training, who shall hereafter be known as director of manual training in the colored schools, $1,800.

The amendment was agreed to.

The next amendment was, on page 40, line 17, after the word "each," to insert the following proviso:

Provided, That teachers now in the service or hereafter appointed or transferred to the junior high school shall possess the same or like qualifications to those now required of teachers in the normal, high, and manual-training high schools in group A of class 6.

Mr. CURTIS. Mr. President, at the request of the Commissioners of the District of Columbia and of the superintendent of schools I ask that that amendment be rejected.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 42, after line 6, to strike out:

No teacher, clerk, or librarian in classes 1 to 5, inclusive, heretofore promoted from one class to another, shall receive for the fiscal year ending June 30, 1922, a less amount of longevity allowance than that which such employee was receiving at the time of his most recent promotion.

The amendment was agreed to.

The next amendment was, on page 42, line 19, after the word "supervisor," to strike out the words "and assistant supervisor"; in the same line, after the word "training," to insert "and director of manual training in the colored schools"; on page 43, line 2, before the word "director," to strike out "assistant"; and after the word "director," to insert "in the colored schools"; and in line 4, before the word "directors," to strike out "assistant"; and after the word "directors," to insert "in the colored schools," so as to read:

Longevity pay: For longevity pay for director of intermediate instruction, supervising principals, supervisor of manual training and director of manual training in the colored schools, principals of normal, high, manual training high, and junior high schools, the assistant principals of the Central and McKinley Manual Training High Schools, the assistant principal (who shall be dean of girls) of the Central High School, the assistant principal (who shall be dean of girls) of the Dunbar High School, principals of grade manual training schools, heads of departments, director and director in the colored schools of primary instruction, directors, and directors in the colored schools of drawing, physical culture, music, domestic science, domestic art, kindergartens, and penmanship, principal and teachers in Americanization work, teachers, clerks, librarians, and clerks, and librarians to be paid in strict conformity with the provisions of the act entitled "An act to fix and regulate the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia," approved June 20, 1906, as amended by the acts approved May 26, 1908, May 18, 1910, and June 26, 1912, $575,000: *Provided*, That no part of this sum shall be paid to any person who, in the opinion of the board of education and the superintendent of schools, has an unsatisfactory efficiency rating.

The amendment was agreed to.

The next amendment was, on page 45, line 6, in the items for Central High School, to strike out $600 and insert $720, and in line 7, strike out $25,300 and insert $27,100, so as to read:

Fifteen laborers, at $720 each; in all, $27,100.

Mr. HARRISON. May I ask the Senator from Kansas what increase has been allowed in this bill in the salaries of janitors of the public schools?

Mr. CURTIS. The committee recommended that where salaries were $600 they should be increased to $720. I can not turn to the page now, but I think there are only one or two janitors whose salaries have been thus increased, as most of the janitors are now drawing more than that. As I recall, only one janitor was drawing as low as $600, and we increased his salary to $720.

Mr. HARRISON. How many janitors will have their salaries increased?

Mr. CURTIS. My recollection is only one.

Mr. HARRISON. I think there are more than that.

Mr. CURTIS. I am speaking offhand, but my recollection is that there is only one. I should have to run over the bill to ascertain the exact number.

Mr. HARRISON. At the Franklin School there are two increases from $600 to $720.

Mr. SMOOT. In that case the employees are laborers.

Mr. HARRISON. The Senator from Utah is correct.

Mr. CURTIS. I think there has been an increase in only one case; that is my recollection.

Mr. HARRISON. As I recall, the janitors have not received an increase proportionate even to that given to the teachers in the public schools. Last year and year before last the janitors came here and thought they were going to get an increase, but it was denied them. These poorly paid janitors who are in charge of the school buildings and have very heavy responsibilities to bear, who have to report early and stay during the day, ought, in my opinion, to have their salaries increased. Does not the Senator think that some increase should be provided for them?

Mr. CURTIS. The subcommittee took that question up and went into it very thoroughly. We discussed it, I think, for the greater part of two days, and, after a thorough investigation, concluded that the best thing to do was to increase to $720 those whose salary was now $600. That, in addition to the bonus of $240, while perhaps it will not give them enough, will tide them over, at any rate, until the reclassification bill shall be enacted by Congress.

Mr. HARRISON. It does not look as though the reclassification bill will ever be enacted.

Mr. CURTIS. If not, then the question of the salaries paid to the officers and employees of the District of Columbia should be carefully gone into either by the House or Senate, or both, and a rearrangement made, so that there will be something like an equitable salary paid to those who now perform service for very small remuneration.

Mr. SMOOT. I will say to the Senator also that if the salary of the laborers is changed in this bill it will have to be changed in all of the departments of the Government, because the position is a statutory one at $600, and it was fixed at that figure even before the bonus was talked about. With the bonus, of course, it amounts to $840. If an increase were made here, the Senator would have to increase them all, clear up through the departments of the Government.

Mr. HARRISON. There are sixty-nine 8-room school buildings, I think, where there are 69 janitors who now receive only $720.

Mr. SMOOT. Oh, no janitor receives as little as that. The lowest pay a janitor receives is $1,000.

Mr. HARRISON. I think the Senator is mistaken about that.

Mr. SMOOT. I should like to have the Senator point out any place in the bill where a janitor receives less than $1,000.

Mr. CURTIS. The janitors get $1,000, and the assistant janitors $900.

Mr. SMOOT. Yes; and the Western High School janitor gets $1,100. I did not think the Senator was referring to janitors. I thought he was referring to laborers. There is no janitor in the bill that is getting less than $1,000.

Mr. HARRISON. The Senator means including the bonus?

Mr. SMOOT. No, no; without the bonus. The janitor at the Western High School gets $1,100, at the Franklin School $1,000, at the Eastern High School $1,000, at the Stevens School $1,000, at the Jefferson School $1,000, at the Business High School $1,000, at the old Central High School $1,000—the new Central High School has an engineer—and the superintendent of janitors gets $1,500.

Mr. HARRISON. Let me read from the House hearings, at pages 242 and 243, when this question was before the House Appropriations Committee. Mr. Kramer went on the stand. Mr. BUCHANAN, a member of the committee, says:

On page 120, Mr. Chairman, I find 69 schools with only one janitor each.

Mr. DAVIS. Sixty-nine. How many schools have you in Washington, Mr. KRAMER?

Mr. KRAMER. Practically 150. Those are 8-room plants, where there is only one person on the ground to do all the work.

Mr. DAVIS. What does the janitor do there?

Mr. BUCHANAN. You are asking $960 each for these janitors; they now get $720 and the bonus, making $960; they want the salary increased from $720 to $960.

There are 69 janitors who are in charge of those sixty-nine 8-room school buildings. They are receiving now $720 and the bonus.

Mr. WALSH of Massachusetts. Mr. President, on page 47 of this bill there is recorded the fact that there are 10 janitors who receive $840 and 71 janitors who receive $720 each.

Mr. CURTIS. Then, on page 48, there are some janitors receiving only $600; but they are in very small buildings.

Mr. SMOOT. And they spend about two hours a day at their work.

Mr. CURTIS. They do not put in very much time, and the committee thought they were not entitled to an increase.

Mr. HARRISON. They do not give all of their time; but the 69 janitors in these 69 buildings do give all their time. They are getting $720 a year. They are in charge of all these rooms. They have no help there. They ought to be men of character. According to the hearings, in some of the white schools they have been compelled to put in Negro janitors. It seems to me that it is a peculiar place. It is a place where you ought to get men of good character, because they have to associate with the school children oftentimes when the teachers are away. They have to get there early in the morning to make the fires and clean up the buildings, and close them up at night. Their whole time is taken up. Now, if the Senate committee did not want to increase those janitors who are getting $1,100, certainly it would seem to me that these 69 janitors, who are getting only $720, ought to be increased at least $100.

When labor was hard to get, and janitors were quitting work here, when oftentimes the school buildings could not be heated, and school could not be held—instance after instance has been cited where children would go to school and school could not be held because, on account of the increased desire for employment elsewhere, the janitors had left these positions at small wages, and the school authorities could not employ janitors—there were a certain number of these men who stayed, who were patriotic. They did so, not because they could not get higher wages elsewhere, because they could, in other employment, but they stayed here; and I think we ought to give them some kind of an increase in this bill. It would seem to me that $100 given to each one of these $720 janitors, 69 of them, would be very reasonable.

Mr. WALSH of Massachusetts. How large are these school buildings?

Mr. HARRISON. Eight rooms each.

Mr. SMOOT. Mr. President, there would not be any comparison, then, with the salaries of the janitors in these little schools. For instance, take the Brookland School, and the Congress Heights School, and the Curtis School, and the Force

School, and the Garfield School, and the Grant School, and those other small schools; I doubt whether these janitors spend more than two or three hours a day on their work. Take, for instance, the schools that I have mentioned; there are 24 janitors at these schools at $840, and there are 24 laborers at $720 each. Now, I do not think they ought to be put in a position to command almost as much as the janitor of the Central High School, or the Western High School, or the Dunbar High School. There would be no comparison.

Mr. HARRISON. But they get $1,100, and then they get the bonus.

Mr. SMOOT. No; they get $1,000.

Mr. HARRISON. Some of them get $1,100. The janitor of the Central High School gets $1,100.

Mr. SMOOT. Yes; and the janitor of the Western High School gets $1,100.

Mr. HARRISON. And the one at the Central High School.

Mr. SMOOT. And the one, I think, at the Central High School.

Mr. HARRISON. He gets at least $1,100, and then he gets the bonus.

Mr. WALSH of Massachusetts. Mr. President, does not the Senator from Utah think that the janitor of an 8-room school building ought to be, if he is not already required to be, in constant attendance at the school building during school hours for attention to matters of heating and fire protection and fire precaution; and is it not the custom for janitors to be there before the opening of school and late after the close of school?

Mr. SMOOT. In a case like that there is always an assistant janitor.

Mr. WALSH of Massachusetts. In an 8-room school building? I am talking about the 8-room school buildings, where they have 250 to 300 children and where the heating and ventilating and the care of the property are intrusted to a janitor.

Mr. HARRISON. There are 69 of them.

Mr. SMOOT. Mr. President, I do not know that the janitor has anything more to do with the school children than the laborer that is around there. They are there to watch the property, and we have laborers for that purpose. The janitor oversees it, and oversees the work.

Mr. WALSH of Massachusetts. Are there laborers employed at the 8-room school buildings?

Mr. SMOOT. All of them.

Mr. HARRISON. The testimony is that there is only one man; that the janitor does all the work.

Mr. WALSH of Massachusetts. Outside and inside.

Mr. HARRISON. And that there are 69 of these 8-room buildings; that at a good many of the other buildings they have additional help. They have some helpers to take care of the portable buildings that they pay, I think, only $240 a year.

Mr. SMOOT. There are 71 janitors at $720 each.

Mr. HARRISON. Yes; and those men have no help. They do all the work; they take care of the buildings.

Mr. WALSH of Massachusetts. They are the custodians of the property.

Mr. HARRISON. Yes. I want to appeal to the committee, in all fairness, that these men who get $720 be increased at least to $820.

Mr. CURTIS. Mr. President, I will state to the Senator from Mississippi that we went into this question very carefully, and, as I say, gave it consideration for two days; and we reached the conclusion after that length of time that we would leave the salaries as they are now.

Mr. HARRISON. I understand.

Mr. CURTIS. Answering the Senator's question about the Central High School, the janitor there gets $1,100 and the assistant janitor gets $900.

Mr. HARRISON. I am simply interested in the 69 men in these 8-room buildings. I am sure that the members of the committee will not be adamant about changing their opinions, because I judge from what the Senator from Utah says that he was under the impression that these men had some help, and the hearings disclose the fact that these men have no help at all; that they are in complete control of the buildings.

Mr. WALSH of Massachusetts. Mr. President, if the Senator will yield, I want to add my word, as a member of the committee that investigated the conditions of the District schools in regard to the importance of Congress doing something to put the school system of this District in a position where Congress will feel that it has not been neglectful of its responsibilities. I have no interest, and I am sure the Senator from Mississippi has none, in any janitor. I do not know a single one in the whole school system; but it appeared before our committee again and again that the system was breaking down; that the caliber of the men who were taking the examinations was inferior to the former standard; and that the wages were so low that they were not able to get the right type of men as janitors of these school buildings.

It seems to me that we have a very grave responsibility in seeing to it that the school property of the District of Columbia is properly safeguarded and properly cared for by the proper men as janitors. I do not think there is a city in the country where the janitors are paid such poor wages as in this city. I am sure I know something of cities and towns of 10,000, 30,000, and 40,000 population, and the janitors there are paid higher rates than they are paid in this city for janitor service in the school system.

Mr. SMOOT. Mr. President——

Mr. WALSH of Massachusetts. I yield.

Mr. SMOOT. Does the Senator know how many changes there have been in the janitors of these buildings?

Mr. WALSH of Massachusetts. Yes, sir.

Mr. SMOOT. What is the percentage?

Mr. WALSH of Massachusetts. During the war period—which was an exceptional period, I admit—the number of changes was exceedingly great.

Mr. SMOOT. Certainly.

Mr. WALSH of Massachusetts. Exceedingly great, and I can understand why—because wages were increased tremendously in other activities during that period of time.

Mr. SMOOT. That happened in every department of the Government.

Mr. WALSH of Massachusetts. Exactly; but the wages still, even in normal times, are very much below the standard.

I want to repeat that my interest is simply in providing the school system of this city with as fine and high-class a type of janitor as it is possible to get. You can not get that class of men without paying them a decent wage; and this wage is not a decent wage, in my opinion, or in the opinion of the investigating committee.

Mr. SMOOT. With the bonus, Mr. President—and I think that will be granted by Congress in the end—I doubt whether there will be very many changes from now on among the janitors in the schools in the District of Columbia. I want to say to the Senator from Massachusetts that in my opinion during the next two years many people who now have positions will be mighty thankful if they can hold them for that length of time; and I do not think this is the proper time for the Government of the United States to begin to raise salaries here, where there were, as I am informed, not over 10 per cent of changes during the last school year. I think the best thing to do is to keep within a limit. Remember, there is the other side of this question. There are the taxpayers to take into consideration, and in my opinion they are the ones that are going to suffer from now on.

Mr. WALSH of Massachusetts. I think the suggestion made by the Senator from Utah should be considered; but I do think, further, that we ought not to consider merely what you can get a man to work for as a janitor of a school building, but we ought to consider the type of man and other qualifications, and ought to offer him a salary of such proportions that men of fitness and character will apply for positions as janitors.

I want to repeat that I was surprised and shocked at the conditions in the janitor service in this city, and also by other conditions in connection with the schools, particularly the housing conditions, and I am convinced that you will not be able to attract to this branch of the service the right type of men until the salary is increased.

While I am on my feet, I want to say that I consider one of the most responsible duties Congress has is the care of the school system of this city. The people have no vote, and have no say whatever about the management of their school system, and the Congress of the United States ought to be very careful to see that we are not mean and small in appropriating money for the education of the children of this city. We ought to have here as nearly as possible model school buildings, the best of teachers, and the best of janitor service. I confess that it was a surprise to me to find that the standard here was very much below what it ought to be, due to the very small wages paid to janitors and certain of the officials of the schools.

Mr. HARRISON. At the proper time I shall offer an amendment to increase the salaries of at least the 69 janitors by $100.

Mr. SMOOT. Does the Senator think $100 will make any difference in the class of men we are getting?

Mr. HARRISON. I will say to the Senator that I really do not think we are going to have the trouble in the future that we have had in the past about getting janitors. I am inclined to believe that there will be plenty of laborers seeking employment. But, be that as it may, the laborer is entitled to a

fair and a reasonable wage, and these men, in my opinion, are getting an insufficient wage, and it should be increased at least $100. I hope that by the time the amendment shall be offered the Senators on the committee will think it wise to accept it.

Mr. SMOOT. I am one who believes in paying proper salaries, and particularly toward the education of our youth. I do not think the District of Columbia has in the past failed in doing its duty. There may be cases, of course, as there are in every activity of life, but, taking it as a whole, year in and year out, I do not think Congress should be condemned for the amount of money they have appropriated in the last 10 or 15 years for the schools of this District. I think the schools have been taken very good care of.

I quite agree with the Senator from Mississippi that hereafter we are not going to have any trouble about getting janitors or laborers for these small schools. I think persons will be begging for the positions. I hope that the situation will be better than conditions seem to promise at this moment; but let me tell Senators now that before very long it will be a question of getting a position, and not the position seeking the man.

Mr. HARRISON. I am sorry the Senator is so pessimistic about the future.

Mr. SMOOT. I do not like to be pessimistic, but when we are discussing a question, the proper thing to do is to tell the truth as it exists.

Mr. HARRISON. There is no question but that we will get the men, but it is the character of employee you want to be careful of. I do not believe that anybody but a white janitor ought to be employed in a white school. I think he ought to be a person of good character, one the parents can have confidence in, very cautious and considerate.

Mr. SMOOT. I think, of course, a colored man can have just as good a moral character as a white man, if it is a question of character.

Mr. HARRISON. I will say very frankly to the Senator that I do not want to see 69 colored persons as janitors in these 69 eight-room schools. I would rather see colored janitors in the colored schools, and white janitors in the white schools, and I think the parents would prefer it, too.

Mr. SMOOT. I think that is generally the case in the District of Columbia; but I do not think that if we increase the pay $100 a year it is going to make any difference in the moral character of the janitor who is employed or make any difference at all as to his work. If there was any great responsibility attached to the position, it would be an entirely different proposition. But remember, we have thousands and tens of thousands of other employees in the Government, and while one may speak for the janitors of the District of Columbia in the small schools, some one else may speak for the employees in some other department, doing some other kind of work, drawing the same salary. As far as I am personally concerned, as a member of the Appropriations Committee, I want to treat them all alike, and that is exactly what the committee is trying to do.

The amendment was agreed to.

The next amendment was, on page 45, line 11, in the items for the Dunbar High School, to strike out "$600" and insert "720," so as to read "9 laborers, at $720 each"; and in line 12, after the words "in all," to strike out "$13,820" and insert "$14,900."

The amendment was agreed to.

The next amendment was, on page 45, line 14, in the items for the Central High School, to strike out "$600" and insert "$720," and in line 15, strike out "$4,120" and insert "$4,600," so as to read:

Four laborers, at $720 each; in all $4,600.

The amendment was agreed to.

The next amendment was, on page 45, line 17, in the items for Business High School, to strike out "$600" and insert "$720," and in line 18, to strike out "$5,020" and insert "$5,500," so as to read:

Four laborers, at $720 each; in all, $5,500.

The amendment was agreed to.

The next amendment was, on page 45, line 21, in the items for the J. Ormond Wilson Normal School and Ross School, to strike out "$600" and insert "$720," and in line 22, to strike out "$5,640" and insert "$6,120," so as to read:

Four laborers, at $720 each; in all, $6,120.

The amendment was agreed to.

The next amendment was, on page 45, line 24, to strike out "$600" and insert "$720," and in the same line, to strike out "$2,920" and insert "$3,160," so as to read:

Two laborers, at $720 each; in all, $3,160.

The amendment was agreed to.

The next amendment was, on page 46, line 5, in the items for the Western High School, to strike out "$600" and insert "$720," and in the same line, to strike out "$3,620" and insert "$3,980," so as to read:

Three laborers, at $720 each; in all, $3,980.

The amendment was agreed to.

The next amendment was, on page 46, line 5, in the items for the Franklin School, to strike out "$600" and insert "$720," and in the same line, to strike out "$2,920" and insert "$3,160," so as to read:

Two laborers, at $720 each; in all, $3,160.

The amendment was agreed to.

The next amendment was, on page 46, line 8, to strike out "$600" and insert "$720," and in the same line, to strike out "$4,300" and insert "$4,540," so as to read:

Myrtilla Miner Normal School: Janitor, $1,000; assistant janitor, $900; skilled laborer, $720; 2 laborers, at $720 each; charwoman, $480; in all, $4,540.

The amendment was agreed to.

The next amendment was, on page 46, line 11, to strike out "$600" and insert "$720," and in the same line to strike out "$2,320" and insert "$2,440," so as to read:

Eastern High School: Janitor, $1,000; skilled laborer, $720; laborer, $720; in all, $2,440.

The amendment was agreed to.

The next amendment was, on page 46, line 13, to strike out "$600" and insert "$720," and in the same line strike out "$2,320" and insert "$2,440," so as to read:

Stevens School: Janitor, $1,000; skilled laborer, $720; laborer, $720; in all, $2,440.

The amendment was agreed to.

The next amendment was, on page 46, line 18, in the items for the McKinley Manual Training School, to strike out "$600" and insert "$720," and in the same line to strike out "$8,780" and insert "$9,260," so as to read:

Four laborers, at $720 each; in all, $9,260.

The amendment was agreed to.

The next amendment was, on page 46, line 22, in the items for the Armstrong Manual Training School, to strike out "$600" and insert "$720," and in line 23 to strike out "$7,060" and insert "$7,420," so as to read:

Three laborers, at $720 each; in all, $7,420.

The amendment was agreed to.

The next amendment was, on page 47, line 1, to strike out "$600" and insert "$720," and in the same line strike out "$4,420" and insert "$4,780," so as to read:

M Street High School (Old) and Douglass and Simmons Schools: Engineer, $1,000; janitor, $900; skilled laborer, $720; three laborers, at $720 each; in all, $4,780.

The amendment was agreed to.

The next amendment was, on page 47, line 6, to strike out "$600" and insert "$720," and in line 7 to strike out "$20,800" and insert "$22,360," so as to read:

Birney and annex, Elizabeth V. Brown, Emery, New Mott, Henry D. Cooke, Gage, Park View, Petworth, Powell, Takoma, Van Buren, Wallach, and West Schools: Thirteen janitors, at $1,000 each; 13 laborers, at $720 each; in all, $22,360.

The amendment was agreed to.

The next amendment was, on page 47, line 13, to strike out "$600" and insert "$720," and in line 14, to strike out "$34,560" and insert "$37,440," so as to read:

Brookland, Bryan, Burrville, Congress Heights, Curtis, Deanwood, Dennison, Force, Gales, Garfield, Garnet, Grant, Grover Cleveland, Henry, Langdon, Lincoln, Lovejoy, Monroe and addition, Peabody, Randall, Seaton, Sumner, Webster, and Strong John Thomson Schools: Twenty-four janitors, at $840 each; 24 laborers, at $720 each; in all, $37,440.

The amendment was agreed to.

The next amendment was, on page 48, line 22, to increase the total of the appropriations for public schools from $224,090 to $235,370.

The amendment was agreed to.

The next amendment was, on page 50, after line 7, to insert:

For wiring and improving the Johnson School building, $2,500, to be immediately available.

The amendment was agreed to.

The next amendment was, on page 50, line 24, before the words "three kindergartens," to insert "to be immediately available," so as to make the paragraph read:

For furniture, including clocks, pianos, and window shades for additions to buildings, equipment for kindergartens, and tools and furnishings for manual-training, cooking, and sewing schools, as follows: Eight-room addition to the Petworth School, 8-room addition to the Deanwood School, 8-room addition to the Burrville School, 8-room addition at Eighteenth and Monroe Streets NW., 8-room addition to the West School, 8-room addition to the Takoma School, and equipment of

the Phelps School, $38,460, to be immediately available; three kindergartens, $2,400; two sewing schools, $800; one housekeeping and cooking school, $1,000; one cooking school, $700; two manual-training shops, $1,040; in all, $45,000.

The amendment was agreed to.

The next amendment was, on page 52, line 8, to strike out "$900" and insert "$1,200," so as to read:

For purchase of United States flags, $1,200.

The amendment was agreed to.

The next amendment was, on page 52, after line 10, to insert:

For equipment, grading, and improving six additional school yards for the purposes of play of pupils, $2,400.

The amendment was agreed to.

The next amendment was, on page 53, after line 8, to insert:

For payment of necessary expenses connected with the organization and conducting of community forums and civic centers in school buildings, including equipment, fixtures, and supplies for lighting and equipping the buildings, payment of janitor service, secretaries, teachers, organizers, and clerks, and employees of the day schools may also be employees of the community forums and civic centers, including maintenance of automobile, $25,000: *Provided*, That not more than 60 per cent of this sum shall be expended for payment of secretaries, teachers, organizers, and clerks.

Mr. KENYON. Mr. President, there is objection to that amendment. The Senator from Utah [Mr. KING] intimated that he would join with me in objecting to it. Is it the intention to vote on it now?

Mr. SMOOT. I ask that it may go over for the time being, to be taken up when the Senator from Utah [Mr. KING] is present.

Mr. KENYON. Very well.

The PRESIDING OFFICER (Mr. SUTHERLAND in the chair). Without objection, the amendment will be passed over.

The next amendment was, on page 53, line 25, to strike out "$1,500" and insert "$2,000," so as to read:

For transportation for pupils attending schools for tubercular children, $2,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 54, line 16, to reduce the appropriation for the construction of the new Eastern High School from $500,000 to $240,000.

Mr. WALSH of Massachusetts. I would like to ask the reason for that reduction?

Mr. CURTIS. They have had appropriations amounting to $400,000, and used only $40,000 of the same. So they have $360,000 now in the Treasury unexpended, and if we give them $240,000 more it will give them $600,000, which the committee thought was all they could expend in the next year.

The amendment was agreed to.

The next amendment was, on page 54, line 23, to strike out "$128,000" and insert "$120,000," and in line 24 to strike out "$218,000" and insert "$210,000," so as to read:

For additional amount required for an eight-room addition to the Burrville School, $120,000; and the limit of cost is authorized to be extended to $210,000.

The amendment was agreed to.

The next amendment was, on page 55, line 5, to strike out "$100,000" and insert "$90,000," so as to read:

For the completion of an 8-room addition to the J. R. West School, $90,000.

The amendment was agreed to.

The next amendment was, on page 55, line 7, to strike out "$100,000" and insert "$80,000," so as to read:

For the completion of an 8-room addition to Takoma School, $80,000.

The amendment was agreed to.

The next amendment was, on page 55, after line 13, to insert:

For the purchase of land adjoining the Dunbar High School, $45,000.

The amendment was agreed to.

The next amendment was, on page 55, after line 18, to insert:

The Commissioners of the District of Columbia are authorized and empowered to sell to the highest bidder at public auction the following-named property belonging to the said District of Columbia, in the District of Columbia: Lots 821 and 822 in square 3064, together with all improvements thereon: *Provided*, That if, in the opinion of the said commissioners, the highest bid made at said sale for any or all of said lots and improvements thereon is not a full and fair price for the same, the said commissioners shall have the right to reject such bid or bids and shall have the right to sell said property, after due advertisement, to the highest bidder under competitive proposals for the purchase of said property; and that the proceeds of the sale of said lots and improvements thereon shall be paid into the Treasury of the United States to the credit of the United States and the District of Columbia in equal parts.

The amendment was agreed to.

Mr. HARRISON. I am going to offer an amendment to this provision, and I will have it read now, so that it can be appended at the end of line 18, page 55.

The PRESIDING OFFICER. The Secretary will report the amendment.

The READING CLERK. On page 55, after line 18, insert as a separate paragraph the following:

For beginning the erection of a junior high school upon a site owned by the District of Columbia north of Taylor Street and east of Fourteenth Street, $160,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $400,000.

For beginning the erection of a junior high school in the vicinity of the Gage, Emery, and Eckington Schools, $160,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $400,000.

For beginning the erection of a 16-room building north of and in the vicinity of Lincoln Park, $120,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $320,000.

For the erection of an 8-room extensible building adjoining the Buchanan School, $160,000.

For the construction of an 8-room addition to the S. J. Bowen School, $160,000.

For the erection of an 8-room extensible building in the immediate vicinity of the Mott School, $160,000.

For the erection of an 8-room addition to the John Eaton School, $160,000.

For the erection of a 4-room building to replace the Smothers School, $80,000.

For the erection of an 8-room addition to the Lovejoy School, $160,000.

For the erection of a 4-room addition to the Monroe School, $80,000.

The reading of the bill was continued.

The next amendment was, on page 58, line 4, to strike out "$3,000" and insert "$4,000," so as to read:

For maintenance and tuition of colored deaf-mutes of teachable age belonging to the District of Columbia, in Maryland, or some other State, under a contract to be entered into by the commissioners, $4,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 58, line 10, to strike out "$8,500" and insert "$10,000," so as to read:

For instruction of blind children of the District of Columbia, in Maryland, or some other State, under a contract to be entered into by the commissioners, $10,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 60, line 9, in the items for the Metropolitan police, to increase the appropriation for fuel from $7,000 to $8,000.

The amendment was agreed to.

Mr. HARRISON. May I ask, are the Metropolitan police now getting a bonus?

Mr. CURTIS. They are getting one-half, $120 a year.

Mr. HARRISON. Is that provided for in this bill or in the legislative appropriation bill?

Mr. CURTIS. In the legislative appropriation bill. It will be recommended in that bill when it comes before the committee.

Mr. HARRISON. I noticed in the papers, I think this morning, that the item was stricken out yesterday in the House.

Mr. CURTIS. It went out on a point of order. I will state to the Senator that the subcommittee having charge of that bill will recommend to the full committee that it be provided for in the legislative appropriation bill.

Mr. HARRISON. And that applies also to the firemen?

Mr. CURTIS. It does.

The reading of the bill was resumed.

The next amendment was, on page 60, line 11, to increase the appropriations for repairs and improvements to police stations and station grounds from $8,000 to $10,000.

The amendment was agreed to.

The next amendment was, on page 61, line 14, to strike out "$7,500" and insert "$8,500," so as to read:

For the reconstruction of cell corridors and in making, erecting, and placing therein modern locking devices in precinct station houses, $8,500.

The amendment was agreed to.

The next amendment was, on page 61, line 15, in the total of the appropriations for the Metropolitan police, to strike out "$97,700" and insert "$101,700."

The amendment was agreed to.

Mr. KING. May I make an inquiry of the Senator from Kansas at this point? I have been absent from the Chamber and have not been able to follow the bill. Complaints have been made to me by a number of residents of the District about the superfluous number of motor vehicles employed by the District. Complaint is made that a large number of persons in the service of the District have motor vehicles, and that their use is not confined purely to the business of the District; that they are used for private purposes.

It seems to me, when we go upon the streets of Washington one must be impressed with the fact that the Government is furnishing too many motor vehicles for employees of the Government, either of the District or some of the departments of the Federal Government. May I ask the Senator whether the committee have cut down the number of motor vehicles or restricted the use, or whether they have increased the number?

Mr. CURTIS. The object of the commissioners is to replace horsedrawn vehicles with motor vehicles. They claim that it is cheaper and that they can do better work, that men get to their work more quickly and are able to accomplish much more.

The committee recommended an increase of only seven, and required that those seven shall be bought with the same amount of money that was appropriated by the House for the purchase of four automobiles. In other words, we provided that they shall buy the cheaper cars like the Ford instead of some more expensive car, or buy them, if possible, from the War Department.

We have gone pretty thoroughly into the question of motor vehicles, and in no case have the committee recommended the purchase of a motor vehicle unless there was a showing made that justified the committee unanimously to report it. Where there was one objection on the committee or in the subcommittee we refused to make any appropriation, and all have been recommended upon the unanimous vote of the subcommittee.

Mr. McKELLAR. May I inquire what officers of the District government are allowed cars?

Mr. CURTIS. They are allowed to the heads of departments and the commissioners.

Mr. McKELLAR. Each commissioner has one?

Mr. CURTIS. I think they have.

Mr. McKELLAR. What other officers have them?

Mr. CURTIS. The heads of the different bureaus have them, and they are kept in a general garage to be used by officers of the bureaus to go to different sections of the District in order to look after work that is going on.

Mr. McKELLAR. Did the committee investigate as to the total number of cars that are used for official purposes?

Mr. CURTIS. Not this year. I will state to the Senator that we made no change and no increase except, as I stated a moment ago, to supplant horse-drawn vehicles, because it is cheaper to maintain an automobile than to maintain a horse and wagon.

Mr. McKELLAR. Has the Senator any figures to show about how many more cars are used since the war than were used before? In other words, I imagine the appropriation is about the same that it was during the war when there was a great deal more necessity for motor vehicles.

Mr. CURTIS. I could not give that information. I will state that last year there were 29 cars purchased; that is, there were trucks, automobiles, fuel wagons, and ambulances.

Mr. McKELLAR. Has the Senator any information or was any information given in the hearings as to just how many passenger vehicles were used by various officers of the city government and what officers they were?

Mr. CURTIS. Not this year, but we went into it a year or two ago. I have forgotten the figures. We went into it very thoroughly, I think, two years ago.

Mr. McKELLAR. I will say to the Senator that a number of complaints have come to me not only about the use of automobiles by city authorities but by other officers of the Government. It is stated that the automobiles are paid for and their upkeep is paid for out of lump-sum appropriations, and that many officers of the Government are using automobiles which are being kept up at the expense of the Government who are not really entitled to them by any provision of law, and that they have received these machines because of lump-sum appropriations.

Mr. CURTIS. That, I think, is aimed more at the War and Navy Departments than the departments of the District government, because we have been very careful to limit the amount, except in the one case where we provide for the purchase of 11 cars for the amount of money they asked for the purchase of 4 cars.

Mr. McKELLAR. I have no information about it at all that is accurate, but merely statements that have been made to me. During the war we had a very great number of automobiles that were used by officials in all the departments, and especially in the War and Navy Departments, and probably that use was correct, but now that the war is over it seems to me it ought to be the policy of Congress to say just which officials of the Government in whatever department, whether they may be in the War, Navy, or any other department, shall be furnished with automobiles and the nature of the service which those automobiles shall render.

Mr. CURTIS. I think the Senator from Tennessee is right. If the Senator will read the bill he will find in each case the officer is designated who may have an automobile. They are provided for in that way and their maintenance is provided for, but I have not had the time to figure it up. We went over it some two years ago, and I did not think it was necessary to go over it again at this time.

The reading of the bill was continued.

The next amendment was, on page 62, line 2, to strike out "$780" and insert "$840"; in line 3, to strike out "$500" and insert "$600"; in line 4, to strike out "$600" and insert "$720"; in line 8, to strike out "$16,320" and insert "$20,320, of which sum $3,000 shall be immediately available"; and in line 9, to strike out "$27,000" and insert "$31,340," so as to make the paragraph read:

House of Detention: To enable the commissioners to provide transportation, including purchase and maintenance of necessary horses, wagons, and harness, and a suitable place for the reception, transportation, and detention of children under 17 years of age, and, in the discretion of the commissioners, of girls and women over 17 years of age, arrested by the police on charge of offense against any law in force in the District of Columbia, or held as witnesses, or held pending final investigation or examination, or otherwise, including 2 clerks, at $1,000 each; 2 drivers, at $840 each; attendants—1 $1,200, 4 at $1,080 each; cook, $600; laundress, $500; janitor, $720; miscellaneous expenses, including clinic supplies, food, upkeep and repair of building, fuel, gas, ice, laundry, supplies, and equipment, electricity, maintenance of motor station vehicle, and other necessary expenses, $20,320, of which sum $3,000 shall be immediately available; in all, $31,340, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 62, line 19, after the word "law," to insert the words "including $68,410.87 due pensioners of the police and fire departments, which was duly authorized during the fiscal years 1911 to 1915, inclusive, by the Commissioners of the District of Columbia in accordance with law," and in line 23, to strike out "$258,000" and insert "$326,410.87," so as to read:

POLICEMEN AND FIREMEN'S RELIEF FUND.

To pay the relief and other allowances authorized by law, including $68,410.87 due pensioners of the police and fire departments, which was duly authorized during the fiscal years 1911 to 1915, inclusive, by the Commissioners of the District of Columbia in accordance with law, a sum not to exceed $326,410.87 is appropriated from the policemen and firemen's relief fund.

Mr. KING. I should like to ask the Senator from Kansas the reason for this increase?

Mr. CURTIS. That is due to laws passed between 1911 and 1915 giving policemen and firemen pensions which have never been paid. The law provides that they shall be paid, but there has been no money appropriated to pay them. The Senate has put the item in the bill a number of times and it has been stricken out in conference, because the House conferees would not agree to it. It is authorized and directed, it is owed to these men, and it should be paid them.

Mr. KING. Did the House regard it as legislation on an appropriation bill?

Mr. CURTIS. They could not regard it as such. I do not know what inspired them to oppose the amendment, but they have objected to it. The money is due, but it has not been appropriated.

Mr. McKELLAR. It is provided for by law.

Mr. CURTIS. By existing law passed by Congress. A part of it was appropriated, but not all. This appropriates the balance.

The amendment was agreed to.

The next amendment was, at the top of page 63, to insert:

POLICEMEN AND FIREMEN.

Officers and members of the fire and police departments of the District of Columbia who were granted leave of absence to serve in the military and naval forces of the United States during the World War and who were honorably discharged and returned to their employment in said departments shall be entitled to credit for classification and pay purposes as though such services had been rendered in said departments.

Mr. SMOOT. This is the first time I have noticed this amendment. I should like to have the chairman of the subcommittee explain it.

Mr. CURTIS. It is very easily explained. In every other department, if a man entered the war and went abroad or served in this country, when he came back to his position he lost nothing by reason of his absence. But here in the District, if a man belonging to either the police force or the fire department entered the service and came back he lost his grade. The provision is simply to put him in the status in which he would have been had he continued to work in the department all the time. He worked for less pay in the Army, of course.

Mr. SMOOT. Length of service in the war kept him in his position in the classified service only?

Mr. CURTIS. Yes; but he lost his grade.

Mr. WALSH of Massachusetts. It involves no appropriation.

Mr. McKELLAR. It ought to go in.

The amendment was agreed to.

The next amendment was, on page 64, line 17, in the miscellaneous items for the Fire Department, to reduce the appropriation for forage from $18,000 to $15,000, and in line 25, to reduce the total from $140,500 to $137,500.

The amendment was agreed to.

The next amendment was, on page 66, line 24, after the word "services," to strike out "not exceeding $25,000," so as to read:

For enforcement of the provisions of an act to prevent the spread of contagious diseases in the District of Columbia, approved March 3, 1897, and an act for the prevention of scarlet fever, diphtheria, measles, whooping cough, chicken pox, epidemic cerebrospinal meningitis, and typhoid fever in the District of Columbia, approved February 9, 1907, and an act to provide for registration of all cases of tuberculosis in the District of Columbia, for free examination of sputum in suspected cases, and for preventing the spread of tuberculosis in said District of Columbia, approved May 13, 1908, under the direction of the health officer of said district, manufacture of serums, including their use in indigent cases, and for the prevention of infantile paralysis and other communicable diseases, including salaries or compensation for personal services, when ordered in writing by the commissioners and necessary for the enforcement and execution of said acts, and for the prevention of such other communicable diseases as hereinbefore provided, purchase and maintenance of necessary horses, wagons, and harness, purchase of reference books and medical journals, and maintenance of quarantine station and smallpox hospital, $40,000.

The amendment was agreed to.

The next amendment was, on page 68, line 3, to strike out "$100" and insert "$200," so as to read:

For special services in connection with the detection of the adulteration of drugs and of food, including candy and milk, $200.

The amendment was agreed to.

The next amendment was, on page 69, after line 17, to insert:

For necessary repairs to the annex (contagious disease ward) of the Garfield Memorial Hospital, $5,000.

The amendment was agreed to.

The next amendment was, on page 69, after line 19, to insert:

For necessary repairs to the annex (contagious disease ward), Providence Hospital, $3,000.

The amendment was agreed to.

The next amendment was, on page 70, line 16, to strike out "$15,000" and insert "$18,000," so as to read:

For clinical examination, advice, care, and maintenance of children under 6 years of age, under a contract to be made with the Child Welfare Society by the health officer of the District of Columbia, $18,000.

The amendment was agreed to.

The next amendment was, on page 70, after line 16, to insert:

To aid persons of moderate means who are suffering from tuberculosis to obtain adequate sanitarium and hospital care, $3,000.

The amendment was agreed to.

The next amendment was, on page 71, line 14, before the words "at $1,200 each," to strike out "two" and insert "four"; in line 15, after the word "each," to insert "investigating officer for juvenile work, $1,400"; and in line 20 to strike out "$29,680" and insert "$33,480," so as to read:

Juvenile court: Judge, $3,600; clerk, $2,000; deputy clerk, who is authorized to act as clerk in the absence of that officer, $1,480; financial clerk, who is authorized to act as deputy clerk, $1,200; stenographer and typewriter, who is authorized to act as a deputy clerk, $1,080; stenographer and typewriter for judge's work, and to aid in keeping records in the clerk's office, $1,080; probation officers—chief, $2,000; assistant chief (who shall also be investigating officer for children's cases), $1,500, 4 at $1,200 each, 1 for adult cases $1,200, 5 at $1,000 each; investigating officer for juvenile work, $1,400; investigating officer for adult cases, $1,200; record and information clerk for probation office, $1,200; clerk for probation office, $900; 2 bailiffs, at $900 each; telephone operator, $600; messenger, $600; janitor, $600; charwoman, $240; in all, $33,480.

The amendment was agreed to.

The next amendment was, on page 73, line 21, in the items for the police court, after the words "For repairs," to insert "and improvements," so as to read:

For repairs and improvements to building, $3,000.

The amendment was agreed to.

Mr. KING. I should like to recur to page 71, under the item "Juvenile court." Is there any increase there in the number of employees?

Mr. CURTIS. There is. The officers have to place these delinquents. The Senator will see in line 14 an increase from two to four assistants. There is a large number of delinquents that must be placed each year. If they are not placed the expense is greater in keeping them than it is in placing them.

Mr. McKELLAR. There is one additional officer provided for.

Mr. CURTIS. Yes; one investigating officer for the juvenile court. They have about 1,125 delinquent cases for the last year and 1,200 more unofficial, making some 2,300 cases in the year.

The next amendment was, on page 75, line 17, to strike out "$160,000" and insert "$125,000," so as to read:

Support of convicts: For support, maintenance, and transportation of convicts transferred from the District of Columbia: expenses of shipping remains of deceased convicts to their homes in the United States, and expenses of interment of unclaimed remains of deceased convicts; expenses incurred in identifying and pursuing escaped convicts and rewards for their recapture; to be expended under the direction of the Attorney General, $125,000.

The amendment was agreed to.

The next amendment was, on page 76, line 5, to strike out "$480" and insert "$600," and in line 10 to strike out "$4,800" and insert "$5,160," so as to read:

Court of appeals building, District of Columbia: Two watchmen, at $720 each; elevator conductor, $720; three laborers, at $600 each; mechanician (under the direction of the Superintendent of the Capitol Building and Grounds), $1,200: *Provided*, That the clerk of the court of appeals shall be the custodian of said building, under the direction and supervision of the justices of said court; in all, $5,160.

The amendment was agreed to.

The next amendment was, on page 77, line 24, in the items for the Washington Asylum and Jail, to strike out "clerk, $900," and insert "clerk, who shall be a stenographer, $1,000," and on page 78, line 20, to increase the total from $33,755 to $33,855.

The amendment was agreed to.

The next amendment was, on page 79, after line 5, to strike out "$3,000" and insert "$5,000," so as to read:

For repairs to buildings, plumbing, painting, lumber, hardware, cement, lime, oil, tools, cars, tracks, steam heating and cooking apparatus, $5,000.

The amendment was agreed to.

The next amendment was, on page 79, line 23, to strike out "$198,255" and insert "$200,355," so as to read:

In all, Washington Asylum and Jail, $200,355.

The amendment was agreed to.

The next amendment was, on page 80, line 5, in the items for Home for Aged and Infirm, to insert "nurse, $600;" and in line 14, to increase the total appropriation from $20,452 to $21,052.

The amendment was agreed to.

The next amendment was, on page 80, after line 23, in the items for Home for Aged and Infirm, to insert:

For renewal and repairs to boiler feed pumps and pipe-line valves and wall around boilers, $2,500.

The amendment was agreed to.

The next amendment was, on page 81, line 1, to strike out "$76,452" and insert "$79,552," so as to read:

In all, Home for Aged and Infirm, $79,552.

The amendment was agreed to.

The next amendment was, on page 81, line 7, to strike out "$67,500" and insert "$70,000," so as to read:

National Training School for Boys: For care and maintenance of boys committed to the National Training School for Boys by the courts of the District of Columbia under a contract to be made by the Board of Charities with the authorities of said National Training School for Boys, $70,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 81, line 9, to insert "clerk, $1,000," and in line 13, to strike out "$11,880" and insert "$12,880," so as to read:

National Training School for Girls: Superintendent, $1,200; clerk, $1,000; matron and 4 teachers, at $600 each; overseer, $720; 2 parole officers, at $600 each; 7 teachers of industries, at $480 each; engineer, $720; assistant engineer, $600; night watchman, $480; 2 laborers, at $300 each; in all, $12,880.

The amendment was agreed to.

The next amendment was, on page 82, line 1, to strike out "$34,380" and insert "$35,380," so as to read:

In all, National Training School for Girls, $35,380.

The amendment was agreed to.

The next amendment was, on page 82, line 8, to strike out "$45,000" and insert "$40,000," so as to reduce the appropriation for Freedman's Hospital from $45,000 to $40,000.

The amendment was agreed to.

The next amendment was, on page 82, line 10, to reduce the appropriation for Columbia Hospital for Women and Lying-in Asylum, from $18,000 to $17,000.

The amendment was agreed to.

The next amendment was, on page 82, line 11, to reduce the appropriation for Children's Hospital, from $15,000 to $13,000.

The amendment was agreed to.

The next amendment was, on page 82, line 12, to reduce the appropriation for Providence Hospital from $15,000 to $13,000.

The amendment was agreed to.

The next amendment was, on page 82, line 13, to reduce the appropriation for Garfield Memorial Hospital from $15,000 to $13,000.

The amendment was agreed to.

The next amendment was, on page 82, line 14, to increase the appropriation for Central Dispensary, Emergency Hospital, from $20,000 to $22,000.

The amendment was agreed to.

The next amendment was, on page 82, line 16, to reduce the appropriation for the Eastern Dispensary and Casualty Hospital from $15,000 to $5,000.

The amendment was agreed to.

The next amendment was, on page 82, line 20, to increase the appropriation for the George Washington University Hospital from $5,000 to $7,500.

The amendment was agreed to.

The next amendment was, on page 83, line 15, in the items for the Tuberculosis Hospital, to strike out "$2,000" and insert "$2,500," so as to read:

For repairs and improvements to buildings and grounds, including roads and sidewalks, $2,500.

The amendment was agreed to.

The next amendment was, on page 83, line 16, to strike out "$72,640" and insert "$73,140," so as to read:

In all, Tuberculosis Hospital, $73,140.

The amendment was agreed to.

The next amendment was, on page 83, after line 16, to insert:

Hereafter patients may be admitted to the Tuberculosis Hospital for care and treatment at such rates and under such regulations as may be established by the Commissioners of the District of Columbia, and all moneys received from this source shall be credited to the current appropriation for maintenance of said hospital.

The amendment was agreed to.

The next amendment was, on page 84, at the end of line 5, to strike out "$4,000" and insert "$5,000," so as to read:

Board of Children's Guardians: For administrative expenses, including placing and visiting children, city directory, purchase of books of reference and periodicals not exceeding $25, and all office and sundry expenses, $5,000.

The amendment was agreed to.

The next amendment was, on page 84, line 6, after the numerals "$5,000," to insert:

and no part of the moneys herein appropriated shall be used for the purpose of visiting any ward of the Board of Children's Guardians placed outside the District of Columbia, and a ward placed outside said District shall be visited not less than once a year by a voluntary agent or correspondent of said board.

Mr. CURTIS. I offer the amendment which I send to the desk to the committee amendment.

The PRESIDING OFFICER (Mr. KENYON in the chair). The amendment proposed by the Senator from Kansas to the amendment reported by the committee will be stated.

The READING CLERK. In the committee amendment, on page 84, line 9, after the words "District of Columbia," it is proposed to insert "and the States of Virginia and Maryland."

The amendment to the amendment was agreed to.

Mr. CURTIS. I also offer a similar amendment to the committee amendment to come in after the word "District," in line 9, page 84.

The PRESIDING OFFICER. The amendment to the amendment proposed by the Senator from Kansas will be stated.

The READING CLERK. On page 84, line 9, after the word "District," it is proposed to insert in the committee amendment the words "and the States of Virginia and Maryland."

The amendment to the amendment was agreed to.

Mr. CURTIS. I also offer the amendment to the committee amendment, which I send to the desk, to be added at the end of the provision.

The PRESIDING OFFICER. The amendment offered by the Senator from Kansas to the amendment will be stated.

The READING CLERK. On page 84, line 11, at the end of the committee amendment it is proposed to insert:

And said board shall have power, upon proper showing, in its discretion, to discharge from guardianship any child committed to its care.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 84, line 13, in the items for the Board of Children's Guardians, to strike out "three" and insert "eight"; and, in line 15, strike out "$19,400" and insert "$25,400," so as to read:

Salaries: Agent, $1,800; clerks—1 $1,200, 1 $900; stenographer, $900; placing and investigating officers—8 at $1,200 each, 1 $1,000, 9 at $900 each; record clerk, $900; messenger, $500; laborer, $500; in all, $25,400.

The amendment was agreed to.

The next amendment was, on page 84, line 18, to strike out "$35,000" and insert "$44,500," so as to read:

For maintenance of feeble-minded children (white and colored), $44,500.

The amendment was agreed to.

The next amendment was, on page 85, line 1, to strike out "$160,000" and insert "$175,000," so as to read:

For board and care of all children committed to the guardianship of said board by the courts of the District, and for temporary care of children pending investigation or while being transferred from place to place, with authority to pay not more than $1,500 to institutions adjudged to be under sectarian control and not more than $400 for burial of children dying while under charge of the board, $175,000.

The amendment was agreed to.

The next amendment was, on page 85, line 3, to strike out "$218,400" and insert "$249,900," so as to read:

In all, Board of Children's Guardians, $249,900.

The amendment was agreed to.

The next amendment was, on page 86, line 7, to strike out the word "all," before the word "moneys," and insert "hereafter all."

The amendment was agreed to.

The next amendment was, on page 87, line 9, to reduce the appropriation for the National Association for the Relief of Destitute Colored Women and Children from $3,000 to $2,500.

The amendment was agreed to.

The next amendment was, on page 87, line 10, to reduce the appropriation for Washington Home for Foundlings from $3,000 to $1,500.

The amendment was agreed to.

The next amendment was, on page 87, line 11, to reduce the appropriation for St. Ann's Infant Asylum from $3,000 to $1,000.

The amendment was agreed to.

The next amendment was, on page 87, line 18, to strike out "$4,000" and insert "$5,000," and in line 19, to strike out "$5,920" and insert "$6,920," so as to read:

Temporary home for ex-Union soldiers and sailors, Grand Army of the Republic: Superintendent, $1,200; janitor, $360; cook, $360; maintenance, $5,000; in all, $6,920, to be expended under the direction of the commissioners; and ex-soldiers, sailors, or marines of the Spanish War, Philippine insurrection, or China relief expedition, who served at any time between April 21, 1898, and July 4, 1902, shall be admitted to the home.

Mr. KING. I should like to ask the Senator having the bill in charge, in view of the fact that there are so many charitable or municipal homes, houses, and institutions for caring for the infirm, the aged, and the sick, what is the necessity for creating in lines 13, 14, and 15 an additional home for the indigent?

Mr. CURTIS. To what page of the bill does the Senator from Utah refer?

Mr. KING. I refer to page 87.

Mr. CURTIS. That provision has been in the law for many years. It was enacted because many of the ex-Union soldiers who come here on pension matters or for some similar purpose sometimes run short of funds, and the temporary home was provided that they might go there and stay for a day or two. The provision was afterwards extended to apply to soldiers of the Spanish-American War. We were told by the managers of the organization that applications for such care during the last three months had greatly increased and that $1,000 additional was needed for maintenance. It is not a new item at all, but is simply an old item which has been carried in the bill for many years to take care of the soldiers who come here and are helpless. They are, as I have said, only taken care of for a day or two at a time.

Mr. KING. My inquiry was directed to the item preceding the one to which the Senator has referred. I was not alluding to the temporary home for ex-Union soldiers and sailors. I refer to the municipal lodging house and woodyard.

Mr. CURTIS. The municipal lodging house to which the Senator from Utah refers has been maintained for many years. There is no increase in the salaries provided for at all and no increase in the appropriation. I repeat, it is an old item which has been carried by the bill for many years.

Mr. McKELLAR. Does it do any good?

Mr. KING. My inquiry was, in view of the fact that so many institutions exist in the District to take care of the indigent, what is the necessity for an additional similar institution?

Mr. CURTIS. In connection with the municipal lodging house a woodyard is provided where poor people who have no means of buying a meal may go and cut wood or perform some labor of that character and in return be furnished with a night's lodging. It is about the only institution of the kind where they can obtain maintenance by doing a little work.

Mr. KING. Does the Senator from Kansas feel that the other institutions—and they are numerous in the District—for caring for the indigent are inadequate?

Mr. CURTIS. The municipal lodging house takes care of people who are not taken care of by the other institutions; it provides for people who are temporarily stranded in the District. It furnished lodgings to 2,400 people last year and a few years ago furnished lodgings to as many as 10,000 people a year.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 88, after line 7, to insert:

National Library for the Blind: For aid and support of the National Library for the Blind, located at 1729 H Street NW., to be expended under the direction of the Commissioners of the District of Columbia, $5,000.

Mr. KING. Mr. President, may I inquire what relation that provision has to the institutions in the various States and municipalities—and there are scores of them throughout the United States—that care for the blind? What relation has the National Government to such organizations within the States?

Mr. CURTIS. The so-called National Library for the Blind sends out books all over the country, and it is also maintained as an educational institution for the benefit of the blind in the District. It teaches them to read, to write, to use typewriters, and to qualify themselves for various occupations so that they may earn their own living by performing work which they are equipped to perform at this institution.

Mr. KING. I sympathize entirely with institutions designed to care for the blind within the District, but the point I am trying to get at is whether the item referred to includes provision for the blind outside the District.

Mr. CURTIS. It has nothing to do with matters outside the District, except, as I have stated, the library sometimes sends out books which are requested by the superintendents of institutions for the blind in other sections of the country. The institution is under the charge of a lady who has been its head for many years and is well informed as to such matters. The institution is virtually maintained by charity, I wish to say to the Senator. The item in the bill is principally to pay rent and the salary of the secretary; no other officers are paid out of it at all.

Mr. KING. Is there any other institution in the District of Columbia for the care of the blind?

Mr. CURTIS. There is no institution other than this except the Asylum for the Blind. Those who receive the benefit of the National Library for the Blind are trying to qualify themselves to earn a living, so that they may not have to be taken care of by the Asylum for the Blind. They are fitted by this institution to make their own living; in fact, they are working now in the building referred to.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 88, after line 12, to insert:

Columbia Polytechnic Institute: To aid the Columbia Polytechnic Institute for the Blind, located at 1808 H Street NW., to be expended under the direction of the Commissioners of the District of Columbia, $1,500.

The amendment was agreed to.

The next amendment was, on page 88, line 20, to strike out "$800,000" and insert "$860,000," so as to read:

Hospital for the Insane: For support of indigent insane of the District of Columbia in St. Elizabeths Hospital, as provided by law, $860,000.

Mr. KING. I find that is an increase over the appropriation carried by the House bill. Let me ask the Senator whether or not the House bill did not provide a very large appropriation?

Mr. CURTIS. No; because we have got to pay so much for each patient. We figured the cost of the number of patients who are at St. Elizabeths now. There are 1,600 patients from the District in that asylum, and the cost is $529.25 a patient, which makes the aggregate run up to $846,800, or a trifle less than the proposed appropriation, and that allows nothing for additional patients who may be admitted during the year.

Mr. KING. Is there any statute which requires the relatives of insane patients to contribute to their maintenance?

Mr. CURTIS. I think when the families of those confined to the asylum are able to pay they are made to pay. For instance, I know of one case where a pensioner was put in the asylum, and the authorities there retained his money to help pay the expense of his care. This item is limited to people in the District who have no funds whatever, and it is necessary that the item should be in the bill in order to take care of patients from the District of Columbia, who must either be placed in St. Elizabeths Asylum or in some other place. There is a contract with this asylum to take care of them at so much a year.

Mr. KING. The amount the Senator stated, as I understood him, makes no provision for contributions to be made by the families of the insane?

Mr. CURTIS. The patients covered by this item have no one who can take care of them. If they have families who are able to pay anything they are not included in this item. This only applies to indigent patients.

The PRESIDING OFFICER. Without objection, the amendment reported by the committee is agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 88, line 25, to strike out "$4,000" and insert "$5,000," so as to read:

For deportation of nonresident insane persons, in accordance with the act of Congress "to change the proceedings for admission to the Government Hospital for the Insane in certain cases, and for other purposes," approved January 31, 1899, $5,000.

The amendment was agreed to.

The next amendment was, in the items for the workhouse, on page 90, line 9, to strike out "superintendents—farm, $1,200; dairy, $1,000; poultry department, $1,000; nurseryman, $1,000," and insert, "superintendent of farm, nursery, dairy, and poultry department, $1,200"; and in line 12, to strike out the total "$52,080" and insert "$49,080."

The amendment was agreed to.

The next amendment was, in the items for the workhouse, on page 90, line 13, after the word "maintenance," to strike out the words "including superintendence," and in line 22, to strike out "$95,000" and insert "$85,000."

The amendment was agreed to.

The next amendment was, in the total for the workhouse, on page 91, line 1, to strike out "$219,580" and insert "$206,580," so as to read:

In all, $206,580, which sum shall be expended under the direction of the commissioners.

The amendment was agreed to.

The next amendment was, on page 91, line 12, in the items for the reformatory, after the word "maintenance," to strike out the words "including superintendence," and in line 20, to strike out "$55,000" and insert "$50,000."

The amendment was agreed to.

The next amendment was, on page 92, line 1, in the total for the reformatory, to strike out "$146,700" and insert "$141,700."

The amendment was agreed to.

The next amendment was, on page 94, line 3, in the item for the Anacostia River and Flats, to strike out "$200,000" and insert "$175,000, to be expended below Benning Bridge."

Mr. McKELLAR. Mr. President, will the Senator from Kansas explain that item?

Mr. CURTIS. As the Senator from Tennessee no doubt knows, if he has visited the section of the city where the Anacostia Park is located, a portion of what are known as the flats is being reclaimed by filling in the low, swampy land along the river. The original proposition did not contemplate improvement beyond the bridge. The plan of the commissioners, however, is to put a draw in the bridge and proceed with the improvement beyond that point; but the committee did not think that ought to be done at this time. The commissioners in their estimates say it will require $170,000 to do the work this side of the bridge, and so we put in a limitation in order that they may not be able to proceed with the work above the bridge nor put a draw in the bridge without being authorized so to do by Congress.

The PRESIDING OFFICER (Mr. HARRIS in the chair). The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 94, line 21, to increase the appropriation for the Washington Aqueduct from $150,000 to $170,000.

The amendment was agreed to.

The next amendment was, on page 95, after line 6, to insert:

The appropriation of $90,000 for additional pumping facilities to supply water to the filters, made in the District of Columbia appropriation act for the fiscal year 1921, is reappropriated and made available for the fiscal year 1922.

The amendment was agreed to.

The next amendment was, on page 97, line 2, at the close of the items for the water department, to strike out "$400,000" and insert "$420,000," so as to read:

In all for maintenance, $420,000.

The amendment was agreed to.

The next amendment was, on page 97, after line 4, to insert:

For 20-inch water main between Chevy Chase Circle, Georgia Avenue, and Elder Street NW., $160,000.

The amendment was agreed to.

The next amendment was, on page 103, after line 20, to insert:

SEC. 8. The Commissioners of the District of Columbia are authorized, in their discretion, and under such regulations as they may prescribe, to grant to such of the per diem employees as are regularly employed, leave of absence with pay for not exceeding 15 days each fiscal year.

The amendment was agreed to.

The next amendment was to insert the following additional section at the top of page 104:

SEC. 9. That the Commissioners of the District of Columbia are authorized to use so much as may be necessary of the surplus revenues of said District in the Treasury of the United States on June 30, 1920, to pay one-half of the following sums, respectively, which is hereby appropriated from said revenues, and a further sum equal to the amount so appropriated from the revenues of the District of Columbia is hereby appropriated from any moneys in the Treasury not otherwise appropriated, to pay the other half of said sums, namely:

PUBLIC SCHOOLS, SITES FOR BUILDINGS.

For the purchase of a site for an eight-room extensible building in the immediate vicinity of the Mott School, $40,000.

For the purchase of additional land adjoining the John Eaton School, $12,000.

For the purchase of a site for a 16-room building north of and in the vicinity of Lincoln Park, $45,000.

For the purchase of a site for a four-room building to replace the Smothers School, $5,000.

For the purchase of a site west of Sixteenth Street NW., in the Ingleside section, $50,000.

For the purchase of a site in the vicinity of Woodley Park, $43,000.

For the purchase of a site for a junior high school, in the vicinity of the Gage, Emery, and Eckington Schools, $90,000.

For the purchase of a site in the vicinity of the Stevens School, $35,000.

For the purchase of a site for a building adjoining the Buchanan School, $45,000.

For the purchase of a site between Tenth and Sixteenth Streets NW., on or north of Spring Road, $40,000.

For the purchase of a site for an eight-room addition to the Lovejoy School, $7,500.

For the purchase of a site adjoining the Bell School, $10,000.

For the purchase of a site in the vicinity of the Ludlow School, $20,000.

For the purchase of additional land adjoining the Peabody School, $14,000.

For the purchase of a site in the vicinity of the Tenley School, $16,000.

Mr. CURTIS. I move to strike out lines 12 and 13, page 104, because the matter is cared for in another part of the bill.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 104, in the amendment of the committee, it is proposed to strike out lines 12 and 13, relative to extensible building in the vicinity of the Mott School.

The amendment to the amendment was agreed to.

Mr. CURTIS. I offer the amendment which I send to the desk, to follow line 16, page 105.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 105, after line 16, it is proposed to insert:

For the preparation of plans and specifications for the following school buildings, including the employment of personal services, $10,000: Eight-room addition to the Mott School; 8-room addition to the John Eaton School; 16-room school building in the vicinity of Lincoln Park; junior high school near Taylor School and Iowa Avenue; four-room addition to the Monroe School.

Mr. HARRISON. Mr. President, I suggest to the Senator that he hold that back, because it will necessitate my offering a substitute for it. What the Senator proposes to do is to ask to have plans and specifications drawn up. I propose to ask to have buildings erected.

Mr. CURTIS. I withdraw the amendment.

The PRESIDING OFFICER. The question is on the amendment of the committtee as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, in section 9, page 105, after line 16, to insert:

BUILDING FOR OFFICE OF THE RECORDER OF DEEDS.

For the purchase of the property known as the Century Building, No. 412 Fifth Street NW., Washington, D. C., being the north 33.08 feet of lot 15, square 489, for offices of the recorder of deeds, $70,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, in section 9, at the top of page 106, to insert:

MUNICIPAL STABLES, STOREHOUSES, AND ASPHALT PLANT.

For the acquisition of land as a site for stables, store yards, storehouses, and shops to take the place of stables, store yards, storehouses, and shops now located within the lines of Canal Street, between South Capitol Street and Delaware Avenue SW., and also as a site for disposal of city refuse stables, and for municipal asphalt plant, said site to contain an area of approximately 208,000 square feet, with authority to construct a railroad siding into said site so acquired, provided the same shall abut upon a railroad or upon a street now legally occupied by a railroad track, $400,000.

Mr. HARRISON. Mr. President, does the Senator think that item, carrying an appropriation of $400,000, is of more importance than to put that much money on school buildings here in the city?

Mr. CURTIS. This is only for the acquisition of lands. I will say to the Senator very frankly that I do not think so; but your committeee is opposed to erecting school buildings in this city until it knows that they are being erected at somewhere near a reasonable cost. Your committee has information that in the city of Denver a 12-room building was constructed for $85,000, while a similar building in this District cost $300,000. We have information that in Denver a four-room schoolhouse was constructed for $35,000, where a similar building here cost the people of this District $100,000.

Your committee is just an anxious to have the new buildings erected as is the Senator from Mississippi. We have asked that inquiries be sent out to the different cities to get information about what buildings can be and are being erected for in those communities; and whenever school buildings can be erected in this city at a reasonable cost, your committee—I believe I can speak for the whole committee—will unanimously report in favor of the erection of the buildings. Your committee, however, did not feel justified in making the recommendation after it found that so much was being charged for the erection of buildings in the District of Columbia.

Mr. HARRISON. There are other new items here that have been incorporated in the bill by the Senate committee, carrying appropriations. That one item carries $400,000.

Mr. CURTIS. That is for a site only. We have provided for the erection of no new buildings.

Mr. HARRISON. I understand that thoroughly. The point I am trying to get at now is this: Did the Senate committee incorporate these various new items, carrying very large appropriations, because the committee had failed to recommend an appropriation for any new building?

Mr. CURTIS. No.

Mr. HARRISON. In other words, if the Senate committee had placed in the bill appropriations for the construction of some additional buildings in this city, would they have left in or excluded these items?

Mr. CURTIS. The committee would have left them in. The committee would have included them.

I will state to the Senator that there is in the Treasury of the United States over $4,000,000 of surplus revenues of the District of Columbia, and your committee believed that that money should be used for the erection of new school buildings. Your committee asked the District Commissioners to submit to them a provision that would provide for the purchase of sites for school buildings, the purchase of school playgrounds, and the erection of the school buildings themselves, with the authority to go ahead and construct the buildings; also to provide for the purchase of lands for parks, for playgrounds, and for building sites for any building for the use of the District of Columbia that was now actually and absolutely needed, to be paid for out of this surplus fund.

That report was sent to this committee. Your subcommittee was ready to recommend the purchase of the sites and the erection of the buildings in all the cases; and on the last day, just before the report was made, the information that I have stated came to the committee that buildings that are costing us $300,000 could be erected in Denver for $85,000, and buildings that are costing us $100,000 could be erected there for $35,000; and we did not feel justified in authorizing the erection of any more buildings while those prices were being charged.

Mr. HARRISON. As I understand the position of the Senate committee touching these buildings, then, it was that there was a unanimous sentiment that the additional buildings were needed?

Mr. CURTIS. Certainly.

Mr. HARRISON. And that they not only would have provided the sites but they would have made proper appropriations for the construction of these 10 additional buildings if it had not been for the fact that news came to them that it was costing more to erect them here than it would cost in other cities? Is that right?

Mr. CURTIS. Much more—twice as much; three times as much.

Mr. HARRISON. That is what I understood. I understood that the whole building project had the sanction of the entire membership of the Senate Appropriations Committee.

Mr. CURTIS. The subcommittee.

Mr. HARRISON. The subcommittee; and it was with that view that I have drafted the amendment that I propose to discuss a little later on, and I have tried to take care of just that proposition by reducing the estimate 20 per cent. I thought 15 per cent would be proper, but I made it 20 per cent of the estimate—I would go lower than that—and I propose that we shall

say to these contractors, "The limit of cost shall be so much, and you shall not go beyond that." In other words, instead of making an appropriation for a $200,000 8-room building, according to the estimate of the commissioners, I have provided in my amendment that we shall not spend for that building more than $160,000.

Mr. CURTIS. Why spend $160,000 when they can be built in other sections for $85,000?

Mr. HARRISON. There is a great deal of difference of opinion about that proposition, and we think this amendment will take care of it. That is why I wanted to understand the views of the Senator; but what I was trying to get at on this point was whether or not this provision and other provisions that follow here appropriating money for playgrounds and other things were incorporated in the bill because the appropriation for the buildings was left out?

Mr. CURTIS. Not at all. It was a part of the general plan and would have been included.

Mr. SMITH of Maryland. Mr. President, if the Senator will allow me to say so, on the contrary, it was with a view to preparing to build school buildings, to put ourselves in a position whereby we could build them—not to interfere with the building, but to arrange for the building of the schoolhouses.

I want to say to the Senator, if he will allow me, as a member of the subcommittee, that every member of the committee is entirely in harmony with the idea of building new schoolhouses in the District of Columbia. We recognize that they are needed, badly needed, and we want to build them; but while we did not feel as a subcommittee that we could indorse a proposition of the kind that was put up to us, asking us to appropriate more than double the value of these buildings to build them now, that did not mean that we should not make an effort to build them at the proper time. Looking at the thing from the standpoint of my judgment as a business man, I think the propositions that were put up to us to erect these buildings contemplated their erection at peak prices, at such prices that they can be built here or anywhere else for a third or a half of what they proposed to us.

Mr. HARRISON. The hearing does not bear out that assertion, though, may I say to the Senator.

Mr. SMITH of Maryland. What assertion?

Mr. HARRISON. That the amounts asked for these buildings that the estimates provided for are two-thirds or one-half greater than what would be required elsewhere.

Mr. SMITH of Maryland. Mr. President, it is for each individual member of the committee to judge for himself as to the value of these things. When $300,000 is asked for the construction of a 12-room building, the way they are built now, we know as business men that they are not worth that amount of money. A propaganda has been started in this city to the effect that these schoolhouses can not be done without. I do not think they can be done without. I think they are absolutely necessary, and I want the money appropriated; but I do not want to waste the money of the Federal Government and the District of Columbia in paying two prices for what ought to be bought for probably half the money.

Mr. GLASS. Three prices.

Mr. SMITH of Maryland. Well, I will say two prices. It was thought that the necessity for these buildings was such that we would appropriate any amount of money for their construction.

So far as I am concerned I want these buildings. I recognize, from the information before me, that there are probably fifty or sixty thousand children in the District of Columbia that are not properly cared for in the way of school accommodations. It has been claimed that the rooms of these schoolhouses are not properly used. I know it to be a fact, from good authority, that they are used to the full extent, and that even the halls are used in order to take care of the children. We want to build these new schoolhouses; we will build them, and so far as I am concerned I will vote the money; but I want to have us get something in return for the amount we pay for the buildings.

I want to say to the Senate that there is no disposition on the part of the committee to stop the building of schoolhouses. As I have said, we want to build them; we will build them; but before we build them we want to get a price that is somewhere near their value. When, however, we are asked to appropriate $300,000 for a 12-room schoolhouse we know it is not worth the money, and we would not be discharging our duty if we should vote the amount of money that is being asked for this purpose simply because there is an emergency. We will build them. We will authorize the commissioners to go out and find what they can be built for, and come to us with the information, and when we find that the schoolhouses can be built at a fair price we will appropriate the money.

So far as the money that is appropriated here for buying sites is concerned, it is for the purpose of building schoolhouses. It is not for the purpose of using the money that was to be appropriated to build schoolhouses; but it is to prepare for building them. We will build the schoolhouses if we are given an opportunity, but not at twice what they are worth.

Mr. HARRISON. Mr. President, the Senate committee evidently were acting on facts. What did it cost per cubic foot to build the last public-school building erected in this city?

Mr. SMITH of Maryland. I do not know what it cost; but I know that the commissioners came to us for an appropriation of money to build a schoolhouse, and afterwards they found out that it did not require that amount of money to build it. We appropriated more money than was necessary. We do not want to get in that fix again. I do not know anything about the cubic feet.

Mr. HARRISON. That is exactly what I want to get at. Everybody admits that we need school buildings.

Mr. SMITH of Maryland. We do, and we are just as anxious to get them as is the Senator from Mississippi.

Mr. HARRISON. Everyone who has looked into the question knows that they are giving certain children in this city by the hundreds only a half day of schooling through those school shifts. They are using over a hundred portable buildings in order to take care of them. They are using basements and wash rooms in order to take care of the children here. So there is a need.

The assertion is made that it takes three times as much to build a school building here that it does in other cities. Evidently the figures were brought out before the committee. I understand the last bid that came to the commissioners here to erect a school building in this city was 39 cents a cubic foot, and that the telegrams which are in the possession of the subcommittee bear out the statement that it costs about the same amount in other cities of the country.

Mr. CURTIS. In some of the cities from which we have heard it costs 33 cents. But I want to state to the Senator that when it comes down to these last bids, I do not know how much it was per cubic foot, but I do know that for 8-room buildings they wanted $218,000.

Mr. HARRISON. Two hundred thousand dollars was the last estimate.

Mr. CURTIS. Two hundred and eighteen thousand is what they asked. Your committee asked for five bids; five bids were submitted; and they ran from $210,000 to $233,000, and your committee recommended that they be allowed $218,000.

Mr. HARRISON. When was that?

Mr. CURTIS. In the last appropriation bill.

Mr. HARRISON. Did not the committee know, then, that it was an outrageous price?

Mr. CURTIS. We did not. Then when we had the information, and at the request of the commissioners, after the buildings had been authorized at $218,000, we reduced the amount to $210,000. The evidence we secured is not in the hearings, for the reason, as I stated a moment ago, that just as your committee was ready to report the bill to the full committee, this information came to the committee.

Mr. HARRISON. How did it come to the committee?

Mr. CURTIS. It came through the Senator from Colorado [Mr. PHIPPS], who knew that they were erecting school buildings in Denver. At the request of the subcommittee he wrote to the city of Denver and asked them to advise us what 12-room buildings, 8-room buildings, and 4-room buildings were costing in the city of Denver.

Mr. GLASS. Not only that, but I will remind the Senator from Mississippi that the committee was confronted with the frightful disclosures of the investigation in New York, which indicated that east of the Mississippi River there were combinations to hold up prices, and not only hold up prices, but to graft, and the committee thereupon became cautious about the matter. Nobody denies that the situation in the District as to school facilities is bad, and nobody wants to delay a remedy for the situation, but the committee refused, and I think properly refused, to be held up by the excessive estimates.

I would like to inquire of the Senator from Mississippi in what degree he holds the patriotism of the contractors here in the District of Columbia, with the school situation as he has described it, who would send us estimates more than 300 per cent greater than what buildings can be constructed for in other parts of this country, of precisely the same capacity as these buildings?

Mr. HARRISON. Mr. President, I hold no commission to show the patriotism of a contractor, but I want to present this matter to the Senate.

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Wyoming?

Mr. HARRISON. Not just now. I want to finish my reply to the Senator from Virginia.

Mr. WARREN. I merely wished to ask one question.

Mr. HARRISON. I will answer it presently. The Senator from Virginia has intimated that I am trying to place in this bill provisions for appropriations which might help the contractors of this city.

Mr. GLASS. Mr. President, I have not intimated anything of the kind. As a matter of fact, I do not know what the proposed amendment of the Senator from Mississippi is.

Mr. HARRISON. The Senator does not know what he is talking about, then.

Mr. GLASS. Yes, I do know what I am talking about. I know exactly what I am talking about. I am justifying the subcommittee and the Committee on Appropriations in declining to be held up by these high estimates. That is what I am talking about.

Mr. HARRISON. I am going to see if they need any justification. I will tell the Senate who it is I am considering in this matter. It is several thousand school children who are out of schooling facilities in this city. If what the Senator from Virginia says is true and what the Senators on the committee say is true, that there is an outrageous combine here to rob the taxpayers by charging too much to erect school buildings, double or three times the amount that they should charge, then it should be a subject of senatorial investigation, the truth should be laid bare, and those who are guilty should be punished; and if the Senate committee have such facts at hand, they should institute the proceedings. If I thought that such conditions existed here in the District, I would introduce a resolution for an investigation and go to the bottom of it, because they have no right to profiteer.

The Senator from Virginia said he did not know what was pending. Here is what is pending. The commissioners estimated an eight-room building to cost $218,000. I am assuming that the commissioners are honest men; I am assuming that they are business men. They are the people who are appointed to take care of the taxpayers of the District of Columbia. They hold their commissions, although the Senate of the United States has not confirmed their nominations. If they are dishonest and disreputable and unworthy to hold the positions they do, then they ought not to be confirmed. So when the commissioners came before the Senate Committee on Appropriations and the House Committee on Appropriations and told them of the deplorable condition of the schools here and said that $218,000 would build an eight-room building, I am assuming that they had investigated the facts and that they based their estimate on the facts.

Mr. CURTIS. I stated to the Senator that we had asked to have bids submitted, and that five bids were submitted, and we supposed they were reputable people. That was a year ago; and we acted on those bids which were sent in.

Mr. HARRISON. But I propose in my amendment not to help some contractors in this city, because if the contractors are dishonest and disreputable and profiteer, there are contractors in other cities who should be brought here to bid on the proposals. I propose on these $218,000 projects to limit the cost, not to that, but to say, "We will construct that building for $160,000," and reduce it 20 per cent; and say to them they have to build it within the limit of cost, and that if their bids do not come down to that figure then they will be thrown out. I will join with the Senator in making it less. But what I want to see done by the Senate is something that has not been done in seven years; I want to make an adequate appropriation for school buildings.

Mr. GLASS. Mr. President——

Mr. HARRISON. In one moment I will yield. I say to the Senator from Virginia [Mr. GLASS], when he asks by what right I speak for those people, that I was designated as one of five Members of the Senate to look into the school situation here, and we worked for weeks and weeks and brought in a unanimous report, which was adopted by the Senate, that we needed additional school facilities here. So it is really in the capacity of an humble Member of the Senate who has the welfare of the school children at heart, and not the contractors here at heart, that I propose to reduce the limit of cost and make a reasonable appropriation to provide them with some facilities. I yield to the Senator from Virginia.

Mr. GLASS. Mr. President, I have not asked by what right the Senator stands here and advocates any proposition. I may simply remark that the Senator from Mississippi has not a very much higher regard for the estimates which were presented to the subcommittee than the subcommittee itself has, when he proposes to reduce them at least 20 per cent, and as much more as they may be reduced. It is the whole contention of the subcommittee and of the Committee on Appropriations that the estimates are too high. From the information in the possession of the committee they were vastly too high, and the estimates of the Senator from Mississippi are vastly too high, from the information in the possession of the committee.

Mr. HARRISON. I will reduce them.

Mr. GLASS. That is all there is to it.

Mr. McKELLAR. Let me ask the Senator from Virginia a question. If the committee is agreed that these schoolhouses ought to be built, and the sole difficulty is in the cost of the building, why would not some such plan as suggested by the Senator from Mississippi, limiting the cost, be a proper one for us to adopt, if we all agree that the schoolhouses should be built?

Mr. GLASS. Answering the Senator, I do not think the Senate is in possession of enough detailed information to determine just exactly what would be a fair price. The subcommittee referred the estimates back to the commissioners to give us revised estimates. It seems to me that is the proper and usual business proceeding by business men.

Mr. PHIPPS. Mr. President, as I was the one who secured the information which has given rise to this controversy, I think, without occupying much time, just how things stand can be very readily stated.

It seemed to me, in going with other members of the subcommittee on tours of inspection to the various schools, that if we were to entertain a new building program, contemplating the expenditure of large sums of money, exceeding perhaps two or three million dollars, it would be only business precaution to ascertain what other cities of relative size are doing in their school-building programs. Thereupon, I proceeded to obtain from the school authorities of my home city—Denver, Colo.—a record of their expenditures in their present building program, extending over something exceeding a year's time.

We not only had the record of their expenditures but the photographs of the buildings themselves, together with sketches of the elevation and the specifications under which contracts were made. The Senator from Kansas [Mr. CURTIS] has stated how the figures compared with what has been and is being expended in the District for new structures.

It seemed to the subcommittee to be the part of wisdom that action in the matter of appropriating additional money for the erection of buildings should be deferred until there were ascertained from cities of comparable size in the United States the types and forms of structure which are adaptable for their uses, and compare them with the structures that have been in use here, and may be designed for further extensions. By arriving at the relative costs of construction in the various cities——

Mr. HARRISON. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Mississippi?

Mr. PHIPPS. In one moment, if the Senator will permit me to finish my statement.

We had the point in mind that it would be necessary and proper to acquire, without delay, necessary building sites, which could readily be followed by a special bill covering appropriations for school purposes, which could be introduced at any time your committee was satisfied that a proper, economic, substantial building program had been set forward by the Commissioners of the District, perhaps through the board of education, and passed upon by your committee. I now yield to the Senator from Mississippi.

Mr. HARRISON. May I ask were plans and specifications of the buildings proposed to be erected here in the District compared with like buildings in Denver?

Mr. PHIPPS. They have not been as yet, but it is the purpose of the members of the committee to have that done, so that we may know that we are making comparisons on a proper basis.

Mr. HARRISON. The Senator says it was on his statement that this whole program was deferred?

Mr. PHIPPS. No; not at all. It was at my request that certain information was obtained from my home city.

Mr. HARRISON. What information did the Senator get from his home city?

Mr. PHIPPS. That information is, as the Senator from Kansas has stated, that 4-room school buildings there have cost them, in round figures, $35,000. The 8-room buildings have cost about $85,000, as compared with $200,000 in the District.

Mr. HARRISON. When were they built?

Mr. PHIPPS. Within the last 18 months. They cost here from two hundred to two hundred and twenty-three thousand dollars, as compared with $85,000 in Denver.

Mr. HARRISON. Has the Senator investigated whether they are the same character of buildings, as to material, and so forth?

Mr. PHIPPS. That investigation, as I have stated, is under way. It is the purpose of the committee to make it complete and thorough before they accept the statements——

Mr. HARRISON. Buildings down in my State similar to those could have been built for probably $10,000.

Mr. PHIPPS. That might be.

Mr. HARRISON. It seems to me, in passing upon an important proposition like this, the Senate committee ought to have more information than merely the fact the Senator has stated. Simply because in some cities of the United States an 8-room building would cost so much money and here it would cost so much more, and we do not know whether they are the same character of buildings, is not sufficient.

May I ask the Senator from Colorado or the Senator from Kansas, who have sent out telegrams to ascertain what per cubic foot school buildings cost in other cities, if they will read the telegrams and let us know what they contain?

Mr. PHIPPS. They would not disclose all the information we should have.

Mr. HARRISON. They may not, but they will give us some information.

Mr. PHIPPS. On the Senator's statement it might not be on an equal basis. It might not be a thoroughly fireproof construction. A mere comparison of cost per cubic foot does not cover the situation. The plans and the designs must be considered. Not only the cubic capacity, but the manner in which the building is designed has a great bearing on the cost of construction.

Mr. HARRISON. Absolutely.

Mr. PHIPPS. Before taking my seat, I should like to call attention to one fact: Where there is doubt or a discussion as to whether contractors are charging and have been charging proper prices, I would not consider it a businesslike proposition to say we will make it 20 per cent less and they will have to take that or they can not have the contract. I do not believe any per cent, even if we were to say they would have to be satisfied with a cut of 33⅓ per cent or 40 per cent, is a businesslike basis upon which to arrive at a proper cost at which the contract might be let.

Mr. HARRISON. The Senator and myself agree thoroughly that on the information which he has as to the cost of eight-room buildings in Denver and as to the difference in the cost here we could not tell whether they were the same character of buildings, and could not base a really good opinion as to whether it would be advisable to put off the proposition for a certain length of time.

Mr. GLASS. Mr. President, right there may I be permitted to remind the Senator that photographs of buildings in Denver were submitted to the subcommittee, and they seemed to be exceedingly substantial fireproof buildings, of handsome appearance. They were not tinder boxes, of course.

Mr. HARRISON. Does the Senator know whether they were one brick or two, or whether the character of construction is the same?

Mr. GLASS. No. Does the Senator from Mississippi know that they were not substantially built?

Mr. HARRISON. No; I do not, of course.

Mr. PHIPPS. So far as the photographs are concerned, they indicate that the buildings, at least, are substantially the same as those constructed here. So far as design is concerned, I should class them as being preferable and more suitable and adaptable for the purposes of the District.

Mr. HARRISON. The Senators have read telegrams from different cities as to the cost per cubic foot of school buildings that have come in recently?

Mr. PHIPPS. Yes.

Mr. HARRISON. Have they any of those here?

Mr. PHIPPS. I would say to the Senator that if I were going after such information I would not have telegraphed in the way the telegrams were sent in order to secure the information.

Mr. HARRISON. How were the telegrams sent?

Mr. PHIPPS. I did not see the telegrams that were sent. I am judging by the telegraphic replies. They were sent by the District Commissioners, or under their authority.

Mr. HARRISON. Has the Senator those replies in his possession?

Mr. PHIPPS. I saw the replies.

Mr. HARRISON. Has some one connected with the subcommittee those replies?

Mr. CURTIS. No; we have not. They are in the hands of the District Commissioners. I read the replies and stated to the District Commissioners that they did not contain the information we asked them to get. One only was from Denver and the others were from eastern cities.

Mr. HARRISON. The one from Denver stated how much per cubic foot?

Mr. CURTIS. I think 33 cents.

Mr. PHIPPS. Thirty-three per cent.

Mr. HARRISON. I saw those telegrams and specially asked the commissioners to turn them over to the subcommittee, and if the subcommittee did not want them to let me have them. They bore out the statement that Washington contractors are complying approximately with the bids in other cities. I understand the last bid that came in was 39 cents a cubic foot.

Mr. CURTIS. Forty-five cents, I think.

Mr. HARRISON. They ran from 35 cents up; some were 50 cents and I think some 51 cents.

Mr. PHIPPS. Forty-five cents was the amount, according to my recollection.

Mr. HARRISON. I should like to have those telegrams furnished, because I think they are the best information we can get under the circumstances. The only information that I saw was to the effect that the subcommittee had some photographs of school buildings out in Denver, and they did not know the character of the buildings and did not know whether they were constructed like the buildings here or not. It seems to me it is taking a pretty long shot to put off the erection of school buildings in the District for over a year on such a flimsy basis as that.

Mr. PHIPPS. The information was not limited to photographs, but included specifications and blue prints with a written statement of the cost of the various buildings. Deferring an appropriation at this time does not necessarily mean that work on the buildings can not be commenced for another year.

Mr. HARRISON. Why not? We shall not have another District appropriation bill until next December or January.

Mr. PHIPPS. We shall very likely have another bill before next December. We shall probably have an extra session of Congress in the spring, though I have no inside information with regard to that.

Mr. McKELLAR. That involves a question I would like to ask the Senator from Kansas. How long will the school buildings be delayed if the item is not included in the present bill?

Mr. CURTIS. We could put it in any of the deficiency bills if we get the information. We have asked for the information and we expect to get it as soon as we can.

I will state to the Senator from Mississippi and to the Senate that so long as I am a member of the Committee on Appropriations and so long as I am a Member of the Senate I shall never vote for a proposition to pay $300,000 to erect a school building in the city of Washington that is being erected in the city of Denver for $85,000. I shall never vote to authorize an expenditure of $100,000 to build a 4-room building in the city of Washington when it can be built in another city for $35,000.

We went into the question of buildings elsewhere, and so far as the photographs of the Denver buildings are concerned they look like better buildings than are being erected here. They are certainly better arranged in regard to fire protection.

Mr. WALSH of Massachusetts. Will the Senator state when, in his opinion, the cost of construction of buildings will be reduced so that the 65,000 school children here can be properly taken care of?

Mr. CURTIS. There are only about six or seven thousand in need of better school facilities, and of those at least 3,000 are now being taken care of in portable buildings. Of course, the portable buildings ought to be done away with.

Mr. WALSH of Massachusetts. Is it not a fact that for six years there has been a postponement of the construction of the necessary school buildings?

Mr. CURTIS. Oh, no. We have given the commissioners every item they have asked for, and in this bill every estimate put in by the commissioners is taken care of. We are not responsible because the District Commissioners did not make the estimate.

Mr. WALSH of Massachusetts. Do I understand the Senator to say that up to this year the Senate has never hesitated to give money for the erection of buildings asked by the Commissioners of the District?

Mr. CURTIS. Oh, not always, of course.

Mr. WALSH of Massachusetts. Has there not been a postponement because of the excessive cost of buildings?

Mr. CURTIS. That is true.

Mr. WALSH of Massachusetts. And now, upon the recommendation of the Senator, we are to postpone the building-construction program for schools because of the expense?

Mr. CURTIS. No; not at all. We requested the District Commissioners to secure the information for us. The Engineer Commissioner called upon me yesterday with certain telegrams, which I did not think contained the information that they should contain. I did not think it was satisfactory information. They ought to get the plans and specifications and get information based upon those. I authorized the clerk of the committee to turn the plans and specifications over to the Engineer Commissioner, so that he could tell something about what information to ask for. I requested that he get information for the subcommittee just as soon as possible. It is all in the hands of the District Commissioners.

Mr. HARRISON. To follow that course it will take about three months to get the plans and specifications.

Mr. CURTIS. We have the plans and specifications here now.

Mr. HARRISON. Not for the proposed 8-room buildings.

Mr. CURTIS. I can not understand why, when we build an 8-room building at a certain time, we can not a year afterwards build an 8-room building according to the same plans and specifications.

Mr. HARRISON. I agree with the Senator, but they do not do it.

Mr. CURTIS. I know we sent for the Supervising Architect and asked him to make provision so that if Congress did appropriate the money necessary we could commence the buildings at once. The money was appropriated and not a contract was let until December, although we made the appropriations in April or May. Some of the contracts were not let until just a few weeks ago.

Mr. HARRISON. Was it the intention of the Senator to have the architect send to the various cities of the country the plans and specifications upon which the old buildings were erected?

Mr. CURTIS. No; not at all. The object was to have plans and specifications and blue prints for the buildings erected in Denver and from them get up a letter or telegram.

Mr. HARRISON. But the Senator did not have the plans and specifications from Denver.

Mr. CURTIS. I tell the Senator that we did have them, and yesterday I authorized the clerk of the committee to turn them over to the District Commissioners.

Mr. HARRISON. The Senator has just received those?

Mr. CURTIS. Just a day or two ago.

Mr. HARRISON. The Senator does not know how they compare with those of the buildings erected in the District?

Mr. CURTIS. No; we do not. That is what we are trying to find out.

Mr. HARRISON. The Senator knows that we will not have another District appropriation bill until next December, at least.

Mr. CURTIS. The Senator knows that if the demand is great for school buildings, and it is, and if we can get a reasonable bid, we can put the desired appropriation on a deficiency bill, and there will probably be two of them before we get through with the present session of Congress. If there is not an opportunity during this session, there will be an extra session of Congress in March, at which time there will be a deficiency bill and the appropriation can be provided in that measure.

Mr. HARRISON. I know nothing about the bids, and that is why I cut the limit of cost as I did 20 per cent. I would cut it more if it would meet the approval of the committee, so that we could get some buildings started.

I wish to read from the Washington Post of Monday, January 10, an item that appeared touching charges made by the subcommittee with reference to building costs.

Mr. PHIPPS. Did the Senator say "charges"?

Mr. HARRISON. They say there are charges. This is an item that appeared in the Washington Post of last Monday. There have been charges against contractors. They may be true; I do not know. I think they ought to be investigated. The Washington Post said:

Charges voiced in the Senate Friday by Senator CURTIS, chairman of the subcommittee of the Committee on Appropriations, to the effect that local builders were attempting to make excessive profits on school buildings were declared last night by prominent contractors to be without foundation in fact. Among those who said that there is no justification for the charge was Arthur L. Smith, president of the Builders and Manufacturers' Exchange, and Harry Wardman. Col. C. W. Kutz, Engineer Commissioner of the District, expressed the opinion that building costs here are no higher than in other cities of similar size in this section of the country, and said that recent bids indicate decline in prices over those asked a few months ago.

J. Thilman Hendrick, president of the Board of Commissioners of the District, said the commissioners would be glad to investigate local school building costs if the Senate committee desires.

WELCOMES AN INVESTIGATION.

Mr. Smith declared an investigation would be welcomed by the builders, and that if there was an investigation "the Senator would learn something about the true condition of things." He declared that competition for school-building contracts in Washington is especially sharp, and that to his personal knowledge such buildings are constructed on a smaller margin of profit here than in several other near-by cities.

Harry Wardman was emphatic in his declarations that Senator CURTIS's charges were unfounded. When asked regarding Senator CURTIS's statement that in Denver a 4-room building could be erected for $35,000 and a 12-room building for $85,000, while buildings with the same number of rooms in Washington would cost $100,000 and $300,000, respectively, Mr. Wardman declared that "the Senator must be talking about shanties in the first case."

Mr. CURTIS. We can not put it in the RECORD, but here [exhibiting] is a photograph of one of the buildings which the distinguished contractor says is a shanty. Here [exhibiting] is another photograph of a 4-room building.

Mr. HARRISON. They look very fine, indeed.

Mr. CURTIS. There is nothing like it in the city of Washington. The buildings that are being erected here, so far as appearance is concerned, do not compare with the buildings shown in the photographs, and yet they are designated by this contractor as shanties.

Mr. PHIPPS. Mr. President, I should consider that a most unbusinesslike proceeding. The time is not so short but that the commissioners can secure the information which they have been asked to procure in order that proper comparisons may be made and a program may be recommended which the Senate can receive and consider as something that is worthy of attention. I do not feel like voting for any measure which would include appropriations of money when we do not know whether or not they are justified. It seems to me that if the Senator from Mississippi will exercise a little patience and allow the subcommittee's method of working out this problem to be proceeded with, he will be satisfied within a reasonable length of time that proper precautions have been taken and desired results secured without wasting the money of the District and of the Federal Government.

Mr. HARRISON. Patience, Mr. President! Since 1915 there have been but three school buildings erected in this city.

Mr. PHIPPS. Mr. President, I believe we are all aware that building operations were necessarily suspended on account of war activities. It was quite well known to everyone that no adequate building program could be continued during the war period. We are well aware that the money belonging to the District of Columbia which is in the Federal Treasury to-day is there because the needs of the District in the matter of schools were deferred on account of war conditions.

Mr. HARRISON. I realize that.

Mr. PHIPPS. The committee in common with the Senator from Mississippi desire to see that money, which really belongs to the District, properly expended in perfecting and bringing up to date the school system of the District. The only difference between the Senator from Mississippi and the committee, as I see it, is that the Senator from Mississippi is unwilling to wait until it can be demonstrated whether or not the contracts which could be made at this time for a proper type of building can be entered into at reasonable cost and on a basis comparable with that on which other cities pay for their school buildings of the same class and type.

Mr. HARRISON. The Senator from Colorado asked me to show some patience and I cited him a circumstance evidencing how patient we have been. The number of pupils enrolled in the schools of the District has increased since 1915 from 59,000 to 65,000, an increase of 6,000; three school buildings have been finished in that time embracing 16 rooms, I think. Of course, there are some other buildings now being constructed.

Congress, may I say, has not been wholly to blame about this matter. Conditions arose which caused the Commissioners of the District to come back and ask for increased appropriations; and a great many of the buildings have been held up on that account.

Mr. CURTIS. I wish to ask the Senator if it is not true that we made the appropriations, but the buildings could not be erected for the money provided, and so the money was allowed to go back into the Treasury; and the next year we increased the appropriations for the purpose?

Mr. HARRISON. That is absolutely true. In several instances Congress made the initial appropriations and bids were called for, but could not be obtained within the limit of cost. Other appropriations were then asked for and Congress granted them. In several instances the school authorities came back two or three times and asked for increased appropriations on account of increased costs. Now, however, when materials are declining in cost—and we all recognize they are declining—and when the price of labor is declining, we can erect such buildings for less cost than for some years past. In four or five months perhaps we shall be able to erect them cheaper than we can erect them now; but, in my opinion, if construction were authorized now, it would be at least four months before bids would be received.

However, I did not finish reading the statement relative to the contractor's costs.

Figures in the possession of Snowden Ashford—

Says the article published last Monday—

municipal architect, comparing the costs of school building construction in New York and Washington show local prices to be 18½ cents per cubic foot lower.

Has the committee made investigation as to the statement that the cost is 18½ cents lower per cubic foot here than in New York City? Of course, I am not unmindful of the graft that has been perpetrated upon the people in New York City through the combines and conspiracies of the material men and others interested in building construction there.

Mr. CURTIS. In answer to the question of the Senator from Mississippi, I will state that immediately upon the information coming to us we requested the District Commissioners to obtain the correct facts.

Mr. HARRISON. The question of the need of school buildings here has been pending a long while, for at least two years, since the armistice. It is unfortunate that information did not come to the subcommittee at the particular time when they were about to report an appropriation bill which could have provided the necessary buildings. The article continues:

Bids opened in November for buildings to be constructed in New York called for a minimum of 57½ cents per cubic foot, while bids opened in Washington in December called for the construction of the same type of building at a minimum of 39 cents.

Do Senators know whether or not that statement is correct?

Mr. CURTIS. I will state that one of the Commissioners of the District told me the other day that the bids here were for 45 cents.

Mr. GLASS. Does the Senator from Mississippi know that the statement he has quoted is true?

Mr. HARRISON. I know that one of the District Commissioners told me that the last bids which came for buildings for public schools were at the rate of 39 cents per cubic foot.

Mr. GLASS. Our information is, as already indicated, that the cost of building here is very much higher than in any other part of the country. Our information is further that the combine as to all building material which was disclosed in New York was not confined to the precincts of New York City but extended throughout the entire country east of the Mississippi River.

Mr. HARRISON. I hope all those connected with the combine will be placed in jail.

Mr. WARREN. Will the Senator from Mississippi permit me to make a remark or two at this time?

Mr. HARRISON. I yield to the Senator.

Mr. WARREN. It seems to me that we ought to consider this question from a little different angle in addition to that from which it is being considered. The committee has reported a measure which enters upon new ground in a new field. Of the large surplus to the credit of the District we are proposing to appropriate something like one-half to buy property on which to erect school buildings. That will be about as much as we can hope to succeed in accomplishing at this time without forcing the issue of erecting thereon the necessary school buildings until, as has been stated by my colleagues on the committee, we have some further information.

As has also been stated, it is a matter which can be very readily disposed of when we have the information. Even if we can succeed in the Senate in the move which we have made, the new matter being incorporated as a Senate amendment amounting to over $2,000,000 will have to go back to the House of Representatives and probably directly to the conference committee, and I very much fear that, even if we had the desired information as to construction costs, and should make provision for the buildings at this time, we should have considerable difficulty in getting the matter through to a finality. I suppose the Senator is interested, as I am, in the success of these matters. I think that expediency as well as economy will best be subserved by leaving the amendment as it is without trying to accomplish too much; and then in the forthcoming extra session quite probably we shall be able to move further along.

Mr. HARRISON. I can not see how, by putting off the erection of buildings, we are going to secure any additional housing relief for the school children of the District.

Mr. WARREN. The Senator can see, then, that we might strike it all out——

Mr. HARRISON. Strike what out?

Mr. WARREN. The proposed amendment.

Mr. HARRISON. There is no amendment proposed to the committee amendment now. I have not formally offered the amendment I have in mind.

Mr. WARREN. The whole provision reported by the committee is an addition to the House bill.

Mr. HARRISON. If the judgment of the Senate is to strike it out, if they have so little interest in the District of Columbia as to strike it out, they can certainly do so, but I am for retaining it.

Mr. WARREN. The committee has put it before the Senate, but if the Senate desires to strike it out we shall have to submit.

Mr. HARRISON. I have no desire to strike it out; I want it incorporated in the bill.

Mr. WARREN. I am afraid the Senator, however, will so overload it that it will be impossible to carry it through.

Mr. HARRISON. That is a matter which each Senator in his own conscience must determine.

Mr. WARREN. Undoubtedly, but there has not been presented at this time a list of buildings to be erected.

Mr. HARRISON. On the sites, the purchase of which the committee has recommended, I am proposing to erect buildings immediately by reducing the estimates that were given by the District Commissioners 20 per cent as a minimum cost.

Mr. WARREN. In the meantime, in my judgment, the Senator is more likely to wreck the entire attempt.

Mr. HARRISON. In that connection, may I say to the Senator from Wyoming [Mr. WARREN], and also the Senator from Colorado [Mr. PHIPPS], who asked me to show some patience about this matter, that I am interested in it no more than is any other Senator, but I have tried to study the problem, and I hope that I can help solve it to some extent. I am giving the Senate the information which has come to me from the study of the question.

To eliminate the portable schoolhouses we need 73 additional schoolrooms in this city. We have over 150 such portable buildings of temporary construction to take care of the children. We have rented quarters for which we are paying approximately $15,000, in which to teach children. I could read a list of those quarters to the Senate.

Mr. CURTIS. Mr. President, if I may interrupt the Senator, I think he is mistaken. Only 78 portable school buildings are now in use in the District.

Mr. HARRISON. I think the Senator from Kansas is mistaken.

Mr. CURTIS. I quote from page 328 of the hearings before the House committee, as follows:

Mr. SISSON. May I ask there to what extent you are using these portable buildings now?

Dr. BALLOU. Completely, so far as I know. There is one possible exception to that, but that one, if it is not needed where it is now, is needed badly elsewhere. Every one of the 78 portables is now in use.

Mr. HARRISON. That is correct; I beg the Senator's pardon. The number of additional classrooms needed to take care of the children housed in portable buildings is 73. Fourteen additional classrooms are needed to take care of the children now occupying rented quarters, for which we are paying approximately $15,000 each year. Twenty-one classrooms are needed to take care of the children now being taught in undesirable rooms, for, as disclosed by the hearings, there are children in Washington going to school in the washrooms and similar places in the basements of school buildings.

Mr. McKELLAR. How much do the portable buildings cost?

Mr. HARRISON. They are erected at a very small cost; I do not recall the exact amount of the cost of the portable buildings, but it is not very much, for they are made out of wood and are of temporary construction. They can be rolled from one place to another, so that when there is congestion at one building a portable house may be moved there, and when the congestion is relieved it can be moved somewhere else.

Fifty-seven classrooms are needed to enable the school authorities to reduce to 40 the number of pupils in a class. In many schools in the District the hearings disclosed the fact that there are from 50 to 55 children in a class. Such a situation should not be allowed to exist; we certainly ought to do something to relieve that condition; but, worse than all, some of the children in the city of Washington are being taught for only half a day, there being a double-shift arrangement, so to speak. Children go to a school building in the morning, are taught for three or three and a half or four hours, and are then sent home, and another group of children brought into the same building, thus using one building to take care of two sets of pupils a day. That is a horrible situation, and that it should continue to exist is an indictment against the whole District government. Little children are prevented from getting a proper amount of schooling and are only permitted to go to school for half a day, when under all circumstances—I do not care if it should cost twice as much as it ought to cost—we should make it possible for a child in the District of Columbia to be placed upon an equal

footing with children of the States and Territories and be allowed to go to school at least for a full day, if his parents so desire. Eighteen schoolrooms, at least, are needed to take care of the double shift.

But I must return to the original proposition. I have not finished reading from the article in the Washington Post of last Monday about the increased cost of erecting school buildings here.

Mr. SMITH of Maryland. Who is the author of the article from which the Senator has been reading?

Mr. HARRISON. The paper is a very reputable one, of which Mr. McLean, one of the chief political advisers of the country to-day, is editor and owner. I do not know whether or not it is an Associated Press article, but it is printed in large type.

Mr. SMITH of Maryland. The proposal advocated is a very popular one in Washington, of course.

Mr. HARRISON. I do not know who wrote the article.

Mr. Ashford explained that normally local costs should be slightly higher, because the New York buildings are commonly either four or five stories high, while local schools are limited to two stories. The latest available report of P. P. Claxton, Commissioner of Education, showed local school building costs to be lower than in New York, Boston, St. Louis, Detroit, Denver, and a number of other cities.

The 4-room addition to the Deanwood School, recently completed, cost $48,000, Mr. Ashford said. This is the lowest price for similar buildings since 1917.

I shall not oppose the last amendment that the Secretary read, but at the proper time I shall try to have my amendment incorporated in the bill.

Mr. McKELLAR. Mr. President, before we dispose of the amendment at the top of page 106, I should like to ask the chairman of the committee what is the necessity for that expenditure of $400,000 at this time? I see that it is for a site for stables, store yards, storehouses, and shops to take the place of stable, store yards, storehouses, and shops now located within the lines of Canal Street, and so forth.

Mr. CURTIS. It is in order that these various agencies may be located on the railroad. They are now scattered all over the District of Columbia, and they are on leased ground. The Government owns a small amount of land near the place where it is desired to purchase this site, and by erecting these structures there all of these agencies can be brought up right next to the railroad.

Mr. McKELLAR. Will there be any saving about it?

Mr. CURTIS. A very considerable saving; yes; not only in rent but in everything else.

Mr. McKELLAR. Is the plant at Canal Street between South Capitol Street and Delaware Avenue SW. wholly a rented plant?

Mr. CURTIS. I think nearly all of it is rented. We own just a very small tract of land next to the railroad.

Mr. McKELLAR. The site that I suggested was the site of the old plant.

Mr. CURTIS. They say they spend $17,000 a year in hauling to the plant alone, which would be saved.

Mr. McKELLAR. The purpose of my question is this: At a time like this, when we need to economize, if the city already has a plant such as the one suggested in this amendment, it seems to me it would be very unwise to go into a further expenditure of this kind.

Mr. CURTIS. What the city owns is very small, and at present these different agencies are scattered all over the District. The idea is to put them together, next to the railroad, so as to save the expense of hauling, among other things, and to have all of the agencies in one location.

Mr. McKELLAR. The Senator is satisfied that this will mean a retrenchment and a saving?

Mr. CURTIS. That is our purpose in asking for it. We have asked for nothing in this bill except such items as would save money.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee at the top of page 106.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 106, after line 12, to insert:

PLAYGROUNDS.

Swimming pools: For the construction of two swimming pools, shower baths, appurtenances, and equipment on sites to be selected by the commissioners, $12,500 each, $25,000.

The amendment was agreed to.

The next amendment was, on page 106, after line 16, to insert:

Columbia Heights Playgrounds: For the purchase or condemnation of ground to take the place of the present site of Columbia Heights Playground, $50,000.

The amendment was agreed to.

The next amendment was, on page 106, after line 19, to insert:

Gallinger Playground: For the purchase or condemnation of ground to take the place of Gallinger Playground, $15,000.

The amendment was agreed to.

The next amendment was, on page 106, after line 22, to insert:

Park View Playground: For the purchase or condemnation of ground to take the place of the present site of Park View Playground, $32,000.

Mr. CURTIS. I ask to have that amendment rejected. It is in another part of the bill.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The next amendment of the Committee on Appropriations was, at the top of page 107, to insert:

Logan Playground: For the purchase or condemnation of ground to take the place of Logan Playground, $17,000.

Mr. CURTIS. I ask to have that amendment also rejected, for the same reason. It is in another part of the bill.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment was, on page 107, after line 2, to insert:

Rose Park Playground: For the purchase or condemnation of ground to take the place of Rose Park Playground, $5,000.

The amendment was agreed to.

The next amendment was, on page 107, after line 5, to insert:

ELECTRICAL DEPARTMENT.

For substitution of electric street lighting for gas lighting, including the purchase and installation of lamp-posts, street designations, fixtures, lanterns, and all other necessary expenses in connection therewith, $50,000.

The amendment was agreed to.

The next amendment was, on page 107, after line 10, to insert:

TUBERCULOSIS HOSPITAL.

For the erection of a nurses' home, $50,000.

The amendment was agreed to.

The next amendment was, on page 107, after line 12, to insert:

PARKS.

The Commissioners of the District of Columbia are hereby authorized to acquire by condemnation under the provisions of law governing the acquisition of public parks as contained in the District of Columbia appropriation act for the fiscal year ending June 30, 1913, approved June 26, 1912, the following tracts of land for park and playground purposes at a total cost not to exceed $1,500,000, and there is hereby appropriated toward the acquisition of one or more of said tracts the sum of $1,000,000.

The amendment was agreed to.

The next amendment was, on page 107, after line 22, to insert:

The tracts of land known as Klingle Road Valley Park, containing about 17.21 acres, and the Piney Branch Valley Park, containing about 10.55 acres, shown on a map filed in the office of the surveyor of the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 108, after line 3, to insert:

The Dean tract, known as lots A818 and 819, in square 2535, containing about 9¼ acres, and the Patterson tract, known as parcel 219/2, containing about 81.76 acres.

The amendment was agreed to.

The next amendment was, on page 108, after line 8, to insert:

The commissioners are further authorized to reduce the area to be acquired in any of said tracts where, by reason of improvements constructed or unreasonable prices asked, or for other reasons in their judgment the public interests may require, and the amounts hereinbefore authorized to cover the cost of said tracts shall be reduced in proportion to the present value of the areas so reduced.

The amendment was agreed to.

The next amendment was, on page 108, after line 15, to insert:

SITE FOR BUILDING FOR FEEBLE-MINDED.

The Commissioners of the District of Columbia are authorized and directed to purchase as a site for a home and school for feeble-minded persons a tract of land containing approximately 1,000 acres in the District of Columbia, or in the State of Maryland, or in the State of Virginia, and the sum of $40,000 is hereby appropriated for said purpose. In the event that such land can not be purchased within the District of Columbia at a price satisfactory to said commissioners, they are authorized to acquire same by condemnation under the provisions of chapter 15 of the Code of Laws for the District of Columbia. In the event that such land can not be acquired within the District of Columbia, in the judgment of said commissioners, at a price satisfactory to said commissioners, either by purchase or condemnation, the Attorney General of the United States, at the request of said commissioners, shall institute condemnation proceedings to acquire such land as may be selected for said site, either in the State of Maryland or in the State of Virginia, in accordance with the laws of said States, the title of said land to be taken directly to and in the name of the United States, but the land so acquired shall be under the jurisdiction of the Commissioners of the District of Columbia as agents of the United States, and the expenses of procuring evidences of title or of condemnation, or both, shall be paid out of the appropriation herein made for the purchase of said site.

The amendment was agreed to.

The next amendment was, on page 109, after line 17, to insert:

SITE FOR BUILDING FOR INDUSTRIAL HOME SCHOOL.

The Commissioners of the District of Columbia are hereby authorized and directed to purchase as a site for a new Industrial Home School a tract of land containing not less than 200 acres in the District of Columbia, and for that purpose the sum of $50,000 is hereby appropriated, or if unable to acquire said tract of land in the District of Columbia, then they may acquire the same in the State of Maryland or in the State of Virginia, and for the purpose of acquiring such tract of land in either of said States not exceeding $20,000 of the $50,000 appropriated herein shall be expended therefor. In the event that such land can not be purchased within the District of Columbia at a price satisfactory to said commissioners, they are authorized to acquire same by condemnation under the provisions of chapter 15 of the Code of Laws for the District of Columbia. In the event that such land can not be acquired within the District of Columbia, in the judgment of said commissioners, at a price satisfactory to said commissioners, either by purchase or condemnation, the Commissioners of the District of Columbia are authorized to acquire, by purchase or condemnation, such tract of land containing not less than 200 acres in the State of Maryland or in the State of Virginia, and if they are unable to acquire such tract of land by purchase at a price satisfactory to them, the Attorney General of the United States, at the request of said commissioners, shall institute condemnation proceedings to acquire such land as may be selected for said site, either in the State of Maryland or in the State of Virginia, in accordance with the laws of said States, the title of said land to be taken directly to and in the name of the United States, but the land so acquired shall be under the jurisdiction of the Commissioners of the District of Columbia, as agents of the United States, for the purpose of erecting thereon a building or buildings and appurtenances for said Industrial Home School, and the expenses of procuring evidences of title of condemnation, or both, shall be paid out of the appropriation herein made for the purchase of said site.

In all, $2,276,500.

The amendment was agreed to.

The reading of the bill was concluded.

Mr. CURTIS. Mr. President, two committee amendments were passed over.

The VICE PRESIDENT. The amendments passed over will be stated.

The ASSISTANT SECRETARY. The first amendment passed over is in line 7, page 21. The item reads:

For purchase of metal identification number tags for horse-drawn vehicles used for business purposes and motor vehicles in the District of Columbia, $15,000.

The committee proposes to strike out "$15,000," and to insert in lieu thereof "$17,500."

Mr. CURTIS. Mr. President, I desire to call the attention of the Senator from Mississippi to the first amendment that was passed over at his request.

Mr. HARRISON. That is the amendment touching the automobile tags?

Mr. CURTIS. The amendment offered by the Senator.

Mr. HARRISON. Is the Senator going to insist on the point of order?

Mr. CURTIS. I insist on the point of order. I was instructed to do so by the committee. I will say that I am in sympathy with the Senator's amendment, and would like to have it adopted; but I was instructed by the committee to make the point of order on all legislation, and I feel it my duty to do so.

Mr. HARRISON. In that event, I guess I can not proceed any further.

The VICE PRESIDENT. The point of order is sustained.

The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment passed over is, on page 53, after line 8, where the committee proposes to insert the following paragraph:

For payment of necessary expenses connected with the organization and conducting of community forums and civic centers in school buildings, including equipment, fixtures, and supplies for lighting and equipping the buildings, payment of janitor service, secretaries, teachers, organizers, and clerks, and employees of the day schools may also be employees of the community forums and civic centers, including maintenance of automobile, $25,000: *Provided*, That not more than 60 per cent of this sum shall be expended for payment of secretaries, teachers, organizers, and clerks.

The VICE PRESIDENT. The amendment was passed over at the instance of the Senator from Iowa [Mr. KENYON].

Mr. CURTIS. I understand that he has left the city. I should like to get the bill through to-night.

Mr. WALSH of Massachusetts. The junior Senator from Utah [Mr. KING] was interested in that amendment.

Mr. CURTIS. I should like to submit the matter to the junior Senator from Utah, who, I understand, is engaged in the rear of the Senate Chamber.

Mr. HARRISON. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Capper	Glass	Harrison	Jones, N. Mex.
Curtis	Hale	Heflin	Kellogg
Dial	Harris	Johnson, Calif.	King
Knox	Page	Smith, Md.	Townsend
La Follette	Phelan	Smoot	Trammell
McKellar	Phipps	Spencer	Wadsworth
McNary	Poindexter	Sterling	Walsh, Mass.
Moses	Sheppard	Sutherland	Warren
New	Simmons	Swanson	Williams

Mr. TRAMMELL. I desire to announce the absence of my colleague, the senior Senator from Florida [Mr. FLETCHER], on official business in connection with the Commerce Committee.

Mr. HARRISON. I desire to announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Missouri [Mr. REED] on account of illness; and also the absence of the Senator from Nevada [Mr. PITTMAN] and the Senator from North Carolina [Mr. OVERMAN] on official business.

The VICE PRESIDENT. Thirty-six Senators have answered to the roll call. There is not a quorum present.

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 45 minutes p. m.) the Senate adjourned until Monday, January 17, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

SATURDAY, *January 15, 1921.*

The House met at 12 o'clock noon.

The Rev. Thomas J. Marshall, of the Georgetown Presbyterian Church, offered the following prayer:

Almighty God, we come unto Thee as unto the God of nations. Thou doest Thy will in the armies of heaven and among the inhabitants of the earth. Grant Thy blessing, we beseech Thee, upon this land which we love. Grant that we may know the blessedness of that people whose God is the Lord. Grant Thy grace unto Thy servant, the President of the United States; endow him with bodily health and strength of soul. Especially do we pray for Thy blessing upon the House of Representatives now in session. May each man be a man after Thine own heart. Illumine each mind by Thy holy Spirit, that the problems and duties of the day may be met with fullness of vision and with the sense of the eternal.

Bless all nations; look with especial mercy on those lands where still there is strife and distress. Dedicate us as a people to Thy service and to the service of humanity. Enable us to find and to fulfill our part in bringing that time when the Kingdom of God shall come and when there shall be in truth peace on earth and good will toward men. And the glory shall be Thine, both now and forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

INDIAN APPROPRIATION BILL.

Mr. ELSTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15682, the Indian appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Indian appropriation bill, with Mr. FESS in the chair.

The Clerk reported the title of the bill and read as follows:

IRRIGATION OF INDIAN RESERVATION, REIMBURSABLE.

For the construction, repair, and maintenance of irrigation systems, and for purchase or rental of irrigation tools and appliances, water rights, ditches, and lands necessary for irrigation purposes for Indian reservations and allotments; for operation of irrigation systems or appurtenances thereto when no other funds are applicable or available for the purpose; for drainage and protection of irrigable lands from damage by floods or loss of water rights upon the Indian irrigation projects named below:

Mr. GARD. Mr. Chairman, reserving the point of order against the paragraph contained between lines 18, on page 2, and 2, on page 3, do I understand that all these projects are reimbursable?

Mr. ELSTON. That is the requirement of law, and I understand that the Secretary of the Interior has issued regulations to obtain reimbursement.

Mr. GARD. Are there any new projects here? I see that it provides for the construction of irrigation systems. Which are the irrigations systems to be constructed and which are the ones to be maintained?

Mr. ELSTON. There are no irrigation projects mentioned in this subhead that are new projects, according to my understanding. These are, as I recall, small irrigation projects scattered throughout the various Indian reservations, which are now in progress.

Mr. GARD. Is the word "construction" used only for the continuance of existing projects or does it mean the building of new ones?

Mr. ELSTON. I understand that it is used merely to authorize the continuance of existing projects and that it is not to authorize the establishment of new projects.

Mr. GARD. And all these projects are reimbursable?

Mr. ELSTON. That is the law.

Mr. GARD. I withdraw the reservation of the point of order.

The Clerk read as follows:

Irrigation district 4: Ak Chin Reservation, Ariz., $4,000; Coachella Valley pumping plants, California, $11,000; Morongo Reservation, Calif., $8,000; Pala Reservation and Rincon Reservation, Calif., $2,500; miscellaneous projects, $10,000; total, $35,500.

Mr. GARD. Mr. Chairman, I move to strike out the last word. What is the meaning of the phrase "miscellaneous projects" for which an appropriation of $10,000 is made?

Mr. ELSTON. That is an omnibus sum to be spread over very small projects scattered throughout various Indian settlements in California. The gentleman understands that in California, although it has an Indian population exceeded by only four other States, there are no large reservations of any kind, and the Indians live mostly in scattered settlements. What little provision is made for the Indians in California is principally made in this distributed way. These projects covered by this omnibus sum of $10,000 comprise wells, little take-off ditches, and small enterprises that could not be called projects at all.

Mr. GARD. I notice that all of the Indian reservation districts are for California, comprised in lines 10, 11, 12, 13, and 14, and I am wondering whether the phrase "miscellaneous projects" applies to California or to any other State.

Mr. ELSTON. They apply to the projects designated, comprised under irrigation district 4, which includes a part of Arizona, but the testimony showed that most of this money or the whole of it is to be expended in California.

Mr. GARD. Does not the gentleman think that the legislation would be better expressed if the appropriation were made directly; for a certain use, rather than for so-called miscellaneous projects?

Mr. ELSTON. I do not. I think it can best be expressed as it is in the bill by reason of the physical conditions in California and the distribution of the Indians there. I see no other way to provide for these scattered Indian settlements than by authorizing the department to expend the money under a rather inclusive authorization of this kind.

Mr. GARD. Under this lump-sum appropriation, which is what it would be without any special designation, is there any way of tracing the expenditures?

Mr. ELSTON. The department makes an account of all moneys expended under this particular item, and that is rendered to the committee as a past transaction in justification of its request for future appropriations.

Mr. HAYDEN. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. HAYDEN. Until about two years ago this entire appropriation for irrigation on various reservations was carried as one lump sum, aggregating about $175,000 to $200,000. The Committee on Indian Affairs, in order to give the House information, divided the appropriation into various items under the different Indian irrigation districts, but we did not think it necessary to enumerate all the small details on all the minor projects. Irrigation district No 4 includes southern Arizona and southern California, and in southern California, as the gentleman in charge of the bill has stated, there are a number of small Indian bands located in scattered settlements which must be provided for in this manner. It is money very well spent; this appropriation is thoroughly justified. I am sure that the House would not want to make detailed appropriation of three or four hundred dollars at this place and $500 at another.

Inasmuch as the Committee on Indian Affairs voluntarily changed this item from a lump-sum appropriation for all the service which could be expended anywhere and have given the details of the more important instances, I am sure that this small sum for miscellaneous projects should be retained.

Mr. GARD. This action was taken by the old Committee on Indian Affairs, which, of course, was a combined committee of legislation and appropriation and was the result of their best thought as to how the appropriation should be expressed?

Mr. HAYDEN. Exactly so.

Mr. GARD. I think the action of the Committee on Indian Affairs in separating the different items rather than carrying them all in one project is to be commended.

The CHAIRMAN. The pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

SUPPRESSING LIQUOR TRAFFIC.

For the suppression of the traffic in intoxicating liquors among Indians, $20,000.

Mr. SNYDER. Mr. Chairman, I make a point of order that there is no authority in law for the item.

Mr. BLANTON. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. Will the gentleman from New York state his point of order?

Mr. SNYDER. There is no authority in law for the item.

Mr. BLANTON. Mr. Chairman, as is well known, the Volstead Act is to enforce that provision of the Federal Constitution which prevents the manufacture and sale of intoxicating liquor. The constitutional provision prevents liquor from being either manufactured or sold anywhere in the United States. It prevents traffic among the Indians and on Indian reservations just the same as it does elsewhere in the United States. Its provisions are just as applicable to Indians and to Indian reservations as to the rest of the population of the United States. It is authority of law for any appropriation dealing with the prevention of the manufacture or sale of liquor. That provision could well and properly go into any appropriation bill and still be in order when put in by a committee, because of the substantive law in the Volstead Act. And therefore I take it that the point of order by the gentleman from New York is not well taken.

Mr. SNYDER. Mr. Chairman, all I desire to say in reply to the gentleman from Texas is that there is no authority in law for this item on the Indian appropriation bill. It is an item that has been carried for several years in certain amounts in the Indian appropriation bill, put in without any authority of law in that measure.

Mr. BLANTON. I call attention in that connection, if the Chair will permit, that this very point was thrashed out during the consideration of the Indian bill last year, and the Chair will remember after the decision of the point of order that a very exhaustive discussion of the subject was made by the gentleman from Virginia, Mr. Saunders, who was one of the best parliamentarians, in my judgment, who has been in this House since I have been here, and upon his initiative the appropriation was retained in the Indian bill of last year rather than knocked out or diminished.

Mr. HASTINGS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Oklahoma rise?

Mr. HASTINGS. I desire to discuss the point of order for a moment. If the Chair, however, is ready to rule, I will defer. But I desire to call the attention of the Chair to the fact that this appropriation, or a similar appropriation, has been carried in this bill for a number of years, running back as far as 1912, when the appropriation was $75,000, and for a number of years, between 1914 and 1920, when the appropriation was $100,000 to $150,000. The appropriation for last year for this purpose was $65,000, and the estimates of the department for this year were for $65,000. After very careful consideration of this item by the committee, and in view of the fact that a large appropriation would be made in the legislative appropriation bill for the enforcement of the Volstead Act, we came to the conclusion that perhaps this amount could well be reduced.

Mr. SNYDER. Will the gentleman yield.

The CHAIRMAN. Does the gentleman yield?

Mr. HASTINGS. I do.

Mr. SNYDER. There is no desire on the part of myself to interfere with the Volstead Act. The point I make is that there is no authority in law for this item on the Indian appropriation bill. It is legislation, and as such should pass through the legislative committee for an authorization.

Mr. BLANTON. Will the gentleman permit me to suggest——

Mr. HASTINGS. I do not yield any further just now. I want to say it was the thought of the committee, Mr. Chairman, that certain employees, or certain people interested in the Indians, might go among the Indian tribes and render additional assistance in the enforcement of this act. Now, everybody appreciates—and we have appreciated from the foundation of this Government—how very necessary it was to enforce prohibition among the Indian tribes. I regret exceedingly that the chairman of the committee, who was chairman last year and who permitted a similar item for $65,000 to go into the bill, should raise a point of order to this item this year, and particularly in view of the fact that the same item has been carried in this bill for quite a number of years.

Mr. SNYDER. Will the gentleman yield?

Mr. HASTINGS. I do.

Mr. SNYDER. The chairman is making no point against the merits of the proposition; he is simply trying to get a ruling upon the question whether or not an item that has no authority of law can be put into this bill by the Committee on Appropriations without legislation.

Mr. BLANTON. Will the gentleman yield?

Mr. HASTINGS. I will yield.

Mr. BLANTON. In reply to——

Mr. ELSTON. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. ELSTON. I wish to address myself to this point of order.

The CHAIRMAN. The Chair is ready to rule. The point of order made by the gentleman from New York [Mr. SNYDER] to lines 17 and 18 is on the basis that there is no authority of law for this item to be carried on an appropriation bill. It has been cited that similar items have been carried in past appropriation bills, that some of those items have been objected to on a point of order and at other times had not been objected to, but the Chair finds that the authority herein exercised is found in Thirty-fourth Statutes at Large, page 1017, and Thirty-seventh Statutes at Large, page 519, which gives or confers upon the chief special officer for the suppression of liquor traffic among the Indians and duly authorized officers working under his supervision whose appointments are made or affirmed by the Commissioner of Indian Affairs and the Secretary of the Interior. The authority seems to be specifically granted here. Therefore the Chair overrules the point of order. The Clerk will read.

Mr. PARRISH. Mr. Chairman, I wish to offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. PARRISH offers the following amendment: Page 5, line 18, strike out the period, insert a semicolon, and add the following: "*Provided*, That this appropriation shall be expended under the direction of the Secretary of the Treasury."

Mr. ELSTON. Mr. Chairman, I make the point of order on the amendment that it changes existing law.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PARRISH. Mr. Chairman, I simply offered this amendment in order that all the prohibition enforcement of the laws and the money expended will be under the Secretary of the Treasury. That is all I care to say.

Mr. TILLMAN. Mr. Chairman, on page 5, line 18, I move to strike out "$20,000" and insert "$50,000."

The CHAIRMAN. The gentleman from Arkansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. TILLMAN: Page 5, line 18, strike out "$20,000" and insert in lieu thereof "$50,000."

Mr. TILLMAN. Now, Mr. Chairman, in advocacy of the amendment offered by myself, I desire to say that the Indian Bureau is very earnest in its support of all congressional enactments against the sale of liquor to Indians. It is decidedly important, in my judgment, to see that the sale of liquor is suppressed among the Indians, a work more difficult, and, some think, more important than when applying to white people.

The bureau officials have made a very excellent record in enforcing this provision. I call attention to the fact that last year in the general appropriation bill the sum of $65,000 was appropriated for the purpose of suppressing the liquor traffic among the Indians. In 1918, prior to national prohibition, and with an appropriation of $150,000, there were instituted 2,100 new cases against persons for selling liquor to Indians in contravention of law. For the fiscal year 1920, with national prohibition, with an appropriation of $100,000, there were taken up 1,125 new cases. The fines assessed—and this is the point I want to call attention to especially—the fines assessed, plus the sum actually received by the Federal courts from the sale of liquor-transporting automobiles seized and libeled under the law for the fiscal year 1919, totaled $94,129.

For the first three months of this fiscal year, under the appropriation of but $65,000 for this work, there have been instituted 541 new cases and fines assessed of between $15,000 and $20,000. This record clearly indicates a situation such as to justify the need of an appropriation larger than the one the committee has recommended.

Now, Mr. Chairman, the field is a wide one. There is scarcely a State in the Union where there are not Indians. Most Indians who drink whisky, good or bad, are ruined in a short time. Many Indians live on the Canadian border, and Canada is still wet; many of them live on the Mexican border, and Mexico is not as yet very dry. It is important, it seems to me, to have a larger appropriation, and hence I have offered an amendment that the $20,000 be stricken out and $50,000 be inserted. That is still $15,000 below what the bureau recommended, after carefully considering the matter.

The force whose duty it is to put down the illicit traffic in intoxicants among our Indian wards are competent, watchful, and deserve much praise for the efficient service they have rendered in this difficult field of activity. We should encourage this force and make more certain the early destruction of this nefarious traffic by substantially increasing this item.

Mr. ELSTON. Mr. Chairman, the committee in deciding upon the amount carried in this bill for the item mentioned had no unfriendly feeling toward enforcing the laws against suppressing the liquor traffic in the Indian country. Last year the appropriation was reduced by a substantial amount, and would have been reduced in a larger degree if it had not appeared that the enforcement of the Volstead Act had not yet come into full play. Now we are informed that the organization under the enforcement measures is in operating order, and it would be senseless to make large appropriations when another bureau of this Government is charged with the duty of enforcing the laws all over the country. It is obvious they will have their agents in every State, in the Indian country as well as where the whites reside. It would be an obvious duplication to continue the appropriation in the figures that were carried last year. In providing $20,000 we believed that we could keep a compact unit in the Indian Bureau of the old enforcement officers and provide cooperation between the Volstead organization and the Indian Bureau organization, and insure a nucleus in the Indian Bureau for directing and aiding the efforts of the Volstead enforcement officers. I think the committee has acted wisely, and I believe the item should stand as written in the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas [Mr. TILLMAN].

Mr. GARD. Mr. Chairman, I rise in opposition to the amendment. I do not speak in criticism of the amendment of the gentleman from Arkansas [Mr. TILLMAN] as to the amount necessary for this appropriation, except in so far as I view some of the statements that have been made regarding the appropriations for this purpose generally. The gentleman from Arkansas has said that he deemed the enforcement of this law prohibiting the traffic in intoxicating liquors of more importance among the Indians than among the white men. Just why that particular difference may be justified in the law I confess I do not know. And I do not believe there can be any legal justification of any such reason, but it would appear from what the gentleman in charge of the legislative, executive, and judicial appropriation bill has said that this course is now in fact being followed.

Mr. TILLMAN. Will the gentleman yield?

Mr. GARD. In a moment, when I have finished.

Now, there is another very insidious entering wedge in these appropriations. It has been repeated here, after we have heard it yesterday and other days, on the big legislative, executive, and judicial appropriation bill, and that is where courts assess fines and fines are paid, and they happen to be, as the gentleman from Arkansas said, in the amount of $90,000, that is offered as a justification of why the expenses of the administration of the law should at least amount to the same as the fines which are collected. Now, that is a rather unique theory in the process of finding out the amount which public servants are to be entitled to, because if we are to adopt the plan that we are to make the cost of the administration of these liquor laws exactly as much as the fines which are collected and the number of automobiles sold, and things of that kind, then we are embarking upon a decidedly new turn.

Now, I am in favor of enforcing the law—all the laws on the statute books—and of reporting the means necessary to do that, but I do call the attention of the membership of the committee to these projects which are creeping in. And I agree with the proposition of the gentleman from Texas [Mr. PARRISH] that all these liquor propositions should be enforced under one head.

That is where they belong, either under the Treasury Department or under the Department of Justice, whichever Congress sees fit. But clearly there should not be one appropriation here and another appropriation there, nor should we enter upon the theory of appropriating to cover up and make the appropriations as large as the fines and penalties which are assessed. That is the point which I desired to call attention to immediately, because I do not believe it can be substantiated as a proper precedent or as a basis of appropriation.

Mr. TILLMAN. Mr. Chairman, will the gentleman yield?

Mr. GARD. Certainly.

Mr. TILLMAN. I cited the fact that a large amount of money was collected in the way of fines simply to show that

this money was not appropriated in vain and that the field force of the Indian Service is active and efficient.

Mr. GARD. We had the same thing in the legislative, executive, and judicial bill. Those who spoke in behalf of the increase said there were tremendous fines assessed and many automobiles were sold, and therefore the increase should be made because it would not cost the Government anything. That is not a true basis.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. TILLMAN. Mr. Chairman, I ask unanimous consent for one minute more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. TILLMAN. The gentleman asked why I stated that there was more reason for enforcing the law against the sale of intoxicating liquor among the Indians than among whites. I want to cite, as a reason for that, that we have made many treaties with these Indians to protect them from the sale of whisky, and it is a known fact that they are more liable to deteriorate and ruin physically, morally, and otherwise by the use of whisky than white people.

Mr. GARD. The gentleman does believe, then, that the law should be enforced more strictly among the Indians than among the whites?

Mr. TILLMAN. I say there is more reason for appropriating money to enforce the liquor law among Indians than amongst whites for the reasons I have just offered.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arkansas.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. TILLMAN. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 17, noes 37.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Support of Indian schools: For support of Indian day and industrial schools not otherwise provided for, and other educational and industrial purposes in connection therewith, $1,600,000: *Provided*, That not to exceed $40,000 of this amount may be used for the support and education of deaf and dumb or blind or mentally deficient Indian children: *Provided*, That all reservation and nonreservation boarding schools, with an average attendance of less than 45 and 80 pupils, respectively, shall be discontinued on or before the beginning of the fiscal year 1922. The pupils in schools so discontinued shall be transferred, first, if possible, to Indian day schools or State public schools; second, to adjacent reservation or nonreservation boarding schools, to the limit of the capacity of said schools: *Provided further*, That all day schools with an average attendance of less than eight shall be discontinued on or before the beginning of the fiscal year 1922: *And provided further*, That all moneys appropriated for any school discontinued pursuant to this act or for other cause shall be returned immediately to the Treasury of the United States: *Provided further*, That not more than $200,000 of the amount herein appropriated may be expended for the tuition of Indian children enrolled in the public schools: *And provided further*, That no part of this appropriation shall be used for the support of Indian day and industrial schools where specific appropriation is made.

Mr. SNYDER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. SNYDER. I do that simply to call the attention of the House to the provisions of this bill last year, which provided for the discontinuance of certain schools unless a certain number of pupils were shown to be in attendance, and certain schools were to be discontinued unless that direction was carried out. That provision in the bill caused every school in the Indian Service to be brought up to its full quota.

I am simply stating this for the benefit of the House, showing what a direction in the law did. I think it shows that it is wise occasionally to fix laws so that certain things will be done.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

INDIAN SCHOOL TRANSPORTATION.

For collection and transportation of pupils to and from Indian and public schools, and for placing school pupils, with the consent of their parents, under the care and control of white families qualified to give them moral, industrial, and educational training, $90,000: *Provided*, That not exceeding $5,000 of this sum may be used for obtaining remunerative employment for Indian youths and, when necessary, for payment of transportation and other expenses to their places of employment: *Provided further*, That where practicable the transportation and expense of pupils shall be refunded and shall be returned to the appropriation from which paid. The provisions of this section shall also apply to native Indian pupils of school age under 21 years of age brought from Alaska.

Mr. CARTER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oklahoma moves to strike out the last word.

Mr. CARTER. I have not a copy of the hearings by me, but I notice the item here carries $90,000. Last year it was only $68,000, if I remember correctly. I would like to know from the gentleman in charge of the bill what is the necessity of that increase?

Mr. ELSTON. A very strong showing was made by the bureau officials for the increase of this appropriation. They cited the increase in railroad rates, amounting to over 25 per cent, and they showed that they were under compulsion of applying to the Committee on Appropriations for a deficiency on last year's allowance. It was quite obvious to the committee that this additional sum of about $22,000 was needed to meet the raise in railroad rates. In effect, it is not an enlargement of the activity itself or in the movement of Indian pupils provided for by this appropriation. It is merely a scaling up of the appropriation to meet the increased cost of transportation.

Mr. CARTER. Then it comes about on account of the increase in passenger rates, which is due to the railroad bill which was passed last year?

The CHAIRMAN. The pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

INDUSTRIAL WORK AND CARE OF TIMBER.

For the purposes of preserving living and growing timber on Indian reservations and allotments and to educate Indians in the proper care of forests; for the employment of suitable persons as matrons to teach Indian women and girls housekeeping and other household duties, for necessary traveling expenses of such matrons, and for furnishing necessary equipments and supplies and renting quarters for them where necessary; for the conducting of experiments on Indian school or agency farms designed to test the possibilities of soil and climate in the cultivation of trees, grains, vegetables, cotton, and fruits, and for the employment of practical farmers and stockmen, in addition to the agency and school farmers now employed; for necessary traveling expenses of such farmers and stockmen and for furnishing necessary equipment and supplies for them; and for superintending and directing farming and stock raising among Indians, $400,000, of which sum not less than $75,000 shall be used for the employment of field matrons: *Provided*, That the foregoing shall not, as to timber, apply to the Menominee Indian Reservation in Wisconsin: *Provided further*, That not to exceed $15,000 of the amount herein appropriated shall be used to conduct experiments on Indian school or agency farms to test the possibilities of soil and climate in the cultivation of trees, cotton, grain, vegetables, and fruits: *Provided also*, That the amounts paid to matrons, foresters, farmers, physicians, nurses, and other hospital employees, and stockmen provided for in this act shall not be included within the limitations on salaries and compensation of employees contained in the act of August 24, 1912.

Mr. SNYDER. Mr. Chairman, I make a point of order against the whole section on the ground that there is no authority in law for the item.

The CHAIRMAN. The entire section?

Mr. SNYDER. The entire section. There is no authority in law for this legislation on an appropriation bill.

Mr. BLANTON. The gentleman means the paragraph, not the section?

Mr. SNYDER. Yes; the paragraph. I thought it was a section.

Mr. ELSTON. Mr. Chairman, this is an appropriation covering a number of activities, and all of them are interwoven in the very life of the Indian Service. The great body of law that authorized the bureau itself would cover activities of this kind. We have never found it necessary to go back and collate these various statutes authorizing expenditures for the welfare of the Indians within the reasonable limits of bureau activities. This paragraph, by the way, has never before been questioned, and it has been carried in the bill for the last 20 years.

The CHAIRMAN. Will the gentleman from California permit a question?

Mr. ELSTON. Certainly.

The CHAIRMAN. In relation to the proviso beginning on line 12, page 10, will the gentleman please cite the authority for any amount to be paid to matrons, speaking generally? Does it confine it to Indian matrons?

Mr. ELSTON. That item has been carried for many years. I am not well enough advised to answer that question.

Mr. SNYDER. That is the point.

Mr. ELSTON. I did not anticipate a point of order. I would ask, if it is necessary, that the ruling be reserved and opportunity given to look up the law.

Mr. SNYDER. Mr. Chairman, that is exactly the point I make, that this whole paragraph is filled with items for which there is no authority of law that I have been able to find, and one of them particularly is on the second line in the paragraph, "To educate Indians in the proper care of forests; for the employment of suitable persons as matrons to teach Indian women

and girls housekeeping and other household duties," described in that paragraph.

Mr. ELSTON. Those are mainly instruction items.

Mr. SNYDER. I appreciate that this general item has been carried in the bill for several years, but I know of no law authorizing it to be put upon an appropriation bill other than through the regular legislative committee, and therefore I make the point of order.

The CHAIRMAN. The Chair will sustain the point of order unless the gentleman from California can cite the Chair to an authorization of law for it.

Mr. ELSTON. I think the gentleman from New York is putting the chairman of the subcommittee to some embarrassment in asking him to have at his fingers' ends every specific statute authorizing every activity. I think it would be no more than fair that in the consideration of an item of this kind, which is so important to the service, that no precipitancy be indulged in. The committee of which the gentleman is chairman has passed this item heretofore.

Mr. SNYDER. The chairman of the Indian Affairs Committee has no desire to embarrass the chairman of the subcommittee in any way. He is simply here endeavoring, as chairman of the Committee on Indian Affairs, to protect the political entity of his committee, and he will, on every one of these items that he believes is subject to the point of order, raise the point of order and endeavor to have all these items go back into the legislative committee and be legislated for regularly.

Mr. ELSTON. I ask that the Chair reserve his decision on this point of order, inasmuch as there are in this general paragraph possibly a dozen activities, most of them teaching activities.

The CHAIRMAN. Does the gentleman from California ask unanimous consent to pass over the item until he has time to look up the authority of law?

Mr. ELSTON. I think I am warranted in asking, and I do ask, unanimous consent that this item be passed over.

Mr. SNYDER. Since there will be so many of these similar things coming up in this bill, I am going to object.

Mr. BLANTON. Will the Chair permit me to make an observation?

The CHAIRMAN. The Chair will hear the gentleman.

Mr. BLANTON. You can hardly blame the distinguished gentleman from New York [Mr. SNYDER] for doing what he is doing. As one of the committee chairmen who have had very serious surgical operations performed on them that have taken away from them all their power of functioning, you can hardly blame the gentleman for fighting to get back that power.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

Mr. ELSTON. Do I understand the Chair to sustain the point of order as to the whole paragraph or as to specific items?

The CHAIRMAN. The gentleman understands that when any portion of a paragraph is subject to a point of order, and the point of order is made against the paragraph, the entire paragraph goes out. The Chair understands that the point of order is not made to that particular item.

Mr. SNYDER. No; it is made on the whole paragraph.

The CHAIRMAN. The Chair sustains the point of order, and the whole paragraph goes out. The Clerk will read.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. LONGWORTH having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3390. An act to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production, and for other purposes.

INDIAN APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

EXPENSES INCIDENT TO PURCHASE AND TRANSPORTATION OF INDIAN SUPPLIES.

For expenses necessary to the purchase of goods and supplies for the Indian Service, including inspection, pay of necessary employees, and all other expenses connected therewith, including advertising, storage, and transportation of Indian goods and supplies, $370,000: *Provided*, That no part of the sum hereby appropriated shall be used for the maintenance of to exceed three warehouses in the Indian Service: *Provided further*, That the cost of inspection, storage, transportation, etc., of coal for the Indian Service shall be paid from the support fund of the school or agency for which the coal is purchased.

Mr. SNYDER. Mr. Chairman, I make a point of order on the last proviso in the paragraph. There is no authority for it in law.

The CHAIRMAN. The gentleman makes the point of order on the last proviso, that there is no authority for it in law. The Chair will hear the gentleman from California.

Mr. ELSTON. Mr. Chairman, this is a proviso that was added in the Indian appropriation bill last year, and it is merely repeated in the current bill. It may be that it is not a continuing authorization for the present item, but it was enacted in the last bill and, it seems to me, supports the position of the committee.

The CHAIRMAN. Does the gentleman contend that if an item was carried in the appropriation bill last year, which item was not in order, it would be an authorization that would make it in order to carry the same item this year?

Mr. SNYDER. That is the point the gentleman from California is trying to make.

Mr. ELSTON. That is the case.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

TELEGRAPHING AND TELEPHONING.

For telegraph and telephone toll messages on business pertaining to the Indian Service sent and received by the Bureau of Indian Affairs at Washington, $7,500.

Mr. SNYDER. Mr. Chairman, I make the same point of order on the paragraph, that there is no authority in law for it.

Mr. ELSTON. Mr. Chairman, in commenting upon this point of order I wish to make a general observation. It is obvious that the Indian appropriation bill is a creature of evolution. It has been made up largely from year to year by accretions of items carried in the bills of previous years. A great many of the items initially were subject to a point of order, inasmuch as no previous authorization of law had been had. In making up the bill for the succeeding year the Committee on Indian Affairs has seen fit to regard these items as good items and has continued them in the bill. There is not one item in the present bill that has not been contained in the Indian appropriation bill for many years last past. In fact, the model for this bill is the bill of last year.

Now, I want to make this general observation for the benefit of the House and to justify the action of this subcommittee. Of couse, this subcommittee is not responsible for the state of facts regarding previous legal authorizations. It is responsible for continuing the structure of the Indian Bureau as it is now operating. If the committee took as their policy the stripping of this bill to nothing except that which had legal authorization by express action of law, it is quite likely that the bill would be pared down to nothing and the whole Indian Service crippled. Not anticipating that this destructive course would be pursued, although it is in order, this subcommittee has not had a search made of the statutes of the United States from 1798 to date, and our only information available with regard to the authorizations for these different items is contained in the compilations and in references made by the Indian Bureau in the Book of Estimates. In the Book of Estimates it is assumed that the Indian Bureau has supplied, so far as possible, the legislation authorizing the proposed appropriation. That data is now available to the chairman of this subcommittee and is before him. Where an authorization can not be found in that memorandum the chairman of this subcommittee would be put to a search of the statutes clear back to the beginning of our laws. That is an impossible task. Telegraphing and telephoning are necessary incidents to the life of the bureau, and I submit there should not be required of this committee a citation to the specific authority of law in justification of such items, if the Chairman of the Committee of the Whole can find that by implication they are necessary incidents to the life of the bureau.

Mr. SNYDER. Mr. Chairman, I desire to be heard for a moment on the proposition. The chairman of the subcommittee overlooks entirely the fact that there is a place to get authority for this legislation, and that place is not in the general appropriation committee, unless that committee has authority of law to put the item in. If he can show the Chairman of the Committee of the Whole that there is such a law, I shall submit gracefully to the ruling of the Chair, but there are many items in this bill that are exactly in the same shape that this is, and, while this subcommittee did not make an absolute agreement that no legislation should go into this bill, yet it was the understanding that nothing was to go into the bill except that which was authorized under the rules that govern this House to-day.

Mr. HAYDEN. Mr. Chairman, the Revised Statutes provide that there shall be in the Department of the Interior a Commis-

sioner of Indian Affairs, to be appointed by the President, and so forth, and that the Commissioner of Indian Affairs shall, under the direction of the Secretary of the Interior, and agreeably to such regulations as the President may prescribe, have the management of all Indian affairs and all matters arising out of Indian relations. This is a matter that arises out of Indian relations, because it is absolutely necessary to telegraph and telephone between the Bureau of Indian Affairs and the Indian field service.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. HAYDEN. I am addressing the Chair. As I said, it is absolutely necessary to telegraph and telephone between the Bureau of Indian Affairs and the field service with reference to the relations between the United States and the Indians. It is essential under modern conditions that such quick communication be employed, and the Commissioner of Indian Affairs having jurisdiction over all matters arising out of Indian relations, certainly the Congress would be authorized to appropriate money enough to permit him to properly exercise the jurisdiction thus conferred upon him by law.

Mr. MONDELL. Mr. Chairman, the point of order is raised against the language in this bill which provides for the payment of telegraph and telephone messages necessary and essential, it is to be assumed, to the work of the department. While I have not searched the statutes carefully, I doubt if there is to be found within the statutes a definite, substantive provision of law authorizing the payment of telegraph and telephone charges by any department or bureau of the Government. It is one of the necessary incidents of their business. I suppose there is not any place in the law where these people are authorized to buy dustpans and brooms. If a point of order is sustained against an item like this in this bill, a like point of order could be sustained against a like item in any bill presented by the Committee on Appropriations. There are certain expenditures that are necessary and essential to the conduct of the public business—expenditures that must be made. This is the first time, so far as I can recall, when anyone has claimed that the law establishing a department or a bureau must detail every possible small item of expense under the bureau.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. In just a moment. The Bureau of Indian Affairs was established for the purpose of caring for the affairs of the Indians. The gentleman from Arizona has just read to the Chair the first paragraph of the act.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. LONGWORTH. What is the date of that act?

Mr. MONDELL. July 9, 1832.

Mr. LONGWORTH. That was before telephones had ever been heard of, was it not?

Mr. MONDELL. Yes.

Mr. LONGWORTH. Therefore the act itself could not specify an appropriation for telephone service.

Mr. MONDELL. It could not well have done so, and I do not think that it has ever occurred to anyone that there must be specific authority for an item like this, if you are to carry on the work of this bureau—an activity that is absolutely essential to the work of the bureau.

Mr. BLANTON. Mr. Chairman, will the gentleman permit me to cite him to an authority against the point of order?

Mr. MONDELL. I would be very glad to have him do that.

Mr. BLANTON. In yesterday's RECORD the gentleman from New York [Mr. SNYDER] said:

> I would like to point out one thing to the gentleman, to an appropriation bill coming in as this one has done, without any legislation on it.

Mr. SNYDER. I should have said "new legislation," and that is what I intended to say, and in the next breath I did say it.

Mr. MONDELL. Mr. Chairman, I agree entirely with the view of gentlemen who insist that the new and enlarged Appropriations Committee must confine itself to appropriation matters; that it shall not enact law under the guise of making appropriations; and I think it is the duty of the chairman of each subcommittee to accept without any great protest the points of order that are made to new legislation. But if points of order may be maintained against every item in the bill for and on behalf of which there is not a definite and specific provision of law, there is little use of going on with this bill, or any other bill that may be reported by the Committee on Appropriations, because in the carrying out of the Government's business there are not only many old but constantly arising new and novel classes of minor expenditures which can not be covered by law unless the legislative committees are sitting constantly to pass laws to include every minute, new, necessary instrumentality essential to the conduct of the business of the Government.

Mr. SNYDER. Mr. Chairman, I think that the argument of the gentleman is conclusive that this item should go out on the point of order. He states that in order to get the incidental items that come up from time to time on this floor, it will be necessary to have the legislative committees in session all of the time. The legislative committees are in this House to be in session any time when any incidental matter is brought to their attention when legislation is needed. Unless the rule, as I understand it, is carried out, which brings those incidental items to the legislative committees, you may just as well discharge all of the legislative committees and do exactly what it seems the gentleman from Wyoming [Mr. MONDELL] would have done, according to his argument, and all matters would then go to the Committee on Appropriations.

Mr. MONDELL. In that behalf may I suggest that this committee has been very busy, and it has just brought in quite an elaborate piece of legislation. The committee must have known of these items relative to which the chairman of the Committee on Indian Affairs is now submitting points of order, but they present no legislation on the subject to the House.

Mr. SNYDER. Will the gentleman yield?

Mr. MONDELL. And they have presented very important substantive legislation.

Mr. SNYDER. The Indian Affairs Committee knew, of course, that this bill had been reported to the Committee on Appropriations. It had no knowledge of how much of that legislation the Appropriation Committee was going to put in the bill, and therefore it could not proceed with any legislative bill, which the leader well knows.

The gentleman did know as to these essential items against which he now interposes points of order; he knew they had been in the Indian bill for years and that they were in the current Indian act which he himself reported to the House.

Mr. MONDELL. I do not care to take up any further time. I assume the Chair realizes that there is not to be found anywhere in the statute books, and there never will be found in the statute books in the future, no matter how active these legislative committees may become, substantive legislation authorizing every detail of the minor expenditure of a department necessary and essential to the conduct of its business.

Mr. HASTINGS. Mr. Chairman, if I may be indulged for a moment on the point of order, permit me to say that this item has been carried in the bill for a number of years; and, second, coming more directly to the point of order, there is authority for the establishment of the Bureau of Indian Affairs here in Washington, there is authority for the establishment of the various activities of the Indian Service throughout the United States, and my contention is that this appropriation is in order because it is one of the things incident to carrying out the activities authorized by law both here in Washington and in the field. I think it is a necessary incident to them.

The CHAIRMAN. The Chair is ready to rule. The Chair recognizes the point of order involves two or three quite delicate discriminations. The mere fact that an item has been carried from year to year without authorization is no basis for its continuance from year to year. The new committee, the large committee known as the Appropriations Committee, would quite naturally include matters of legislation that have been reported in this bill in the past from the other committee, the Indian Affairs Committee, but the integrity of the functions of the other committees must be preserved. The fact that a matter has not been specifically mentioned as authority, although a strong inference goes with it that it would have to be exercised, has a danger in it that if you open the door to that sort of construction it would be difficult to limit it hereafter in any item that would be put upon the same basis. These three items make this a very delicate point to decide. Now, the Chair is of the opinion that in a case like this, where the item referred to is for telegraph and telephone, which have come to be essential for administration and were not included in the original authorization because at that time there was no such thing as a telephone and telegraph—the Chair is of the opinion that the inference here is strong enough that it will not strain the other items that the Chair has ruled against, and therefore the Chair will overrule this point of order.

The Clerk read as follows:

COURT COSTS.

For witness fees and other legal expenses incurred in suits instituted in behalf of or against Indians involving the question of title to lands allotted to them, or the right of possession of personal property held by them, and in hearings set by the United States local land officers to determine the rights of Indians to public lands, $800: *Provided*, That no part of this appropriation shall be used in the payment of attorneys' fees.

Mr. SNYDER. Mr. Chairman, I make the same point of order on this paragraph, that there is no authority of law.

UMI

The CHAIRMAN. The gentleman from New York makes the point of order that there is no authority of law for this item. The gentleman from California.

Mr. ELSTON. Mr. Chairman, I have not been able to find any authority except the appropriations for this same purpose made in previous appropriation acts. I know of no basic law authorizing and directing an expenditure of this kind other than what I have mentioned. I believe that the Chairman should take into consideration that any activity that would be considered necessary or convenient to the work of the Indian Bureau would be considered an authorized activity. Now, that is the doctrine of implication; that is an applied rule of courts that if once an activity or bureau is authorized every incident to its proper functioning is comprised within the scope of the original authorization. Any activity that would promote the progress of the bureau and make it more able and efficient to exercise its functions is an incident to its work and is authorized by the creation of the bureau originally. That is a basic rule that the Chairman should apply. In this case if an Indian, the ward of the Government, is brought into court and has no funds, it is the necessary duty of the Government to protect him and provide him his expenses. Mr. Chairman, we create a bureau and give that bureau general jurisdiction over the affairs of the Indians and constitute that bureau the agent of the Government of the United States as guardian of their interests; now, it is perfectly apparent that if any activity is necessary to the proper discharge of the guardian's duty it is comprised within the original authority and is a proper activity for which to appropriate.

Mr. SNYDER. Mr. Chairman, my understanding of the functioning of this House is not to make the laws by implication. There are fixed rules by which we are endeavoring to create legislation here, and one rule is that the legislation must come from the legislative committee, and the Chairman has just said a moment ago that legislation being carried in an appropriation from year to year did not make it have the authority of law. For this section here that I have made the point of order on there is no authority of law. I think my argument, based on the statements which have been made, is the correct one.

Mr. MONDELL. Mr. Chairman, may I call the attention of the Chair to a statute in reference to this matter? May I call the attention of the Chair to a part of the Twenty-seventh Statutes? I find, on page 66 of the volume entitled "Indian laws and regulations affecting Indian affairs," the following:

> And in all States and Territories where there are reservations of allotted Indians the United States district attorney shall represent them in all suits in law and equity.

Possibly the provision before us goes a little further than that specific provision of law, but evidently that was intended to make provision for the protection of the Indians in their right to public lands and their right to their allotments. In affording Indians this protection there must, of course, be some expenditure.

Mr. HASTINGS. Mr. Chairman, I just want to supplement what the gentleman from Wyoming has said by saying that there is practically an agreement with every Indian tribe throughout the United States, a pledge of this Government, to continue to allot their lands and place these Indians in possession, and this is simply to carry out the pledges referred to, not only in the act recited by the gentleman from Wyoming but in numerous acts of Congress.

The CHAIRMAN. Can the gentleman from Oklahoma [Mr. HASTINGS] cite any further authority than the gentleman from Wyoming cited?

Mr. HASTINGS. I was just going to say to the Chair that you have a separate agreement with practically every Indian tribe, and I do not believe anyone would dispute but that practically every one of those agreements provides for the allotting of the land and placing of the allottees in possession. Now, where it is necessary to bring suit with witnesses, the witnesses have to be paid. I contend that this is a necessary appropriation to carry out those pledges made by the Government in law.

Mr. SNYDER. Mr. Chairman, if I may say another thing, I am not raising the point on the question of the merits of the section. I am making the point that it is one of those sections that has been carried from year to year without authority of law.

Mr. HASTINGS. If the Chair will indulge me a moment further, in answer to the chairman of the Committee on Indian Affairs, let me say that this committee that brings this bill has the same authority to bring in an appropriation bill that the Indian Committee had. This item was subjected to the same point of order last year and to the same point of order for 10 years back as it is now. The Indian Committee last year had no more authority on an appropriation bill than the Appropriation Committee now has. It has legislative authority, but it has no authority to place any legislation on an appropriation bill. And the same rule that the gentleman invokes now as against these items could have been invoked had the Indian Committee brought in this bill with these same items.

Mr. SNYDER. Mr. Chairman, I just want to call the Chairman's attention to the fact that the gentleman admits it is subject to a point of order.

Mr. HASTINGS. But I want to call the attention of the committee to the fact and his attention to the fact that because the Indian Commitee was a legislative committee it had no authority to place amendments, that he calls legislative amendments, upon an appropriation bill. In other words, the thing I want to make clear now and emphasize is that the Indian Committee has no more authority to bring in a legislative item on this appropriation bill than has this committee that brought in and reported this bill.

The CHAIRMAN. Will the gentleman tell the Chair where he can find the authority for that which is contained in lines 13, 14, and 15, as to the hearings set by the United States local land officers to determine the right of Indians to public lands?

Mr. MONDELL. Mr. Chairman, if the Chair will permit, I doubt if there is any specific provision of law relative to such contests, but the general laws governing the management and control of the public lands authorize hearings for the purpose of enabling public-land entrymen to defend their rights or claims to land. And this undoubtedly applies to cases where an Indian is a public-land entryman. Hearings would be provided without regard to whether the individual entryman were an Indian or a white man.

The CHAIRMAN. The Chair is ready to rule.

The only authority that the Chair has been able to find covering the subject will be found in Twenty-eighth Statutes at Large, page 305, and Thirty-first Statutes at Large, page 760, in which the Chair finds this language:

> All persons who are in whole or in part of Indian blood or descent who are entitled to any allotment of land under any law of Congress, or who claim to be so entitled to land under any allotment or under any grant made by Congress, or who claim to have been unlawfully denied or excluded from any allotment or any parcel of land to which they claim to be lawfully entitled, by virtue of any act of Congress, may commence and prosecute or defend any action, suit, or proceeding in relation to their right thereto in the proper circuit court of the United States; and said circuit courts are hereby given jurisdiction to try and determine any action, suit, or proceeding arising within their respective jurisdictions involving the right of any person, in whole or in part of Indian blood or descent, to any allotment of land—

And so forth.

While it says nothing about hearings or nothing about paying witness fees, yet it would not be a strained interpretation to permit this authority to include the authority to pay witness fees, and the Chair is inclined to think that under that section this might be authorized. Therefore the Chair overrules the point of order.

Mr. LONGWORTH. Mr. Chairman, I move to strike out the last word.

It so happens that on the last two occasions when this bill was before the House I occupied the chair, and while no points, or practically no points, of order were raised, I came to the conclusion that points of order, technical at least, would lie against most of the paragraphs in the bill.

As the chairman of the subcommittee has stated, this bill is largely a process of evolution. Various functions have grown up which are not specifically authorized by law. For instance, in the one just called attention to—the Indian Bureau—having been created in 1832, before telephones were ever heard of, I think the Chair ruled correctly in both of those instances that those paragraphs were a necessary implication of the powers granted by the statute. But there are other, and a large number, as I recall, of paragraphs in this bill which are not authorized by statute. I think that applies to this bill more than to any other appropriation bill before the House. Now, I think it would be a mistake under all the circumstances to have the rules of the House taken advantage of in this bill. I think if the gentleman from New York [Mr. SNYDER] or other gentlemen should persist throughout in raising points of order to various paragraphs for which no authorization can be pointed out the bill will leave this House in an entirely emasculated condition.

Now, there is another point involved, namely, that it is not new legislation. This is legislation which has been carried in appropriation bills. It is not new in this bill; but here is the situation that will arise, gentlemen: We not only have this rule which provides for the big Appropriations Committee without legislative function, and only appropriating functions, but we have another rule which provides that where the Senate puts

amendments into a bill of the House which would not have been in order in the House the House must vote upon each item before the conferees have jurisdiction. Now imagine the situation we will get into with this bill or any other. If technical points of order are taken advantage of by gentlemen who perhaps do not like the creation of the new big Appropriations Committee the Senate can not put an amendment in which will not be subject to a point of order in this House, at least so far as the power of conferees may be concerned.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. LONGWORTH. And it may take us months and months to pass the necessary appropriation bills.

Mr. BLANTON. Will the gentleman yield?

Mr. LONGWORTH. I yield.

Mr. BLANTON. Is not the gentleman mistaken this far, that any amendment that is in the nature of legislation which is put on the bill by the Senate can not be stricken out in the House by a point of order; but merely, under the new rule, the House must vote on it before the conferees get jurisdiction of it; but no point of order can be made in the House against the amendment?

Mr. LONGWORTH. Yes; but suppose there are 50 or a hundred amendments to a bill. The same gentleman who made the points of order in the House may demand a separate vote on each amendment and a roll call may be demanded on each; and I say if this is persisted in it might eventuate that we could not pass any of the appropriation bills in the House. I simply suggest that as a possible outcome to the making of technical points of order.

Mr. FERRIS. Mr. Chairman, will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. FERRIS. This spectacle here to-day is not a new occurrence. This same thing has occurred off and on for the last 14 years. When some gentleman becomes displeased it is within the power of one Member to get up and tear the Indian bill to pieces. We had that demonstrated in the case of the item concerning the Mississippi Choctaws, and we have had it illustrated from time to time for years past.

Pray tell me why is it not time in this House to bring in an authorization bill, bring it in for the regular Indian Service, and then let the judgment of Congress come in and say what the several amounts shall be? Why subject the House and the Congress to an ordeal of this kind? I do not criticize the gentleman from New York in this case, because any gentleman has the right to make points of order as long as the rules are as they are. The point I make is the rules ought to be changed.

Mr. LONGWORTH. I am not criticizing the chairman of the Committee on Indian Affairs.

Mr. FERRIS. Why not bring in a bill which will authorize the legitimate provisions for the Indian Service and let Congress say what shall be done?

Mr. LONGWORTH. I agree entirely with the gentleman from Oklahoma on the general proposition. I am one of those who believe that as little legislation as possible should be carried on appropriation bills, either old or new legislation.

Mr. FERRIS. Precisely.

Mr. LONGWORTH. But we now have a short session of Congress, and the gentleman will realize that any authorizations brought in would not be matters of privilege. We would have to have a rule for their consideration, and in the exigency that is now before us, of passing the appropriation bills within less than two months, I am merely calling attention, without criticizing any gentleman, to the situation in which we may find ourselves under the new rules.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. BLANTON. I am sure that the gentleman from Ohio was not criticizing this new rule, which for the first time in a long period has given the House protection against amendments which in another body are placed upon a bill as against the will of the House in many instances, when the House is absolutely at the mercy of its conferees. But now the House has a voice with respect to every amendment.

Mr. LONGWORTH. Far from criticizing it, I voted for the new rule, and also for the resolution creating a greater Committee on Appropriations; and I am not making criticisms of the points of order that have been made. I am merely calling attention to the situation in which we may find ourselves, and to the fact that if points of order to otherwise unobjectionable paragraphs are made simply with the intent of having them ruled out of order as legislation, it may be impossible to pass all the appropriation bills at this session of Congress.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

PAY OF INDIAN POLICE.

For pay of Indian police, including chiefs of police at not to exceed $50 per month each and privates at not to exceed $30 per month each, to be employed in maintaining order, for purchase of equipments and supplies, and for rations for policemen at nonration agencies, $150,000.

Mr. SNYDER. Mr. Chairman, I make the same point of order against that paragraph.

Mr. ELSTON. Mr. Chairman, I wish to direct the attention of the Chair to the basic act creating the Indian Bureau, to be found in the volume here designated "Indian Affairs Laws and Treaties," volume 1, page 1, wherein the following language is found:

There shall be in the Department of the Interior a Commissioner of Indian Affairs, who shall be appointed by the President, by and with the advice and consent of the Senate—

And so forth. And now, coming to his duties:

Who shall have the management of all Indian affairs and of all matters arising out of Indian relations.

Now, there is a specific authorization to this bureau to have charge, for the Government of the United States, over certain matters, to wit, to have the management of Indian affairs and of all matters arising out of Indian relations. Now, if Congress is to take cognizance of this bureau and of its scope and the duties laid upon it it must say that it is its duty to provide the funds for carrying out those functions, and if those functions are so broad and so wide as to apply to the general topic of Indian affairs and all matters relating to Indians, then I say all that the Chair has to do is to decide whether or not the particular item appropriated for in this bill is a necessary instrument for carrying out that duty; and if so, it is the duty of Congress to appropriate for it.

That is the only broad line that the Chair can follow now, in view of the situation before it. It is proper for the Chair to take cognizance of custom, because that is interwoven with the rules of this House, and if the Chair considers that custom has prescribed certain things and previous Congresses in pursuance of this general idea have made appropriations covering the general activity that would be comprised within the duties of the Indian Bureau or imposed on the Commissioner of Indian Affairs, it is a proper subject of expenditure and is in that sense authorized by law.

The CHAIRMAN. Does the gentleman from California believe that the act to which he refers is broad enough to create and maintain a body of Indian police at an expenditure of $150,000?

Mr. ELSTON. What is the necessary implication coming from the words? What does the phrase "Indian police" connote? It connotes the implication of preserving law and order, and surely it is comprised within the general matters which Congress authorizes the bureau to take charge of, namely, Indian affairs and relations. The relations between Indians involve sometimes the maintenance of law and order, and law and order can not be maintained without the appointment of policemen. Policemen are a necessary incident to the maintenance of law and order, and law and order are a necessary incident to the management of Indian affairs. If you can not invoke a general rule of that kind, just think of the absurd extreme to which the gentleman from New York is traveling. The gentleman's argument would involve this, that in the first act authorizing the bureau we would have to specify every little item necessarily involved in the definition of the bureau itself and its duties. That is an absurdity. This is the peculiar subject matter for the chairman to inquire about: Is this an activity that is authorized? Is the particular item a necessary incident to that activity? If it is, it is authorized and we can appropriate for it.

Mr. CARTER. Will the Chair hear me a moment on the point of order? As to the advisability of treating the situation in which the House finds itself with reference to this measure in this or another way I will not at this time say, but I should like to say that I feel sure the Chair will agree that authorization by implication must be much stronger than any language that has been presented to the Chair. As a matter of fact, certain things are authorized by law, and others are not, with reference to the Indian Service as well as with reference to other branches of the Government. They are provided in different ways—quite generally in general legislation, but other provisions are made specifically in different treaties and different acts with reference to particular tribes.

UMI

Now, if the Chair will refer to chapter 1, title 28, sections 2039 to 2072, of the Revised Statutes of the United States, he will find there the general authorization for the different offices and activities of the Bureau of Indian Affairs. If the Chair will bear with me for just a moment, I will be glad to read into the RECORD a list of those authorized by that general enactment: Board of Indian Commissioners, secretary to the commissioners, Indian inspectors, superintendents, temporary clerks for superintendents, Indian agents, sub-Indian agents, special agents and commissioners, interpreters, blacksmiths, and teachers in agriculture and literary branches.

Mr. FERRIS. No police?

Mr. CARTER. No police are provided for, and evidently the provision against which the gentleman from New York has made a point of order is not in harmony with the rules of the House.

Mr. MONDELL. Mr. Chairman, the gentleman from California has referred to the organic act. It is clear that there is a very broad authority conferred under that organic act in the management of Indian affairs. If we are to manage the affairs of the Indians as provided in that act, there must be, among other things, officials charged with the responsibility of preserving order. I do not know that there is anywhere in the statute a provision for the appointment of Indian police, but Indian police have been appointed and appropriated for since the very beginning of our management of Indian affairs. They are an essential part of the organizati n necessary to enable the Commissioner of Indian Affairs to conduct his office and perform the duties laid upon him, and the law has specifically recognized this particular class of employees repeatedly.

For instance, in the act of March 3, 1877, page 35, of volume 1 of the laws, entitled "Indian Affairs, Laws, and Treaties," is this language:

> And hereafter in the employment of Indian police, or any other employees in the public service among any of the Indian tribes or bands affected by this act, and where Indians can perform the duties required, those Indians who have availed themselves of the provisions of this act and become citizens of the United States shall be preferred.

That is a recognition of the employment of Indian police and a provision giving preference to Indians in such employment.

And again, Twenty-fourth Statutes at Large, 464:

> That immediately upon and after the passage of this act any Indians committing against the person of any Indian policeman appointed under the laws of the United States, or any Indian United States deputy marshal while lawfully engaged in the execution of any United States process—

And so forth, shall be punished. It is not necessary for me to read the balance of that.

Then in Twenty-fifth Statutes, 178, page 37 of the volume I have referred to, is this provision:

> That any Indian hereafter committing against the person of any Indian agent or policeman appointed under the laws of the United States, or against any Indian United States deputy marshal, posse comitatus, or guard, while lawfully engaged in the execution of any of the United States process, or lawfully engaged in other duty imposed upon such agent, policeman, deputy marshal, posse comitatus, or guard, by the laws of the United States any of the following crimes—

Then follows a recitation of certain crimes and a provision for their punishment.

These are recognitions by the statute of this particular class of employees of the Indian Service, and legislation in at least three different periods for their protection, recognizing them and making special provision for preferences with regard to them.

Mr. CARTER. Will the gentleman yield?

The CHAIRMAN. Will the gentleman from Wyoming please instruct the Chair——

Mr. MONDELL. The gentleman would not presume to do that.

The CHAIRMAN. Whether the statute read by the gentleman from Oklahoma [Mr. CARTER] enumerating the officers for Indian affairs, and omitting the office of policeman, would not exclude the office unless there is an authorization for it somewhere?

Mr. MONDELL. I think not, because peace officers are designated by various titles at one time and another, in the Indian Service and elsewhere. Clearly that enumeration indicates the intent of the Congress to provide for officers to maintain peace and order among the Indians. At one time we call them police. At another time we may give them some other designation. But the statutes that I have read clearly recognize the Indian police as among the necessary and essential employees of the bureau for the maintenance of order, and we all know that they are necessary. They are the main reliance of the Indian Service for the preservation of order on the reservations. There are no other officers charged with the maintenance of order on Indian reservations except the Indian police. That is the name we have given these men, generally Indians, who are charged with the responsibility of maintaining order on the reservations.

Mr. CARTER. Mr. Chairman, what the gentleman from Wyoming has done is simply to read to the Chair from certain acts a recognition of the fact that Indian police do exist, the same recognition that has been carried in Indian appropriation bills for the last half century.

In no way has he presented any authorization for the appointment of these officers or for their pay, and the gentleman's statement that their mere recognition by the Government is authorization for pay can not be seriously considered. If we follow this contention out to its ultimate conclusion we would involve the House in all character of complications. For instance, prior to the time that the Government took over the handling of Indian funds among the different tribes, the different tribes paid their chiefs and others from their own tribal funds by their own tribal officials, yet they were recognized by Federal authorities as officers. Now, certainly their mere recognition would not have authorized an appropriation from the Federal Treasury for the discharge of their duties. Since there is specific authorization for certain officers, and that is set out in a statute passed by Congress, I do not think it can be well contended that anyone not specifically provided for is authorized by law.

The CHAIRMAN. The Chair is prepared to rule. The only reference to Indian police that the Chair can find is in the statute referred to by the gentleman from Wyoming [Mr. MONDELL]. The Chair is constrained to think that a mere reference to an office would not be sufficient to establish the authorization and the statutes referred to, enumerating officers that are appointed under authority of law, not including the office of policeman, leads the Chair to sustain the point of order.

Mr. MONDELL. Mr. Chairman, will the gentleman permit me right there?

The CHAIRMAN. The Chair will hear the gentleman further.

Mr. MONDELL. I was not listening when the gentleman from Oklahoma [Mr. CARTER] was making his argument, but my impression was that he read simply from an appropriation item. I may or may not be correct about that. My impression is that he was reading an item of appropriation. The fact that that did not include the designation of certain officers means nothing, because if I am correct in my impression the appropriation that he read from does not authorize the appointment of anyone.

Mr. CARTER. Oh, I was reading from the organic act, Title XXIV, chapter 1, of the Revised Statutes, beginning at section 2039.

Mr. MONDELL. That is not the organic act establishing the Bureau of Indian Affairs, if I may be allowed to differ with the gentleman.

Mr. CARTER. The gentleman is correct, and I am wrong.

Mr. MONDELL. I do not have the statute to which the gentleman refers, but the organic act establishing the Bureau of Indian Affairs is section 462, Revised Statutes, page 78. The gentleman may have referred to some statute that made some provision for certain officers within the Indian Service.

Mr. CARTER. I was reading from Kappler's Laws and Treaties, and the citation is Title XXVIII, chapter 1, officers of Indian affairs, duties and compensation, beginning at section 2039. It is not the organic law. The gentleman is correct about that. The organic law was passed in 1832, July 9.

Mr. MONDELL. If the Chair is to base his ruling on a provision with regard to the appointment of certain officers to whom he has referred, then practically no one in this bill can be paid. The teachers all go out.

Mr. CARTER. Oh, no; there is specific provision for education.

Mr. MONDELL. Everyone would go out except some inspectors.

Mr. SNYDER. Nothing of the kind.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

> Pay of judges of Indian courts: For pay of judges of Indian courts where tribal relations now exist, $7,000.

Mr. SNYDER. Mr. Chairman, I reserve the point of order on that. I want to say to the Members of this House that I have no desire to appear as wanting to tear up this bill. I do not want anyone to get that impression. I have never, since I have been a Member of this House, interfered in any way with legislation except in a limited way with my limited ability to try to do what I could to bring out proper legislation; but my understanding of the rule is that all legislation should emanate from the legislative committees, and that the Appropriations Committee under this new rule has no right to bring in legislation on its bills. Therefore, in order to retain for my committee its integrity as a committee, I am making the points of order that I believe I am justified in making.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman.

Mr. HASTINGS. In order that we might state our position correctly before the House, does the gentleman himself contend that his committee would have any more authority or right to bring in an appropriation bill with legislative provisions upon it?

Mr. SNYDER. The gentleman knows that I do not even suggest such a thing as that. There is no man on the floor here who does not know that.

Mr. HASTINGS. Very well. The gentleman, it would appear, is making points of order as if this were something new coming from the appropriating committee. The Indian Committee, when it takes up the Indian appropriation bill, had no more authority and had no more right last year and for the dozens of years before that to put legislation on an appropriation bill than this committee now has. I am trying to invite the attention of the House to the fact that this appropriating committee this year has used practically the same language that the gentleman's committee did last year in making the appropriations, and I call his attention to the fact that that language certainly was not objectionable to the gentleman's committee last year. The Subcommittee on Appropriations and the full Committee on Appropriations this year tried not to violate the rules, and hence we have used almost exactly the same language of the bill that was passed last year by the gentleman's committee.

Mr. SNYDER. Mr. Chairman, I desire to say that I agree wholly with what the gentleman says, except that under the legislative committee we would have the legal right to bring these items into the House that would be subject to a point of order; while under the rules of the House as they are to-day the gentleman's subcommittee has no right to bring them in at all.

Mr. HASTINGS. Will the gentleman yield further for another question?

Mr. SNYDER. Yes.

Mr. HASTINGS. Does the gentleman contend his committee would have the legal right to bring them in on an appropriation bill?

Mr. SNYDER. I do not understand the gentleman's question.

Mr. HASTINGS. The gentleman said that the Committee on Indian Affairs would have the legal right to bring in these various provisions. What I am asking the gentleman is this: Does he contend that the Committee on Indian Affairs would have the legal right to bring in these provisions on an appropriation bill, or any provisions on an appropriation bill, that the Committee on Appropriations does not now have?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent that his time be extended for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SNYDER. There is absolutely no answer to the argument of the gentleman except that we all know that under the provisions of the old rule all of this legislation was put onto the appropriation bills from time to time presented to the House, subject to points of order; but under the rule the committee had the right to do that.

Mr. HASTINGS. Now, will the gentleman yield on that point?

Mr. SNYDER. No; let me finish. Under the rule, as I understand it, as I said a moment ago, the general Appropriations Committee has not the right to put legislation on even that is subject to a point of order.

Mr. HASTINGS. Does the gentleman contend that his committee has any more right to put legislation upon an appropriation bill that this committee?

Mr. SNYDER. Why, absolutely we would.

Mr. HASTINGS. I heartily dissent from that. The Committee on Indian Affairs has no more legal right to place any language upon this bill, being an appropriation bill, than this committee has.

Mr. SNYDER. Mr. Chairman, I make a point of order on the section.

Mr. HASTINGS. Mr. Chairman, I make the point of order that it comes too late, because, as I understood the gentleman, he moved to strike out the last word.

Mr. SNYDER. No; I reserved the point of order, and I now make the point of order.

Mr. HASTINGS. I will ask the Clerk what the reservation was, if I am mistaken?

The CHAIRMAN. The gentleman reserved the point of order.

Mr. HASTINGS. Very well.

Mr. MONDELL. Mr. Chairman, the gentleman from New York [Mr. SNYDER] says he has no desire or intention—intention I think he said—to defeat this bill or to tear it to pieces and leave it in such condition that it is not a bill but mere fragments, but whatever the gentleman's intention may be he has started out on a course of action that, if the Chair rules in harmony with the Chair's decision in the latest case, there will be very little left of the Indian bill, so whatever the gentleman from New York's intention was, what he will accomplish will be largely to defeat the beneficent purposes of this bill. Now, the gentleman from New York has said that his committee in the olden days had the right to bring in new legislation and appropriations not authorized by law, though they might go out on a point of order, and that the new Appropriations Committee has no such right. Like the gentleman from Oklahoma [Mr. HASTINGS], I entirely dissent from that view. There is no right in either case. The practice was to bring in not only appropriations not authorized by law but whole volumes of new legislation, and that was done last year when the gentleman from New York had charge of the Indian bill, containing not only every item that is now in the bill, which he now claims is an item of appropriation not authorized by law, but in addition a large amount of new legislation as well. The House, unlike the gentleman from New York, has been inclined to view these things not from a narrow viewpoint of technical construction——

Mr. SNYDER. Now we are getting down to the facts.

Mr. MONDELL. But from the standpoint of the accomplishment of practical beneficial results in legislation. I had hoped that in the consideration of this bill that would be the policy followed. The Committee on Appropriations in charge of this bill, in order that it might not violate either the letter or the spirit of the rule, has eliminated from the bill everything, practically everything, in the form of legislation. The result is that there is practically nothing in the bill in the way of legislation. The gentleman talks of new legislation. There is no new legislation; at least we have not reached any up to this time.

Mr. SNYDER. Will the gentleman yield?

Mr. MONDELL. In just a moment. There are items of appropriation that have been carried in this bill from the time when we first began to appropriate for this service which the gentleman now contends are subject to a point of order because not authorized by law, but there is no new legislation in the bill. This is not new legislation.

Mr. SNYDER. And I have not used the words "new legislation."

Mr. MONDELL. This committee has just as much right, if it be considered a matter of right, to bring in a provision that is subject to a point of order, just as much right as the Indian Committee had in the days in which that committee appropriated. The prohibition against appropriations not authorized by it was the same then as now, but it does not become effective unless the point is raised.

Mr. SNYDER. Will the gentleman yield?

Mr. MONDELL. And further, Mr. Chairman, this committee certainly has very much more moral right, at least it has more excuse, to bring in an item of appropriation that has been carried continuously on Indian appropriation bills in the past than his committee ever had to do what it did continuously; that is, bringing in new items of appropriation which were not authorized by law, and besides reams of new legislation on the Indian appropriation bill. This committee has not attempted to do that.

Mr. SNYDER. Will the gentleman now yield?

Mr. MONDELL. I will.

Mr. SNYDER. He does not deny I have the right to make these points of order?

Mr. MONDELL. Not at all; not at all; and in a way I am not criticizing the gentleman unless there be criticism in the suggestion I have made that he is not giving the Appropriations Committee the consideration the House gave his committee when it brought in its appropriation bill.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. If the gentleman continues we must wait until legislation is secured covering all these items, which is manifestly impossible at this short session.

Mr. SNYDER. Now will the gentleman yield?

Mr. MONDELL. Or leave the Indian Bureau absolutely without funds. Let me again suggest that the gentleman's committee, which has been continuously in session and which has recently brought out new legislation, has brought out no new legislation or authorizations covering these points.

Mr. SNYDER. In response to that I say I have answered that question before, and I am glad to know that the gentleman's understanding of the English language is such that he can use it the way he did in regard to myself a few minutes ago and not say that he was criticizing me. I do not object to

being criticized, but I want to say to the gentleman now I am only trying, as I said before, and I believe I am within my rights, and I shall continue this policy through the hearing of this bill, to say again that there is a place where this legislation can be obtained in the regular way and my committee is ready to go to work on it, and it will not delay the House to any great extent to have it done.

Mr. MONDELL. The gentleman may be able to convince the House that he is affording necessary protection to his committee when he makes a point of order against an appropriation for an Indian policeman or for telegraph and telephone services, or for various other of the necessary and essential activities of the department which have been provided for from time immemorial, and which were carried on the Indian bill when he reported it, but the gentleman will not convince me, however convincing his arguments may be to the other gentlemen in the House, that the attitude he has assumed is an attitude necessary for the protection of the rights of his committee. No one is attempting to extend the authority of the Indian Bureau; no one is attempting to begin any new activity or to greatly extend any old activity. No one is attempting to do anything in connection with the Indian Service that the gentleman himself did not approve as chairman of the committee and provide for in the bill that he brought in last year. And the Committee on Appropriations, in order that it might not be subject to criticism, has eliminated from this bill every item of new legislation and left it stripped to the very bone, with nothing in it but items of appropriation carried for years on the Indian bill, and approved by us all. The gentleman's committee is not going to do away with Indian policemen. It is not proposing, I assume, to do away with the necessary and essential and time-honored activities of the Indian Service. And in view of the fact that there is nothing in this bill that creates new activities, extends old activities or provides new authority, as I see it there is no necessity from the standpoint of the protection of the gentleman's committee for the injection of these points of order.

The CHAIRMAN. Can the gentleman from Wyoming cite to the Chair the authority for appointment of judges of Indian courts? The Chair has been unable to find any.

Mr. MONDELL. Mr. Chairman, not having been advised that practically every activity of the Indian Bureau, every necessary activity of the Indian Bureau, was about to be challenged, the "gentleman from Wyoming" has not looked these matters up. But I am of the opinion that as laws have been passed, which I have quoted to the Chair, providing for the punishment of crimes by Indians on Indian reservations, it follows there must be judges and it follows there must be tribunals to try them.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

Mr. HASTINGS. Mr. Chairman, I move to strike out the last two words. I just want to engage the attention of the committee for a moment.

Mr. SNYDER. Mr. Chairman, I rise to a point of order and desire to know what the two words are that are stricken out?

The CHAIRMAN. The gentleman from Oklahoma [Mr. HASTINGS] asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. Mr. Chairman and gentlemen of the committee, as a member of the subcommittee that prepared this bill I want to say that we tried harder to keep all legislation off of this bill than was ever attempted in any appropriation bill since my service in this House.

If you will take up this bill from cover to cover, you will find we have used almost the identical language that was used in previous bills, here and yonder striking out provisions that contained permanent legislation, but where the item was provided for we tried to use and did use, almost in the entire 52 pages of this bill, language that was used in the bill that came from the Committee on Indian Affairs last year and from the same committee the year before.

Now, I want to call attention to the first item, that of "Surveying and allotting Indian reservations." I do not believe there is any change in the language there at all, except in the amount appropriated. The next item is "Irrigation on Indian reservations, reimbursement." That is practically the same, except there is a change of the amount appropriated in the various items. The next one is "Suppressing liquor traffic." It is exactly the same, except as to the amount appropriated. The next item "Relieving distress," and so forth; I think the language is exactly the same, except there is a reduction in the amount. The next item is "Support of Indian schools," and my recollection is that the language is exactly the same, except the amount appropriated. The next item, on page 8, is "Indian school and agency buildings." I think the language is exactly the same, perhaps, including the amount appropriated as last year. The next item is "Indian school transportation." My recollection is the item is exactly the same as last year, except the amount appropriated. "Industrial work and care of timber." That has gone out on a point of order. The language is exactly the same as that of last year, except the amount of the appropriation is reduced, in my recollection, $60,000. The next item is "Expenses incident to purchase and transportation of Indian supplies." My recollection is it is exactly the same as last year. The next item is the one entitled "Telegraphing and telephoning." It is exactly the same and the amount appropriated is exactly the same. The next item is "Court costs," on page 11. There is no change in the wording. The next item is "Expenses of Indian commissioners." There is no change in that. In the next item, "Pay of Indian police," there is no change, except we cut it down to $150,000, reducing it $50,000.

We went all through this bill and were careful not to allow any new projects or new items. We were careful not to permit the Indian schools throughout the country to build any new buildings, dormitories, or assembly halls, or anything of that kind. In other words, every new project connected with every Indian school throughout the country was eliminated from this bill. The committee tried to use, as far as we possibly could, the verbatim language which was used in the appropriation bill of last year.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. I called attention yesterday to one or two changes, but with those exceptions we tried to follow the language that was followed by the Indian Committee last year.

And, Mr. Chairman, I want to emphasize, in closing, the fact that the Committee on Indian Affairs last year, so far as the appropriation bill was concerned, had no more authority than this appropriating committee has to bring in any item of legislation on this bill. It is true that the Committee on Indian Affairs has legislative authority on a legislative bill, but the Committee on Indian Affairs had no authority to place an item of legislation on an appropriation bill.

The point I am trying to drive home, the point I am trying to emphasize, is that the Committee on Indian Affairs in bringing in this bill last year had no more authority than this appropriating committee now has for putting on a new item, no authority to add any piece of legislation, no more than this committee has.

It has legislative authority upon a legislative bill, but it has no legislative authority upon an appropriation bill; and every one of these items, if subject to a point of order now, was subject to a point of order last year. But the gentleman at the head of the Committee on Indian Affairs and the other members of the Committee on Indian Affairs approved those items; they approved the language then, and they brought in this bill in the language to which I have invited your attention.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CARTER. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. CARTER. Mr. Chairman, I do not think any criticism whatever can be lodged against the two gentlemen in charge of this bill—the gentleman from California [Mr. ELSTON] and the gentleman from Oklahoma [Mr. HASTINGS]—for any work they have done in connection with bringing in this bill. They have brought into the House one of the best bills that has ever been brought here. [Applause.] They have made reductions in every place, almost, where reductions could have been equitably and intelligently made. [Applause.] They have brought in a bill as clean of legislative provisions as any Indian bill that has been brought in during my 14 years' service here.

I do not think any improvement could have been made in the selection of two gentlemen to make up this bill, and the mere fact that the gentleman from New York [Mr. SNYDER], the chairman of the Committee on Indian Affairs, and myself, as ranking member of the Committee on Indian Affairs, were not selected to do this work does not stick in my craw in the least——

Mr. SNYDER. Nor in mine.

Mr. CARTER. I take off my hat to both of these gentlemen and salute them as able legislators, understanding all the intri-

cacies of this bill, and fully competent to take care of the matter, so far as any two men may be able to do it. I have no criticism against them. I compliment them both.

But, Mr. Chairman, I do inveigh against the system of taking an appropriation bill away from a committee of 21 members that gives it careful consideration and lodging that authority in two men. [Applause.] I can not speak for the gentleman from California [Mr. ELSTON], nor have I any brief for the gentleman from Oklahoma [Mr. HASTINGS], but I do not believe the gentleman from Oklahoma will dispute very long with me about that contention.

Mr. MOORE of Virginia. Mr. Chairman, may I ask the gentleman a question?

Mr. CARTER. Yes; I yield to the gentleman.

Mr. MOORE of Virginia. Does the gentleman think, simply because the authority has been vested in one large committee which was formerly exercised by one of the larger standing committees of the House that that is one good reason for blocking useful legislation?

Mr. CARTER. Mr. Chairman, I am not addressing myself to that phase of the matter. I am not even criticizing the big appropriating committee which is supposed to attend to these matters. In fact, I favor passing these responsibilities around among the membership, rather than concentrating them within a few. That is just what I complain about. The House has taken away the consideration of the Indian appropriation bill and other appropriation bills from committees of 21 members and has placed that jurisdiction—where? Not with the entire Committee on Appropriations in fact and in practice, but with two members.

Mr. BYRNS of Tennessee. Now, Mr. Chairman, will the gentleman yield?

Mr. CARTER. Yes; I yield.

Mr. BYRNS of Tennessee. The gentleman understands, of course, that there was a subcommittee of five, who were appointed and who conducted the hearings and prepared this bill and reported it to the full Committee on Appropriations, which approved it before it was submitted to the House?

Mr. DUPRÉ. Mr. Chairman——

Mr. CARTER. One at a time. I have not yielded to the gentleman from Louisiana.

Mr. BYRNS of Tennessee. If the gentleman will pardon me, the only reason why I made that statement was because for the second time the gentleman has stated that this bill was taken from a committee of 21 members and placed in charge of 2 members, which is not in accordance with the actual facts.

Mr. CARTER. I think it is in accordance with the actual facts, because for most of the time consumed in making up this bill I dare say these two Members were the only ones present.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I will, just as soon as I get through with both of my friends on my own side here. The gentleman from Tennessee [Mr. BYRNS] says, as I understood him, that the bill was placed in the hands of a subcommittee of five. That is true, but for most of the time, I venture to say, only these two men were present. He says that it was considered by the Committee on Appropriations. The only evidence I have as to the time that was taken up by the full Committee on Appropriations in the consideration of this bill of 52 pages was the fact that the gentleman from Oklahoma [Mr. HASTINGS] was sitting with the Indian Committee on a very important matter, and told us he had to go down and attend to the consideration of the Indian appropriation bill by the Committee on Appropriations, and he came back, having finished the bill, in exactly 20 minutes. [Applause.]

Mr. BYRNS of Tennessee. If the gentleman will pardon me, I did not mean to say that the entire Committee on Appropriations had conducted the hearings and prepared this bill. What I did say was this, that the estimates on this bill were placed in the hands of a subcommittee of five, of which the gentleman from California [Mr. ELSTON] was chairman and the gentleman from Oklahoma [Mr. HASTINGS] was the ranking minority member. That subcommittee of five conducted the hearings and then prepared the bill and reported it to the full committee.

Mr. CARTER. The gentleman is taking up all my time.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CARTER. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

Mr. MADDEN. Reserving the right to object, I should like to ask the gentleman a question.

Mr. CARTER. I shall be glad to answer it as soon as I answer this one.

The CHAIRMAN. Is there objection?

Mr. MONDELL. Mr. Chairman, I think we ought to bring this post-mortem fight on the budget to an end. I think we ought to go on with the Indian bill. Gentlemen who did not see fit to oppose the budget when it was before the House now attack it in this indirect way.

Mr. CARTER. I will tell the gentleman that I was not present at the time.

The CHAIRMAN. Does the gentleman from Wyoming object?

Mr. MONDELL. No; I do not object.

Mr. MADDEN. I reserve the right to object.

Mr. CARTER. I shall be glad to yield if the gentleman will allow me to answer the question that has been asked me.

Mr. MADDEN. I would like to ask the gentleman a question before I yield. Will the gentleman yield for a question?

Mr. CARTER. Yes; I yield. The gentleman always holds me up in the last analysis.

Mr. MADDEN. Is the gentleman a member of the Indian Affairs Committee?

Mr. CARTER. Yes.

Mr. MADDEN. Does the Indian Affairs Committee appoint a subcommittee to hold hearings?

Mr. CARTER. I will answer the gentleman in the course of my remarks.

Mr. MADDEN. I would like to have the gentleman answer that question directly.

Mr. CARTER. I will answer that in my own way.

Mr. MADDEN. Does the committee appoint a subcommittee?

Mr. CARTER. Yes; and the Committee on Indian Affairs——

Mr. MADDEN. Now, let me ask the gentleman another question.

Mr. CARTER. Wait until I answer the first one. The Committee on Indian Affairs appoints a subcommittee of five to consider the appropriation bill, and it takes in with full power as a member of that subcommittee every other member of the full committee who desires to take part in the original making of the bill.

Mr. HASTINGS. If the gentleman will permit me, that was done two years ago when the gentleman was chairman; but he will remember that last year the chairman, Mr. SNYDER, did not permit the other members of the full committee, except the subcommittee, to take part in it or have anything to say about making up the bill.

Mr. SNYDER. We allowed them to sit, but not to vote.

Mr. CARTER. The gentleman may be right about that. I was speaking as to the practice before the last Congress.

Mr. HASTINGS. I recall the discussion in the committee about that.

Mr. CARTER. The procedure in the past has been what I have stated.

Mr. MADDEN. Mr. Chairman, will the gentleman permit me? I think I have the floor.

Mr. CARTER. I think not.

Mr. MADDEN. I think I have.

Mr. CARTER. Then the gentleman can object if he wants to.

SEVERAL MEMBERS. Regular order, Mr. Chairman.

The CHAIRMAN. The regular order is called for. The gentleman from Oklahoma has the floor.

Mr. MADDEN. Now I should like to ask the gentleman a question.

Mr. CARTER. I will answer the question in a moment, if the gentleman will give me time. The gentleman ought to realize that I have some rights on the floor myself. Now, as the gentleman from Oklahoma [Mr. HASTINGS] knows, the procedure here has been just as I have stated, that every member of the full committee sat in as a full member of the subcommittee. Perhaps the gentleman is right as to the procedure last year. I will not dispute with him about that, but for several years before that the full committee, the whole Indian Affairs Committee of 21 members, had the privilege of taking part in making up this bill. The only reason a subcommittee was designated at all was in order that a quorum might be more easily obtained. When the subcommittee or the whole committee setting as a subcommittee finished its work on the bill, then the committee took up the subcommittee report and carefully scrutinized and considered each item, paragraph by paragraph.

Mr. HASTINGS. The gentleman is right as to that, two years ago when the gentleman was chairman. The gentleman did allow other members of the committee to come in and take part, but last year while other members were allowed to come in and ask questions they were not allowed to vote.

Mr. CARTER. The gentleman may be right about that. Now I yield to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. I should like to ask the gentleman did not the subcommittee of five report out the bill to the full committee?

Mr. CARTER. Yes.

Mr. MADDEN. And what did the full committee do with it?

Mr. CARTER. If the gentleman will permit me, I will answer that question in my own way, and when I get through I do not think the gentleman will have any other question to ask.

After the bill was made up by the subcommittee, and as many other members of the full committee as desired to take part, then they called in all the committee and had a general committee meeeting, and every item of the bill was gone over by that full committee. The bill was read item by item, and reductions made by the full committee, and changes made by the full committee that had not been made by the subcommittee when it was prepared by them. Now, has the gentleman any other question?

Mr. MADDEN. Was it always true that they made reductions? The gentleman says they made reductions. Did they always make reductions?

Mr. CARTER. Not always; certainly not.

Mr. MADDEN. They sometimes made increases, did they not?

Mr. CARTER. I presume so, as is always done, as the gentleman has often done in his bill.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired. The Clerk will read.

The Clerk read as follows:

GENERAL EXPENSES OF INDIAN SERVICE.

For pay of special agents, at $2,000 per annum; for traveling and incidental expenses of such special agents, including sleeping car fare, and a per diem of not to exceed $3.50 in lieu of subsistence, in the discretion of the Secretary of the Interior, when actually employed on duty in the field or ordered to the seat of government; for transportation and incidental expenses of officers and clerks of the Office of Indian Affairs when traveling on official duty; for pay of employees not otherwise provided for; and for other necessary expenses of the Indian Service for which no other appropriation is available, $125,000: *Provided*, That $5,000 of this amount shall be immediately available: *Provided further*, That $7,500 of this appropriation shall be used for continuing the work of the competency commission to the Five Civilized Tribes of Oklahoma.

That the Secretary of the Interior be, and he is hereby, authorized and directed to expend not less than $15,000 out of applicable funds in the work of determining the competency of Indians by competency commissions on Indian reservations outside of the Five Civilized Tribes in Oklahoma.

Mr. SNYDER. Mr. Chairman, I make the point of order on the paragraph. There is no authority for it in law.

The CHAIRMAN. Will the gentleman specify the particular language?

Mr. SNYDER. On page 12, beginning with line 7.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HASTINGS. Mr. Chairman, the point of order comes too late.

Mr. ELSTON. Mr. Chairman, I want to cite the law for this item.

The CHAIRMAN. The Chair will hear the gentleman from California.

Mr. ELSTON. It is Thirty-sixth Statutes at Large, page 55, authorizing the Secretary of the Interior to determine, and prescribing the scope of his authority in that respect.

The CHAIRMAN. What authority in law is there for the language providing that $5,000 of this money shall be immediately available?

Mr. ELSTON. Do I understand that the Chair has just ruled on the point of order made to the paragraph on page 12, general expenses of Indian Service?

The CHAIRMAN. Yes.

Mr. ELSTON. If the point of order is made to the entire paragraph, I would offer the same arguments I have made with regard to items of appropriations covering necessary activities of the bureau that are included by implication in the organic act creating the bureau.

The CHAIRMAN. Would that authority go to the extent of making the certain amount immediately available?

Mr. MONDELL. Mr. Chairman, do I understand that the point of order applies to the two paragraphs, or only to the paragraph ending with line 21, on page 12?

Mr. SNYDER. Mr. Chairman, the point of order applies to both parts of the paragraph.

Mr. HASTINGS. Mr. Chairman, what is the point of order that the gentleman made; what does it apply to?

Mr. SNYDER. I do not think it is necessary to state it again.

Mr. HASTINGS. If the gentleman does not want to extend that courtesy, then I ask the Chair to state what the point of order is?

The CHAIRMAN. The gentleman from New York made the point of order to the paragraph beginning with line 7 on page 12. The Chair asked the gentleman from California to give the authority for the language in line 18, which provides that $5,000 of this amount shall be immediately available. That is clearly subject to the point of order, and of course vitiates the whole paragraph.

Mr. ELSTON. Then, Mr. Chairman, I offer an amendment at this place, it being the same paragraph striking out the item to which the point of order was sustained.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 12, beginning with line 6, insert the following:

"GENERAL EXPENSES OF INDIAN SERVICE.

"For pay of special agents, at $2,000 per annum; for traveling and incidental expenses of such special agents, including sleeping-car fare, and a per diem of not to exceed $3.50 in lieu of subsistence, in the discretion of the Secretary of the Interior, when actually employed on duty in the field or ordered to the seat of government; for transportation and incidental expenses of officers and clerks of the Office of Indian Affairs when traveling on official duty; for pay of employees not otherwise provided for; and for other necessary expenses of the Indian Service for which no other appropriation is available, $125,000: *Provided further*, That $7,500 of this appropriation shall be used for continuing the work of the competency commission to the Five Civilized Tribes of Oklahoma.

"That the Secretary of the Interior be, and he is hereby, authorized and directed to expend not less than $15,000 out of applicable funds in the work of determining the competency of Indians by competency commissions on Indian reservations outside of the Five Civilized Tribes in Oklahoma."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from California.

Mr. SNYDER. Mr. Chairman, I make the point of order on the amendment.

The CHAIRMAN. Will the gentleman please state the point of order?

Mr. SNYDER. The point of order is that it embodies practically every feature of the paragraph to which I have just made the point of order, except the language which provides that $5,000 of the amount shall be immediately available. The point I make is that there is no authority for it in law.

The CHAIRMAN. The Chair will hear the gentleman from California.

Mr. MONDELL. Mr. Chairman, what is the gentleman's point of order? To what part of the paragraph does the point of order apply?

Mr. SNYDER. There is no authorization for the paragraph, and therefore it can not be amended by offering something which covers the same proposition.

Mr. MONDELL. Is it the gentleman's contention that there is no authorization for special agents or for the pay of special agents?

Mr. SNYDER. The gentleman does not contend any such thing. He contends that there is a proper place in the Congress where legislation for those purposes may be instigated and brought into the House. I have no objection to the amount. I have no objection to the amount for Indian judges or for police; nothing of the sort. That is not my argument here to-day. It is simply what I have stated several times before, and I think I am within my rights and within the rule.

Mr. MONDELL. Mr. Chairman, I think the gentleman should make his point of order specific, rather than to make general observations. One does not know what expenditure is objected to.

Mr. SNYDER. My point of order, I stated to the Chairman, is exactly the same against the amendment that it was against the original paragraph, that there is no authority in law for such legislation.

Mr. MONDELL. Does the gentleman contend there is no authority of law for the employment of special agents?

Mr. SNYDER. I contend that there is no continuing authority in law to pay the salaries of those people; that it must be provided in each annual appropriation bill.

The CHAIRMAN. The Chair will ask the gentleman from Wyoming [Mr. MONDELL] or the gentleman from California [Mr. ELSTON] for the authority for the language in lines 22 and 23, page 12—

and he is hereby authorized and directed to expend.

Mr. ELSTON. Mr. Chairman, the Clerk read the amendment, and the amendment was practically the first paragraph, with the omission of the language—

that $5,000 of this amount shall be immediately available.

The CHAIRMAN. But the amendment which the gentleman sent up includes the two paragraphs.

Mr. ELSTON. Then I shall stand on the amendment as proposed, which would carry the second paragraph of the present text.

The CHAIRMAN. The Chair would like to know the authority for the words in lines 22 and 23—

and he is hereby authorized and directed to expend.

Mr. ELSTON. There is no authority outside of the practice of previous appropriation acts, so far as I know. There is no basic legislation for it.

Mr. MONDELL. If the Chair will permit me, I do not quite catch the thought of the Chair with regard to that. That is the ordinary term of appropriation. It is an appropriation out of available funds.

The CHAIRMAN. If this is already authorized, why repeat it here in an appropriation bill?

Mr. MONDELL. Clearly, the declaration of the competency of Indians is authorized in a dozen statutes, and the Secretary must, of course, expend money to determine the competency or the incompetency of Indians. I think no one questions the provisions of the statutes authorizing and directing the Secretary to inquire into the competency of Indians.

The CHAIRMAN. However, that would be legislation.

Mr. MONDELL. No. But there is legislation on that subject, legislation authorizing and directing the Secretary to declare certain Indians competent under certain conditions, and of course the legislation authorizing and commanding him to inquire into the competency of Indians carries with it necessarily authority to make an appropriation for that purpose.

The CHAIRMAN. If that authority is already in the law, why this immediate direction here in this bill? That is the question with the Chair.

Mr. SNYDER. Mr. Chairman, there is no authority in law for a competency commission. We are trying to bring in a bill which will make the law authorizing and directing the bureau to put competency commissions in operation.

Mr. MONDELL. If the Chair will allow, do I understand the Chair that he would have no question in his mind if the language had been "to enable the Secretary of the Interior to expend not less than $15,000 out of the applicable funds in the work of determining," and so forth. If that is the difficulty that the Chair is laboring under, I think it could be obviated.

The CHAIRMAN. In reference to lines 18, 22, and 23, that is the only obstacle.

Mr. MONDELL. I think it may not possibly be the usual form of appropriation in an appropriation bill, but it accomplishes just what would have been accomplished if it was stated "to enable the Secretary of the Interior to determine the competency of Indians, $15,000."

The CHAIRMAN. The Chair will hear the gentleman from Illinois.

Mr. MADDEN. Mr. Chairman, I would like to be heard on this. Mr. Chairman, I do not think anyone will deny that there is an Indian Bureau and that there is a situation that has to do with Indians, and that authority has been granted for the organization of a bureau that deals with Indian questions and that authority must extend to a point where expenses must be incurred. Now, it proposes to expend here $125,000 for general expenses of the Indian Service, and of that $7,500 of this sum shall be used in continuing the work of a competency commission of the Five Civilized Tribes. Now, there was a law creating the competency commission, and they have been paid under appropriations made by virtue of that authority. There can be no doubt that in these appropriations under that authority that it is competent to authorize the expenditure of $15,000 more by the Secretary of the Interior out of applicable funds. What are the applicable funds? The applicable funds are $125,000 here proposed to be appropriated under the act authorizing the creation of an Indian Bureau. What was the purpose of organizing the Indian Bureau? Was it to let somebody sit in a swivel chair and draw pay and perform no work? Unquestionably there was a reason for the organization of the Indian Bureau. What was that reason? The reason was we had an Indian question to deal with, and the authority undoubtedly was granted to the bureau to deal with them, and because of the creation of that bureau by law I maintain that this appropriation in the very language proposed in the section and the paragraph to which the gentleman from New York has raised the point of order is perfectly in order, and that it is all being done, not because it has been carried in an appropriation bill in the past in violation of the rules of the House but because of the authority by which the bureau was created and under which it has been acting.

The CHAIRMAN. Will the gentleman allow the Chair to ask a question?

Mr. MADDEN. Certainly.

The CHAIRMAN. The Chair calls attention to the words, in line 23, "and he is hereby authorized." Does the gentleman say that is not legislation?

Mr. MADDEN. No; Mr. Chairman, I would not so consider it. It simply says, and it would not matter what words you employed, that out of the $125,000, about which no question can be made, he is authorized to take $15,000 for a specific purpose. And what is that purpose? It is to determine the competency of Indians. We have in the proviso just before that a provision for the expenditure of $7,500 for the pay of a competency commission. Now, that commission was created and it has been paid and it has been functioning. In addition to the pay these men are to draw there is to be provided some expenditure to ascertain the competency of the Indians. Now, what would be the purpose of paying that $7,500 if they had no work to do? And the work they have to do, the work they are called upon to do, is to ascertain the competency of the Indians. That was the purpose for which they were organized, and they were organized by law. The point of order the gentleman makes against this item of the bill ought not to be sustained.

Mr. CARTER. Mr. Chairman, these competency commission functions are to remove restrictions on competent Indians, and the Burke Act, the acts of 1904 and of April 26, 1906, and the act of May 27, 1908, all provide for the removal of restrictions which would authorize the work of this commission and the salaries therefor. I have been looking for these authorizations. I have the cases in my hand, but I have not had time to run them down, except to refer to them. The act of May 27, 1908, says:

> The Secretary of the Interior shall not be prohibited by this act from continuing to remove restrictions as heretofore, and nothing herein shall be construed to impose restrictions on the removal of their land—

And so forth.

Now, the act of 1904 and the act of April 26, 1906, as far as I have gone to look them up, specifically authorize and direct the Secretary to remove restrictions.

The CHAIRMAN. Would the gentleman permit a question by the Chair?

Mr. CARTER. Yes.

The CHAIRMAN. If the authorization is already made, why the words "and he is hereby authorized"?

Mr. CARTER. I have not the language before me at the moment, but such language is unnecessary.

Mr. ELSTON. Mr. Chairman, the essence of the proposition would be the effect of the direction and not the language used, and the effect is not to appropriate anything but a direction with regard to an appropriation relative to its disposition or allocation.

Now, the very use of the word "authorized" in connection with a direction as to the use of the money already appropriated surely does not constitute a legislative clause. It is a mere direction with regard to how money should be used.

Now, I would like to offer this general observation while I am on my feet. The rule does not say or declare that no appropriation shall be tacked onto an act of this kind unless it has heretofore been authorized by law. The rule does say that appropriations that otherwise would be subject to a point of order may be put in an act of this kind for either public work in progress or for objects already in progress. Now, the Chair, therefore, is put to the question almost of determining a question of fact here, and not of law, with regard to examination of these points of order. The Chair can well ask if the item covered by this appropriation is for an object in progress, and if the Chair determines that this appropriation is made for something that is in the course of action, and has been adopted by the bureau, and that would cause a disaster possibly, or waste or deterioration by not continuing it, the Chair then could invoke the rule with regard to the exception and apply it here. But this appropriation is for an object now progressing, and, if it be such, the appropriation is in order. That consideration has not been put before the Chair heretofore, but it practically puts to the Chair an examination of a question of fact, and I submit it is up to the gentleman making the point of order to show that the item is not a public work in progress.

Mr. GARRETT. Mr. Chairman, I do not care to discuss the point of order, because I do not know anything about the facts in this case or the law applicable here, but I do want to submit this observation in regard to the statement made by the gentleman from California [Mr. ELSTON]. It is, of course, under the rule, in order to appropriate money for the continuation of a work in progress; but the Chair may not lose sight of the fact that it must be a work which was originally authorized by law. Now, I do not know what the fact is about this; I do not know what the law is about this; but if this was not originally authorized by law, then the reasoning of the gentleman from California [Mr. ELSTON] would not apply.

Mr. MONDELL. If the gentleman will permit, the gentleman from Oklahoma [Mr. CARTER] called attention to the fact that the work of ascertaining the competency of Indians had been provided for by law.

Mr. GARRETT. I am not discussing that particular point, but the aspect of it suggested by the gentleman from California. I simply desire to submit this observation: It is in order to appropriate and bring in as a part of an appropriation bill money to continue work in progress where that work was originally authorized by law, but only where it was originally authorized by law.

Mr. ELSTON. I will say that it was an appropriation authorized by law.

The CHAIRMAN. The Chair would like to ask the gentleman from Tennessee as to the language:

And he is hereby authorized and directed to expend.

Is that legislation or not?

Mr. GARRETT. Mr. Chairman, I am totally ignorant of what the law is on this matter, but I will say in answer to the Chair's inquiry that the peculiar expression there might indicate that there is no law; that is, it might be fairly inferable from the form of expression that there is no law. Still, that would not necessarily be conclusive. There may be law for it—I do not know how that is—and still the appropriation be couched in that language, though I can see, in the absence of any law being cited, it would be a natural thing for the Chair to infer that this is itself a creation of law. If there is no law, the form suggested by the gentleman from Wyoming [Mr. MONDELL] a moment ago would not change the parliamentary situation. If there is law, the paragraph as it stands is in order.

The CHAIRMAN. The Chair, in the absence of any citation of law for this authority, must rule that this——

Mr. MONDELL. Authority of law for what?

The CHAIRMAN. Authority of law to determine the competency of Indians, namely:

That the Secretary of the Interior be, and he is hereby, authorized and directed to expend not less than $15,000 out of applicable funds in the work of determining the competency of Indians.

Mr. MONDELL. Affecting the competency of Indians? I think there are a number of facts relating to the germaneness.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HAYDEN and Mr. ELSTON rose.

The CHAIRMAN. The gentleman from California is recognized.

Mr. ELSTON. Mr. Chairman, I desire to offer an amendment. It is a portion of the paragraph leaving off the last clause, to which a point of order was sustained.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. ELSTON offers the following amendment: Page 12, at the beginning of the page, insert:

"For pay of special agents, at $2,000 per annum; for traveling and incidental expenses of such special agents, including sleeping-car fare, and a per diem of not to exceed $3.50 in lieu of subsistence, in the discretion of the Secretary of the Interior, when actually employed on duty in the field or ordered to the seat of government; for transportation and incidental expenses of officers and clerks of the Office of Indian Affairs when traveling on official duty; for pay of employees not otherwise provided for; and for other necessary expenses of the Indian Service for which no other appropriation is available, $125,000: *Provided*, That $5,000 of this amount shall be immediately available: *Provided further*, That $7,500 of this appropriation shall be used for continuing the work of the competency commission of the Five Civilized Tribes of Oklahoma.

Mr. SNYDER. Mr. Chairman, I make a point of order against that part of the amendment which reads:

Provided further, That $7,500 of this appropriation shall be used for continuing the work of the competency commission of the Five Civilized Tribes of Oklahoma.

I make the point of order on the same ground, that there is no authority of law for the provision.

The CHAIRMAN. The gentleman from New York makes the point of order on the proviso of the amendment. Can the gentleman from California cite the authority for the competency commission?

Mr. ELSTON. I will refer the chairman to the statute enacted May 6, 1906, being an act to provide for the allotment of land in severalty to Indians on the various reservations, and in that act is found this language:

The Secretary of the Interior may, in his discretion, and he is hereby authorized, whenever he shall be satisfied that any Indian allottee is competent and capable of managing his or her affairs at any time, to cause to be issued to such allottee a patent in fee simple.

Now, there is a direct authority to the Secretary of the Interior to do this preliminary act, namely, to determine the competency of the Indian; and that is surely an authority for him to use agencies to determine the competency, and this is the agency.

Mr. SNYDER. Mr. Chairman, I call the attention of the Chair, however, to the fact that there is no language in there with reference to a competency commission. That dealt wholly with the right of the commissioner to send word to the superintendent or agent on the reservation to investigate the particular Indian with reference to competency, and has no reference whatever to the competency commission.

Mr. MONDELL. Mr. Chairman, may I cite to the Chair another provision of law?

The CHAIRMAN. The Chair will be glad to have the gentleman do so.

Mr. MONDELL. The act of June 25, 1910, page 856 of the Statutes at Large, Sixty-first Congress, provides:

That the Secretary of the Interior is hereby authorized, in his discretion, to issue a certificate of competency upon application therefor to any Indian, or, in case of his death, to his heirs, to whom a patent in fee containing restrictions or alienation has been or may hereafter be issued, and such certificate shall have the effect of removing the restrictions or alienation contained in such patent.

The CHAIRMAN. The Chair overrules the point of order, both on the amendment and on the amendment to the amendment. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment as amended.

Mr. HAYDEN. Mr. Chairman, what became of the provision on line 22, on page 1, running over to page 13, about that?

The CHAIRMAN. That is eliminated.

Mr. HAYDEN. That will not be a part of the bill?

The CHAIRMAN. That will not be a part of the bill.

Mr. HAYDEN. I desire to offer an amendment.

The CHAIRMAN. At this time?

Mr. HAYDEN. Yes.

The CHAIRMAN. The question is on agreeing to the amendment as amended.

Mr. MONDELL. Mr. Chairman, if the Chair will allow me, possibly I have lost track of the proceedings. The original paragraph went out on a point of order. Then an amendment was offered, which also went out on a point of order. Then another amendment was offered. There was not an amendment to the amendment, as I recall.

The CHAIRMAN. The gentleman states the parliamentary situation correctly.

Mr. MONDELL. The question, then, was on the amendment?

The CHAIRMAN. Yes.

Mr. HAYDEN. And it was adopted?

The CHAIRMAN. Yes; it was adopted.

Mr. HAYDEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page 12, after line 21, insert: "*Provided*, That not to exceed $15,000 of the amount herein appropriated may be expended out of applicable funds in the work of determining the competency of Indians on Indian reservations outside of the Five Civilized Tribes in Oklahoma."

Mr. SNYDER. Mr. Chairman, I make a point of order on the amendment.

The CHAIRMAN. The gentleman from New York makes the point of order on the amendment.

Mr. HAYDEN. As to the point of order, let me say that, from the citation read by the gentleman from Wyoming, the Secretary of the Interior undoubtedly has authority to issue certificates of competency to Indians. I understood the Chair to hold that the provision as reported by the committee was not in order because it "authorized and directed" the Secretary of the Interior to expend $15,000 in determining the competency of Indians. My amendment merely permits the Secretary to do that which is now authorized by the law cited by the gentleman from Wyoming.

The CHAIRMAN. The Chair overrules the point of order. The question is on agreeing to the amendment offered by the gentleman from Arizona.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. CONNALLY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. CONNALLY. Mr. Chairman and gentlemen of the committee, it seems to me a little bit ironical that this House should adopt a piece of legislation providing for a commission to determine the competency of Indians, when the country has had a demonstration here this afternoon, if it required any demonstration, that thoroughly establishes the fact that the Republican majority in this Congress, operating as it is under its present rules, is not itself competent to transact in an orderly and efficient manner the ordinary affairs of this Government.

The principal work of this Congress, or rather its principal activity, like all other Congresses, is to get money into the Treasury and then to appropriate that money out of the Treasury. That is not unlike the practices of other governments, for that matter. I was one of those who voted at the last session for the adoption of the amendment to the rules providing for one appropriating committee of 35 members. I was at that time a member of a committee that had appropriating power. I willingly surrendered that privilege. Under the leadership of the majority, the present majority, many of us on this side of the Chamber voted for that measure, hoping then and still hoping that it would be productive of benefit. We followed the Republican proponents because they promised reforms in fiscal affairs. But we found soon thereafter that the jealousies of chairmen of committees, stripped of their power to appropriate, the jealousies of members of the appropriating committee of 35 members, who find it difficult to appropriate without legislating, had been engendered to such a degree that they were resulting in the impeding of legislation, in the cluttering up of legislation, and in the increase of appropriations by the consumption of more time in consideration of legislation; and to-day the country witnesses the spectacle of the Republican majority leader of the House having to come on the floor of the House and take personal charge of the Indian appropriation bill, which is comparatively an insignificant appropriation measure.

We behold this leader, who only a little while ago was urging the one Appropriation Committee, in making an argument to the chairman of this committee, to sustain items contained in this bill which were legislative items, appealing to the Chair and to the House that although the rule established prescribes that no appropriation bill shall carry legislation, the House should indulge the "rule of reason," and if the legislation is not very legislative, if it is not too legislative, the House and the chairman of the committee should forget the rule for the moment.

According to the views of the gentleman it is only in those cases where the legislation on an appropriation bill is abundant, or, in the words of the gentleman from Wyoming, where a committee brings in reams of legislation, that this new rule should be invoked. I should like to inquire whether or not the majority in control of this House intend to carry out this rule in good faith. I for one am hopeful that the rule will be observed in good faith, because I am in favor of one appropriating committee, though it deprives the committee of which I am a member of appropriating authority. However, the legislative committees mistake their duty to the country if they believe that the country and this House will be whipped into the belief that the old system should be restored simply by a campaign of legislative sabotage, by objecting to all proper legislation on an appropriation bill, unless they provide authorizations for necessary items. What these legislative committees ought to do is to exercise their function and bring in authorizations.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CONNALLY. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that his time be extended five minutes. Is there objection?

Mr. MONDELL. Mr. Chairman, the gentleman from Texas has made a very able argument. I hope he will consider that sufficient. We ought to go on with the business of the House.

Mr. CONNALLY. I will say to the gentleman that I have not heretofore taken up any time on this bill. I rarely take up time. The gentleman has had a very wide forum here for the expression of his views to-day.

The CHAIRMAN. The Chair hears no objection.

Mr. CONNALLY. I want to say that the duty of the gentleman and his majority, and of the steering committee of this House—since they carry the destinies of the House in the hollow of their hands—instead of coming on the floor of the House and lecturing the chairman of the Indian Affairs Committee and lecturing other chairmen on the Republican side of the House, it is the duty of the gentleman from Wyoming to put these legislative committees to work, to bring in authorizations which will really permit this House to legislate and at the same time obey its own rules. The legislative committees, if they but knew it, instead of being robbed of power by the Appropriations Committee, are being endowed with new power, because they alone have it within their power to determine what authorizations shall be made. The Appropriations Committee's duty will then be largely administrative. But under the present system, instead of bringing in authorizations you stand on the floor of the House to object, and by so doing you simply transfer the power of appropriating money from the House of Representatives, where the Constitution provides it shall reside, over to the other end of the Capitol; because when this bill goes to the other end of the Capitol, everybody knows that these items—a great many of them—will be reinserted by the Senate. And I say to the gentleman from Wyoming [Mr. MONDELL] and his Republican chairmen, almost all of whom cheered lustily the statement of the gentleman from Oklahoma [Mr. CARTER] that the new rule ought not to be adhered to, that they ought to go out and do their duty as laid down by the rules, and not be bushwhacking the Appropriations Committee in undertaking to carry out what they ought to do. [Applause.]

Mr. SNYDER. Mr. Chairman, perhaps the gentleman was not in here at the time I made the statement that we have not had the opportunity. This bill was sent to the Appropriations Committee, not to the Indian Affairs Committee, and we had no opportunity to work out the legislative items for this bill.

Mr. CONNALLY. I think the gentleman from New York [Mr. SNYDER] is an admirable committee chairman. I have watched his career on the Indian Affairs Committee, and I think he is really very much interested in his work; but this rule was adopted at the last session of Congress, and these committees ought to have undertaken, at least in some measure, the duties that were laid upon them by the House when it adopted the rule; and I wonder if the gentleman from Wyoming [Mr. MONDELL] intends during the Sixty-seventh Congress to permit the committees to go along as they are going along now and to set before the country and before the American people such a spectacle as we have witnessed here to-day. Congress receives enough unjust and unmerited criticisms. Let us not make it possible for criticism of a widespread character that is in fact just and merited to go out to the country. Let us not, through puerile and petty jealousies as to who shall be chairman, or jealousies as to the powers and privileges of a few little committees, blind our eyes to the fact that we are here to transact the business of the American people and not merely to preserve the poor and paltry privileges that go with a few ephemeral offices on the floor of this House. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

INDIAN SERVICE INSPECTORS.

For pay of six Indian Service inspectors, exclusive of one chief inspector, at salaries not to exceed $2,500 per annum and actual traveling and incidental expenses, and not to exceed $3.50 per diem in lieu of subsistence when actually employed on duty in the field away from home or designated headquarters, $25,000.

Mr. SNYDER. Mr. Chairman, I make the point of order that there is no authority of law for the item.

Mr. MONDELL. Mr. Chairman, I insist that the gentleman shall make his point of order definite, so that we may understand against what portion of the paragraph it is made.

Mr. SNYDER. I make it against the entire paragraph.

Mr. MONDELL. The gentleman can not take up the time of the House making indefinite and uncertain points of order against the paragraph. We might talk here for two hours about a matter that he has not in his mind at all.

Mr. SNYDER. I have absolutely in my mind the point of order I make. The gentleman has no right to say that.

Mr. MONDELL. The gentleman should state his point of order.

Mr. SNYDER. I have stated my point of order. It is up to the gentleman who is objecting to show that I am not within my rights. I have a perfect right to ask for a decision.

Mr. ELSTON. Mr. Chairman, the references to this service are given me by the Bureau of Indian Affairs and their law officials, and they report to me that they have given me all available references to the law in regard to these items.

Mr. SNYDER. And there is no authority of law.

Mr. ELSTON. The reference to this paragraph is Thirty-eighth Statutes at Large, page 586, section 1.

The CHAIRMAN. The Chair finds this authority:

There shall be appointed by the President, by and with the advice and consent of the Senate, a sufficient number of Indian inspectors, not exceeding five in number—

Mr. SNYDER. That is all the authority there is. This is a superfluous item put in the bill outside of that law. These men are not even under the Civil Service.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HAYDEN. I offer an amendment.

Mr. ELSTON. I offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 13, after line 2, insert: "For pay of five Indian Service inspectors, exclusive of one chief inspector, at salaries not to exceed $2,500 per annum and actual traveling and incidental expenses, and not to exceed $3.50 per diem in lieu of subsistence when actually employed on duty in the field away from home or designated headquarters, $25,000."

Mr. SNYDER. I make the same point of order. The only difference is that the gentleman has reduced the number from six to five. He has changed the word "six" to "five," and there is no authority in law even for five.

The CHAIRMAN. The Chair overrules the point of order.

Mr. WINGO. Mr. Chairman, may I suggest this point of order, that while the law authorizes only five, the amendment provides for six, including the chief.

The CHAIRMAN. The amendment provides for five.

Mr. WINGO. Exclusive of the chief. I am not sure, I do not care anything about it, but this statute provides for five, exclusive of the chief, as I understand it.

The CHAIRMAN. Not exceeding five.

Mr. WINGO. The amendment the gentleman offered covers six—five and one chief.

Mr. ELSTON. Mr. Chairman, I ask unanimous consent that I may reform that amendment and make the number of inspectors four instead of five.

The CHAIRMAN. The gentleman from California asks unanimous consent to modify his amendment in the manner indicated. Is there objection?

Mr. SNYDER. I could object, but I will not.

The CHAIRMAN. The question is on agreeing to the amendment?

Mr. RAKER. Mr. Chairman, I reserve the right to object.

The question was taken, and the amendment was agreed to.

Mr. RAKER. Mr. Chairman, I reserved the right to object and was on my feet at the time. I call the attention of the gentleman from California to the fact that he has cut out two inspectors and still appropriates $25,000 for five. Surely he does not intend to do that?

The CHAIRMAN. The amendment has been agreed to. The Clerk will read.

The Clerk read as follows:

DETERMINING HEIRS.

For the purpose of determining the heirs of deceased Indian allottees having any right, title, or interest in any trust or restricted property, under regulations prescribed by the Secretary of the Interior, $100,000, reimbursable as provided by existing law: *Provided*, That the Secretary of the Interior is hereby authorized to use not to exceed $30,000 for the employment of additional clerks in the Indian Office in connection with the work of determining the heirs of deceased Indians, and examining their wills, out of the $100,000 appropriated herein: *Provided further*, That the provisions of this paragraph shall not apply to the Osage Indians nor to the Five Civilized Tribes of Oklahoma.

Mr. KELLY of Pennsylvania. Mr. Chairman, I move to strike out the last word. I think that probably members of the committee may get an idea from the number of items stricken from this bill that any bill of this kind might be dynamited in the same way by points of order. However, the Committee on Indian Affairs has been working for some 18 months and has learned facts regarding the Bureau of Indian Affairs that gives a very good idea of how this bureau has grown up. There is no agency of the Government quite like the Bureau of Indian Affairs. It is an empire within an empire; it is a United States within the United States. I have had in my office within the last week 60 volumes of reports of commissioners on Indian affairs, and have noted that they continually recommended legislation and never secured it, but at the same time in every appropriation bill, provision was made for new activities, entirely unauthorized. They have built up a great irrigation service by yearly accretion of funds. Our committee has recently brought in a bill to put that division into the Reclamation Service. They have secured $415,000 a year for an Indian health service, largely duplicating our general Public Health Service. They built an entire new department in this fashion. We have brought in legislation transferring that work to the United States Public Health Service. Then they have a forestry division which does exactly what the Forestry Service of the Department of Agriculture does, duplicating the same kind of work. We have just covered that in a bill, also, by transferring these activities to the Forestry Service.

From 1850 down to the present time new activities have been engaged in by this bureau without any shadow of law through provisions on appropriation bills. In 1850 we spent about $800,000 for dealing with all the Indians of the United States, and that continued for some years. Often the commissioners requested that half a million dollars or more be transferred back to the General Treasury, because they could not use the amounts appropriated. Then began the policy of extension. Year after year, decade after decade, new appropriations were asked for until we have a bill here now in 1921 carrying $12,000,000. When the bureau was formed in 1832 the proponents of the measure said that within 25 years every Indian would be out of the jurisdiction of the Indian Bureau and that the bureau would be discontinued. Witness the growth of this bureau from year to year to this date, almost 90 years later. I think the gentleman from New York [Mr. SNYDER] has done a service to-day in that he has shown how a great department was built up here without warrant of law, always through appropriation bills. When it comes to a test we have a $12,000,000 measure, the greater part of which was never authorized by Congress and would never have been authorized by Congress if specific authority had been up for decision. Therefore this bill is on a different basis from almost any other appropriation bill that can be brought in and points of order are more effective in its consideration than on perhaps any other appropriation bill. [Applause.]

The CHAIRMAN. Without objection the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

INDUSTRY AMONG INDIANS.

For the purpose of encouraging industry and self-support among the Indians and to aid them in the culture of fruits, grains, and other crops, $100,000 or so much thereof as may be necessary, which sum may be used for the purchase of seed, animals, machinery, tools, implements, and other equipment necessary, in the discretion the Secretary of the Interior, to enable Indians to become self-supporting: *Provided*, That said sum shall be expended under conditions to be prescribed by the Secretary of the Interior for its repayment to the United States on or before June 30, 1930: *Provided further*, That not to exceed $20,000 of the amount herein appropriated shall be expended on any one reservation or for the benefit of any one tribe of Indians, and that no part of this appropriation shall be used for the purchase of tribal herds.

Mr. SNYDER. Mr. Chairman, I make the usual point of order against the paragraph, that there is no authority in law for this legislation.

Mr. ELSTON. Mr. Chairman, I can find no reference to any authorization in law for this item beyond the practice of 20 years of the Appropriating Committee bringing in bills covering the item and recommending appropriations for it, including the bill of last year, which the gentleman who makes the points of order introduced into the House.

The CHAIRMAN. The Chair sustains the point of order and the Clerk will read.

The Clerk read as follows:

VEHICLES FOR INDIAN SERVICE.

That not to exceed $200,000 of applicable appropriations made herein for the Bureau of Indian Affairs shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles for the use of superintendents, farmers, physicians, field matrons, allotting, irrigation, and other employees in the Indian field service: *Provided*, That not to exceed $15,000 may be used in the purchase of horse-drawn passenger-carrying vehicles, and not to exceed $40,000 for the purchase of motor-propelled passenger-carrying vehicles, and that such vehicles shall be used only for official service: *Provided further*, That such motor-propelled vehicles shall be purchased from the War Department, if practicable.

Mr. SNYDER. Mr. Chairman, I make the same point of order against the paragraph.

Mr. ELSTON. What is the point of order?

Mr. SNYDER. The point of order is that there is no authority in law for this legislation.

Mr. MONDELL. Mr. Chairman, this is not legislation.

Mr. SNYDER. I understand fully what it is. It is simply an allocation of an appropriation.

Mr. MONDELL. It is a limitation.

Mr. SNYDER. And there is no authority in law for it.

Mr. ELSTON. I contend that this committee has authority to limit the appropriations made by it and to allocate them. This is a mere clause that gives standing to an act that has already been passed. It is in the nature of a limitation. It may decrease the expenditures of the Government.

Mr. MONDELL. Mr. Chairman, I insist that the gentleman from New York [Mr. SNYDER] shall be required to state specifically his point of order, for there might be a discussion for hours on this paragraph without touching the matter the gentleman has in mind—if he has anything specifically in mind.

Mr. SNYDER. Perhaps he has not.

Mr. MONDELL. What is the gentleman's point of order? Against what part of the paragraph is it directed? Is there not authority for the bureau to employ motor vehicles, or if the department has authority, has the committee no authority to make that provision? It is incumbent upon the gentleman making the point of order to make it so that the House will understand what his point of order is.

Mr. SNYDER. If the gentleman would give me an opportunity perhaps I might tell him what I have specifically on my mind with reference to the point of order.

Mr. BLANTON. Mr. Chairman, a point of order. I submit that the gentleman from Wyoming should let the gentleman from New York show what is really on his mind.

Mr. SNYDER. Yes. The point I make is that there is no authority in law for this, and what I am endeavoring to do here to-day is to clear up these situations and find out whether

there is any authority in law or not. I have been unable to find any, and I have made a search.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. Yes.

Mr. MADDEN. The gentleman reported all of these items in a bill last year?

Mr. SNYDER. That is very true.

Mr. MADDEN. Did he know then that there was no authority for them?

Mr. SNYDER. He knew that there was no authority in law, but there was some right then to offer them in an annual proposition, not as continuing law.

Mr. MADDEN. If the gentleman will allow me to ask a further question, having known more than a year ago that there was no authority of law for the appropriation to which he is now making the point of order, why was it that the gentleman did not bring authority in from the committee over which he presides?

Mr. SNYDER. Never expecting that the matter would be raised, and probably would not have been raised if it had not been for the fact that a new rule had been put into operation in the House which definitely put this sort of legislation in the legislative committee and takes it away from the Appropriations Committee, as I understand the rule.

Mr. MADDEN. The rule is just exactly the same to-day in respect to points of order as it was before the new Appropriations Committee was organized; no change whatever in it.

Mr. SNYDER. But it is the rule not to legislate upon appropriation bills but to bring in legislation——

Mr. MADDEN. It has been the rule of the House.

Mr. SNYDER. And, of course, every legislative committee knew these things were subject to a point of order when they came in.

Mr. MADDEN. Now, the gentleman, having knowledge they were subject to a point of order, objects to its consideration in the present form. Why did not the gentleman take time to report authority——

Mr. SNYDER. Because the matter was not brought——

[Cries of "Regular order!"]

The CHAIRMAN. Regular order is demanded. The Chair is ready to rule. The Chair overrules the point of order.

Mr. SNYDER. Mr. Chairman, I did not hear the ruling.

The CHAIRMAN. The Chair overruled the point of order.

Mr. DOWELL. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. DOWELL. I move to strike out the last word.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for five minutes.

Mr. GARRETT. Mr. Chairman, I desire to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARRETT. Did the Chair overrule the point of order made by the gentleman from New York on the ground that this was in effect a limitation? Now, the gentleman from New York made a point of order—I do not want to take up time about this matter, because I am not interested in this controversy, but I am interested in this as a result of it—the gentleman from New York made a point of order that there was no authority of law, and the gentleman from California conceded that there was no authority of law, but he insisted that this was in the nature of a limitation. Now, if the Chair based it upon that ground, I have no quarrel with it, and I have no quarrel with the decision, anyhow, except it would be fatally dangerous to have a rule when a point of order is made on the ground that there is no authority of law and that point is conceded and then have the point overruled without explanation.

Mr. ELSTON. It is not my remembrance that I conceded that there was no authority of law to legislate this——

Mr. SNYDER. The gentleman conceded he could find none.

Mr. ELSTON. I meant that in making my reference I could not find any authority of law substantive to the matter of appropriating for motor vehicles and their allocation, but——

Mr. CARTER. May I have the attention of the Chair for a moment?

The CHAIRMAN. The gentleman from Iowa has the floor.

Mr. DOWELL. I will yield the floor to the gentleman from Oklahoma.

Mr. CARTER. Mr. Chairman, the reason for this item being in this bill is that up to 1914 all branches of the service—Indian Service and all others—had been using from their funds amounts necessary to maintain and keep in commission, possibly to purchase, vehicles necessary for the service, but in 1914 the Committee on Appropriations, as I recall it, put a limitation in one of its bills preventing or prohibiting that in the future. Then, in 1915 the Indian Committee and all other committees brought in this provision, not appropriating, it is true, but taking money from other available appropriations to be used for the purpose of maintenance and operation of motor-propelled and other vehicles. Now, this matter came up in 1915. The point of order was made against a provision somewhat similar to this, although not exactly the same as at this time, and the Chair sustained the point of order. The language, it is true, was not the same then as it is now, because that language employed then was that the Secretary is hereby authorized, and so forth, but it carried out the same purpose exactly as this amendment, and I agree with my friend from Tennessee that this can not be considered as a limitation. I did not catch the ruling of the Chair, as I was trying to find this decision at the time he made the decision and did not find it until afterwards.

The CHAIRMAN. The Chair ruled on the question of allocation. All this is out of order, the Chair will state.

Mr. MONDELL. Mr. Chairman, I understand the gentleman from Oklahoma is making a post-mortem argument on the point of order.

The CHAIRMAN. The Chair has overruled the point of order and the gentleman proceeded by unanimous consent. The Clerk will read.

Mr. BANKHEAD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. There is no last word in this section we have just read. The Chair has overruled the point of order. The Chair recognizes the gentleman from Alabama.

Mr. BANKHEAD. Mr. Chairman, I just want to get some information as to one of the classes here of these vehicles provided for the use of field matrons. That is a rather new creature in legislative nomenclature, and I would like to find out exactly what the duties and functions are of a field matron for whom we are providing vehicles at public expense.

Mr. ELSTON. The field matrons perform a very necessary work in the care of the Indians in the West. Their duty is to go out to the Indian homes and teach the Indian women how to prepare food and how to take care of the ordinary hygiene of the house; how to conduct the domestic affairs in an efficient and hygienic way; to look after the health and welfare of the family units, and provide employment for the girls, look after their morals, and so forth. And altogether they are reported as doing a very splendid work, and I think the committee which visited the Indian country last summer would all testify to that fact.

The CHAIRMAN. The Clerk will read.

Mr. HICKS. Mr. Chairman, I move to strike out the last word, in order to ask the chairman a question. In the very last of this paragraph it uses the words:

That such motor-propelled vehicles shall be purchased from the War Department if practicable.

It seems to me there can not be any question about the fact that the War Department has a large number of automobiles and vehicles of various kinds. Why is it not made mandatory to say that the War Department shall sell these vehicles to this bureau?

Mr. PARRISH. Will the gentleman yield?

Mr. HICKS. Yes; I yield.

Mr. PARRISH. I suggest to the gentleman from New York that the same objection occurred to me, and I have an amendment.

Mr. HICKS. I was going to offer an amendment to strike out those last two words.

Mr. PARRISH. That is all right, then. I have an amendment to the same effect.

Mr. HICKS. Mr. Chairman, I offer an amendment to strike out the two words "if practicable."

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr HICKS: Page 15, line 1, after the word "Department," strike out the comma and insert a period, and strike out all of line 2.

Mr. SNYDER. Mr. Chairman, I make a point of order against the amendment. There is no authority of law.

The CHAIRMAN. The Chair overrules the point of order.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment. That will leave those words stricken out, as proposed by the amendment, as a direction to the Indian Bureau that it shall purchase these vehicles from the War Department, with no alternative or relief if the War Department is not mandated to sell to them. There is no mandate here to the War Department to sell them, but there is a direction that they must be purchased by the bureau from the War Department. I submit it is going to put the Indian Bureau in a very

difficult position if the War Department is not in a difficult position.

Mr. SNYDER. Will the gentleman yield for just a question?

Mr. ELSTON. I will.

Mr. SNYDER. Notwithstanding the fact that I have been overruled in my objection to that section, you as chairman of the subcommittee are willing to admit that that line of the paragraph is new legislation? The line that I refer to is that they shall be purchased from the War Department, if practicable.

Mr. ELSTON. The gentleman was referring to the point of order made a few moments ago.

Mr. SNYDER. I would like to know if it is new legislation or not.

Mr. ELSTON. The gentleman is as well able to decide that as I am.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. HICKS].

The question was taken, and the Chair announced that the ayes seemed to have it.

On a division (demanded by Mr. SNYDER) there were—ayes 10, noes 40.

So the amendment was rejected.

The Clerk read as follows:

SUPPRESSING CONTAGIOUS DISEASES AMONG LIVE STOCK OF INDIANS.

For reimbursing Indians for live stock which may be hereafter destroyed on account of being infected with dourine or other contagious diseases, and for expenses in connection with the work of eradicating and preventing such diseases, to be expended under such rules and regulations as the Secretary of the Interior may prescribe, $25,000.

Mr. SNYDER. Mr. Chairman, I make a point of order on the section that there is no authority for that paragraph in law.

The CHAIRMAN. Does the gentleman from California [Mr. ELSTON] want to be heard on the point of order?

Mr. ELSTON. I wish to say that appropriations have been made under this head for the last 25 years, and there is no question about the authority of law to destroy animals infected by disease in the Indian country. I submit to the chairman whether or not it is necessary to reimburse the Indian whose stock is destroyed in pursuance of the act of the United States officials.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

DEVELOPING WATER FOR INDIAN STOCK.

For improving springs, drilling wells, and otherwise developing and conserving water for the use of Indian stock, including the purchase, construction, and installation of pumping machinery, tanks, troughs, and other necessary equipment, and for necessary investigations and surveys, for the purpose of increasing the available grazing range on unallotted lands on Indian reservations, $50,000, to be reimbursed under such rules and regulations as the Secretary of the Interior may prescribe: *Provided*, That the necessity exists on any Indian reservation so far as the Indians themselves are concerned.

Mr. SNYDER. Mr. Chairman, I make the same point of order as against the paragraph above. There is no authority for such legislation in law.

The CHAIRMAN. The gentleman from New York makes the point of order on the paragraph.

Mr. ELSTON. Mr. Chairman, I must make the same observation on this item that I made on the preceding one. It has been carried in the bill for many years, and was brought out on the Indian bill.

Mr. RAKER. Will the gentleman from California yield to me?

Mr. ELSTON. I yield.

Mr. RAKER. May I make this observation in this connection: The committee is taking up a great deal of time. Very important matters that ought to be provided for are being stricken out of this bill. Does not the gentleman think we ought to get a rule to make these in order and determine it now, instead of taking up our time? The gentleman from New York will be able to strike out over half of these items in this bill under points of order. Why not properly provide for this service as it has been for the last 10 or 15 years, under items that the gentleman from California has placed in this bill and as was done before? Do you not believe that we would get better results?

Mr. ELSTON. That is a matter of consideration. It is the purpose of the chairman to present this bill and to sustain the items in it. I feel that it is not the fault of the Committee on Appropriations, and that it was not the fault of the Committee on Indian Affairs for many years past in bringing out the bill in its present form.

As I said before, this is an evolutionary growth, and by custom and habit this has become the practice and almost the law of the House. Now, we have technical objections made, which uncover the fact that there are no express authorizations. I am not admitting that proposition. The gentleman from New York [Mr. SNYDER] has seen fit to bring to an issue here on this bill the question of the range of this experiment in legislation and its operation under the rules of the House. If he wants to do that I am perfectly willing to go forward until it becomes obvious that the House must adopt some new method for going on with the orderly course of its business.

Mr. GARD. Mr. Chairman, to secure reasonable expedition I suggest the regular order.

The CHAIRMAN. The regular order is called for. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

ADVERTISEMENT FOR SALE OF INDIAN LANDS.

There is hereby appropriated from any fund in the Treasury of the United States not otherwise appropriated, $6,000, or so much thereof as may be necessary for the payment of newspaper advertisements of sales of Indian lands, reimbursable from payments by purchasers of costs of sale, under such rules and regulations as the Secretary of the Interior may prescribe.

Mr. SNYDER. Mr. Chairman, I regret to have to make a point of order on that paragraph.

Mr. ELSTON. Mr. Chairman, I would like to ask the gentleman from New York to specify his point of order. How can he contend that the sale of Indian lands is not regulated and covered by law? We expect candor and good faith from the gentleman. I assume that every time the gentleman makes a point of order here, that there is no authorization of law for an item, he is doing that in good faith and has made investigation, and is not merely taking a shot or a long chance at this thing in order to obstruct business. I believe the gentleman is doing this absolutely with candor, as I say, and honestly I can not say I believe there is no authority of law for the sale of Indian lands.

Mr. SNYDER. What I asked the gentleman to do is to show the authority for the law. I can not find it. That item has been carried in the bill for three years, and there is no authority of law for it unless it be some general law or some provision for the organization of the bureau in 1832.

Mr. MADDEN. Mr. Chairman, there can be no doubt but that the Secretary of the Interior has been authorized by law to sell Indian lands. Otherwise, how could he have sold the lands of the Indians in days gone by? That he has sold them there can be no doubt; that he has sold them by authority of law nobody can question; that the money derived from the sale of lands owned by Indians has gone into the Treasury of the United States everybody knows, and everybody knows that millions of dollars derived from the sale of Indian lands are now in the Treasury of the United States. It would be absurd to say that the Secretary of the Interior would presume to undertake the task of selling Indian lands if he had no authority in law. Undoubtedly he has authority in law, and this appropriation is being made in pursuance of the law which grants him that authority, under which he has acted in years gone by, and through which millions of acres of Indian lands have been sold and gone into the possession of other people who are not Indians. To say now that he shall not be permitted to advertise sales of these lands, sales that he is authorized to make, is to say that what we have done in the past is all illegal and unjustified.

The CHAIRMAN. The Chair will state that there is complete authority given to the Secretary of the Interior for the sale of these lands, and therefore overrules the point of order. The Clerk will read.

The Clerk read as follows:

SEC. 2. For support and civilization of Indians in Arizona, including pay of employees, $190,000.

Mr. HAYDEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page 16, after line 8, insert: "For reconstruction of laundry building at the Fort Apache Indian School, Arizona, $15,000."

Mr. ELSTON. Mr. Chairman, I reserve a point of order on that amendment.

The CHAIRMAN. The gentleman from California reserves a point of order on the amendment.

Mr. HAYDEN. Mr. Chairman, the item, in my opinion, is not subject to the point of order. Since the estimates were submitted to Congress the laundry building at the Fort Apache Indian School burned down. I visited that school during the past summer, and, if I remember correctly, it was a frame building on a stone foundation. It is absolutely necessary to have this laundry building rebuilt and placed in a condition as a necessary part of the operation of this boarding school, which accommodates about 200 Indian children. This Indian school being a public work in operation, it seems to me that under

the rules of the House it is in order to appropriate as an item in the bill a sum necessary for the restoration of this laundry. I presented the matter to the subcommittee, but they thought that, since no new building was authorized at any school, they would not be justified in placing such an item in the bill. But a clear distinction should be made between the construction of an entirely new building at an Indian school and repairing a building where the foundations still exist, even though the major part of the structure had been destroyed by fire.

Undoubtedly the Indian Service would have regularly estimated for this item but for the fact that the fire occurred late in the fall, after the estimates were completed.

Mr. SNYDER. Mr. Chairman, I make the point of order against the amendment that it is legislation on an appropriation bill and that there is no authority in law for it.

Mr. GARRETT. Mr. Chairman, I think the Chair will find a precedent directly in point upon this matter.

The CHAIRMAN. The Chair has the precedent before him.

Mr. GARRETT. In the case of the legation building?

The CHAIRMAN. Yes; where it was burned.

Mr. GARRETT. A point of order against the rebuilding of it was sustained, and immediately following that the mover of the amendment changed the language so as to provide for the repair of the building, and that was held to be in order as a work in progress.

Mr. MADDEN. The foundation is there, and all you have to do is to repair the building.

Mr. GARRETT. Yes; and that is the case here.

Mr. ELSTON. The gentleman from Arizona has the floor. Will he yield a moment?

Mr. HAYDEN. Certainly.

Mr. ELSTON. Do I understand that this item has been recommended by the Indian Bureau and submitted in the estimates?

Mr. HAYDEN. No; it could not be so submitted, because the fire took place after the estimates were regularly submitted to Congress.

Mr. SNYDER. Will the gentleman yield?

Mr. HAYDEN. Yes.

Mr. SNYDER. Would it not be regularly in order to bring that matter before the Committee on Indian Affairs for an authorization under the rule? Why bring it in here, when we have a regular place to consider it, knowing that it is going to be objected to here?

Mr. HAYDEN. I want the Chair to rule whether a building at an Indian school that has been burned down can be reerected on the same foundation or not.

The CHAIRMAN. The Chair finds that this identical question was decided by the Chairman of the Committee of the Whole House on the state of the Union when the Diplomatic and Consular appropriation bill was under consideration on an item for the rebuilding of a public structure in one of the Pacific islands. The ruling is cited in section 3607, volume 4, of Hinds' Precedents. In that case the Chair sustained the point of order, following the precedent that had been earlier established. Therefore, in this case the Chair sustains the point of order.

Mr. HAYDEN. I offer the following amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page 16, after line 8, insert: "For repair of laundry building at the Fort Apache Indian School, Arizona, $15,000."

Mr. SNYDER. I make the same point of order against that, that it is legislation.

The CHAIRMAN. The Chair overrules the point of order. The question is on the amendment offered by the gentleman from Arizona.

Mr. ELSTON. I should like to speak just a moment in opposition to this amendment. This is the opening wedge in the matter of putting new items on this bill. The committee had before it other recommendations of the bureau. This item was not included. It may be an emergency item, but the gentleman will have recourse probably to another body, where it will go through the regular processes of investigation and checking up through the committee. He has offered this amendment on the floor of the House, where we have not time to make an estimate of the cost of this repair. He has evidently taken some unofficial figures with regard to what it will cost, and then asked us to authorize that amount.

Mr. HAYDEN. If the gentleman will permit me——

Mr. ELSTON. It ought to go through the regular procedure, and I believe that this amendment should not be agreed to.

Mr. HAYDEN. I have an official report from the superintendent of the Fort Apache Reservation, which was submitted to the Committee on Appropriations, and appears on page 215 of the hearings. Supt. Davis says that the original laundry building was constructed a great many years ago, at a total cost of about $10,000, and he estimates that under present conditions it can be replaced or repaired for $15,000. The superintendent shows that the need is urgent, because there are over 200 children in this reservation boarding school for whom laundry facilities must be provided. If this appropriation is not made by the House, and the same argument is advanced at the other end of the Capitol, that it was not estimated for, the school will be without a laundry for a year and a half. When everyone knows that this laundry must be replaced, I can see no good reason for passing the buck to the Senate, or why there should be any quibble or dispute about so small and so necessary an appropriation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. HAYDEN].

The question was taken; and on a division (demanded by Mr. ELSTON) there were—ayes 29, noes 30.

Accordingly the amendment was rejected.

The Clerk read as follows:

For support and education of 750 Indian pupils at the Indian school at Phoenix, Ariz., and for pay of superintendent, $152,500; for general repairs and improvements, $12,500; in all, $165,000.

Mr. HAYDEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page, 16, after line 16, after the figures "$12,500" insert "for assembly hall and equipment, $50,000."

Mr. ELSTON. I make the point of order that this is new construction not authorized by law.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $14,000 of any tribal funds on deposit to the credit of the Indians of the San Carlos Reservation in Arizona, and to expend the same for all purposes necessary for the operation and maintenance of pumping plants and for the drilling of wells and installation of additional pumping plants for the irrigation of lands on the said reservation: *Provided*, That the sum so used shall be reimbursed to the tribe by the Indians benefited, under such rules and regulations as the Secretary of the Interior may prescribe.

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $8,500 of any tribal funds on deposit to the credit of the Indians of the Fort Apache Reservation in Arizona, and to expend the same, in connection with the sum of $7,500 of the funds appropriated in this act for Indian school and agency buildings, for completing the reconstruction, repair, and improvement of the power plant and irrigation system on the Fort Apache Indian Reservation, Ariz., as provided for in the act of June 30, 1919 (41 S. L., p. 11): *Provided*, That the tribal funds so expended shall be reimbursed to the tribe by the Indians benefited under such rules and regulations as may be prescribed by the Secretary of the Interior: *And provided further*, That the sum of $7,500 of the amount appropriated in this act for Indian school and agency buildings is hereby set apart and reserved for this purpose, and shall be immediately available.

For continuing the construction of the necessary canals and structures to carry the natural flow of the Gila River to the Indian lands of the Gila River Indian Reservation and to public and private lands in Pinal County, reimbursable as provided in the Indian appropriation act approved May 18, 1916, $100,000.

Mr. SNYDER. Mr. Chairman, I make the point of order against the lines beginning on page 18, line 12, down to and including line 22.

Mr. HASTINGS. I make the point of order that it is too late, that this appropriation bill is being read by paragraphs, and that the Clerk has read two paragraphs beyond that.

The CHAIRMAN. The Chair sustains the point of order of the gentleman from Oklahoma [Mr. HASTINGS] that the point of order of the gentleman from New York [Mr. SNYDER] comes too late.

Mr. SNYDER. Perhaps I may be beyond the pale, but my understanding was that the bill was being read by sections. It is all right, but I will not overlook any more of them.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I do not do so for the purpose of making a point of order, but simply for the purpose of suggesting to some of the gentlemen who are so fearful that there may be an item carried in the bill that is not authorized by law, that the last two pages contain several items that are not authorized by law. Against one of them one gentleman made a point of order when it was too late. The very last paragraph read, which I have protected by making these observations, was subject to a point of order. Most of the items on these last two pages are very

questionable, from the standpoint of points of order, to say the least, and some of them are clearly subject to the point of order that they are not authorized by law. I insist that if gentlemen are making points of order in good faith for the protection of the legislative committees they should not play favorites and allow items one after the other to go through and then make points of order against other items. I believe in all of these items. I know something about them. I think they are meritorious, and I am delighted that the gentleman from Arizona [Mr. HAYDEN], the smiling gentleman from Arizona, has gotten by. I congratulate him, but I do suggest that if there is a policy here to protect committees against legislation and that policy is being adhered to in good faith, it should be applied to all items in the bill and not to a few.

Mr. HAYDEN. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. HAYDEN. I am surprised that the gentleman should make the reference to me that he has. I have done nothing to-day but do my very best to assist the committee. I have made no points of order.

Mr. MONDELL. I have made no criticism of the gentleman from Arizona; far from it. I have congratulated him upon the fact that his items, several of them, subject to the point of order, have gotten by and are in a fair way to become law. No point of order has been raised against them.

Mr. HAYDEN. I will state to the gentleman from Wyoming that, in my opinion, there is no item among the Arizona appropriations which is subject to any point of order, and that I am fully prepared to justify each and every one of them as being in continuation of appropriations for a public work in progress or otherwise authorized by law. The last Arizona item to which the gentleman refers, which he says he has been kind enough to protect by making a few brief remarks, is clearly authorized by law. I am prepared to show the gentleman the specific act of Congress authorizing the construction of a complete project, which comprises not only a diversion dam in the Gila River, but canals, laterals, and every other structure necessary for the irrigation of the Indian lands and the public and private lands in Pinal County, Ariz. I sincerely thank the gentleman from Wyoming for his good intentions in my behalf, but in this instance his kind assistance is unnecessary.

The CHAIRMAN. The time of the gentleman from Wyoming has expired. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 19, after line 20, insert: "*Provided*, That not to exceed $50,000 of the amount herein appropriated may be used for the purchase of such land, rights of way, constructed or partly constructed canals, and other physical properties deemed necessary by the Secretary of the Interior for use in connection with such irrigation project."

Mr. ELSTON. Mr. Chairman, I am compelled to make the point of order on that. It is not authorized by law.

Mr. HAYDEN. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. HAYDEN. Mr. Chairman, the appropriation which is now contained in the bill, of $100,000, is authorized by law enacted as a part of the Indian appropriation act approved May 18, 1916, and is to be found in the Thirty-ninth Statutes at Large at pages 130 and 131. This irrigation project is specifically authorized to be constructed for the irrigation of public, private, and Indian lands in Pinal County, Ariz. Let me read to the Chair from about the middle of page 131:

That said project shall only be undertaken if the Secretary of the Interior shall be able to make or provide for what he shall deem to be satisfactory adjustments of the rights to the water to be diverted by said diversion dam or carried in canals, and satisfactory arrangements for the inclusion of lands within said project and the purchase of property rights which he shall deem necessary to be acquired, and shall determine and declare said projects to be feasible.

All of which has been done. The Secretary of the Interior has declared the project to be feasible, and in the justification for the estimates submitted by the Indian Bureau the assistant commissioner stated that it was possible to save about $50,000 by the purchase of a canal heretofore constructed, all of which is set forth in the hearings at page 217.

The CHAIRMAN. The Chair overrules the point of order.

Mr. MONDELL. Mr. Chairman, I should like to be heard upon that.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. MONDELL. Mr. Chairman, in the first place, the item carried in the bill is not in order under the legislation to which the gentleman has referred, but the point of order was not raised, and therefore an amendment that would be otherwise in order can be made to the item. The reclamation project referred to in that legislation is not the reclamation project provided for in this paragraph, and if it were, there is no authority in that provision of law for the purchase of lands outside the reservation. The gentleman's amendment is for the purchase of land outside the reservation, for the carrying out of a project, and assuming for the sake of argument that this item refers to the same project, and I do not think it does, I know of nothing in that authorization which authorizes the purchase of land.

The CHAIRMAN. Will the gentleman permit the Chair to read the language here for his information?

Mr. MONDELL. Certainly.

The CHAIRMAN. The Chair reads:

and the purchase of property rights which he shall deem necessary to be acquired and shall determine and declare said projects to be feasible.

Does not that include the purchase of land, whether in or outside of the reservation?

Mr. MONDELL. I do not think so. What was contemplated was the purchase of rights that might have been acquired in connection with projects that have been undertaken or are under way.

Mr. HAYDEN. Mr. Chairman, there can be no question that the term "purchase of property rights" is broad enough to include the purchase of land and canals. I do not see how there can be any dispute about that.

The CHAIRMAN. The Chair overrules the point of order. The question is on agreeing to the amendment offered by the gentleman from Arizona.

The question was taken; and on a division (demanded by Mr. HAYDEN) there were—ayes 30, noes 32.

So the amendment was rejected.

The Clerk read as follows:

SEC. 3. For support and civilization of Indians in California, including pay of employees, $42,000.

Mr. SNYDER. Mr. Chairman, I move to strike out the last word. The statement was made a few moments ago by the gentleman from Wyoming that contained in the Arizona section were some items that were subject to the point of order which were permitted to go by. I desire to say that it is not the intention of the chairman of the Committee on Indian Affairs to let any item go by that he knew was subject to the point of order, but under the best information I could obtain this morning I was led to believe that items for support and civilization are in order. Therefore I did not object, and I have not objected to any one of them that has been in the bill and I do not intend to object to any of the others.

Mr. MONDELL. Yes; but the items the gentleman from Wyoming referred to were not items for support.

Mr. SNYDER. The gentleman mentioned the first four or five items, as I recall it, and stated that those items clearly had no authorization of law.

Mr. MONDELL. No; the gentleman referred to the irrigation items.

Mr. SNYDER. Now, I did not object to them, and I am not going to object to any of them.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

For the purchase of lands for the homeless Indians in California, including improvements thereon, for the use and occupancy of said Indians, $10,000, said funds to be expended under such regulations and conditions as the Secretary of the Interior may prescribe.

Mr. SNYDER. Mr. Chairman, I make the point of order that there is no authority in law for the legislation contained in the paragraph. I will reserve the point of order.

Mr. ELSTON. Mr. Chairman, will the gentleman yield just a moment? The gentleman concedes that support and civilization is authorized by law. Does the gentleman contend that the purchase of land for homeless Indians in California would not come within that classification?

Mr. SNYDER. I do not think the particular item comes within the classification. If it did, I would not object to it.

Mr. ELSTON. Mr. Chairman, unless the Chair rules it comes within the general purview of the classification of support and civilization of the Indians in California, I know of no specific authorization, except the former appropriation acts.

Mr. RAKER. If the gentleman will permit. The statute in 1882, when California was a Territory, sent those Indians to California and provided for them and authorized the Secretary to take lands and provide for the Indians in a general way. That was some years ago, and it has never been repealed, and the Congress has been spending money on the same line and has been providing for those Indians, though in a very meager and parsimonious way for a few years. It seems to me that there is authorization enough in the earlier statute to provide for these Indians.

Mr. SNYDER. Mr. Chairman, I have not anything further to say, except if there was any authority of law the gentleman from California would have been to the Committee on Indian Affairs long before this appropriation was started to get an appropriation for the purchase of lands for helpless Indians in California.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

KANSAS.

SEC. 6. For support and education of 750 Indian pupils at the Indian school, Haskell Institute, Lawrence, Kans., and for pay of superintendent, $152,600; for general repairs and improvements, $20,000; in all, $172,600.

Mr. CANNON. Mr. Chairman, I move to strike out the last word, for the purpose of asking a question. How long has this school been running?

Mr. ELSTON. This is one of the oldest established schools in the Indian Service.

Mr. CANNON. Is the Indian now approaching civilization? I was out there 50 years ago, almost 50 years ago, just after Cleveland came in on the Holman investigation committee, and it seems to me there has been enough spent. Now, is the Indian becoming a citizen, and——

Mr. ELSTON. I think that the process of the elimination of some schools has been going on as the Indian is approaching the stage of civilization to which the gentleman has referred, but this school is so strategically situated as to be one of the schools that will be retained to the very last. In reference to the Carlisle School in Pennsylvania, the gentleman remembers it was discontinued, and other schools in certain localities are being discontinued all the time.

Mr. CANNON. This is in Kansas. They were pretty smart then, and we have spent money by the wholesale ever since. I think they go to the legislature out there. It seems to me that somehow, in some way, that after far over a half century of Government expenditure, especially in States like Kansas—I was going to say California, but I will not—that they ought to do like white folks, take care of themselves. It is a rich State; if the poor need caring for, they have common sense; they are highly civilized, it is claimed, in Kansas——

Mr. ELSTON. I will state to the gentleman——

Mr. CANNON. One man, I will say of one-fourth Indian blood, is an able legislator, and occupies a seat as Senator at the other end of the Capitol, and was for many years in the House. It is to his credit. I am not criticizing him as a man, but, however, it seems to me that we ought to finish it.

Mr. ELSTON. I think this would have been eliminated long ago if we had only supplied the needs of the Indians of Kansas, but it is so situated that it draws from Oklahoma, from the Dakotas, and a great region in the Indian country, because of its central position. It is one of the great schools in the Indian country. If it had been found that it was not so situated and was useful only for the Indians of Kansas it would have been discontinued long ago.

Mr. CANNON. How many outside of Kansas use it?

Mr. ELSTON. Practically all of the attendants at this school are from outside of Kansas.

Mr. CANNON. No schools in adjacent States?

Mr. ELSTON. There are very few in adjacent States. There are only two or three very large Indian schools of this character and they draw from all the Indian country.

The Clerk read as follows:

MICHIGAN.

SEC. 7. For support and education of 350 Indian pupils at the Indian school, Mount Pleasant, Mich., and for pay of superintendent, $80,750; for general repairs and improvements, $10,000; in all, $90,750.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. Michigan is part of the Northwest, was a part of the Northwest Territory. It has a great civilization, great manufacturing centers. Has cities like Detroit. I think Michigan is one of the best States in the Union, possibly second to no one in common schools, and yet has an expenditure of $90,000. Can the gentleman prophesy when, oh, when, will we stop expending money to be spent through the Interior Department when they ought to be self-supporting?

Mr. ELSTON. It may surprise the gentleman from Illinois to know that there are 7,510 Indians in Michigan, and that the state of their civilization is not very high. There are more Indians in Michigan than there are in Wyoming; more than there are in Idaho.

Mr. CANNON. Are they increasing in number?

Mr. ELSTON. No; not increasing in number. But Michigan was a sort of rendezvous for a great many Indians of the northeastern country. The Indians from New England and New York finally gathered down there.

Mr. CANNON. There are some in Minnesota and some in adjacent States. I guess there are a good many in Minnesota, are there not?

Mr. ELSTON. A great many.

Mr. KNUTSON. If I may be allowed to remark, the Minnesota Indians pay their own way.

Mr. CANNON. Pay their own way? Then they are not carried in this?

Mr. KNUTSON. The appropriations that are made are paid for out of the tribal funds.

Mr. CANNON. Is there an appropriation for them here?

Mr. KNUTSON. Immediately after this item there is an item for the Chippewa Indians that is reimbursable under the tribal funds. I wish to ask the chairman of the subcommittee if the item from Michigan comes out of the Public Treasury?

Mr. ELSTON. It does.

The CHAIRMAN. Does the gentleman from Illinois [Mr. CANNON] yield to the gentleman?

Mr. CANNON. Yes; I do. I find here $54,000, and further on some more.

Mr. KNUTSON. It all comes out of the tribal funds.

Mr. CANNON. Then why not spend the tribal funds? The Indians up there are said to be very wealthy. This is not, so far as I can see, even reimbursable. But whether it is or not, we do not want to be appropriating reimbursably from the tribal funds. We have got a growing white population, with a great load to carry.

Mr. ELSTON. If I may inform the gentleman, there are practically no tribal funds available for the Indians in Michigan. They are not a very rich tribe. The case is different with tribes in some of the other States. There is an obligation on the part of the United States to take care of them, in the way of educaion at least.

Mr. CANNON. Do the Indians in Michigan vote?

Mr. ELSTON. Some of them.

Mr. CANNON. And in Minnesota? They are admitted to the common schools and all that kind of thing?

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANNON. I just grow weary of these appropriations.

Mr. BEGG. Mr. Chairman, I move to strike out the last word, in order to ask the gentleman one question. Why is it that in Kansas you educate these Indian pupils for approximately $200 per pupil and in Michigan it costs $230 per capita?

Mr. ELSTON. Is the gentleman speaking advisedly in regard to that, or has he made merely a computation of his own?

Mr. BEGG. I have made a rough computation. In Kansas there are 750 Indian pupils and the appropriation is $152,600, and in Michigan there are 350 Indian pupils and the appropriation is $80,750. Of course, there may be some reason for it. I can not see why education should come higher in Michigan than it does in Kansas.

Mr. ELSTON. The justification that is furnished by the department seems to support the position that it does cost more to take care of these pupils in Michigan schools than it does in Kansas. There is no reason to believe that it is not on account of the fact that this school is not filled to capacity and that they have to maintain an organization for a number of pupils below capacity.

Mr. BEGG. Can the gentleman tell us what the salary of the superintendent is at either one of these schools?

Mr. ELSTON. The salaries in the Indian Service generally are extremely low. If the gentleman will be patient a moment, I will get him the figures. It is given here at $2,000.

Mr. BEGG. In each school?

Mr. ELSTON. In these schools, and I presume it is uniform in all the schools of the country.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD in regard to the items upon which the point of order was sustained.

The CHAIRMAN. The gentleman from California asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. KNUTSON. Reserving the right to object, how many pages is it going to occupy?

Mr. RAKER. It will not take over a column.

Mr. KNUTSON. I will not object.

The CHAIRMAN. The Chair hears no objection. The Clerk will read.

The Clerk read as follows:

MINNESOTA.

SEC. 8. For support and education of 200 Indian pupils at the Indian school, Pipestone, Minn., including pay of superintendent, $46,650; for general repairs and improvements, $8,000; in all, $54,650.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. BLANTON. Mr. Chairman, just a moment ago the gentleman from Minnesota [Mr. KNUTSON], who is the distinguished Republican whip, asserted to the chairman having in charge this bill that the Indians of Minnesota were cared for out of their own tribal funds, and he called on the chairman to answer whether or not the money which cared for the Indians in Michigan was Government money, which came out of the Public Treasury, indicating that if it were so it was improper and objectionable.

Has the time come when the gentleman from Minnesota has so far forgotten his duty and the obligation that he owes to the American Indian, whether he be in Minnesota or in Michigan or anywhere else, that when money is needed there shall be money provided for his care and education—if it is needed—and that it should properly come out of the Public Treasury?

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Because the American Indian was here before the gentleman from Minnesota was. [Laughter.] The American Indian was here before there was a congressional district in Minnesota. The American Indian was here before the distinguished gentleman was made whip for the Republican Party on the other side of the aisle, and the gentleman should not forget these matters. It is all right for him to jump on me occasionally, because I do not mind it; I like that little interchange across the aisle. [Laughter.] But he must not jump on the poor American Indian up in Michigan. [Laughter and applause.]

Mr. KNUTSON. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Minnesota moves to strike out the last two words.

Mr. KNUTSON. Mr. Chairman, I would infer from the remarks made by my good friend from Texas [Mr. BLANTON] that he is contemporaneous with the American Indian, also that he has many Indians in his district and that they are all voters. I did not intend to convey such an impression as the gentleman seems to think I did in asking the question I propounded to the chairman of the committee in regard to appropriations for Indians in Michigan. I was simply seeking information, as was the gentleman from Illinois [Mr. CANNON]. I was merely calling attention to the fact that nearly all the appropriations made for the Chippewa Indians in Minnesota came from tribal funds, and I asked whether the same was true with respect to the Indians in Michigan and Kansas. I got the information I desired, but I thank the gentleman from Texas nevertheless. [Laughter.]

The CHAIRMAN. The pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

That the sum of $10,000, or so much thereof as may be necessary, of the tribal funds of the Chippewa Indians of the State of Minnesota is hereby appropriated to pay the expenses of the general council of said tribe to be held at Bemidji, Minn., beginning the second Tuesday in July, 1921, pursuant to the constitution of the general council of said Chippewa Indians of Minnesota, organized in May, 1913, and to pay the expenses of said general council in looking after the affairs of said tribe, including the actual and necessary expenses of its legislative committee in visiting Washington; said sum to be immediately available and said expenses to be approved by the president and secretary of the general council and certified to the Secretary of the Interior, and as so approved and certified to be paid.

Mr. CARTER. Mr. Chairman, I make a point of order against that paragraph.

Mr. KNUTSON. Mr. Chairman, will the gentleman reserve his point of order just a moment?

Mr. CARTER. I will, gladly.

Mr. KNUTSON. I presume that the gentleman makes the point of order against this item for the same reason that the chairman of the Committee on Indian Affairs has been making points of order all afternoon, on the ground that there is no authorization in law.

Mr. CARTER. That is the point I make. I have not given any reasons for it. I can give them, if the gentleman wants. But the paragraph is clearly not authorized by law.

Mr. ELSTON. Does the gentleman mean that the Chippewa Council is not authorized by law to travel to Washington? Of course, that is a legal operation. The question is whether the Government has the right to appropriate money out of tribal funds for the benefit of the Indians.

Mr. CARTER. No. You have the right to appropriate from tribal funds if the appropriation is authorized by law. But we have no more legal right to appropriate from tribal funds than we have to appropriate from the Treasury of the United States without an authorization, and less moral right to do so with tribal funds, because the tribal funds are trust funds.

Mr. KELLY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. CARTER. Certainly.

Mr. KELLY of Pennsylvania. The gentleman from Oklahoma is a member of the Committee on Indian Affairs and sat with the committee in the consideration of this Chippewa case?

Mr. CARTER. Yes.

Mr. KELLY of Pennsylvania. And the gentleman realizes that from all that we could gather this tribal council is the only agency that represents the will of all the Chippewas?

Mr. CARTER. No; I do not think it represents the will of all the Chippewas. I think it represents the will only of a portion of the Chippewas, and that is why I want to strike it out.

Mr. KELLY of Pennsylvania. The gentleman will remember that the Deputy Commissioner of Indian Affairs, on page 141 of the hearings, stated that after many years of endeavor they finally had an election where they got all these factions to come together, and that a tribal council was established, and that the bureau recognized the tribal council?

Mr. CARTER. That was done; but the Red Lake Indians had a material interest in property which other tribes claimed to have an interest in; the Red Lake Indians deny it and claim they are not properly represented on this council.

Mr. KELLY of Pennsylvania. But I understand they were represented.

Mr. CARTER. Their claim is that they were not represented; and if they are, they are in the minority and have not more than one delegate to the council. I do not think we should continue this tribal council with this number of men in it when the Red Lake Indians are not included in the representation, and have them exercise the power that they do in employing counsel and other things in the settlement of their disputes with the Red Lake Indians. If the gentleman will permit me, I will say this: That I think we will much more quickly get to a final and equitable adjustment of the Chippewa Indian affairs if we cut out this tribal council and initiate some kind of proceeding between all bands of the Chippewas and Federal authorities.

As the gentleman well knows, there is a distinct friction and dispute between them as to the right of the Chippewa Indians on the Red Lake Reservation. The Red Lake Indians claim that no other Indians have any rights on their reservation, that others have no right to share in any of the emoluments of their property, and all the other Chippewa Indians, some of whom have already drawn their lands and money and divided their lands and sold them, perhaps, claim that they now have a right in the Red Lake Reservation. Whether they have or not, of course Congress can not at this time determine; but certainly we can not make much progress toward the determination of that matter when we have a council divided, as the Chippewa council now is.

Mr. KELLY of Pennsylvania. If the gentleman will permit me a moment——

Mr. CARTER. Yes.

Mr. KELLY of Pennsylvania. The only reason the Red Lake Indian Reservation has not been allotted is because the Red Lake Indians have opposed it; and the gentleman should not make the argument that because their lands have not been allotted they have special rights that the others have not.

Mr. CARTER. I have not done that.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States the sum of $10,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Red Lake Band of Chippewa Indians in the State of Minnesota, and to expend the same in the construction of roads and bridges on the Red Lake River Reservation, in said State, including the purchase of material, equipment and supplies, and the employment of labor: *Provided*, That Indian labor shall be employed as far as practicable.

Mr. KELLY of Pennsylvania. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Pennsylvania reserves a point of order.

Mr. KELLY of Pennsylvania. Mr. Chairman, these two paragraphs deal with a very much controverted question in the Chippewa country. This is a provision for the Red Lake Indians, who are a part of the Chippewa Tribe of Minnesota. The committee held hearings on the situation extending over some weeks, and I was convinced, and I think a majority of the members were convinced—I was surprised to find that the gentleman from Oklahoma [Mr. CARTER] had a different opinion—that the only possible solution of this question is the recognition of this tribal council which has already been recog-

nized by the Bureau of Indian Affairs. The Red Lake Indians have a reservation. They are the only Chippewas whose lands have not been allotted. The Red Lake Indians refuse allotment. The question is, when shall we allot their land. When bills were brought in providing for the allotment the objection came from the Red Lake Indians themselves, and the Deputy Commissioner of Indian Affairs said that because they were not satisfied, their lands were not allotted, although the act of 1889 provided for their immediate allotment. Now, here comes a provision for $10,000 for the especial benefit of the Red Lake Indians. There is no authorization in law to take money out of the tribal funds and use it for the construction of roads; and since the tribal council provision has been stricken out certainly this provision should not go in.

I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. KNUTSON. I offer the following amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. KNUTSON: On page 22, at the end of line 18, insert the following—

The CHAIRMAN. The Chair will state that that paragraph has been passed.

Mr. KNUTSON. I ask unanimous consent to return to the paragraph.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to return to the paragraph.

Mr. KNUTSON. In the confusion I overlooked it. I ask unanimous consent to revert to the paragraph to offer an amendment.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to revert to line 18, page 22. Is there objection?

Mr. CARTER. Is that the item that was stricken out on a point of order?

Mr. KNUTSON. No.

Mr. CARTER. All right.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. KNUTSON: On page 22, at the end of line 18, insert a new paragraph, as follows:

"The Secretary of the Interior is hereby authorized to advance to the executive committee of the White Earth Band of Chippewa Indians in Minnesota the sum of $1,000, or so much thereof as may be necessary, to be expended in the annual celebration of said band to be held June 14, 1921, out of the funds belonging to said band."

Mr. KELLY of Pennsylvania. I make the point of order against the amendment that it is not provided for by existing law.

The CHAIRMAN. Does the gentleman from Minnesota care to be heard?

Mr. KNUTSON. No.

The CHAIRMAN. The Chair sustains the point of order.

Mr. CARSS. Mr. Chairman, I have an amendment which I wish to offer.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CARSS: Page 22, after line 18, insert:

"THE CHIPPEWA INDIANS OF MINNESOTA, INCORPORATED.

"The sum of $10,000, or so much thereof as may be necessary of the tribal funds of the Chippewa Indians of Minnesota, is hereby appropriated to pay the expenses of the Chippewa Indians of Minnesota, incorporated, a general council of said Indians, with principal offices at Ball Club, Minn., pursuant to the constitution of said general council of said Chippewa Indians, organized May 13, 1913, and incorporated August 18, 1919; and to pay the expenses of said council in looking after the affairs of said Indian tribe, including the actual and necessary expenses of its legislative committee in visiting Washington during the sessions of Congress, said sum to be immediately available, and said expenses to be approved by the president and secretary of said council and certified to the Secretary of the Interior, and as so approved and certified to be paid; *Provided*, That the secretary of said council shall submit a statement of the expenses so paid from said funds, on the 30th day of June of each year, to the Secretary of the Interior."

Mr. KELLY of Pennsylvania. Mr. Chairman, I make the point of order against the amendment.

Mr. KNUTSON. Mr. Chairman, I make the point of order against the amendment.

The CHAIRMAN. The gentleman from Pennsylvania and the gentleman from Minnesota make the point of order to the amendment. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is authorized to withdraw from the Treasury of the United States, in his discretion, the sum of $100,000, or so much thereof as may be necessary, of the principal sum on deposit to the credit of the Chippewa Indians in the State of Minnesota, arising under section 7 of the act of January 14, 1889, entitled, "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," and to use the same for promoting civilization and self-support among the said Indians exclusively for the purposes following: Not exceeding $45,000 of this amount may be expended for general agency purposes at the White Earth, Red Lake, and Leech Lake Agencies; not exceeding $20,000 may be expended, under the direction of the Secretary of the Interior, in aiding in the construction, equipment, and maintenance of additional public schools in connection with, and under the control of, the public-school system of the State of Minnesota, said additional school buildings to be located at places contiguous to Indian children who are now without proper public-school facilities, said amount to be immediately available; not exceeding $15,000 may be expended in aiding indigent Chippewa Indians upon the condition that any funds used in support of a member of the tribe shall be reimbursed out of and become a lien against any individual property of which such member may now or hereafter become seized or possessed, and the Secretary of the Interior shall annually transmit to Congress at the commencement of each regular session a complete and detailed statement of such expenditures, the two preceding requirements not to apply to any old, infirm, or indigent Indian, in the discretion of the Secretary of the Interior; not exceeding $20,000 may be expended for the support of one or more of the Indian hospitals at Fond du Lac, White Earth, and Red Lake, Minn.: *Provided*, That the Secretary of the Interior is authorized, as soon as practicable, to turn over to the proper authorities of the State of Minnesota all hospital plants and equipment now or previously used in connection with the Chippewa Indian service the use of which is, or may hereafter become, unnecessary in connection with said service, conditioned upon said State first giving satisfactory assurance that said property will at all times be maintained and used by said State for public purposes and that the Chippewa Indians shall at all times be admitted to all State institutions upon the same terms as citizens of said State.

Mr. SNYDER. Mr. Chairman, I make the point of order——

Mr. STEENERSON. Mr. Chairman, will the gentleman reserve it?

Mr. SNYDER. I will reserve it, although I would like first to state what it is. I reserve the point of order on the part of the paragraph which has been read beginning on page 25, line 3, with the word "provided" on the ground that it is new legislation and that there is no authority of law for it.

Mr. ELSTON. Mr. Chairman, I am willing to submit the matter without argument for a ruling. I would state that if the Chair sustains the point of order I propose to offer the paragraph without the objectionable matter as an amendment.

Mr. SNYDER. But I do not make any point of order against the whole paragraph.

Mr. ELSTON. If the point of order is sustained, do I understand that only the matter beginning with the proviso is stricken out and the other remains?

The CHAIRMAN. If the gentleman from New York makes the point of order simply to the proviso, that is the only matter that would go out.

Mr. SNYDER. That is all that I make the point of order to.

The CHAIRMAN. The Chair sustains the point of order.

Mr. STEENERSON. And the other part of the paragraph remains in?

The CHAIRMAN. Certainly. The point of order was not made to it, and, therefore, it remains.

The Clerk read as follows:

For the employment of "line riders" along the southern and eastern boundaries of the Northern Cheyenne Indian Reservation in the State of Montana, $1,500.

Mr. SNYDER. Mr. Chairman, I make the point of order against the paragraph on page 27, beginning with line 17, down to and including line 19, on the ground that there is no authority of law for any such item.

Mr. ELSTON. Mr. Chairman, this item has been carried for 20 years in this amount in previous appropriation bills, and so far as I am informed the only authorization is the custom of the House in making this appropriation.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

For continuing construction, maintenance, and operation of the irrigation systems on the Flathead Indian Reservation, in Montana, $200,000 (reimbursable), to remain available until expended.

Mr. EVANS of Montana. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment by Mr. EVANS of Montana: Page 28, line 1, after the word "reimbursable," insert the words "to be immediately available."

Mr. ELSTON. Mr. Chairman, I would say to the committee that the gentleman from Montana [Mr. EVANS] suggested this amendment to the main Committee on Appropriations and also to the subcommittee. It appealed to both committees that if the appropriation is made for this project it could be made much more useful by being available in the early spring. So

far as I am concerned, I shall not offer an objection to the amendment.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Montana. Yes.

Mr. CANNON. The Flathead Agency is in Montana?

Mr. EVANS of Montana. Yes.

Mr. CANNON. It is a very rich country and they are a very rich tribe.

Mr. EVANS of Montana. Yes. They are rich in property, but not in ready money.

Mr. CANNON. I was at the Flathead Agency many, many years ago. It seemed to me at that time that they had made greater progress and had a better reservation than any other tribe of Indians. It seemed to me that their land was the best land I saw out there. This is reimbursable?

Mr. EVANS of Montana. Yes.

Mr. CANNON. It was in 1885 that the Holman Commission was authorized. We went two or three times across the continent. We stayed for a week at the Flathead Agency. It seems to me that we ought not at this time to take from the Treasury this large sum of money; if they have made the progress which they bid fair to make at that time, or even half way, they ought not to want any reimbursement.

Mr. EVANS of Montana. Mr. Chairman, I do not think the situation is quite understood by the gentleman from Illinois [Mr. CANNON]. This reservation was opened and is being reclaimed, so far as the irrigation system is concerned, at a cost of about $7,000,000, the Indians paying for that part of the irrigation which applies to their land and the white men paying for the part which applies to their land.

We opened the reservation in 1904 and began appropriations at that time and have appropriated on an average of possibly $250,000 a year for the last 10 years. It is half done now. If we continue at the same rate, though I hope the gentleman from Illinois will still be alive at that time, I very much doubt that he will be when the thing is completed.

As to why we should make it immediately available is because they have the organization there reclaiming that land and carrying on their contracts. Their money will be gone in the next 15 or 30 days for this year. Then they will disband the organization and let the steam shovels lie out in the weather and rust; they will let the mules and the horses eat their heads off; they will send the engineers back to Denver and the draftsmen somewhere else; and on the 1st day of July we will call them back again to expend these two or three hundred thousand dollars that we are now giving them. We have been doing that business for the last 10 years.

That is the reason that I want this made immediately available, in order that the work may go on continuously.

Mr. CANNON. My recollection is that the water was near by, and it seemed to me when we were out there that there was not much trouble or a great expense about the irrigation of that reservation. It seemed to me when the commission visited this reservation that it was the most easily improved of all and the most prosperous. It might have been ruined since that time.

Mr. EVANS of Montana. It has not been ruined. It is a wonderfully rich piece of land. The fault is with Congress—that we have not appropriated money in sufficient amount to finish the job.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Montana.

The amendment was agreed to.

Mr. SNYDER. Mr. Chairman, I now offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. SNYDER: Page 28, line 1, after the word "Montana," strike out "$200,000" and insert in lieu thereof "$50,000."

Mr. SNYDER. Mr. Chairman, I desire to be heard on the amendment.

Mr. ELSTON. Mr. Chairman, I suggest that the gentleman yield to me. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FESS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 15682, had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, Mr. RAINEY of Alabama was granted leave of absence, indefinitely, on account of official business.

Mr. CONNALLY. Mr. Speaker, the select committee on the investigation of the Shipping Board will be out of the city next week for the first four days, and I desire to be excused.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 3390. An act to provide further for the national defense; to establish a self-sustaining Federal agency for the manufacture, production, and development of the products of atmospheric nitrogen for military, experimental, and other purposes; to provide research laboratories and experimental plants for the development of fixed-nitrogen production, and for other purposes; to the Committee on Military Affairs.

ADJOURNMENT.

Mr. ELSTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock p. m.) the House adjourned until Monday, January 17, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

343. A letter from the Secretary of the Navy, transmitting draft of requested legislation to authorize the Secretary of the Navy to sanction the use of certain titles on tablets or other memorials; to the Committee on Naval Affairs.

344. A letter from the Secretary of War, transmitting a supplemental statement to that submitted January 27, 1919, and March 15, 1920, showing the balances available November 30, 1919, of appropriations made by act of June 15, 1917; to the Committee on Expenditures in the War Department.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GREENE of Vermont, from the Committee on Military Affairs, to which was referred the resolution (H. Res. 625) requesting the War Department to furnish information to the Committee on Military Affairs regarding the abandonment of Camp Funston and providing that pending the furnishment of such information and action thereon that no action toward the wrecking and abandonment of said camp be taken, reported the same with amendments, accompanied by a report (No. 1196), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 15695) for the relief of the Treasurer of the United States for lost bonds without the fault or negligence on the part of said Treasurer, reported the same with amendments, accompanied by a report (No. 1195), which said bill and report were referred to the Private Calendar.

He also, from the Committee on Claims, to which was referred the bill (H. R. 14382) for the relief of the Delaware River Lighterage Co., reported the same with amendments, accompanied by a report (No. 1193), which said bill and report were referred to the Private Calendar.

He also, from the Committee on Claims, to which was referred the bill (H. R. 15685) to permit the correction of the general account of the Treasurer of the United States, reported the same without amendments, accompanied by a report (No. 1194), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 15699) granting an increase of pension to Smith Richards, and the same was referred to the Committee on Pensions.

UMI

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GREENE of Massachusetts: A bill (H. R. 15746) to amend sections 4402, 4404, and 4414 of the Revised Statutes of the United States, to classify and provide salaries for officers and clerks of the Steamboat-Inspection Service; to the Committee on the Merchant Marine and Fisheries.

By Mr. HUDSPETH: A bill (H. R. 15747) for the erection of a public post-office building at Pecos, Reeves County, Tex., and appropriating money therefor; to the Committee on Public Buildings and Grounds.

By Mr. BRITTEN: A bill (H. R. 15748) to correct the status of permanent and temporary officers in the grade of rear admiral; to the Committee on Naval Affairs.

By Mr. MAPES (by request of the Commissioners of the District of Columbia): A bill (H. R. 15749) to authorize the Commissioners of the District of Columbia to accept donations of money for the establishment of a branch library in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. WILSON of Illinois: A bill (H. R. 15750) to authorize the construction of a bridge across the Little Calumet River, in Cook County, State of Illinois, at or near the village of Burnham, in said county; to the Committee on Interstate and Foreign Commerce.

By Mr. NEWTON of Minnesota: Resolution (H. Res. 645) requesting the Federal Trade Commission to furnish certain information regarding coal; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FOSTER: A bill (H. R. 15751) granting an increase of pension to Stamford W. Rife; to the Committee on Pensions.

Also, a bill (H. R. 15752) granting an increase of pension to Betsy G. Frost; to the Committee on Invalid Pensions.

By Mr. HICKS: A bill (H. R. 15753) granting a pension to Sarah A. West; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15754) granting an increase of pension to Anna B. McCurley; to the Committee on Invalid Pensions.

By Mr. JAMES of Michigan: A bill (H. R. 15755) granting a pension to Dorothy H. Volk; to the Committee on Pensions.

By Mr. KING: A bill (H. R. 15756) for the relief of Sherman Burt; to the Committee on Reform in the Civil Service.

By Mr. MAGEE: A bill (H. R. 15757) granting a pension to Mary A. Carroll; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN of Michigan: A bill (H. R. 15758) granting an increase of pension to Sarah Ann Stoddard; to the Committee on Invalid Pensions.

By Mr. MOON: A bill (H. R. 15759) granting a pension to George W. Vineyard; to the Committee on Invalid Pensions.

By Mr. MOTT: A bill (H. R. 15760) granting a pension to Elizabeth B. Howard; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4997. By Mr. DYER: Protest of Dr. C. Orth and five other citizens of St. Louis, Mo., against occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

4998. Also, petition of C. L. Rogers, president Sligo Furnace Co., St. Louis, Mo., favoring the Winslow bill regarding payments to railroads; to the Committee on Interstate and Foreign Commerce.

4999. Also, petition of Julius Boeckt, Lansing, Iowa, favoring the passage of Senate bill 4608, amending flood-control act; to the Committee on Flood Control.

5000. By Mr. ESCH: Petition of the Twentieth Century Club of La Crosse, Wis., protesting against the inclusion of national parks and monuments in the provisions of the Federal water-power act of June, 1920; to the Select Committee on Water Power.

5001. By Mr. GALLIVAN: Petition of Boston Lodge 264, International Association of Machinists, favoring resumption of commercial relations with Russia; to the Committee on Interstate and Foreign Commerce.

5002. Also, petition of E. B. Horn Co., of Boston, Mass., protesting against the proposed tax on retail jewelry sales; to the Committee on Ways and Means.

5003. Also, petition of Ware & Leland, of Boston, Mass., protesting against legislative interference with future trading in grain; to the Committee on Agriculture.

5004. Also, petition of American Steam Gauge & Valve Manufacturing Co. and the Star Brass Manufacturing Co., both of Boston, Mass., urging legislation to complete the construction of United States merchant ships; to the Committee on Appropriations.

5005. By Mr. GRIFFIN: Petition of P. J. Kane Democratic Club of the third assembly district, Bronx County, New York City, requesting Members of Congress representing New York to present resolution authorizing the President of the United States and the Treasurer of the United States to issue a loan of $200,000,000 to the State of Austria; to the Committee on Foreign Affairs.

5006. By Mr. LEA of California: Petition of Society of the Sons of the Revolution, of Los Angeles, Calif., protesting against any reduction of the size or efficiency of the Army or Navy of this country in the name of economy; to the Committee on Military Affairs.

5007. By Mr. LINTHICUM: Petition of Henry O. Redue, of Baltimore, Md., concerning House bill 13205; to the Committee on the Judiciary.

5008. Also, petitions of Sisterhood of Har Sinai Temple; Superintendent Albert S. Cook, department of education, and R. M. Kennedy, all of Baltimore, Md., concerning the Smith-Towner bill; to the Committee on Education.

5009. Also, petition of American Legion, Mrs. Harriet L. Leete, executive chief nurse, American Child Hygiene Association, and Charles A. Witz, all of Baltimore, Md., concerning House bill 14961; to the Committee on Ways and Means.

5010. Also, petition of Baltimore Chamber of Commerce, Baltimore, Md., concerning House bill 11390; to the Committee on Interstate and Foreign Commerce.

5011. By Mr. MEAD: Petition of conference of mayors and other city officials of the State of New York, favoring a daylight-saving law to be operative between May 1 and September 30; to the Committee on Interstate and Foreign Commerce.

5012. By Mr. MOON: Papers to accompany the bill (H. R. 15759) granting a pension to George W. Vineyard; to the Committee on Invalid Pensions.

5013. Also, papers to accompany the bill (H. R. 14928) for the relief of the heirs of Robert E. L. Rogers; to the Committee on War Claims.

5014. By Mr. O'CONNELL: Petition of Western Broker Division of the Commercial Telegraphers' Union of America, Chicago, Ill., protesting against the passage of House bill 14657; to the Committee on Agriculture.

5015. By Mr. WOODYARD: Petition of Thomas F. Mann and other citizens of West Virginia, protesting against the passage of House bill 3944; to the Committee on Interstate and Foreign Commerce.

5016. By Mr. YATES: Petition of the Machinery Specialty Co., of Joliet; the United Commercial Travelers, box 337, of Freeport; the Tri-City Council, U. C. T., of Rock Island; and the Franklin Motor Car Co., of 2399 Michigan Avenue, Chicago, all in the State of Illinois, urging the 1 cent drop-letter rate; to the Committee on the Post Office and Post Roads.

5017. Also, petition of George S. Mepham & Co., East St. Louis, Ill., urging readoption of paragraphs 47 and 56 of the Payne-Aldrich Act of 1909, concerning paints, etc.; to the Committee on Ways and Means.

5018. Also, petition of William Busse, jr., of Mount Prospect, Ill., urging the passage of Senate bill 4514, providing for readjustments of salaries of fourth-class postmasters; to the Committee on the Post Office and Post Roads.

5019. Also, petition of George Sales, of Shawneetown, Ill., opposing in case of tax on jewelry business; to the Committee on Ways and Means.

5020. Also, petition of Glenn O. Tharp, 94 West Hickory Street, Chicago Heights, Ill., urging that proper legislation be enacted to insure a healthy and economic development of the dye industry, because such industry must be made proficient within the next 5 to 10 years or not at all; to the Committee on Ways and Means.

5021. Also, petition of Hensel Cut Rate Drug Co., 2830 West Lake Street, Chicago, Ill., urging that owing to tremendous shrinkage in inventories since January 1, 1920, business should be relieved from the enormous losses that will result and that this can be accomplished by amending section 204, tariff act of 1918; to the Committee on Ways and Means.

5022. Also, petition of National Equal Rights League, protesting against action of Republican House caucus of December 17 in voting to reapportion the quota of Representatives in Congress for the Federal States under the new census on the basis of population in those Southern States which notoriously disfranchise colored citizens; to the Committee on Rules.

SENATE.

MONDAY, *January 17, 1921.*

Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, we thank Thee for the morning light and for all the blessings continued unto us. Enable us to understand Thy requirements, that we may do those things which are just in Thy sight; that we may fulfill every obligation, love mercy, and walk humbly with Thee. Through Christ our Lord. Amen.

ROBERT L. OWEN, a Senator from the State of Oklahoma, appeared in his seat to-day.

The reading clerk proceeded to read the Journal of the proceedings of the legislative day of Thursday, January 13, 1921, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

RENTS ON FEDERAL PROPERTIES IN THE DISTRICT OF COLUMBIA.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, a report of rents received from properties located on sites of proposed public buildings purchased by the Government in the city of Washington, which was referred to the Committee on Public Buildings and Grounds.

HOSPITAL AT CORPUS CHRISTI, TEX.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury submitting an estimate of appropriation for $100,000 additional for repairs and remodeling to adapt the hospital at Corpus Christi, Tex., to the needs of the Public Health Service, etc., which was referred to the Committee on Appropriations.

CHESAPEAKE & POTOMAC TELEPHONE CO.

The VICE PRESIDENT laid before the Senate a communication from the president of the Chesapeake & Potomac Telephone Co., transmitting, pursuant to law, the report of that company for the year 1920, which was referred to the Committee on the District of Columbia.

MESSAGE FROM THE PRESIDENT.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on January 15, 1921, approved and signed the joint resolution (S. J. Res. 244) providing for the payment of expenses of conveying votes of electors for President and Vice President.

The message also announced that Senate bill No. 1, an act authorizing the cutting of timber by corporations organized in one State and conducting operations in another, having been presented to the President on December 30, 1920, and not having been approved by him or returned to the House of Congress in which it originated within the time prescribed by the Constitution of the United States, became a law without his approval.

JOSE A. DE LA TORRIENTE (S. DOC. NO. 353).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying letter from the Acting Secretary of State, referred to the Committee on Naval Affairs and ordered to be printed.

To the Senate and House of Representatives:

I transmit herewith a report from the Acting Secretary of State inclosing a draft of a joint resolution authorizing the Secretary of the Navy to permit Mr. Jose A. de la Torriente, a citizen of Cuba, to receive instruction at the United States Naval Academy at Annapolis at the expense of the Government of Cuba.

The Acting Secretary of State points out that the passage of the resolution would be regarded as an act of courtesy by the Government of Cuba and that it would follow established precedents.

WOODROW WILSON.

THE WHITE HOUSE,
17 January, 1921.

PETITIONS AND MEMORIALS.

Mr. WARREN presented a telegram in the nature of a petition from Oliver Hower, president Bighorn County Farm Bureau, of Cowley, Wyo., praying for the enactment of legislation placing a tariff on honey, which was ordered to lie on the table.

Mr. LODGE presented memorials of sundry citizens of the State of Massachusetts, remonstrating against the enactment of legislation to create a department of education, which were referred to the Committee on Education and Labor.

He also presented a resolution adopted by Council No. 53, of the L'Union St. Jean Baptiste d'Amerique, of Taunton, Mass., opposing the enactment of legislation to create a department of education, which was referred to the Committee on Education and Labor.

He also presented a resolution adopted by the Holy Name Society of St. Michael's Parish, of Lowell, Mass., opposing the enactment of legislation to create a department of education, which was referred to the Committee on Education and Labor.

He also presented a memorial of sundry members of St. Mark's Church, of Pittsfield, Mass., remonstrating against the enactment of legislation to create a department of education, which was referred to the Committee on Education and Labor.

He also presented a resolution adopted by the Boston Council of the Friends of Irish Freedom, of Boston, Mass., opposing any action looking to a refund of the British war debt or the waiver of the interest due on that debt, which was referred to the Committee on Foreign Relations.

Mr. NELSON presented a memorial of the Winton Lumber Co., of Minneapolis, Minn., remonstrating against the enactment of legislation placing a tariff on lumber imported from Canada, which was referred to the Committee on Finance.

He also presented telegrams in the nature of memorials from J. S. Pomeroy, manager Minneapolis Clearing House Association, of Minneapolis, Minn., and O. M. Nelson, president Minnesota Bankers' Association, of Minneapolis, Minn., remonstrating against the enactment of legislation to allow national banking associations to establish and operate a separate savings department, which were referred to the Committee on Banking and Currency.

Mr. HARRIS presented a telegram in the nature of a petition from Edgar G. Ballinger, secretary of the Chemical Congress of American Surgeons, in session at Atlanta, Ga., praying for the enactment of legislation to appropriate $500,000 for cooperative work with the States for the use of their respective boards or departments of health in the prevention, control, and treatment of venereal diseases, etc., which was referred to the Committee on Appropriations.

He also presented a telegram in the nature of a petition from J. K. Simmons, president of the Georgia Press Association, of Macon, Ga., transmitting a resolution passed by that association praying for the enactment of legislation to continue distribution of Federal aid to rural post roads in the respective States through the Bureau of Public Roads, which was referred to the Committee on Post Offices and Post Roads.

REPORTS OF COMMITTEE ON MILITARY AFFAIRS.

Mr. BECKHAM, from the Committee on Military Affairs, to which were referred the following bills, submitted adverse reports thereon, which were agreed to and the bills were postponed indefinitely:

A bill (S. 1198) for the relief of Thomas E. Philips;

A bill (S. 1250) to correct the military record of Alexander W. Goodreau;

A bill (S. 1532) directing delivery of State war-service records to the States requesting same;

A bill (S. 1199) to correct the military record of Francis M. Benson; and

A bill (S. 1766) for the relief of Abner W. Loomis.

EMERGENCY TARIFF.

Mr. PENROSE. Mr. President, from the Committee on Finance I report back favorably with amendments the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes, and I submit a report (No. 683) thereon. I ask that the report may be printed in the RECORD, as it is very brief.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[Report No. 683, to accompany H. R. 15275.]

The Committee on Finance, to whom was referred the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes, having considered the same, report favorably thereon with certain amendments, and as so amended recommend that the bill do pass.

The amendments adopted by the Committee on Finance are as follows:

On page 1, line 10, strike out "30" and insert "40," so that it will read: "1. Wheat, 40 cents per bushel."

On page 2, line 12, after the word "pound," insert "except rice, cleaned for use in the manufacture of canned foods."

Following paragraph 13, insert two new paragraphs as follows:

"14. Fresh or frozen beef, veal, mutton, lamb, and pork, 2 cents per pound. Meats of all kinds, prepared or preserved, not specially provided for herein, 25 per cent ad valorem.

"15. That cattle and sheep and other stock imported for breeding purposes shall be admitted free of duty."

On page 3, line 1, strike out "14" and insert "16"; and strike out "three-eighths" and insert "one-eighth."
On page 3, line 3, strike out "15" and insert "17."
On page 3, line 4, strike out "14" and insert "16."
On page 3, line 7, strike out "16" and insert "18."
On page 3, line 22, strike out "17" and insert "19."
On page 3, line 23, strike out "16" and insert "18."
On page 4, line 1, strike out "16" and insert "18."
Insert, after paragraph 19, the following new paragraphs:

"20. Sugars, tank bottoms, sirups of cane juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above 75 degrees, 2.13 cents per pound, and for every additional degree shown by the polariscope test seventy-eight one-thousandths of 1 cent per pound additional, and fractions of a degree in proportion; molasses, testing not above 40 degrees, 45 per cent ad valorem; testing above 40 degrees and not above 56 degrees, 6¾ cents per gallon; testing above 56 degrees, 13½ cents per gallon. Sugar draining and sugar sweeping shall be subject to duty as molasses or sugar, as the case may be, according to polariscopic test.

"That the duties in this paragraph herein imposed are in addition to the rates of duty imposed on such sugars by existing laws, and shall in no manner affect or impair such existing laws: *Provided*, That if the imposition of the duties herein shall have the effect of increasing the price in the ports of the United States of duty paid 96 degrees centrifugal sugar produced in and imported from Cuba beyond 8 cents per pound, or shall increase the price in the ports of the United States of similar sugars paying full duty beyond 8.76 cents per pound, or shall increase the price in the ports of the United States of sugars that have gone through a process of refining, or sugars fit for direct human consumption, beyond 10 cents per pound, then the emergency duty herein named shall be automatically decreased so as to prevent the prices of such sugars advancing beyond the respective prices herein named.

"21. Butter, and substitutes therefor, 8 cents per pound.

"22. Cheese, and substitutes therefor, 8 cents per pound.

"23. Milk, fresh, 2 cents per gallon; cream, 5 cents per gallon.

"24. Milk, preserved or condensed, or sterilized by heating or other processes, including weight of immediate coverings, 2 cents per pound; sugar of milk, 5 cents per pound.

"25. Wrapper tobacco, and filler tobacco when mixed or packed with more than 15 per cent of wrapper tobacco, and all leaf tobacco the product of two or more countries or dependencies when mixed or packed together, if unstemmed, $2.85 per pound; if stemmed, $3.50 per pound; filler tobacco not specially provided for in this section, if unstemmed, 35 cents per pound; if stemmed, 50 cents per pound.

"The term 'wrapper tobacco' as used in this section means that quality of leaf tobacco which has the requisite color, texture, and burn, and is of sufficient size for cigar wrappers, and the term 'filler tobacco' means all other leaf tobacco.

"26. Hides of cattle, raw or uncured, whether dry, salted, or pickled, 15 per cent ad valorem: *Provided*, That upon all leather exported, made from imported hides, there shall be allowed a drawback equal to the amount of duty paid on such hides, to be paid under such regulations as the Secretary of the Treasury may prescribe.

"27. Apples, 20 cents a box: *Provided*, That if at any time the tariff on apples imported into Canada from the United States shall be greater than 30 cents a box, then the tariff on apples imported into this country shall be increased so as to make the tariff on apples imported into the United States the same as the tariff on apples imported into Canada from the United States.

"28. Cherries in a raw state, preserved in brine or otherwise, 4 cents per pound."

On page 4, line 5, strike out "15 and 17" and insert "17, 19, and 20."

Mr. PENROSE. I desire to state to the Senate that I hope at an early date to move to proceed to the consideration of the bill and that it may be made the unfinished business, and I shall make every effort to press it to early passage.

The VICE PRESIDENT. The bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

Mr. WARREN. I wish to introduce a bill in the interest of two very deserving ex-service men who, under legislation of last year, drew homesteads in an irrigation district where they were permitted to do so. They were afterwards compelled to relinquish them on account of an error in one of the United States land offices, and to give up the homesteads which had been drawn in the regular way under the law. The bill proposes to give them the privilege of making another filing and of enjoying preference rights in the next opening of farm units under the same irrigation project, as suggested by the Interior Department.

By Mr. WARREN:

A bill (S. 4859) for the relief of certain ex-service men whose rights to make entries on the North Platte irrigation project, Nebraska-Wyoming, were defeated by intervening claims (with an accompanying paper); to the Committee on Public Lands.

By Mr. TRAMMELL:

A bill (S. 4860) granting a pension to Narcissa A. Grant; to the Committee on Pensions.

By Mr. GRONNA:

A bill (S. 4861) to correct the military record of Daniel Wells; to the Committee on Military Affairs.

By Mr. HALE:

A bill (S. 4862) for the relief of Elizabeth Foster Carter (with accompanying papers); to the Committee on Claims.

By Mr. DILLINGHAM:

A bill (S. 4863) to establish the department of public welfare and to determine its functions, and for other purposes; to the Committee on the District of Columbia.

By Mr. SMOOT:

A bill (S. 4864) to amend section 3 of an act entitled "An act to provide for the leasing of coal lands in the Territory of Alaska, and for other purposes," approved October 24, 1914; and

A bill (S. 4865) fixing the taxable status of lands received in exchange for lands formerly embraced in the grants to the Oregon & California Railroad Co. and the Coos Bay Wagon Road Co.; to the Committee on Public Lands.

By Mr. PHELAN:

A bill (S. 4866) to authorize the President of the United States to lay embargoes against the exportation of petroleum oil and providing penalties; to the Committee on Naval Affairs.

By Mr. OVERMAN:

A bill (S. 4867) to prohibit improper and corrupt lobbying and to regulate the employment of legislative counsel and agents; to the Committee on the Judiciary.

By Mr. CURTIS (for Mr. KENYON):

A bill (S. 4868) to define and punish lobbying; to the Committee on the Judicary.

By Mr. FRELINGHUYSEN:

A bill (S. 4869) granting a pension to Amanda A. M. Taylor; to the Committee on Pensions.

By Mr. REED:

A bill (S. 4870) granting a pension to Amelia Perry;

A bill (S. 4871) granting a pension to W. T. Powell (with accompanying papers); and

A bill (S. 4872) granting a pension to Mrs. C. A. Thomas (with accompanying papers); to the Committee on Pensions.

A bill (S. 4873) for the relief of J. B. Porter (with accompanying papers); to the Committee on Claims.

By Mr. LA FOLLETTE (by request):

A bill (S. 4874) conferring jurisdiction upon the Court of Claims to hear, examine, consider, and adjudicate claims of the Chippewa Indians of Lake Superior against the United States, and for other purposes; to the Committee on Indian Affairs.

AMENDMENTS TO SUNDRY CIVIL APPROPRIATION BILL.

Mr. POINDEXTER submitted an amendment proposing to appropriate $496,000, for the purchase of a site and for working drawings for an archives building in the District of Columbia, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. GAY submitted an amendment proposing to appropriate $50,000 for the construction of a mailing platform at the New Orleans (La.) post office, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

STANDING COMMITTEES.

On motion of Mr. LODGE, it was

Ordered, That the standing committees of the Senate as constituted at the end of this session be, and they are hereby, continued until the next session of Congress or until their successors are duly elected.

STATEMENT OF MARSHAL FOCH (S. DOC. NO. 364).

Mr. LODGE. I ask to have printed as a Senate document the statement of Marshal Foch in regard to the armistice and the treaty of Versailles. It is a statement which he made on the 8th of November, 1920. It is not long, and it is very interesting. It has been only partially printed.

There being no objection, the statement was ordered to be printed as a Senate document.

AMENDMENT OF PENAL LAWS.

On motion of Mr. NELSON, it was

Ordered, That the Committee on the Judiciary be discharged from the further consideration of the bill (H. R. 12161) to amend an act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909 (35 Stat. L., p. 1134), and that it be referred to the Committee on Interstate Commerce.

PETROLEUM OIL IN FOREIGN COUNTRIES.

Mr. PHELAN submitted the following resolution (S. Res. 423), which was read:

Whereas, pursuant to the request of the Senate, the President of the United States on May 17, 1920, reported certain laws and regulations discriminating against citizens of the United States in foreign countries in the matter of the exploration and mining for petroleum oil: Therefore be it

Resolved by the Senate of the United States, That the Secretary of State, if not inconsistent with the public interest, be, and he is hereby, requested to inform this body to what extent such discriminations have been practiced, where and by whom, and what steps, if any, have been taken to protect American rights.

The VICE PRESIDENT. The resolution will go over under the rule.

APPOINTMENT OF EX-SERVICE MEN AS POSTMASTERS.

Mr. FLETCHER. I submit a resolution and ask for its immediate consideration.

The resolution (S. Res. 424) was read, as follows:

Resolved, That the Committee on Post Offices and Post Roads be directed to ascertain from the Postmaster General the names of all former service men, and the widows of such, recommended to the President for appointment as postmaster and by the President submitted to the Senate for confirmation and not acted upon; and that the committee be further directed to consider and report promptly to the Senate all such nominations submitted, so that appropriate action may be taken.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. TOWNSEND. I object.

The VICE PRESIDENT. The resolution will go over under the rule.

Mr. FLETCHER. The object of the resolution is, of course, apparent. Under the present rule ex-service men and widows of ex-service men have a preference in appointment, and a number of these nominations include such appointments. I wish to ascertain how many there are. I can not think that our friends on the other side will object to their confirmation.

Mr. TOWNSEND. My attention was diverted during the reading of the resolution. I did not hear it all, but I understood the gist of it to be that the Senator is asking that the nominations be confirmed.

Mr. FLETCHER. That the committee report on the number of ex-service men and widows of ex-service men who have been nominated, with a view to their confirmation.

Mr. TOWNSEND. I think it is generally known that we have had no executive session during this session of Congress, and there is nothing before the Committee on Post Offices and Post Roads in the way of nominations. I ask that the resolution may go over, in order that I may have an opportunity to understand just what it is, as I did not hear it all when it was read.

Mr. FLETCHER. I am perfectly willing to have it reread.

Mr. TOWNSEND. I think it had better go over for one day, until I can see what it is. I am stating a fact when I say, as the Senator knows, that we have had no executive session. Only through executive session can nominations go to the committee. We have none pending before the committee now.

Mr. FLETCHER. I understand that. I wanted to secure the information with a view to an executive session.

The VICE PRESIDENT. The resolution will go over under the rule.

GRADE OF LIEUTENANT GENERAL.

The VICE PRESIDENT (at 12 o'clock and 12 minutes p. m.). Morning business is closed. The calendar under Rule VIII is in order.

Mr. WADSWORTH. Mr. President, in connection with the calendar, I have been instructed by the Committee on Military Affairs to bring a certain measure to the attention of the Senate. I am informed that the reading of the calendar would commence somewhere in the neighborhood of Calendar No. 500, but on page 5 of the calendar, under General Orders, there is a bill (S. 3224) relating to the creation in the Army of the United States of the grade of lieutenant general, which I beg leave to call to the attention of the Senate at the request of the Committee on Military Affairs. I ask for its consideration at this time.

The VICE PRESIDENT. Is there any objection?

Mr. HARRISON. The object of the Senator is to take up the bill out of order?

Mr. WADSWORTH. Yes; and I wish to take advantage of the opportunity to explain why the committee directed me to make the request.

Mr. HARRISON. After the bill is out of the way, we shall then proceed with the calendar in regular order?

Mr. WADSWORTH. Yes.

Mr. UNDERWOOD. I ask that the bill may be read. I do not know that I have any objection to its present consideration, but I think it is better to have the bill read before unanimous consent is granted.

The VICE PRESIDENT. The bill will be read.

The Assistant Secretary read the bill, as follows:

Be it enacted, etc., That in the Army of the United States the grade of lieutenant general is hereby revived, and the President is hereby authorized, in his discretion and by and with the advice and consent of the Senate, to appoint to said grade one general officer, who, within the United States, prior to the close of the recent war, rendered especially distinguished service, and two general officers, who, prior to the close of hostilities, especially distinguished themselves in command of field armies in the American Expeditionary Forces; and the officers appointed under the foregoing authorization shall have the pay prescribed by section 24 of the act of Congress approved July 15, 1870, and such allowances as the President shall deem appropriate: *Provided*, That no more than three appointments to office shall be made under the terms of this act.

Mr. WADSWORTH. Mr. President, this bill was reported by the Committee on Military Affairs October 18, 1919—more than a year ago—and it has been on the calendar ever since. As the bill has been reached from time to time on the calendar, objection to its consideration has been entered, and thus far the Senate has not considered it. The bill, as may be seen, proposes to revive the grade of lieutenant general in the Army and to authorize the President to appoint three officers to that grade, two officers who have especially distinguished themselves in command of field armies in France prior to the close of hostilities and one officer who especially distinguished himself in the United States.

Mr. POMERENE. Mr. President, may I ask the Senator from New York what generals the committee had in mind when the bill was reported?

Mr. WADSWORTH. I was just about to state that. While the bill does not mention the names of general officers who are under contemplation in this connection, its very terms confine the recognition to be extended to officers of the American Expeditionary Forces to two generals, Gen. Liggett and Gen. Bullard, for they were the only officers who commanded field armies in France prior to the close of the hostilities. Gen. Liggett commanded the First Army, and Gen. Bullard commanded the Second. Gen. Liggett must be retired on account of age on March 21 next. Gen. Bullard has three more years to serve upon the active list before retirement. The committee very sincerely believes that the bill should pass, but is especially concerned over the status of Gen. Liggett. If Congress does not take any action with respect to him at this session he will be retired in the grade of major general, which he now occupies, and which grade he occupied before the United States went into the war. It is accurate to say that Gen. Liggett is the only general officer of the Army who after hostilities have ceased, after the war is over, finds himself in the same grade which he occupied before the war started. As I have said, if the Congress does not act during this session to give him some recognition for his extraordinary services, he will be retired in the same grade which he occupied when he first went to France.

Now, let me say just a word as to his services. Gen. Liggett went to France at the very beginning of our participation in the war. He went there with the grade of major general in the Regular Army in command of a division. After services covering some little time in that capacity he was promoted to the emergency rank of lieutenant general. He served in command of a corps and commanded the American corps which took part in the crushing in of the Marne salient, July, 1918, and rendered most excellent and conspicuous service upon that occasion, being the first American officer to command troops in the field in any large numbers.

He also continued in command of the corps during the St. Mihiel offensive. At the outset of the Meuse-Argonne offensive Gen. Liggett was promoted to the command of the First American Field Army and had under his command, at one time or another, approximately 1,000,000 men. He commanded the First American Field Army until the close of the hostilities, and, next to Gen. Pershing himself, he carried the greatest responsibility of any officer of the American Expeditionary Forces in the management of combat troops in the field in the face of the enemy.

The committee has believed all along that this officer is thoroughly entitled to some recognition for his extraordinary services during those trying days. Every other officer who held considerable command in France has come out of the war holding a higher grade in the regular service than the grade which he held when he went into the war. Gen. Liggett alone is the officer of the entire Army who has had no recognition whatsoever, and yet his part, next to that of Gen. Pershing, was the most conspicuous played by any officer of the American Army during the war. It is for that especial reason that the committee has instructed me to bring this matter before the Senate and to ascertain if the Senate can not act upon the passage of the bill, which would make it possible for Gen. Liggett to have this recognition.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. LODGE. Mr. President, I feel very strongly that the list of promotions and appointments to the position of major general and brigadier general ought to be thoroughly examined. I do not desire at this time to indulge in any criticism as to the manner in which rewards and punishments have been distributed under the present administration, and by that I include the staffs. I think the matter will require very careful consid-

eration of the Senate of the United States before we accede to such promotions and appointments.

The bill for which consideration is requested provides for three lieutenant generals. I hope it will not be passed in that form. I realize that Gen. Liggett's case is an exceptional one, and I should like to see something done for him, but I do not wish to go further than that. If it is proposed to provide for the appointment of three lieutenant generals now, without an opportunity to examine the matter, I shall very reluctantly be compelled to object.

Mr. WADSWORTH. Mr. President, in view of that situation I shall follow out the directions of the Committee on Military Affairs and propose an amendment to the bill.

Mr. POMERENE. Mr. President, before the Senator proposes the amendment I should like to ask a question. The Senator has just stated what the facts are which justified the committee in asking for the advancement for Gen. Liggett, and, as I am informed, I am in entire sympathy with what the chairman of the committee has said in his behalf; but I should like to know who the other two generals are who were in the mind of the committee?

Mr. WADSWORTH. I have stated that Gen. Bullard, who commanded the Second Army in the Meuse-Argonne offensive, would be the only other eligible officer under the first provision of the bill.

The bill does not mention any of these officers by name; but in the case of the officer who is authorized to be appointed for having performed especially distinguished services in the United States the Committee on Military Affairs had in mind the recognition of Gen. March, the Chief of Staff, during the war. It was understood by the committee when the bill was reported that Gens. Liggett, Bullard, and March would be the beneficiaries of the measure.

Mr. OVERMAN. Mr. President, did I understand the Senator from New York to say that every officer who commanded troops overseas during the war had come out with a higher grade than that held by him when he went into the war?

Mr. WADSWORTH. Every one.

Mr. OVERMAN. I think the Senator is mistaken. I know an officer who commanded troops in engagements before the Hindenburg line who has not been promoted. I think he deserves promotion. He is now a colonel, although he served as a general during that fight. I repeat he has not been rewarded, and I do not know why.

Mr. WADSWORTH. Was he a colonel at the time he went into the war?

Mr. OVERMAN. He was a colonel at the time he went into the war. As I stated, he commanded the troops which fought at the Hindenburg line and succeeded in breaking that line. He occupied for a time the grade of brigadier general, but has been put back to the old rank occupied by him when he went into the war.

Mr. WADSWORTH. That is the only such case of which I have ever heard. The Secretary of War and Gen. Pershing, who appeared before the Committee on Military Affairs several days ago in behalf of this proposal, made the statement that Gen. Liggett was the only officer who had held general rank in France who had received no promotion as the result of his service.

Now, Mr. President, in view of the objection announced by the Senator from Massachusetts——

Mr. OVERMAN. Let me say right there that I went before the Secretary of War and asked that the officer to whom I have referred be promoted. I think my appearance there was resented and probably the department has disciplined the officer and not advanced him in rank because of the fact that my colleague and I went to the War Department and asked for his promotion. So he stands now where he did when he went into the war. Although he fought that great fight he has not been recognized at all.

Mr. WADSWORTH. Mr. President, in view of the objection announced by the Senator from Massachusetts, I offer the amendment which I send to the desk. I do so at the direction of the Committee on Military Affairs, and in doing so I desire to say that I still believe that the other officers to whom I have referred should receive this recognition; but the case of Gen. Liggett is an emergency matter, for unless this Congress acts nothing can ever be done for him of a suitable character.

Mr. McKELLAR. Mr. President, if I may ask the Senator a question, was this action taken by the committee on Friday last?

Mr. WADSWORTH. It was.

Mr. McKELLAR. I was not present at the meeting of the committee on Friday, having been necessarily detained in one of the departments and not being able to get there. As I understand, the amendment provides for striking out the names of Gen. March and Gen. Bullard.

Mr. WADSWORTH. The names of the officers do not appear in the bill at all.

Mr. McKELLAR. But that is the effect of the proposed amendment.

Mr. WADSWORTH. The effect will be readily apparent when the Secretary reads the amendment.

Mr. McKELLAR. Mr. President, I believe that the same treatment should be accorded all three of the officers who have been mentioned, and I shall object to the consideration of the bill to-day unless we take it up as reported out by the committee originally providing for all three.

Mr. WADSWORTH. I hope the Senator from Tennessee will not press that objection. May I say to the Senator that in the case of the other two officers Gen. Bullard has three years to serve before retiring, and the next Congress, if it saw fit, could pass legislation giving him the recognition which I believe he deserves; Gen. March has four or five years yet to serve before retiring, and the next Congress or the succeeding Congress, if it saw fit, could give him the recognition which I believe he also deserves; but it must be this Congress that shall act upon the case of Gen. Liggett, and as the Senator from Tennessee knows, every day is precious. The committee had a very full attendance; we heard Gen. Pershing, who made a personal plea for his great lieutenant who helped him so ably to fight the great battles in the last six weeks of the World War, and by a unanimous vote the chairman of the committee was requested to lay this matter before the Senate in just the way I have done it. I think we might well take this opportunity to show that republics are not always ungrateful.

Mr. FLETCHER. Mr. President, I suggest to the Senator from Tennessee that the committee has not reversed its action with regard to the favorable report of this bill as it was originally presented, and there is no purpose now to abandon the idea of taking proper care of Gen. March and Gen. Bullard; but the emergency is that Gen. Liggett retires in March, and unless this action is taken now it will never do him any good. He ought to be taken care of.

Mr. McKELLAR. I agree with what the Senator says about Gen. Liggett; but it is equally clear that unless the three come in together Gen. Bullard and Gen. March will be left out, and I think all three are entitled to this recognition.

Mr. FLETCHER. I agree with the Senator.

Mr. McKELLAR. I hope the Senator will withdraw the matter for a week, and let us discuss it in the committee and see if we can not make some arrangement that will bring about the desired result.

Mr. ROBINSON. Mr. President, will my friend the Senator from New York yield for a question?

Mr. WADSWORTH. Yes.

Mr. ROBINSON. Has the committee taken any action regarding the large number of promotions in the Army that were sent to the Senate at the beginning of this session—something like 4,000, I believe?

Mr. WADSWORTH. I will say to the Senator from Arkansas that the committee has not, because those nominations are not yet pending before the Military Affairs Committee.

Mr. ROBINSON. No executive session has been held since that time?

Mr. WADSWORTH. None.

Mr. McKELLAR. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Tennessee.

Mr. McKELLAR. Suppose we should pass the bill, and suppose the House should pass the bill, and the President sent in the nomination of Gen. Liggett, we would still be in the same position that we are now, because there has been no reference of any of these nominations, and unless we have some assurance that the appointment will be confirmed I think we are going through a useless proceeding. That is why I suggested a delay of a week to talk it over.

Mr. ROBINSON. Mr. President, will the Senator from New York yield to me further for a brief statement?

Mr. WADSWORTH. I yield.

Mr. ROBINSON. My information is that several thousand military nominations were sent to the Senate at the beginning of this session, and that no action has as yet been taken looking toward a consideration of those nominations by the Senate or any committee of the Senate. In that list of nominations so sent to the Senate a long while ago, and which the Senator from New York has not even asked to have referred to his committee, there are a large number of officers who are just as much entitled to the gratitude of this Republic, just as much entitled to the fair and prompt consideration and action of the Senate, as is any officer whose promotion is contemplated by the

bill now submitted out of order by the Senator from New York.

In that list of several thousand officers are hundreds of men as brave as ever wore the uniform of the United States Army, as gallant as any men who ever went down to battle or ever breasted the flood of death; and I want to ask the Senator from New York now whether it is proposed that these nominations shall be defeated or rejected by the failure on the part of the Senate to act?

Mr. SMITH of Georgia. Mr. President, will the Senator let me call his attention to the fact that there are probably about 4,000 of these officers whose opportunity for appointment will expire on March 4?

Mr. ROBINSON. And they will go out of the service of the United States—out of the Army.

Mr. SMITH of Georgia. Just let me finish—so that there are 4,000 who will lose their position entirely unless we act upon their nominations.

Mr. FRANCE. Mr. President, a parliamentary inquiry.

Mr. ROBINSON. And not only is that true, but the United States will lose their service. So, Mr. President——

The VICE PRESIDENT. The Senator from Maryland is making a parliamentary inquiry.

Mr. FRANCE. I desire to inquire if the question before the Senate is the request for unanimous consent for the consideration of this measure?

The VICE PRESIDENT. That is the question.

Mr. ROBINSON. I object, Mr. President, to the consideration of the bill.

Mr. FRANCE. I object, and call for the regular order.

The VICE PRESIDENT. That ends it.

Mr. PHELAN. Mr. President, I understood that the Senator from New York had secured unanimous consent for the consideration of the bill, and that a motion had been made to amend it.

The VICE PRESIDENT. He had not.

Mr. PHELAN. Then I am in error.

The VICE PRESIDENT. The Senator is in error.

CHIEF GUNNER ROBERT EDWARD COX, UNITED STATES NAVY.

Mr. PAGE. From the Committee on Naval Affairs I report back favorably without amendment the bill (H. R. 12469) to authorize the award of a medal of honor to Chief Gunner Robert Edward Cox, United States Navy, and I ask unanimous consent for its immediate consideration at this time.

The VICE PRESIDENT. Is there any objection?

Mr. SMOOT. Let it be read.

The VICE PRESIDENT. The bill will be read.

The Assistant Secretary read the bill, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to award a medal of honor to Chief Gunner Robert Edward Cox, United States Navy, in recognition of the extraordinary heroism he displayed on the occasion of the accident which occurred in the after turret of the United States ship *Missouri* on April 13, 1904.

The VICE PRESIDENT. Is there any objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HOSPITALS FOR SICK AND DISABLED SOLDIERS.

Mr. FRANCE. Mr. President, I made objection to the consideration of the measure for the promotion of lieutenants general because I felt that it would be improper for the Senate to take up the consideration of the promotion of generals until it should have made provision, by passing the hospital bill, for our sick and disabled soldiers, who by the thousands are suffering to-day because adequate hospital facilities have not been supplied. I desire to give notice that to-morrow, at the close of the morning business, I shall call up the bill providing hospital facilities for the sick and disabled soldiers.

Mr. SMOOT. Mr. President, I want to say to the Senator from Maryland that the Public Health Service desires at this time that the building program for hospitals shall be taken care of in the sundry civil bill; and I will say to the Senator, from what I know of the feeling of the Appropriations Committee that the first appropriation toward that program will be made as requested, not only by the Secretary of the Treasury but by the Surgeon General of the Army. In other words, the testimony before the committee shows that $30,000,000 will be required for the building of hospitals. The plan has been mapped out. The plans for the buildings have been agreed upon. Perhaps in some cases the locations have not been selected; but the appropriation asked for this year is $10,000,000, and if the Appropriations Committee provides the $10,000,000 for beginning that plan there will be no need whatever for passing the bill to which the Senator has reference.

Mr. FRANCE. When may it be hoped that the committee will act upon the matter?

Mr. SMOOT. Just as soon as we can dispose of the appropriation bill, and it will be reported to the Senate some time this week. I will say to the Senator that if the item is carried in the appropriation bill it will become a law long before the bill to which he has reference could pass the Senate and then pass the House.

Mr. FRANCE. I am not concerned about the method by which the appropriation is secured, but I am very much concerned about the delay. This bill was reported on the 2d day of last June, and it was then considered to be an emergency measure. We could secure no action on the 2d of last June. We have been unable to secure action since.

Mr. SMOOT. It is an emergency matter, and the Secretary of the Treasury and also the Surgeon General of the Army have stated that it will take three years to build the different hospitals; and they ask for $30,000,000, and request that in this appropriation bill $10,000,000 be provided for the first year, and I will say to the Senator that I have no doubt it will be done.

Mr. FRANCE. I am very much encouraged to hear it.

REDUCTION OF THE ARMY.

Mr. PHELAN. Mr. President, I desire at this time to call up the matter of the reconsideration of the vote on the joint resolution (S. J. Res. 236) directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 150,000.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

Mr. MCKELLAR. Mr. President, the author of the amendment, the junior Senator from Wisconsin [Mr. LENROOT], is not here, and I hope the Senator from California will not ask for a vote on the matter in his absence. It is his amendment that we propose to reconsider. I understand that the Senator from Wisconsin will be back on Thursday, and the matter can be voted upon then. I have just looked at the rules to see what the parliamentary situation is. I do not know whether I have the right to ask that the matter go over or not. If I have, I should like to make that request.

The VICE PRESIDENT. The Chair will tell the Senator in a minute.

Mr. MCKELLAR. It seems to me that the motion should go over until the junior Senator from Wisconsin, the author of the amendment, returns. He will be here on Thursday.

Mr. WALSH of Montana. I call the attention of the Senator from Tennessee to the fact that the Senator from Wisconsin [Mr. LENROOT] was not here at the time the vote was originally taken, and I understood at the time that he was paired. Doubtless his pair will protect him in connection with any vote that is now taken. Let me remind the Senator that we were told by the Senator from Indiana [Mr. NEW] that recruits are being enlisted at the rate, my recollection is, of 2,000 a day. He pointed out the additional cost for each day's delay in the disposition of the joint resolution. I remind the Senator that the motion to reconsider suspends the action of the Senate and the present status is continued, so that these enlistments are going on every day that the matter remains in abeyance. Under these circumstances I rather think the Senator from Wisconsin would not like to ask that the matter be further delayed on account of his absence, imperative though it may be.

I trust that the Senator will withdraw his objection and allow us to take a vote on the motion to reconsider.

Mr. MCKELLAR. It was a mere suggestion on my part. I then move, Mr. President, that the motion to reconsider be laid on the table, and on that I ask for the yeas and nays.

Mr. ASHURST. Let us have the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. MCCORMICK]. In his absence I transfer my pair to the senior Senator from Missouri [Mr. REED] and vote "nay."

Mr. KNOX (when his name was called). I have a pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. I am advised that if he were present he would vote as I shall vote. I therefore feel at liberty to cast my vote. I vote "nay."

Mr. POMERENE (when his name was called). I have a temporary general pair with the senior Senator from Iowa [Mr. CUMMINS]. I do not know how he would vote on this question, and I therefore withhold my vote.

Mr. STERLING (when his name was called). I have a general pair with the Senator from South Carolina [Mr. SMITH].

I transfer my pair to the Senator from West Virginia [Mr. ELKINS] and vote "nay."

The roll call was concluded.

Mr. FLETCHER. I have a general pair with the Senator from Delaware [Mr. BALL]. I am informed that he would vote the same way I shall vote on this question, and therefore I vote "nay."

Mr. MYERS. Has the Senator from Connecticut [Mr. MCLEAN] voted?

The VICE PRESIDENT. He has not.

Mr. MYERS. I have a pair with the Senator from Connecticut [Mr. MCLEAN], which I transfer to the Senator from Kentucky [Mr. STANLEY] and vote "nay."

Mr. GLASS. I have a general pair with the senior Senator from Illinois [Mr. SHERMAN], and in his absence I withhold my vote.

Mr. HENDERSON (after having voted in the negative). I observe that the Senator from Missouri [Mr. REED] has entered the Chamber. Therefore I will have to withdraw my pair announced a few minutes ago and withhold my vote.

Mr. MCCUMBER. I transfer my pair with the Senator from Colorado [Mr. THOMAS] to the Senator from Delaware [Mr. BALL] and vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Wisconsin [Mr. LENROOT] with the Senator from Tennessee [Mr. SHIELDS];

The Senator from Indiana [Mr. WATSON] with the Senator from Delaware [Mr. WOLCOTT]; and

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN].

Mr. GERRY. I desire to announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] on account of illness.

The result was announced—yeas 26, nays 45, as follows:

YEAS—26.

Borah	Gronna	McNary	Swanson
Capper	Harrison	Norris	Trammell
Culberson	Heflin	Overman	Walsh, Mass.
Dial	Johnson, S. Dak.	Reed	Walsh, Mont.
France	Jones, Wash.	Sheppard	Williams
Gerry	Kenyon	Simmons	
Gore	McKellar	Smith, Md.	

NAYS—45.

Ashurst	Hale	Nelson	Smoot
Beckham	Harris	New	Spencer
Brandegee	Hitchcock	Page	Sterling
Calder	Kellogg	Penrose	Sutherland
Colt	Keyes	Phelan	Townsend
Curtis	King	Phipps	Underwood
Dillingham	Kirby	Pittman	Wadsworth
Fernald	Knox	Poindexter	Warren
Fletcher	Lodge	Ransdell	Willis
Frelinghuysen	McCumber	Robinson	
Gay	Moses	Smith, Ariz.	
Gooding	Myers	Smith, Ga.	

NOT VOTING—25.

Ball	Henderson	McLean	Stanley
Chamberlain	Johnson, Calif.	Newberry	Thomas
Cummins	Jones, N. Mex.	Owen	Watson
Edge	Kendrick	Pomerene	Wolcott
Elkins	La Follette	Sherman	
Fall	Lenroot	Shields	
Glass	McCormick	Smith, S. C.	

So the Senate refused to lay the motion to reconsider on the table.

The VICE PRESIDENT. The pending question is, Shall the vote whereby the joint resolution was passed be reconsidered?

The motion to reconsider was agreed to.

The VICE PRESIDENT. The question now is, Shall the vote whereby the joint resolution was ordered to a third reading be reconsidered?

The motion to reconsider was agreed to.

The VICE PRESIDENT. The joint resolution is now in the Senate and open to amendment.

Mr. WADSWORTH. I move that the joint resolution be amended by striking out the phrase "150,000" wherever it occurs, and in lieu thereof inserting the phrase "175,000."

Mr. ROBINSON. I suggest to the Senator from New York that the Senate had better reconsider the vote by which the amendments were concurred in.

Mr. WADSWORTH. Has not that vote been reconsidered?

The VICE PRESIDENT. No; it has not. The Chair is of the opinion that the parliamentary question is, Shall the vote whereby the amendments made as in Committee of the Whole were concurred in by the Senate be reconsidered?

Mr. ROBINSON. That was the suggestion I rose to make.

The VICE PRESIDENT. The question is, Shall the vote whereby the amendments made as in Committee of the Whole were concurred in be reconsidered?

The motion to reconsider was agreed to.

The VICE PRESIDENT. Now the question is on concurring in the amendments as in the Committee of the Whole.

Mr. WADSWORTH. There will have to be a change in at least one of the amendments. The percentage to which the different branches of the service may be recruited should be changed to 62½ from 53½.

The VICE PRESIDENT. If the amendments are nonconcurred in, that amendment can be subsequently offered.

Mr. REED. Mr. President, a parliamentary inquiry. I have been kept from the Senate by indisposition, and I am not familiar with the status of this particular measure. Will the Chair enlighten me on the status of the joint resolution, so far as it affects the question of the size of the Army?

The VICE PRESIDENT. In Committee of the Whole the Senate practically instructed the Secretary of War to cease further enlistments and to discharge soldiers at present in the Army until the Army has been reduced to 150,000. The original joint resolution called for 175,000. I do not think the Chair is authorized to state the arguments on the question.

Mr. REED. I do not care for the arguments; but now the situation is that we are about to vote to go back to 175,000?

The VICE PRESIDENT. That is it substantially, whether the Senate will concur in the amendments or not.

Mr. BORAH. We are about to vote on the question as to whether we will go back to 175,000.

Mr. REED. That is the statement just made by the Vice President.

Mr. ROBINSON. Mr. President, a parliamentary inquiry. Does not the question now recur on concurring in the amendments which reduced the Army to 150,000, and those who desire to see the Army reduced to only 175,000 will vote against concurring in the pending amendments?

The VICE PRESIDENT. That is the opinion of the Chair.

Mr. REED. Mr. President, I am not in any physical condition to express myself on this matter as I would like to do, and I do not expect that what I am about to say, which will be very brief, will change the result of the vote; but I want to say it for the sake of the RECORD.

When the bill proposing to fasten a standing Army upon the country of 300,000 was before the Senate a few months ago, I opposed its passage, and I think I made two motions looking toward a reduction. In one of them, as I recall, I placed the number at 200,000, not because I believed we needed 200,000 men, but because I hoped that we might succeed in making a reduction which might be impossible if the figure were made lower.

At that time I challenged the sponsors of the bill to state any good reason why we needed an Army of 300,000 men in a time of profound peace, and I received no reply to that challenge.

The bill was put over at 300,000 on the mere naked assertion that we needed that many men and proposed to have them. I am delighted to find that the same Senators and the same committee within this very short period of a few months have revised their views and are willing to reduce the Army to 175,000. It seems that in the progress of time some of the old, sound ideas of our Government are beginning gradually to filter their way into the official conscience of the country. But in my humble judgment we have not progressed as far in that direction as we should.

I still demand to know why we need 150,000 troops in a time of profound peace in the United States of America. We got along with an Army of 75,000 to 80,000 during all of the years preceding the war. I think 105,000 was the maximum that we had even when we were threatened with serious disturbance along our southern boundary—89,000 the Senator from Mississippi [Mr. WILLIAMS] corrects me, and I thank him.

Mr. FLETCHER. One hundred and five thousand is the correct number.

Mr. REED. I am speaking without notes and merely from recollection. Everybody knows that the Army had then temporarily been increased, because of the serious nature of our affairs in Mexico. So far as we can now observe a better state of affairs exists in Mexico than has existed there for a considerable number of years. It appears, and I trust appearances are not deceptive, that they have established something bearing a very close relation to a stable government in Mexico. Whether they have or whether they have not, if any difference should arise in the future, we know that we have now in the United States two and one-half million trained men, and that we could, if unhappily called upon to do so, raise and equip an army for all troubles that might arise south of the Rio Grande River.

I inquire, then, whether there is any danger from abroad that calls for the maintenance of an Army of 175,000 men? What nation is about to attack us? From what direction does the menace come?

Certainly not from Germany, for that country lies there prostrate and disarmed and we are being told every day that her people are starving, and American citizens are being called upon to contribute their money to feed the children of Germany.

Is there any danger from Austria? That country has been dismembered, and out of its component parts have been constructed three or four other countries, our own children, with whom we are not only at amity but to whom we have been loaning money, in my opinion contrary to law, since the war ended. They not only have no disposition to attack us, they not only have no ability to attack us, but they are not able to stand apparently without the financial prop of the United States to sustain them. Austria, it is said, has practically applied for a receivership. There is left a population of 8,000,000 people with a city of two and one-half million people, and I think all economists agree an impossible condition has been created and that the Austrian Kingdom must be in some way reconstructed in order that it may continue to exist as a government and as a nation.

Are we fearful of France? I not only say that we are in no danger from France, if France were ill-disposed, but in my judgment we have in France a friend who not only would not move to our attack but would probably come to our defense in case of any struggle.

Are we fearful of Great Britain, a country whose soldiers stood by our soldiers only a few months ago, to whom we have loaned, I believe, over five thousand million dollars, the interest upon which is not being paid, and an extension, while not legally granted or officially asked, is nevertheless, in fact, granted? And the indulgence of this Government is an additional evidence of our friendly interest in Great Britain. We surely are in no danger of attack from Great Britain at this time.

There remains but one country powerful enough to in any way injure us. I have not spoken of Italy. Any attack by Italy is unthinkable. The country to which I refer is, of course, Japan. So far as I am concerned I am inclined to regard with very great discredit the rumors that Japan is working herself into a war fervor against the United States. Economically, it is impossible for her to wage any considerable war with the United States. She could only do so if she had the aid of Great Britain, and if there is any real danger of Japan and Great Britain combining against the United States, then we need not an army of 175,000, but we need military training in the United States and a preparation such as the country has never yet dreamed of, and the bill does not answer such a purpose.

Mr. MYERS. Mr. President, will the Senator yield?

Mr. REED. I would prefer to yield in a moment when I get to a stopping point.

Mr. MYERS. Does the Senator get to a stopping point often?

Mr. REED. I was hoping to. That is the reason I did not yield to the Senator. But I will yield to him now.

Mr. MYERS. I will withdraw that humorous question, Mr. President, because I know the Senator, like all other speakers, does stop quite as often as he starts to speak, and he always talks most interestingly.

Mr. REED. I will yield to the Senator now.

Mr. MYERS. I thank the Senator for his courtesy. The Senator asked a few minutes ago for some reason why the Army of the country should be maintained at 175,000 enlisted men. I will give him what I think is one sufficient reason.

Gen. Pershing appeared before the Senate Committee on Military Affairs last Friday and stated, while he thought it would be very unwise to reduce the number of enlisted men below 200,000, that if the number should be reduced to anything below 175,000 it would practically destroy the framework of a skeletonized Army which was contemplated and provided for by the Army reorganization bill, which is a plan for the maintenance of an Army of certain size and dimensions that was favored by Congress last year. He stated that while he thought the number should not go below 200,000, it might be reduced to 175,000 without destroying the plan, but to reduce it below 175,000 would so disrupt and impair the framework and foundation of the Army that if we should be called upon in any emergency in future to enlarge the Army to a much larger number in a comparatively short time, we would be unable quickly and effectively to do so, because the framework for the enlargement of the Army would not be there, intact and unimpaired, to the required extent. We would not, in that event, have the regiments in sufficient number to enable us to recruit a large Army and expand the regiments into divisions within a reasonably short time, and it would simply be equivalent to undermining the foundation of a house, Gen. Pershing contends, to reduce the number of enlisted men below 175,000.

The Secretary of War was there with Gen. Pershing, and was equally emphatic in the same contention. I do not believe that anyone has ever accused the Secretary of War of being a militarist.

Mr. REED. No; nor of being military.

Mr. WILLIAMS. Nor of being a military expert.

Mr. REED. No; nor of being a military expert.

Mr. MYERS. I believe it is acknowledged by a good many people that he is a good executive officer and did good executive work during our war with Germany.

Mr. REED. I expect there are some people who acknowledge it.

Mr. MYERS. I am one of them, I am glad to say.

Mr. REED. I am not, I am equally glad to say; so we will let it go at that. I am going to take this statement up in a moment and answer it. I thought it would probably be aside from the line of thought I was on, and that is why I asked the Senator to defer it for a few moments. I want to conclude the thought I was on.

I ask, are we in danger of attack by Japan? Economically Japan could not maintain the contest without aid from the outside. She could not land a single soldier in the United States. I say that for this reason: Her battle fleet is not the equal of the battle fleet of the United States, and until the battle fleet of the United States is sunk, no transport laden with soldiers can cross the Pacific Ocean and land upon the American coast.

The only reason we were able to transport soldiers from the United States during the war with Germany was because the British fleet had swept every German ship from the ocean except the submarine, and the British fleet, plus the American, French, Italian, and Japanese fleets, was able to smother the submarine and to defend our transports against it. If there had been upon the ocean a half dozen German men-of-war, capable of keeping the seas, we should have had the gravest difficulty in landing any of our troops, and probably many of our transports would have gone to the bottom. Until Japan can sink the last of the American vessels or drive them under the guns of our fortresses or compel them to intern she can not transport an army across the Pacific Ocean, and if she landed here with anything less than 3,000,000 men she would have simply landed a cemetery, where the last one of them would sleep forever.

In order to land such an army and to maintain it necessarily implies a complete mastery of the ocean, fleets of fast transports to carry goods and armament and reinforcements. Upon the other hand, we have the superior fleet, judging by every rule of naval warfare, and, following one or two sharp conflicts, Japan ought to be completely overcome upon the ocean and every vessel she has sent to the bottom. If we are not in that position, it is our business to get in that position at once; not wait for foreign ships to land upon our soil, but be prepared to stop them in midocean. So the proposed Army can not be justified upon the theory that it is necessary to protect us against raids of Japanese soldiers.

What, then, do we need with such an Army? Now, I come to the only answer that I have heard given: That a scheme of a grand army of a certain size, with certain units, has been laid out; that in order to produce such an army in skeleton form it is necessary to have 175,000 men, so that the skeleton may be of such dimensions as to have built about it the complete scheme of the grand army; and that, therefore, that scheme for an army of a certain size having been adopted we must have a skeleton army of a certain size. Where does that leave us? It simply leaves us in the position that all we have got to do is to go back and change the original scheme a little and make the original scheme fit an army of 150,000 men, where it now fits an army of 175,000.

Mr. MYERS. I think the Senator from Missouri is right about that. If we reduce the skeleton below 175,000 enlisted men, which Gen. Pershing said would necessarily be required, we must go back to the Army reorganization bill and reconstruct the whole plan.

Mr. REED. Exactly; and that would be a terrible thing to do. It would take the Army experts probably about a week's time to revamp the whole plan; probably they could do it in three hours. The premise of this whole argument is that we have fixed a certain scheme for a grand army in case of war——

Mr. MYERS. It would require action by Congress to change it.

Mr. REED. And that now we must not change that, but must adapt everything to it, although the scheme was adopted at a time when Congress was under the impression that we had to have an army in time of peace of 300,000 men.

Mr. MYERS. If the Senator will permit me, such a change would require action by Congress as well as by the General Staff of the Army.

Mr. REED. Certainly, and Congress can take that action just as easily as it can pass this joint resolution. That is the trouble with this whole line of argument. It is based upon the fallacy that Congress did something, adopted a certain plan, that is immutable; that every other plan that is hereafter adopted must fit into that plan; when really all we have got to do is to go back and modify the original plan a little bit and shape it to what we think is the condition of affairs to-day.

Mr. WILLIAMS. Will the Senator from Missouri pardon an interruption?

Mr. REED. I will.

Mr. WILLIAMS. The Senator from Missouri [Mr. REED] is dwelling, and the Senator from Montana [Mr. MYERS] has dwelt, upon the size of the skeleton in order to suit the size of the flesh and blood. No one has yet told us how the size of the skeleton was reached, because no one has told what the size of the entire body of flesh and blood is going to be. The Senator from Montana has not told us; Gen. Pershing has not told us; nor has anyone else. If the skeleton is required solely for the purpose of fitting the flesh and blood, and no one has told us what the thing with the flesh and the blood on it is going to be, how can anybody justify the requirements of the skeleton?

Mr. REED. I thank the Senator. Of course, the argument he makes is unanswerable unless these gentlemen can come forward and show that the plan that has been adopted for the full-sized Army is one that it is absolutely necessary to have and that any change in it would be detrimental to the Republic. They have not given us that information, as I am informed.

Now, let us see about the opinions of military experts. I would not pluck one wreath from the laurels that adorn the brow of Gen. Pershing; I have heard him criticized; I have heard people say he was a martinet; I have heard a lot of such things; but I have never seen anything yet that led me to any other conclusion than that he was a great soldier. This great soldier, however, is confronted by a bill passed by Congress, which he probably O. K'd—I do not know as to that—embodying a scheme for an immense army in time of war. I do not know the Regular Army officer, the professional soldier—and I say it with all the respect in the world—who has not always been clamoring for a greater standing army; I do not know the naval officer who has not also been clamoring for a great navy.

It is just as natural as life itself to these men engaged in these professions to want to make their respective branches of the defense of this country impregnable; it is just as natural as it is for a man to want always to find his arms strong enough to beat down any adversary. That is natural; I have no criticism of them; but it is the business of Congress to stand between such demands and the burdens which must be placed upon our people; to strike a just medium and to determine what the policy of the country shall be. We have always had to do that. If the Regular Army could have written the military bills of the past we would have had an Army of half a million men in this country many years ago. If the Navy could have written the naval bills of the past, we would have had a war fleet that would have been capable of driving the combined fleets of the nations of the world into their ports and under the guns of their fortresses. But Congress and the American people have not taken that view, and they have been wise in not taking it.

Military men make mistakes. The same gentlemen who are here now saying we can not get along with less than 175,000 men a few weeks ago were here saying we had to have 300,000 men. It was their testimony that was read to me to silence me, or to attempt to silence me, a few weeks ago when I insisted that the Army should not be 300,000 men. Now, a change has come over the spirit of our dreams. I do not know what has caused it, but, thank God, it has come.

Do you quote Mr. Baker to me? Mr. Baker was for 300,000 men. Perhaps somebody will quote Mr. Daniels to me. One day he is in favor of total disarmament, as silly a proposal as ever fell from human lips, for if you totally disarm the white race, the civilized nations of the world, they would be overwhelmed the next day by the barbarous hordes. Reduction of armament is a different question, and one for which I have a very hearty sympathy; but disarmament is not a thinkable thing. So one day Mr. Daniels is in favor of disarmament; the next day he thinks it would be the most glorious thing in the world if all the German war fleet were taken into the middle of the ocean and sunk; the next day he demands that we build a grand new fleet greater than that of Great Britain, having in the meantime sunk the exact duplicates of the ships we are to produce; and the next day after that, without batting an eye, we see the German war fleet turned over to Great Britain to increase by 33 per cent the already overmastering force of that nation upon the high seas. So, when you quote authority to me, I reserve the right to do my own thinking about it.

Mr. President, I have just this to say in conclusion:

This country stands face to face with some tremendous problems. We are just beginning to emerge from the fever of this war, and there will result, there is resulting, the natural reaction which comes at the end of any fever; the weakness, sometimes almost the paralysis for a time, of the body that has been consumed by the fires of enthusiasm, or of fever, or of whatever term you may choose to employ. We must rebuild our own industries. We must rehabilitate our own country. The task is a gigantic one, and as we approach it we find ourselves compelled to pay every day the interest upon twenty-eight thousand millions of dollars of war debt, with ten billions of that money loaned in Europe, and probably a large amount of it never will be returned; but in the meantime we must pay the interest, and we must wait the day when that money may or may not be returned. For the present it is our burden, and we must bear it. That heavy weight upon our taxpayers and upon our industries is a serious handicap upon the prosperity of the Republic, and may produce disastrous consequences if we are not wise.

In addition to this, as an incident to the war, there will be fastened upon Government extraordinary expenses which prior to the war we were not called upon to meet; so that altogether there now rests upon the people of the United States a burden of taxation such as our fathers never dreamed of, and such as we never dreamed of until the trouble was upon us. In order to meet this mighty burden we must levy a tax of staggering proportions. We must take a large part of the profits and the earnings of our people every year in order to meet these inescapable burdens.

In order to show how our Government expenses are mounting I will print a table showing the appropriations for 1921 and the estimates for 1922. The table is as follows:

Table comparing by bills estimates of regular and permanent annual appropriations for the fiscal year 1922 with the appropriations made for the fiscal year 1921.

[Prepared by the clerks to the Committees on Appropriations of the Senate and House, Dec. 6, 1920. The column of 1921 appropriations includes the sums carried for that fiscal year in deficiency and miscellaneous appropriation acts for similar purposes. The estimated appropriations for 1922 will be found in detail in the annual Book of Estimates transmitted to Congress on Dec. 6, 1920.]

	Appropriations, fiscal year 1921.	Estimates, fiscal year 1922.	Increase (+) or decrease (−), 1922 estimates compared with 1921 appropriations.
REGULAR ANNUAL APPROPRIATION ACTS.			
Agriculture	$31,712,784.00	$41,989,334.00	+ $10,276,600.00
Army	392,558,365.00	692,811,070.20	+ 300,252,705.20
Diplomatic and Consular	[1] 9,220,537.91	11,983,848.94	+ 2,763,311.03
District of Columbia	18,373,004.87	25,039,044.99	+ 6,666,040.12
Fortification	18,833,442.00	35,676,533.66	+ 16,843,091.66
Indian	10,020,553.27	11,989,703.67	+ 1,969,148.40
Legislative, executive, and judicial	[2] 106,570,610.11	[2] 136,452,634.97	+ 29,882,024.86
Military Academy	2,142,212.70	6,464,432.73	+ 4,322,220.03
Naval	433,279,574.00	679,515,731.47	+ 246,236,157.47
Pension	279,150,000.00	265,190,000.00	− 13,960,000.00
Post Office	[4] 504,434,700.00	585,406,902.00	+ 80,972,202.00
River and harbor	12,400,000.00	57,114,915.00	+ 44,714,915.00
Sundry civil	[5] 435,848,805.92	803,446,196.86	+ 367,597,389.94
Total, regular annual appropriation acts	2,254,544,592.78	3,353,080,393.49	+1,098,535,805.71

[1] Includes for 1921, $9,218,537.91 in Diplomatic and Consular appropriation act and $2,000 in deficiency appropriation act.
[2] Includes for 1921, $104,749,326.11 in the legislative, executive, and judicial act, $1,458,000 transferred from the sundry civil act, and $363,284 transferred from deficiency acts.
[3] This sum includes estimates for certain expenses under the Treasury Department aggregating approximately $3,500,000, which has been paid for 1921 and prior years from the indefinite appropriations "Expenses of loans."
[4] Includes for 1921, $462,575,190 in Post Office appropriation act, $41,855,510, the amount estimated to carry out the postal reclassification act, and $4,000 in a deficiency act.
[5] This is the amount carried in the sundry civil act plus $75,000 carried in the deficiency act and $125,000 in the Federal water power act and minus $1,458,000 transferred to the legislative, executive, and judicial act.

Table comparing by bills estimates of regular and permanent annual appropriations for the fiscal year 1922 with the appropriations made for the fiscal year 1921—Continued.

	Appropriations, fiscal year 1921.	Estimates, fiscal year 1922.	Increase (+) or decrease (−), 1922 estimates compared with 1921 appropriations.
PERMANENT AND INDEFINITE APPROPRIATIONS.			
Interest on the public debt	$975,000,000.00	$922,650,000.00	− $52,350,000.00
Sinking fund	253,404,864.87	265,754,864.87	+ 12,350,000.00
Expenses of loans	[6] 12,499,182.96		− 12,499,182.96
Roads, construction of	[7] 104,000,000.00	1,000,000.00	− 103,000,000.00
Customs service, repayments, etc	20,200,000.00	27,000,000.00	+ 6,800,000.00
Indian funds and interest on same	23,775,000.00	23,475,000.00	− 300,000.00
Miscellaneous	38,847,752.29	60,896,496.00	+ [8] 22,048,743.71
Increased compensation to certain employees ($240 bonus)	[9] 35,000,000.00		− 35,000,000.00
Total permanent and indefinite appropriations	1,462,726,800.12	1,300,776,360.87	− 161,950,439.25
Grand total regular annual and permanent appropriations	3,717,271,392.90	4,653,856,759.36	+ 936,585,366.46
Deficiencies, 1920 and prior years	187,006,165.28		
Railroads	[10] 800,000,000.00		
Grand total	[11] 4,704,277,558.18		

[6] The indefinite appropriation "Expenses of loans" is repealed after June 30, 1921. Expenses for such purposes are estimated for 1922 in the legislative, executive, and judicial appropriation bill.

[7] The appropriations for road construction were carried for a series of years in the good roads act, approved July 11, 1916, and the Post Office appropriation act approved Feb. 28, 1919. The appropriations under those acts stop with the fiscal year 1921, except $1,000,000 for roads in national forests.

[8] The increase in miscellaneous permanent items is made up principally of estimated amounts as follows: $6,500,000 in the clothing and small stores fund of the Navy, $5,097,500 for the civil service retirement and disability fund, $3,750,000 for payments to States from receipts under the oil leasing act.

[9] Approximated.

[10] This sum is made up as follows: $300,000,000 for new loans to carriers and $500,000,000 on account of Federal control of railroads. No amount is included to cover sums estimated to carry into effect the 6 months' guaranty.

[11] The reduction in the stated amount of appropriations made during the second session of the Sixty-sixth Congress is due to revision of the estimated amount required for the sinking fund, interest on the public debt, and expenses of loans.

What, then, is the part of wisdom? Clearly it is to cut every expense of this Government absolutely to the bone, wherever those expenses can be cut without injuring the country or without placing it in peril. If those considerations are sound, apply them, then, to the Army. The Army never produces a dollar. It eats from January to January. It consumes and it destroys. It is nothing but an expense. It is justifiable alone upon the ground of necessity; and it is incumbent upon those who demand at the close of this war that our Army shall be more than doubled to show the necessity for it. That necessity is not shown when the Secretary of War comes in here and says that if you reduce the Army to 175,000 it will interfere with some other plan that can be changed overnight.

Mr. President, I protest against a great standing Army in a time of peace. We ought to build up a National Guard in this country. We ought to have a small, highly organized, and highly efficient Regular Army. We ought to have the means by which we could quickly produce war supplies. We ought to get back to the idea that this war is over. So far as any future war is concerned in which the United States may be involved, I do not believe there has been a time within the memory of any man here when we were as little likely to have trouble with any foreign Government as at the present moment.

First, all the world lies prostrate and exhausted. We alone are able to stand erect. Why, only a little while back Great Britain debased her currency, reduced her silver money to 50 per cent of dross, a thing she had not done since the days of Henry VIII. You can get with an American dollar a bushel full of the shinplasters of two-thirds of Europe. They are in no condition to make trouble, and, in my judgment, they have no disposition to make trouble.

In the next place, Europe has learned a lesson that it will take her a hundred years to forget. European generals, European military experts, said that you could not make a soldier out of a citizen under about three years of hard training. They found in the Argonne that we could make them in about 30 days, for many a man went into the Argonne fight and into the other battles of that war who had not had 60 days of military training. I do not mean that we should not have some military training of a proper character; I am not speaking of that; but Europe learned the lesson that this great country, where men are raised in an atmosphere of freedom, produces a class of men who, if they are driven to the defense of their country, will know how to defend her; and knowing that, even though they may have a superiority of military training, they will be very slow to enter upon a conflict with the 110,000,000 people of this land.

I am not one of those jingoists who think the United States is the only country on earth, but I say to-day we are in no danger of attack. We are in no danger of attack, first, because we have done nothing to cause attack; second, because Europe is prostrate and could not attack us if she wanted to; third, because she is not disposed to attack us; and, fourth, because the world has learned the lesson that the people of this country, standing within their seagirt shores, can beat back the embattled hosts of this earth. We do not need any 175,000 Regular Army. We do not need to make a military camp of the United States.

Singularly enough, this cry comes to us from the lips of those who at the same moment are preaching the general doctrine of disarmament. Now, I believe it will not be many years until the sensible powers of this earth will get together and put a limitation upon the size of the armies and navies by mutual consent. I hope that time is coming; but I do not think the United States is setting any very good example when it proceeds to increase its Military Establishment at a time like this. So I am in favor of a Regular Army of 150,000, and if I had my way it would go to 100,000, and I am not sure but that it would go lower than that.

Mr. President, I thank you.

Mr. WILLIAMS. Mr. President, I had hoped before leaving my seat to hear from the Senator from California [Mr. PHELAN], who has made the motion to reconsider—to hear what could be said, relying upon the fact that, with his ability, if there was anything that could be said in favor of an Army of 175,000 men as against 150,000, he could say it. I have missed being satisfied in that regard.

Mr. President, it has been several months since the Senator from Missouri and I have agreed about anything of any very great importance, but are thoroughly agreed about this particular question. I am especially in accord with him when he says that there was "never a time in the history of these United States when we were as little likely to be drawn into war as we are now. From the time we were 13 little colonies upon the Atlantic slope to the time in the beginning of the nineteenth century when we were almost afraid of hostility with the Barbary pirates; through the War of 1812, when we were humiliatingly defeated on land everywhere except at Drury's Lane and New Orleans; when we could not put a fleet upon the sea and had to rely for our glory at sea only upon individual ships' and individual captains' and individual sailors' records; even at the end of the Civil War, when, using our arms against one another, we had shown to the whole world what we could do in a family fight—the world never through all those experiences came to a time when it was as little prepared to challenge hostilities with the United States as it is right now. Mark you, Mr. President, there is this difference: In the old times we faced the contempt of the expert military and naval classes, while sometimes we had the respect of the populace behind us. But now we have gained the military respect of the experts in the armies and the navies of the world.

The Senator is wrong in saying that we "demonstrated that we could make a soldier in 30 days." We did not do that, of course. You can make in 24 hours a fighting machine that will die, but you can not make an efficient fighting machine, which

can win against anything like equal armament, in any 30 days or in any 60 days or in any 90 days.

But, Mr. President, that is not the question before us. Unless we are going into an offensive war, in which we are to be aggressors, if we are to be on the defensive, we will have in front of the Army we may maintain here, as the first line of defense, a navy; the second Navy in the world. Mark you, Mr. President, when I say that I do not say enough. It is, strategically speaking, the first Navy in the world, because the Navy of Great Britain is necessarily scattered from the Pacific to the Indian Ocean, through the Mexican Gulf, around through the Mediterranean, and about the Isthmus of Suez, in the South Pacific, and in the China Seas. She would be incapable to-morrow of mobilizing at a given point within the waters of the Western Hemisphere a navy anywhere near equal to that which this American Republic could mobilize, unless she left all of her vast dependent dominions of alien and somewhat unfriendly people ungoverned, for it would amount to that.

The Senator from Missouri might have gone a step further, Mr. President. He might have said that not only was there never a moment in the life of this Republic—not only not an hour, or a day, or a week, or a month, but never a moment—when we were "so little likely to be challenged to a war"; but he might have added that there never was a moment when we were so well prepared for it. Two million men who went to France have for the most part come back. God bless those who did not, and those who did. Three million more men, who received from 60 to 120 days of training in military camps in America, are nearly all here. Judging by the life of veterans upon the pension roll, most of them will be here for half a century.

Mr. McKELLAR. And those men here who have had that training in actual warfare will be far better trained than the men being trained to-day.

Mr. WILLIAMS. There is no doubt about that; and, Mr. President, as the Senator from Tennessee has said, the men who received the training, who are here, and who are not wounded, and are not maimed, have received a training far superior to what this scheme in this bill will give them, for this scheme is a scheme of short training.

Mr. President, taking those two things together, I say that for the American Republic to be afraid, for the population of these United States to be afraid, is to confess themselves cowards. It is like a great, big, grown man being afraid of a child with a popgun. Where is the balance of the world? God pity it and God bless it. God pity it especially—bankrupt, insufficiently clothed, hungry. Is it seeking war? No; merely seeking shelter and food. And here we stand talking about the necessities of national defense. I would as soon go out on the street and confess myself afraid of a pregnant woman armed with a parasol.

Mr. President, the Senator from Missouri was right about another thing. The world has learned not only one thing, as the Senator said, but it has learned two, and the second is worthy of being mentioned in connection with the first which he mentioned. It has not only learned that these people of ours know how to defend not only their homes and themselves, but even their liberties and their ideals and their traditions, when questioned abroad, but it has learned that the other branch of the English-speaking race across the ocean can do all that also. I expect the Kaiser is a little bit ashamed to-day when he thinks of his reference to the old "contemptibles." They died; they died almost to a man—Scotch Highlanders, Scotch Lowlanders, Englishmen from all the shires, Welsh Fusileers; but there was the spirit of Richard of the Lion Heart, of King Hal, and of all the great galaxy of English-speaking heroes behind them, of the men who spoke the language which Shakespeare spoke, who thought the thoughts which Milton thought, and who dreamt the dreams which Tennyson dreamt, all of which these people outside of the sacred race, language, and its literature, its commerce, and its law, can hardly understand. They think of us somehow as "shopkeepers" over there and "money grubbers" over here; and we are, when that is what we are trying to do—to succeed in business. But they have learned now to speak of us as defenders of democracy and ideals and traditions when that is what we are trying to do.

I would "take foul scorn to myself" that I, as a part of this American Republic, should talk about us defending ourselves from an impoverished Europe, a maimed and crippled Europe, a fatherless and widowed Europe, a discordant and choatic Europe, a mutually hating and mutually weakening Europe. But I do not know what I would take to myself—it would be worse than foul scorn—if I thought to prepare to get ready for an attack from little Japan, an attack across the Pacific Ocean from Japan. She would be bankrupt within six weeks after she declared war against us. The whole money power of the world would be in the other scale with us and against her. All the timidity and the cowardice and the fear of the world would be in the scale with us and against her. Nearly all the civilization, the literature, and the commerce of the world would be in the scale with us against her; and besides that, she has a ruling class which has proven its wisdom, and that wisdom has counseled them to have no trouble with us unless they could have the fleet of Great Britain behind them, and even then it would be only a water fight. Do you imagine for a moment that they could ever get the fleet of Great Britain behind them? Great Britain refused to renew the late treaty except upon condition that if there were trouble between Japan and the United States England's promises were void. Why? Simply because blood is thicker than water; that language is the expression of thought, and we have a common thought; that literature is the mausoleum in which past thought is treasured up, and we have a common mausoleum; that religion makes us akin by its very heterogeneity in both countries, but nearly all Christian, professed at any rate; that the common law makes us akin; that we have the same rules of commerce and of debt payment and of commercial honor.

Mr. President, I have stood in my time in another branch of this Congress, appealing to the men of the Pacific slope in a great racial issue to save a civilized minority from a majority of veneered savages. I met with some response, but not much. They come here to-day, appealing to me in behalf of a civilized majority against a semicivilized minority.

I can understand the superior man appealing for help against an overwhelming majority of brute force, but I can not understand the superior man, when he has the majority, appealing for help against a minority of brute force.

Whence has the danger all come? Whence the need of an Army of 175,000 men, whence the need of 150,000 men, whence the need of 125,000 men, whence the need of 100,000 men?

Mr. President, let me look at the dollar side of this thing. Those of you who know me well know that is a side to which I do not often look very intently, either in my private affairs or any other affairs, because I think it is generally a secondary consideration. If a thing is worth money, no matter how much money it requires, and you have the money or can raise the money, then take it and pay for it and be done with it. But what is a dollar? It is an agreed sign and token of certain intrinsic value marking the measure of interchangeable value, amongst other things. When we come to the question of marking the interchangeable values between the wealths of peace and the glories of war there are some thoughts that must interest us.

What is a Government dollar—a dollar in the Government Treasury? My dollar is a dollar that I have earned; but what is a Government dollar? Is it a dollar that the Government has earned? No; not a Government in the world ever earned a dollar since the world began. Every dollar that drops into a Government till was first extracted from some citizen's pocket. It does not fall like manna from heaven to bless the chosen people. Some flesh-and-blood man, woman, or child works for it, delves for it, sweats for it, thinks for it, feels for it, plots for it, and more or less surely gets it, and after a while the Government takes it away in part.

What is the only excuse of the Government for taking a dollar away from me or you? It is that the Government *must* have it. Must have it for what? For a purpose higher than my individual need or use. What are the purposes higher than my individual use? Common defense, common civilization, protection of life, liberty, and property.

When we come to consider the dollar as a measure of interchangeable values between war purposes and peace purposes, what happened the other day? We saved $35,000,000 a year on one vote. By reducing the so-called skeleton Army from 175,000 to 150,000 men we saved $35,000,000 a year. Measured in Army men and ammunition that is what it comes to. Now, what is it measured for peace purposes? The first thought that occurs to me is that we need right now $30,000,000 to put into fireproof hospitals for shelter for the maimed and crippled and gassed from the last war. That saving in one year would build those hospitals and leave $5,000,000 over to go to other purposes besides the saving for the future.

But that is not all. Measure that amount of dollars in education, new schoolhouses, better-paid school-teachers. Measure it in transportation, superior and better equipment for railroads, better highways. Measure it in social uplift, if you can. It is impossible to state how you should measure it there, because every dollar put into social uplift is equal to twenty dollars spent without reproduction.

Mr. President, in this world of ours "knowledge comes, but wisdom lingers," and the trouble with men as a rule, in my opinion, is that they are always going around hunting so-called "expert" advice. The expert has knowledge, but almost never has wisdom. Nearly always all he knows is facts; all he knows is detail. His mind never rose to a conception which means a unison of the mind of man with the mind of God, which constitutes wisdom, and he is always thinking about his technical training.

He is like the old fellow in Athens who wanted to hang hides on the fortress wall. After a stone-quarry man had spoken and recommended stone, and the brickmakers had recommended brick, he said, "But, after all, men of Athens, there is nothing like hides." Show me a man who has had the experience necessary to make him an expert upon petty details and I will, as a rule, show you a man who has not a general concept of any description. I will show you a man who is like the fellow who got into a dark closet with the limburger cheese, thinking that he had opened the door outdoors. When his wife asked him what about the weather, he said, "I don't know, but everything is as dark as hell and smells like cheese." He thought the entire universe—terrestrial and celestial—was one great big bundle of limburger cheese—darkness.

I have known men who would spend all the money of the Government in order to carry out a biological experiment in the Agricultural Department. I have known other men who would spend it all, or nearly all, trying to perfect the wings of an airplane. I know a number of naval and military men who would take every dollar of our annual revenues, one for the Army and leave nothing for the Navy and the other for the Navy and leave nothing for the Army, and both of them leaving nothing for civil life, for education, for social betterment, for the uplift of men and women, for making the children of the next generation better than the children of our generation, and the children of the next generation after that still better again; taking all for present might, nothing for future right.

I am tired of this everlasting prating about force. Force does not conquer in the world except primarily and for a short time. In the long run the spirit which informs force and which is behind it—traditions, ideals, and thought—conquers the utmost brute force that ever was. There is no instance of it similar in all history to that of our cousins across the sea. Not once but many times now have they prevented world dominion, totally unprepared according to all the doctrines of sailors and of soldiers.

Spain first threatened world dominion and the little ships of Britain went on, and between God's dear winds and their own sailorship the armada was scattered to the winds. Louis XIV next threatened world dominion, and the wit and wisdom, the statesmanship and sailormanship of the English-speaking race settled that little dream, and we English here in America were part of it.

Then the time came when Napoleon had a great big machine built up magnificently by the French Revolution, with an informing spirit of freedom behind it, and again the sea power and free thought of the English-speaking race defeated him, although toward the close of the struggle it was divided against itself, this part of it over here in America fighting against that part over there in Europe.

In God's name, why should I be afraid of Germany now? Ideals, such as she had, destroyed; the notion that might makes right gone to the grave; Prussian junkerdom, bankrupt, humiliated, feeling stupid; socialized industry all in anarchy. Nobody ever was much afraid of Austria nor of Hungary nor of Turkey; even the cowards were not afraid of them in peace times, before the war. And now we are going to fall back on being afraid of Japan. Let us have a great big Army to meet a possible invasion from Japan and a great big Navy to whip a Japanese Navy at sea!

Old Bismarck had a good deal of sense. One day some one said to him, "Prince, have you ever studied out a method of landing a German Army in England?" "Oh, yes;" he said, "I have 20 plans, all of them perfectly feasible, but I have never studied out a plan for getting the army out of England after I landed it." Japan might land a million men on the Pacific slope to-morrow, if you can imagine it possible, and they would have California currants and fruits and grapes and a little wheat to feed on until they had been starved to death, unless they could keep control of the seas and unless, in addition to keeping control of the seas all the way back to Japan, they could keep control of the sea routes to the food-producing countries of the world, of which Japan herself is emphatically not one.

People used to make a great deal of fun of us down South for being scared about the white man's civilization. I heard Tom Reed say once that "if he was half as much afraid of niggers as most people in the South seemed to be, he believed he would move out." But I have lived to see the day when a white man on the Pacific slope is scared of about 5 per cent of the population around him. We had at least the excuse of fearing for our civilization because it was threatened in several States by a majority of from 60 to 70 per cent, and yet in the real sense we were never scared—that is, we were not scared of the local situation. We were scared of outside interference and outside help to the numerical majority which, in our opinion, we believed to be an inferior race.

Mr. President, I wish I could hear some one say something outside of purely technical detail about "skeletons" and "full-fledged" armies, and that sort of nonsense, that could convince anybody that the Government needs even 100,000 men in the Army. I can imagine an argument in favor of the Navy; I can imagine that, although I do not think it is sound. I can easily imagine an argument in favor of an overwhelming air force. I think it is sound. But it surpasses my comprehension how we can stand here, with the blood of our ancestors on both sides of the ocean in us, and profess that we have got to have this big stick to protect ourselves against—I started to say an enemy—but not even against an enemy; against nobody; against no threat of any description. But when we come to consider that every dollar in the Government's till is taken out of the pocket of a citizen, that every dollar appropriated to one purpose is subtracted from another purpose, and that every dollar appropriated to destructive purposes is subtracted from reproductive purposes of some description, the situation is still worse.

I would rather take this $35,000,000—the difference between an Army of 150,000 and 175,000 men—and give it to a committee to distribute amongst the deserving poor than to appropriate it to this timid, cowardly, senseless purpose. It is almost like a man buying two coffin plates for himself when he thinks he is going to die, when he ought to know that one is enough, and when God knows that he would get along very well without any at all.

I am simply yearning in every pore of my body to hear some intelligent human being utter a word showing it to be necessary or vital or even important for the American people to have 175,000 men in their Army. Oh, I have heard one argument, but that is not the argument that controls this body, I hope. The other day we voted through by a decent majority—of how much I do not remember—the motion to reduce the Army to 150,000 men; but to-day the Senate reverses itself. I have heard, and the people have heard, no reason for that reversal. It has not been avowed upon the outside, at any rate. No reasonable argument has been made for it by any man, but I have heard this morning a reason, which was given me by a very frank, intelligent, and brave man. I asked, "What do you want with all these troops?" He said, "To keep down the lawless elements in the United States." Not to meet foreign aggression, but to overcome internal discord—some yet unborn but anticipated American bolshevism, perhaps!

Mr. President, let me say this: Whenever the American people, with their magnificent middle class, their educated men, reach the point where the only thing that can keep down disorder and bolshevism is an army, their liberties and their order have already disappeared.

I was once in the town of Dijon, in France, when Gen. Chanzy was sent there by order of Marshal MacMahon to take a liberty cap off a statue. I turned to a friend of mine and said, "It is absurd to send pretty nearly a division of the French Army here to take a liberty cap off a bronze statue." He said, "But you do not know these reds, Bonets Rouges," he called them at that time, Red Bonnets, Red Caps. He said, "If you ever let them get above the surface, all is lost." I said, "Whenever a majority of the citizenship of a country can think that, everything is already lost." Whenever the gentlemen of a country are not willing to go down in the gutter and fight its riffraff, then it has all gone anyway. So if there be in any man's heart the idea that he is going to preserve order in America against bolshevists or reds with something of an army, let him get rid of that idea. We may do it for a certain length of time, but it can not be done forever, because unless you have in the hearts and minds of your citizenship that which will overcome the anarchistic forces of revolution and chaos it is only a question of time when you must give up anyway, and life, liberty, and property cease to be secure amongst you. It all depends on your willingness to fight, to fight individually and in the gutter, and one gentleman in the gutter is equal to three of these fellows, even though he may be physically but half their strength.

You do not need this Army for foreign purposes; we do not need it for police purposes. It will hurt us economically; it

will hurt us industrially; it will hurt the great peace purposes of an enlightened civilization; it will be an absolute waste of money and will not satisfy anybody except the fellow who has been in a dark closet with nothing but limburger cheese, whether in the Navy or in the Army, and can not smell anything except military or naval affairs.

No man has a higher regard for Gen. Pershing than have I. In my opinion he made the second best military record in all this war. He made it quietly, like a gentleman; he neither rushed to the front for glory, nor went to the rear for safety. He dared the unpopularity of his men, with all the history of America behind him showing that great popular military chiefs become Presidents, in order to maintain discipline and to have an efficient army and to do the American people's work in France and in Flanders. However, when it comes to taking his advice about the size of an army, I had just as soon take a darky's advice about the fatness of a possum. Of course, the darky favors the heaviest possum. His whole education has been of a military character; his entire line of thought is toward military affairs. We might just as well take the utmost partisan in this body on the Republican side, and ask him coolly to consider the clash between his school and the opposing school of politics, or take me and ask me coolly to consider the clash between my school of politics and yours. I would do the best I could at it, but I would be utterly incapable of coming to an impartial conclusion. So with Gen. Pershing.

During Mr. WILLIAMS's speech,

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The READING CLERK. A bill (H. R. 15130) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes.

Mr. CURTIS. I understand it is the desire of the chairman of the Committee on Military Affairs to dispose of the pending joint resolution this afternoon. So I ask unanimous consent to lay aside temporarily the unfinished business for the purpose of considering the joint resolution only.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. HARRISON. I wish to make a parliamentary inquiry. This is Calendar Monday. Is the calendar in order after 2 o'clock?

The VICE PRESIDENT. It is not. The Senator from Mississippi will proceed.

After Mr. WILLIAMS's speech,

Mr. BORAH. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Idaho suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	McKellar	Simmons
Beckham	Hale	McNary	Smith, Ariz.
Borah	Harris	Moses	Smith, Ga.
Brandegee	Harrison	Myers	Smith, Md.
Calder	Heflin	Nelson	Smoot
Capper	Henderson	New	Spencer
Colt	Hitchcock	Norris	Sterling
Curtis	Johnson, Calif.	Overman	Sutherland
Dial	Johnson, S. Dak.	Page	Swanson
Dillingham	Jones, N. Mex.	Phelan	Townsend
Fall	Jones, Wash.	Phipps	Underwood
Fernald	Kellogg	Pittman	Wadsworth
Fletcher	Kenyon	Poindexter	Walsh, Mass.
France	Keyes	Pomerene	Walsh, Mont.
Frelinghuysen	King	Ransdell	Warren
Gay	Kirby	Reed	Williams
Gerry	Knox	Robinson	Willis
Gooding	La Follette	Sheppard	

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Seventy-one Senators have answered to their names. There is a quorum present.

Mr. BORAH. Mr. President, I shall detain the Senate only a moment, as I am very anxious to have this joint resolution disposed of one way or another. I prefer to have it disposed of in my way, but I want it disposed of. The sooner it is disposed of the sooner the enlistment will stop and some of the unnecessary expenditure be stopped.

If we have an Army of 175,000, we save about $150,000,000, and if we reduce it to 150,000 we save about $175,000,000. In other words, the difference between 150,000 and 175,000 men represents an expenditure of from twenty-five to thirty million dollars. I think those figures are generally conceded to be correct. So far, therefore, as the saving to the Treasury is concerned, there is very little dispute. Thirty million is not much, considering the reckless way we spend money, but I feel the overburdened taxpayer will be thankful for even small beginnings.

The controversy arises over the other proposition. The able Senator who is the chairman of the Military Affairs Committee stated upon last Friday, when interrogated as to the necessity of this Army, that he did not anticipate any trouble from foreign powers, but that he had in mind our domestic situation, the utilization of the Army for police purposes. I read the statement in order that I may not misquote the Senator. I asked this question:

> The Senator concedes, does he not, that if we should have trouble with a foreign power 150,000 men would be just about as effective as 175,000 men?
>
> Mr. WADSWORTH. I am not anticipating trouble with any foreign power. I have in mind the demands which may come upon the Regular Army to perform what is equivalent to police duty. It has been called upon several times heretofore to perform such duty, and there is a great possibility that it may be called upon in the future to perform similar duty.

That has not only been stated upon the floor of the Senate but it has been the argument which has been passing about in the cloakrooms and elsewhere, as to the necessity of holding this Army up to 175,000 men; in other words, that the police obligation—an obligation which ought very seldom to be placed upon the Army at all—is going to require an Army of 175,000 men. The people are asked to maintain an Army of 175,000 men not to protect us from foreign foes but to protect us from ourselves. It is a far larger Army than we need for that purpose.

Mr. President, if we were considering the question of preparing for an actual conflict with some foreign power, or were considering a program of preparedness for war, I should accept the judgment of Gen. Pershing and that character of men without any hesitancy, and should abide by their views. But if we are creating an Army for police purposes, and police purposes only, I think a layman may be permitted an opinion upon that subject perhaps of equal moment with that of an expert, and I am utterly opposed to an Army of 150,000 men or 175,000 men for such a purpose. If the only object and purpose of the Army is that of police duty in the United States, we do not need it, and its presence here and the burden which it imposes upon the people are more calculated to increase discontent than to compose the situation in which we now find ourselves.

If we were going to have any difficulty with a foreign power we would not reduce this Army at all, or if anyone anticipated in the slightest way any difficulty from abroad we would not reduce it below the figure which was provided for in the Army reorganization bill. It must be, therefore, that we are placing ourselves in the position before the country of retaining an Army of 175,000 men to keep the peace in the United States, and I am unable to vote for any such proposition.

Gen. Pershing stated that there is a condition of discontent, of restlessness. I am not now quoting his exact language, because I have not seen it. I am only quoting that which he is reported in the newspapers to have stated. I know that there is an element of discontent, not only in our country, but throughout the world; but it arises not from conditions which an Army of 175,000 men will tend to settle, but from another condition of affairs, and that is the ever-increasing and growing burdens which are placed upon the people, and which the people see no way of escaping from, under the present program.

Let me call attention to the state of our expenditures at the present time. These figures were gathered by Dr. Rosa, of the Bureau of Standards:

Our appropriation in 1920 for past wars was $3,855,482,586.

Our appropriation in the same year for education of the people of the United States was $57,093,661.

In other words, our appropriation for past wars was 68 per cent of all the appropriations made by Congress in 1920. Our appropriation for education was 1 per cent of all the appropriations made by the Congress of the United States for 1920.

That is a more deplorable record than Germany ever had; it is an infinitely more deplorable record than the soviet government has now; and that is what is causing the discontent, the restlessness, and the utter loss of faith both in Government and in political parties to relieve the people of the burdens under which they are now bending.

Our appropriation in 1920 for future wars was $1,424,138,677, or 25 per cent. Add that to your 68 per cent, and you have 93 per cent of all the appropriations made by Congress in 1920 for the purposes of war, past or anticipated.

Our appropriation for civil departments was $181,087,225; for public works, $168,203,557.

If any reason had been given to the committee or to the Senate upon which one could base action relating to anticipated difficulty, of course we would not stop with 175,000 men; but the able Senator from New York says that an Army of 175,000 men makes the Republic perfectly safe, if he is correctly quoted in an interview which was given out Saturday after

the vote, and that an Army of 150,000 renders it unsafe and insecure.

Mr. WADSWORTH. Mr. President, I did not give out any interview at all.

Mr. BORAH. The Senator undoubtedly saw the interview which was said to have been given out.

Mr. WADSWORTH. I have not seen any interview attributed to me.

Mr. BORAH. Then I will correct that and take another cue, that the Senator is advocating here upon the floor 175,000 as rendering the situation safe, and opposing 150,000 because it would render the situation insecure and unsafe, and the difference between the two is 25,000 men. I have the utmost respect for the judgment of the Senator from New York. However, it must be an arbitrary figure, an arbitrary judgment, unless, Mr. President, it is based upon what a member of the Army told me Friday night, to wit, that if you reduce it to 150,000 you interfere with the official conditions in the United States Army.

He said he knew of one captain who had 6 men under him, and perhaps if we reduce it to 150,000 he may have but 4 men under him, which would make it very difficult, of course, for that officer to earn his money. The fact is that we have built up a vast scheme organization, and it seems necessary, in the judgment of those who are advocating 175,000 men, to keep enough men to give color at least to the necessity of the official organization. It is thought unwise to impeach in any way this great scheme, so we must have enough men to justify the scheme.

Mr. President, then there is no hope in the future of reducing the number of men at all. We must always keep 175,000 men in the field in order to give color to the maintenance of the Army organization which we have. We must take that in hand some time, and I see no reason why we should not do it now, as well as later.

We can certainly cut off twenty-five million or thirty million here if it is a mere question of protecting the domestic situation, better than we can deprive the men who went into the Great War—and who have come home disabled, crippled, afflicted for life—of the hospital necessities which they are entitled to have. I am informed that they eliminated in the House the other day, either before the committee or in the House, a proposed appropriation of some $20,000,000 to build hospitals, and I am also informed by a party who is in a position to know that the young men who went into the war are traveling upon the streets and running at large in a mental condition which makes them unsafe to the community, and that men afflicted with the dreadful disease of tuberculosis are dropping dead upon the streets for want of care and protection.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Missouri?

Mr. BORAH. I yield.

Mr. REED. I take it the Senator is familiar with the fact that the charge has been made in the press that a number of these ex-soldiers have been put in public almshouses by the Government and are maintained there along with the pauper patients. There was a "whitewash" report denying that occurrence, which I have had some occasion to examine, and I affirm that it is true; that they did that very thing in the city of Chicago.

Mr. BORAH. Mr. President, I am sure that no Senator here who has examined into the situation will deny that the condition of affairs is deplorable in that respect. We feel under the necessity of cutting down those appropriations. We feel under the necessity of curtailing expenses in those regards. It does seem to me, Senators, that if it is a mere matter of protecting our domestic situation, if we anticipate no trouble from abroad—and none has been pointed out—that it is the part of wisdom, it is the part of patriotism, to disregard the mere Army organization, for a season at least, and transfer the twenty-five million to the boys who served in the Great War, who are dying for the want of care. I venture to say that we will continue to trim and curtail in such instances, rather than in this matter.

I do not criticize those who think we ought to have 175,000 men, but I do think that they ought to state a reason other than the mere fact that it is an arbitrary figure which has been fixed by those who are interested in the Army reorganization bill. This is a serious matter, this piling up these great expenditures which a discouraged and anxious people will have to pay. We are pledged to economy and we are also pledged by every principle of humanity to care for the brave fellows who contracted disease in the service of the Nation. Let us act in good faith with the taxpayers and cut to the bone. Let us save everywhere we can for another reason, and that is that we may deal in decency and justice with the crippled and the afflicted.

Mr. SMITH of Arizona. Mr. President, I have been in favor of an Army of 175,000 men, but the arguments made by the Senator from Idaho, and by others who preceded him, have weakened me in my position. Does the Senator think that if we eliminate 25,000 men, if we reduce the number from 175,000 to 150,000, we can use the money saved toward taking care of the very men he is talking about, some of whom are wandering on the streets of my home town suffering from tuberculosis and with no place to go? I am informed that the city of Prescott, with five or six hundred beds, is not able to take care of half of the ex-soldiers who are seeking some sort of relief, and I confess that I shall be led to vote with the Senator in the hope that we may divert all of the money possible to the aid of those men who were hurt in the last war.

Mr. BORAH. Mr. President, I am unable to assure the Senator that we can transfer it, but the Senator knows, as well as I, that if we continue making expenditures of this class it will be absolutely necessary that we cut somewhere, and we will cut those who are dying rather than those who are still exerting power.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Utah?

Mr. BORAH. I yield.

Mr. KING. Has the Senator made any investigation with a view to ascertaining whether or not those who have charge of the appropriations made to care for those disabled soldiers have properly expended the money? If the Senator will pardon me, my recollection is that we appropriated for the current year some two or three hundred million dollars. I have heard many complaints of inefficiency and maladministration by the boards which have charge of the expenditure of that money. It has been charged that if they had properly applied it, the evils of which the Senator complains would not exist; that there was an ample amount appropriated to properly care for all of the wounded and disabled men, but that the boards that have had the expenditure of the money have been grossly inefficient, have wasted the money, have consumed it in salaries and in useless and unnecessary expenditures. Can the Senator give us any information as to that?

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Arizona?

Mr. BORAH. I yield.

Mr. ASHURST. On last Saturday morning I read to the Senate a letter from the Surgeon General of the United States Public Health Service, in which he pointed out that, in round numbers, 10,000 beds are urgently needed for discharged soldiers who are afflicted either with tuberculosis, or neuro-psychiatry—that is, insane men—and he pointed out that those ex-soldiers were absolutely without facilities of hospitalization, that 10,000 beds were urgently needed, and he urged that Congress should pass the bill introduced by the Senator from Maryland [Mr. FRANCE], and reported favorably to the Senate, that 10,000 beds, at $3,000 apiece, be provided, making the appropriation $30,000,000. It was stated this morning on the floor of the Senate that $10,000,000 would be appropriated. I ask Senators to read the letter from the Surgeon General, and I ask them, why do you select the arbitrary figure of $10,000,000, when you require $30,000,000 to hospitalize 10,000 men?

Why should not the Appropriations Committee bring in an amendment appropriating $30,000,000, as the Surgeon General requests and the necessities demand?

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Wyoming?

Mr. BORAH. I yield.

Mr. WARREN. Answering the Senator from Arizona, I will say that the sundry civil appropriation bill came from the House carrying total appropriations of $380,000,000. Two hundred and twenty-three million dollars of that is for the very purpose mentioned by the Senator, and like purposes, all for War Risk, vocational education, and the Public Health Service, leaving but about $160,000,000 for all other purposes for the entire United States.

If the Senator will permit me further, that bill is before us, and exactly what the Senator has mentioned is a very live subject. We have had before us the head officer of the Public Health Service; we had before us as lately as this morning the active officer of the vocational education service, and we propose to do something, we propose to do all that ought to be

done, in the judgment of the Appropriations Committee, in the present year, in this appropriation bill, unless in the meantime we shall have here passed a bill which has been reported to the House favorably from the committee, and for which, I understand, a special rule has been adopted, which is likely to bring the measure up at any moment, because it would reach the President sooner than would the appropriation bill. But the matter is having attention.

Mr. BORAH. Is the Appropriations Committee prepared to take care of the appropriation asked for by the Surgeon General?

Mr. WARREN. The Surgeon General does not expect $30,000,000 the coming fiscal year, and we expect to give all that can be used in starting the work. These figures as to the number of patients are predicated upon the figures given by actuaries of insurance companies, and cover what they think we shall have to provide for in the future.

Mr. BORAH. I am speaking of taking care of those boys who will not have to be taken care of a year from now. They will be called hence long before that time unless they are taken care of at once.

Mr. WARREN. Does the Senator allude to those who are in the hospitals now?

Mr. BORAH. Those who are in and those who are unable to get in.

Mr. WARREN. Those who are unable to get in? Surely there is nothing to prevent them from coming in, for the money has been appropriated and is available for the purpose.

Mr. BORAH. They have not the hospitals to put them in.

Mr. WARREN. I have not the testimony before me, but the testimony of the Surgeon General is that no soldier is allowed to suffer. But they have to rent hospitals here and there, rent buildings which are not properly fitted for the purpose, and use the temporary structures erected during the war, which he very justly wants to replace with good hospitals.

Mr. POMERENE. Mr. President, if the Senator will permit me, in view of what the chairman of the Appropriations Committee has just said, I wish to remind him that I was told some time ago that in one of the hospitals for the treatment of tubercular patients the rule was that patients could be kept there for a certain number of weeks for observation and treatment, and in the event that they were pronounced incurable, at the end of that time they would have to leave the hospital, and no provision was made for them thereafter. I do not know that that is true, but it came to me in such a way as to challenge my belief. If it is true, certainly all who believe in the principles of humanity would be in favor of taking care of them, and giving them the very best care possible.

Mr. WARREN. If that is true, as the Senator states, it is because of the acts of the board having the matter in charge, and not because of a lack of appropriations, or care on the part of Congress.

Mr. BORAH. Mr. President, does the Senator from Wyoming say that there has been no lack of appropriations to take care of the situation, with reference to ex-soldiers afflicted with disease, as those appropriations have been thought to be necessary by the department?
